CHAPTER 3: HOT FIXES	19
Hot Fixes	19

Preface

This document describes issues that you may encounter with this release. Internal Tracking numbers that appear in the tables are used to identify issues reported by customers. You can use these numbers to identify the issue should you need to contact Oracle Support. Locator numbers that appear in parentheses after some notes are for Oracle internal use only.

Chapter 1: What's New in This Release

This chapter contains information on new product features for Release 6.1.0.1 of Oracle Agile Product Lifecycle Management for Process.

What's New in This Release?

Previously, when applying moisture loss to formulation outputs, the output composition was not rolled up correctly when the output is a product of consume from step or multi-level formulation.

The system was evaluating moisture loss using the total moisture value at the raw material level. So, when an output was consumed in another step or formula, the system sees this item as a single input item with one moisture value. It does not go deeper to investigate the material's regulatory breakdown.

This affects customers who:

1. Use moisture loss in a multi-step formulation or multi-level formulation.
2. Customers who have moisture values defined for each breakdown component.

Our Solution:

When a system evaluates moisture loss, it will go deeper using the regulatory breakdown. It will use the total moisture on each component to determine the compositional rollup and total moisture design attribute. If the total moisture value is missing for any component in the regulatory breakdown(s) then the system will use the raw material's total moisture value to determine composition and the total moisture design attribute.

If the user is applying moisture loss and the total moisture value is missing for any component in the regulatory breakdown(s), a warning will appear on the composition tab and total moisture design attribute field. This warning is configurable. If you choose not to track moisture at the breakdown component level this warning should be turned off.

Note: If all of your regulatory breakdowns contain a total moisture value for each component the raw material's total moisture attribute will be ignored.

Configuration:

Set `GSM.FormulationSpec.RegulatoryBreakdown.ComponentMoistureWarning.Enabled` feature configuration to true in order to enable component moisture warning in formulation output popup.

This can be accomplished by adding:

```
<add key="GSM.FormulationSpec.RegulatoryBreakdown.ComponentMoistureWarning.Enabled" value="true" />
```

to the FeatureConfig section in the <Prodika Home>\config\custom\CustomerSettings.config configuration file.

Chapter 2: Resolved Issues

This chapter contains resolved issues for Release 6.1.0.1 of Oracle Agile Product Lifecycle Management for Process.

Resolved Issues

The following tables outline known issues that have been resolved for Release 6.1.0.1 of Oracle Agile Product Lifecycle Management for Process.

General Resolved Issues

Table: 2-1 General Resolved Issues

Bug/Enh ID	Issue	Resolution
	Internal Tracking #22523 Increase supported URL size to 2000 characters.	URL size has been increased to 2000 characters.
	Internal Tracking #22655 Qualitative lookup for countries displays all items regardless of status.	Qualitative lookup only displays active countries.
	Internal Tracking #22708 Event log not updated according to design document for Create/Copy events for CreateFromTemplate.	Event log is updated after a Create/Copy event using CreateFromTemplate.
13511589	Internal Tracking #22676 Icon not shown in edit mode to add multiple rows on custom section.	Icon appears when adding multiple rows to a custom section in edit mode.
	Internal Tracking #22658 Save searches not working for quantitative tolerance	Save searches now work for quantitative tolerance.
13374822	Internal Tracking #22481 Batch file to configure event logs has missing entry, GENERALSERVICES-PRODIKA	Batch file has been updated.
	Internal Tracking #23206 The columns in custom section can't be printed if the column name has single quotes.	This issue no longer occurs.
	Internal Tracking #22807 Template – Create issue or copy should clear activity type field.	Create issue and copy now clear the activity type field.

CACS Resolved Issues

Table: 2-2 CACS Resolved Issues

Bug/Enh ID	Issue	Resolution
	Internal Tracking #22205 EQT for CACS screens from spec – needs default search criteria	Added the following search criteria to CACS screens: Title> Contains Screen Number > Starts With Description>Contains
	Internal Tracking #22830 CACS: Incorrect PPM conversion in compliance value	The PPM conversion is correct.

