1.6 Sales / VAT Tax Detail Report (R0018P2)

On the Tax Processing and Reporting menu (G0021), select Sales Tax.

Use this program to print the transaction details from the Taxes table (F0018) and provide totals for each tax rate/area for each document type by company.

When you select to print this report, the system additionally processes and prints the Tax Summary Report by Tax Authority (R0018P3) and the Tax Detail Report by Tax Authority (R0018P5) reports. This report provides processing options for you to specify the versions of the Tax Summary Report by Tax Authority report and Tax Detail Report by Tax Authority report.

1.7 Tax Summary Report by Tax Authority Report (R0018P3)

When you print the Sales/VAT Tax Detail report (R0018P2), the system also prints the Tax Summary Report by Tax Authority report (R0018P3).

Use this report to review totals only for each tax authority by tax rate for each company. This report does not have processing options. If you want to change the data selection for this report, you must create a new version of the Sales/VAT Tax Detail report (R0018P2). In the new version, set up data selection, check the version in, and run the version locally.

1.13 Tax Reconciliation File by Tax Rate Area Report (R0018R02)

On the Global Tax Reconciliation menu (G00217), select Report on Reconciled Taxes by Tax Rate Area.

Use this program to print each transaction (totaled by document number) by tax rate/area from the Tax Reconciliation Repository table (F0018R). The system does not provide totals on the report.

This report provides the Country for Tax Rate/Area processing option for you to specify the country for which you want to run the report. The system applies an additional filter excluding the tax rate/areas which were not identified for that country in the Alternate Tax Rate/Area by Country program (P40082). You can leave this option blank to prevent tax rate/areas additional filtering. (Release 9.1 Update)

1.16 Supplemental Data by Data Type Report (R00640)

On the Business Unit Supplemental Data menu (G09312), select Data by Data Type.

Use the program to print a summary of your business unit supplemental data.

This report is based on data that is stored in the Supplemental Database Data Types (F00091) and Supplemental Data (F00092) tables. You can print two versions of this report. One version sorts business units alphabetically, and the other version sorts them numerically. You can choose whether to include the narrative text for each version. The system stores supplemental narrative text as generic text attachments.

3.12 A/R Delinquency Notices Print Report (R03B20)

On the Statement Reminder Processing menu (G03B22), select Print Delinquency Notices. You can also use the Notice Print Program processing option in the Credit Analysis Refresh program (R03B525) to specify that the system runs this program.

Use this program to print delinquency notices. You can run this program in proof or final mode:

- In proof mode, the system prints notices and designates them as proof. The system deletes the records that it temporarily generated to print the notices from the A/R Notification History (F03B20) and A/R Notification History Detail (F03B21) tables.
- In final mode, the system prints notices and creates records in the F03B20 and F03B21 tables and updates fields on the invoice records in the Customer Ledger table (F03B11).

3.30 Apply Receipts to Invoices Report (R03B50)

On the Automatic Receipts Processing menu (G03B13), select Apply Receipts to Invoices.

After creating unapplied receipts or drafts or logged receipts, you must apply the receipts to invoices by running this program. This program determines the information that is necessary for the system to match a receipt to an invoice or a group of invoices based on the algorithms that are set up on the execution list and the information that is provided in the receipt records.

3.31 Statement Print Report (R03B5001)

When you run the Statement Notification Refresh report (R03B500X), the A/R Statement Print Driver (R03B5005) generates the Statement Print report (R03B5001).

Use this program to print standard statements. Use processing options to customize statements for the organization. This enables you to specify whether to print aging or account summary information on the statement, whether to print each invoice pay item or summarize the pay items for each invoice, and the date to print on the statement.

3.42 Convert Unapplied Receipts to Credit Memos Report (R03B620)

From the Period End Processing menu (G03B21), select Convert Unapplied Receipts to Credit Memos.

You may need to convert unapplied receipts to credit memos in order to issue refund checks to customers. For example, you may need to create a refund check if a customer overpays.

