1. Query

1.1. CLN50 - Search*

Using this option the collector can search the cases on different criteria's. The various search criteria's are customer short name, customer IC and customer ID. The system displays the account number and the name. Using the **Follow-Up Query** (Fast Path: CLN55) option, the collectors can follow up the accounts which are displayed at different priority level.

Definition Prerequisites

- 8053 - Customer Opening
- Accounts to be opened for the customers.

Modes Available

Not Applicable

To search the customer

1. Type the fast path **CLN50** and click **Go** or navigate through the menus to **Transaction Processing > Collection Transactions > Query > Search**.
2. The system displays the **Search** screen.

Search

The screenshot shows a web-based search interface. At the top, there is a header bar with the word "Search" in red. Below the header, there are several input fields: "Search Criteria:" with a dropdown arrow, "Search String:" with a text box, "Cust ID:" with a text box, and "Name:" with a text box. Below these fields, there is a tab labeled "Customer Accounts". The main area of the screen is a large, empty light gray rectangle. At the bottom right, there are two buttons: "Clear" and "Close".

Field Description

Field Name	Description
Search Criteria	[Mandatory, Drop-Down] Select the search criteria from the drop-down list. It is the selection criteria for the account to be searched. The options are: • Customer Short Name • Customer Ic • Customer Id
Search String	[Mandatory, Alphanumeric, 30] Type the value according to the search criteria selected in the corresponding field.
Cust ID	[Display] This field displays the customer ID. It is ID of the selected customer.
Name	[Display] This field displays the name of the selected customer.
Customer Accounts	
Account #	[Display] This field displays the account number of the customer.
Name	[Display] This field displays the name of the customer to whom the account belongs.

3. Select the search criteria from the drop down list.
4. Enter the search string and press the **<Tab>** key.
5. The system displays the records based on the search criteria.

Field Description

Column Name	Description
Accounts	
Account #	[Display] This column displays the account number of the customer.
Name	[Display] This column displays the name of the customer to whom the account belongs.
Queue code	[Display] This column displays the code of the queue to which the account belongs.
Action	[Display] This column displays the type of the action taken to execute an activity.
Action Date	[Display] This column displays the date on which the action is taken.
Result	[Display] This column displays the output of the action.
Result Date	[Display] This column displays the date of the output action.
Next Action	[Display] This column displays the next action taken on the basis of the results from the first action.
Next Action Date	[Display] This column displays the date for the next action.
Overdue Amount	[Display] This column displays the amount which is due for payment and is not paid till date.
Overdue Days	[Display] This column displays the number of overdue days for each account.

3. Click the account number whose follow-up is to be taken.
4. The system displays the **Followup By Collector** screen.
5. Enter the relevant information and click the **Follow-Up** button.
6. The system displays the **Follow-Up Sub screen**.
7. Enter the relevant information and click the **Ok** button.
8. The system displays the "Record successfully modified..Click Ok to continue". Click the **Ok** button.

2. Follow Up

1.3. CLN26 - Followup By Collector*

Follow up main form displays all the details of the account.

Using this option collector can also make the follow-up depending on the status of the account. If the customer has more than one account, the multiple account tab displays all the accounts of the customer. The system displays details on delinquency, collaterals, installments, payments, insurance etc.

Definition Prerequisites

- Account for follow-up

Modes Available

Not Applicable

To view the follow up main form

1. Login as a Collector.
2. Type the fast path **CLN26** and click **Go** or navigate through the menus to **Transaction Processing > Collection Transactions > Follow Up > Followup By Collector**.
3. The system displays the **Followup By Collector** screen.

Followup By Collector

Field Description

Field Name	Description
Filter	[Mandatory, Pick List] Select the filter code/name from the pick list. User can choose one of the filters attached to the Collector Group to which he/she belongs to further filter his/her selection criteria for follow-up. Name will be displayed after selecting the filter. If Collector doesn't choose any filter then the first account which is due for today's follow-up will be displayed.
Phone (R)	[Display] This field displays the residence phone number of the borrower.
Phone (O)	[Display] This field displays the office phone number of the borrower.
Mobile No	[Display] This field displays the mobile phone number of the borrower.
Account No	[Display] This field displays the account number selected by system or by collector for follow-up.
Status	[Display] This field displays the status of the account number.
Customer Id	[Display] This field displays the system generated number of the customer. The customer name is displayed in the corresponding field.
Address	[Display] This field displays the address (includes address1, address2 and address3) of borrower.
State	[Display] This field displays the state where the borrower stays.
Zip	[Display] This field displays the zip code.
Collector	[Display] This field displays the collector code/name to whom the case is allocated.

Field Name	Description
Supervisor	[Display] This field displays the supervisor code/name attached to the collector group.
Work Flow	[Display] This field displays the workflow code/name of the account number.
State	[Display] This field displays the state code in which the account is lying currently.
Queue	[Display] This field displays the queue code/name to which the account belongs.
Excp Collector	[Display] This field displays the exception collector in case the account is marked as exception.
Special Code	[Display] This field displays the special code attached to the case, if any.

