

# Oracle® Primavera P6™ Tested Configurations

Release Version: 7.0

Date: December 2010

Revision: 7.0.0.0.7

---

This document lists the configurations that have been tested for the Oracle Primavera P6 version 7.0 release.

## Notes

P6 Suite, as listed in this document, refers to the following components offered in the Primavera P6 Enterprise Project Portfolio Management media pack:

- Project Management module
- Methodology Management module
- P6 Web Access
- P6 Progress Reporter
- P6 Integration API
- P6 Web Services
- P6 Reporting Database R1 and R2 (R1 applies to all platforms except HP-UX)
- P6 Analytics R1

The P6 product suite is supported on VMware.

In general, the P6 product suite is compatible with configurations supported by third party vendors.

The Business edition of Windows Vista and the Professional edition of Windows 7 were used during testing. Other editions were not tested but should be fully compatible with P6, with the exception of the Home edition.

For all Java Application Servers, a 64-bit JDK/JVM (Java Virtual Machine) is required for all 64-bit Platforms.

Except where noted, all configurations were tested with English as the operating system locale and input language.

JRE 1.6.0\_20 is the certified version. Any higher versions were not certified as of this document's publication.

For information on tested configurations for Contract Management, see the Contract Management Tested Configurations document (Tested\_Configurations.htm in the Documentation folder of the Contract Management physical media or download).

For more information on tested configurations for the Primavera Integration API, see the *Oracle Primavera P6 Integration API Administrator's Guide* (located in \Documentation\<language>\Primavera Documentation Center.pdf of the P6 physical media or download).

<b>Citrix Client</b>			
<b>Generic Platform</b>	<b>Citrix Software</b>	<b>Citrix Client</b>	<b>Primavera Applications</b>
Microsoft Windows (32-bit)	Citrix Client 10.2  Citrix XenApp Plugin for Hosted Apps	Windows XP Professional sp3  Windows Vista sp2	Project Management module  Methodology Management module

<b>Citrix Server</b>			
<b>Generic Platform</b>	<b>Platform</b>	<b>Citrix Software</b>	<b>Primavera Applications</b>
Microsoft Windows x64 (64-bit)	Windows 2008 Server sp2	Citrix Presentation Server 4.5  Citrix XenApp 5.0	Project Management module Methodology Management module

<b>Other Primavera Applications</b>		
<b>Generic Platform</b>	<b>Platform</b>	<b>Primavera Applications</b>
Microsoft Windows (32-bit)	Windows 2003 Server R2 sp2* (English only on server)	Compression Server (Oracle only)
	Windows 2008 Server sp2* (English only on server)	
Microsoft Windows (32-bit)	Windows 2003 Server R2 sp2*	Job Service
	Windows 2008 Server sp2*	
Microsoft Windows (64-bit)	Windows 2008 Server sp2* (English only)	Compression Server (Oracle only; requires a 32-bit JDK)

\* Tested with the following core operating system locales and corresponding input languages:

- English
- French
- German
- Japanese
- Russian
- Latin American Spanish
- Simplified Chinese
- Traditional Chinese

† Includes Real Application Clusters, Advanced Compression, and DataGuard database features

‡ P6 Reporting Database R1 is not supported in this configuration

§ Tested with Secure Socket Layer (SSL)