CSS (Content Synchronization and Syndication) Resolved Issues

Table: 2-3 CSS Resolved Issues

Bug/Enh ID	Issue	Resolution
	Internal Tracking # 22616 CSS syndication misses storage instructions for package specification.	The storage instructions are now retained during syndication.
	Internal Tracking # 22617 CSS cannot return master specification after syndicated PKG spec.	Related specifications including master specifications are returned after syndication.

DRL(Document Reference Library) Resolved Issues

Table: 2-4 DRL Resolved Issues

Bug/Enh ID	Issue	Resolution
	Internal Tracking # 23267 The nodes that aren't on the top level will be removed after the BU, Classification and Catalog fields are updated	This issue no longer occurs.

ADMN (Data Administration) Resolved Issues

Table: 2-5 ADMN Resolved Issues

Bug/Enh ID	Issue	Resolution
	Internal Tracking # 23200 Custom section and EA templates – Name fields max length should match database max length.	The maximum length of the name fields now matched the maximum length of the database.

EQ (eQuestionnaire) Resolved Issues

Table: 2-6 EQ Resolved Issues

Bug/Enh ID	Issue	Resolution
	Internal Tracking # 22777 Allergens are not displayed after the EQ>GSM push.	Allergens are now displayed after the EQ>GSM push.
13398700	Internal Tracking #22525 Cannot configure intolerances (Does Not Contain) section off from EQ.	Intolerances can now be configured.
13508541	Internal Tracking # 22661 EQ custom section column lengths not readjusting to page width.	eQuestionnaire UI has been updated to correct formatting.
	Internal Tracking #22502 Group items disappear after selecting certain selections.	This issue no longer occurs.
	Internal Tracking #22608 Selected items are not displayed on the right side.	This issue no longer occurs.
	Internal Tracking #22640 The system never recognized the new email address when initiating EQ.	New email addresses are now recognized.
	Internal Tracking #22956 Trade questionnaire – Calculated numeric extended attributes for nutrient profile not converting to numeric in custom sections.	This issue no longer occurs.
	Internal Tracking # 23094 Add New button should not show while user group selection is not added.	The Add New button is not displayed if a user group selection has not been added.
13555933	Internal Tracking # 22808 EQ % breakdown component display, allergens, custom sections issues	UI improvements have been made in the eQuestionnaire-Supplier Portal.

GSM (Global Specification Management) Resolved Issues

Table: 2-7 GSM Resolved Issues

Bug/Enh ID	Issue	Resolution
	Internal Tracking #22214 Status of padlock doesn't stick – Clicking Add	This issue no longer occurs.

Bug/Enh ID	Issue	Resolution
	New	
	Internal Tracking #22203 Supplier EQT – Horizontal scroll bar displayed in EQT popup for template search	Horizontal scroll bar does not display.
	Internal Tracking #22455 Label claims popup – Should only allow numeric value	Only numeric values are allowed in any Label Claims field.
	Internal Tracking #22411 Repeatable row Add New icon should appear when a repeatable row is added to a section.	The Add New icon appears when repeatable rows are added to a section.
	Internal Tracking #22415 Rename Template Ingredient Specification to Template Material Specification.	The modelName is Template Material Specification instead of Template Ingredient Specification in EQTSearchablePropertyConfigs.xml.
	Internal Tracking #22635, 22638 Spec short name – Translation popup should not allow line breaks for this field.	The translated spec short name field does not allow line breaks.
	Internal Tracking #22581 Calculations that are referencing EAs using context are failing if the EXT Data tab is never loaded.	This issue no longer occurs.
	Internal Tracking #22670 Ingredient statement (NUTP) search works only for English user.	Search works for users in all supported languages.
	Internal Tracking #22778 The breakdown grid should show blank by default, instead of 0.	The breakdown grid columns are now blank, by default, instead of 0.
	Internal Tracking #22859 Upload function disappears after deleting attached files.	This issue no longer occurs.
	Internal Tracking #22860 No user can delete the attached file after changing user in owner.	This issue no longer occurs.
	Internal Tracking #22927 TEMPLATES – Business unit should be blank on Create New	The business unit field is blank if creating a new template.
11936100	Internal Tracking #22614 Export of Spec Search not displaying equivalents with leading zeroes	Leading zeroes are displayed when results of Spec Search are exported.
13502607	Internal Tracking #22648 New Material Specification Breakdown window is limited in size.	This issue no longer occurs.
	Internal Tracking #22671	This issue no longer occurs.

