1. Loan Account Opening - Maintenance

1.1. 1078 - Loan Contribution Payin

Banks can ask a customer to deposit upfront fees, legal charges, margin money or other charges etc., which are not appropriated immediately. These contributions are made before disbursement of loan. Till the time such deposits made by customer are appropriated, customer gets interest benefit on the amount contributed. Using this option, you can make contributions which are required to be paid before loan disbursement.

Definition Prerequisites

- LN057 - Loan Direct Account Opening
- 8051 - CASA Account Opening

Modes Available

Not Applicable

To credit contribution amount into the loan account

1. Type the fast path **1078** and click **Go** or navigate through the menus to Transaction Processing > Account Transactions > Loan Account Transactions > Transfer > Loan Contribution Payin Inquiry.
2. The system displays the **Loan Contribution Payin Inquiry** screen.

1.4. LN031 - Drawdown Instructions Priority Maintenance

If account payment instruction is set for a loan account, you can inquire and modify the priority sequence for the provider CASA, if required. The CASA accounts as added in the account payment instruction screen along with the priority number as decided by the system in the order in which they were attached will be displayed. The teller can modify the priority number for the CASA accounts, as required.

In the event of a single CASA Account being attached as a provider account, the priority field will be disabled and will not be available for input.

Priority number will be distinct for each provider CASA account. Same priority number for two provider CASA's is not supported. Modification for priority number will be immediate and online, after the record is authorized.

Only instructions for which priority is equal to or greater than one (Instructions where arrear type is 'ALL') will be displayed in this screen.

Definition Prerequisites

- LNM31 - Account Payment Instructions

Modes Available

Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To modify the priority sequence for the provider CASA

1. Type the fast path **LN031** and click **Go** or navigate through the menus to Transaction Processing > Account Transactions > Other Transactions > Payment Instructions Priority Maintenance.
2. The system displays the **Payment Instructions Priority Maintenance** screen.

1.5. LN046 - Post Dated Cheques Maintenance

Using this option, customers can repay their loan installments through post dated cheques. All cheques are designated in the same currency, and therefore, a series of cheques can be accepted and maintained. Postdated cheques are presented to the clearing house on the respective cheque dates and subsequently treated like normal cheques.

This is used in case of EMI (Equated Monthly Installment) type of loans where the loan installment amounts (Principal+Interest) are the same. This maintenance can only be done for Term loans and for those term loan accounts where disbursement has been done.

Definition Prerequisites

- STM59 - Settlement Bank Parameters
- BAM20 - Bank Codes Maintenance
- STM54 - Routing Branch Maintenance
- STM64 - Clearing Type Maintenance
- LN057 - Loan Direct Account Opening

Modes Available

Add, Delete, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add postdated cheque for installment payment

1. Type the fast path **LN046** and click **Go** or navigate through the menus to Transaction Processing > Account Transactions > Loan Account Transactions > Clearing > Post Dated Cheques Maintenance.
2. The system displays the **Post Dated Cheques Maintenance** screen.

Post Dated Cheques Maintenance

Field Description

Field Name	Description
Routing Number	<p>[Optional, Numeric, Nine]</p> <p>Type the appropriate routing number of the cheque.</p> <p>The routing number is a combination of the bank code, the branch code and the sector code from where the instrument was drawn.</p> <p>The combination can be obtained from the Routing Branch Maintenance (Fast Path: STM54) option.</p> <p><i>Routing Number = Sector Code / Bank Code + Branch Code</i></p> <p>For a deposited cheque, this routing number is used by the system to determine the float days and thus the value date of the instrument.</p> <p>The order, in which the codes in the routing number are to be entered, is determined by the set up using the Settlement Bank Parameters screen.</p>

Field Name	Description
Drawer Acct. No.	<p>[Mandatory, Numeric, 16]</p> <p>Type the appropriate account number, on which the cheque is drawn.</p> <p>The drawer account number is the account number of the person who has issued the cheque. The drawer account, generally printed on the cheque leaf, is the account from where the funds will come into the beneficiary account. If the cheque is drawn on a different bank, the drawer account number will not be validated by the system. If the cheque is drawn on your own bank, the system will validate the drawer account number for its correctness.</p>
Clearing Type	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate clearing type from the drop-down list.</p> <p>The bank can set up multiple clearing types, where cheques that are required to be cleared at different times of the day are deposited so that they can be treated differently. All processes for a cheque from outward clearing, running of value date, and marking late clearing, etc. takes place on the basis of the clearing type. Refer to Clearing Type Maintenance (Fast Path: STM64) option in <i>Clearing User's Guide</i>.</p>
Drawee Bank	<p>[Display]</p> <p>This field displays the drawee bank name and the branch name based on the routing number.</p>

Column Name	Description
From/To	<p>[Mandatory, Numeric, 12]</p> <p>Type the Start and End series of the Post dated EMI cheques.</p>
No. Of cheques	<p>[Mandatory, Numeric, 12]</p> <p>Double-click the column and type the appropriate total number of cheques in the range.</p>
Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Double click the column and select the appropriate date of the cheques from the pick list. In case there are multiple cheques being deposited that have sequential serial numbers, the date of the first cheque in the series would be entered in the date field. The remaining cheque dates would be anniversary dates based on the frequency set up.</p> <p>For example, the cheque range could be from 111 to 180. If the date on the first cheque-111 is October 12, 2003 and the frequency is set to Monthly, the next cheque would be picked up for processing on November 12, 2003.</p>

Column Name	Description
Frequency	<p>[Mandatory, Drop-Down]</p> <p>Double click the column and select the appropriate frequency from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none">• One Time• Monthly• Bi-Monthly• Quarterly• Half Yearly• Annual <p>It is the frequency at which the cheques are to be sent for collection. There is no validation for setting a specific frequency. This will pick up the cheque automatically for clearing on the date and at the frequency specified.</p>
Cheque Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Double click the column and type the appropriate cheque amount.</p> <p>There is no validation for the cheque amount. The cheque can be more or less than the installment amount due on that specific account.</p>

7. Click the **ViewDetails** button to view the **Details** tab.

To Date	[Mandatory, Pick List, dd/mm/yyyy] Select the end date from the pick list.
Number Of Cheques Received	[Display] This field displays the total number of cheques received between the specified dates.
Total Amount	[Display] This field displays the the total amount received during the specified date.

Column Name	Description
-------------	-------------

Column Name	Description
Cheque Nos.	[Display] This column displays the cheque number of the post dated cheques.
Bank	[Display] This column displays the name of the bank from where the cheques are received.
Cheque Date	[Display] This column displays the cheque date, which is present on the instrument.
Value Date	[Display] This column displays the value date of the cheque.
Amount	[Display] This column displays the amount present on the cheque.
Routing	[Display] This column displays the routing number against which the cheque has been drawn. The routing number is the combination of the bank code and the branch code. The combination can be obtained from the Routing Branch Maintenance option. <i>Routing Number = Sector Code / Bank Code + Branch Code</i> For a deposited cheque, this routing number is used by the system to determine the float days and thus the value date of the instrument. For an inward clearing cheque, this routing number should belong to the bank. The order, in which the codes in the routing number are to be entered, is determined by the set up using the Settlement Bank Parameters option.
Delete	[Conditional, Drop-Down] Select the appropriate option from the drop-down list. The options are: <ul style="list-style-type: none"> • Y: It allows to delete a record • N: It does not allow to delete a record This column is enabled if Delete mode is selected.

4. Enter the from and to date or select it from the pick list and press the <Tab> button.
5. The system displays the post dated cheque details in **Inquire** tab.

1.6. LN056 - Split Loan Account Opening

Using this option you can open individual split loan accounts. A split loan provides a customized credit solution to a customer. Using this facility a customer can utilize the sanctioned loan amount in a flexible manner. After getting the sanction, customer enters into an agreement with the bank for the sanctioned amount. The customer can open one loan account for part of sanctioned amount or for the full amount. Customer can also decide to open two or more loan accounts at the inception (i.e. before loan account opening) or during servicing of loan (i.e. after the loan account is disbursed), under the same agreement number. Such division of loan accounts under one agreement number is referred as Split Loans.

Every Loan account is opened with an agreement number. All loan accounts with the same agreement number are linked together, however all the processing is done separately for each account.

While creating Split loans under the common agreement number, there are 2 alternatives:

- All the parts of a split loan are new loans accounts
- There is an existing loan account, which is divided into multiple loan accounts

Definition Prerequisites

- LN057 - Loan Direct Account Opening

Modes Available

Not Applicable

To open a split loan account

1. Type the fast path **LN056** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Split Loan Account Opening**.
2. The system displays the **Split Loan Account Opening** screen.

Customer Information

Account Number

[Mandatory, Numeric,16, Pick List]

Type the loan account number which is to be split.

If the agreement number is entered in the adjacent field, then select the loan account number from the pick list.

Field Name	Description
Agreement Number	[Conditional, Alphanumeric, 16] Type the agreement number. This field displays the agreement number linked to the account, if the loan account number is entered in the corresponding field.
Loan Maturity Date	[Display] This field displays the maturity date of the original loan account.
Outstanding Principal Amount	[Display] This field displays the outstanding principal amount on the original loan account.
Split Loan Account Details	
Account Open Date	[Mandatory, Pick List, dd/mm/yyyy] Type the date on which the customer account is opened or select from the pick list. By default, the system displays the current processing date. The date should be greater than or equal to the process date.
Branch Code	[Mandatory, Pick List] Select the branch code from the pick list. The branch name is displayed in the adjacent field.
Product Code	[Mandatory, Pick List] Select the product code under which the account is to be opened from the pick list. The product name is displayed in the adjacent field. The new split loan product should be of the same currency as the existing loan account.
Currency	[Display] This field displays the currency under which the account is opened.
Loan Amount	[Mandatory, Numeric,13, Two] Type the split loan amount. It should be greater than or equal to the minimum loan amount defined in the Product Master Maintenances (Fast Path: LNM11) option and less than or equal to outstanding amount.
Loan Term	[Display] This field displays the remaining loan term of the original loan account. The term of the loan is defined in months.

Field Name	Description
Schedule Code	<p>[Mandatory, Pick List]</p> <p>Select the repayment schedule code from the pick list.</p> <p>Only the schedules, which are attached to the product, are displayed in the pick list.</p> <p>The name of the schedule is displayed in the adjacent field.</p> <p>The schedules are attached to the product in the Schedule Type (Fast Path: LNM98) option.</p>
Fixed Rate Term	<p>[Mandatory, Numeric, Three]</p> <p>Type the fixed rate term in months for the split loan.</p>
Loan Purpose	<p>[Display]</p> <p>This field displays the purpose for which the loan is taken.</p>
Variable Rate Term	<p>[Display]</p> <p>This field displays the term of the loan where ROI is variable.</p> <p>By default it displays the value of Loan Term in months.</p> <p>If the fixed rate term is entered, then this field displays the value as</p> <p><i>[Loan Term - Fixed Rate Term] in months</i></p>
Account Number	<p>[Display]</p> <p>This field displays the split loan account number generated by the system.</p>
Repayment Frequency	<p>[Display]</p> <p>This field displays the repayment frequency of the original account to be applied to the new split loan account.</p>
Rate Lock	
Rate Lock	This field is for future use.
Rate Lock Date	This field is for future use.
Rate Lock Net Rate	This field is for future use.
Rate Lock Net Fees	This field is for future use.
Pricing Details	
Letter of Offer Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Type the date on which offer is made to customer or select it from the pick list.</p> <p>This date is applicable during the rate, margin and discount determination.</p> <p>The date should be less than or equal to the process date.</p>

Field Name	Description
Rate Chart Code	<p>[Mandatory, Pick List]</p> <p>Select the rate chart code to be applied for determination of rate of interest on the loan from the pick list.</p>
Fixed Term (in months)	<p>[Optional, Numeric, Three]</p> <p>Type the fixed term of the loan in months.</p> <p>If the loan is on fixed rate for the entire term, then the value in this field is equal to total term of the loan.</p> <p>If the loan is on fixed rate for initial term and then rolls over to a variable rate for the remaining term, then the initial fixed term is set in this field and it should be less than the total term of the loan. The base rate for fixed period is derived using the fixed term specified.</p>
Margin Code	<p>[Optional, Pick List]</p> <p>Select the margin code from the pick list.</p> <p>It is the margin which is levied over and above the base rate for initial rate on the loan.</p> <p>If a loan account is opened with a combination of rates eg. fixed rate rolling over to variable rate, then the margin code selected in this field will be applicable only for the initial fixed rate on the loan.</p> <p>If a loan account is opened with a single rate (fixed /variable) for the entire term of the loan, then the margin selected in this field will be applied for that rate for the entire loan period.</p>
LTV Ratio	<p>[Mandatory, Numeric, Three, Two]</p> <p>Type the loan to value ratio of the loan.</p> <p>The LTV ratio value should be less than or equal to 100.00.</p>
Rollover Margin Code	<p>[Optional, Pick List]</p> <p>Select the margin code from the pick list.</p> <p>It is the margin which is levied over and above the base rate for rollover rate on the loan.</p> <p>If a loan account is opened with a combination of rates eg. fixed rate rolling over to variable rate, then the margin code selected in this field will be applicable only for the rollover rate on the loan.</p> <p>This field is not applicable, if a loan is opened with a single rate (fixed /variable) for the entire term of the loan.</p>

Field Name	Description
Date Basis for Account Rate	<p>[Mandatory, Drop-Down]</p> <p>Select the date basis for account rate from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Account Opening Date : If this option is selected, the rate of interest effective on the account opening date for the fixed rate index code is applied. • First Disbursement Date : If this option is selected, the rate of interest effective on the first disbursement date for the fixed rate index code is applied. It is used for ROI loans. • Letter of Offer Date : If this option is selected, the rate of interest effective on the letter of offer date for the fixed rate index code is applied. <p>This field is applicable for loans with initial fixed rate or fixed rate for the life of the loan.</p>
Discount Code	<p>[Optional, Pick List]</p> <p>Select the discount code from the pick list.</p> <p>The discount is applied over and above the base rate.</p> <p>The discount is applicable for the initial rate or rollover rate or both, it is based on the parameters set in the Discount Rate Setup (Fast Path: PR005) option.</p>

3. Click the **Add** option.
4. Enter the loan account number.
OR
Enter the agreement number and select the account number from the pick list.
5. Enter the split loan account and pricing details.

1.7. LN057 - Loan Direct Account Opening

Using this option you can directly open a loan account without having to go through the APS work flow. Based on the details entered, an account number is generated. The necessary documents are maintained after the account is maintained, and collateral details are added using the Loan Collateral Link Maintenance (Fast Path: LNM34) option. Using this option, you can also accommodate the entrusted deposit CASA and the Remittance mode for Entrusted Loan.

The account attributes are defaulted at the account level from the various master maintenances. The Loan Account Master Attributes Maintenance (Fast Path: LNM35) option allows you to modify the details of a loan account.

Definition Prerequisites

- LNM98 - Schedule Type
- LNM11 - Product Master Maintenance
- BAM63 - Product Collateral Linkage
- BAM97 - Currency Codes Cross Reference
- BA435 - Branch-Product Cross Reference
- LNM34 - Loan Collateral Link Maintenance
- 8053 - Customer Addition
- ORS25 - Producer Setup
- PR002 - Rate Chart Maintenance
- PR004 - Margin Code Setup
- PR005 - Discount Rate setup
- PR010 - Subsidy Margin Codes Setup

Modes Available

Not Applicable

To open a loan account

1. Type the fast path **LN057** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Loan Direct Account Opening**.
2. The system displays the **Loan Direct Account Opening** screen.

Loan Direct Account Opening

Field Description

Field Name	Description
------------	-------------

Customer Information

- | | |
|------------------------|---|
| Search Criteria | [Mandatory, Drop-Down]
Select the search criteria to search for the customer from the drop-down list.
The options are: <ul style="list-style-type: none"> • Customer Short Name • Customer IC: Customer Identification criteria (IC) arrived at by the bank during customer addition. • Customer ID: Unique identification given by the bank |
|------------------------|---|

Field Name	Description
Search String	<p>[Mandatory, Alphanumeric, 20, Pick List]</p> <p>Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.</p> <p>If the Customer Id option is selected from the Search Criteria drop-down list , then the search string accepts 10 numeric characters.</p> <p>If the search criterion is specified as customers' short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria.</p> <p>Select the appropriate customer from the existing customer list.</p> <p>For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>
ID	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
IC	<p>[Display]</p> <p>This field displays the identification code of the customer.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate, or corporate registration can be used as a customer IC.</p>
Full Name	<p>[Display]</p> <p>This field displays the full name of the customer who holds the loan account..</p>
Short Name	<p>[Display]</p> <p>This field displays the short name of the customer.</p> <p>The short name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.</p> <p>The customer short name can be changed through the IC No – Short Name Change (Fast Path: 7101) option.</p>
Agreement Number	<p>[Mandatory, Alphanumeric, 16]</p> <p>Type the agreement number code for the loan account.</p>

Field Name	Description
Agreement Sign Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the agreement sign date from the pick list.</p> <p>The date should be less than or equal to the current process date.</p>
Account Open Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the date on which the customer account is opened from the pick list.</p>
Branch Code	<p>[Mandatory, Pick List]</p> <p>Select the branch code from the pick list.</p> <p>The account opening procedure can be either centralized or decentralized. In the centralized setup, one centralized processing centre will open accounts for all branches of a region. You have to select the name of the centralized processing branch if the bank follows the centralized setup for account opening.</p>
Customer Relation	<p>[Mandatory, Drop-Down]</p> <p>Select the relation of the customer linked to the account from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Sole Owner • Joint And First • Joint OR First <p>For successful account opening transaction, a customer with primary relationship, viz., Sole Owner, Joint And First, or Joint Or First must be linked. If primary relationship linked is Joint And First or Joint Or First, customer with secondary relationship, viz., Joint and other or Joint or other must be linked to the account.</p> <p>A maximum of three customers can be linked to an account in the account-opening screen. You can attach additional customers to the accounts from the Customer Account Relationship Maintenance (Fast Path: C1142) option.</p>
Product code	<p>[Mandatory, Pick List]</p> <p>Select the product code under which an account has to be opened from the pick list.</p> <p>The list displays the authorised loan products available for the selected branch.</p>

1.8. LN065 - Loan Product Promotional Interest Rates Maintenance

Using this option you can define a promotional rate plan ID and link it to a product code. You can define whether the promotional rates are to be applied to the existing and new accounts or applicable only to the new accounts and define a validity period.

