1. Back Office

Back Office module is designed to collectively accommodate all the internal transactions in **FLEXCUBE Retail**. Internal transactions are categorized as those transactions, which are mainly performed at back-office, i.e., transactions that are not directly initiated by the customer in the system. The complete range of transactions under this category covers specific global setup, security and audit related activities apart from covering transactions on accounts like file upload and NPA (non-performing assets) processing.

1.1. Key Features of Back Office module

FLEXCUBE Retail Banking Solution offers the best features with an interactive interface that emphasizes on intelligent business logic for financial companies.

This manual is divided into various sub-sections namely:

Delivery Channel Related Transactions: This section describes the delivery channel related transactions, which include global definitions for electronic banking channels, automated teller machines (ATM), telephone banking service, etc.

Security Management System (SMS): This section describes about the usage of various maintenances for security control and its utilities

NPA Related Transactions: This section describes the transactions that pertain to Non Performing Assets processing.

General Ledger Transactions: This section covers all transactions pertaining to GL activities

Collaterals: This section describes about linking of collateral to the account.

Inventory: This section communicates about the stock transactions pertaining to inventory maintenance.

The system facilitates the bank with uploading files for various transactions where the bank wants to debit or credit numerous accounts at a time, or for other activities such as uploading the file to facilitate bulk checkbook issue

Service Charges: This section provides details about linking the service packages to the customer or the existing accounts of the customers.

Download Related: This section provides details about the setup of automatic download of data from central host to the various branch servers.

2. Delivery Channel Related Transactions

1.2. ATM01 - ATM Bank Params Maintenance

Using this option, you can define the bank parameters / GL accounts required for **Oracle FLEXCUBE**, which are necessary for maintaining ATM (Automated Teller Machine) transactions, which occur through various ATM channels across the network. The hold variance percentage and the hold period is also defined here.

The system places a Master Money Hold on the account when it grants authorisation on an offline POS i.e. signature based POS transaction. The Hold has a certain validity period. The MasterMoney Hold will be removed by the system if the debit has a matching Authorisation Code and is within the defined tolerance range. The debit will then be posted to the account. If either the Authorisation Code and/or settlement amount for debit (not within the tolerance) does not match, the Hold is not removed. Such a Hold will expire on the expiry date.

Definition Prerequisites

- BAM20 - Bank Codes Maintenance

Other Prerequisites

- GL Codes have to be defined

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add ATM bank parameters

1. Type the fast path **ATM01** and click **Go** or navigate through the menus to **Global Definitions > Channels > ATM Bank Params Maintenance**.
2. The system displays the **ATM Bank Params Maintenance** screen.

Field Description

Field Name	Description
Bank Code	<p>[Mandatory, Numeric, Five]</p> <p>Type the code of the bank, for which global ATM definitions should be maintained.</p> <p>Each code uniquely identifies a different bank.</p>
Institution Id	<p>[Mandatory, Numeric, 11]</p> <p>Type the institution code.</p> <p>Each code uniquely identifies the bank in the network.</p> <p>Institution ID is allotted by the central bank of the country, or the body that governs payment systems in the country.</p>
Issuer Fee GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the issuer fee GL code.</p> <p>This GL account will be credited for fees on transactions done through the Bank's ATM network.</p>

Field Name	Description
ATM Cash GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the ATM cash GL code.</p> <p>This GL account will be credited or debited for cash transactions done through the Bank's ATM network by the bank customers.</p>
Forwarder Cash GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the forwarder cash GL code.</p>
Acquirer Cash GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the acquirer cash GL code.</p> <p>This GL account will be debited for the remote on-us transactions (transactions performed by the customers of other banks, through the Bank's ATM network).</p>
Forwarder Fee GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the forwarder fee GL code.</p> <p>This GL account will be credited for the transactions performed by other bank's customers through the ATM network, owned and managed by our bank in the capacity of a forwarder.</p>
Acquirer Fee GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the acquirer fee GL code.</p> <p>This GL account will be credited for fees on transactions done by banks, which act as Acquirer institutions.</p>
Debit Suspense GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the debit suspense GL code.</p> <p>This GL account will be debited in case of any suspense generated on account of ATM transactions. Entries in this GL should be manually reversed out after rectifying the cause of suspense.</p>
Credit Suspense GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the credit suspense GL code.</p> <p>This GL account will be credited in case of any suspense generated on account of ATM transactions. Entries in this GL should be manually reversed out after rectifying the cause of suspense.</p>
Remittance Debit GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the remittance debit GL code.</p> <p>The GL will be debited if the other bank account holder is allowed to give debit instructions for debiting an ATM bank customer. The reconciliation or accounting of the remittance debit GL has to be done operationally from the file hand off.</p>

Field Name	Description
Remittance Credit GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the remittance credit GL code.</p> <p>The GL will be credited if the ATM facilitates fund transfer option, and the customer of the bank does a fund transfer from his account to an external account.</p> <p>The reconciliation or accounting of the remittance credit GL has to be done operationally from the file hand off.</p>
Settlement GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the settlement GL code.</p> <p>This GL account will be debited or credited, in case of remote on us or off us transactions. The net balance in this GL will be claimed from, or paid to other banks in the network.</p>
Remit Branch Code	<p>[Optional, Alphanumeric, 12]</p> <p>Type the branch code for remittance.</p>
Allow Funds Transfer Across Customers	<p>[Optional, Check Box]</p> <p>Select the Allows Funds Transfer Across Customers check box if you want to allow the transactions involving funds transfer, across accounts belonging to different customers.</p>
Levy Issuer Fee Online	<p>[Optional, Check Box]</p> <p>Select the Levy Issuer Fee Online check box if you want to debit the issuer fees online simultaneously, along with the transaction.</p> <p>Issuer fees is normally passed on by the switch/ETBI on which the ATM / TBS runs. Issuer fees is included in the message that is passed on by the switch/ETBI, and gets debited online with the original transaction amount, provided this flag is checked.</p>
Funds Appropriation Sequence	<p>[Mandatory, Alphanumeric, Five]</p> <p>Type the funds appropriation sequence.</p> <p>This field denotes the sequence in which the transaction amount needs to be appropriated while debiting the account.</p> <p>The options are:</p> <ul style="list-style-type: none"> • S – Sweep-In • O – Overdraft • V – Overline • A – Advance against unclear funds • T – Temporary Overdraft

3. Click the **Add** button.
4. Enter the bank code and press the **<Tab>** or **<Enter>** key.
5. Enter the required information in the various fields.

6. Click the **Ok** button.
7. The system displays the message " Record Added...Authorization Pending..". Click the **OK** button.
8. The ATM bank parameters are added once the record is authorised.

1.3. ATM02 - ATM Acquirer POS Id Maintenance

Using this option, you can maintain the various Switch IDs, the physical ATM terminals that connect to these switches, and the originating branch code for a particular ATM.

Each ATM is logically attached to a GL (ATM CASH GL) in some branch (originating branch) in **FLEXCUBE**. Every ATM in the ATM network of a Bank has two ATM IDs (Card Acceptor terminal ID and Card Acceptor ID code), which uniquely identify the ATM. The ATM Acquirer POS ID Xref maintenance, maintains the cross-reference between the ATM IDs, ATM CASH GL and the ATM branch. Also, every Forwarder (VISA/Master Card), which the bank interfaces with, has to be configured through this option.

Definition Prerequisites

Not Applicable

Other Prerequisites

- GL Codes have to be defined

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add ATM acquirer POS ID

1. Type the fast path **ATM02** and click **Go** or navigate through the menus to **Global Definitions > Channels > ATM Acquirer POS Id Maintenance**.
2. The system displays the **ATM Acquirer POS Id Maintenance** screen.