Bug/Enh ID	Issue	Resolution
	Additional attributes will be duplicated if drop down Load to click run previous search	
	Internal Tracking #22742 Labeling Spec Grid – Changes order of items when updating a spec	This issue no longer occurs.
	Internal Tracking #22735 Sub Components Grid – Remove sorting from Quantity field.	Sorting is no longer allowed in the quantity field.
	Internal Tracking #22821 Theoretical Source doesn't remove when user updates the per 100g cells.	This issue no longer occurs.
	Internal Tracking #22625 Snapshot, linked create date not populated upon creation.	The creation date now populates correctly.
	Internal Tracking #22628 Optimization only can work fine once if use newly added UOM	Optimization can run more than once after adding a new UOM.
	Internal Tracking #22507 Batch tuning fails to scale packaging inputs from previous steps.	Packaging inputs are scaled during batch tuning.
	Internal Tracking #22371 Formula performance – Bulk Load EAs when copying	The number of SQL queries has been reduced and the response time has decreased.
	Internal Tracking #22410 Switching Tabs when on the percent calculation path shouldn't lose user entered values	This issue no longer occurs.
	Internal Tracking #22266 Performance – It will be time out when Click Add New Snapshot on formulation	Timeout no longer occurs when adding a new snapshot.
	Internal Tracking #22268 Performance – It will take 30 seconds when clicking Create New Spec on copying formulation spec.	Performance improvements have been made.
	Internal Tracking #22283 Error when printing formulation spec – Total formulation yield must be greater than zero.	This issue no longer occurs.
	Internal Tracking #22298 Formulation performance – Change EA select to a prepared statement.	The number of SQL queries has been reduced and the response time has decreased.
	Internal Tracking #22299	The number of SQL queries has been reduced and the response time has decreased.

Bug/Enh ID	Issue	Resolution
	Formulation performance – Bulk upload nutrition, compliance, spec attributes, breakdowns	
	Internal Tracking #22456 Formulation performance – Formulation tab is slow	The number of SQL queries has been reduced and the response time has decreased.
	Internal Tracking #22500 Click Optimization will get error if Select UOM in Settings as volume value.	An error message now displays if density is not set.
	Internal Tracking #22501 Cannot access Nutrient tab if Select UOM in Settings as volume value.	An error message now displays if density is not set.
	Internal Tracking #22537 Output popup> Compliance grid number is not starting over per grid	This issue no longer occurs.
	Internal Tracking #22538 Regulatory breakdown created on the output popup should be sorted in order of composition	Regulatory breakdown is now sorted in order of composition.
	Internal Tracking #22196 Performance – Saving a large formula with a lot of compliance items takes too long.	Performance improvements have been made.
10271350	Internal Tracking #22657 Unhandled error if value > 100% for the override solids in formulation output	An error message indicates “Value must be less than or equal to 100.”
11858734	Internal Tracking #22665 Unhandled error encountered when user had a missing role	UI changes now reflect the permissions set for the user, and an error no longer occurs.
12713872	Internal Tracking #22667 Formulation spec print changes the order of input ingredients	The order of input ingredients is retained when the specification is printed.
13457814	Internal Tracking #22634 User has to login twice when accessing optimization	This issue no longer occurs.
	Internal Tracking #22508 Source inconsistently copied when it is NSM Composite.	This issue no longer occurs.
	Internal Tracking #22781 Missing the link in Excel file when export the EQT search result.	This issue no longer occurs.
	Internal Tracking #22370 Theoretical source cleared when I haven't edited the nutritional values.	This issue no longer occurs.