The promotional rate can be set to zero. As part of plan ID, the reschedule parameters .i.e. recalculate term or recalculate installment has to be defined. On the start date and end date of promotional period all the loan accounts will be rescheduled with the changed interest rate as per the reschedule option defined in this option (only if the promotional rate is less than the loan account rate else the loan account will not be rescheduled).

If the rate defined at the loan product rates is less than the promotional rate, then the product rate will be applicable and not the promotional rate. Multiple plan ID's can be attached to the same product, such that the promotional validity period is not overlapping. In the case of zero per cent rate loans, the loan account schedule will only consist of the principal repayments for the promotional term.

Note: 0% interest rate for the complete loan duration.

The user can define 0 % interest rates at Interest Index level and attach the 0% interest index rate to **Loan Product Rates Maintenance** (Fast Path: LN060) option. The schedule will comprise of principal repayments over the tenure of the loan. The user will be able to define 0% flat rate loans and also the 0% yearly effective rate loans using the **Loan Direct Account Opening** (Fast Path: LN057) option.

1.9. LN079 - Account Variance Maintenance

Banks can provide a loan account at a rate of interest different from the other accounts opened under the same product and within the same tenure. Such preferential rates can be maintained by defining variances for the loan accounts using this option. User will be able to maintain absolute variance or factor variance for regular/penalty interest through this screen. This variance is maintained for a certain period of time and once the specified term is elapsed the account rates are picked up as per the applicable rate chart. In addition to the regular rate, this maintenance allows the user to set up the account variance for penalty rate of interest. Further, this maintenance also gives a choice to define the variance as a percentage of the base rate or as an absolute value. This option is available for penalty as well as regular rate of interest. Once the rate type is selected, then needs to select the method of variance definition as either of absolute or percentage.

Back dated variance can be setup for regular rate and can be specified for both percentage and absolute variance. The account will be rescheduled as per the selected option in the EOD of the date on which the back dated variance has been set. The interest accrued till date will be recalculated as per the revised rate. All customer payments upto the effective date will be reversed and recomputed with new rate.

- If customer has paid less after reschedule, system will use the reversal amount paid by customer to do the full payment for the earlier one or several installments first. The amount yet to be collected will be raised as arrear in the subsequent charging date. Penalty/compounding interest will also be raised accordingly.
- If the customer has paid more after reschedule, the remaining amount will lie in RPA GL as advance and will get used in subsequent charging date.
- In case the backdated variance has been changed beyond the last charging date, then the charged interest will be reversed and it will be charged as per the new rate. In EOD of the posting date, Loan will be rescheduled from the next charging date which comes after the effective date of the rate change.

1.10. LN089 - Loans Account Repricing/Revision Maintenance

If the product has re-pricing/revision plan attached, the re-pricing/revision functionality will apply.

Using this option the term of the fixed/floating rate will be modified at the account level if it is not elapsed. Parameters changed at account level for re-pricing supersede the parameters set at the product level. Even if the re-pricing plan is subsequently deleted at the product level, the existing accounts will not be affected. The accounts will follow the re-pricing plan stamped to them. The processing of rate revision / re-pricing for the loan accounts will take place as a part of EOD batch process. If the re-pricing / revision date is a holiday, processing will take place in previous day EOD.

Alternately, in a situation where no re-pricing plan is maintained at Product Level (FP: LNM88) for the loan accounts opened under them, the user will be able to add the account level re-pricing record using this option. The user can select or clear the Re-pricing option at account level to achieve the desired re-pricing on the loan account.

LN101 - Loan Account Status Change Maintenance

Using this option you can change and maintain the status of the loan account and also change the status to close for the loan accounts which are not disbursed.

Only if the book balance is zero, the system allows the closure of the loan account. Even if there is a credit balance in the account, the system will not allow the closure of the account. The Account Status Audit Inquiry (Fast Path: BAM24) option allows you to view all the various stages through which a CASA account may have progressed.

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 16] Type the loan account number.
Name	[Display] This field displays the full name of the customer who holds the loan account.
Branch Code	[Display] This field displays the branch code from which the loan is disbursed.
Product	[Display] This field displays the product to which the loan account is attached.
Currency Code	[Display] This field displays the currency of the loan account.
Effective Date	[Display] The system by default displays the current process date.
User Status	[Mandatory, Pick List] Select the new status for the loan account from the pick list.
Reason For Status Change	[Mandatory, Drop-Down] Select the reason for status change from the drop-down list.
Check Actual Status	[Optional, Check Box] Select the Check Actual Status check box to view the new and the current status of the account.
Current Status Details / New Status Details	
Under the current status details following fields will display the current status. Based on the account status modified, the new status details also will be displayed for the following fields.	
Stop Debits	[Display] This field displays whether the account is blocked for the debits.
Stop Insurance Premium Charging	[Display] This field displays whether the account is blocked for the insurance premium charging.

Field Name	Description
Stop Postponements	[Display] This field displays whether the account is blocked for the postponements.
Stop CRR Movements	[Display] This field displays whether the account is blocked for the CRR movements.
Stop Credits	[Display] This field displays whether the account is blocked for credits.
Stop Reminder Processing	[Display] This field displays whether the account is blocked for the reminder processing.
Auto Closure	[Display] This field displays whether the account is blocked for the auto closure.
Stop Drawdown	[Display] This field displays whether the account is blocked for the drawdown.
Stop Penalty Calculation	[Display] This field displays whether the account is blocked for the penalty calculation.
Stop Interest Charging	[Display] This field displays whether the account is blocked for the interest charging.

3. Click the **Modify** button.
4. Enter the account number and then select the details from the pick list.
5. Select the new user status from the pick list and the reason for status change from the drop-down list.

1.11. LN323 - Account Documents Maintenance

Once a loan account is opened, it is necessary to perform document maintenance. The bank has some requirements for certain documents to be submitted before the disbursement is made. The mandatory documents need to be marked as received before disbursement can proceed.

The non-mandatory documents can be marked either as received or waived.

You can modify the document status using this option. If the mandatory documents are not received, disbursement will not be permitted.

Definition Prerequisites

- BA035 - Document Plan Code Maintenance
- LN057 - Loan Direct Account Opening

Modes Available

Not Applicable

To maintain the document status of an account

1. Type the fast path **LN323** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Account Documents Maintenance**.
2. The system displays the **Account Documents Maintenance** screen.

Account Documents Maintenance

Field Description

Field Name	Description
Account No	[Mandatory, Numeric 16] Type the loan account number to which the documents are to be attached.
Customer Name	[Display] This field displays the short name of the primary customer of the Loan account. This field is non-editable.
Branch	[Display] This field displays the name of the home branch where the loan account is opened and maintained.
Product	[Display] This field displays the loan product under which the loan account is opened.

Field Name	Description
Currency	[Display] This field displays the currency assigned to the product, under which the account is opened.

3. Enter the account number and press the **<Tab>** key.
4. Modify the appropriate information in the tab screen and click the **Ok** button.

Documents

Field Description

Column Name	Description
Serial No	[Display] This column displays the system generated serial number, based on the existing documents attached to the account.

Column Name	Description
Plan Code	<p>[Display]</p> <p>This column displays the plan code.</p> <p>The plan codes are maintained in the Document Plan Code Maintenance (Fast Path: BA035) option. A plan code is maintained to create a consolidated set of standard documents. Ideally banks may maintain a plan code based on the product type. Multiple documents can be maintained under a single plan code.</p>
Name Of Document	<p>[Display]</p> <p>This column displays the name of the document corresponding to the serial number and the plan code.</p>
Document Chk	<p>[Display]</p> <p>This column displays the check level of the selected document as maintained in the Document Plan Code Maintenance (Fast Path: BA035) option. The options are</p> <ul style="list-style-type: none"> • First Disbursement Only • Subsequent Disbursement Only • All Disbursements.
StatusMode	<p>[Mandatory, Drop-Down]</p> <p>Select the status of the document from the drop-down list.</p> <p>The options are :</p> <ul style="list-style-type: none"> • Not Received • Received • Waive • Returned <p>The status of mandatory documents has to be either of Received or Returned.</p>
Mandatory(Y/N)	<p>[Display]</p> <p>This column displays the value as Y if the document is mandatory else N. The default value for each document, as maintained in the Document Plan Code Maintenance (Fast Path: BA035) option is displayed.</p>

Deviations

The screenshot shows a window titled "Account Documents Maintenance*". At the top, there are input fields for "Account No :", "Customer Name :", "Branch :", "Product :", and "Currency :". Below these is a "Documents" tab with a sub-tab "Deviations". The main area contains a table with the following columns: "Serial No.", "Plan Code", "Name Of Document", "Document Chk", "StatusMode", and "Mandatory(Y/N)". The table is currently empty. At the bottom, there is a navigation bar with buttons for "UPF", "OK", "Close", and "Clear".

Field Description

Column Name	Description

Mandatory(Y/N)	<p>[Display]</p> <p>This column displays the value as Y if the document is mandatory, else N. The default value for each document, as maintained in the Document Plan Code Maintenance (Fast Path: BA035) option is displayed.</p>

5. The system displays the message "Authorization required. Do You Want to continue?".
6. Click the **OK** button.
7. The system displays the **Authorization Reason** screen.
8. Enter the relevant information and click the **Ok** button.
9. The system displays the message "Record modified". Click the **Ok** button.

1.12. LNM31 - Account Drawdown Instructions

Using this option you can set up the CASA draw down instructions for loan repayment. Unlike standing instructions the system will invoke the funds transfer as and when the arrears are raised in the loan account. This provides the flexibility to the customer to ensure that arrears raised are settled as and when raised. Multiple CASA accounts can be added as fund providers for drawdown for a particular loan account. Presently, drawdown will fail if the CASA account status is not regular. This validation will continue and in case any of the attached CASA accounts are not in Regular status, system will try for the next CASA account as per the priority sequence.

Following actions will be taken depending on the drawdown behavior as maintained in Loans Product Master (FP: LNM11):

Raise earmark or Force debit - System will validate this and multiple CASA accounts will not be allowed to be attached for accounts falling under such products.

Partial amount allowed - In the event of multiple CASA accounts being attached to a loan account, system will check all the attached CASA accounts in the sequence they are attached for recovering the arrears during drawdown and drawdown retry. In event of balance in the first attached CASA account are insufficient to pay the arrears, system will try for recovering the arrears from the second CASA account and so on. Wherever funds are available, the respective CASA accounts will be debited and arrears will be accordingly appropriated.

Full payment only - In this case system will check all the attached CASA accounts in the priority sequence for recovering the arrears during drawdown and drawdown retry. In event of balance in the first attached CASA account are insufficient to pay the arrears, system will try for recovering the arrears from the second CASA account and so on. Wherever funds are available, the respective CASA accounts will be debited and arrears will be accordingly appropriated. In case balance in all the attached CASA accounts are insufficient to pay the arrears raised, the drawdown will fail as per the existing functionality for a single CASA account.

Where the installment due date falls on a holiday, the system will perform the drawdown as per the set up, i.e., whether the drawdown processing should be done on the day before or day after holiday. For further information on drawdown behavior, number of retries etc, refer to the Product Master Maintenance (Fast Path: LNM11) option.

Definition Prerequisites

- BAM81 - Company Master Maintenance
- LN057 - Loan Direct Account Opening
- LNM11 - Loan Product Master Maintenance: Drawdown parameters as specified under Auto Repayment option
- LN521 - Account Schedule

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add account payment instruction

1. Type the fast path **LNM31** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Account Drawdown Instructions**.
2. The system displays the **Account Drawdown Instructions** screen.

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 16] Type the loan account number for which the payment instructions are to be maintained.
Customer Name	[Display] This field displays the name of the customer who holds the loan account.
Branch	[Display] This field displays the name of the home branch where the loan account is opened and maintained.
Product	[Display] This field displays the product code under which the loan account is opened.
Currency	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries are posted in the account in the account currency. For example, if the currency assigned to a loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.

Field Name	Description
Account Type	[Display] This field is defaulted to Internal and disabled.

Field Name	Description
------------	-------------

Arrear Type Details

[Optional, Check Box]

Select the appropriate arrear type check box.

The options are:

- All(excluding Subsidy) - The drawdown from CASA to the loan account will be done after considering all the arrears raised by the system
- Principal - The drawdown from CASA to the loan account will be done after considering only the principal raised by the system
- Penalty Arrears: The drawdown from CASA to the loan account will be done after considering only the penalty interest raised by the system
- Interest on Arrears- The drawdown from CASA to the loan account will be done after considering only the interest raised by the system
- Late Fee - The drawdown from CASA to the loan account will be done after considering only the fees raised by the system
- Compounding Interest Arrears - The drawdown from CASA to the loan account will be done after considering only the compounding interest arrears raised by the system.

Note: Compounding Interest is an interest type which is defined when compounding interest is to be computed on the outstanding arrears.

- Premium - The drawdown from CASA to the loan account will be done after considering only the premium raised by the system
- Suspended Premium - The drawdown from CASA to the loan account will be done after considering only the suspended premium raised by the system
- Diverting Interest Arrears - The drawdown from CASA will happen for diverting interest arrears when they are raised on the loan. The arrears will be considered for drawdown as well as retries of the drawdown instructions.
- Interest - The drawdown from CASA to the loan account will be done after considering only the interest raised by the system
- Suspended Interest - The drawdown from CASA to the loan account will be done after considering only the suspended interest raised by the system
- Subsidy Interest - The drawdown is attempted on the CASA account, if this field is selected and if there are unpaid subsidy arrears on loan, the same will be recovered from the CASA account.

Note: If the loan amount disbursed, is used by the customer for any purpose other than the purpose for which loan is disbursed, then the account is charged with diverting interest and is accounted for in diverting interest receivable GL and will be considered as a separate arrear type.

Field Name	Description
Repayment Mode	
This section is enabled if Internal option is selected in the Account Type drop-down list. It is mandatory to select either one of the following repayment mode.	
Transfer from Savings/Current	[Optional, Radio Button] Click Transfer from Savings/Current , if the customer wishes to repay the loan through transfer from CASA.
Salary Cheque Credit	This field is for future use.
Remitter Account No	[Conditional, Numeric, 16] Type the CASA account number, which will be debited to repay the loan. This field is enabled if the Transfer from Savings/Current option is selected in the Repayment Mode section.
Priority	[Display] This field displays the priority number which will automatically be assigned by the system if multiple CASA accounts are added as fund providers for a Loan account. This priority number is in the order in which the CASA accounts are attached. Thus if Priority is to be defined, the user has to mandatorily choose all arrears only. If drawdown for any particular CASA–Loan combination is deleted, the priority will be adjusted internally by the system post authorization. For example assume that CASA 1, 2, 3, 4 and 5 are linked to Loan 1 with Priority 1, 2, 3, 4 and 5 respectively. On a later date, if the user deletes the CASA 3 linkage system will automatically change the Priority for CASA 4 and 5 as Priority 3 and 4. This field will be displayed only in Inquiry mode, it is blank in add mode.
Status	
Current Drawdown status#	[Display] This field displays the current drawdown status of the account.

3. Click the **Add** button.
4. Type the account number and press the **<Tab>** key.
5. Select the account type from the drop-down list.
6. Select the appropriate arrear type.
7. Click the appropriate repayment mode.
8. Enter the relevant information.

Account Drawdown Instructions-Internal-Transfer from Savings

Counter Party Payment Details

Field Name	Description
Counter Party ID	[Mandatory, Alphanumeric, 32, Pick List] Type the counter party ID or select it from the pick list. This is maintained in the Counterparty Master Maintenance (Fast Path: PM019) option.
Bank/Branch Code	[Display] This field displays the bank/branch code of the third party.
Payment Code	[Mandatory, Pick List] Select the payment code from the pick list. This indicates that it is an outgoing loan installment.
Payment Type	[Display] This field displays the type of payment. This is the broad category of the payment transaction depicted by payment code. For Example: Account payment Instruction is a type of Outgoing payment.

9. Click the **Ok** button.
10. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **Ok** button.
11. The account payment instructions are added once the record is authorised.

Note: Depending on the set up, there will be validation that the customer of the Debit account and the customer of the Credit should have the same Customer ID.

1.13. LNM32 - Additional Document Maintenance

Using this option, you can link additional documents to a loan account. These documents are maintained over and above the default documents linked to the account through the Document Plan code at the product level.