Although unapplied receipts represent a credit to the customer, the system does not allow you to process unapplied receipts (RU document type) in the Credit Reimbursements program (R03B610). The system does not process the RU document type because unapplied receipts are generated from a receipts program which creates additional records in the Receipts Header (F03B13) and Receipts Detail (F03B14) tables. Therefore, to reimburse a customer for an unapplied receipt, you must close the unapplied receipt and create a credit invoice to replace the unapplied receipt.

Follow these steps in sequential order:

1. Run the Convert Unapplied Receipts to Credit Memos program (R03B620). Use data selection to specify one or multiple unapplied receipts.

When you run the Convert Unapplied Receipts to Credit Memos program, the system converts unapplied receipt records in the F03B13 and F03B14 tables to credit memos in the Customer Ledger table (F03B11).

2. Run Credit Reimbursements program. You can run this program manually or use the processing options in the Convert Unapplied Receipts to Credit Memos program to run the program automatically.

When you run the Credit Reimbursements program, the system pays open credit memos and generates vouchers to reimburse to the customer.

You can reimburse unapplied receipts whether the receipt is posted or not posted.

Note:

The system does not pass the data selection from the Convert Unapplied Receipts to Credit Memos program to the Credit Reimbursements program. Therefore, if you set the processing option in the Convert Unapplied Receipts to Credit Memos program to run the Credit Reimbursements program automatically, you must set the data selection in the Credit Reimbursements program prior to running the Convert Unapplied Receipts to Credit Memos program.

3.43 Credit Reimbursement Report (R03B610)

On the Period End Processing menu (G03B21), select Generate Reimbursements.

In proof mode, use this program to print a list of eligible documents. The system generates a separate reimbursement record for each customer, company, and currency combination, and prints it on the report.

In final mode, use this program to process credit reimbursements by selecting documents from the list of eligible documents. The system:

- Creates a receipt in the Receipts Header (F03B13) and Receipts Detail (F03B14) tables to close the selected invoices.
- Creates a batch of receipts (batch type RB), which you must post.

When you post the receipt batch, the system debits the A/R trade account and credits the suspense account specified by the AAI item NC.

- Changes the pay status on the invoices to P (paid).

- Creates a voucher in the Accounts Payable Ledger table (F0411) with a document type NO.
The system does not create vouchers with tax information from the credit memo.
- Creates a batch of vouchers (batch type V), which you must post.
When you post the voucher batch, the system credits the A/P trade account and debits the suspense account specified by the AAI item NC.

3.49 Recycle Recurring Invoice Report (R03B8101)

On the Other Invoice Entry Methods menu (G03B111), select Recycle Recurring Invoices.

After you enter, review, and revise recurring invoices, you recycle them to create a new batch of transactions for the next month, quarter, or year. Use this program to generate a new transaction based on the number of payments and the recurring frequency that you specified when you created the original recurring transaction. When you recycle an invoice, the system makes a copy of the previous transaction and updates the appropriate fields.

4.1 Batch Update for Multi-tiered A/P Report (R005141)

On the Payment Terms Revisions menu (G00141), select Update A/P Vouchers.

Run this program to update the discount amount and discount due date on your vouchers according to the tiers that you set up for the multitiered payment term that you assign to them.

Review the Batch Update for Multi-tiered A/P report (R005141):

4.7 Purge F0413 Interoperability Table Report (R0413Z1)

On the Financials Interoperability Processing menu (G00313), select Purge F0413/F0414 Interoperability Table.

Use this program to remove outbound processed payments from these tables, regardless of the batch in which they exist:

- F0413 Interoperability Table (F0413Z1)
- F0414 Interoperability Table (F0414Z1)
- F0911 Interoperability Table (F0911Z4)

This purge program does not affect payments in the Accounts Payable - Matching Document (F0413) and Accounts Payable Matching Document Detail (F0414) tables.