ATM Acquirer POS Id Maintenance

The screenshot shows a software window titled "ATM Acquirer POS Id Maintenance". It contains the following fields:

- Acquirer Institution Id
- Card Acceptor Identification Code
- Forwarder Institution Id
- Card Acceptor Terminal Name
- Card Acceptor Terminal Id
- Originating Branch Code
- ATM Cash GL
- Deposit Cash GL
- Acquirer Fee GL
- Forwarder Fee GL
- Incoming Remit GL
- Outgoing RemitGL
- Settlement GL

Below the fields is a "Record Details" table:

Input By	Authorized By	Last Mnt. Date	Last Mnt. Action	Authorized
				<input type="checkbox"/>

At the bottom, there is a navigation bar with radio buttons for: Add, Modify, Delete, Cancel, Amend, Authorize, and Inquiry (which is selected). To the right of these buttons are "Ok", "Close", and "Clear" buttons.

Field Description

Field Name	Description
Acquirer Institution Id	[Mandatory, Numeric, 11] Enter the acquirer institution ID. The institution ID is allotted to the bank by the central bank or the governing body for non-branch channels like TBS, ATM and POS.
Card Acceptor Identification Code	[Mandatory, Alphanumeric, 15] Enter the card acceptor identification code. This code identifies the ATM, which defines the point of the transaction in both local and interchange environment.
Forwarder Institution Id	[Mandatory, Alphanumeric, 11] Enter the forwarder institution ID. The institution ID allotted to the bank by the central bank or the governing body for non-branch channels like TBS, ATM and POS who own and manage the ATM network.
Card Acceptor Terminal Name	[Display] This field displays the card terminal name.

Field Name	Description
Card Acceptor Terminal Id	[Display] This field displays the card terminal ID. Each unique code identifies a terminal at the card acceptor location.
Originating Branch Code	[Mandatory, Pick List] Select the branch code from the pick list. The originating branch code refers to the branch through which the ATM transactions would be routed to respective branches. In practical scenarios, where all ATM operations are centralized, the branch code would be unique. However, if there are multiple switches that accept ATM requests, all catered to by different branches, the respective branch code needs to be maintained.
ATM Cash GL	[Mandatory, Numeric, Nine] Enter the ATM cash GL code. This GL account will be debited on performing on-us, remote on us, off us transactions.
Deposit Cash GL	[Mandatory, Numeric, Nine] Enter the deposit cash GL code.
Acquirer Fee GL	[Mandatory, Numeric, Nine] Enter the acquirer fee GL code which accepts the card for performing the transaction.
Forwarder Fee GL	[Mandatory, Numeric, Nine] Enter the forwarder fee GL code which is responsible for forwarding the transaction from the acquirer to the issuer.
Incoming Remit GL	[Mandatory, Numeric, Nine] Enter the incoming remit GL code.
Outgoing Remit GL	[Mandatory, Numeric, Nine] Enter the outgoing remit GL code.
Settlement GL	[Mandatory, Numeric, Nine] Enter the settlement GL code.

3. Click the **Add** button.
4. Enter the acquirer institution ID and press the **<Tab>** or **<Enter>** key.
5. Enter the appropriate information in the fields.
6. Select the appropriate branch code from the drop-down list.

ATM Acquirer POS Id Maintenance

ATM Acquirer POS Id Maintenance

Acquirer Institution Id	0000000000
Card Acceptor Identification Code	
Forwarder Institution Id	17677
Card Acceptor Terminal Name	
Card Acceptor Terminal Id	
Originating Branch Code	240 ... SANDOZ - MUMBAI
ATM Cash GL	173000011
Deposit Cash GL	173000040
Acquirer Fee GL	173000030
Forwarder Fee GL	173000025
Incoming Remit GL	173000048
Outgoing RemitGL	267000053
Settlement GL	267000057

				<input type="checkbox"/>

Add Modify Delete Cancel Amend Authorize Inquiry

7. Click the **Ok** button.
8. The system displays the message "Record Added...Authorization Pending...Click Ok to Continue". Click the **OK** button.
9. The ATM acquirer POS ID is added once the record is authorised.

Note: The same **Card Acceptor Identification Code** can have multiple **Card Acceptor Terminal Ids** linked to it. Every combination of **Card Acceptor Identification Code** and **Card Acceptor Terminal Ids** is unique.

1.4. POS01 - POS Acquirer POS Id Maintenance

Each POS (Point of Sale) is logically attached to a dummy account in some branch (originating branch) in **FLEXCUBE**. Every POS in the POS network of a Bank has two POS IDs (Card Acceptor terminal ID and Card Acceptor ID code), which uniquely identify the POS.

Using this option, you can facilitate the cross-reference between the POS IDs, dummy account and the POS branch. Also, every forwarder (VISA/Master Card), which the bank interfaces with, has to be configured through the **POS Acquirer POS Id Maintenance** option.

Definition Prerequisites

Not Applicable

Other Prerequisites

- GL Codes should be defined

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add POS acquirer POS ID

1. Type the fast path **POS01** and click **Go** or navigate through the menus to **Global Definitions > Channels > POS Acquirer POS Id Maintenance**.
2. The system displays the **POS Acquirer POS Id Maintenance** screen.

Field Description

Field Name	Description
Acquirer Institution Id	<p>[Mandatory, Numeric, 11]</p> <p>Type the acquirer institution ID.</p> <p>The institution ID is allotted to the bank by the central bank, or the governing body for non-branch channels like TBS, ATM and POS.</p>
Forwarder Institution Id	<p>[Optional, Numeric, 11]</p> <p>Type the forwarder institution ID.</p> <p>The institution ID allotted to the bank by the central bank or the governing body for non-branch channels like TBS, ATM and POS who own and manage the POS network.</p>
Card Acceptor Identification Code	<p>[Conditional, Numeric, 15]</p> <p>Type the card acceptor identification code.</p> <p>This code identifies the POS, which defines the point of transaction in both local and interchange environments.</p>

Field Name	Description
Card Acceptor Terminal Id	[Conditional, Numeric, 16] Type the card acceptor terminal ID. Each unique code identifies a terminal at the card acceptor location.
POS GL Account No	[Mandatory, Numeric, Nine] Type the GL account number. The bank will maintain a dummy merchant account for each POS terminal. This is the account number, which will be credited online for the transaction amount, and debited for the discount amount for 'On-Us' transactions arriving from that POS terminal. If a merchant has installed multiple POS terminals, each of them could be associated with the same dummy merchant account number.
Originating Branch Code	[Mandatory, Pick-List] Select the originating branch code from the pick- list. The originating branch code refers to the branch through which the POS transactions would be routed to the respective branches. In practical scenarios where all POS operations are centralized, the branch code would be unique. However, if there are multiple switches that accept POS requests all catered to by different branches, the respective branch code should be maintained.
CASH GL Account No.	[Mandatory, Numeric, Nine] Type the Cash GL Account number.
CASH Branch Code	[Mandatory, Pick List] Select the applicable Cash Branch Code from the pick list.
Spend class	[Optional, Pick List] Select the spend class from the pick list. The spend class defined against the Spend Class will be returned in the UDE ¹ .
Spend Sub class	[Optional, Pick List] Select the spend sub class from the pick list. The spend class defined against the Spend Class will be returned in the UDE.

3. Click the **Add** button.
4. Enter the required information in the various fields.
5. Click the **Validate** button. The system enables the last two fields.
6. Enter the GL account number and select the originating branch code.

7. Click the **Validate** button and then click the **Ok** button.
8. The system displays the message "Record Added...Authorization Pending...Click Ok to Continue". Click the **OK** button.
9. The POS acquirer POS ID is added once the record is authorised.

1.5. POS02 - POS Bank Params Maintenance

Using this option, you can define the bank level global definitions related to POS transactions and decide whether funds transfer across customers can be permitted for POS transactions or not.

Transactions that are happening through POS channel are dependent on these parameters. The various GL accounts for the POS and the suspense GL accounts are maintained in this option.

Normally transaction fee (issuer fee) is charged by the switch for the POS transactions. If the **Levy Issuer Fee Online** check box is selected this fee will be debited online with the original transaction amount.

