This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Contents

Preface v

1 Features and Updates

- Oracle Payment Interface..... 1-1
- Mastercard Unique Card Acceptor Terminal ID Support 1-2
- Mastercard 2-Series Bank Identification Number (BIN) Support..... 1-2
- Network Proxy Support..... 1-2

Preface

Oracle Hospitality RES 3700 Credit Card Interface provides a PCI-compliant credit card transaction system.

Purpose

These Release Notes provide a brief overview of additions, enhancements, and corrections implemented in this software release. Their intent is informative, not instructional. Review RES 3700 Credit Card Interface's product documentation, including technical and application advisories for previous versions, for detailed information on installation, upgrade, configuration, and general use.

Audience

This document is for system administrators that install and configure credit card drivers for Oracle Hospitality RES 3700 Point-of-Sale.

Customer Support

To contact Oracle Customer Support, access My Oracle Support at the following URL:

<https://support.oracle.com>

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

Documentation

Oracle Hospitality product documentation is available on the Oracle Help Center at <http://docs.oracle.com/en/industries/hospitality/>.

Revision History

Date	Description of Change
November 2016	Initial Publication

Features and Updates

This chapter describes the features and updates contained in this release.

[Oracle Payment Interface](#)

[Mastercard Unique Card Acceptor Terminal ID Support](#)

[Mastercard 2-Series Bank Identification Number \(BIN\) Support](#)

[Network Proxy Support](#)

Oracle Payment Interface

This release adds RES native driver (CaOPI) for integration with Oracle Payment Interface to handle credit card transactions. This driver supports RES 3700 features and functionality not supported by the MICROS Gateway Device Handler (MGDH), such as:

- Beverage control
- Place holders
- Splitting checks with auths
- Adding checks with auths
- More than five auths per check
- Associating auths with specific seats
- Voiding credit card tenders before batch and settle
- Printing credit auths to the CA Voucher printer

The driver does not support the following RES 3700 features:

- Gift Cards
- TopUp Auth
- Balance Inquiry
- Void a refund
- Debit
- SaleCashBack
- CC Voice for QSR (offline sales)
- Backup OPI Server

Mastercard Unique Card Acceptor Terminal ID Support

The FDMS and TSYS credit card drivers now support the Mastercard requirement for using a unique identifier (sometimes called Lane Number) for each workstation where an authorization request originates. The software uses the workstation object number for this purpose.

Mastercard 2-Series Bank Identification Number (BIN) Support

The FDMS and TSYS credit card drivers now include readiness and compliance for the Mastercard 2-Series BIN numbers (<https://www.mastercard.us/en-us/issuers/get-support/2-series-bin-expansion.html>).

Network Proxy Support

The FMDS credit card driver now supports the use of a network proxy.