Note : Like other documents, to mark these documents as received/returned, relevant maintenance has to be done from the **Account Document Maintenance** (Fast Path: LN323) option prior to disbursement of the loan.

Definition Prerequisites

- BA035 - Document Plan Code Maintenance
- LN057 - Loan Direct Account Opening

Modes Available

Add, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add the additional loan account documents

1. Type the fast path **LNM32** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Additional Document Maintenance**.
2. The system displays the **Additional Document Maintenance** screen.

Additional Document Maintenance

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 16] Type the loan account number for which additional documents needs to be provided.
Serial No	[Display] This field displays the system generated serial number in Add mode based on the existing documents attached to the account, In Inquiry mode the serial number has to be specified.
Branch Code	[Display] This field displays the name of the home branch where the loan account is opened and maintained.
Customer Name	[Display] This field displays the short name of the primary customer of the Loan account.
Currency	[Display] This field displays the currency assigned to the product, under which the account is opened.

Field Name	Description
Product	[Display] This field displays the loan product under which the loan account is opened.
Plan Code	[Mandatory, Pick List] Select the plan code from the pick list. The plan codes are maintained in the Document Plan Code Maintenance (Fast Path: BA035) option. A plan code is maintained to create a consolidated set of standard documents. Ideally banks may maintain a plan code based on the product type. Multiple documents can be maintained under a single plan code.
Plan Serial No	[Optional, Numeric, 12] Type the plan serial number. By default the system displays the plan serial number corresponding to the plan code.
Plan Description	[Display] This field displays the description of the plan.
Plan Type	[Display] This field displays the plan type, i.e., Document or Deviation.
Document Check Level	[Display] This field displays the check level of the selected document as maintained in the Document Plan Code Maintenance (Fast Path: BA035) option. The options are "First Disbursement Only", "Subsequent Disbursement Only" or "All Disbursements".
Mandatory	[Display] This field displays if the document is mandatory as defined in Document Plan Code Maintenance (Fast Path: BA035) option.

3. Click the **Add** button.
4. Type the account number and press the **<Tab>** key.
5. Select the appropriate **Plan Code** from the pick list.

Field Description

Field Name	Description
Account Details	
Account No	[Mandatory, Numeric, 16] Type the loan account number for which the account collateral link is to be maintained.
Customer Name	[Display] This field displays the name of the customer who holds the loan account.
Product	[Display] This field displays the product code under which the loan account is opened.
Loan Amount	[Display] This field displays the sanctioned loan amount. It displays the loan amount after deducting the customer's contribution.

Field Name	Description
Currency	<p>[Display]</p> <p>This field displays the currency assigned to the product at the product level, under which the account is opened.</p>
Branch	<p>[Display]</p> <p>This field displays the name of the home branch where the loan account is opened and maintained.</p>
Collateral Details	
Collateral Code	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate collateral code from the drop-down list.</p> <p>The collateral codes are added and maintained in the Collateral Codes Maintenance (Fast Path: BAM39) option and attached to the product by using the Product Collateral Linkage (Fast Path BAM63) option.</p> <p>For linking a TD in foreign currency, you need to select an appropriate collateral code in the same currency as the TD. For example to link a TD with USD currency, the collateral code should be of Deposit type and currency should be USD.</p>
Priority	<p>[Optional, Numeric, Three]</p> <p>Type the priority.</p> <p>It allows the user to set the priority on the collaterals and guarantees attached to the loan.</p>
Collateral ID	<p>[Mandatory, Alphanumeric, 16]</p> <p>Type the appropriate collateral ID.</p> <p>In case of collateral as a Term deposit, the collateral ID will be the Term deposit account number.</p> <p>In case of a FCY TD, the currency of the TD account should be the same as the currency of the collateral code selected as defined in the Collateral Code Maintenance (Fast Path: BAM39) option.</p> <p>If account currency is local currency (i.e., branch Currency), in case of a TD, this field will accept a TD account number maintained in any other currency – foreign / local.</p> <p>If account currency is not a local currency (i.e., branch currency), in case of a TD, this field will accept a TD account number maintained in a currency same as account currency.</p>

Field Name	Description
TD Account Number	<p>[Conditional, Numeric, 16]</p> <p>Type the TD account number.</p> <p>In case of a FCY TD, the currency of the TD account should be the same as the currency of the selected collateral code as defined in the Collateral Code Maintenance (Fast Path: BAM39) option.</p> <p>In case of a TD, if account currency is local currency (i.e., branch currency), it will accept a TD account number maintained in foreign/local currency. If account currency is not a local currency (i.e., branch currency), in case of a TD, this field will accept a TD account number maintained in a currency same as account currency.</p> <p>This field is enabled for TD type collaterals.</p>
Deposit No.	<p>[Conditional, Pick List]</p> <p>Select the deposit number from the pick list.</p> <p>Deposit number allows the user to attach the term deposit as collateral with the loan account.</p>
Deposit Ccy	<p>[Display]</p> <p>This field displays the currency of the TD account.</p>
Net TD Rate	<p>[Display]</p> <p>This field displays the net term deposit rate.</p>
Collateral Value	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the appropriate value of the collateral, which is to be linked to the loan account.</p> <p>The system will default the value of the collateral as defined in the Collateral Header Maintenance (Fast Path: BAM74) option.</p> <p>This value can be modified by the user but only to a lesser amount. This flexibility enables to link a single Collateral Header to multiple accounts.</p> <p>The maximum allowed value for time deposit collateral is <i>Deposit amount * Currency rate * Lendable margin.</i></p>
Currency Rate	<p>[Display]</p> <p>This field displays the conversion rate for the collateral currency (from BA_CCY_RATES) if the TD collateral is in any other currency than the account currency.</p> <p>The rate displayed is the last rate of the day when the last EOM was executed. However, on the day the collateral is linked to a loan account this field displays the mid-rate of that particular day.</p> <p>If the collateral and account currency are the same, this field displays the value as one.</p>

Field Name	Description
Collateral Value in Collateral Ccy	<p>[Display]</p> <p>This field displays the collateral amount based on the value entered in the Collateral Value field and the Currency Rate.</p> <p><i>Collateral Value (collateral Currency) = Collateral Value * Currency Rate</i></p> <p>If the collateral and account currency are the same, this field will display the collateral value in its own currency.</p>
Deduction Flag	<p>[Optional, Check Box]</p> <p>Select the Deduction Flag check box to deduct the value of the collateral before the loan loss provisioning.</p>
Prime /Secondary	<p>[Mandatory, Drop-Down]</p> <p>Select the status of the security attached to the loan account from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Prime • Secondary <p>The status being selected is for the purpose of ascertaining whether the security linked to the loan account is Primary or Secondary for reporting purposes.</p>

3. Click the **Add** button.
4. Type the account number and press the **<Tab>** key.
5. Select the collateral code from the drop-down list.
6. Enter the other collateral details.

1.16. LNM35 - Loan Account Attributes Maintenance

Using this option you suitably modify the default parameters details at the loan account level. The account attributes are defaulted at the account level from the various master maintenance's. This option also allows maintaining of solicitors code, allotting an account officer, mail control parameters, modification of NPA appropriation sequence, etc.

The NPA appropriation sequence set at the product level is defaulted for an account. This sequence can be modified at the account level. Similarly

the longest over due first flag set at product level can be overridden by the appropriation control flag for NPL.

You can modify the account attributes for a particular account if required, this will override the set parameters. This maintenance also provides free format text fields like project status and limit ID etc. which can be used to maintain miscellaneous loan details.

Definition Prerequisites

- LN057 - Loan Direct Account Opening
- LNM33 - Loans Account Address

Modes Available

Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To modify loan account attributes

1. Type the fast path **LNM35** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Loan Account Attributes Maintenance**.
2. The system displays the **Loan Account Attributes Maintenance** screen.

Loan Account Attributes Maintenance

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 16] Type the loan account number for which the attributes are to be modified.
Customer Name	[Display] This field displays the name of the customer who holds the loan account.
Branch Code	[Display] This field displays the code of the home branch where the loan account is opened and maintained.
Product Code	[Display] This field displays the product code under which the loan account is opened.
Currency	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries are posted in the account in the account currency. The exchange rate values must be defined and downloaded. For example, if the currency assigned to a loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.

Field Name	Description
A/c Relation	[Display] This field displays the relation of the joint customers to the primary account holder.
Joint Cust 1/2/3	[Display] This field displays the name of the joint customers if the loan account is a joint account.
Loan Purpose	[Optional, Alphanumeric, 120] Type the purpose of the loan.

3. Click the **Modify** button.
4. Type the account number and press the **<Tab>** key or select it from the pick list.
5. Modify the relevant information in the tabs.

Field Description

Field Name	Description
Flag Past Due	[Display] This field displays the flag past due status as defined under the asset classification plan attached to the product under which the loan account exists. This field is non-editable.

Field Name	Description
Restricted Account	<p>[Optional, Check Box]</p> <p>Select the Restricted Account check box, if you want the account to be treated as restricted account.</p> <p>Only tellers with suitable capability will be able to inquire and post transactions into restricted accounts. Normal tellers will not be able to transact on the account.</p>
Account Officer	<p>[Mandatory, Drop-Down]</p> <p>Select the login id of the person who is responsible for the account from the drop-down list.</p> <p>Each account can be assigned to a separate officer. The officer who is assigned to an account will act as the relationship officer for the account.</p>
Staff Account	<p>[Optional, Check Box]</p> <p>Select the Staff Account check box, if the loan account is a staff account.</p>
Solicitor Code	<p>[Optional, Pick List]</p> <p>Select the solicitor code for the loan account from the pick list.</p> <p>The pick list will display values only when the Loan Third Party Maintenance is done. For more information refer to Loan Third Party Maintenance (Fast Path: LNM17) option under Definitions User Manual.</p>
Producer ID	<p>[Optional, Pick List]</p> <p>Select the producer ID from the pick list. It allows the user to select the producer ID.</p>
Advice Mail Control	<p>[Optional, Drop-Down]</p> <p>Select the type of address to which the advice mail can be sent from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • At Customer Address • At Account Address • At Both <p>In case separate Loans Account Address (Fast Path: LNM33) option is maintained, the user can select either of the above 3 options. Else, the advice mail will be sent to the customer address by default.</p>

Field Name	Description
Allow Custom Appropriation	<p>[Optional, Check Box]</p> <p>Select the Allow Custom Appropriation check box to enable the field 'Appropriation Sequence' to be modified. The sequence can be complete string of all arrear types or any subset of the default string.</p> <p>Note :If unchecked, the appropriation sequence will be the complete string.</p>
Allow Custom Appropriation for NPL	<p>[Optional, Check Box]</p> <p>Select the Allow Custom Appropriation for NPL check box to enable the field 'NPL Appropriation Sequence' to be modified. The sequence can be complete string of all arrear types or any subset of the default string.</p> <p>Note :If unchecked, the appropriation sequence will be the complete string.</p>
Appropriation Sequence	<p>[Optional, Alphanumeric, 40]</p> <p>Type the sequence in which the arrears raised in a loan account would be appropriated when the account is classified as a performing asset.</p> <p>By default the system displays the loan product level sequence.</p>
Appropriation Sequence for NPL	<p>[Optional, Alphanumeric, 40]</p> <p>Type the sequence in which the arrears raised in a loan account would be appropriated when the account is classified as a non performing asset.</p> <p>By default the system displays the product level appropriation sequence.</p>
Appropriation Control Flag	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriation control flag from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Sort By Priority • Sort By Date <p>This control flag determines whether the arrears have to be sorted by priority or by date.</p>
Appropriation Control Flag for NPL	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriation control flag for NPL from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Sort By Priority • Sort By Date <p>This control flag determines whether the arrears have to be sorted by priority or by date.</p>

Field Name	Description
Agreement Number	<p>[Display]</p> <p>This field displays the agreement number under which the loan account has been opened.</p>
Reason For Closure	<p>[Display]</p> <p>This field displays the reason provided by you or updated by the system, during the loan account closure.</p> <p>The reason for closure is displayed in the Inquiry mode.</p>
Loan Closure Date	<p>[Display]</p> <p>This field displays the date of closure of the loan account.</p> <p>It can either be the EFS date or the fully written off date or the system initiated closure date.</p> <p>The closure date is displayed in the Inquiry mode.</p>
Repayment Mode	<p>[Mandatory, Drop-Down]</p> <p>This field by default shows the repayment mode selected during loan account opening. You can change the mode if required.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Cash • Cheque • Account • Transfer • GL • External
External Payment Mode	<p>[Optional, Drop down]</p> <p>Select the external payment mode from the drop down list:</p> <ul style="list-style-type: none"> • ACH • ECS <p>Note: This field will be enabled only if the Repayment Mode selected is External.</p>
Unique Mandate Reference Number	<p>[Mandatory, Alphanumeric, 20]</p> <p>Enter the Mandate Reference Number to be linked to the loan. This field is enabled only if the external payment mode is ACH or ECS. Same URN can be linked to multiple loan accounts.</p>
ECS Sequence Number	<p>[Display]</p> <p>This field displays the four digit ECS sequence number which is automatically populated when external payment mode is ECS. This value is calculated as one more than the total count of loan accounts linked to the same UMRN number</p>

Field Name	Description
Remittance Mode	<p>[Mandatory, Check Box]</p> <p>Select the Remittance Mode check box. The record can be authorized after the principal movement from entrusted deposit to entrusted savings and then behave as per the remittance mode.</p>
Next Repayment Review Date	<p>[Display]</p> <p>This field displays the next repayment review date.</p> <p>Based on the following conditions, the system displays the next review date:</p> <ul style="list-style-type: none"> • For fixed rate of interest, the system displays the next review date as end date of the fixed rate period. • For variable rate of interest, the system displays the review date as disbursement date (drawdown date) + 12 months. • For any identified event, the system displays the next review date as event occurrence Date + repayment review date.
Write Off Status	<p>[Optional, Check Box]</p> <p>Select the Write Off Status check box which is an identifier that the loan account is written off in an external system. The previous modified record can be amended by selecting or unselecting the check box.</p>
End Date of Observation for Restructured Accounts	<p>[Display]</p> <p>This field displays the expiry date of observation days as derived from asset classification plan attached to the account. It is editable.</p> <p>The credit risk rating will remain unchanged till this date is reached. The account will be excluded from the classification cycle from restructured date to under observation date.</p>
Write Off Date	<p>[Display]</p> <p>This field displays the current process date of FCR. This field cannot be modified by the user.</p>
Write Off Amount	<p>[Display]</p> <p>This field displays the outstanding principal amount of the loan account as of the previous day. This field cannot be modified by the user.</p> <p>If the Write off check box is unselected and the record is saved/authorized, then FCR will returns the Write Off Amount and Write off Date to null value.</p>

7. The system displays the message "Record Modified...Authorisation Pending". Click the **OK** button.
8. The loan account attributes are added once the record is authorised.

1.17. LNM38 - Loan Approved Amount Maintenance

Using this option the loan amount, which is sanctioned for a particular account can be modified .

This option is used when the borrower decides not to use the full amount sanctioned. It is possible to revise the loan amount below the sanctioned amount. The lower limit for the revision is the utilized amount. In case the loan is partially disbursed, the lower limit for the revision, i.e., the New Approved Amount will be the utilized amount.

1.19. LNM56 - Loan Account Subsidy Plan Maintenance

You can use this option to modify the subsidy term. Term for subsidy is considered as per the Subsidy term defined in the plan or the Loan term defined at the Loan Direct Account Opening (Fast Path: LN057) option, whichever is less.

Definition Prerequisites

- LN057 - Loan Direct Account Opening

Modes Available

Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To modify loan account subsidy plan

1. Type the fast path **LNM56** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Loan Account Subsidy Plan Maintenance**.
2. The system displays the **Loan Account Subsidy Plan Maintenance** screen.

1.21. LNM99 - Loan Account CBR Details

Using this option you can set user defined fields at the Loans account level. Defining these categories facilitates the bank to generate exclusive MIS reports, over and above the standard reports available within **FLEXCUBE**. There is no processing done by **FLEXCUBE** using these codes and they are stored for reporting purposes only.

The CBR Code Maintenance option enables you to link the accounts of customers to the defined categories or CBR codes, for example Industry Code, Region, Sector, etc.

Definition Prerequisites

- LNM11 - Loan Product Definition: Loan Product Master must be defined before defining Loan Account CBR details
- BA078 - User defined Field Maintenance: The fields used for the central bank reporting purposes should be defined before defining Loan Account CBR details
- BA080 - CBR Pick Lists Maintenance: Possible values for the user defined field should be defined before defining Loan Account CBR details
- LN057 - Loan Direct Account Opening
- BAM56 - Currency Codes Maintenance

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add loan account CBR details

1. Type the fast path **LNM99** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Loan Account CBR Details**.
2. The system displays the **Loan Account CBR Details** screen.

1.22. LN521 - Account Schedule

When a loan is provided to a customer, the repayment schedule of loan is drawn on the basis of principal amount, term and rate of interest applicable on the loan account. All these parameters are important constituent of a loan agreement. Usually, the repayment of the loan is spread across the tenure of the loan over a period of several months.

Using this option, you can generate a schedule of repayment which if followed will adjust the customers loan liability at the end of tenure. A schedule lists the installment amount, due date of installment, break up of interest and principal which will be repaid from the installment and the expected loan outstanding after appropriating the installment amount.