Definition Prerequisites

- GL accounts to have maintained

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add POS bank parameters

1. Type the fast path **POS02** and click **Go** or navigate through the menus to **Global Definitions > Channels > POS Bank Params Maintenance**.
2. The system displays the **POS Bank Params Maintenance** screen.

1.6. POS04 - POS BIN Xref Maintenance

Using this option, you can define the bank level global definitions related to POS transactions and decide whether funds transfer across customers can be permitted for POS transactions or not.

Definition Prerequisites

- GL accounts to have maintained

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To maintain POS Bin Xref parameters

1. Type the fast path **POS04** and click **Go** or navigate through the menus to **Global Definitions > Channels > POS Bin Xref Maintenance**.
2. The system displays the **POS BIN Xref Maintenance** screen.

POS BIN Xref Maintenance

The screenshot shows the 'POS BIN Xref Maintenance' application window. At the top left, there are two input fields: 'Bin Number' and 'FWD ID'. The main area of the window is currently empty, with a cursor visible in the center. At the bottom of the window, there is a 'Record Details' section with a table structure. Below this, there is a navigation bar with radio buttons for 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', and 'Inquiry'. The 'Inquiry' option is currently selected. To the right of the navigation bar are buttons for 'UPD', 'OK', 'Close', and 'Clear'.

Field Description

Field Name	Description
Bin Number	[Mandatory, Numeric,10] Type the ten digit bin number. Alternatively, you can select the bin number from the pick list.

Field Name	Description
FWD ID	[Display] The FWD ID is auto populated.

3. Click the **Add** button.
4. Enter the required information in the various fields.

POS BIN Xref Maintenance

5. Click the **Ok** button.
6. The system displays the message "Record Added...Authorization Pending...Click Ok to Continue". Click the **OK** button.
7. The POS BIN parameters are added once the record is authorised.

1.7. TBS01 - TBS Bank Params Maintenance

Using this option, you can define the bank level global definitions related to TBS (Telephone Banking Service) transactions and decides whether funds transfer across customers can be permitted for TBS transactions or not.

Transactions that are happening through TBS channel are dependent on these parameters.

Normally transaction fee (issuer fee) is charged by the switch for the TBS transactions. If the **Levy Issuer Fee Online** check box is selected this fee will be debited online with the original transaction amount.

Definition Prerequisites

Not Applicable

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add TBS bank parameters

1. Type the fast path **TBS01** and click **Go** or navigate through the menus to **Global Definitions > Channels > TBS Bank Params Maintenance**.
2. The system displays the **TBS Bank Params Maintenance** screen.

The bottom toolbar contains buttons: Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry, Ok, Close, and Clear.

6. Click the **Ok** button.
7. The system displays the message "Record Added...Authorization Pending...Click Ok to Continue". Click the **OK** button.

8. The TBS bank parameters are added once the record is authorised.

1.8. TBS02 - TBS Acquirer Pos ID Maintenance

Using this option you can maintain the various ETBI IDs, the channels that originate from these ETBIs, and the originating branch code for a particular ETBI.

In a centralized TBS environment, the branch code is unique. In case of multiple Switches that accept TBS requests, where all switches are catered to by different branches, the respective branch codes need to be maintained. Transactions that occur through TBS channel are dependent on these parameters.

Definition Prerequisites

Not Applicable

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add TBS acquirer POS ID

1. Type the fast path **TBS02** and click **Go** or navigate through the menus to **Global Definitions > Channels > TBS Acquirer Pos ID Maintenance**.
2. The system displays the **TBS Acquirer Pos ID Maintenance** screen.

1.11. BAIB2 - IB Bill Company Details Maintenance

Using this option you can accept bill payments on behalf of service providers for a fee.

In such cases, the customers of the billing company will pay their bills to the bank, and the bank in turn will credit the account of the billing company. The billing companies, who want to avail this facility, have to register their details with the bank and must have a savings and checking account with the bank. The bank will register the details of the billing company in the billing company details. This maintenance is required for the Bill Payment transaction through Internet.

Note: The system automatically authorises this transaction.

Definition Prerequisites

Not Applicable

Other Prerequisites

- The CASA for the billing company should be opened with the bank before maintaining billing company details

Modes Available

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add billing company details

1. Type the fast path **BAIB2** and click **Go** or navigate through the menus to **Global Definitions > Channels > IB Bill Company Details Maintenance**.
2. The system displays the **IB Bill Company Details Maintenance** screen.

IB Bill Company Details Maintenance

Field Description

Field Name	Description
Company ID	[Mandatory, Alphanumeric, Four] Type the company ID. It is the unique identification given to the service provider by the bank. This ID is manually generated.
Company Type	[Mandatory, Alphanumeric, Two] Type the company type. The bank assigns different codes to the companies to whom it provides the billing services.
Company Name	[Mandatory, Alphanumeric, 120] Type the company name. The name of the service provider or the billing company, on whose behalf the bank collects the payments for the bills.
Bill Information Available	[Optional, Check Box] Select the Bill Information Available check box if the billing information of the company is available to the bank.

Field Name	Description
Payment After Due Date	[Optional, Check Box] Select the Payment After Due Date check box if you want to accept the payment received from the customer of the billing company, after the due date specified in the bill.
Payment Type Allowed	[Mandatory, Drop down] Select the payment type which is allowed from the drop down list. The options are: <ul style="list-style-type: none"> • P: Part Payment allowed i.e. amount less than or equal to the outstanding • F: Only Full Payment allowed i.e. full outstanding amount • E: Excess Payment allowed i.e. payment amount can be greater than or equal to the outstanding amount
Grace Period Days	[Mandatory, Numeric, Five] Type the number of grace days allowed for late payment of the bill without any penalty.
Cut Off Period Days	[Mandatory, Numeric, Five] Type the number of days after the due date, beyond which payment received from the customers of the billing company will not be accepted.
Company Account No.	[Mandatory, Numeric, 16] Type the valid account number of the company held with the bank. The bill amount received from the customer will be credited to this account.
Company Address	[Mandatory, Alphanumeric, 40] Type the postal address of the billing company.
Contact Person	[Optional, Alphanumeric, 20] Type the name of the contact person. All interactions will be addressed to this contact person.
Phone Number	[Optional, Numeric, 16] Type the contact number of the billing company.
Collection Center Code	[Optional, Alphanumeric, 10] Type the collection code of the center. A unique code is assigned to the collection center of the company.
Bill Details File Name	[Optional, Alphanumeric, 20] Type the path and the name of the bill details file. The name of the file containing the bill details and its path is stored in a separate file outside FLEXCUBE Retail .

3. Click the **Add** button.
4. Type the company id and press the **<Tab>** or **<Enter>** key

1.14. BAIB5 - IB Block Transfer Across Products

Using this option you can allow or disallow transfer of funds through Internet Banking between accounts belonging to two specific products. For example, this facility can be used to restrict credit into accounts opened under certain specific type of products like Non-Resident Accounts, where the bank does not allow customers to transfer funds from certain types of products.

Note: The system automatically authorises this transaction.

Definition Prerequisites

- The products should be added and authorised in **FLEXCUBE Retail**

Modes Available

Add, Delete, Inquiry, Cancel, Authorize. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To block transfer of funds across products under internet banking facility

- Type the fast path **BAIB5** and click **Go** or navigate through the menus to **Global Definitions > Channels > IB Block Transfer Across Products**.
- The system displays the **IB Block Transfer Across Products** screen.

5. Click the **Ok** button.
6. The system displays the message "Record Authorized..". Click the **OK** button.
7. The transfer of funds across products under Internet Banking facility is blocked.

1.15. Collaterals

1.16. BAM46 - Collateral Propagation

When a Collateral is re-evaluated, the new value of the collateral needs to be applied. This is applicable specifically for financial securities wherein the security value of the collateral changes as per market conditions and a feed containing value of each stock comes from the stock exchange.

