**WCS-34354: The Portal session could not be logged out.**

**Cause:** A SQL error occurred when attempting to log out.

**Action:** Verify that the Portal instance is up and running.

Level: 1

Type: ERROR

Impact: Other

**WCS-34355: Cannot determine the length of the given input stream.**

**Cause:** An error occurred while determining the length of the input stream.

**Action:** Verify that the input stream is valid.

Level: 1

Type: ERROR

Impact: Other

**WCS-34356: Current operation is not supported for the single-valued property, {0}.**

**Cause:** The current operation could not be performed on a single property as single-valued properties are not supported by such an operation.

**Action:** This API cannot be invoked on a single-valued property.

---

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34357: This node, {0}, cannot be referenced and hence, does not have a UUID property.**

**Cause:** The context node does not have a UUID property.

**Action:** Make this request on a referenceable node.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34358: Current operation is not supported for the multi-valued property, {0}.**

**Cause:** The current operation could not be performed on a multi-valued property as multi-valued properties are not supported by such an operation.

**Action:** This API cannot be invoked on a multi-valued property.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34359: This operation is not supported by the Portal repository.**

**Cause:** An error occurred while performing this action as the operation is not supported by the underlying Portal repository.

**Action:** Check the operation being attempted is a valid operation for the repository.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34360: The Portal repository has only 1 workspace, so this request is invalid.**

**Cause:** The underlying Portal repository has only one workspace.

**Action:** This is an invalid request since the repository is a single workspace repository. Retry with a valid request.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34361: Cannot convert length of property, {0}, to long.**

**Cause:** An error occurred while converting the length to the long data type.

**Action:** Verify the value of the property is valid.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34362: Cannot parse the date value for property, {0}.**

---

**Cause:** An error occurred while parsing the date value.

**Action:** Verify the value of the property is valid.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34363: The requested property cannot be found. Path of context node: {0}; Relative Path: {1}.**

**Cause:** The property was not found.

**Action:** Verify that the requested property is valid and that the path is valid.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34364: The requested item, {0}, cannot be found.**

**Cause:** An error occurred while getting the requested item.

**Action:** Verify that the item exists in the Portal repository.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34365: The property, {0}, cannot be converted to a reference.**

**Cause:** The property could not be converted to a reference or was a multi-valued property.

**Action:** Verify that the property can be converted to a reference.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34366: {0} is a folder and hence, it does not have a primary item.**

**Cause:** The request could not be performed because folders cannot have primary items.

**Action:** This is an invalid request.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34367: The requested node was not found. Path of context node: {0}; Relative Path: {1}.**

**Cause:** The node was not found.

**Action:** Verify that the requested node is valid and that the path is valid.

**Level:** 1

**Type:** ERROR

**Impact:** Other

---

**WCS-34368: The given path, {0}, is invalid.**

**Cause:** The specified path was invalid.

**Action:** Provide a valid path.

**Level:** 1

**Type:** WARNING

**Impact:** Other

**WCS-34416: Error determining if child node, {0}, could be added.**

**Cause:** An error occurred while determining whether the child node could be added.

**Action:** Verify the node is valid.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34417: Error determining if child node, {0}, based on type, {1}, could be added.**

**Cause:** An error occurred while determining whether a child node based on the given type could be added.

**Action:** Verify the node and type are valid.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34418: Error removing the child item, {0}, for node type, {1}.**

**Cause:** An error occurred while removing the child item.

**Action:** Verify item and node type are valid.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34419: Error removing the property, {0}, for node type, {1}.**

**Cause:** An error occurred while removing the property.

**Action:** Verify the node type and property are valid.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34421: The connection cannot be closed.**

**Cause:** The system encountered an unexpected error while trying to close a database connection.

**Action:** Verify that the Portal instance is up and running.

**Level:** 1

**Type:** ERROR

**Impact:** Other

---

**WCS-34422: The node types array object could not be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the node types object in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34423: The "all node types" node type iterator could not be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the node type iterator in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34424: The Portal node types linked list object could not be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the Portal node types linked list object in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34425: The cache region, {0}, has already been defined.**

**Cause:** The cache region has already been defined.

**Action:** No action is required as this is just indicating that the cache region has already been defined.

**Level:** 1

**Type:** WARNING

**Impact:** Other

**WCS-34428: Generic cache exception when trying to retrieve object from cache.**

**Cause:** A cache exception occurred when trying to retrieve the object from the cache.

**Action:** Contact the WebCenter administrator to check the status of the Cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34429: Object cannot be stored in cache as the cache is full.**

**Cause:** The object could not be stored in cache because the cache was full.

**Action:** Contact the WebCenter administrator to check the status of the Cache.

**Level:** 1

---

Type: ERROR

Impact: Other

**WCS-34430: The root node does not have a parent node.**

**Cause:** The parent node was requested for a root node.

**Action:** Request the parent node of any node except the parent node.

Level: 1

Type: ERROR

Impact: Other

**WCS-34431: The node type iterator object cannot be removed from the cache.**

**Cause:** The node type iterator object could not be removed from the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