The Schedule Setup option allows you to set up the IPI, EPI and FPI accounts schedule. For a detailed explanation of each of these loan schedules/stages, refer to the Installment Rules (Fast Path: LNM43) option. Further, in the case of interest and principal type of installment (IPI), User Specified Repayment (installment type is selected as IPI with User Specified Principal Repayment flag as checked in Installment rules FP: LNM43) can be set up only for principal paying regular stage of the loan. If the loan is disbursed in parts multiple times (on different days), the user will have to update the principal repayment amount to ensure that the total principal that will be repaid as per the schedule is equal to the disbursed/ outstanding amount, as the case may be.

Loans can be disbursed to the customer through the Loan Disbursement Enquiry (Fast Path :1413) option only after the account schedule is setup in this option.

Definition Prerequisites

- LN057 - Loan Direct Account Opening
- LNM98 - Schedule Type
- BAM56 - Currency Code Maintenance
- LNM43 - Installment Rules
- LNM41 - Interest Rules
- LN060 - Loan Product Rates Plan
- SCM01 - SC Package Definition
- LNM22 - Loan Plan Deduction Maintenance
- 1078 - Loan Contribution Payin Inquiry
- BAM45 - Insurance Master Maintenance

Field Description

Column Name

Description

Stage No.

[Display]

This column displays the serial number for the stages.

There can be a maximum of 99 stages defined for an account schedule.

Stage Name

[Display]

This column displays the stage type attached to a loan account.

This is defined in at the Schedule Type definition under Global Definitions.

The options are:

- IOI
- EPI
- IPI
- PMI
- FPI

Stage Start Date

[Display]

This column displays the start date for the corresponding stages.

For the first stage, the start date will be the date of the first disbursement. For the remaining stages, it is the End Date of the previous preceding stage.

Column Name	Description
Principal Amount	<p>[Display]</p> <p>This column displays the principal amount payable by the customer.</p> <p>This field is applicable only for IPI, EPI and FPI type of loans.</p> <p>If any debit type disbursement charges are levied at the time of disbursement, the same is added to the disbursed amount.</p>
Principal Payments	<p>[Display]</p> <p>This column displays the number of installments in which the principal is paid.</p> <p>For the IOI stage, the principal payments will be zero as in this stage, only the interest is repaid and not the principal.</p> <p>Based on this number, the system calculates the End Date column and the Stage Start Date column for the next stage.</p> <p>For the EPI stage, the sum of principal payments and interest payments are equal.</p>
Interest Payments	<p>[Display]</p> <p>This column displays the number of installments in which the interest on the loan amount is paid.</p> <p>The system calculates the number of interest payments, and it will be one less than the principal payment.</p> <p>For the IOI stage, the tenure will be defaulted from the schedule type definition, which can be modified.</p>
First Principal Due Date	<p>[Display]</p> <p>This column displays the first due date for the principal to be paid.</p> <p>For the IOI stage, this field is not applicable as only interest is repaid and not the principal.</p> <p>For the EPI stage, the first principal due date is same as the first interest due date. For the first stage, this is same as the Stage Start Date. For subsequent stages for the same stage name, it is calculated using First Principal Due Date and principal payments of previous stage. For the IPI stage, it can be different.</p> <p>Based on this date, the system calculates the End Date column and the Stage Start Date column for the next stage.</p>
First Interest Due Date	<p>[Display]</p> <p>This column displays the first due date for the interest to be paid.</p> <p>This date will be defaulted to the end of the month in case of calendar type of products. In case of anniversary type, it should be the same date or a greater date of the next month.</p> <p>For the EPI stage, this field is the same as First Principal Due Date column.</p>

Column Name	Description
Installment Amount	[Display] This column displays the installment amount to be repaid by the customer in each stage. The installment amount is the sum of the principal and the interest component.
Stage End Date	[Display] This column displays the end date for the particular stage. The system calculates the stage end date, and it is one day less than the first interest due date. The preceding end date is the start date for the next stage.

- Click the **Validate** button. The system validates the entries.
- Click the **Generate Schedule** button.
- The system displays the **Schedule Details** tab.
- Click **VPI Schedule** button to open **VPI schedule** tab. This button is activated only if the installment rule of the stage is VPI.

VPI Schedule

VPI Schedule tab is active only if schedule is VPI Installment type. Here you can enter different installment amount for different terms.

28. If **Ok** is selected the **Branch Disbursement** option will be displayed. If **Cancel** is selected you can later use the **Loan Disbursement Inquiry** (Fast Path: 1413) option and complete the branch leg of the disbursement.

To modify the account schedule

1. Type the loan account number and press the **<Tab>** key.
2. In the **Schedule Definition** tab, click the **Reschedule** button.
3. The system displays the **Reschedule Parameters** tab.

Reschedule Parameters

At loan account opening, the loan has a specific schedule of payments attached to it. During the life cycle of a loan, system calculates and charges installment based on this schedule. In case, the customer wants to reduce the amount of installment, or increase the amount of installment and reduce the term this can be done. This can also happen when the customer has been unable to repay the loan for some period of time, and the bank decides to restructure the loan by changing the schedule itself. Any type of loan can be rescheduled e.g.: EPI/ IPI / FPI etc.

The system validates that the loan account is in regular stage with disbursement stage complete.

Rescheduling cannot be done on the installment repayment date.

Term

Column Name	Description
Year	[Conditional, Numeric, Four] Type the number of years for deferment. This field is enabled if the Defer by specifying Term option is selected from the Deferment Option field.
Months	[Conditional, Numeric, Four] Type the number of months for deferment. This field is enabled if the Defer by specifying Term option is selected from the Deferment Option field.
No. of Payments	[Conditional, Numeric, Four] Type the number of payments to be deferred. This field is enabled if the Defer by specifying Installment option is selected from the Deferment Option field.
Freeze Interest	[Optional, Check Box] Select the Freeze Interest check box to define an interest freeze period for the entered account.
Freeze Interest Rate	[Conditional, Numeric, Three, 10] Type the rate that would be applicable on the account during the interest freeze period. The rate should be greater than or equal to zero. This field is enabled if the Freeze Interest check box is selected.
End Period Treatment	[Conditional, Drop-Down] Select the end period treatment of the interest amount of the interest freeze period from the drop-down list. The options are: <ul style="list-style-type: none"> • Capitalize Interest Arrears • Add Interest to first installment This field is enabled if the Freeze Interest check box is selected.

Note: If account is in IOI stage then on clicking **Freeze Interest** check box, end of period treatment drop down would be disabled. In all other cases, it would be enabled. If the account is suspended then the **Freeze Interest** check box is auto selected.

3. Enter the relevant information and click the **Ok** button. The system displays the **Schedule Definition** tab.
4. Click the **Validate** button.
5. Click the **Generate Schedule** button. The system displays the **Schedule Details** tab. Click the **Ok** button.
6. The system displays the message "Authorization Required. Do You want to Continue?". Click the **OK** button.

7. The system displays the **Authorization Reason** screen.
8. Enter the relevant information and click the **Ok** button.
9. The system displays the message "Schedule modification Successful". Click the **Ok** button.

To disburse the user defined repayments

1. Type the loan account number and press the **<Tab>** key.
2. In the **Schedule Definition** tab, click the **User Defined Schedule** button. The system displays the **User Defined Repayment** tab

User Defined Repayments

This will apply only for disbursement / reschedule of loans with IPI installment type and User Specified Principal Repayment check box is selected in Installment Rules (FP: LNM43).

System will compute interest amount using the principal repayment date and amount. The interest will be computed using the parameters specified in Interest Rules (FP: LNM43). The base for interest computation will be derived by system. Till the first principal repayment date, the interest will be computed on the loan outstanding (disbursed amount in this case). From the first principal repayment date system will factor the principal repayment amount from the date specified by the user to derive the base for interest computation.

A blown up schedule will be displayed. The repayment date field will display principal or interest repayment date or both (if due on the same date) as applicable.

The screenshot shows the 'Account Schedule' window with the following details:

- Account No: 500000000323441
- Product: 10000
- Schedule Type: 201
- Sanctioned Amount: 2,42,423.00
- Disbursement Date: 30/09/2015
- Branch: DEHD
- Currency: INR
- Loan Term: 3 Months
- Disbursed Amount: 0.00
- Actual Outstanding Amount: 0

The 'User Defined Repayment' tab is active, showing a table with the following data:

Principal Repayment Date	Principal Repayment Amount
30/09/2015	242423

Buttons: Validate, OK, Cancel

Field Description

Field Name	Description
------------	-------------

Field Name	Description
Principal Repayment Date	<p>[Conditional, Pick List, dd/mm/yyyy]</p> <p>Select the principal repayment date from the pick list.</p> <p>The user can specify the date when the principal amount will be due on the loan. The user can add multiple rows specifying principal repayment dates. The following will be validated at the time of disbursement and rescheduling of the loan account:</p> <ol style="list-style-type: none"> 1. There is one row for the date same as maturity date of the loan and principal amount against that row is greater than zero. 2. There could be multiple rows of the principal repayments and these could be more or less than interest repayments. The principal repayment dates should be a future date, greater than disbursement date and less than or same as maturity date of the loan. 3. The date is not less than or equal to the disbursement date. 4. The date is not greater than maturity date of the loan. 5. The principal repayment date for each subsequent row should not be the same as and should be greater than the previous repayment date. 6. The final principal repayment date will be the same as last interest repayment date or it should fall between second last and last interest repayment date. <p>This field is enabled if Installment Computation Formula is IPI and User Specified Principal Repayment check box is selected in Installment Rules (FP:LN43).</p>
Principal Repayment Amount	<p>[Numeric, 16,2]</p> <p>Type the principal repayment amount that is due on the principal repayment date.</p> <p>The total of principal repayment amounts keyed in against each principal repayment date will be validated against the principal outstanding. At the time of disbursement the amount will be the same as disbursed amount. The total should be equal to the principal outstanding. The principal amount should be greater than zero.</p> <p>This field will not be applicable when a loan with User Specified Repayment is Restructured.</p> <p>This field is enabled if Installment Computation Formula is IPI and User Specified Principal Repayment check box is selected in Installment Rules (FP:LN43).</p>
Currency	<p>[Display]</p> <p>This field displays the currency assigned to the product at the product level, under which the loan account is opened.</p> <p>All the entries are posted in the account in the account currency. The exchange rate values must be defined and downloaded.</p> <p>For example, if the currency assigned to a loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.</p>

Field Name	Description
Name	[Display] This field displays the name of the customer.

Account Status	[Display] This field displays the status of the loan account to be open regular, closed, dormant etc.

3. Click the **+** button to add the rows for principal repayment.
4. Click the **Validate** button.
5. Click the **Ok** button.

Subsidy Control Parameters

The screenshot shows the 'Subsidy Control Parameters' tab in the Oracle Account Schedule application. The form is populated with the following data:

- Account No.: 50000000413038 (TEST 2 233)
- Product: 89000 (Retail Loans Monthly)
- Schedule Type: 601 (WPI)
- Sanctioned Amount: 2,00,000.00
- Debursement Date: 18/08/2019
- Schedule Draw On: Actual Outstanding Amount
- Branch: DEMO
- Currency: INR
- Loan Terms: 12 Months
- Debursed Amount: 2,00,000.00
- Producer Id: 0

The Subsidy Control Parameters section includes the following fields:

- Subsidy Type: (Dropdown menu)
- Subsidy Margin Rate: (Text field)
- Percentage Share Of Subsidized Interest: (Text field)
- Loan Amount Of Subsidized Interest: 0.00
- Subsidy Start Date: (Date picker)
- Subsidy End Date: (Date picker)

Buttons for 'Save' and 'Cancel' are located at the bottom of the form area. The bottom of the application window shows a navigation bar with buttons for 'UDF', 'OK', 'Close', and 'Clear'.

Field Description

Column Name	Description
-------------	-------------

Column Name	Description
Subsidy Type	<p>[Optional, Drop-Down]</p> <p>Select the type of subsidy, if the loan account is disbursed with the subsidy parameters from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Interest Rate Subsidy • Percentage of Subsidy Interest • Interest Subsidy on Loan Amount <p>This field will be enabled for input if Interest Rate Subsidy is selected as the Subsidy Type else it is disabled.</p> <p>The interest which has to be entered should be greater than 0% and lesser than 100%. The interest rate entered has to be less than the interest rate applicable to the loan Account. Only 2 digits after decimals will be allowed.</p>
Subsidy Margin Rate	<p>[Optional, Numeric, Ten]</p> <p>Type the subsidy margin rate.</p> <p>This field displays the subsidy percentage share, if the loan account is disbursed under Interest Rate Subsidy Subsidy Type.</p>
Percentage share of Subsidized interest	<p>[Optional, Numeric]</p> <p>Type the value percentage share of subsidy interest.</p> <p>This field displays the subsidy percentage share, if the loan account is disbursed under Percentage of Subsidy Interest Subsidy Type.</p>
Loan Amount for Subsidized interest	<p>[Optional, Numeric]</p> <p>Type the intended fixed subsidy amount.</p> <p>This field will display the fixed subsidy amount, if the loan account is disbursed under Interest Subsidy on Loan Amount Subsidy Type.</p>
Subsidy Start Date	<p>[Conditional, Pick List, DD/MM/YYYY]</p> <p>Select the subsidy stage start date from the pick list.</p> <p>This date can be either equal to the FLEXCUBE process date or a future date but can not be a back date. If it is a future date, it has to be lesser than the Process Date + Loan Term.</p>
Subsidy End Date	<p>[Conditional, Pick List, DD/MM/YYYY]</p> <p>Select the subsidy stage expiry date from the pick list.</p> <p>This date has to be greater than the FLEXCUBE process date and subsidy start date. This date has to be less than the FCR Process Date + Loan Term.</p>

6. Click the **Subsidy Control Parameter** tab and enter the relevant details.
7. Click the **Save** button.
8. Click the **Close** button.

Insurance Premium

Banks will be able to charge an additional amount in the form of an insurance premium which will be a part of the customer's loan repayment schedule in return for its promise of safeguarding the customer's property in event of any unfortunate events. The insurance premium will be over and above the installment amount and will be a part of his repayment schedule. The premium amount will self-adjust itself based on the events that are likely to take place in a typical loans life cycle. The Insurance Premium tab enables you to attach an insurance plan code to an account during host disbursement. You can select the frequency defined for the premium amount which is to be used for charging and generation of the schedule. You can also specify whether this is calendar or anniversary day and can select a day of a month for anniversary.

The screenshot shows the 'Account Schedule' application with the 'Insurance Premium' tab selected. The form is divided into several sections:

- Account Information:** Account No. (50000000413038), Product (Retail Loans Monthly), Schedule Type (601), Sanctioned Amount (2,00,000.00), Disbursement Date (18/08/2019), Schedule Draw On (Actual Outstanding Amount), Branch (DEMO), Currency (INR), Loan Terms (12 Months), Debursed Amount (2,00,000.00), and Producer Id (0).
- Insurance Premium Section:**

Anniversary Day	[Input, Numeric] Enter the anniversary day. This is the day on the offset month that the insurance component will be charged.
Offset Month	[Input, Numeric] Enter the offset month. This is the month of the year to start the insurance component in the schedule. This value should be greater than the current month

1.23. 1413 - Loans Disbursement Inquiry

Using this option, Loans can be disbursed by cash, transfer to CASA, transfer to GL, or banker's cheque to the customer once the account schedule is set up through **Account Schedule** (Fast Path: LN521) option.

The disbursement mode has to be selected at host, i.e., during account schedule setup, and while disbursing the loan at the Branch.

If the product is defined as "Unsecured" in the Loan Product Master (Fast Path: LNM11) option, Oracle FLEXCUBE allows disbursement before attaching the collateral and the loan schedule is drawn on the default interest index rate defined in the Loans Product Rates Plan (Fast Path: LN060) option.

Note: Refer to the **Account Schedule** (Fast Path: LN521) option for more details on setting up of the loan account schedule.

Definition Prerequisites

- BAM97 - Currency Codes Cross Reference
- LN521- Account Schedule
- BAM09 - Issuer Maintenance
- STM59 - Settlement Bank Parameters
- STM54 - Routing Branch Maintenance
- BAM14 - Rewards and Service Charges definition
- LN057 - Loan Direct Account Opening
- LNM11 - Product Master Maintenances
- LN060 - Loans Product Rates Plan
- BAM09 - Issuer Maintenance
- STM57 - MICR Number Maintenance

Modes Available

Click the **Cancel** button.
13. The system displays the serial number. Click the **OK** button.

Note: Depending on the set up, there will be validation that the customer of the Debit account and the customer of the Credit should have the same Customer ID.
For more information on Authorisation transactions, refer to the ***FLEXCUBE Introduction User Manual.***

1.24. 7001 - Fee Collection Before Disbursement

Banks can sometimes ask the customer to deposit upfront fees or other charges on a loan account before disbursement. Till the time such deposits made by customer are appropriated, the customers get interest benefit on the amount contributed. Using this option, you can credit the fees / charges applicable on a loan account before disbursement.

Definition Prerequisites

- LN057 - Loan Direct Account Opening
- 8051 - CASA Account Opening

Modes Available

Not Applicable

To credit fees to a loan account before disbursement

1. Type the fast path **7001** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Transfer > Fee Collection before Disbursement**.
2. The system displays the **Fee Collection before Disbursement** screen.