4. Select the filter criteria.
5. Click the **Go** button.
6. The system displays the details of the selected customer.

Multiple A/c s

Multiple account tab gets enabled only when the customer has multiple accounts. This tab displays the information about the multiple accounts of the same customer.

Field Description

Field Name	Description
Delinquency Details	
Non Starter	[Display] This field displays the non starter status of the account. The check box is selected if the account is a non starter account. Non starter accounts are the accounts, wherein customers do not pay the first due installment.
Peak OD Days	[Display] This field displays the maximum number of overdue days of an account.
Peak OD Amount	[Display] This field displays the maximum amount overdue for an account.
No. Of Times Delinquent	[Display] This field displays the number of times the account is delinquent.
No. Of Times Self Cured	[Display] This field displays the number of times the account is delinquent and is cured on its own.
No. Of OD A/C (Self)	[Display] This field displays the number of times the account is overdue where the borrower is a account holder.
Total OD Amount (Self)	[Display] This field displays the total overdue amount. It is the total amount due by the loan account holder.
No. Of OD A/C (Group)	[Display] This field displays the number of overdue account. It displays the number of accounts, where the customer is a group customer.
Total OD Amount (Group)	[Display] This field displays the total overdue amount. It displays the total amount due as a group customer.
Written Off	[Display] This field displays the written off status of the account. The check box is selected if the account is marked as write off.

Last Resolution

Last resolution displays the details of the resolved account.

Date [Display]
This field displays the date of the resolution i.e. when the account was last resolved and moved out of collection.

Collector Group [Display]
This field displays the collector group.

Collector [Display]
This field displays the name of the collector who was working on it.

Action Taken [Display]
This field displays the details of the action taken, when the account was resolved.

Action Summary

Total Attempts [Display]
This field displays the number of attempts made to resolve the case.

Success Attempts [Display]
This field displays the success attempts for the action.
For e.g. If the customer promises to pay the amount and the PTP is not breached.

No. Of PTPs [Display]
This field displays the number of times the PTP is received as result.

No. Of PTPs Kept [Display]
This field displays the number of times the PTP is fulfilled.

No. Of PTPs Broken [Display]
This field displays the number of times the PTP is broken.

Consecutive Broken [Display]
This field displays the number of times the PTP is consecutively breached.

Next Bucket Movement

Flow Date [Display]
This field displays the flow date.

Flow Days [Display]
This field displays the flow days.

Auth/Esc Hist

Authorization/escalation tab display the history of authorizations and escalation that is performed on an account.

Field Description

Field Name	Description
Select All	[Optional, Check Box] Select the Select All check box to select all the accounts in the list of collector accounts for follow-up.
Column Name	Description
Account No.	[Display] This column displays the account number of the customer.
Name	[Display] This column displays the name of the customer.
Queue Code	[Display] This column displays the name and code of the queue to which the account belongs.
State	[Display] This column displays the state in which the account is currently lying.
Total Overdue Amount	[Display] This column displays the total overdue amount for each account.
Last Action Code	[Display] This column displays the code of the last action performed on the account.
Last Action Date	[Display] This column displays the date on which the last action was performed on the account.
Last Result Code	[Display] This column displays the last result code.
Last Result Date	[Display] This column displays the last result date.
Next Action Code	[Display] This column displays the future action code to be performed on the account.
Next Action Date	[Display] This column displays the future date for the action.

Column Name	Description
Note Collector	[Display] This column displays the note for the collector.
Select	[Optional, Check Box] Select the Select check box to pick a particular account in the list of collector accounts for follow-up.

3. Select the account number(s) by clicking the **Select** check box.
4. Enter the relevant information and click the **Follow-Up** button.
5. The system displays the **Follow-Up Sub** screen.

3. Authorization

1.5. CLN28 - Authorize By Supervisor*

Certain cases need the authorisation by supervisor for the next action chosen by the collector. e.g. VIP cases.

Using this option a supervisor can authorise the next action taken by the collector during the follow-up. All the accounts of the customers are displayed in the **Multiple Account** tab. The system displays details on delinquency, collaterals, installments, payments, insurance etc.

Definition Prerequisites

- Supervisor should have cases assigned to him for authorisation

Modes Available

Not Applicable

To authorize by supervisor

- Login as a supervisor.
- Type the fast path **CLN28** and click **Go** or navigate through the menus to **Transaction Processing > Collection Transactions > Authorization > By Supervisor**.
- The system displays the **Authorize By Supervisor** screen.

Authorize By Supervisor

Field Description

Field Name	Description
Filter	[Mandatory, Pick List] Select the appropriate filter/name from the pick list. This is disabled for supervisor authorisation.
Phone (R)	[Display] This field displays the residence phone number of the borrower.
Phone (O)	[Display] This field displays the office phone number of the borrower.
Mobile No	[Display] This field displays the mobile phone number (if available) of the borrower.
No. of A/Cs Pending for Authorization	[Display] This field displays the number of accounts which are pending for authorisation.
Account No	[Display] This field displays the account number selected by system or by collector for follow-up. The customer name is displayed in the corresponding field.
Status	[Display] This field displays the status of the account number.
Customer Id	[Display] This field displays the customer ID of the borrower. The customer ID is auto-generated by the system.
Address	[Display] This field displays the address of the borrower.
State	[Display] This field displays the state.
Zip	[Display] This field displays the zip code.
Collector	[Display] This field displays the name and code of collector to whom the case is allocated.

