

Oracle® Student Learning

Release Notes

Release 3.1.3

E20669-05

January 2012

This document is intended for users and administrators of Oracle Student Learning (OSL). This document lists product enhancements, describes potential issues in OSL and corresponding workarounds, if available, and provides information about resolved defects.

1 What's New in this Release

This section lists the enhancements available in this release.

1.1 Performance and Usability Improvements

The CKEditor is upgraded to 3.6.2. The audio applet response time is improved.

1.2 Changes to the Deployment of Standard Components

If you are upgrading from OSL 3.1.2 and Oracle Universal Content Management (UCM) is already configured, do the following:

1. Click **Component Manager**.
2. Disable and then uninstall the **SelectivelyRefineAndIndex** component.
3. Go to `<OSL_INSTALL_DIR>/LearningTool/ContentIntegration/components`, and then install and enable **OSL_SelectivelyRefineAndIndex.zip**.
4. Restart the Content Server.

1.3 Customization of Background Images

OSL LT administrators can customize the name and number of background images using the LT Configurator.

The property files used to define the background images and their names have changed.

For information on modifying background images, see Section 9.1.3 in *Oracle Student Learning Installation and Deployment Guide*.

1.4 Changes to the Schema

Confirmations are now linked to framework items (not to outcome statements) and are held in a different table to demonstrations. In addition, internal comments are no longer supported for confirmations.

1.5 Changes to Student and Parent User Interface

The advanced student, intermediate student and parent user interfaces have been consolidated into a single "standard" user interface, that is based on the earlier intermediate student user interface.

The standard user interface includes improvements such as a consistent back button location and contextual information (containing class and folder) on each page.

Parents have an additional student filter that enables them to view records for a particular child.

1.6 Changes to Teacher User Interface

The following changes have been made to the teacher user interface:

- Quick Confirmations. A multiple-entry confirmation screen enables teachers to enter confirmations for a specified framework item across an entire class.
- Quick Assessments. A multiple-entry feedback screen enables teachers to enter feedback (marks, grades, comments, demonstrations) for a specified learning item across the entire class.
- Recent Activities. The Home tab lists recent activities by all the teachers' students.
- Student and activity filters have been added to the Class page.
- Student progress is indicated by cell color within the Class page, leading to a less cluttered display.
- An assessment column is displayed in the Class page to indicate the assessment type and student marks are indicated without the total marks (e.g. /10) or percent symbol (%).
- Learning item participation and feedback have been consolidated into a single screen as a modal dialog.
- Learning item properties are displayed in separate tabs within a modal dialog.
- Learning item property default values have been rationalized.
- Column widths within the Curriculum page have been rationalized.
- Contextual information, such as student name, learning item title and containing class and folders, are displayed on all pages.
- Class and Curriculum tables include row and column borders to facilitate easier viewing of related data.

1.7 Changes to LT Admin and Data Loading Services

Curriculum frameworks no longer need to be published. This function has been removed from the LT Admin and Data Loading Services.

1.8 Changes to Preferences

[Table 1](#) lists the preferences that have been added, removed, or modified in this release.

Table 1 Changes to Preferences

Code	Status	Description
OSL_ALLOW_INTERNAL_COMMENTS	Removed	
OSL_LEARN_TAB_ORDER	Removed	
OSL_MONITOR_TAB_ORDER	Removed	
OSL_RECENT_DEMONSTRATIONS_MONTHS	New	Allows users to specify the number of months' worth of demonstration data to retrieve by default
OSL_STUDENT_WORKSPACE	Modified	Changed the possible values and the default value to "Standard"
OSL_STUDENT_WORKSPACE_BACKGROUND_IMAGE	Modified	Changed code to OSL_WORKSPACE_BACKGROUND and changed the default value to "Grey". The corresponding OSL_WORKSPACE_TYPE LOV has modified values
OSL_USE_HIGH_CONTRAST	New	Allows teachers to specify the use of high contrast colours on the Class page to assist with colour-blindness

1.9 Changes to Properties Files

In this release, [Table 2](#) lists the changes to the properties files.

2 Bug Fixes

[Table 3](#) lists the externally reported bugs fixed in this release.

Table 3 Bug Fixes

Component	Description	Bug Number
Content	File upload issue in IE when the path is greater than 80 characters This has been fixed such that only the file name is used in the default metadata title field.	13404828
Content	Pagination error in UCM Import page This has been fixed by changing the default OSL import filter.	13434323
Installation	Installing the OSL SelectivelyRefineAndIndex component into UCM 11g reports an error. This has been fixed by renaming the component. For existing deployments of OSL, please uninstall the old component and install the new one provided with this release. See Section 1.2 .	13001678
Student UI	Inconsistent text alignment	12914414
Student UI	Restated outcome statements not displayed in the student UI	13530383
Teacher UI	Performance issues loading the Class screen The Class screen has been re-designed such that, by default, it loads much less data and provides the user with the ability to filter the displayed data. In this way, the screen loading performance has been significantly improved.	12954877

3 Known Limitations and Workarounds

[Table 4](#) lists the significant issues known to exist in this release. Any available workarounds are provided.

Table 4 Known Limitations and Workarounds

Component	Browser	Issue	Workaround
Teacher UI	All	Where a teacher has associated an <i>Indicative</i> (non assessable) outcome with an activity, then this outcome will also be displayed as a column in the new Quick Assessments screen.	Teacher may simply ignore the indicative outcomes in the new Quick Assessments screen, for which it is not possible to record an assessment.
Teacher UI	All	In the new Quick Assessments screen where a teacher has previously entered a mark that is greater than the total marks for a given student, then a warning message will be displayed if the teacher modifies any part of that student's assessment (e.g. modifies the comment).	Teacher may ignore the warning message.
Teacher UI	All	Whenever expanding a node of a tree-table that has been scrolled horizontally (in the Class and Curriculum screens of the Teacher UI), a mis-alignment of the table cells occurs.	Move the horizontal scroll bar and the cells immediately realign.