Field Description

Field Name	Description
Loan Account No	[Mandatory, Numeric, 16] Type the undisbursed loan account number for which fee payment transaction needs to be performed.
Currency	[Display] This field displays the loan account currency.
Modes of Transfer	[Mandatory, Drop-Down] Select the relevant mode of transfer from the drop-down list. The options are: <ul style="list-style-type: none"> • Transfer by Cash • Transfer from CASA • Transfer from GL
Collect Fees	
Service Charge Code	[Mandatory, Pick List] Select the service charge code from the pick list. The service charge codes are maintained in the Rewards and Service Charges definition (Fast Path: BAM14) option. The name of the service charge code is displayed in the adjacent field.
SC Amount	[Mandatory, Numeric, 13, Two] Type the SC amount to be collected from the loan account. By default, the system displays the SC amount based on the service charge code selected.
SC Currency	[Display] This field displays the currency for the service charge code selected.

3. Enter the loan account number and press the <TAB> key.
4. Select the mode of transfer from the drop-down list.
5. Select the service charge code from the pick list.
6. Enter the service charge amount.
7. Click the **Ok** button. The system displays the message " Do you want to continue".

Fee Collection before Disbursement

The screenshot shows a web application window titled "Fee Collection Before Disbursement*". The window contains a form with the following fields:

- Loans Account No.: 0000001733360 EDWARD MATHEW
- Currency: INR
- Mode Of Transfer: Transfer By Cash
- Collect Fees :
 - Service Charge Code : 13 ST_DUTY_RL_SCPKG_LEVEL
 - SC Amount : 100.00 SC Currency: INR

A Microsoft Internet Explorer dialog box is overlaid on the form, displaying the message "contd : Do you want to continue?" with "OK" and "Cancel" buttons.

At the bottom of the window, there is a navigation bar with tabs: Card, Change Pin, Cheque, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signature, Travellers Cheque. Below the tabs are buttons for "UDF", "OK", "Close", and "Clear".

8. Click the **Ok** button.
9. Depending upon the **Mode Of Transfer** selected from the drop-down list, the system displays the relevant transaction screen. For example, if you select **Transfer By Cash** from the **Mode Of Transfer** drop-down list, then the system will display that screen.
10. Enter the required information in the various tabs.

1.25. LN045 - Loan Disbursement Reversal

Using this option, a disbursed loan can be reversed due to administrative reasons or any error in the disbursement set-up for the loan account. This transaction will reverse the disbursement as well as any charges deducted at the time of disbursement.

If the teller has already disbursed the loan amount at the branch, the same teller should reverse the loan disbursement transaction on the same day using the Search Electronic Journal (Fast Path: 6006) option only after reversing the branch disbursement, if done. Subsequently, this reversal at the host should be done. Without the branch reversal of the disbursement, the host disbursement reversal cannot be performed.

Once, the subsidy parameters are entered and disbursement is done and the End of Day process is run, the loan account cannot be detached from the subsidy parameters as entered at the time of disbursement.

Definition Prerequisites

- LN057 - Loan Direct Account Opening
- Branch Disbursement Reversal
- 1413 - Loans Disbursement Inquiry

Modes Available

Not Applicable

To reverse a loan disbursement

1. Type the fast path **LN045** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Loan Disbursement Reversal**.
2. The system displays the **Loan Disbursement Reversal** screen.

Field Name	Description
GL Acct Ccy	[Mandatory, drop-Down] Select the currency assigned to the GL that is to be debited from the drop-down list. This currency can differ from the local currency of the bank and the account currency.
GL Account No	[Mandatory, Pick List] Select the GL account, which will be debited for crediting the Loan account towards payment of the arrears from the pick list. The GL description is displayed in the adjacent field.
Loan Acct Ccy Rate	[Display] This field displays the rate of conversion used for converting the loan account currency to the local currency of the bank.
GL Acct Ccy Rate	[Display] This field displays the rate at which the GL account currency is converted to the local currency of the bank.
GL Acct Amount	[Mandatory, Numeric, 13, Two] Type the amount that will be debited from the GL account towards repayment of the Loan arrears.
Acct Amount	[Display] This field displays the amount credited in the loan account in account currency.
Total Arrears	[Display] This field displays the total arrears to be paid.
Value Date	[Mandatory, Pick List, dd/mm/yyyy] Select the value date from the pick list.
User Reference No	[Optional, Alphanumeric, 40] Type the user reference number.
Customer ID	[Optional, Alphanumeric, 10, Pick List] Type the customer id or select it from the pick list.
Narrative	[Mandatory, Alphanumeric, 40] Type the narration. By default, it displays the narration, based on the transaction.

10. Click the **Ok** button.
11. The system displays the message "**Authorisation Required**. Do You want to continue?". Click the **OK** button.
12. The system displays the **Authorisation Reason** screen.

13. Enter the relevant information and click the **Grant** button.
14. The system displays the transaction sequence number. The transaction number is a system generated number that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. Click the **Ok** button.

Note: For information on Authorisation transactions, refer to the *Oracle FLEXCUBE Introduction User Manual*.

1.27. 1065 - Loan Installment Payment Inquiry

Using this option you can enter details of regular repayments on an account by a customer. The installment payment option is used for amounts equal to or less than the arrears due on the account.

The initial inquiry screen will display all the outstanding arrears (interest, principal, etc.) along with the unbilled penalty arrears till date (calculated online) due to late payment of arrears on the account. The payment can be by multiple modes, viz., Cash, Local Cheque, Transfer from CASA or GL transfer. After the payment is made the system updates the amount paid today for the account. The set-off of paid amount against arrears happens in end of day based on the appropriation sequence for the arrear type and date of the arrear as set at the product level.

Using this option you can specify the appropriation sequence and arrear priority (due date or arrear type).

Definition Prerequisites

- BAM97 - Currency Codes Cross Reference
- LN057 - Loan Direct Account Opening
- The exchange rate values must be defined and downloaded

Modes Available

Not Applicable

To inquire on loan installment payment

1. Type the fast path **1065** and click **Go** or navigate through the menus to Transaction Processing > Account Transactions > Loan Account Transactions > Transfer > Loan Installment-Payment By Transfer From Savings.
2. The system displays the **Loan Installment Payment Inquiry** screen.

Loan Installment Payment Inquiry

The screenshot shows the Oracle Loan Installment Payment Inquiry form. At the top, there are input fields for Account No., Account Ccy, Account Status, and Installment Mode. Below these are four main sections: Outstandings, Arrears Postponed, UnApplied Credits, and Installment Payments. Each section contains several input fields for numerical values. The Outstandings section includes fields for Principal Balance, Amount Disbursed Today, Installment Arrears, Other Arrears, Penalty Arrears, Premium Arrears, and UnBilled Penalty Interest, with an 'Upto' field. The Arrears Postponed section includes Principal Arrears Postponed, Interest Arrears Postponed, Penalty Arrears Postponed, and Others Arrears Postponed. The UnApplied Credits section includes Amount Paid Today and Funds in RPA. The Installment Payments section includes Total Due. At the bottom, there is a navigation bar with buttons for Card, Change Pin, Cheque, Credit Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signatures, and Travellers Cheque. Below this bar are buttons for UDF, OK, Close, and Clear.

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 16] Type the loan account number for which the installment payment is to be made. The short name of the account holder is populated adjacent to the account number.
Account Ccy	[Display] The field displays the currency assigned to the product, under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.
Account Status	[Display] This field displays the status of the loan account.

Field Name	Description
Installment Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the installment mode from the drop-down list.</p> <p>Multiple repayment modes are possible for Loan Installment Payment. However, the modes are validated against the parameters defined at the Loans Product Master Level (Fast Path: LNM11) option. Following are the installment modes.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Cash • Local Cheque • Savings Transfer • GL Transfer
Outstandings	
Principal Balance	<p>[Display]</p> <p>This field displays the actual principal balance as on the date of installment payment, considering all dues were paid on time.</p>
Amount Disbursed Today	<p>[Display]</p> <p>This field displays the amount that is disbursed on the current date, if the loan is disbursed on the current date, i.e., on the date of Loan Installment Payment Inquiry. Else, this field will have zero value.</p>
Installment Arrears	<p>[Display]</p> <p>This field displays the total installment arrears that are outstanding in the loan account.</p> <p><i>Total Installment = Principal + Interest+Premium Arrears</i></p>
Other Arrears	<p>[Display]</p> <p>This field displays any other type of arrears that are due and not forming part of the Principal or interest arrears component. These dues could be Outgoing Arrears, Legal Fees, Insurance Premium arrears, Service Charge arrears etc. These arrears could be raised using Common Billing (Fast Path: BAM50) option.</p>
Premium Arrears	<p>[Display]</p> <p>This field displays the total insurance premium arrears that are outstanding in the loan account.</p>
Penalty Arrears	<p>[Display]</p> <p>This field displays the penalty arrears.</p> <p>The penalty interest is levied on the customer for the non-payment of the dues. It is basically the interest on arrears commonly known as IOA. The unpaid penalty interest arrears due but not paid is displayed.</p>

Field Name	Description
Compounding Interest Arrears	<p>[Display]</p> <p>This field displays the total of compounding interest arrears due and not paid.</p> <p>Note: Compounding Interest is an interest type which is defined when compounding interest is to be computed on the outstanding arrears.</p>
Diverting Interest Arrears	<p>[Display]</p> <p>This field displays the he total of diverting interest arrears due and not paid.</p> <p>Note: If the loan amount disbursed, is used by the customer for any purpose other than the purpose for which loan is disbursed, then the account is charged with diverting interest and is accounted for in diverting interest receivable GL and will be considered as a separate arrear type.</p>
UnBilled Penalty Interest	<p>[Display]</p> <p>This field displays the unbilled penalty interest.</p> <p>Unbilled Penalty Interest is the interest accrued on the loan account from the last penalty charging date till the current date. The Unbilled penalty interest till date due to late payment of arrears on the account is calculated online.</p>
Upto	<p>[Display]</p> <p>This field displays the system-generated date up to which the unbilled penalty interest is calculated.</p>
Arrears Postponed	
Principal Arrears Postponed	<p>[Display]</p> <p>This field displays the principal arrears that are due to be paid as on that day.</p>
Interest Arrears Postponed	<p>[Display]</p> <p>This field displays the sum of principal arrears and interest arrears.</p>
Penalty Arrears Postponed	<p>[Display]</p> <p>This field displays the penalty levied on the customer for nonpayment or late payment of arrears.</p>
Other Arrears Postponed	<p>[Display]</p> <p>This field displays other arrears like fees arrears, service charge arrears, insurance premium, etc. which are due as on date.</p>
Unapplied Credits	

Field Name	Description
Amount Paid Today	[Display] This field displays the amount paid today into the loan account by way of installment payment, advance payment, partial payoff or standing instruction from CASA account.
Funds in RPA	[Display] This field displays the funds in RPA. RPA stands for "Repayment Pending Appropriation". In loans module any amount paid towards repayment of the loan is first credited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.
Installment Payment	
Total Due	[Display] This field displays the total amount payable by the customer. <i>Total Due = Installment Arrears + Other Arrears + Penalty Arrears + UnBilled Penalty Interest + Compounding Interest Arrears + Diverting Interest Arrears.</i>

3. Enter the account number and press the <Tab> key.
4. Select the appropriate option from the **Installment Mode** drop-down list.

Loan Installment - Payment By Local Cheque

Installment payment can be made by Local Cheque mode. When installment payment for a loan is made by cheque, system accepts the cheque details such as Clearing type, Cheque No, Cheque Literal, Cheque Date, Routing No, Drawer Account No, and Chg Commission. It also displays Value Date, Late Clearing (Y/N), Bank, Branch and Sector. The cheque date has to be less than or equal to current date. If the cheque date is less than current date, the system will validate that the cheque has not crossed its stale period.

On the cheque being cleared, the unclear amount is reduced accordingly and the loan account credited.

Loan Installment - Payment By Transfer From Saving

Payment of Loan installment by transfer from a CASA account can be performed. The system validates that the CASA account entered is a valid account, without a block or debit block status. If the account is a liability account, system will not allow the account to go into negative balance. The CASA account gets debited to the extent of the installment payment and the same can be seen in the CASA statement inquiry. The loan account gets credited and the appropriation for the credit happens in EOD.

Field Description

Field Name	Description
GL Acct Ccy	<p>[Mandatory, Drop-Down]</p> <p>Select the currency assigned to the GL that is to be debited from the drop-down list.</p> <p>This currency can differ from the local currency of the bank and the account currency.</p>
GL Acct No	<p>[Mandatory, Pick List]</p> <p>Select the GL account, which will be debited for crediting the Loan account towards payment of the installment from the pick list.</p> <p>The system will display the name of the GL account in the adjacent field.</p>
Loans Acct Ccy Rate	<p>[Display]</p> <p>This field displays the rate of conversion used for converting the loan account currency to the local currency of the bank.</p>
GL Acct Ccy Rate	<p>[Display]</p> <p>This field displays the rate at which the GL account currency is converted to the local currency of the bank.</p> <p>The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p> <p>If the GL account currency and the local currency are same, the field takes the default value as 1, which cannot be modified.</p>
GL Acct Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the amount that will be debited to the GL account towards repayment of the Loan Installment, in GL currency.</p> <p>The amount will be calculated in the GL account currency.</p>

Field Name	Description
Acct Amount	<p>[Display]</p> <p>This field displays the amount, in Loan account currency, which will be credited to the loan account. The account amount is derived as follows :</p> $\text{Account Amount} = \text{Txn Amount} * \text{Txn Ccy Rate} / \text{Acct Ccy Rate}$ <p>The amount will be calculated in the account currency. The system posts the entries to the accounts in the account currency.</p> <p>If the local currency of the bank is different from the account currency of the customer, the amount entered in the Txn Amount field is converted to the account currency at the specified exchange rate. If the currency of the local bank and the account currency are the same, the amount in the Txn Amount field and the Account Amt field will be the same.</p> <p>Account currency is the currency assigned to the product at the product level, under which the account is opened.</p> <p>If the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency.</p>
Total Arrears	<p>[Display]</p> <p>This field displays the total amount of arrears that the customer has to pay. Irrespective of the amount entered in the Txn Amount field, the system will display the total arrears due as on the date of payment.</p>
Value Date	<p>[Mandatory, dd/mm/yyyy]</p> <p>Type the value date.</p> <p>Value date is the date from which the installment will be considered to be paid.</p>
User Reference No	<p>[Optional, Alphanumeric, 40]</p> <p>Type the user reference number.</p> <p>The user reference number is assigned to identify the transaction.</p> <p>This field is enabled or disabled depending on the profit booking being enabled or disabled for the particular transaction.</p>
Customer ID	<p>[Optional, Pick List]</p> <p>Select the ID of the customer from the pick list.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>

Field Name	Description
Narrative	[Optional, Alphanumeric, 40] Type the narration. This field displays the default narration, based on the transaction.

8. Click the **Ok** button.
9. The system displays the transaction sequence number message box. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. Click the **Ok** button.
10. The system displays the **Document Receipt** screen.
11. Select the receipt you want to print and click the **Ok** button.
OR
Click the **Cancel** button.

Note: If the installment mode is selected as **Cheque**, click and enter the relevant information in **Instrument Details**. For more information on **Instrument Details**, refer to the **Common Screens** option available in the **FLEXCUBE Introduction User Manual**.

1.28. 1066 - Loan Partial Payoff Inquiry

This option is used to prorate unbilled interest after **PPF**¹. Once the transaction is complete it will revert to the product level appropriation sequence. The appropriation sequence can be maintained only for principal arrear.

Repayment to the loan accounts is made as per the schedule of repayment. The schedule is structured in such a way that timely payment of installment will adjust the loan account at the end of loan tenor. Any amount which is more than the scheduled payment is utilized in further reducing the loan principal liability. Since Partial Payoff results in reduction in the outstanding principal, the loan account will get rescheduled on the lower principal base. When performing the partial payoff the teller can choose the reschedule option - as "Recalculate installment" or "Recalculate term". Accordingly a new schedule is generated in the EOD. Partial pay off transaction is allowed only if the check box **Allow PPF if there are unpaid arrears** is checked in **Product Master Maintenance** (Fast Path: LNM11). Thus, if there are unpaid arrears and this flag is not checked system will reject the transaction.

In case of partial payoff, it is possible to charge interest accrued till current date, i.e., upto the date the partial payoff transaction is performed. Further, if the value in the field Interest Accrual Frequency (Penalty) in Product Master Maintenance (Fast Path: LNM11) is set to Daily or Monthly even the penalty interest can be charged to the loan account.

The payoff benefit specifies when the effect of the payment should be reflected on the interest base.

The available options are:

- Immediate – The interest base is updated from the date of payment
- Next Rest period - The rest period is specified at the schedule setup (Fast Path: LNM98) and the interest base will be updated as per rest period specified in the schedule attached to the loan account
- Next due date - The interest base will be updated when the next installment falls due
- None - The interest base is not affected by the payment. This may be used in simple interest kind of loans

Partial payoff of loan can be made by cash, local cheque, transfer from CASA or GL transfer by using this option.

Multiple partial pay off is also allowed on the same day. The loan will be rescheduled in the end of the day batch on the net amount paid off during the day. Partial pay off can also be processed on loan where User Specified Repayment check box is checked in Installment Rules (FP: LNM43) and where the installment type is IPI. You can manually reschedule the loan through Account Schedule (FP: LN521) on any subsequent day after pay off transaction is processed.