4.40 Calculate Withholding Report (R04580)

On the Automatic Payment Processing menu (G0413), select Calculate Withholding.

When you run this program, the system:

- Selects voucher pay items with a pay status of% (percentage) (withholding applies).
- Calculates withholding amounts using the withholding percentage in the supplier master record.
- Updates the pay status on the original voucher pay item from% (percentage) to the value that is designated in the processing options.
- Creates a negative pay item for the withholding amount with the same payee, pay status, and due date as the original voucher pay item.
- Creates a pay item for the withholding amount using the tax authority in the supplier master record.
- Produces a report that either lists the new pay items and the pay status of each item or lists the vouchers that were not released for payment and the error that is associated with each voucher or pay item.

4.50 Post Drafts Payable Report (R04803)

On the Automatic Payment Processing menu (G0413), select Post Outstanding Drafts.

After a draft is paid and closed, use this program to post it to the general ledger. The system changes drafts with a pay status of # (draft selected) to P (draft paid). The system then generates and posts journal entries that debit drafts payable and credit the payables bank account, and prints a post report.

4.51 Recycle Recurring Vouchers Report (R048101)

On the Other Voucher Entry Methods menu (G04111), select Recycle Recurring Vouchers.

When you run this report, the system:

- Removes the recurring frequency and number of payments from either the original transaction or the most recent copy of the transaction.
- Creates a new invoice and voucher.
- Creates an exception report that lists the number of invoices and vouchers that were successfully recycled, and the number of transactions that could not be recycled due to errors (exceptions).

5.6 Refresh Cash Forecast Data Report (R00522)

On the Cash Forecasting menu (G09319), select Refresh Cash Forecast Data.

When you run this program, specify in the processing options a based-on date and the future number of days in which to create cash forecast data. The system then calculates the ending date. To refresh data from the JD Edwards EnterpriseOne Accounts Receivable, JD Edwards EnterpriseOne Accounts Payable, and JD Edwards EnterpriseOne General Accounting systems in the Cash Forecast Data table (F09522), you specify a version for the Extract A/R Cash Forecast Data (R03B522), Extract A/P Cash Forecast Data (R04522), and Extract G/L Cash Forecast Data (R09522) programs.

The extraction programs perform these tasks:

- Retrieve active cash type rules for A/R, A/P, and G/L from the Cash Type Rules table (F09521).
- Extract cash forecast detail from the Customer Ledger (F03B11), Accounts Payable Ledger (F0411), and Account Ledger (F0911) tables.
- Refresh the Cash Forecast Data table (F09522) with new cash forecast records.

Review the Refresh Cash Forecast Data report (R00522):

Refresh process initiated. Please check individual jobs for status.

5.7 Unposted Batches Report (R007011)

On the Integrity Reports and Updates menu (G0922), select Unposted Batches.

Use this report to review a list of unposted batches based on the batch control records in the Batch Control Records table (F0011).

5.28 Indexed Computations Compute And Print Report (R093021)

On the Allocations menu (G0923), select Indexed Computations Compute & Print.

After you review the indexed allocations and determine that they are correct, run this program.

In proof mode, the system prints a report that shows the entries that are created in final mode. Review the report to determine whether you need to make any changes to the allocation before running the program in final mode.

In final mode, the system:

- Reads balances or transactions, based on the allocation method, from one or more accounts.
- Multiplies each balance or transaction by the specified rate index.
- Creates journal entries with batch type D in the Account Ledger table (F0911).

For the balance allocation method, the system creates journal entries based on the balance of an account or a range of accounts. For the transaction allocation method, the system creates journal entries in a one-to-one ratio with the transactions that it reads.

- Calculates an offset to balance the resulting journal entries, if needed, and distributes the offset to a contra/clearing account.
- Increases the general ledger date incrementally according to the recurring frequency for the allocation, which ensures that the allocation is ready for future processing.

For the update allocation method, updates balances only in the Account Balances table (F0902) for ledger types other than AA.