Level: 1

Type: ERROR

Impact: Other

**WCS-34432: The node type name cannot be returned from the qualified name.**

**Cause:** The namespace could not be resolved.

**Action:** Verify the specified node type name is valid.

Level: 1

Type: ERROR

Impact: Other

**WCS-34433: The property name cannot be returned from the qualified name.**

**Cause:** The namespace could not be resolved.

**Action:** Contact Oracle Support Services.

Level: 1

Type: INCIDENT\_ERROR

Impact: Other

**WCS-34434: The property definition name cannot be returned from the qualified name.**

**Cause:** The namespace could not be resolved.

**Action:** Verify the property type is valid.

Level: 1

Type: ERROR

Impact: Other

**WCS-34435: The item at the requested depth, {0}, cannot be found.**

**Cause:** An error occurred while getting the requested item.

**Action:** Verify that the depth is valid.

Level: 1

Type: ERROR

---

**Impact:** Other

**WCS-34436: The root node does not have a parent.**

**Cause:** Could not request the parent node as root nodes do not have parent nodes.

**Action:** Verify that the context node is not the root node.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34437: The Portal session cannot be restored.**

**Cause:** A SQL error occurred when attempting to restore the session for the user.

**Action:** Verify that the user has been authenticated.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34438: The declared property definition array object cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the declared property definition array object in cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34440: The property definition array object cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the property definition array object in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34441: The property iterator object cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the property iterator object in the cache.

**Action:** Contact the WebCenter administrator to check the status of the Cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34442: The property object cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the property object in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

---

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34443: The node iterator object cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the node iterator object in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34444: The node object cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the node object in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34446: The node type object cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the node type object in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34447: The "primary node types" node type iterator cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the node type iterator in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34448: The "mixin node types" node type iterator cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the node type iterator in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34449: The "super types" node type array cannot be stored in cache.**

---

**Cause:** The system encountered an unexpected exception when trying to store the node type array in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34450: The child node definitions of the node type cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the child node definitions of the node type in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34451: The property definitions of the node type cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the property definitions of the node type in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34452: The boolean object cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the boolean object in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34453: The requested child node definition of the node type cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the child node definition of the node type in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34454: The requested property definition of the node type cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the property definition of the node type in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34456: The repository property objects cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the repository property objects in cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34457: The repository property definition objects cannot be stored in the cache.**

**Cause:** The system encountered an unexpected exception when trying to store the repository property definition objects in the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34458: One of the cache regions could not be destroyed.**

**Cause:** The system encountered an unexpected exception when trying to destroy one of the cache regions.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34459: The cache could not be initialized.**

**Cause:** The system encountered an unexpected exception when trying to initialize the cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34460: The cache configuration file could not be read.**

**Cause:** The system encountered an IO exception when trying to read the cache configuration file.

**Action:** Verify that the configuration file exists.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34461: The repository node type objects could not be stored in cache.**

---

**Cause:** The system encountered an unexpected exception when trying to store the repository node type objects in cache.

**Action:** Contact the WebCenter administrator to check the status of the cache.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34462: Cannot get the super types for node type: {0}.**

**Cause:** An error occurred while fetching the super types of the given node type.

**Action:** Verify that the requested node type exists in the Portal repository and is a custom type.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34463: The cache region, {0}, cannot be found.**

**Cause:** Could not find the requested region, as it has not been defined in Java Object Cache (JOC).

**Action:** Verify that the region name is valid and is expected to exist in this hierarchy.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34464: Oracle Text search is unable to run.**

**Cause:** An error occurred with Oracle Text while running a search.

**Action:** Check with the Administrator of the Portal you are trying to search that Oracle Text is valid. Additional information as to the cause of the error may be in the portal diagnostics log.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34465: A root search can not be performed as the base languages of the page groups are different.**

**Cause:** The search could not be performed because the base language of the page groups to be searched are not the same.

**Action:** Only perform searches which search a single page group.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-34466: Cannot look up the database connection with the name {0} from connections.xml.**

**Cause:** An error occurred while attempting to look up the database connection; the named database connection may not exist in connections.xml.

---

**Action:** Make sure the database connection is created in connections.xml.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**WCS-35006: cannot load metadata from XML node**

**Cause:** The content of the data-control file (.dcx) might be invalid.

**Cause:** While a WSDL is being retrieved through http protocol, the server requires replacing the service port address in WSDL with the actual address for the server. For any web service which defines one or more service ports bound to https transport, if the domain does not enable SSL functionality then the service port address could not be replaced correctly because https address for the server cannot be resolved.

