Added a chapter describing the methods to administer portal homepage tabs:

Portal and Site Administration

Administering Portal Homepages

- Through the portal registry.
- Through the Custom Tabs navigation collection.

- Portal and Site Administration
- Content Management System

- Maintaining Business Attributes on User Profiles
- Setting Up the Content Management System

Removed the term HR to correspond with user interface changes that emphasize that this feature concerns any business data attributes.

- Setting Up and

Working with Managed Content

Revised this topic to describe these enhancements to unified navigation:

Portal and Site Administration	Administering Unified Navigation in PeopleSoft Interaction Hub	<ul style="list-style-type: none"> • Unified navigation now supports importing or updating pagelet definitions in bulk from remote content provider systems. • Unified navigation now supports configuring multiple remote folders under a single local parent folder on the PeopleSoft Interaction Hub system. • The initial system configuration procedure has been simplified. • Unified navigation is now covered under the PeopleTools restricted use license; therefore, a full PeopleSoft Interaction Hub license is no longer required to use this feature.
Portal and Site Administration	Administering Unified Navigation in PeopleSoft Interaction Hub	Because PeopleTools no longer allows an administrator add a subfolder to a remote folder through Structure and Content, the explicit warning to avoid doing this was removed.
Resource Finder	Using Participant Profiles and Organization Charts	Replaced the term <i>super user</i> .
<ul style="list-style-type: none"> • Using Portal Features • Portal and Site Administration 	<ul style="list-style-type: none"> • Submitting and Editing Menu Item Requests • Managing Menu Item Requests 	For administrators with sufficient privileges, the process of submitting, approving, and registering a menu item request has been streamlined so that when the administrator submits a request, all subsequent actions can be completed without navigating to a different portal administration page.
Using Portal Features	various	Many pagelets now include a pagelet icon in the pagelet title bar.
Using Portal Features	Working With Discussion Forums	Documented how to publish and use a user-configurable forum posts pagelet for: all forums, related discussions only,

Using Portal Features	Working With the RELATEDCMCONTENT Service	or workspace discussions only. Documented use of the RELATEDCMCONTENT service to display a piece of content from the content management system on any page within a PeopleSoft Interaction Hub system.
various	various	With modal operation enabled in PeopleSoft Interaction Hub, various pages and pagelet features now appear in a modal window.
