Oracle Enterprise Manager Cloud Control 12c Release 5 (12.1.0.5) is a management solution providing centralized monitoring, administration, and lifecycle management functionality for the complete IT infrastructure.

This Release Notes document provides information about the release, as well as information to assist you in either installing or upgrading to Cloud Control and/or Management Agent 12.1.0.5.

This document contains the following sections:

- Where To Find Installation And Upgrade Documentation
- New Features Included In This Release
- Acquiring The Software
- Installing Oracle Enterprise Manager Cloud Control 12c Release 5 (12.1.0.5)
- Upgrading To Oracle Enterprise Manager Cloud Control 12c Release 5 (12.1.0.5)
- De-installing Oracle Enterprise Manager Cloud Control
- Documentation Accessibility

1 Where To Find Installation And Upgrade Documentation

The following documents are related to installing and/or upgrading to Enterprise Manager Cloud Control 12c Release 5 (12.1.0.5).

All of these documents can be downloaded from the Enterprise Manager Cloud Control Documentation Library at the following URL:

[http://www.oracle.com/pls/em121/homepage](http://www.oracle.com/pls/em121/homepage)

- Oracle Enterprise Manager Cloud Control Release Notes, 12c Release 5 (12.1.0.5) (this document)
  
  The Release Notes document provides instructions on installing, upgrading or de-installing of the software. It also includes a list of known issues related to installation and upgrade, as well as post-installation configuration.

- Oracle Enterprise Manager Cloud Control Basic Installation Guide, 12c Release 5 (12.1.0.5)
  
  The document provides references detailed instructions on performing a fresh installation of Enterprise Manager Cloud Control and Management Agents.
2 New Features Included In This Release

Oracle Enterprise Manager Cloud Control 12c Release 5 (12.1.0.5) contains a significant number of new features and enhancements. See "New Features In Enterprise Manager 12c" in the Enterprise Manager Cloud Control 12c Introduction book for a detailed overview of what's new in this latest release.

This document is available at the following URL:

http://docs.oracle.com/cd/E24628_01/doc.121/e25353/whats_new.htm

Note that the following plug-ins are deployed by default with Oracle Enterprise Manager Cloud Control:

- Enterprise Manager for Oracle Database (12.1.0.8)
- Enterprise Manager for Oracle Fusion Middleware (12.1.0.8)

The following plug-ins are also available to be downloaded and deployed to Oracle Enterprise Manager Cloud Control:

- Enterprise Manager for Cloud Application (12.1.0.10)
- Enterprise Manager for Oracle Virtual Infrastructure (12.1.0.2)
- Enterprise Manager for Oracle Consolidation Planning and Chargeback (12.1.0.7)
- Enterprise Manager for Oracle Cloud Framework (12.1.0.3)
- Enterprise Manager for Storage Management Framework (12.1.0.6)

You can deploy the latest plug-ins as part of the process of installing or upgrading to Enterprise Manager Cloud Control 12c Release 5 (12.1.0.5).

To deploy plug-ins during installation, follow the process outlined in the "Installing with Advanced Configuration" chapter in the Enterprise Manager Cloud Control Basic Installation Guide:

http://docs.oracle.com/cd/E24628_01/install.121/e22624/install_em_exist_db.htm#CHDECIFI
3 Acquiring The Software

You can get the installation software from the product DVD or from Oracle Technology Network (OTN) at:

For more details on how you can obtain the Enterprise Manager Cloud Control software, refer to the "Procuring Enterprise Manager Cloud Control Software" section of the Enterprise Manager Cloud Control Advanced Installation and Configuration Guide at the following URL:

http://docs.oracle.com/cd/E24628_01/install.121/e24089/getstrtd_proc_sw.htm

---

**Note:** Verify that the file size of your downloaded installation software matches the file size displayed on Oracle Technology Network (OTN). After downloading the software, run the `cksum` command against the downloaded file to ensure that the file size of the downloaded software is the same as the file size on OTN.

---

4 Installing Oracle Enterprise Manager Cloud Control 12c Release 5 (12.1.0.5)

These instructions assume that you will install a complete Enterprise Manager Cloud Control system using an existing certified Oracle Database on which the Oracle Management Repository can be configured.

See the "Installing Enterprise Manager System" chapter in the Enterprise Manager Cloud Control Basic Installation Guide for installation and post-install configuration instructions:

http://docs.oracle.com/cd/E24628_01/install.121/e22624/install_em_exist_db.htm

4.1 Installing An Additional Oracle Management Service

To configure Cloud Control for high-availability, you can install additional Oracle Management Service (OMS) instances into your existing Enterprise Manager Cloud Control environment.

See the "Adding An Additional Oracle Management Service" chapter in the Enterprise Manager Cloud Control Basic Installation Guide for prerequisites and instructions on installing additional OMS instances at the following URL:

http://docs.oracle.com/cd/E24628_01/install.121/e22624/install_addln_oms.htm

4.2 Installing Additional Management Agents

You can install additional Management Agents into your environment. Several Management Agent deployment options are supported in this release.

For instructions on using the recommended Add Host wizard method (also referred to as Agent push in previous EM releases), refer to "Installing Oracle
Management Agent Using Agent Deployment Wizard" in the Enterprise Manager Cloud Control Basic Installation Guide.

http://docs.oracle.com/cd/E24628_01/install.121/e22624/install_agent.htm

4.3 Known Installation Issues

This section covers issues related to installing Enterprise Manager Cloud Control 12c Release 5 (12.1.0.5).

