# 1. About this Manual

### 1.1 Introduction

This manual is designed to help acquaint you with the interface between Oracle FLEXCUBE and the other systems within your bank.

This manual provides you extensive explanations about the various maintenances required for the smooth exchange of data between Oracle FLEXCUBE and the applicable systems through the interface. It also gives you an insight into the processes involved in the actual exchange of data.

### 1.2 Audience

This manual is intended for the following User/User Roles:

Role	Function
Back office clerk	Input functions for contracts
Back office managers/officers	Authorization functions
Product Managers	Product definition and authorization
End of day operators	Processing during end of day/ beginning of day
Financial Controller / Product Managers	Generation of reports

## 1.3 Abbreviations

Abbreviation	Description
System	Unless and otherwise specified, it shall always refer to Oracle FLEXCUBE system
EOD	End Of Day
CMS	Card Management System
BIN	Bank Identification Number

### 1.4 Conventions Used in this Manual

Important information is preceded with the 99 symbol.

### 1.5 Glossary of Icons

This User Manual may refer to all or some of the following icons.

lcons	Function

Refer the Procedures User Manual for further details about the icons.

# 2. Debit Card Interface

### 2.1 Introduction

Oracle FLEXCUBE facilitates the processing of debit card transactions originating from Automatic Teller Machines (ATM) and POS terminals attached to different branches of your bank.

You will be allowed to capture different types of debit cards in Oracle FLEXCUBE. The cards are linked to individual customer accounts.

You need to do the following maintenance in Oracle FLEXCUBE for the debit card interface to work:

- Card BIN Maintenance: Card BIN maintenance should be created for every issuer product that the bank wishes to provide to customers. These BINs would be provided to bank typically by networks like VISA/MasterCard or by ISO organization. ATM and POS transaction count and amount limits are maintained for every BIN in this maintenance
- Card Type Maintenance: Card Types should be created to uniquely identify the set of Issuer BINs maintained. For example Visa might issue 433333 and 422222 under 'Classic' type and 455555 and 466666 under 'Gold type' etc.
- Card Product Maintenance: Card product maintenance is to link a given card type to a card product. You are not able to link multiple card types to same card products. Card products are linked in Debit Card Product Maintenance to uniquely identify the card nature that is requested.
- Card Status Maintenance: Card status has to be defined as card applied, closed, card issued, activated, and blocked.
- Card Customers Maintenance: Card customer should be maintained.
- Card Accounts Maintenance: This maintenance is required for creating the customer account who wishes to avail the card.
- Card Requests Maintenance: This is the master table which stores the card request and further life cycle details.

### 2.2 Process Flow

The following flow diagram depicts the working of the Debit Card Interface:

### 2.3 Maintaining Card BIN

You have to create Card BIN maintenance for every issuer product that the bank wishes to provide to customers. You can maintain the details of the card BIN in the 'Card BIN Maintenance' screen. You can invoke the 'Card BIN Maintenance' screen by typing 'STDBINMT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

ard BIN Maintenance	Web Page Dialog			? 🛛
				<u>^</u>
Card BIN 4	•	Default Renewal Unit	Year 🔽	
Description		Default Renewal Cycle		
Bank Institution Id				
- ATM Limit		- POS Limit

ATM Count Limit		POS Count Limit		
ATM Amount Limit		POS Amount Limit		
Remote ATM Limit Unit	Year 💌	Remote POS Limit Unit	Year 💌	
Remote ATM Count Limit		Remote POS Count Limit		
Remote ATM Amount Limit		Remote POS Amount Limit		
Fields				
Input By ABCB02	Date Time	Modification Number	Open	Cancel
Authorized By	Date Time		Authorized	Cancer

Specify the following details in this screen:

#### Card BIN

Specify the Bank Identification Number (BIN).

#### Description

Specify the description of the BIN.

#### **Bank Institution Id**

Specify the bank institution code.

#### **Default Renewal Unit**

Select the default renewal unit of the cards issued under the card BIN from the drop-down list. This list displays the following values:

- Year
- Month
- Week
- Day

#### **Default Renewal Cycle**

Specify the default renewal unit value of the cards issued under the card BIN.