Bug/Enh ID	Issue	Resolution
	Internal Tracking #22783 Material Specification breakdown window can't resize the number column	This issue no longer occurs.
12866370	Internal Tracking #22668 Ingredient statement search works only for English default language.	Ingredient statement search now works for any language set as default.
12839823	Internal Tracking #22624 Label composition display is not consistent with LIO construction format.	The formats are now consistent.
13487913	Internal Tracking #22644 Viewstate unhandled exception in LIO profile.	This issue no longer occurs.
	Internal Tracking #22711 Menu item build grid – Need to remove sorting from weight column because of UOM field.	Sorting is not allowed on the Weight column.
	Internal Tracking #22712 Alternate packaging grid – Need to remove sorting from Units column because of UOM field.	Sorting is not allowed on the Units column
	Internal Tracking #22713 Packaging grid – Need to remove sorting from Units column because of UOM field.	Sorting is not allowed on the Units column.
	Internal Tracking #22710 Menu item build – Order button needs to display scroll bar.	A scroll bar has been added to the Order button.
	Internal Tracking #22677 Alternate products/menu items grid – Not respecting Get Custom Revision Config.	This issue no longer occurs.
	Internal Tracking #22261 Menu item build grid – Order button missing	Order button now displays.
	Internal Tracking #22716 Nutrient Profile Grid – Source column display & for & and < for < and > for < when cell is in edit mode	Special characters display correctly when in edit mode.
12780850	Internal Tracking #22666 Data import from NSM to a nutrient composition of a product spec does not work	The data import now works correctly.
13415462	Internal Tracking #22601 Nutrient profile – rollup from menu item is not working	This issue no longer occurs.

Bug/Enh ID	Issue	Resolution
13439838	Internal Tracking #22597 Print reports for nutrient profile was displaying a value of NaN%	This issue no longer occurs.
9840909	Internal Tracking #22664 Change the LIO statement size to fit the ingredient statement size.	Both objects now accept up to 4,000 characters.
	Internal Tracking #22721 Related specs grid – active column sorting not working	Sorting has been removed.
10215082	Internal Tracking #22654 Error editing custom section in package spec in Japanese	Custom sections can now be edited.
	Internal Tracking #22443 Get latest issue not working correctly for PPKG to PKG specs	This issue no longer occurs.
	Internal Tracking #22747 Inner/Intermediate/Outer delivered material spec grids – changes order of items when updating a spec	This issue no longer occurs.
	Internal Tracking #22806 Where used – not displaying packaging spec	Where Used popup displays the parent packaging spec.
13502045	Internal Tracking #22647 Smart issue reorders and changes the quantity when replacing next lower level items	This issue no longer occurs.
13543590	Internal Tracking #22726 Smart issue replace given parent repeats alternate from outputs on spec to remove	Specs are no longer repeated.
13545699	Internal Tracking #22727 Smart issue replace given parent internal inputs are displayed as option for replace.	This issue no longer occurs.
9934724	Internal Tracking #22611 Smart issue request – replace specification given parent returns multiple duplicates of ingredient specs that are listed as alternates on a formulation spec	Internal formulation outputs are not included on Replace Specification Given Parent smart issue requests.
	Internal Tracking #17398 Export on Results tab – remove issued column from output	Issued column has been removed.
	Internal Tracking #20393 Issues with horizontal scroll bar	This issue no longer occurs.

