MetaSolv Solution ™ 6.0

Database Change Reference

Fifteenth Edition

January 2009

Contents

About this guide

This guide contains the database changes for the MetaSolv Solution 6.0 release stream, beginning with the changes between 5.2 and the General Availability release of 6.0.2. Database changes for each subsequent service pack will be added to this guide as they are released.

Audience

This guide is for database administrators responsible for installing or maintaining MetaSolv Solution and ensuring the software is operating as required.

Additional information and help

To get additional information or help for MetaSolv Solution, refer to the following resources:

◆ Oracle E-Delivery—Provides access to product software and documentation.

- Visit the E-Delivery Web site at http://edelivery.oracle.com.
- Software and product documentation are contained in the Oracle Communications MetaSolv Solution 6.0 Media Pack.
- Developer documentation is contained in the Oracle Communications MetaSolv Solution Developer Documentation Pack. Access to developer documentation requires a password.

◆ Oracle MetaLink—Provides access to software patches and a searchable Knowledge Base.

- Visit the MetaLink Web site at https://metalink.oracle.com/, and log on using your User Name and Password.
- Click the Patches & Updates tab to search for patches (efixes).
- Click the Knowledge tab to search for technical bulletins, fixed issues, and additional product information. To narrow your search, click the Communication Apps link under Product Categories on the left side of the page.

Oracle Support

The preferred method of reporting service requests (SRs) is through MetaLink. MetaLink is available 24 hours a day, 7 days a week.

Although it is Oracle's preference that you use MetaLink to log SRs electronically, you can also contact Support by telephone. If you choose to contact Support by phone, a support engineer will gather all the information regarding your technical issue into a new SR. After the SR is assigned to a technical engineer, that person will contact you.

For urgent, Severity 1 technical issues, you can either use MetaLink or you can call Support. Oracle Support can be reached locally in each country. To find the contact information for your country, go to http://www.oracle.com/support/contact.html.
