

600MP Boot PROM 2.10 Upgrade Product Note

The 600MP system board requires four level 2.10 (or higher) boot PROMs for use with your new SPARC module. A boot PROM kit for 600MP systems is included in the SPARC Module Upgrade shipment. This kit contains four level 2.10 boot PROMs and a boot PROM upgrade procedures manual. Use this manual for installation instructions if you need to upgrade the boot PROMs.

The table below lists part numbers of the required boot PROMs and their locations. The *-04* suffix indicates the boot PROMs are level 2.10.

Note – You *do not* need to install new boot PROMs if you already have level 2.10 boot PROMs (*-04*) installed on your 600MP system board.

Table 1 Level 2.10 Boot PROMs

PROM Part Number	PROM Location
525-1209-04	U3001
525-1210-04	U3002
525-1211-04	U3003
525-1212-04	U3004

If you do not need to install new PROMs, return the boot PROM kit to Sun Microsystems, Inc. along with the exchanged SPARC module(s). The *SPARC Module Upgrade Installation Guide* contains information about returning used module(s) for credit on page 3-16 (or 4-14).