- Prints the Indexed Computations Journal report.

This report lists detailed allocation information and errors, such as invalid accounts and entries posted before cutoff (PBCO). Invalid accounts appear with *** on the report.

On the Integrity Reports and Updates report (G0922), select Intercompany Accts in Balance.

If you have multiple companies that are set up for hub or detail intercompany settlements, use this report to verify that all intercompany accounts are in balance. The report:

- Uses information from the Account Balances table (F0902) to compare the balances among the company's various intercompany settlement accounts.
- Determines whether AAI items and the associated intercompany accounts are set up correctly.
- Includes all of the periods in the current year, previous year, and next year.

The report is not based on any specific financial period.

5.56 General Ledger Post Report (R09801)

On the Journal Entry, Inquiries, & Reports menu (G0911), select General Ledger Post.

After you review and approve journal entries, you post them to the Account Balances table (F0902). When you run the General Ledger Post program (R09801), the system:

- Selects unposted, approved batches of journal entries in the Account Ledger table (F0911) and validates each transaction.
- Posts accepted transactions to the F0902 table.
- Changes the status of the journal entry batch to posted.
- Marks the detail lines of the journal entry as posted in the F0911 table.
- Sends electronic mail messages for transactions that are in error.
- Produces a General Ledger Post report, which lists details about successfully posted batches.

5.58 Copy Accounts to Business Units Report (R09804)

On the Organization & Account Setup menu (G09411), select Copy Accts to Business Units. The system submits the report when you click OK on the Copy Accounts to Business Units form.

After you create your model chart of accounts, you must review and correct it. Then you can create your actual chart of accounts by copying the object and subsidiary accounts that are assigned to a model business unit to your actual business units. This process saves time and ensures consistency throughout your account structure. You can copy:

- All or a range of object accounts from one business unit to another
- Object accounts at a given level of detail
- All or a range of object accounts from one business unit to multiple business units of the same business unit type
- All or a range of object accounts to a specific company or across all companies

On the Global Updates menu (G09316), select Update BU.Obj.Sub to Jrnl Ent.

If you make changes to business units, run the Update BU.Obj.Sub to Jrnl Ent report to update the revised object account numbers, or subsidiaries, in the Account Balances (F0902), Account Ledger (F0911), and Revenue Recognition G/L Information (F03B117) tables. This program compares the business unit, object, and subsidiary for each account ID in the F0902, F0911, and F03B117 tables to the account master records in the Account Master table (F0901) and updates the F0902, F0911, and F03B117 tables based on the F0901 table.

- Section 6.10, "Credit Card Expense Purge Report (R09E151)"
- Section 6.11, "Expense Report Reimbursement Report (R20110)"

Note: This reports guide discusses reports that are commonly used in the JD Edwards EnterpriseOne system. This reports guide does not provide an inclusive list of every report that exists in the system.

This guide is intended to provide overview information for each report. You must refer to the appropriate JD Edwards EnterpriseOne implementation guide for complete report information.

6.1 Update Employee Profile Structure Types Report (R09E0150)

On the System Setup menu (G09E41), select Update Employee Profile Structure Types.

Use this batch program to update the structure type for one or more employee profiles. The structure type enables you to associate the employee profile with a distribution list of a group of employees. The system uses the distribution list when you set up approval workflows with multiple expense report approvals and approvals on several levels.

You can use this program to generate an integrity report to verify structure types in current employee profile records. Run the program in proof mode for a set of employee profile records, specify the current structure type in the processing options

and set the print processing option to print only exceptions. You might want to generate an integrity report when a distribution list has been changed since it was last assigned to employee profiles.

6.10 Credit Card Expense Purge Report (R09E151)

On the Advanced and Technical menu (G09E31), select Credit Card Expense Purge.

Use this program to periodically remove transactions from the Credit Card Transaction Interface Table (F09E150). You can remove records for:

- A specific date range.
- A specific transaction status.
- Employees who no longer work for the company.
- Duplicate transactions accidentally uploaded to the table.

