Sun™ StorEdge™ A1000 and D1000 Tower Mount Installation
Sun StorEdge A1000 and D1000 Tower Stand Installation

Your tower stand kit contains:
- 2 two-part tower stands
- 2 foot blanks
- 4 footpads

Prepare the System

Before you install your Sun StorEdge A1000 or D1000 in the tower stand, you must remove two of the feet.
1. Remove feet A and B. 
   See FIGURE 1.

2. Store the feet and screws you removed in the tower stand foot compartment. 
   See FIGURE 2.

3. Install the foot blanks where you removed the feet. 
   Snap them into the system skin.
Prepare the Stands

1. Install the optional footpads on the underside of the tower stands.
   The optional footpads make sliding the stands easier.
   a. Turn the stand so you can see the underside.
      See FIGURE 3.
   b. Fit the footpads over the end areas.

2. Open each tower stand enough to allow the system to be lowered easily between the end pieces.
   a. Turn the stand so you can see the underside.
      See FIGURE 3.
b. Press in on the plastic clips until you can move the end pieces apart.

3. Place the tower stands upright as far apart as the remaining two feet.

4. Set the system on its side in the stand.
   
   The LEDs on the system should be at the top. The tower stand end pieces should cover the remaining two feet. See FIGURE 4.

5. Slide the two halves of the stand together to fit tightly against the system.
   
   See FIGURE 4.