Bug/Enh ID	Issue	Resolution
	Internal Tracking #21686 Replace spec given parent – please add error message if the selected affected spec is no longer valid	An error message displays if the selected affected spec is no longer valid.
	Internal Tracking #17868 Product – Sourcing relationships listed twice – spec comparison	Sourcing relationships are not duplicated.
	Internal Tracking #22765 Testing protocol grid – spec limits field – displays HTML tags	This issue no longer occurs.
	Internal Tracking #22679 Next lower level items grid – quantity should not be updated when spec is changed	Quantity and Order do not update when the spec changes.
13506639	Internal Tracking #22660 CU to TU parent relationship is not showing the correct TU spec status on the related specs tab.	This issue no longer occurs.
	Internal Tracking #22672 Packaging materials grid – not respecting get custom revision config	The padlock no longer displays when the config is set to false.
	Internal Tracking #22673 Alternate packaging materials grid – not respecting get custom revision config	The padlock no longer displays when the config is set to false.
	Internal Tracking #22675 Material specs grid – not respecting get custom revision config	The padlock no longer displays when the config is set to false.
13088493	Internal Tracking #22669 Unhandled error in LIO	The error no longer occurs.
	Internal Tracking #22955 Non-multi line free text extended attributes allowing multi lines	Multi lines are not allowed in free text extended attributes.
	Internal Tracking #23050 The date 2/17/2012 user entered into inactive field always displays 2/17/2020	This issue no longer occurs.
	Internal Tracking #23089 The value typed into per 100g field can't remain if per 100g is blank.	Values entered into the per 100g field are maintained.
13449063	Internal Tracking #22580 Need to update alternate association when get latest revision executes	Alternate associations are updated when getting the latest revision.

Bug/Enh ID	Issue	Resolution
	Internal Tracking #22861 Receive error page after selecting UOM as volume and click Cancel button in output popup	This issue no longer occurs.
	Internal Tracking #23037 The system theoretical source shouldn't be able to manually select.	Theoretical is now listed as a data source.
	Internal Tracking #23188 The settings should not be editable if output is referenced.	You cannot edit the settings if the output is referenced.

NPD (New Product Development) Resolved Issues

Table: 2-8 NPD Resolved Issues

Bug/Enh ID	Issue	Resolution
	Internal Tracking #21673 Activity related documents – SI title in any non-English language cannot be shown	Titles are shown in all supported languages.
	Internal Tracking #22810 Users you selected are in the same line	This issue no longer occurs.
	Internal Tracking #22842 Action nav issue – close create new popup seems a trick	This issue no longer occurs.
12732559	Internal Tracking #22621 NPD portfolios activities does not show the worst status of all activities	The Activities column now reflects worst case status of activities for that particular project.
	Internal Tracking #22784 R&D package information section in ISP – OLD causes webpage refresh	This issue no longer occurs.
	Internal Tracking #22788 Stage documents name is missed in newly copied project template	Fields on the Stage Documents tab are no longer blank after copying template.
	Internal Tracking #22315 Red is displayed when no required activities are added	No icon is displayed when no required activities are added.
	Internal Tracking #22907 Generate chart resulted in chart area axes error	This issue no longer occurs.
	Internal Tracking #22917 Generate chart generated “Value was either too large or too small for a decimal” error.	This issue no longer occurs.
	Internal Tracking #23160 Project owner popup does not refresh with the latest project leaders until saving the project.	This issue no longer occurs.
	Internal Tracking #23252 NPD project in GSM action items don't work	NPD projects tied to Formulation appear in the NPD Project column.
	Internal Tracking #23266 Generate chart generated “Axis object – auto interval does not have proper value” error.	This issue no longer occurs.
9881845	Internal Tracking #22609 Auto adjustment of height of TMFR table in edit popup is not working.	Auto-adjustment is now working correctly.
	Internal Tracking #22802	The webpage is refreshed after attached files are deleted.