When you run the program, the system automatically prints a report of the number of records it removed from table F09E150. You also have the option to print report details that include transaction information.

6.11 Expense Report Reimbursement Report (R20110)

On the Periodic Processing menu (G09E20), select Expense Report Reimbursement.

On the Reimbursement Review menu (G09E202), select Expense Report Reimbursement.

Run this program when expense reports reach the Reimbursement Process status (900). Depending on the reimbursement method that is set up for the employee, the system creates a batch of vouchers or a batch of time cards or both. The system uses these records to reimburse employees and credit card companies.

7.5 Variance Analysis Report (R10212A)

On the Financial Reports menu (G10), select Variance Analysis.

Use this report to review budget and actual amounts and check the difference (variance) between the two amounts. In addition, the percentage that is associated with each line item reflects the percentage of revenues. The percentage of budget that is associated with each line item is equal to the variance divided by the budget for the current period or year-to-date.

7.10 Monthly Spreadsheet Report (R10412A)

On the Financial Reports menu (G10), select Monthly Spreadsheet.

Use this report to examine trends in your company's financial activity. You can analyze actual and budget amounts for period-to-date and year-to-date. You can also show current period amounts with budget amounts for future periods.

The monthly spreadsheet rounds to the thousands. For example, if the amount is 2700, it rounds to 3000 and prints as 3. If you want a spreadsheet with different specifications, you can design your own by using the Report Design Aid tool.

The system uses information stored in the Account Balances table (F0902) for the monthly spreadsheet.

7.11 Account Structure Build Report (R10430)

On the Multi-Site Consolidation Setup menu (G1042), select Account Structure Build.

Before you can consolidate account balances, you must build the account structure that the system uses for the consolidation. This program reads the Account Master table (F0901) and creates the account structure that is based on the sequence that you define in the account structure. The system creates one record in the structure for each unique object and subsidiary combination.

The program can add records to an existing account structure, or it can create a new account structure. The system deletes the existing structure if you set the corresponding processing option to create a new account structure that has an existing structure name.

If you entered target object and subsidiary information in category codes, you can specify the codes in the corresponding processing option. The system uses the values to create the target object and subsidiary account information.

If you entered level of detail information in a category code, you can specify the code in the corresponding processing option. The system uses the value for the level of detail of the account structure.

7.13 Business Unit Structure Build Report (R10450)

On the Advanced Organization Setup menu (G094111), select Organization Structure Build.

After you define your organization report structure in the Organization Structure Definition program (P0050B), run this program to build it.

You can run this program in proof or final mode. In proof mode, the system prints a report that shows the changes that occur when you run the report in final mode. In proof mode, any business units that are dynamically created appear on the report as a concatenation of category codes, regardless of the setting of the BU Creation processing options.

In final mode, the system dynamically creates business units either by using next numbers or by concatenating category codes, depending on the setting of the BU Creation processing options. In final mode, the system updates the Organization Structure Master File table (F0050).

7.14 Journalize Consolidation Balances Report (R10480)

On the Multi-Site Consolidation menu (G1021), select Journalize Consol. Balances.

After you receive the multisite consolidations at the target company, you should run integrity reports to ensure that the data that you received is accurate. Use this program to create journal entries for the summarized account balances that were received from the source company. These journal entries are based on the difference from one consolidation batch to another.

When you run this program, the system reads the Multi-Site Consolidation Transfer File Header (F1001), Multi-Site Consolidation Transfer File (F1002), and Multi-Site Consolidation Transfer File - Category Codes (F1003) tables and creates journal entries in the Journal Entry Transactions - Batch File table (F0911Z1).

You can run this batch program in proof or final mode. In proof mode, the system prints a report of the journal entries, but does not update the F0911Z1 table. In final mode, the system creates the journal entries in the F0911Z1 table and, based on a processing option, prints a report of the journal entries.