Using this option, propagation of collateral can be done which will trigger a change in the drawing power of the collateral whose value has changed.

Definition Prerequisites

Not Applicable

Modes Available

Not Applicable

To propagate re-evaluation of a collateral

1. Type the fast path **BAM46** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Collaterals > Collateral Propagation**.
2. The system displays the **Collateral Propagation** screen.

Collateral Propagation

The screenshot shows a window titled "Collateral Propagation*" with a table containing one row of data. The table has two columns: "LO Code" and "Status". The row shows "1" in the "LO Code" column and "Completed" in the "Status" column. At the bottom right of the window, there are "Start" and "Close" buttons.

LO Code	Status
1	Completed

Field Description

Column Name	Description
LO Code	[Display] This column displays the local office code. The local office represents a regional office under which all the branches within a particular territory are grouped. So, when the user propagates collateral to a local office, it is effectively propagated to all the branches within that local office.
Status	[Display] This column displays the status of the collateral propagation. By default, this field, displays the status as Not Started .

3. Click the **Start** button to propagate re-evaluation details to all branches.

Collateral Propagation

LO Code	Status
1	Completed

4. Click the **Close** button.

1.17. BAM47 - Application Collateral Delink*

Using this option you can de-link a collateral linked to a loan account application. This transaction has to be authorised by a supervisor and the collateral can be released after successful Authorisation.

Definition Prerequisites

- BAM74 - Collateral Header Maintenance
- BAM39 - Collateral Codes Maintenance

Modes Available

Not Applicable

To delink collateral linked to an application

1. Type the fast path **BAM47** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Collaterals > Application Collateral Delink**.
2. The system displays the **Application Collateral Delink** screen.

Application Collateral Delink

4. Click the **Ok** button.
5. The system displays the "Authorization Required. Do You Want to Continue?". Click the **OK** button.
6. The system displays the **Authorization Reason** screen.
7. Enter the relevant information and click the **Ok** button.
8. The system displays the message "Stock Adjustment completed successfully". Click the **OK** button.

Note: For more information on Authorisation transactions, refer to the **FLEXCUBE Introduction User Manual**.

1.18. BA434 - Account To Collateral Inquiry

Collateral refers to all property, including the proceeds thereof, assigned, transferred or pledged to the bank by the customer as collateral for loans/overdraft. It also refers to other extensions of credit, and all Capital Stock, Mortgage Collateral, Securities Collateral and other Collateral, including the proceeds thereof, which are now or hereafter pledged to the bank.

Using this option you can view the collaterals that are linked to specific accounts. The system provides information on collateral details like the value of the collateral in percentage, which has been shared with the account, the actual lendable value of the collateral and the type of collateral i.e. primary or secondary.

Definition Prerequisites

- BAM74 - Collateral Header Maintenance
- BAM39 - Collateral Codes Maintenance
- CASA and Loan accounts to which the collateral is attached

Modes Available

Not Applicable

To inquire on collateral linked to an account

1. Type the fast path **BA434** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Collaterals > Account To Collateral Inquiry**.
2. The system displays the **Account To Collateral Inquiry** screen.

Account To Collateral Inquiry

8. The account classification preferences details are modified once the record is authorised.

1.21. AC002 - CRR Enquiry

FLEXCUBE enables classification of an account into one of the Credit Risk Ratings depending upon the performance of the asset. The record with the lowest **CRR**³ Code (numeric value) will be treated as the best category, and the one with the highest CRR code as the worst.

Using this option you can inquire about CRR movement, and view the CRR Movement history. The system provides information on present CRR, new CRR, the reason for the movement, accrual status, etc.

Definition Prerequisites

- 8051 - CASA Account Opening
- AC001 - Account Classification Preferences
- LN057 - Loan Direct Account Opening
- SMM06 - Template Access Rights Maintenance

Modes Available

Not Applicable

To maintain account classification

1. Type the fast path **AC002** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Classification > CRR Enquiry**.
2. The system displays the **CRR Enquiry** screen.

Search Criteria

Customer

[Optional, Radio Button, Drop-Down]

Select the search criteria to search for the customer from the drop-down list.

The options are:

- Customer short name: Short name of the customer.
- Customer IC: Identification criteria arrived at by the bank during customer addition.
- Customer ID: Unique identification given by the bank.

Field Name	Description
Search String	<p>[Conditional, Alphanumeric, 30]</p> <p>Type the search string, to search for a customer, corresponding to the criteria selected in the Customer drop-down list.</p> <p>If the search criterion is specified as customers' short name or Customer IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.</p> <p>For example, The customer's short name is George Abraham. One can search the above customer by entering Geo in the Search String field.</p>
Account Number	<p>[Optional, Radio Button]</p> <p>Click Account number to view CRR details for a particular account number.</p>
Customer Information	
Customer ID	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p> <p>The ID should be such that it is in conjunction with the customer Type and can determine if the customer is an existing customer.</p> <p>A social security number, passport number can be used.</p>
Customer IC	<p>[Display]</p> <p>This field displays the identification code of the customer.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.</p> <p>The IC should be such that it is in conjunction with the customer Type and can determine if the customer is an existing customer.</p> <p>A social security number, passport number can be used.</p>
Customer Name	<p>[Display]</p> <p>This field displays the name of the customer.</p>

Field Name	Description
Customer CRR	[Display] This field displays the customer CRR. The customer will be assigned the worst CRR of all the accounts, and all the accounts will follow the customers CRR.
Home Branch	[Display] This field displays the name of the home branch where the CASA account / loan account is maintained.

4. Click the **Close** button.

1.22. AC003 - Account Provision

Using this option you can view the provisioning details of an account along with the history of provisioning. You can also maintain manual provision, for the accounts where the provisioning parameter is set to manual provisioning.

Definition Prerequisites

- 8051 - CASA Account Opening
- LN057 - Loan Direct Account Opening
- AC001 - Account Classification Preferences

Modes Available

Not Applicable

To maintain account provision

1. Type the fast path **AC003** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Classification > Account Provision**.
2. The system displays the **Account Provision** screen.

Field Description

Field Name	Description
Customer Based Search	
Search Criteria	<p>[Mandatory, Drop-Down]</p> <p>Select the search criteria to search for the customer from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none">• Customer short name: The short name of the customer.• Customer IC: Identification criteria arrived at by the bank during customer addition.• Customer ID: Unique identification given by the bank.
Search String	<p>[Conditional, Alphanumeric, 20]</p> <p>Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.</p> <p>If the search criterion is specified as customers' short name or Customer IC then any of the letter(s) of the letter of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list.</p> <p>For example, The customer's short name is George Abraham. One can search the above customer by entering Geo in the Search String field.</p>
Customer IC	<p>[Display]</p> <p>This field displays the identification code of the customer.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.</p>
Customer Id	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p> <p>A social security number, passport number can be used.</p>
Home Branch	<p>[Display]</p> <p>This field displays the name of the home branch where the customer's account is maintained.</p>

Field Name	Description
Customer Full Name	[Display] This field displays the full name of the customer.
Customer CRR	[Display] This field displays the customer CRR ⁵ . The customer will be assigned the worst CRR of all the accounts, and all the accounts will follow the customer's CRR.

Account Based Search

Account Number	[Mandatory, Numeric, 16] Type the account number of the customer for which the CRR is to be inquired. It could be a CASA account or a loan account.
Customer CRR	[Display] This field displays the customer CRR. The customer will be assigned the worst CRR of all the accounts, but all the accounts of the customer will have respective CRR.
Customer Id	[Display] This field displays the customer ID.
Home Branch	[Display] This field displays the name of the home branch where the CASA account / loan account is maintained.

- To search based on customer, select the search criteria from the drop-down list.
- Type the search string in **Customer Based Search** section and press the **<Tab>** or **<Enter>** key. Select the customer from the pick list.
- To search based on account, type the account number in **Account Based Search** section and press the **<Tab>** or **<Enter>** key.
- The system displays the **Accounts** tab.

