Customer Support

Customer Support hours

Customer Support is available 7x24x365 via email, phone, and Web access.

Depending on the Support option chosen by a particular client (Standard, Plus, or Premium), the times that certain services are delivered may be restricted. Severity 1 (Critical) issues are addressed on a 7x24 basis and receive continuous attention until resolved, for all clients on active maintenance. Retek customers on active maintenance agreements may contact a global Customer Support representative in accordance with contract terms in one of the following ways.

Minneapolis, MN 55403

When contacting Customer Support, please provide:

- Product version and program/module name.
- Functional and technical description of the problem (include business impact).
- Detailed step-by-step instructions to recreate.
- Exact error message received.
- Screen shots of each step you take.

Overview

RSM is an application that provides a retailer's Retek applications with a centralized method of authenticating and authorizing system users. RSM leverages a Lightweight Directory Access Protocol (LDAP)-compliant directory service to authenticate valid users. RSM provides centralized administration screens for system administrators to:

- Safely pass encrypted passwords
- Maintain roles
- Add workflow permissions roles
- Create data permissions and assign them roles
- Assign users to roles
- Maintain external Retek passwords

See the RSM Install Guide, Operations Guide and User Guide for more detailed information relating to Retek Security Manager.

Features

- The 11.0.2 release of RSM includes a Graphical User Interface. The GUI is responsible for presenting data to the security administrator and for receiving data directly from the security administrator through the 'front end'. It was developed using a Java Swing framework, which is a toolkit for creating rich presentation in Java applications.
- Certification of OpenLDAP as a valid directory server with RSM

Notes

- RSM 11.0.2 is a full installation, not a patch of RSM 11.0 or of RSM 11.0.1. If this version of RSM is being installed over a previous version of RSM, all data in the RSM database is overwritten during installation. To retain your existing data, be sure to back up the existing tables or export the data to flat files.
- Retek Price Management (RPM) is dependent on RSM for authorization and authentication, RSM should be installed prior to installing RPM. RSM is dependent on RPM to administer RPM's data level permissions; RPM must be installed before testing this functionality within RSM. Please see both the RPM and RSM installation and operations guides for further information.
- Retek Navigator is dependent on RSM for authorization and authentication. RSM should be installed prior to installing Retek Navigator.

- RSM 11.0.2 has been tested with the following Retek application versions:
 - Retek Navigator 11.0.2
 - RMS 11.0.2
 - Retek Allocation 11.0.2
 - ReIM 11.0.2
 - RPM 11.0.2
 - RIB 11.0.2
 - RETL 11.2.1
 - RDW 11.0
 - ARI 11.0