The report shows the journal entries that were created for the summarized balances from the source company by source system ID and batch number. It also shows batch totals.

On the Statement of Cash Flow menu (G1031), select Statement of Cash Flows Report.

Use this report to review information on the cash flows of a reporting entity and meets International Accounting Standards (IAS) requirements for financial reporting. The statement of cash flow consists of accounts that are part of a company's operating, investing, and financing activities and provides information about how cash and cash equivalents are generated and used by a company. The system retrieves information for cash flow statements from the Statement of Cash Flow Rules (F10520) and Account Balances (F0902) tables.

JD Edwards EnterpriseOne Multicurrency Processing Reports

This chapter discusses report navigation, overview information and a report sample for the following reports:

- Section 8.1, "Currency Exchange Rates Report (R00151P)"
- Section 8.2, "External Currency Exchange Rates Processor Report (R0015Z1)"
- Section 8.3, "External Currency Exchange Rates Purge Report (R0015Z1P)"
- Section 8.4, "Monetary Account Valuation Report (R09415)"
- Section 8.5, "Calculate Currency Cross Rate Report (R11153)"
- Section 8.6, "Detailed Currency Restatement Report (R11411)"
- Section 8.7, "Currency Restatement Compute and Print Report (R11414A)"
- Section 8.8, "As If Repost Report (R11415)"

Note: This reports guide discusses reports that are commonly used in the JD Edwards EnterpriseOne system. This reports guide does not provide an inclusive list of every report that exists in the system.

This guide is intended to provide overview information for each report. You must refer to the appropriate JD Edwards EnterpriseOne implementation guide for complete report information.

8.1 Currency Exchange Rates Report (R00151P)

On the Multi-Currency Processing menu (G11), select Currency Exchange Rate Entry. On the Work with Currency Exchange Rates form, select Exchange Rate Rpt in the Report menu.

Use this report to review currency exchange rates from the Currency Exchange Rates table (F0015). You can use the data selection to print the exchange rates for a specific currency as of a certain effective date, to print all exchange rates for a certain effective date, and so on.

Review the Currency Exchange Rates report (R00151P):

8.2 External Currency Exchange Rates Processor Report (R0015Z1)

On the External Currency Exchange Rates menu (G11311), select External Exchange Rate Processor.

After you upload exchange rates from an external source into the External Currency Exchange Rates table (F0015Z1) and, if necessary, revise the rates, use this program to process information from the F0015Z1 workfile and stores it in the Currency Exchange Rates table (F0015).

8.5 Calculate Currency Cross Rate Report (R11153)

On the Multi-Currency Processing menu (G11), select Calculate Cross Currency Rates.

After you create currency cross-rate relationships and review them, you calculate new exchange rates based on the common currency. Use this program to calculate the new exchange rates based on the cross-rate relationships in the Currency Cross Rates Calculation Master table (F11151) and the exchange rates in the Currency Exchange Rates table (F0015).

8.6 Detailed Currency Restatement Report (R11411)

On the Financial Restatement menu (G1122), select Detailed Currency Restatement.

Use this program to apply current exchange rates to transactions when restating amounts from one currency to another. Based on a processing option, this program creates a second restated ledger of transactions for the alternate currency ledger (XA) only, or for the XA, YA (domestic origin), and ZA (foreign origin) ledgers.

This guide is intended to provide overview information for each report. You must refer to the appropriate JD Edwards EnterpriseOne implementation guide for complete report information.

9.1 Generate Forecast Basis Report (R1403)

On the Forecasting and Planning menu (G1411), select Generate Forecast Basis.

Use this program to automatically update the Forecast Basis table (F1403) with a range of accounts, based on AAI item GLGxx for expense and revenue, and basis amounts from the Account Balances table (F0902). In the processing options, you specify the revision number, the ledger type, the fiscal year, the range of periods, and whether to roll up subledger balances.

9.3 Generate Forecast Results Report (R1404)

On the Forecasting and Planning menu (G1411), select Generate Forecast Results.