	Webpage is stuck when deleting attached files in activity.	
--	--	--

PQS (Product Quality Scorecard) Resolved Issues

Table: 2-9 PQS Resolved Issues

Bug/Enh ID	Issue	Resolution
	Internal Tracking #22202 PQS sessions “Participant” and “Leader” tables should have independent numbering.	Tables now have independent numbering.

RPT (Reporting) Resolved Issues

Table: 2-10 RPT Resolved Issues

Bug/Enh ID	Issue	Resolution
	Internal Tracking #22700 gsm\$xlates\$.xsl change: text on right margin is truncated when text does not contain spaces.	Text truncation no longer occurs.
	Internal Tracking #22701 gsm\$xlates\$.xsl change: corrupt PDF or font lock issues may occur if data grids span multiple pages.	This issue no longer occurs.
10406746	Internal Tracking #22613 RPT - generated Excel file shifts columns in cells that are blank	Data shift no longer occurs.
12541019	Internal Tracking #22620 Report extension of .xls is duplicated when saving report in version 6.0.	Duplication no longer occurs.

SCRM Resolved Issues

Table: 2-11 SCRM Resolved Issues

Bug/Enh ID	Issue	Resolution
	Internal Tracking #22210 Sourcing type – type ahead containing special characters doesn't clear field after selection	The Sourcing Type field is clear after type ahead containing special characters is selected.
	Internal Tracking #22234 SAC/NON-SAC is always in edit mode after workflow	This issue no longer occurs.
	Internal Tracking #22179 Can't show the pagination after deleting one row from facility's sourcing approval	This issue no longer occurs.
	Internal Tracking #22780 Can't select date from popup	Date can now be selected.
	Internal Tracking #22886 The value in contact category, special attribute and sourcing type isn't in alpha order.	The values in the Contact category are displayed in alphabetical order.
	Internal Tracking #23138 Can't edit legal agreements/contracts after saving company profile.	Legal agreements/contracts can be edited after a company profile has been saved.

SP (Supplier Portal) Resolved Issues

Table: 2-12 SP Resolved Issues

Bug/Enh ID	Issue	Resolution
	Internal Tracking #22656 Custom sections for trade spec are printed when not selected..	Only chosen custom sections are printed.
11883740	Internal Tracking #22622 Cursor does not change in supplier portal when over link	The hyperlink is now visible when the cursor hovers over the field.
	Internal Tracking #22618 Custom section with Do Not Publish to Supplier tag gets printed in SP.	The tag is now respected, and the custom section is not printed in Supplier Portal.
	Internal Tracking #22976 SP – Owner cannot receive notification mail while workflow sourcing approval in SP.	Notification email is received when a sourcing approval moves through the workflow.
	Internal Tracking #23113 SP – Get error when editing Hide Row Header custom section in SP.	This issue no longer occurs.
	Internal Tracking #22992 An exception occurs when removing a step.	This issue no longer occurs.
	Internal Tracking #23207 Reordering of WFA steps before template is saved causes unhandled error.	This issue no longer occurs.

Chapter 3: Hot Fixes

This chapter contains hot fixes included in Release 6.1.0.1 of Oracle Agile Product Lifecycle Management for Process.

Hot Fixes

The following table lists hot fixes that are included in the Oracle Agile Product Lifecycle Management for Process 6.1.0.1 release.

Table: 3-1 Hot Fixes

6.0.0.4.22	6.0.0.5.2	6.1.0.0.2
6.0.0.4.24	6.0.0.5.3	6.1.0.0.3
6.0.0.4.26	6.0.0.5.7	6.1.0.0.4
6.0.0.4.27	6.0.0.5.9	6.1.0.0.5
6.0.0.4.32	6.0.0.5.11	6.1.0.0.6
6.0.0.4.33	6.0.0.5.13	6.1.0.0.7
6.0.0.4.38	6.0.0.5.14	6.1.0.0.9
6.0.0.4.39	6.1.0.0.1
