

Oracle® Configuration Manager

Support Policy

Release 10.3.8

E38355-02

March 2013

Lifetime Support of an Oracle Configuration Manager (OCM) release means that Oracle will investigate issues related to the OCM collector. Once a release is no longer supported, you must upgrade to a newer release to continue receiving support.

Note: If you have a current support contract in place, then you are entitled to *Premier Support*, *Extended Support*, or *Sustaining Support* based on where your product version is in the Lifetime Support cycle.

Policy

Every minor or patch release within a *major release** of OCM will be supported for up to 12 months after the release of the next *major release** of OCM. In the event the current *major release** is the terminal release for this product line, it will be supported for 3 years from its initial release date.

Note: Starting with OCM release 10.3, the concept of *mandatory updates*, as defined for releases prior to OCM release 10.3, is now obsolete.