11. The system displays the message "The account has been writtenoff". Click the **Ok** button.

1.24. AC006 - Account WriteOff to Regular

Using this option you can move the written off loan accounts back to regular status. The account should be in written off open status to be moved. The principal outstanding as on date will be moved to suspended principal GL maintained against the CRR code of account in ACM08.

The account will get reclassified in the next classification frequency.

Definition Prerequisites

- LN057 - Loan Direct Account Opening

Modes Available

Not Applicable

To write off the account

1. Type the fast path **AC006** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Classification > Account WriteOff to Regular**.
2. The system displays the **Account WriteOff to Regular** screen.

Account WriteOff to Regular

Field Description

Field Name	Description
Account Details	
Account No	[Mandatory, Numeric, 16] Type the account number of the customer which is to be moved from written off open status to regular.
Branch	[Display] This field displays the home branch where the account was opened.
Product	[Display] This field displays the product code and name, under which the account was opened. The product code is a unique number across all the modules that can identify an authorised and valid product.
Currency	[Display] This field displays the account currency derived from the product, under which the account was opened.
Total Outstanding	[Display] This field displays the total balance outstanding (Principal Outstanding + Arrears) in Loan account .
Principal Written Off	[Display] This field displays the amount that was written off.
Principal Outstanding	[Display] This field displays the principal outstanding as on date.

3. Enter the account number and press the <Tab> or <Enter> key.
4. The system displays the write off account details .
5. Click the **Ok** button.
6. The account status will be changed to Regular.

1.25. AC008 - Provision Inquiry and Modification for Loans and Overdraft

Using this option you can view the details of the provisioning group , rate, provisioning base and the individual provisioning amounts for a selected CASA / Loan account. The fields Discounted Cash Flow of Credit and Discounted Collateral Value can be modified based on which the provision calculation will be made. An External system will provide the data for calculation of the provision entries.

The data provided by the external system is account wise and that includes the Provisioning group, Provisioning Sub group, and Provisioning rate for the account. The data is provided as and when there is a change in any of the parameters required for provisioning. The Provision frequency is daily.

Provision is calculated from the date of account opening till the date of closure. Provisioning and GL entries will be processed on daily basis (when there is a change in any of the parameters or values). The provision is always calculated in account currency. In the case of commonly assessed group, Liquidation Value (LV) will not be taken into account for calculation of provision.

For more information refer to the Examples provided at the end of the chapter.

Definition Prerequisites

- ACM07 - Provisioning Parameters at Bank level for Loans and Overdrafts
- External file upload for the Loans and overdraft accounts for which the modification / inquiry is made.

Modes Available

Not Applicable

To perform provision inquiry and modification for loans and overdrafts

1. Type the fast path **AC008** and click **Go** or navigate through the menus to **Global Definitions > AC > Provision Inquiry and Modification for Loans and Overdraft..**
2. The system displays the **Provision Inquiry and Modification for Loans and Overdraft** screen.

Examples on provisioning:

Example 01

Account Exposure

500-On balance

200-Off balance

50-Accrued Interest

20- Commitment fees and LV- 800

1. $P\text{-on balance eligibility} = 500(\text{On balance}) - 800(\text{LV}) = -300(\text{A})$ $A < 0$, then provision $P\text{-on} = 0$
2. $P\text{-interest eligibility} = 50 (\text{accr.int.}) - 300(\text{A-remaining LV}) = -250(\text{B})$ $B < 0$, then provision $P\text{-i} = 0$
3. $P\text{- commitment eligibility} = 20 (\text{com.fees}) - 250(\text{B}) = -230(\text{C})$ $C < 0$, then provision $P\text{-c} = 0$
4. $P\text{- off balance eligibility} = 200 - 230(\text{C}) = -30(\text{D})$ $D < 0$, then provision $P\text{-off} = 0$.

Example 02

Exposure

500-on balance

200-off balance

50-accr.int

20com.fees and LV- 300

1. P- on balance eligibility = $500(\text{On balance}) - 300(\text{LV}) = 200(\text{A})$ $\text{A} > 0$, then provision P-on = $200(\text{A}) * 0.236$ (Provision rate) = 47.2
2. P-interest eligibility = 50 (accr.int.) $- 0$ (remaining LV) = $50(\text{B})$ $\text{B} > 0$, then provision P-i = $50(\text{B}) * 0.236$ (Provision rate) = 11.8
3. P- commitment eligibility = 20 (com.fees) $- 0$ (remaining LV) = $20(\text{C})$ $\text{C} > 0$, then provision P-c = $20(\text{C}) * 0.236$ (Provision rate) = 4.72
4. P- off balance eligibility = $300 - 0$ (remaining LV) = $300(\text{D})$ $\text{D} > 0$, then provision P-off = $300(\text{D}) * 0.236$ (Provision rate) = 70.8.

Total provision = 47.2+11.8+4.72+70.8 = 134.52

Note: LV = Liquidation Value

LV = Discounted Value of Collateral + Discounted value of Cash flow of credit .

1.26. ACM07 - Provisioning Parameters at Bank level for Loans and Overdrafts

Using this option you can define the bank level parameters for the provisioning groups and components of the provisioning base. The components of provisioning bases can be subsequently modified. The provisioning will consider the new components of provisioning bases from the date of modification.

In case any new component is added, the provisioning for the new component will happen from the date of modification and in case an existing component is excluded from the provisioning base, the provision for that component will get nullified by the system.

Definition Prerequisites

Receive Stocks

Field Description

Field Name	Description
Purchase Order No.	[Mandatory, Pick List] Select the purchase order number, which is used to track the purchase order status, from the pick list. On receipt of the stock from supplier this purchase order number is used to indicate receipt.
Received From	[Mandatory, Pick List] Select the supplier from whom the stock is received from the pick list.
Inventory Branch	[Mandatory, Drop-Down] Select the inventory branch that has placed the request for the stock from the drop-down list.
Date of Receipt	[Mandatory, Pick List, dd/mm/yyyy] Select the date of receipt from the pick list. The receipt date cannot be greater than the current date.

Column Name	Description
Srl No.	[Display] This column displays the system generated serial number for each stock item in the list.
Request id	[Display] This column displays the request ID for each stock item in the list.
Stock catalog Code	[Display] This column displays the stock catalogue code of the stock or the inventory item for which the request order is placed.
Denm.	[Display] This column displays the denomination value of the requested stock.
Qty req.	[Display] This column displays the quantity of stocks. In case of partial receipt for the stock request, the user can modify the original values to reflect the received stock values. The quantity can be reduced from the original requested but cannot be increased. For example, 50 units of banker's cheque. It can be 50 leaves or booklets of banker's cheque.
Series #	[Conditional, Numeric, 10] Type the series number that has been defined for the particular stock code..
Start #	[Conditional, Numeric, 10] Type the start number. The stock item is ordered from this value onwards.
End #	[Display] This column displays the end number of the series. The end number is calculated and generated by the system depending on the quantity and the start number specified. For example, If Quantity = 100 and Start No = 50 Then End No = 149

Column Name	Description
Total	<p>[Display]</p> <p>This column displays the total, based on the denomination and quantity specified.</p> <p><i>Total = Denomination + Quantity</i></p> <p>For example, If Denomination = 100 and Quantity = 20 Then Total = 2000</p> <p>Only stock or inventory items tracked denomination wise will have an Adjustment Total value.</p>
Confirm (y/n)	<p>[Toggle]</p> <p>Click the toggle status to change the value to Y to confirm the physical receipt of either full or partial stock.</p> <p>By default, the system displays the value as N.</p> <p>If the stock is received in partial, the user will need to modify the quantity field, to reflect the quantity actually received.</p> <p>The stock level will not be updated at inventory till the confirmation flag is set to Y.</p>
Delete(y/n)	<p>[Toggle]</p> <p>Click the toggle status to change the value to Y if you want to delete the particular stock item from the list.</p> <p>By default, the system displays the value as N.</p>

Issue Stocks

Field Description

Field Name	Description
Request No.	[Mandatory, Pick List] Select the request number, for which purchase order is placed, from the pick list. The pick list displays only those request numbers against which full orders or partial orders are placed.
Issued To	[Mandatory, Drop-Down] Select the appropriate bank or branch, for which the inventory bank had placed the request for stock, from the drop-down list.
Date of Issue	[Mandatory, Pick List, dd/mm/yyyy] Select the date of issue from the pick list.
Column Name	Description
Srl No.	[Display] This column displays the system generated serial number for each stock item in the list.