Note: In the case of partial pay off done on a loan account **User Specified Repayment** check box enabled if the following logic is applied:

- 1) The amount paid off is first reduced from the subsequent principal repayment. So the principal repayment immediately following the partial pay off is reduced to the extent of amount paid off.
- 2) If the partial pay off is done for an amount more than the next principal repayment amount, then , the next principal amount will be fully adjusted towards partial pay off amount.
- 3) The difference will be covered from the following principal repayment and this will continue till the entire amount paid off is covered from future principal repayments. The term of the loan will

¹(Partial Pay-off: It is the payment of any principal amount before the same becomes due. The amount paid is less than the total amount of principal outstanding.)

remain unchanged. Future interest amount will be reworked as per the impact of partial pay off on principal repayments. If the user wishes to change the principal repayment date or amount manually after the partial pay off, the same can be done on the next day through **Account Schedule** (FP: LN521).

Definition Prerequisites

- BAM97 - Currency Codes Cross Reference
- LN057 - Loan Direct Account Opening
- LNM52 - Quote for Economic Cost
- The exchange rate values must be defined and downloaded
- Amount to be repaid should be greater than the due arrears

Modes Available

Not Applicable

To perform partial payoff of loan amount

1. Type the fast path **1066** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Transfer > Loan Partial Payoff Inquiry**.
2. The system displays the **Loan Partial Payoff Inquiry** screen.

Loans Partial Payoff Inquiry

The screenshot shows the 'Loans Partial Payoff Inquiry' window. It contains several sections with input fields:

- Account No. ***: Text input field.
- Account Coy. ***: Dropdown menu.
- Account Status ***: Dropdown menu.
- Partial Payoff Mode ***: Dropdown menu.
- Reschedule Mode ***: Dropdown menu.
- Apply Interest till Date**: Check box.
- Arrears Postponed**: Section with four input fields: Principal Arrears Postponed, Interest Arrears Postponed, Penalty Arrears Postponed, and Others Arrears Postponed.
- Outstandings**: Section with four input fields: Principal Balance, Total Arrears, UnBilled SC, and UnBilled Penalty Interest. There is also an 'Upto' field with a date picker.
- Uncharged Interest**: Section with one input field: UnBilled Interest. There is also an 'Upto' field with a date picker.
- Unapplied Credits**: Section with two input fields: Amount Paid Today and Funds in RPA.
- Partial Payoff**: Section with two input fields: Total Due and Minimum Amount For PPF.

At the bottom of the window, there is a navigation bar with buttons for 'UDF', 'OK', 'Close', and 'Clear'. Above these buttons, there are several tabs: Card, Change Pin, Cheque, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signature, and Travellers Cheque.

Field Description

Field Name	Description
Account No	<p>[Mandatory, Numeric, 16]</p> <p>Type the loan account number for which the partial payment is to be made.</p> <p>The short name of the account holder is populated adjacent to the account number.</p>
Account Ccy	<p>[Display]</p> <p>This field displays the currency assigned to the product, under which the account is opened.</p> <p>All the entries posted in the account are in the account currency.</p> <p>For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.</p> <p>This field is non-editable.</p>
Account Status	<p>[Display]</p> <p>This field displays the status of the loan account.</p>
Partial Payoff Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the partial payoff mode from the drop-down list.</p> <p>Multiple repayment modes are possible for Loan Partial Payoff Payment. Outstandings	
Principal Balance	<p>[Display]</p> <p>This field displays the actual principal balance on the date of partial payoff if all dues were paid on time.</p>
Total Arrears	<p>[Display]</p> <p>This field displays the total arrears due on the date of partial payoff excluding unbilled penalty interest.</p> <p><i>Total Arrears = principal arrears + interest arrears + fee arrears + legal fee arrears + premium arrears + outgoing arrears + penalty arrears + Penalty Interest Accrued + Unbilled Compounding Interest</i></p>

Field Name	Description
UnBilled SC	[Display] This field displays the unbilled service charge amount.
UnBilled Penalty Interest	[Display] This field displays the unbilled penalty interest. Unbilled Penalty Interest is the interest accrued on the loan account from the last penalty charging date till the current date. The Unbilled penalty interest till date, due to late payment of arrears on the account is calculated online.
Upto	[Display] This field displays the system-generated date up to which the unbilled penalty interest is calculated.
Uncharged Interest	
UnBilled Interest	[Display] This field displays the interest from the last due date to the date of partial repayment of loan. This field will populate value only when the Apply Interest Till Date check box is selected.
Upto	[Display] This field displays the date up to which unbilled interest is calculated. This field will populate value only when the Apply Interest Till Date check box is selected.
Unbilled Compounding Interest	[Display] This field displays the unbilled compounding Interest from the last charging date till date.
	Note: There is no accrual for compounding interest, but this field is a dynamic calculation done for display purpose only.
UnApplied Credits	
Amount Paid Today	[Display] This field displays the amount paid today into the loan account by way of installment payment, advance payment, partial payoff or standing instruction from CASA account.
	Note: If the execution of drawdown instruction happens in EOD/BOD, this field will not show the amount credited to loan account through drawdown, as appropriation will happen simultaneously. Only the outstanding amount will reflect the reduced amount.

Field Name	Description
Funds in RPA	<p>[Display]</p> <p>This field displays the funds in RPA.</p> <p>RPA stands for “Repayment Pending Appropriation”. In loans module any amount paid towards repayment of the loan is first credited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.</p>
Partial Payoff	
Total Due	<p>[Display]</p> <p>This field displays the total amount due by the customer.</p> <p><i>Total Due = Installment Arrears + Other Arrears + Penalty Arrears + UnBilled Penalty Interest</i></p>
Minimum Amount for PPF	<p>[Display]</p> <p>This field displays the minimum amount to be paid for a PPF over and above the pending dues. This value = Minimum Installments of PPF (as in LNM11) * EMI Amount.</p>

3. Type the account number.
4. Select the appropriate option from the **Partial Payoff Mode** drop-down list.
5. Select the reschedule mode from the drop-down list.

Loan Partial Payoff By Cash

Partial Payoff payment can be made by Cash mode. Partial payment indicates that part of the principal amount due, over and above the arrears due is paid off. This is followed by rescheduling of the loan as part of EOD process. The cash payment for an account will update the teller balance in that currency. The payment may be in a currency different from the account currency.

 Type the narration.
 This field displays the default narration, based on the transaction.

Loan Partial Payoff By Local Cheque

Partial Payoff payment can be made by Local Cheque mode. Partial payment indicates that part of the principal amount due, over and above the arrears due is paid off. This is followed by rescheduling of the loan as part of EOD process. When Partial Payoff payment for a loan is made by cheque, system accepts the cheque details such as the instrument number, routing number, the clearing type and amount. The uncleared amount of the loan is updated and the cheque is sent for clearing. The cheque date has to be less than or equal to current date. If the cheque date is less than current date the system will validate that the cheque has not crossed its stale period.

On the cheque being cleared, the uncleared amount is reduced accordingly and the loan account is credited.

Loan Partial Payoff By Transfer From Saving

Partial Payoff by transfer from a CASA account can be performed. The system validates that the CASA account entered is a valid account. If the account is a liability account, system will not allow the account to go into debit balance. The CASA account gets debited to the extent of the Partial Payoff payment and the same can be seen in the CASA statement inquiry. The loan account gets credited and the appropriation for the credit happens in EOD.

Field Name	Description
Customer ID	[Optional, Pick List] Select the ID of the customer from the pick list. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.
Narrative	[Optional, Alphanumeric, 40] Type the narration. This field displays the default narration, based on the transaction.

10. The system displays the transaction sequence number message box. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.
11. Click the **Ok** button.
12. The system displays the **Document Receipt** screen.
13. Select the receipt you want to print and click the **Ok** button.
OR
Click the **Cancel** button.

Note: For information on **Instrument Detail** and **Cheque Detail** refer to the **FLEXCUBE Introduction User Manual**.

Examples of calculating the penalty for a Partial Payoff transaction:

As mentioned above following are the options or methods of calculating the Penalty Interest for a Partial Payoff transaction:

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.	
Assume a Loan account with the following status :	
Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrears till date)
PPF Penalty Rate	5%
Total Arrears	INR 22820.00
Partial Payoff amount paid	INR 46000.00

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

The arrears will first be appropriated against the payment of INR 46000.00, i.e., $46000 - 22820 = \text{INR } 23180.00$ - Assuming Partial Payoff Penalty @ 5% (Amount Based method) will be calculated as $23180 * 5/105 = \text{INR } 1103.81$

The residual amount of the Partial Payoff less the Penalty amount (A-B) will be appropriated against the principal outstanding – i.e. $23180 - 1103.81 = \text{INR } 22076.19$

On Amount + Term - Penalty is charged as x% p.a. for the remaining period.

1. Term is considered in days instead of months. So total term would be 242 days and remaining term would be 211 days.
2. Discounting factor should not be rounded off. Penalty amount should be rounded at the end.
3. Unbilled Penalty arrears should not be subtracted from PPF amount.

The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

Assume a Loan account with the following status

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrears till date)
PPF Penalty Rate	5%
Total Arrears	INR 22820.00
Partial Payoff	INR 46000.00

The appropriation will be done as under

The arrears will first be appropriated against the payment of INR 46000.00, i.e., $46000 - 22820 = \text{INR } 23180.00$ - Assuming Partial Payoff Penalty @ 5% (Amount + Term Based method assuming the total term of the loan was 60 months and the remaining period of loan is 42 months, the rate discounting factor is $42/60 = 1278.35/1826.21 = 0.7$ and the rate is $5 * 0.7$ i.e. 3.5%) Thus the calculation will be $23180 * 3.5/103.5 = \text{INR } 783.86$

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

The residual amount of the Partial Payoff less the Penalty amount (A-B) will be appropriated against the principal outstanding – i.e. 23180-783.86 = INR 22396.14

Example 02: Economic cost applicability during partial payment:

Consider the Outstanding Amount : AUD 100,000

Monthly Equivalent Installment: AUD 4300

Threshold Fixed Amount: AUD 20000

Threshold Amount : 24300 AUD (Fixed Amount + one installment)

Installment Date	Contracted Installment	Advance payment paid by customer	Excess payment	Cumulative amount	Amount on which economic cost is computed	Economic Cost applicable	Description
1/1/2009	4300	14300	10000	10000		N	
1/2/2009	4300	24300	20000	30000	10000	Y	Economic cost will be computed on the cumulative partial payment amount (AUD 30000) – threshold fixed amount (AUD 20000).
1/3/2009	4300	4300	0	0	0		

Installment Date	Contracted Installment	Advance payment paid by customer	Excess payment	Cumulative amount	Amount on which economic cost is computed	Economic Cost applicable	Description
1/4/2009	4300	19300	15000	15000	15000	Y	Since the customer has already utilised the threshold, the economic cost will be levied on every subsequent prepayment
1/5/2009	4300	4300	0	0	0		
1/6/2009	4300	13300	9000	0	9000	Y	Since the customer has already utilised the threshold, the economic cost will be levied on every subsequent prepayment

1.29. 1068 - Loan Advance Payment Inquiry

Using this option, part of a loan installment called as advance amount due in the future may be paid by a customer.

This screen validates that the payment amount totals more than the arrears due. The additional amount is held in reserve in the RPA account till the next arrears are due.

The customer may choose to pay one or more installments due in advance. Benefit for such prepayment can be given by the bank, if the interest base is set to Include Advances. The same is defined in the Interest Rules (Fast Path: LNM41) option attached to the schedule linked to the loan account. In such case this RPA amount will be deducted from the outstanding principal and then interest computed.

The advance payment of loan installments can be paid by cash, local cheque, transfer from CASA or GL transfer by using this option.

Definition Prerequisites

- BAM97 - Currency Codes Cross Reference
- LN057 - Loan Direct Account Opening
- LNM52 - Quote for Economic Cost
- The exchange rate values must be defined and downloaded
- Amount to be repaid should be greater than the due arrears

Modes Available

Not Applicable

To inquire on loan advance payment

1. Type the fast path **1068** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Transfer > Loan Advance Payment By Transfer From Savings** .
2. The system displays the **Loan Advance Payment Inquiry** screen.

Field Description

Field Name	Description
Txn Ccy	[Mandatory, Drop-Down] Select the transaction currency from the drop-down list. This is the currency in which the transaction has to be done. While posting the transaction entries to the account, the transaction currency is converted into the account currency, based on the defined transaction rate.
Acct Ccy Rate	[Display] This field displays the rate of conversion used for converting the loan account currency to the local currency of the bank.

Field Name	Description
Txn Ccy Rate	<p>[Display]</p> <p>This field displays the rate at which the transaction currency is converted to the local currency of the bank.</p> <p>The teller's right to change the transaction currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p> <p>If the transaction currency and the local currency are same, the field takes the default value as 1, which cannot be modified.</p>
Txn Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the transaction amount.</p> <p>The system will display the total due amount, i.e., the sum of Total Arrears + Unbilled Penalty Interest + Total Installment (Advance installment) Amount. The teller may modify this amount by reducing the default amount but the amount should be greater than the sum of Total Arrears + Unbilled Penalty Interest.</p> <p>This is the cash amount that is being paid as Advance Payment.</p> <p>The amount is entered in the transaction currency for depositing cash. The cash deposit amount is converted into the account currency, using the transaction currency rate and account currency rate.</p>
Economic Cost	<p>[Display]</p> <p>This field displays the economic cost applicable for the fixed rate loans.</p>
Advance Payment Amt	<p>[Display]</p> <p>This field displays the amount that will be paid in cash by the customer as an advance towards the loan.</p> <p>This amount is calculated in the account currency.</p>
Customer ID	<p>[Optional, Pick List]</p> <p>Select the ID of the customer from the pick list.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
User Reference No	<p>[Optional, Alphanumeric, 40]</p> <p>Type the user reference number.</p> <p>The user reference number is assigned to identify the transaction.</p>

Field Name	Description
Narrative	[Mandatory, Alphanumeric, 40] Type the narration. This field displays the default narration, based on the transaction.

Loan Advance Payment By Local Cheque

Advance payment can be made by Local Cheque mode. When Advance Payment for a loan is made by cheque, system accepts the cheque details such as Clearing type, Cheque No, Cheque literal, Cheque Date, Routing No, Drawer Account No, and Chg Commission. It also displays Value Date, Late Clearing (Y/N), Bank, Branch and Sector. The cheque date has to be less than or equal to current date. If the cheque date is less than current date, the system will validate that the cheque has not crossed its stale period.

On the cheque being cleared, the uncleared amount is reduced accordingly and the loan account credited.

Loan Advance Payment By Transfer From Savings

Advance Payment by transfer from a CASA account can be performed. The system validates that the CASA account entered is a valid account, without a block or debit block status. If the account is a liability account, system will not allow the account to go into negative balance. The CASA account gets debited to the extent of the Advance payment and the same can be seen in the CASA statement inquiry. The loan account gets credited and the appropriation for the credit happens in EOD.

1.30. 1074 - Loan Settlement Payout

A customer has to pay fees and contribution amount on the sanctioned undisbursed loan amount. Any contribution amount received towards a loan account is credited in the Settlement Payout GL. Using this option you can debit the Settlement Payout GL and credit the respective Liability GL's (E.g. Stamp duty, Registration Fees etc.). In case of Stamp duty and Registration Fees, the funds are remitted to the authorities at a later point (i.e. post disbursement), until then the amount resides in the Settlement Payout GL and the customer enjoys interest benefit on this amount. The interest benefit is provided only during the Variable interest rate period. The Stamp Duty or Registration Fees or any other fees can be a part of the contribution amount or the loan amount.

Note: The contribution amount (if any) available under the Settlement Payout GL is not eligible for a redraw.

Definition Prerequisites

- LN521 - Account Schedule
- 8051 - CASA Account Opening

Modes Available

Not Applicable

To perform loan settlement

1. Type the fast path **1074** and click **Go** or navigate through the menus to Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Loan Settlement Payout.
2. The system displays the **Loan Settlement Payout** screen.

