# CRM 4.0.1.0.0 Service Pack Data Migration Guide

# Data Migration

## Introduction

Data migration is the process of transferring data between storage types, formats, or computer systems. Data migration phases (design, extraction, cleansing, load, and verification) for applications of moderate to high complexity are commonly repeated several times before the new system is deployed.

Data migration is applicable after the installation of the CRM 4.0.1.0.0 Service Pack (SP). The backup of all the tables is taken by the SP installer.

## Data Migration Activities

For the below mentioned tables, the backup is taken and data is deleted by pre\_model scripts. For more information on pre-model, see *CRM 4.0.1.0.0 Service Pack Installation Guide*.

Ensure all the above mentioned back up tables are restored. The CRM 4.0.1.0.0 comes with specific data model changes. It includes the columns listed below with suggested set of default values.

TABLES	COLUMNS	Suggested Default Values
STG_ACCOUNT_RATING_DETAILS	f_original_credit_rating_ind	'Y'
STG_PARTY_FINANCIALS	d_period_start_date	(It should be the start date of financial period of fic_mis_date. ex: fic_mis_date = '31-Dec-2010' then value will be '01-Apr-2010')
STG_PARTY_FINANCIALS	d_period_end_date	(It should be the end date of financial period of fic_mis_date. ex: fic_mis_date = '31-Dec-2010' then value will be '31-Mar-2011')
STG_PARTY_FINANCIALS	v_financial_period_indicator	'A'
STG_PARTY_RATING_DETAILS	f_original_credit_rating_ind	'Y'

You need to use the back up tables and the suggested values for the new columns, to prepare necessary scripts to push data back into the environment.

**Note:** The Fct\_Party\_Financials\_CRMBKP backup data needs to be restored to FCT\_PARTY\_FINANCIAL\_DETAIL. Also, data needs to be given for the new NOT NULL columns (d\_period\_start\_date, d\_period\_end\_date, v\_financial\_period\_indicator).