Column Name	Description
Request id	[Display] This column displays the request ID for each stock item in the list.
Stock catalog Code	[Display] This column displays the stock catalogue code of the stock or the inventory item for which the request order is placed.
Denm.	[Display] This column displays the denomination value of the requested stock.
Qty req.	[Display] This column displays the quantity of stocks. In case of partial receipt for the stock request, the user can modify the original values to reflect the received stock values. The quantity can be reduced from the original requested but cannot be increased. For example, 50 units of banker's cheque. It can be 50 leaves or booklets of banker's cheque.
Series #	[Display] This column displays the series number that has been defined for the particular stock code received.
Start #	[Display, Numeric, Seven] Type the start number, from which a stock item is received.
End #	[Display] This column displays the end number of the series. The end number is calculated and generated by the system depending on the quantity and the start number specified. For example, If Quantity = 100 and Start No = 50 Then End No = 149
Total	[Display] This column displays the total, based on the denomination and quantity specified. <i>Total = Denomination * Quantity</i> For example, If Denomination = 100 and Quantity = 20 Then Total = 2000 Only stock or inventory items tracked denomination wise will have an Adjustment Total value.

Column Name	Description
Confirm(y/n)	<p>[Toggle]</p> <p>Click the toggle status to change the value to Y to confirm the physical issue of stock either in full or partial.</p> <p>By default, the system displays the value as N.</p> <p>If the stock is issued in partial, the user will need to modify the quantity field, to reflect the quantity actually issued.</p> <p>The stock level will not be updated at the issue bank/branch till the confirmation flag is set to Y.</p>
Delete(y/n)	<p>[Toggle]</p> <p>Click the toggle status to change the value to Y if you want to delete the particular stock item from the list.</p> <p>By default, the system displays the value as N.</p>

6. Enter the required information in the various fields.
7. Click the **Ok** button.
8. The system displays the message "Record Added...Authorization Pending...Click Ok to Continue". Click the **Ok** button.
9. The stock transaction details are added once the record is authorised.

Note: Click **Add** button to add request stocks.

1.28. IV002 - Stock Adjustment

Using this option you can adjust/amend the stock status to reflect the correct position of instruments that have been cancelled, returned, torn, lost in transit, etc.

Other than the issue and use of stock status for everyday transactions, the teller or vault teller can maintain other statuses such as Rejected, Torn, Cancelled, Lost/Misplaced, etc. to indicate the position of stocks in hand. e.g. The Central Inventory department required USD traveler's cheque of denomination 100. However the supplier issued INR traveler's cheque of denomination 100 that were marked as received. These traveler's cheque can be marked as rejected.

Definition Prerequisites

- IV001 - Stock Transactions

Modes Available

Not Applicable

To adjust the balance stock

1. Type the fast path **IV002** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Inventory > Stock Adjustment**.
2. The system displays the **Stock Adjustment** screen.

Stock Adjustment

The screenshot shows the 'Stock Adjustment*' window with the following fields:

Stock Code:	<input type="text"/>	Denomination:	<input type="text"/>
Type of Adjustment:	<input type="text"/>	Adjustment Date:	31/01/2008
From Branch:	<input type="text"/>	From User:	<input type="text"/>
To Branch:	<input type="text"/>	To User:	<input type="text"/>
Adjustment Quantity:	<input type="text"/>		
Series Number:	<input type="text"/>		
Start Number:	<input type="text"/>	End Number:	<input type="text"/>
Adjustment Total Value:	<input type="text"/>		
Reason For Adjustment:	<input type="text"/>		

At the bottom of the window, there is a navigation bar with the following buttons: LDF, OK, Close, Clear.

Field Description

Field Name	Description
Stock Code	<p>[Mandatory, Drop-Down]</p> <p>Select the stock code, for the stock, or the inventory item you want to make adjustment to, from the drop-down list.</p>
Denomination	<p>[Conditional, Pick List]</p> <p>Select the denomination code, for the stock code being transferred, from the pick list.</p> <p>The denomination needs to be selected for inventory items such as traveler's check, etc. which are tracked.</p>
Type of Adjustment	<p>[Mandatory, Drop-Down]</p> <p>Select the type of adjustment from the drop-down list.</p> <p>It is the status the user wants to amend the inventory item to.</p> <p>The options are:</p> <ul style="list-style-type: none">• Cancelled: A teller can mark a reversed banker's cheque issue transaction as Cancelled. Since the instrument has already been marked as Used, the system does not update the status of the instrument.• Duplicate: If a customer reported a TD certificate as lost and has a duplicate issued, the teller can mark it as duplicate. Since the original certificate has already been marked as Used, the system does not update the status of the instrument.• Found: If a branch is able to locate the lost inventory item, it is marked as Found.• Lost: During the receipt, if an inventory item is found lost, it is marked as Lost.• Returned: When an inventory item is returned on an account that it is above the excess level, it is marked as Returned. For example, excess inventory at branch level for stock code A is 100 units. Branch Z holds 102 units. Branch Z will mark 2 units of stock A as Returned.• Torn: If a check book is found to be torn after receipt, the teller can mark it as Torn.• Used: If the instrument serial number is wrongly entered during an offline transaction, then the actual instrument number used can be updated with the used status.• Rejected: If a stock item is not issued as per the request order it can be rejected. For example, if the central inventory department requested USD TC of denomination 100, and the supplier issued INR TC of denomination 100 that were marked as received, then these TCs can be marked as rejected.

Field Name	Description
Adjustment Date	[Mandatory, Pick List, dd/mm/yyyy] Select the appropriate date of adjustment from the pick list. By default, this field displays the current posting date as date of adjustment.
From Branch	[Display] This field displays the inventory branch.
From User	[Display] This field displays the user who is performing the adjustment transaction.
To Branch	[Optional, Drop-Down] Select the appropriate to branch from the drop-down list.
To User	[Mandatory, Pick List] Select the user for whom the adjustment transaction is performed from the pick list.
Adjustment Quantity	[Mandatory, Numeric, 10] Type the inventory quantity to be adjusted.
Series Number	[Mandatory, Numeric, 12] Type the series number of the stock to be adjusted.
Start Number	[Mandatory, Numeric, 10] Type the start number in the stock series. The stock has to be transferred from this number onwards.
End Number	[Display] This field displays the end number of the series. The end number is calculated and generated by the system, depending on the quantity and the start number specified. For example, If Quantity = 100 and Start No = 50 Then End No = 149

Field Name	Description
Adjustment Total Value	<p>[Display]</p> <p>This field displays the adjustment total value, based on the denomination and quantity specified.</p> <p>Adjustment Total Value = Denomination * Quantity</p> <p>For example,</p> <p>If Denomination = 100 and Quantity = 20</p> <p>Then Adjustment Total value = 2000</p> <p>Only stock or inventory items tracked denomination wise will have adjustment total value.</p>
Reason For Adjustment	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the reason for adjusting the stock or the inventory item.</p>

3. Select the stock code from the drop-down list.
4. Enter the required information in the various fields.

1.30. IV011 - Stock Inquiries

Using this option you can perform several inquiries to assist in tracking inventory items or stock. Inquiries can be performed at the following levels:

- Central Inventory Department: Branch details related to the central inventory department and the branch can be viewed
- Branch Level: Only branch level details can be viewed
- Teller Level: Only teller level details can be viewed

Three types of Inquiries that aid in inventory tracking are:

- Indent Requests Status
- Balance on hand
- Stock Transactions

Definition Prerequisites

- IV001 - Stock Transactions

Modes Available

Not Applicable

To inquire on stock

1. Type the fast path **IV011** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Inquiries > Stock Inquiries**.
2. The system displays the **Stock Inquiries** screen.