Payment Details

Bank Code	[Mandatory, Drop-Down] Select the bank / issuer on which the BC is drawn from the drop-down list. The list of banks on which BCs can be issued are maintained in the Issuer Maintenance (Fast Path: BAM09) option. Normally banks issue BCs drawn on them.
------------------	---

Field Name	Description
Txn Ccy	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate transaction currency from the drop-down list.</p> <p>This field, by default, displays the account currency as the transaction currency.</p> <p>This is the currency in which the transaction will take place.</p> <p>While posting the transaction entries to the account, the transaction currency is converted into the account currency and for posting the GL entries it is converted into the local currency of the bank.</p>
Acct Ccy Rate	<p>[Display]</p> <p>This field displays the rate at which the account currency is converted to the local currency of the bank.</p> <p>The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p> <p>If the account currency and the local currency are the same, the field takes a default value as 1, which cannot be modified.</p>
Tcy Rate	<p>[Display]</p> <p>This field displays the rate at which the transaction currency is converted to the local currency of the bank.</p> <p>The teller's right to change the transaction currency rate is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p>
Charges (Acy)	<p>[Display]</p> <p>This field displays the charges levied by the bank on whom the BC is issued for the transaction. The charges will be denominated in the local currency of the bank.</p> <p>The service charge codes are added and maintained in the Service Charge Code Maintenance (Fast Path: BAM14) option. The service charges can be attached at the product level, transaction mnemonic level or at the issuer maintenance level.</p> <p>The system displays the total of all the service charges if more than one SC code is attached to the transaction.</p> <p>The user has the flexibility to modify/nullify the charges. This can be done by clicking on the Service Charge Details link where the default service charges can be suitably modified.</p>
Cheque Amount (Acy)	<p>[Display]</p> <p>This field displays the net disbursement amount for which the BC is issued in account currency after deduction of charges.</p>

Field Name	Description
Cheque Amount (Tcy)	<p>[Display]</p> <p>This field displays the net disburseable amount in cheque currency.</p>
Cheque Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Type the cheque issue date or select it from the pick list.</p> <p>This field, by default, displays the posting date as the date on which the BC is issued.</p>
Serial No.	<p>[Display]</p> <p>This field displays the serial number.</p> <p>For a remittance instrument such as a BC or a DD, at the time of issue, the system generates a serial number comprising the branch code, instrument type and a running serial number.</p> <p>The serial number for each instrument type is maintained separately and on reversal of an instrument issue, the instrument serial number will not be reused for the next instrument issue.</p> <p>When an instrument comes for clearing, it may be referred by the MICR number, and Routing number which needs to be maintained for each instrument, if it is expected to come through an inward clearing batch. If an instrument is liquidated by the teller, the instrument serial number is sufficient, as this is the number by which FLEXCUBE tracks the instrument uniquely.</p>
Micr No	<p>[Mandatory, Numeric, 12]</p> <p>Type the MICR number of the Banker's Cheque. This is a number pre-printed on the instrument.</p> <p>For every remittance instrument it is necessary to maintain a MICR number that is printed on the instrument if the instrument is expected to come for clearing through inward clearing. A cross reference is maintained using the Instrument MICR Number (Fast Path: STM57) option with the system generated serial number, so that the instrument can be tracked by the system whether it is liquidated or enquired upon by MICR number or the serial number.</p>

Field Name	Description
Routing No	<p>[Display]</p> <p>This field displays the routing number against which the cheque has been drawn.</p> <p>The routing number is the combination of the bank code and the branch code.</p> <p>The combination can be obtained from the Routing Branch Maintenance (Fast Path: STM54) option.</p> <p><i>Routing Number = Sector Code / Bank Code + Branch Code</i></p> <p>For a cheque deposited, this routing number is used by the system to determine the float days and thus the value date of the instrument.</p> <p>For an inward clearing cheque this routing number should belong to the bank. The order, in which the codes in the routing number are to be entered, is determined by the set up at the Settlement Bank Parameters (Fast Path:STM59) option.</p>
Beneficiary Name	<p>[Mandatory, Alphanumeric]</p> <p>Type the name of the beneficiary for the BC.</p>
Passport / IC No	<p>[Mandatory, Alphanumeric, 30]</p> <p>Type the passport or IC number of the beneficiary.</p> <p>This is an identification collected from the beneficiary of the BC at the time of liquidation.</p>
Beneficiary Addr	<p>[Mandatory, Alphanumeric, 35]</p> <p>Type the contact address of the beneficiary.</p> <p>This is normally needed for record purpose and is provided as additional information.</p>
User Reference No	<p>[Optional, Alphanumeric, 40]</p> <p>Type the user reference number assigned to identify the transaction.</p>
Narrative	<p>[Optional, Alphanumeric, 40]</p> <p>Type the narration.</p> <p>By default, the system displays LN. Settlement Payout to Cheque.</p>

Transfer GL/ CASA Details	
Account No	[Mandatory, Pick List] Select the GL code from which the amount is to be transferred, from the pick list. The GL description is displayed in the adjacent field.
Acct Ccy	[Display] The field displays the account currency.
Txn Ccy	[Display] The field displays the transaction currency.
Acct Ccy Rate	[Display] The field displays the rate at which account currency is converted to transaction currency.
Txn Ccy Rate	[Display] The field displays the transaction currency rate.
Narration	[Optional, Alphanumeric, 40] Type the narration. By default, the system displays LN. Settlement Payout to GL.

9. Click the **Ok** button.
10. The system displays the message "Authorisation Required. Do you want to continue?". Click the **OK** button.
11. The system displays the **Authorization Reason** screen.
12. Enter the relevant information and click the **Grant** button.
13. The system displays the transaction sequence number. The transaction number is a system generated number that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. Click the **Ok** button.

1.31. 1102 - Loan Subsidy Installment Payment Inquiry

Using this option you can make full or partial repayment of subsidy arrear to the accounts. Repayment of amount greater than the arrear amount is not allowed. Additionally you can perform the installment payment through the Installment Payment Inquiry (Fast Path: 1065) option, however, the installment amount will not include the Subsidy arrears.

Definition Prerequisites

- LN057 - Loan Direct Account Opening

Modes Available

Not Applicable

To repay subsidy arrears

1. Type the fast path **1102** and click **Go** or navigate through the menus to Transaction Processing > Account Transactions > Loan Account Transactions > Transfer > Loan Subsidy Installment Payment Inquiry.
2. The system displays the **Loan Subsidy Installment Payment Inquiry** screen.

Field Description

Field Name	Description
Account No	<p>[Mandatory, Numeric, 16]</p> <p>Type the loan account number for which the arrear re payment is to be made.</p> <p>The short name of the account holder is populated adjacent to the account number.</p>
Account Ccy	<p>[Display]</p> <p>This field displays the currency assigned to the product, under which the account is opened.</p> <p>All the entries posted in the account are in the account currency. For example, if the currency assigned to a Loan product is USD, the account opened under that product has USD as its account currency, by default.</p>
Installment Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the installment mode from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none">• Savings Transfer• GL Transfer
Arrear Type	<p>[Display]</p> <p>This field displays the arrear type to be paid by the customer. By default, the Subsidy option is displayed.</p>
Outstandings	
Principal Balance	<p>[Display]</p> <p>This field displays the actual principal balance as on the date of installment payment, considering all dues were paid on time.</p>
Amount Disbursed Today	<p>[Display]</p> <p>This field displays the amount that is disbursed on the current date, if the loan is disbursed on the current date, i.e., on the date of Loan Subsidy Installment Payment Inquiry. Else, this field will have zero value.</p>
Installment Arrears	<p>[Display]</p> <p>This field displays the total installment arrears that are outstanding in the loan account.</p> <p><i>Total Installment = Principal + Interest</i></p>
Premium Arrears	<p>[Display]</p> <p>This field displays the premium arrears.</p>

Field Name	Description
Subsidy Arrears	[Display] This field displays the subsidy arrears.
Penalty Arrears	[Display] This field displays the penalty arrears. The penalty interest is levied on the customer for the non-payment of the dues. It is basically the interest on arrears commonly known as IOA (Interest on Arrears). The unpaid penalty interest arrears due but not paid is displayed.
UnBilled Penalty Interest	[Display] This field displays the unbilled penalty interest. Unbilled Penalty Interest is the interest accrued on the loan account from the last penalty charging date till the current date. The Unbilled penalty interest till date due to late payment of arrears on the account is calculated online.
Upto	[Display] This field displays the system-generated date up to which the unbilled penalty interest is calculated.
Unapplied Credits	
Amount Paid Today	[Display] This field displays the amount paid today into the loan account by way of installment payment, advance payment, partial payoff or standing instruction from CASA account.
Funds in RPA	[Display] This field displays the funds in RPA. In loans module any amount paid towards repayment of the loan is first credited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.
Subsidy Arrear Payments	
Total Due	[Display] This field displays the total amount payable by the customer. <i>Total Due = Installment Arrears + Other Arrears + Penalty Arrears + UnBilled Penalty Interest</i>

3. Enter the loan account number and press the <Tab> key.
4. Select the installment mode from the drop-down list.
5. Click the **Ok** button.
6. The system displays the message "Do You want to continue".

7. Click the **Ok** button.
8. Depending up on the option selected from **Installment Mode** drop-down list, the system displays the relevant transaction screen.
9. Enter the relevant information.

Customer ID	[Optional, Alphanumeric, 10, Pick List] Type the customer id or select it from the pick list.
Narrative	[Mandatory, Alphanumeric, 40] Type the narration. By default, it displays the narration, based on the transaction.

10. Click the **Ok** button.
11. The system displays the message "Authorisation Required. Do You want to continue?". Click the **OK** button.
12. The system displays the **Authorisation Reason** screen.
13. Enter the relevant information and click the **Grant** button.
14. The system displays the transaction sequence number. The transaction number is a system generated number that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. Click the **Ok** button.

Note: For information on Authorisation transactions, refer to the *Oracle FLEXCUBE Introduction User Manual*.

1.32. 1430 - Backdated Refund Of Transaction

Using this option backdated reversal of installment can be done. It facilitates reversal of installment received in the account through GEFU upload, or repayment of installments from front end options, provided it is the last credit transaction in the account.

Also the backdated reversal is supported beyond the last charging date. The system will support reversal of back dated transactions only if any of the events mentioned below have not occurred between the process date and the value date:

- Reschedule
- Restructure
- Rate Change
- Top Up loan Disbursement
- Partial pay off
- Subsequent disbursement
- Credit in the loan account other than the installment payment including the advance payment.

FCR will not allow EFS, PPF², rate change, reschedule, restructure, top up disbursement, subsequent disbursement on the day on which backdated installment transaction is executed. Backdated reversal of cheque in clearing will not be allowed even if the funds are available in loan account on the cheque posting date. However after the cheque has been cleared, the back dated reversal will be allowed. The reversal of installment executed through this maintenance can be reversed before EOD through the Electronic Journal (Fast Path: 6006) option.

²(Partial Pay-off: It is the payment of any principal amount before the same becomes due. The amount paid is less than the total amount of principal outstanding.)

1.33. FCR does not support backdated refunds for Drawdown and SI.

Definition Prerequisites

- 8053 - Customer Addition
- LN057 - Loan Direct Account Opening

Modes Available

Not Applicable

To refund backdated transaction

1. Type the fast path **1430** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > CASA Account Transactions > Transfer > Backdated Refund To CASA**.
2. The system displays the **Backdated Refund Of Transaction** screen.

4. Loan Enquiries

1.34. 7026 - Loans Balance Inquiry

Using this option you can inquire about loan account details such as account status, the maturity date (final date of installment) and the next installment date. For the given account, loan account outstanding, arrears details, uncleared funds and available balance are also displayed.

In addition the screen also displays the arrears postponed details and unapplied credit details.

Definition Prerequisites

- LN057 - Loan Direct Account Opening

Modes Available

Not Applicable

To inquire balance of the loan account

1. Type the fast path **7026** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Inquiries > Loans Balance Inquiry** .
2. The system displays the **Loans Balance Inquiry** screen.

Loans Balance Inquiry

The screenshot displays the 'Loans Balance Inquiry' window. At the top, there are input fields for 'Account No.', 'Account Ccy.', 'Account Status', 'Maturity Date', 'Next Due Date', and 'Next Installment Due'. Below these are several summary sections:

- Outstandings:** Includes fields for Principal Balance, Amount Disbursed Today, Installment Arrears, Other Arrears, Compounding Interest Arrears, Diverging Interest Arrears, Penalty Arrears, Unbilled Penalty Interest, and Unbilled SC. To the right are fields for Unbilled Principal Balance, Future Interest #, Min. Amount Due, and Uncollected Interest. A note indicates '# Indicates field for Islamic Loan'.
- Arrears Postponed:** Includes fields for Principal Arrears Postponed, Interest Arrears Postponed, Penalty Arrears Postponed, and Other Arrears Postponed.
- UnApplied Credits:** Includes fields for Amount Paid Today and Funds in RPA.
- Unbilled Interest:** Includes fields for Unbilled Interest, Penalty Interest Accrued, and Unbilled Compounding Interest.
- Current Balance:** Includes fields for Total OutStandings, Uncleared Funds, and Available Balance.

At the bottom, there is a navigation bar with buttons for 'Card', 'Change Pin', 'Cheque', 'Cost Rate', 'Denomination', 'Instrument', 'Inventory', 'Pin Validation', 'Service Charge', 'Signature', and 'Travellers Cheque'. Below this are buttons for 'U2F', 'OK', 'Close', and 'Clear'.

Field Description

Field Name	Description
Account No	<p>[Mandatory, Numeric, 16]</p> <p>Type the appropriate loan account number for which you want to view the loan account balance. The name of the Loan account holder is populated, adjacent to the account number.</p>
Account Ccy	<p>[Display]</p> <p>This field displays the currency assigned to the product at the product level, under which the account is opened.</p> <p>All the entries posted in the account are in the account currency. The exchange rate values must be defined and downloaded.</p> <p>For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.</p>
Account Status	<p>[Display]</p> <p>This field displays the status of the loan account.</p> <p>The options are:</p> <ul style="list-style-type: none">• Closed• Blocked• Closed Today• Open Today• Dormant• Regular• Written Off• Paid Off• Cheque Pending Settlement• Product Transferred Out• Transferred Out• Partially Discharged• Fully Discharged
Maturity Date	<p>[Display]</p> <p>This field displays the final date for installment payment for the loan, i.e., the date on which the loan account will mature.</p>
Next Due Date	<p>[Display]</p> <p>This field displays the next due date from the current system date for payment of the loan installment.</p>

Field Name	Description
Next Installment Due	[Display] This field displays the next installment amount which will be due as per the next due date.
Outstandings	
Principal Balance	[Display] This field displays the principal balance on the date of Loan balance inquiry if all dues were paid on time. In other words the amount displayed will be the schedule balance as on the date of inquiry not including any unpaid arrears.
Unbilled Principal Balance	[Display] This field displays the unbilled principal balance. This field indicates the Unbilled Principal Balance of the loan account.
Amount Disbursed Today	[Display] This field will display the amount that is disbursed on the current date, if the Loan balance inquiry is done on the date when the loan was disbursed.
Future Interest	[Display] This field displays the future interest for syariah accounts, i.e., Add On Loan check box is selected in the Loan Product Master (Fast Path: LNM11) option. For other loans this field displays zero amount. The future interest is calculated as below: <i>Future Interest = Total of all future interest installments that will be due after the process date – uncollected interest.</i>
Installment Arrears	[Display] This field displays the total installment arrears that are outstanding in the loan account. Installment arrears will comprise of only the Principal and Interest arrears. <i>Installment Arrears = Principal + Interest</i>
Min. Amount Due	[Display] This field displays the minimum amount due for the revolving loan for the specified period. In case of term loans, this field displays the installment amount.
Other Arrears	[Display] This field displays the other arrears to be paid in the account. Other arrears would include arrears like Fee arrears, Premium arrears, Outgoing arrears, Legal fee arrears, etc.

Field Name	Description
Compounding Interest Arrears	<p>[Display]</p> <p>This field displays the total of compounding interest arrears due and not paid.</p> <p>Note: Compounding interest is an interest type which is defined when compounding interest is to be computed on the outstanding arrears.</p>
Diverting Interest Arrears	<p>[Display]</p> <p>This field displays the total of diverting interest arrears due and not paid.</p> <p>Note: If the loan amount disbursed, is used by the customer for any purpose other than the purpose for which loan is disbursed, then the account is charged with diverting interest and is accounted for in diverting Interest receivable GL and will be considered as a separate arrear type.</p>
Uncollected Interest	<p>[Display]</p> <p>This field displays the uncollected interest amount.</p>
Penalty Arrears	<p>[Display]</p> <p>This field displays the penalty interest amount due on the loan account for the non-payment of the dues.</p>
UnBilled Penalty Interest	<p>[Display]</p> <p>This field displays the unbilled penalty interest amount.</p> <p>Unbilled Penalty Interest is the penalty interest accrued on the loan account from the last penalty charging date till the current date. The same is calculated online as on the date of loan balance inquiry.</p>
UnBilled SC	<p>[Display]</p> <p>This field displays the unbilled service charge amount.</p>
Arrears Postponed	
Principal Arrears Postponed	<p>[Display]</p> <p>This field displays all the principal arrears that are due to be paid as on that day</p>
Interest Arrears Postponed	<p>[Display]</p> <p>This field displays the sum of postponed interest arrears.</p>
Penalty Arrears Postponed	<p>[Display]</p> <p>This field displays the penalty which is levied on customer for non payment or late payment of arrears.</p>

Field Name	Description
Other Arrears Postponed	[Display] This field displays other arrears like fees arrears, service charge arrears, insurance premium etc which are due as on date.
UnApplied Credits	
Amount Paid Today	[Display] This field displays any amount paid today, i.e., current date into the loan account by installment payment, advance payment, partial payoff or standing instruction.
Funds in RPA	[Display] This field displays the amount in RPA GL. Any amount which is paid to the credit of the loan account is always routed or credited to the RPA account. The same is appropriated at EOD. If the amount paid into the loan account is in excess of the arrears due, the credit balance will be reflected in RPA. RPA is a liability type GL. Generally Loan Advance Payment amounts are shown in RPA.
Unbilled Interest	
Unbilled Interest	[Display] This field displays the unbilled interest. Unbilled Interest is the interest accrued on the loan account from the last interest charging date till the current date.
Penalty Interest Accrued	[Display] This field displays the total of penalty interest accrued on the loan account if the value in the field Interest Accrual Frequency (Penalty) in Product Master Maintenance (Fast Path: LNM11) is not set to None .
Unbilled Compounding Interest	[Display] This field displays the unbilled compounding interest from the last charging date till date.
Note: There is no accrual for compounding interest, this field is only a dynamic calculation for display purpose.	
Current Balance	
Total Outstanding	[Display] This field displays the total of all the outstanding in the loan account. <i>Total Outstanding = Principal Balance + Installment Arrears + other Arrears + Penalty Arrears - Amount Paid Today - Funds in RPA + Penalty Interest Accrued + Unbilled Compounding Interest</i>

Field Name	Description
Uncleared Funds	[Display] This field displays the uncleared funds. Any amount paid by clearing cheque by the customer into the loan account, but pending clearance of the cheque, such unclear cheque deposit amounts are displayed in this field.
Available Balance	[Display] This field displays the available balance. This field indicates the available balance in the cash card, i.e., Revolving loan.