#### <u>Example</u>

To indicate that the card should be renewed after every 2 Years when the Default Renewal Unit is Yearly, you have to specify the Default Renewal Cycle as 2.

#### ATM Limit

Specify the following details pertaining to ATM limit:

#### ATM Limit Unit

Select the unit of ATM Limit count for transactions control from the drop-down list. This list displays the following values:

- Year
- Month
- Week
- Day

#### **ATM Count Limit**

Specify the number of ATM transactions allowed for the unit defined for ATM.

#### **ATM Amount Limit**

Specify the maximum permissible amount for the unit defined for ATM.

#### **Example**

Specify 1000 to indicate 1000 account currency per unit.

#### Remote ATM Limit Unit

Select the unit of ATM Limit count for transactions control, for transactions done from ATMs outside the bank network, from the adjoining drop-down list. This list displays the following values:

- Year
- Month
- Week
- Day

Remote transaction means transactions done outside the bank network. For example, an ATM transaction done in ICICI ATM using CITIBANK debit card.

#### **Remote ATM Count Limit**

Specify the number of ATM transactions allowed for the unit defined for remote ATM.

#### **Remote ATM Amount Limit**

Specify maximum permissible amount for the unit defined for remote ATM.

#### <u>Example</u>

Specify 1000 to indicate 1000 account currency per unit.

#### POS Limit

Specify the following details pertaining to POS limit:

#### **POS Limit Unit**

Select the unit of POS Limit count for transactions control from the drop-down list. This list displays the following values:

- Year
- Month
- Week
- Day

#### **POS Count Limit**

Specify the number of POS transactions allowed for the unit defined for POS.

#### **POS Amount Limit**

Specify the maximum permissible amount for the unit defined for POS.

#### **Example**

Specify 1000 to indicate 1000 account currency per unit.

#### Remote POS Limit Unit

Select the unit of POS Limit count for transactions control from the drop-down list. This list displays the following values:

- Year
- Month
- Week
- Day

#### **Remote POS Count Limit**

Specify the number of transactions allowed from a remote POS.

#### Remote POS Amount Limit

Specify maximum permissible amount for the unit defined for remote POS.

#### Example

Specify 1000 to indicate 1000 account currency per unit.

## 2.4 Maintaining Card Type

You can maintain the card type in the 'Card Type Maintenance' screen. You can invoke the 'Card Type Maintenance' screen by typing 'STDTYMNT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

Card Type Mainten	ance Web Page Dialo	8		? 🛛
Card Descri	Type *			-
BIN Details				+ 🚍 🎫
Card BIN*				
				<b>V</b>
Fields				
Input By DOCTM6 Authorized By	Date Time Date Time	Modification number	Open Authorized	Cancel

Specify the following details in this screen:

#### Card Type

Specify the type of the card.

#### Description

Specify the description of the Card type.

#### **BIN Details**

Specify the BIN details here:

#### Card BIN

Select the BIN for the card issued from the option list. You can associate multiple BINs to the same card type.

### 2.5 Maintaining Debit Card Products

You can maintain debit card product in the 'Debit Card Product Maintenance' screen. This screen links a given card type to a card product (one to one). You are not allowed to link multiple card types to same card products. Card products are linked to uniquely identify the card nature that is requested.

You can invoke the 'Debit Card Product Maintenance' screen by typing 'STDCPROD' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

Debit Card Product Main	tenance Web Page Dialog	-		? 🛛
				<u>^</u>
Card Product •	SARV			
Description *	DEBIT			
Card Type	TEST3			
Expiry Date	8/3/2000

Specify the following details in this screen:

#### **Card Product**

Specify the Product Code.

#### Description

Specify the description of the specified Card product.

#### **Card Type**

Specify the type of Card allowed for the card product.

#### **Expiry Date**

Specify the date after which the card product cannot be used.

## 2.6 Maintaining Card Status Details

You can maintain the card status in line with the Card Management System in the 'Card Status' screen. You can invoke the 'Card Status' screen by typing 'STDSTATM' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

🗿 Card Status Web Page	Dialog	•		? 🛛
Card Status Description	E Expired			×
Input By DEE01 Authorized By	Date Time 7/3/2000 16:10:30 Date Time	Modification number 1	Open Authorized	Exit

Specify the following details in this screen:

#### **Card Status**

Specify the status of the card. Initially, when the request for the card is initiated, the card status will be 'Card applied'. Later you can change this to any status depending upon the need.