When you run this program, the system:

- Uses the basis amounts that were retrieved and updated in the Forecast Basis table (F1403).
- Applies the growth pattern to the basis amounts for accounts with any posting edit code except N (non-posting).
- Generates forecast amounts only for accounts in the F1403 table that are locked.

This guide is intended to provide overview information for each report. You must refer to the appropriate JD Edwards EnterpriseOne implementation guide for complete report information.

10.1 Post to Cost Analyzer Balances Report (R1602)

On the Cost Analyzer menu (G1612), select Post to Cost Analyzer Balances.

When you run this report, the system uses transactions from the Account Ledger table (F0911) to update the Cost Analyzer Balances table (F1602) for the requested view and fiscal year. Based on information in the cost analyzer view structure, this program creates transactions in the F1602 table, using information in the F0911 table. To allow error detection and correction of journal entry transactions before you post them to the F1602 table, post the transactions to the Account Balances table (F0902) first.

10.3 Profitability by Cost Object Report (R16023)

On the Reporting menu (G1625), select Profitability by Cost Object.

Use this report to review the profitability of a certain product line, customer, business unit, or any other cost object. You can choose any combination of cost objects in any hierarchy and the report prints the profitability for each.

This report prints information from the Cost Analyzer Balances table (F1602) by cost analyzer view, so you must update this table before running the report. The F1602 table is updated when you run the Post To Cost Analyzer Balances program (R1602).

10.4 Income Statement by Cost Object Report (R16024)

On the Reporting menu (G1625), select Income Statement by Cost Object.

Use this report to track revenues, expenses, and the net income or loss for a particular cost object. The report format is similar to other JD Edwards EnterpriseOne income statement reports. You can run the report over a specific cost analyzer view or over all views.

This report prints information from the Account Master table (F0901), the Business Unit Master table (F0006), and the Cost Analyzer Balances table (F1602). You must run the Post To Cost Analyzer Balances program (R1602) to update the Cost Analyzer Balances table (F1602) before running the Statement by Cost Object report.

10.6 Trial Balance by Object Account for Cost Report (R16026)

On the Reporting menu (G1625), select Trial Balance by Object Account for Cost Object.

Use this report to verify the accuracy of individual ledger account balances and your overall ledger. This report consolidates object accounts across many business units.

Use this report to specify whether to use information from the Account Ledger table (F0911) or from the Cost Analyzer Balances table (F1602). If you decide to use information from the Cost Analyzer Balances table (F1602), you must remember to run the Post to Cost Analyzer Balances program (R1602) before running the Trial Balance by Object Account for Cost Object. The Cost Analyzer Balances table (F1602) is updated only when you run the Post to Cost Analyzer Balances program.

10.8 Purge Cost Analyzer Records Report (R1602P)

On the Cost Analyzer menu (G1612), select Purge Cost Analyzer.

To free up disk space or improve performance, you can delete old views or fiscal years that are no longer in use by purging records from the Cost Analyzer Balances table (F1602). If view specifications change or errors occur during the posting process, you can use this program to purge the information before re-posting transactions to a specific view. This program also unlocks the view to allow changes and resets the posted flag in the Account Ledger table (F0911) if desired.

If you set a processing option to bypass clearing the cost management posted code, you cannot regenerate transactions for the view. To re-create balances, you must use the Post to Cost Analyzer Balances program (R1602) to create a new record in the view for a new transaction in the F0911 table and rerun the purge program and leave the Bypass Update processing option blank.

The system clears the posted code on the new transaction and all prior transactions, thus enabling you to re-post the view for all transactions.

Use this program to purge data from the Driver Balances table (F1632). You can clear information completely; or you can clear only specific periods, ledger types, or fiscal years. You might run this process periodically to improve system performance. You can also use the purge process to re-post transactions to a driver of the specifications if the driver calculations have changed or if the driver contains errors. After the records are purged, you can correct the driver definition and process the driver calculation again.
