

Oracle® Retail In-Store Space Collaboration

Release Notes

Release 13.3.2

May 2014

This document highlights the changes made to Oracle Retail In-Store Space Collaboration for this patch release. It includes the following sections:

- [Product Overview](#)
- [Database Version](#)
- [Overview of the 13.3.2 Patch Release](#)
- [Hardware and Software Requirements](#)
- [Technical Enhancements](#)
- [Known Issues](#)
- [Noteworthy Fixes](#)
- [Related Documentation](#)

Product Overview

The Oracle Retail Macro Space Planning family consists of two products:

- Oracle Retail Macro Space Management (MSM).
- Oracle Retail In-Store Space Collaboration (ISSC).

A prerequisite for ISSC is the installation of MSM on the client's network.

ISSC is an internet-enabled companion to MSM. With an internet connection, it can be used to develop or edit store plans on site at the actual stores. This combination of internet based access with the use of laptop computers makes the software highly portable.

It provides access to store planning, merchandising, and performance information held within the central Oracle Retail Macro Space Planning database.

Database Version

The installed version of ISSC needs to be compatible with the current version of the Macro Space Planning database. This version of ISSC is compatible with database version 13.3.2, the schema of which has been modified as a result of improvements made to MSM functionality.

Overview of the 13.3.2 Patch Release

The 13.3.2 Patch Release does not contain any new functionality. However, the visual appearance of the application has been enhanced with a set of new, easier to understand icons.

Hardware and Software Requirements

See the Oracle Retail Macro Space Planning Installation Guide for information about the following:

- Hardware and software requirements.
- Oracle Retail application software compatibility information.

Note: In-Store Space Collaboration only supports the following:

- Oracle Database Client 11g 2

For ISSC, the 64 bit client is required.

Technical Enhancements

No new functionality has been added. The client user interface and icons have been updated to a next generation look and feel. Filters have been added to the Add Product dialog box in Front Graphical view and Shelf Graphical View.

Known Issues

The following significant issues exist in this release of the application.

Defect Number	Summary
12567527	The Sort Leftmost option in the Options dialog box has no effect This can be addressed by manually selecting the fixtures in the sequence they should be populated. Alternatively, use the 'drag and drop' merchandising options.
13552822	The Find dialog box in the Front Graphical View does not accept extended characters such as apostrophes. Their use should be avoided.
13556155	ISSC may close when using the Pick option in the Print Planograms dialog box.
16222328	The label justification is different in ISSC to that used in MSM's Merchandiser module and ODIs planogram import process.
6806348	Printing planograms always uses the default report layout. The workaround is to print or publish using a batch process if an alternative to the default report is required.

Noteworthy Fixes

The following significant issues have been fixed for this release.

Defect Number	Summary
13930222	When dragging planograms back to their original fixtures, they will correctly make no changes to the fixture's merchandise.
14031765	The Hatch styles used for coloring KPIs are correctly scaled to display in the legend for each band.
16222362	Product Images can be shown in Schematic Preview and Front View.

Value-Added Reseller (VAR) Language

Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

(i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.

(ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.

(iii) the software component known as **Access Via™** licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.

(iv) the software component known as **Adobe Flex™** licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.