The card status can be of the following:

- R Specify 'R' to indicate the status as Requested
- A- Specify 'A' to indicate the status as Activated
- C- Specify 'C' to indicate the status as Closed
- Card Issued when the card is sent with PIN and physical card
- B Specify 'B' to indicate the status as Blocked

Theese codes are factory-shipped codes and can be modified at the time of implementation based on the Card Management System used by your bank.

#### Description

Specify a description for the status.

### 2.7 <u>Maintaining Card Customer</u>

You can maintain the card customer in the 'Card Customer Maintenance' screen. You can invoke the 'Card Customer Maintenance'screen by typing ' STDCUSTM' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

🗿 Card Customer Maint	enance Web Page Dia	log		? 🛛
– Customer Detail Branch Co Customer Customer Nar	de CHO			
Fields Input By DOCTM6 Authorized By	Date Time Date Time	Modification number	✓ Open Authorized	Cancel

Specify the following details in this screen:

#### **Branch Code**

The branch code gets defaulted here.

#### **Customer ID**

Select the customer ID from the adjoining option list. The option list displays all the customers maintained in the system.

#### **Customer Name**

The customer name gets displayed, on selecting the customer id. However, you are allowed to change the customer name. Based on this the customer name will appear in the card master screen.

If Card Management System needs extra fields, the same can be maintained as UDFs using this screen. Click the 'UDF' button to maintain User Defined Fields for the CMS.

System validates the following:

- if any card customer is open at customer closure level if any card customer is open that card customer needs to be closed before customer closure.
- if any card customer is closed during customer reopen if the customer is closed, system will not allow the card customer to be reopened.

### 2.8 Maintaining Card Accounts

You can maintain the customer accounts which can be linked to cards in the 'Card Accounts Detail' screen. Also you can view the various cards attached to the same account using this screen. You can invoke the 'Card Accounts Detail' screen by typing 'STDCARDA' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

🗿 Card Accounts I	Detail Web Page Dialog	•		? 🛛

Specify the following details in this screen:

#### **Branch Code**

Specify the branch code.

#### **Customer ID**

Select the Customer ID from the option list.

#### **Customer Account Number**

Select the customer account number from the option list.

#### 2.8.1 Viewing Cards Summary

In query mode, you can click 'Cards' button to see the summary of the cards related to the account.

If Card Management System needs extra fields, the same can be maintained as UDFs using the 'Fields' screen. Click 'Fields' Button to invoke the 'Fields' screen.

Fields Web Page Dialog	
Liser Def Fieldis	-
Field Name * Value	-
	2
	-
OR	Exit

System validates the following:

- if any card customer is open at customer closure level if any card customer is open that card customer needs to be closed before customer closure.
- if any card customer is closed during customer reopen if the customer is closed, system will not allow the card customer to be reopened.

### 2.9 Maintaining Card Master Details

The life-cycle of the card is maintained using the 'Card Master Maintenance' screen, right from raising card request to the card expiry/renewal. You can invoke the 'Card Master Maintenance' screen by typing 'STDCRDMS' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

This is the master table which stores the card request and further life cycle details. This screen is used for the following:

- To create new card requests
- To amend the card status manually( or through online upload )
- To query the Card to accounts / Account to Cards linkages by Oracle FLEXCUBE
- To generate the handoff file ( new card requests )
- To generate the renewal file

#### Specify the following details:

#### **Branch Code**

Branch code gets defaulted to current branch.

#### **Card Product**

Specify the product code of the card.

#### **Request Reference Number**

This is a system generated number. This reference number is used while doing updates based on response from CMS.

#### **Customer No**

Specify the customer number in case of request/renewal.

#### Account No

Specify the Customer Account Number. It is validated against the customer account marked with 'ATM Facility'.

#### **Card BIN**

Select the Card BIN from the option list.