Field Name	Description
Supervisor	[Display] This field displays the name and code of the supervisor attached to the collector group.
Workflow	[Display] This field displays the name and code of the current work flow of the account number.
State	[Display] This field displays the state in which the account is lying currently.
Queue	[Display] This field displays the name and code of the queue to which the account belongs.
Excp Collector	[Display] This field displays the exception collector of the queue to which the case belongs.
Special Code	[Display] This field displays the special code attached to the case, if any.

4. Select the filter criteria.
5. Click on the **Go** button.
6. The system displays the first record to be authorized by the supervisor.

Multiple A/c s

Multiple accounts tab gets enabled only when the customer has multiple accounts. This tab displays the information about the multiple accounts of the same customer.

4. Repossession

1.6. CLN62 - Initiate Repossession*

Assets have to be repossessed from customers in case of bad loans. Repossession involves ordering the repossession, repossessing the asset, storing it in a warehouse, value the asset and finally dispose the asset.

Using this option you can initiate the re-possession of the assets of the account of a customer.

Definition Prerequisites

- Accounts assigned to the collectors.

Modes Available

Not Applicable

To initiate repossession

1. Type the fast path **CLN62** and click **Go** or navigate through the menus to **Transaction Processing > Collection Transactions > Repossession > Initiate Repossession**.
2. The system displays the **Initiate Repossession** screen.

1.7. CLN63 - Collateral Auctioning*

Once the assets are repossessed they need to be disposed by auctioning.

Using this option you can maintain the records of the auctioning of the assets of a customer. It also contains the details of the various sales quotes made for the asset. The organization can initiate the sale of the asset based on the quotes entered in the system. This provides a better management and control for asset sale.

Definition Prerequisites

- CLN62 - Initiate Repossession

Modes Available

Not Applicable

To view the collateral auctioning records

1. Type the fast path **CLN63** and click **Go** or navigate through the menus to **Transaction Processing > Collection Transactions > Repossession > Collateral Auctioning**.

1.8. CLN64 - Collateral Disposition*

Using this option you can maintain the sale details of the auctioned assets of a customer and the details of the new buyer to whom the asset will be sold. This is useful to complete the audit trail for the resale process.

Once the assets are repossessed they will be disposed by auctioning using the **Collateral Auctioning** (Fat Path: CLN63) option. After this the auctioned details need to be maintained in the system.

Definition Prerequisites

- CLN63 - Collateral Auctioning

Modes Available

Not Applicable

To select the buyer for the asset

1. Type the fast path **CLN64** and click **Go** or navigate through the menus to **Transaction Processing > Collection Transactions > Repossession > Collateral Disposition**.
2. The system displays the **Collateral Disposition** screen.

5. Customer Sticky Notes

1.9. CLN70 - Customer Sticky Notes

Users can add special notes to the customer. These notes are displayed each time the account of the customer is displayed for follow-up.

Using this option you can add these notes to the selected customer. Only one note may be added at a time. You can also view the existing notes in a grid.

Definition Prerequisites

- Customer to have accounts

Modes Available

Not Applicable

To add a sticky note

1. Type the fast path **CLN70** and click **Go** or navigate through the menus to **Transaction Processing > Collection Transactions > Customer Sticky Notes > Customer Sticky Notes**.
2. The system displays the **Customer Sticky Notes** screen.

Field Description

Field Name	Description
Sticky Notes	
Search Criteria	[Mandatory, Drop-Down] Select the search criteria to search for the customer from the drop-down list. The options are: • Customer short name: The short name of the customer. • Customer IC: The identification criteria (IC) arrived at by the bank during customer addition. • Customer ID: The unique identification given by the bank.
Search String	[Mandatory, Alphanumeric, 20] Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field. If the search criterion is specified as customers short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list. For example, The customer's short name is George Abraham. One can search the above customer by entering Geo in the Search String field.
Cust ID	[Display] This field displays the ID of the customer. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the customer IC and the customer category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.
Note	[Mandatory, Alphanumeric, 240] Type the special note for the customer.

Column Name	Description
Notes History	
Sr. No.	[Display] This column displays the serial number for the note. It is auto-generated by the system.
Notes	[Display] This column displays the special note added for the customer.
By Collector-Name	[Display] This column displays the name of the user who added the note for the customer.
Entered On	[Display] This column displays the date on which the note was created for the customer.

3. Select the search criteria from the drop-down list.
4. Enter the search string and press the <Tab> key.
5. Select the customer for whom the note is to be added.
6. The system displays the notes history for the selected customer.
7. Enter the new note to be added.
