Solaris 10 6/06 Package List

Contents

Preface

The *Solaris 10 6/06 Package List* lists and describes the packages included in the Solaris 10 6/06 Operating System (Solaris OS). The list includes information about the software groups that contain each package.

Note – This Oracle Solaris release supports systems that use the SPARC and x86 families of processor architectures. The supported systems appear in the Oracle Solaris OS: Hardware Compatibility Lists (`http://www.sun.com/bigadmin/hcl`). This document cites any implementation differences between the platform types.

In this document these x86 related terms mean the following:

- x86 refers to the larger family of 64-bit x86 compatible products.
- x64 relates specifically to 64-bit x86 compatible CPUs.

For supported systems, see the *Oracle Solaris OS: Hardware Compatibility Lists*.

Who Should Use This Book

This book is intended for system administrators responsible for installing the Solaris software.

Related Books

The following table lists related information that you need when you install the Solaris software.

TABLE P–1   Related Information

Information	Description
Solaris 10 6/06 Installation Guide: Basic Installations	This book describes how to perform a basic Solaris installation with a graphical user interface (GUI).
Solaris 10 6/06 Installation Guide: Network-Based Installations	This book describes how to perform a remote Solaris installation over a local area network or a wide area network.

TABLE P–1 Related Information *(Continued)*

Information	Description
Solaris 10 6/06 Installation Guide: Solaris Live Upgrade and Upgrade Planning	This book describes how to use CD or DVD media to upgrade a system to the Solaris operating system. This book also describes how to use the Solaris Live Upgrade feature to create and maintain boot environments, and how to upgrade systems to these boot environments.
Solaris 10 6/06 Installation Guide: Custom JumpStart and Advanced Installations	This book describes how to create the files and directories necessary to perform an unattended custom JumpStart installation. This book also describes how to create RAID-1 volumes during a JumpStart installation.
Solaris 10 6/06 Installation Guide: Solaris Flash Archives (Creation and Installation)	This book describes how to create a Solaris Flash archive and deploy the archive over the network to quickly install the Solaris OS. This book also describes how to maintain these archives, and how to quickly update clone systems by using differential Flash archives.
System Administration Guide: Devices and File Systems	This book describes how to back up system files.
Solaris 10 6/06 Release Notes	This book describes any bugs, known problems, software that is being discontinued, and patches that are related to the Solaris release.
SPARC: *Solaris 10 Sun Hardware Platform Guide*	This book contains information about supported hardware.
x86: Solaris Hardware Compatibility List	This list contains supported hardware information and device configuration details.

Documentation, Support, and Training

See the following web sites for additional resources:

Solaris 10 6/06 Operating System Packages

This book lists the Solaris 10 6/06 Operating System and languages packages.

This first chapter lists and describes the packages included in the Solaris 10 6/06 Operating System (Solaris OS). The chapter begins with a summary of the changes to packages that have been made in this release. Then, two tables list all packages for each software groups.

- "Solaris 10 6/06 OS Packages for SPARC Based Systems" on page 21 lists and describes the packages in the Solaris 10 6/06 software for SPARC based systems.
- "Solaris 10 6/06 OS Packages for x86 Based Systems" on page 71 lists and describes the packages in the Solaris 10 6/06 software for x86 based systems.

The second chapter lists and describes the language packages included in this release. See Chapter 2, "Solaris 10 6/06 Languages Package List."

What's New in the Solaris 10 6/06 Packages

This section summarizes changes that have been made in the packages for this release.

New Package Clusters

The following new package clusters have been added.

- SUNWCfmd
- SUNWCpd — This new package cluster is for the x86 platform only. This product cluster already existed for the SPARC platform.
- SUNWCpostgr
- SUNWCpostgr-dev
- SUNWCzfs

No package clusters were removed in this release.

New Packages

The following new packages were added in this release. The packages are new for both the SPARC platforms and x86 platforms.

Note – These are new packages, not new features.

Package	Description	Version
FJSVglrt (SPARC only)	Fujitsu OpenGL 1.5 for Solaris Runtime Libraries	SPARC: `200.1.5,REV=2006.03.21`
FJSVxwpsr (SPARC only)	This package contains X server modules optimized for SUN4us platform. This package is not required for non-SUN4us platforms; but installing this package will not affect the working of server on non-SUN4us platforms.	SPARC: `6.6.2.7400,REV=0.2006.02.28`

Solaris 10 6/06 Languages Package List

This chapter lists and describes the packages that support languages in the Solaris 10 6/06 software.

The languages package list is divided into the following platform-specific tables.

- "SPARC: Solaris 10 6/06 Languages Packages for SPARC Based Systems" on page 119 lists the languages packages for the Solaris 10 6/06 software for SPARC based systems.
- "x86: Solaris 10 6/06 Languages Packages for x86 Based Systems" on page 144 lists the languages packages for the Solaris 10 6/06 software for x86 based systems.

SPARC: Solaris 10 6/06 Languages Packages for SPARC Based Systems

The following table lists the languages packages for the Solaris 10 6/06 software for SPARC based systems.