#### **Customer**

As part of specifying the details pertaining to customer, you can specify the following:

#### Name on Card

Customer name gets displayed as maintained in 'Card Customer Maintenance' screen. However, you are allowed to modify it.

#### **Owner ID Type**

Specify the type of ID produced.

For example, PAN, Passport, DL etc.

#### Owner ID Number

Specify the identification number of the applicant.

#### Additional Holder ID Type

Specify the type of ID produced by additional holder.

For example, PAN, Passport, DL etc.

#### Additional Holder ID Number

Specify the Identification Number of the additional holder.

#### <u>Card</u>

As part of specifying the card details, you can specify the following:

#### Primary Card No

In case of Secondary Cards, system displays the Primary Card Number here.

#### **Card Number**

It is generated by CMS when the mode is Request/renewal. However, you are allowed to specify the card number.

#### Card Sequence Number

Card Sequence Number is generated and displayed by the system. It is the running number 1.2.3....

#### **Primary Card**

By default, system considers the first Debit Card issued for an account as the primary card and hence checks this box. You are not allowed to change the same. System unchecks this box on subsequent card issued for the same customer account.

#### Card Application Date

Specify the date of card application.

#### Card Issued Date

Specify the date of issue of the card.

#### Card Renewal Date

The date of renewal of the card gets defaulted from the BIN level.

#### **Card Expiry Date**

Specify the expiry date of the card.

#### **Card Activation Date**

Specify the date of activation of the card.

#### <u>Status</u>

As part of the specifying the satus, you can specify the following:

#### **Card Dispatch Status**

Select the Dispatch Status from the drop-down list to indicate whether the card has been dispatched or not.

#### Pin Mailed Status

Select the PIN Mailed Status from the drop-down list to indicate whether PIN has been mailed to the cardholder or not.

#### **Card Status**

Specify the status of the card e.g. Active/Blocked etc.

#### Last Status Change Date

Specify the date of last status change.

#### Last Operation

Specify the last operation done on card

#### **Renewal**

As part of the details pertaining to renewal, you can specify the following:

#### Remarks

Specify comments, if any.

#### **Renewal Unit**

Renewal unit gets defaulted here.

#### **Renewal Cycle**

Renewal cycle gets defaulted here.

#### <u>ATM</u>

The following details are displayed:

#### **ATM Limit Unit**

ATM Limit Unit gets defaulted from BIN.

#### **ATM Count Limit**

ATM Count Unit gets defaulted from BIN.

#### AMT Amount Limit

AMT Amount Unit gets defaulted from BIN.

#### Remote ATM Limit Unit

Remote transactions allowed through ATM unit gets defaulted.

#### **Remote ATM Count Limit**

Remote transactions unit allowed through ATM gets defaulted.

#### **Remote ATM Amount Limit**

Remote transactions allowed amount through ATM gets defaulted.

#### POS

The following details are displayed:

#### **POS Limit Unit**

POS Limit Unit gets defaulted from BIN

#### **POS Count Limit**

POS Count Unit gets defaulted from BIN

#### **POS Amount Limit**

POS Amount Unit gets defaulted from BIN

#### **Remote POS Limit Unit**

Remote transactions allowed through POS unit gets defaulted.

#### **Remote POS Count Limit**

Remote transactions unit allowed through POS gets defaulted.

#### **Remote POS Amount Limit**

Remote transactions allowed amount through POS gets defaulted.

## 2.10 Generating Card Handoff Files

You can generate handoff files in Card Info handoff file format using the 'Card Handoff Batch' screen. You can invoke the 'Card Handoff Batch' screen by typing 'DCDBATCH' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button. This batch can be configured as either ad-hoc run or EOD run. It generates the 'Oracle FLEXCUBE Specific CMS Handoff Format'.

Card Handoff Batch Web Page Dialog	
- Hand Off Batch	×
Run	Cancel
	·
	Cancel

Click 'Run' button in this screen to run the handoff batch.

### 2.10.1 File Format

The format of the handoff file genrated is broadly structured as given below:

- Request 1
  - Customer record >CRLF
  - <Account record>CRLF
  - Card record>CRLF
- Request 2
  - Customer record>CRLF
  - Account record>CRL
  - <Card record>CRLF

Seq#	Field Name	Size	Remarks