5 Upgrading To Oracle Enterprise Manager Cloud Control 12c Release 5 (12.1.0.5)

You can upgrade your existing Enterprise Manager 10g Grid Control Release 5 (10.2.0.5.0), Enterprise Manager 11g Grid Control Release 1 (11.1.0.1.0), Enterprise Manager Cloud Control 12c Release 2 (12.1.0.2), Enterprise Manager Cloud Control 12c Release 3 (12.1.0.3) or Enterprise Manager Cloud Control 12c Release 4 (12.1.0.4) to Enterprise Manager Cloud Control 12c Release 5 (12.1.0.5).

If you have Enterprise Manager 10g Grid Control Release 4 (10.2.0.4.0) or lower installed, then you must first upgrade to Enterprise Manager 10g Grid Control Release 5 (10.2.0.5.0) or Enterprise Manager 11g Grid Control Release 1 (11.1.0.1.0) before you can upgrade to the new release.

Before beginning, Oracle recommends that you back up the Oracle Management Service (OMS) Oracle Home, the Management Agent Oracle Home, the Oracle Inventory directory and the Software Library. You should also back up the Management Repository database, as upgrade changes made to the Repository cannot be rolled back. For details, see the "Backing Up Enterprise Manager" chapter in the Enterprise Manager Cloud Control Administrator’s Guide:

http://docs.oracle.com/cd/E24628_01/install.121/e24089/ha_backup_recover.htm

See the Enterprise Manager Cloud Control Upgrade Guide for upgrade prerequisites and instructions. This document is available from the Enterprise Manager Cloud Control Documentation Library at the following URL:

http://docs.oracle.com/cd/E24628_01/upgrade.121/e22625/toc.htm

Note:

The upgrade process will upgrade only the Management Repository (sysman) schema and will create the new Metadata Services (sysman_mds) schema within the database. It will not impact any other data within the database. Even so, a database backup is strongly recommended.

5.1 Known Upgrade Issues

This section covers issues related to upgrading to Enterprise Manager Cloud Control 12c Release 5 (12.1.0.5)
5.1.1 2-System Upgrades On Same Host Not Supported
The 2-system upgrade option is not supported if upgrading from Enterprise Manager Cloud Control releases 10.2.0.5/11.1.0.1 to release 12.1.0.x on a host where an existing Oracle Management Service release 10.2.0.5 or 11.1.0.1 instance is already deployed.
(Bug 12957922)

5.1.2 Charts Are Not Present In Composite Applications Dashboards After Upgrade From Cloud Control 12c Release 2 (12.1.0.2) to Cloud Control 12c Release 5 (12.1.0.5)
Enterprise Manager composite application targets added on Enterprise Manager Cloud Control 12c Release 2 (12.1.0.2) are lost after upgrading to Enterprise Manager Cloud Control 12c Release 5 (12.1.0.5). As a result, the composite applications dashboards must be configured post-upgrade.
This issue does not occur for composite application targets added on Enterprise Manager Cloud Control 12c Release 3 (12.1.0.3).
(Bug 16675987)

5.1.3 Agent Upgrade Will Fail If Agent Instance Home Is Inside Agent Oracle Home
Upgrading a Management Agent will fail if the Agent instance home is inside the Management Agent Oracle home. For example:
- Agent Oracle Home: /myhost/agent/core/12.1.0.3.0
- Agent Instance Home: /myhost/agent/core/12.1.0.3.0/agent_inst

To avoid the upgrade failure, migrate the Agent instance home outside of the Agent Oracle home before beginning the Agent upgrade.

1. Stop the Management Agent with the following EMCTL command:
   ```bash
emutable stop agent
   ```
2. Open the emctl file at the location below in the Agent Oracle home:
   ```bash
   /scratch/agent/core/12.1.0.3.0/bin/emctl
   ```
3. Replace this value:
   ```bash
   /myhost/agent/core/12.1.0.3.0/agent_inst
   ```
   with the following:
   ```bash
   /myhost/agent/agent_inst
   ```
4. Open the emctl file at the location below on the Agent instance home and replace the strings as done in the previous step:
   ```bash
   /myhost/agent/core/12.1.0.3.0/agent_inst/bin/emctl
   ```
5. Open the emd.properties at the location below on the Agent instance home and again make the same modification:
   ```bash
   /myhost/agent/core/12.1.0.3.0/agent_inst/sysman/config/emd.properties.
   ```
6. Copy the folder `/myhost/agent/core/12.1.0.3.0/agent_inst` to `/myhost/agent/agent_inst`
7. Start the Management Agent with the following command:
De-installing Oracle Enterprise Manager Cloud Control

You can de-install existing Enterprise Manager Cloud Control components in either graphical or silent mode.

See "De-installing Enterprise Manager Cloud Control" in the Enterprise Manager Cloud Control Advanced Installation and Configuration Guide for de-installation instructions:

http://docs.oracle.com/cd/E24628_01/install.121/e24089/deinstall_em.htm

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=accid=info or visit http://www.oracle.com/pls/topic/lookup?ctx=accid=trs if you are hearing impaired.