Stock Inquiries

5. Service Charges

1.31. Service Charge Details Screen

The Service Charges Details is a common screen, which is linked to all the transactions and events maintenance's, for which a bank may levy charges. This screen enables a user to view the details of the charges levied for the particular transaction or an event. Examples of such transactions would be purchasing a TC, selling a banker's cheque or DD, etc. This option allows the user to only change the SC Amount. The user may increase or decrease or even waive it, as required. This screen attached to transactions and events maintenance's, can be navigated to by clicking the 'Service Charges Details' button, provided at the bottom-right corner of all charged transactions and events maintenances.

For more information refer to Service Charge Details in **Common Screens** option in **Oracle FLEXCUBE Introduction User Manual**.

1.32. SCM03 - SC Package Changes at Account

A SC package can be attached at a customer level or at the product level. The SC package linked either at the customer level or product level is defaulted at the CASA level. Hence for an account, the SC package depends on the SC package linked either at the customer level or product level.

If there is a SC package attached at customer level the same is defaulted to the account when it's opened. If not, the SC package linked at the product level is attached to the account.

Using this option you can modify or customise an SC package for a CASA. The following changes can be made to the SC package attached to the account:

- Waiver of specific/all Service Charges for an account
- Changes to SC capitalisation parameters
- Modification of SC priority that will be effective in case NSF situation is encounter when charging periodic charges.

Definition Prerequisites

- SCM01 - SC Package Definition

Modes Available

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To modify service charge package for an account

1. Type the fast path **SCM03** and click **Go** or navigate through the menus to **Transaction Processing>Account Transactions>CASA Account Transactions>Other Transactions>SC Package Changes at Account**.
2. The system displays the **SC Package Changes at Account** screen.

SC Package Changes at Account

Field Description

Field Name	Description
Account Details	
Account No	[Mandatory, Numeric, 14] Type the account number of the customer for which you want to perform the SC package changes inquiry.
Name	[Display] This field displays the short name of the primary customer linked to the account.
Customer ID	[Display] This field displays the ID of the selected customer. Customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Field Name	Description
Status	[Display] This field displays the account status.
Currency	[Display] This field displays the currency in which the account is maintained.
Product	[Display] This field displays the name of the product under which the CASA is opened.
Branch	[Display] This field displays the home branch to which the customer belongs.
Package Details	
Service Charge Package	[Display] This field displays the name of the service charge package that is attached to the account.
Account Level SC Waiver Flag	[Optional, Check Box] Select the Account Level SC Waiver Flag check box to waive SC on the SC package attached to the account. The check box is selected if SC waiver is applicable to the account. If this check box is selected, all service charges in the package will be waived for the account.

Column Name	Description
Srl.No.	[Display] This column displays the running serial number.
Code	[Display] This column displays the service charge code.
Ccy	[Display] This column displays the currency code in which the service charge is levied.
Description	[Display] This column displays the service charge name as the description for the service charge code.

Column Name	Description
Linkage Type	<p>[Display]</p> <p>This column displays the type of trigger, on which the SC is to be charged.</p> <ul style="list-style-type: none"> • Periodic: SC applied in a frequency • Others: SC applied adhoc without a frequency
Linkage Code	<p>[Display]</p> <p>This column displays the linkage code.</p> <p>Depending on the linkage type, this code is an exact trigger for charging SC. For e.g. for linkage type transaction, Cash Deposit, cash withdrawal type of transactions will be displayed.</p>
Priority	<p>[Mandatory, Numeric, Five]</p> <p>Type the priority of the service charge in the package.</p> <p>This is the order in which the service charges shall be applied. SC will applied in the ascending order of priority at the time of application</p>
Cap Type	<p>[Mandatory, Drop-Down]</p> <p>Select the SC capitalisation type from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Calendar: SC application date will be calendar based depending on capitalisation frequency irrespective of anniversary day / anniversary month. • Anniversary: SC application date depends on capitalisation frequency and anniversary day / anniversary month.
Cap Freq.	<p>[Mandatory, Drop-Down]</p> <p>Select the SC capitalisation frequency from the drop-down list.</p> <p>It is the time interval at which, the bank will levy the service charges.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Daily • Monthly • Bi-Monthly • Quarterly • Half -Yearly • Yearly

Column Name	Description
Anniv. Day	<p>[Conditional, Numeric, Two]</p> <p>Type the anniversary day of SC.</p> <p>The number of days will be zero if the Calendar option is selected in the Cap Type field.</p>
Anniv. Month	<p>[Conditional, Numeric, Two]</p> <p>Type the anniversary month of SC.</p> <p>The number of months will be zero if the Calendar option is selected in the Cap Type field.</p>
Waiver Flag	<p>[Toggle]</p> <p>If the SC is waived for the account, then this field displays the value Y. By default, displays the value N.</p> <p>To waive a single service charge from the package, click the toggle status to change the value to Y.</p>
Waive Uncharged	<p>[Toggle]</p> <p>By default the value is N. If Waiver Flag has been changed to Y then:</p> <ul style="list-style-type: none"> • N: Denotes that uncollected SC should be charged on the account. • Y: Denotes that uncollected SC should be waived on the account. <p>As package change activity, if a service charge is waived in the middle of the capitalisation period, Waiver Uncharged flag determines the treatment of uncollected service charge.</p>

3. Click the **Modify** button.
4. Enter the account number and press the **<Tab>** or **<Enter>** key.

This tab is for future use.

7. Click the **Ok** button.
8. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **Ok** button.
9. The schedule gets setup once the record is authorised.

1.34. BAM54 - External File Setup

Files generated by external systems, consist of various types of transactions that needs to be uploaded and processed within **FLEXCUBE**.

Using this option you can setup the upload parameters for the combination of external system code and file type, associated GL's and the scheduling.

When the future date arrives, the system will automatically process the file uploaded and subsequently the debit/credit will be taken place.

Automatic upload takes place if the scheduling for this activity is setup. If deferred authorization is maintained for the upload type in the screen, then the file can be inquired by selecting the file status as "Unauthorized" from status drop-down field. And the record status will be updated as "Not processed". If the file is not authorized on the same day, **FLEXCUBE** will purge the file as a part of the EOD process.

Definition Prerequisites

Not Applicable

Modes Available

Modify, Cancel, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To view the file upload setup

1. Type the fast path **BAM54** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Handoff > External File Setup**.
2. The system displays the **External File Setup** screen.

7. The external file set up is done once the record is authorised.

1.35. BA450 - LoopUp Code File Type Cross Reference

This option is used for setting up lookup values - system code, lookup value.

The name value pair list will act as an aide in file type selection. In **File Upload (GEFU ++)** option (Fast Path: BA452), after entering the system code, a new field "Company Code" will be added. This will show the list of companies maintained in the list. On selecting the company code, the file type will get defaulted. File type changes in **File Upload (GEFU ++)** option to accept lookup value and resolve file type on the basis of file type, lookup value combination.

Definition Prerequisites

Not Applicable

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To set the file type cross reference

1. Type the fast path **BA450** and click **Go** or navigate through the menus to **Global Definitions > Customer > LoopUp Code File Type Cross Reference**.
2. The system displays the **LoopUp Code File Type Cross Reference** screen.

LoopUp Code File Type Cross Reference

The screenshot shows a web application window titled "LoopUp Code - File type Cross Reference*". At the top left, there are three input fields labeled "System Code:", "File Type:", and "Lookup Value:". Below these fields is a large empty area for displaying data. At the bottom of the window, there is a "Record Details" section with a table header containing "Input By", "Authorized By", "Last Mnt. Date", "Last Mnt. Action", and "Authorized". Below the table header is a row of radio buttons for actions: "Add By Copy", "Add", "Modify", "Delete", "Cancel", "Amend", "Authorize", and "Inquiry" (which is selected). To the right of the radio buttons are four buttons: "UDF", "Ok", "Close", and "Clear".

