Release Notes

CollabraSuite, BEA Edition 5.0

General

- Added an AJAX-based client (thin client) which minimizes the use of the Java Applet
- Added ability to utilize stylesheets so that users may skin the application to match a particular site's look and feel
- Added support for BEA WebLogic Portal 9.2
- Added integration with BEA GroupSpace Communities. CollabraSuite real-time collaboration tools are now available within GroupSpace Communities
- Simplified CollabraSuite proxy configuration when using the thin client

Administration

- Upgraded the administration application to utilize AJAX technology
- Upgraded the look and feel and usability of the administration application
- Added a navigation tree to allow for more easily moving between buildings, floors, and rooms of a campus
- Added ability to administrate the environment from the thin client campus navigator, integrating common administration tasks into the thin client user's experience, for users with appropriate access levels

Release Notes

- Added Administration portlets to integrate CollabraSuite administration functionality into portals
- Added paging of list items to improve performance. In addition, lists can be filtered by criteria.

Reports:

- Moved reporting functionality into a report module, based on AJAX technology
- Added reporting portlets to integrate CollabraSuite report functionality into portals
- Added paging of results to improve performance.

Known Limitations

General

- Some applet client functionality is not available via the thin client. This functionality will be introduced to the thin client in a future release.
- A single user logging into the environment using both the applet client and thin client at the same time is not supported.

Installation

- JBoss application server is not supported in this release. Support will be reintroduced in the next release.

Audio/Video

- A/V functionality is not available in the thin client.

Remote Campus

- Remote Campus access is not available in the thin client.

Chat

- Manual scrolling is not available in the thin client.
- Mark selected text is not available in the thin client.
- Document, folder, whiteboard, and URL links is not available in the thin client.

Documents

- File Cabinet and Briefcase components must be manually refreshed in the thin client.
- View previous versions is not available in the thin client.
- Drag and drop is not available in the thin client.
- Page editor and subscriber is not available in the thin client.
- Search is not available in the thin client.
- Create note is not available in the thin client.

- Export document is not available in the thin client.

Pages

- Save is not available in the thin client.
- Print is not available in the thin client.
- An HTML page editor is not available in the thin client.
- Sorting is not available in the thin client.
- Pending pages do not automatically cause the page viewer to display in the thin client.

Campus Navigator

- Page and view administrators is not available in the thin client.

Whiteboard

- The select tool is not available in the thin client.
- Cut, Copy, Paste, and Delete are not available in the thin client.
- User annotations are not available in the thin client.

Reports

- Export is not available in the thin client.

Priorities

- Priority chat icons are not available in the thin client.
- Priority chat color is not available in the thin client.
- Filter chats by priority is not available in the thin client.

Preferences

- Only a subset of the user preferences available via the applet client are available in the thin client.
