

# Oracle® Enterprise Manager

System Monitoring Plug-in for Oracle TimesTen In-Memory Database Release Notes

Release 2.2

E21650-02

September 2012

---

This document provides late-breaking information as well as information that is not yet part of the formal documentation.

This document contains the following sections:

- [Changes in this release](#)
- [Platforms](#)
- [Software requirements and installation](#)
- [Known problems](#)
- [Documentation Accessibility](#)

## 1 Changes in this release

This section lists changes between releases:

- [Changes for Release 2.2 from Release 2.1](#)

### 1.1 Changes for Release 2.2 from Release 2.1

- The System Monitoring Plug-in for Oracle TimesTen In-Memory Database release 2.2 supports the metrics in TimesTen release 11.2.2 and TimesTen release 11.2.1.5.0 or later. If you use release 2.2 of the plug-in with TimesTen release 11.2.1, metrics added to TimesTen release 11.2.2 may be zero or blank because these metrics are not supported in TimesTen release 11.2.1.

## 2 Platforms

The System Monitoring Plug-in for Oracle TimesTen In-Memory Database is supported on all platforms that TimesTen 11.2.1.5.0 or later and Enterprise Manager Agent 10.2.0.x and Enterprise Manager Agent 11g support. Enterprise Manager Agent EM 12c is not supported.

## 3 Software requirements and installation

For software requirements please refer to the *Oracle Enterprise Manager System Monitoring Plug-in for Oracle TimesTen In-Memory Database Installation Guide*.

For information on installing Oracle Enterprise Manager Agent 11g:

[http://download.oracle.com/docs/cd/E11857\\_01/index.htm](http://download.oracle.com/docs/cd/E11857_01/index.htm)

For information on installing Oracle Enterprise Manager Agent 10.2.0.5 or later:

[http://download.oracle.com/docs/cd/B16240\\_01/doc/nav/portal\\_booklist.htm](http://download.oracle.com/docs/cd/B16240_01/doc/nav/portal_booklist.htm)

## 4 Known problems

This section lists known problems and limitations.

### 4.1 Collecting metrics

- The plug-in can no longer collect metrics for the target in these situations:
  - If the user of the target is dropped.
  - If the user's password is changed while the plug-in is running.
  - If a database that corresponds to a target DSN is unloaded.
  - If the TimesTen daemon for a target DSN is stopped.

### 4.2 Access Control

- In some versions of Oracle Enterprise Manager, if access control is enabled, after clicking Test Connection, you must re-enter the password. If you click OK to add the target after doing a Test Connection, the plug-in gets a TimesTen authentication error. The password can be re-entered after the target is added by choosing Monitoring Configuration on the target's main page.

### 4.3 Credentials

- The EM Agent Credentials (host username/password) need to be set correctly for the EM Agent to work.

### 4.4 Database destroyed

- If a TimesTen database being monitored by the plug-in is destroyed, the plug-in's script continues to run (unsuccessfully) once per minute until the target is removed.

### 4.5 Direct-linked DSN

- The plug-in is not designed to be used with Client/Server DSNs. Only direct-linked DSNs should be used with this plug-in.

### 4.6 Performance

- The plug-in should not be deployed on the same machine as either the Enterprise Manager Oracle Management Server or the Oracle Enterprise Manager Repository.
- When a TimesTen database is recreated or overwritten, the metrics in the `SYS.MONITOR` table are reset to zero. If the database was being monitored during this re-creation, some performance rates may temporarily become negative. This behavior corrects itself and is not an error. The same behavior may occur with some of the statistics in `SYS.SYSTEMSTATS`.

- The performance of the plug-in reports suffers if the server on which the Enterprise Manager Oracle Management Server or the Enterprise Manager Repository database is low on memory or is CPU bound or I/O bound.

## 4.7 Remove a target

- If you remove a target and try to add it again with the same name, you may get an EM error such as: `java.sql.SQLException: ORA-20600: The specified target is in the process of being deleted.` You can either wait and retry, or use a different target name.

## 4.8 Target properties

- The Target Properties page may lose values (for example, comment, line of business). This does not affect either the accuracy or the performance of the plug-in.

## 4.9 Windows

- The host username must be specified as `windows_domain\username`.
- The security privilege `Log on as a batch user` must be granted to the user who runs the EM Agent service.

# 5 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

## Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.
