

Oracle® Retail Warehouse Management System
Release Notes
Release 12.0.3

April 2007

Copyright © 2007, Oracle. All rights reserved.

Primary Author: Randy Kapelke

The Programs (which include both the software and documentation) contain proprietary information; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent, and other intellectual and industrial property laws. Reverse engineering, disassembly, or decompilation of the Programs, except to the extent required to obtain interoperability with other independently created software or as specified by law, is prohibited.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. This document is not warranted to be error-free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose.

If the Programs are delivered to the United States Government or anyone licensing or using the Programs on behalf of the United States Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the Programs, including documentation and technical data, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement, and, to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software – Restricted Rights (June 1987). Oracle Corporation, 500 Oracle Parkway, Redwood City, CA 94065

The Programs are not intended for use in any nuclear, aviation, mass transit, medical, or other inherently dangerous applications. It shall be the licensee's responsibility to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and we disclaim liability for any damages caused by such use of the Programs.

Oracle, JD Edwards, PeopleSoft, and Siebel are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

The Programs may provide links to Web sites and access to content, products, and services from third parties. Oracle is not responsible for the availability of, or any content provided on, third-party Web sites. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

Preface

A Release Notes document can include some or all of the following sections, depending upon the release:

- Overview of the release
- Functional, technical, integration, and performance enhancements
- Assumptions
- Fixed defects
- Known issues

Because of their brevity, Release Notes do not include chapters, appendixes, or a table of contents.

Audience

Release Notes are a critical communication link between Oracle Retail and its retailer clients. There are four general audiences for whom a Release Notes document is written:

- Retail clients who want to understand the contents of this release
- Integrators and implementation staff who have the overall responsibility for implementing Oracle Retail Warehouse Management System (RWMS) in their enterprise
- Business analysts who want high-level functional information about this release
- System analysts and system operation personnel who want high-level functional and technical content related to this release

Related Documents

For more information, see the following documents in the Oracle Retail Warehouse Management System Release 12.0.3 documentation set:

- Oracle Retail Warehouse Management System Installation Guide

Customer Support

<https://metalink.oracle.com>

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

Release Notes

Overview

This document contains information on the enhancements that have been made to Oracle Retail Warehouse Management System (RWMS), and on the issues that have been fixed in RWMS, since the RWMS 12.0.2 release.

Defect Fixes

A defect fix is a modification to the base Oracle Retail RWMS code (for example, a defect fix, performance enhancement, or functional enhancement). Each defect fix included in this patch has a corresponding BUG document in the \Defect Reports folder titled BUG<*bug-number*>.PDF (for example, "BUG123456.PDF"). You should review these defect documents fully before you implement this patch.

To assist you in the patch application process, there is also a defect module cross-reference spreadsheet in the same folder (DEFECT MODULE XREF RWMS 12.0.3.xls) that lists defects addressed for this patch release.

Noteworthy Fixed Issues

- Scripts are provided to update translation tables for seven released languages.
- Adjustments for transport items are created correctly.
- Component item adjustments are included for simple pack catch weight items.
- There are performance enhancements for the concentric reserve putaway process.

Known Issues

- The product name and version number appear incorrectly for Spanish language users.
- Functionality has not yet been added to RWMS to fully support the multi-level distribution (MLD) functionality previously added to Oracle Retail Allocation. Once implemented, an Oracle Retail Allocation user is able to allocate a distribution center (DC) to DC shipment prior to receipt in the second DC. This functionality causes the merchandise to move as a cross-dock shipment directly to the store from within that second DC. This capability to be integrated with the RWMS receiving modules is actively being addressed by development.