Field Description

Field Name	Description
System Code	[Mandatory, Pick List] Select the system code from the pick list. The user can select one of the system codes from all the file upload codes available in system.
File Type	[Mandatory, Pick List] Select the file type from the pick list. The relevant file types under the system code will be available for selection; the user can select the file type.
Lookup Value	[Mandatory, Alphanumeric, 120] Type the lookup value. This field is free text field without any validations.

3. Click the **Add** button.
4. Enter the system code and press the **<Tab>** or **<Enter>** key or select it from the pick list.
5. Enter the input file type and press the **<Tab>** or **<Enter>** key or select it from the pick list.
6. Type the lookup value.

1.36. BA452 - File Upload (GEFU ++)

Using this option you can facilitate bulk miscellaneous transactions. Including account/customer with high severity memo i.e., you can use this option for bulk transactions, bulk CASA account opening, bulk CASA account closure etc.

The features of the **GEFU**⁷ ++ functionality where if the multiple value dates (specially future dated) records are clubbed in one file, the system will process all records during the upload and if for the upload date, any future dated transactions are envisaged, the same are treated as non processed and will not be picked up by the system in future. However the back value dated transactions are processed on any processing date. Hence the bank has to create different files for different value dates and then input the file processing date also as the future date in this option. Then accordingly the file will be processed on the specific future value date. FLEXCUBE will block uploads depending upon the setup combination for External System Code , File Type, Department Code and Template Code.

System allows for maintenance of Aadhaar number and Aadhaar linked account via upload. This file will have to be manually uploaded . Authorization is required to upload this file.

This file will have to be manually uploaded using External System Code 'CUSTOMER' and File Type label as 'AADHAAR' and File Type name should be 'AADHAAR_ACCOUNT_LINKAGE'. Authorization is required to upload this file.

The new checksum logic for **OCA** files is as below:

- Record checksum will be:- Ref_sys_no+Sum of digits of account in an incremental pattern where every next instance is considered as complete number + Amount to be considered in full without decimal + Cheque Date
- Footer Checksum will be: - Sum of (Part 1-last 7 digits of all record level checksum of all records) + Sum of (Part 2-remaining 13 digits of record level checksum of all records).

The new checksum logic for **OCC** files is as below:

- The record checksum will be:- Sum of digits of account in an incremental pattern where every next instance is considered as complete number + amount to be considered in full without decimal + ref sys no + transaction date (YYYYMMDD) + transaction currency
- Footer Checksum will be: - Sum of (Part 1-last 7 digits of all record level checksum of all records) + Sum of (Part 2-remaining 13 digits of record level checksum of all records).

Output File	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the name of the outward remittance file maintained in the RJS in folder on the application server.</p>

Field Name	Description
Post Process	[Optional, Check Box] Select the Post Process check box to convert the file in the acceptable format.

- Enter the agent code and press the **<Tab>** or **<Enter>** key or select it from the pick list.
- Enter the required information in the various fields.

Outward Remittance Handoff

The screenshot shows a window titled "Outward Remittance Handoff". Inside the window, there is a form with the following fields:

- Agent Code : 012 (with a browse button)
- Currency Code : INR (dropdown menu)
- Output File : (empty text box)
- Post Process :

At the bottom right of the window, there are three buttons: "Ok", "Close", and "Clear".

- Click the **Ok** button.
- The system displays the message "Authorization Required. Do You Want to continue?". Click the **Ok** button.
- The system displays the **Authorization Reason** screen.
- Enter the required information and click the **Ok** button.

1.39. CHM43 - Cheque Book Issue Upload

Using this option you can upload cheque book issue file to facilitate bulk cheque book issue activity. This cheque book issue file must be maintained in pre-defined format and this file must exist on the application server in the RJSin folder. When the file name is provided the system locates and picks up file.

The status of the uploaded file, whether processed or not, can be viewed in the **External File Processing - Upload File Status Inquiry** (Fast Path: BAM94) option.

Definition Prerequisites

Not Applicable

Modes Available

Not Applicable

To upload cheque book issued

1. Type the fast path **CHM43** and click **Go** or navigate through the menus to **Transaction Processing >Internal Transactions>Handoff >Cheque Book Issue Upload**.
2. The system displays the **Cheque Book Issue Upload** screen.

Cheque Book Issue Upload

The screenshot shows a web-based application window titled "Cheque Book Issue Upload". The window has a yellow border and standard window control buttons (minimize, maximize, close) in the top right corner. Inside the window, there are two input fields: "File Name" and "Batch Number". The "File Name" field is a text box, and the "Batch Number" field is a smaller text box. At the bottom right of the window, there are three buttons: "Ok", "Close", and "Clear".

Field Description

Field Name	Description
File Name	[Mandatory, Alphanumeric, 20] Type the name of the cheque book issue file maintained in the RJSin folder on the application server.
Batch Number	[Display] This field displays the system generated batch number.

3. Enter the file name and press the **<Tab>** or **<Enter>** key.

Cheque Book Issue Upload

The screenshot shows a dialog box titled "Cheque Book Issue Upload". It has a yellow title bar and standard window controls (minimize, maximize, close). The main area contains two input fields: "File Name" with the text "Cheque Book 1" and "Batch Number" with the text "1". At the bottom right, there are three buttons: "Ok", "Close", and "Clear".

4. Click the **Ok** button.
5. The system displays the message "Authorization Required. Do You Want to continue?". Click the **Ok** button.
6. The system displays the **Authorization Reason** screen.
7. Enter the required information and click the **Ok** button.
8. The system displays the message "File Uploaded Successfully". Click the **Ok** button.

1.40. 7239 - Upload Local File

Using the **Upload Local File** option you can download the extracted files to the **RJSOUT** folder. This option can also be used to upload the file from the local machine.

Definition Prerequisites

- BA453 - Parameterized Output Generator: For file download
- Copy the File from **RJSOUT** to the local system for file upload

Modes Available

Not Available

To upload a local file

1. Type the fast path **7239** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Others > Upload Local File**.
2. The system displays the **Upload Local File** screen.

Upload Local File

The screenshot shows a window titled "Upload Local File" with a yellow header bar. The window contains the following fields and controls:

- File Description:** An empty text input field.
- Task:** A dropdown menu currently set to "Download".
- Select Area:** Two radio buttons, "Default" (selected) and "Branch Folder".
- Select File:** A button labeled "Attach".
- File Name:** An empty text input field.
- FileID:** An empty text input field.
- Narrative:** A text area containing the text "File Upload/Download".
- Buttons:** "View", "OK", and "Cancel" buttons are located at the bottom right of the window.

Field Description

Field Name	Description
------------	-------------

Field Name	Description
File Description	[Mandatory, Alphanumeric] Type the description of the file that the user wants to upload or download.
Task	[Mandatory, Drop-Down] Select the task from the drop-down list. It allows the user to upload/download the file. The options are: <ul style="list-style-type: none"> • Upload • Download • View
Select File	[Conditional, Command Button] Select the file which has to be uploaded using the Browse button. This field is enabled only if Upload option is selected in the Task field.
File Name	[Mandatory, Alphanumeric] Type the name of the file which has to be downloaded/uploaded. This field is editable only if the user wants to download a file.
File ID	[Display] This field displays the unique identification number of the file corresponding to the file name.
Narrative	[Display] This field displays the narration, based on the transaction.
Select Area	[Optional] Select the area. Options are: <ul style="list-style-type: none"> • Default • Branch Folder

3. Type the file description and press the **<Tab>** or **<Enter>** key.
4. Select the appropriate task from the **Task** drop-down list.
5. Select the area and type the file name.
