Preface

The *Oracle Solaris 10 1/13 Patch List* document contains a list of patches pre-applied to the Oracle Solaris 10 1/13 release.

Note – This Oracle Solaris release supports systems that use the SPARC and x86 families of processor architectures. The supported systems appear in the *Oracle Solaris OS: Hardware Compatibility Lists*. This document cites any implementation differences between the platform types.

In this document, these x86 related terms mean the following:

- x86 refers to the larger family of 64-bit and 32-bit x86 compatible products.
- x64 relates specifically to 64-bit x86 compatible CPUs.
- "32-bit x86" points out specific 32-bit information about x86 based systems.

For supported systems, see the *Oracle Solaris OS: Hardware Compatibility Lists*.

Who Should Use This Book

This book is intended for users and system administrators who install and use the Oracle Solaris 10 software.

Related Books

You might need to refer to the following documentation when you install Oracle Solaris software:

TABLE P–1 Related Information

Information	Description
Oracle Solaris 10 1/13 Installation Guide: Planning for Installation and Upgrade	Guides you through planning the installation or upgrade of the Oracle Solaris operating system. This book provides overviews of all the Oracle Solaris installation programs. This book also provides overviews of the following features as they relate to installation: ■ GRUB, the open-source boot loader ■ Solaris Zones partitioning technology ■ RAID-1 volumes that can be created at installation time
Oracle Solaris 10 1/13 Installation Guide: Basic Installations	Describes how to perform a basic Oracle Solaris installation, on SPARC or x86 platforms, with a graphical user interface (GUI).
Oracle Solaris 10 1/13 Installation Guide: Network-Based Installations	Describes how to perform a remote Oracle Solaris installation over a local area network or a wide area network.
Oracle Solaris 10 1/13 Installation Guide: Live Upgrade and Upgrade Planning	Describes how to use Oracle Solaris Live Upgrade to create and upgrade new boot environments.
Oracle Solaris 10 1/13 Installation Guide: JumpStart Installations	Describes how to create the files and directories necessary to perform an unattended custom JumpStart installation.
Oracle Solaris 10 1/13 Installation Guide: Flash Archives (Creation and Installation)	Provides instructions for creating Solaris Flash archives and using Solaris Flash archives to install the Oracle Solaris OS on multiple systems.
System Administration Guide: Devices and File Systems	Describes how to back up system files and other system administration tasks.
Oracle Solaris 10 1/13 Release Notes	Describes any bugs, known problems, and software that is being discontinued in the Oracle Solaris release.
Oracle Solaris 10 1/13 What's New	Summarizes all new features in the Oracle Solaris release.
Oracle Solaris 10 1/13 Package List	Lists the packages that are related to the Oracle Solaris release.
SPARC:*Solaris Sun Hardware Platform Guide*	Contains information about supported hardware.
x86: *Oracle Solaris Hardware Compatibility List*	Contains supported hardware information and device configuration details.

For information on current CERT advisories, see the official CERT web site at http://www.cert.org.

For some hardware configurations, you might need supplemental hardware-specific instructions for installing the Solaris software. If your system requires hardware-specific actions at certain points, the manufacturer of your hardware has provided supplemental Oracle Solaris installation documentation. Refer to those materials, such as *Solaris Sun Hardware Platform Guide*, for hardware-specific installation instructions.

Oracle Solaris 10 1/13 Operating System Patch List

The Oracle Solaris 10 1/13 patch list provides a list of patches pre-applied to the Oracle Solaris 10 1/13 release. Patches released after the Oracle Solaris 10 1/13 release can be found on My Oracle Support.

The patches that are listed in this chapter have been applied to the Oracle Solaris 10 Operating System in one of the following ways:

- SolStart

    These patches are located in the /var/sadm/patch directory on an installed system.

- Freshbits technology

    These patches were applied when the Oracle Solaris 10 OS was created. Therefore, these patches are not located in the /var/sadm/patch directory.

The showrev -p command provides a list of all patches that were applied to the installed system, regardless of how they were applied. The Oracle Solaris 10 software includes a known and tested level of patches. However, patches cannot be backed out of the Oracle Solaris 10 release.