**WLS-WSEE-CORE-00006: Implicit/generated Client Identity {0} has been used in multiple calls to Service.getPort()/createDispatch() where these calls have used different services and/or sets of features. Monitoring statistics for this client will include all these different usages. Validation failures were: {1}**

**Cause:** WebLogic JAX-WS web service clients are assigned a unique identity that is intended to represent the business purpose of that client. This identity can be specified directly using `weblogic.jws.jaxws.client.ClientIdentityFeature` or it can be allowed to be implicit. Implicit identity is generated automatically based on environmental information at the point where a `Port/Dispatch` instance is created. Your code has received an implicit client identity that is getting used (again implicitly) across multiple services or sets of features. All statistics gathered for a given client instance are rolled up under the client instance's client identity. If client instances using different services and/or feature sets contribute statistics to

---

the same client identity, this can be confusing. It is even possible for clients to behave incorrectly when more advanced web service features are used.

**Action:** Best practice is to create a specific client identity (with a name representing a logical business purpose) for the client and denote this identity by passing `weblogic.jws.jaxws.client.ClientIdentityFeature` to the call to `Service.getPort()/createDispatch`. Further, it is recommended that you pass a single/global set of web service feature objects to that call (e.g. Create `WebServiceFeature` instances as static class members or in a method annotated with `@PostConstruct` for containers compatible with this annotation). The actual call to `Service.getPort()/createDispatch()` should still be made in any way that makes sense for your uses (e.g. calling `getPort` on demand in a web service method, with `Service` created as a static class member).

If client instances using different services and/or feature sets contribute statistics to the same client identity, this can be confusing. It is even possible for clients to behave incorrectly when more advanced web service features are used.

**Action:** Best practice is to create a specific client identity (with a name representing a logical business purpose) for the client and denote this identity by passing `weblogic.jws.jaxws.client.ClientIdentityFeature` to the call to `Service.getPort()/createDispatch`. Further, it is recommended that you pass a single/global set of web service feature objects to that call (e.g. Create `WebServiceFeature` instances as static class members or in a method annotated with `@PostConstruct` for containers compatible with this annotation). The actual call to `Service.getPort()/createDispatch()` should still be made in any way that makes sense for your uses (e.g. calling `getPort` on demand in a web service method, with `Service` created as a static class member).

**WLS-WSEE-PERSIST-00002: No store name provided, and persistence strategy is not LOCAL\_ACCESS\_ONLY. The SendingService cannot be created.**

**Cause:** When requesting a network-available persistent store, the name of this store must be given when attempting to create a SendingService instance.

**Action:** Set up the store, and provide its name when creating the SendingService, or request a store that uses LOCAL\_ACCESS\_ONLY so the service can create the store for you.

**WLS-WSEE-PERSIST-00003: The store associated with the given store name ({0}) is slated for use across the network but is not an XA-capable store. Please specify another store name or configure this store to be location independent (e.g. JDBC-based, etc.)**

**Cause:** In order to use a store across the network, that store must support the XA transaction protocol. Without this, only local changed can be made.

**Action:** Set up the store, and provide its name when creating the SendingService, or request a store that uses LOCAL\_ACCESS\_ONLY so the service can create the store for you.

**Impact:** WebService

**WLS-WSEE-PERSIST-00007: Improper buffering queue type {0} with JNDI name {1} configured on logical store {2}. You must use Uniform Distributed Queues or simple Queues with web services.**

**Cause:** You configured an invalid type of queue for a logical store (via the RequestBufferingQueueJndiName or ResponseBufferingQueueJndiName properties). You must use Uniform Distributed Queues (recommended) or plain Queues. If you wish to take advantage of migration features of web services in a cluster, you must use Uniform Distributed Queues. Note, when using configuration wizard or WLST to apply the wls\_webservice\_jaxws.jar extension template, you must explicitly request the creation of Uniform Distributed Queues as described in the web services documentation. By default, the configuration wizard and WLST create Weighted Distributed Queues in a cluster.

**Action:** Configure a Uniform Distributed Queue (or Queue) and provide this queue's JNDI name to the logical store configuration (via the RequestBufferingQueueJndiName or ResponseBufferingQueueJndiName properties). Note, you can do this from the configuration wizard or WLST when applying the wls\_webservice\_jaxws.jar extension template, and the proper type and number of queues will be created automatically for you. See the web services documentation for more information on requesting Uniform Distributed Queues when using the template.

**WSEE-RM-00002: SourceSequence not ready to send sequence messages. Retry after CreateSequenceResponse and Sequence.getState() == CREATED.**

**Cause:** An attempt was made to use or modify a sequence from the RM source side before that sequence has completed the RM handshake process (when the CreateSequenceResponse message arrives and is processed).

**Action:** Retry the operation after the RM sequence has been properly initialized, and the CreateSequenceResponse message for the sequence has been processed.