3. Enter the account number and press the **<Tab>** key.
4. Click the **Ok** button.
5. The system displays the loan account balance details.
6. Click the **Close** button.

1.35. BA460 - Loan Employee Account Inquiry

Using this option you can enquire about the loans disbursed to employees. The system provides details of the loan account like account status, sanctioned amount, disbursed amount, outstanding principal, installment arrears, next due date, etc.

Definition Prerequisites

- BAM81 - Company Master Maintenance

Modes Available

Not Applicable

To inquire about the employee loan account

1. Type the fast path **BA460** and click **Go** or navigate through the menus to **Global Definitions > Master > Loan Employee Account Inquiry**.
2. The system displays the **Loan Employee Account Inquiry** screen.

1.36. BAM49 - Reminders History Inquiry

Payment of the loan installment is the prime concern of any bank. At times the banks may require to remind its customers, who have defaulted to repay the installments on the due dates and the payment becomes overdue.

As per the **Reminder Plan**³ Maintained in the system reminders or notices to the borrowers and guarantors reminding them about the installment payment are sent.

Using this option you can view the history of reminders sent for the selected account.

Definition Prerequisites

- BAM44 - Reminder Plan Maintenance

Modes Available

Not Available

To inquire about the reminder history

1. Type the fast path **BAM49** and click **Go** or navigate through the menus to **Global Definitions > Master > Reminders History Inquiry**.
2. The system displays the **Reminders History Inquiry** screen.

³(It is a plan for generating reminders to be sent to customers when arrears are not paid. A reminder plan can be linked to one or more products.)

Account Details

Account No

[Mandatory, Numeric,16]

Type the loan account number for which the inquiry is to be made.

The account must be in regular- open status. Inquiry will result in a failure, if a closed, written off account is entered for inquiring. Inquiry will be allowed for accounts with status- closed today.

Arrear Type

[Mandatory, Drop-Down]

Select the arrear type for which Inquiry is to be made from the drop-down list.

The drop-down lists all the arrear types row wise.

Field Name	Description
Start Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the start date to inquire upon an arrear repayment from the pick list.</p> <p>The start date can be a back date, but greater than account opening date/disbursement date. The start date can also be current FCR process date, but can never be a future date.</p>
End Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the end date till which inquiry is made from the pick list.</p> <p>The end date can be current FCR process date. The end date can be equal to or greater than start date, but can never be a future date, greater than the current FCR process date.</p>

Column Name	Description
Arrear Type	<p>[Display]</p> <p>This field displays the arrear type which is being inquired.</p>
Arrear Due Date	<p>[Display]</p> <p>This field displays the date on which the respective arrear is raised.</p>
Arrear Amount Due	<p>[Display]</p> <p>This field displays the arrear due on the loan as on the process day for the respective arrear type applicable.</p> <p>The arrear due amount will be the arrear amount due as on last BOD + debit adjustments done during the day (common billing, ad hoc int charging, interest adjustment) - credit adjustments done during the day (fee waiver, interest adjustment)</p> <p>If partial pay off is executed on the loan during the day, the total of partial pay off penalty amount that will be recovered will be displayed as PPF⁴ penalty arrear due</p> <p>Accrued interest (regular, penalty and compounding) will be displayed as of EOD.</p>
Arrear Paid	<p>[Display]</p> <p>This will be the amount repaid for the respective arrear type. If multiple repayments are done against a single arrear (raised on a particular date), multiple rows will be displayed reflecting the repayment. In such cases, the arrear type, arrear due date will be repeated.</p>

⁴(Partial Pay-off: It is the payment of any principal amount before the same becomes due. The amount paid is less than the total amount of principal outstanding.)

Column Name Description

Date of Repayment [Display
 This field displays the repayment done by the customer arrear type wise.
 In cases where a single installment paid by customer has gone towards repaying off many arrear types/raised on different dates, the date of repayment will be reflected as the same date.

3. Enter the account number and press the <Tab> key.
4. Select the arrear type from the drop-down list.
5. Select the start date and end date from the pick list.

Repayment Inquiry

1.41. LN026 - Loan Agreement Balance Inquiry

A customer interested in availing the loan products offered by the bank enters into an agreement with the bank before opening an account. An agreement formalizes the customer's acceptance of the bank's terms and conditions. A customer can open multiple loan accounts to avail different repayment plans and options under the same agreement. This eliminates the submission of multiple applications for multiple accounts and also increases efficiency.

Once the agreement number is created for a customer, all loan accounts opened under the agreement are linked together but the processing is done separately for each account. Using this option, you can view the balance details for each loan account linked through the common agreement number. You can view details such as Loan Balance, Installment Amount, Total Arrears and Total Outstanding for each loan.

Definition Prerequisites

- LN057 - Loan Direct Account Opening

Modes Available

Not Applicable

To view loan account balance details

1. Type the fast path **LN026** and click **Go** or navigate through the menus to Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Loan Agreement Balance Inquiry.
2. The system displays the **Loan Agreement Balance Inquiry** screen.

Loan Agreement Balance Inquiry

Field Description

Field Name	Description
Customer Information	
Agreement No	[Mandatory, Numeric,16] Type the agreement number to view the mapped loan accounts.
Account No	[Mandatory, Pick List] Select the account number, for which loan balance details needs to be viewed, from the pick list. The pick list displays the loan accounts linked to the agreement number entered in the corresponding field.
Account No	[Display] This field displays the account number for which loan balance details are being displayed. The name of the customer is displayed in the adjacent field.
Account Ccy	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened.

Field Name	Description
Account Status	<p>[Display]</p> <p>This field displays the status of the loan account.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Closed • Blocked • Closed Today • Open Today • Dormant • Regular • Written Off • Paid Off • Cheque Pending Settlement • Product Transferred Out • Transferred Out • Partially Discharged • Fully Discharged
Maturity Date	<p>[Display]</p> <p>This field displays the final date for installment payment for the loan, i.e., the date on which the loan account will mature.</p>
Next Due Date	<p>[Display]</p> <p>This field displays the next due date from the current system date for payment of the loan installment.</p>
Next Installment Due	<p>[Display]</p> <p>This field displays the next installment amount which will be due as per the next due date.</p>
Outstandings	
Principal Balance	<p>[Display]</p> <p>This field displays the principal balance on the date of loan balance inquiry if all dues were paid on time. In other words the amount displayed will be the schedule balance as on the date of inquiry not including any unpaid arrears.</p>
Unbilled Principal Balance	<p>[Display]</p> <p>This field displays the unbilled principal balance of the loan account.</p>

Field Name	Description
Amount Disbursed Today	[Display] This field displays the amount that is disbursed on the current date, if the Loan balance inquiry is done on the date when the loan was disbursed.
Future Interest	[Display] This field displays the future interest for syariah accounts, i.e., Add On Loan check box is selected in the Loan Product Master (Fast Path: LNM11) option. For other loans, this field displays the value as zero. The future interest is calculated as below: <i>Future Interest = Total of all future interest installments that will be due after the process date – uncollected interest.</i>
Installment Arrears	[Display] This field displays the total installment arrears that are outstanding in the loan account. Installment arrears will comprise of only the Principal and Interest arrears. <i>Installment Arrears = Principal + Interest</i>
Min. Amount Due	[Display] This field displays the minimum amount due for the revolving loan for the specified period. In case of term loans, this field displays the installment amount.
Other Arrears	[Display] This field displays the other arrears to be paid in the account. Other arrears would include arrears like Fee arrears, Premium arrears, Outgoing arrears, Legal fee arrears, etc.
Uncollected Interest	[Display] This field displays the uncollected interest amount.
Penalty Arrears	[Display] This field displays the penalty interest amount due on the loan account for the non-payment of the dues.
UnBilled Penalty Interest	[Display] This field displays the unbilled penalty interest amount. Unbilled Penalty Interest is the penalty interest accrued on the loan account from the last penalty charging date till the current date. The same is calculated online as on the date of loan balance inquiry.
UnBilled SC	[Display] This field displays the unbilled service charge amount.
Arrears Postponed	

Field Name	Description
Principal Arrears Postponed	[Display] This field displays all the principal arrears that are due to be paid as on that day.
Interest Arrears Postponed	[Display] This field displays the sum of postponed interest arrears.
Penalty Arrears Postponed	[Display] This field displays the penalty which is levied on a customer for non payment or late payment of arrears.
Other Arrears Postponed	[Display] This field displays other arrears like fees arrears, service charge arrears, insurance premium etc. which are due as on date.
UnApplied Credits	
Amount Paid Today	[Display] This field displays any amount paid today (current date) into the loan account by installment payment, advance payment, partial payoff or standing instruction.
Funds in RPA	[Display] This field displays the amount in RPA GL. Any amount which is paid to credit the loan account is always routed or credited to the RPA account. The same is appropriated at EOD. If the amount paid into the loan account is in excess of the arrears due, the credit balance is reflected in RPA. RPA is a liability type GL. Generally Loan Advance Payment amounts are shown in RPA.
Unbilled Interest	
Unbilled Interest	[Display] This field displays the unbilled interest. Unbilled Interest is the interest accrued on the loan account from the last interest charging date till the current date.
Current Balance	
Total Outstandings	[Display] This field displays the total of the outstanding in the loan account. <i>Total Outstanding = Principal Balance + Installment Arrears + other Arrears + Penalty Arrears - Amount Paid Today - Funds in RPA</i>

Field Name	Description
------------	-------------

Uncleared Funds	[Display] This field displays the uncleared funds. Any amount paid by clearing cheque by the customer into the loan account, but pending clearance of the cheque, such as uncleared cheque deposit amounts are displayed in this field.
------------------------	---

Available Balance	[Display] This field displays the available balance. This field indicates the available balance in the cash card, i.e., Revolving loan.
--------------------------	---

3. Enter the agreement number and press the <Tab> key.
4. Select the account number from the pick list.
5. The system displays the loan account balance details.

1.42. LN027 - Agreement Based Account Inquiry

A loan is approved for a customer based on some criterias like amount, duration and end use of loan funds. All these terms and conditions of loan are mentioned in an agreement which the customer accepts before opening an account. An agreement formalizes the customer's acceptance of the bank's terms and conditions. A customer can open multiple loan accounts to avail different repayment plans and options under the same agreement. This eliminates the submission of multiple applications for multiple accounts and also increases efficiency.

Once the agreement number is created for a customer, all loan accounts opened under the agreement are linked together but the processing is done separately for each account. Using this option, you can view the various loan accounts opened by the customer under a particular agreement number.

Definition Prerequisites

- LN057 - Loan Direct Account Opening

Modes Available

Not Applicable

To view the loan accounts mapped to an agreement number

1. Type the fast path **LN027** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Agreement Based Account Inquiry**.
2. The system displays the **Agreement Based Account Inquiry** screen.

OR Click the **Close** button.

1.43. LN063 - Repayment and Arrear Appropriation

This screen is used to appropriate the transactions on the fly and display the arrear position. The transactions will be considered in the order of logging time and the appropriation will be done as per the parameters applicable for each transaction.

The inquiry will display unpaid arrears or arrears due as of last EOD including the adjustments done during the day, arrears paid during the day and balance unpaid arrear.

This option will appropriate all the repayments processed on loan on the fly and will display the amount apportioned towards each arrear type. The pseudo appropriation will be done as per the applicable appropriation sequence. In case of installment payment, the appropriation sequence specified for the transaction will be followed. For other credits the appropriation sequence applicable for the account will be followed.

Definition Prerequisites

- 1065 - Loan Installment Payment Inquiry
- 1066 - Loan Partial Payoff Inquiry
- 1068 - Loan Advance Payment Inquiry

Modes Available

Not Applicable

To inquire the arrear repayment

1. Type the fast path **LN063** and click **Go** or open the **Repayment and Arrear Appropriation** option through menus.
2. The system displays the **Repayment and Arrear Appropriation** screen.

Repayment and Arrear Appropriation

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 16] Type the valid loan account number for which inquiry is to be made. The account must be a regular- open status account.
Product	[Display] This field displays the product code and name of the product under which the loan account is opened.
Currency	[Display] This field displays the currency assigned to the product at the product level, under which the loan account is opened. All the entries are posted in the account in the account currency. The exchange rate values must be defined and downloaded. For example, if the currency assigned to a loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.
Name	[Display] This field displays the name of the customer.

Field Name	Description
Accrual Status	[Display] This field displays the accrual status of the loan account.
Account Status	[Display] This field displays the status of the loan account to be open regular, closed, dormant etc.

Column Name	Description
Arrear Type	[Display] This field displays the arrear type which is being inquired.
Arrear Amount Due	[Mandatory, Numeric, 16] Type the arrear due on the loan as on the process day for the respective arrear type. The arrear due amount is the arrear amount due as on last BOD + debit adjustments done during the day (common billing, Ad hoc int charging, interest adjustment) - credit adjustments done during the day (fee waiver, interest adjustment).
Arrears Paid During the Day	[Mandatory, Numeric, 16] Type the amount paid during the day towards each arrear type. FLEXCUBE will pseudo execute all the repayments processed during the day in the order of the transaction execution and it will pseudo appropriate the arrears on the fly for inquiry purpose. As a result of pseudo appropriation , the total amount that will get paid towards each arrear will be displayed against each arrear type as applicable.If repayments are processed and reversed on the same day, such repayments will not be considered at the time of inquiry
Arrear Amount Due after Repayment	[Display] This field displays the amount due after repayment done by the customer in an arrear type wise. This value for each arrear type will be derived as: Arrear amount due - Arrear amount paid during day

Column Name	Description
Principal Outstanding	<p>[Display]</p> <p>This field displays the balance unbilled principal after considering the credit and debits done during the day.</p> <p>FLEXCUBE will pseudo execute all the repayments processed during the day in the order of the transaction execution and it will pseudo appropriate the arrears on the fly for inquiry purpose.</p> <p>As a result of pseudo appropriation , if there are multiple PPF⁵, EFS or disbursement that has got processed during the day, the unbilled principal will be arrived considering those and will be displayed.</p> <p>If disbursement , PPf, EFS are processed and reversed on the same day, such repayments will not be considered at the time of inquiry.</p>
RPA Balance	<p>[Display]</p> <p>This field displays the advance credit on loan.</p> <p>If on the day of inquiry , advance payment is processed, and there are no arrears on loan / charging transactions are not executed on loan during the day, then the advance payment amount will be displayed in this field.</p> <p>If on the day of inquiry, arrears are created on loan after advance payment is processed on the same day, then advance payment money will be first pseudo appropriated towards the arrears, and excess credit (if any)will be displayed in this field.</p>
Amount Paid Today	<p>[Display]</p> <p>This field displays the amount paid by the customer during the day,else it displays 0.</p>

3. Enter the account number and press the **<Tab>** key. The system displays the account details.

⁵(Partial Pay-off: It is the payment of any principal amount before the same becomes due. The amount paid is less than the total amount of principal outstanding.)

Field Description

Field Name	Description
Product Code	[Mandatory, Pick List] Select the loan product under which the loan account is opened from the pick list.
Schedule Type	[Mandatory, Pick List] Select the schedule type for the product selected in the corresponding field from the pick list.
Loan Amount	[Optional, Numeric, 13, Two] Type the loan amount.
Loan Term	[Optional, Numeric, Four] Type the tenure in months for each stage of the loan.
Disbursement Date	[Mandatory, Pick List, dd/mm/yyyy] Select the loan disbursement date for the generation of schedule from the pick list. By default, the current process date is displayed. Disbursement date cannot be a back date or an Holiday. The future date can be only 30 calendar days from the inquiry / process date (including holidays if any) for the simulation of future dated loan schedule. The date is validated with the holidays defined in the Bank Calendar Maintenance (Fast Path: BA090) option.
Premium Amount	[Mandatory, Numeric, 13, Two] Type the premium amount. It will affect the effective interest rate if an insurance policy is attached to the account, and also the schedule.
Pricing Details	
Rate Chart Code	[Mandatory, Pick List] Select the rate chart code for determination of rate of interest on the loan from the pick list. The rate chart name is displayed in the adjacent field.

Field Name	Description
Margin Code	<p>[Optional, Pick List]</p> <p>Select the margin code from the pick list. The margin name is displayed in the adjacent field.</p> <p>It is the margin which is levied over and above the base rate for initial rate on the loan.</p> <p>If a loan account is opened with a combination of rates for example fixed rate rolling over to variable rate, then the margin code selected in this field will be applicable only for the initial fixed rate on the loan.</p> <p>If a loan account is opened with a single rate (fixed /variable) for the entire term of the loan, then the margin selected in this field will be applied for that rate for the entire loan period.</p>
Rollover Margin Code	<p>[Optional, Pick List]</p> <p>Select the margin code from the pick list.</p> <p>It is the margin which is levied over and above the base rate for rollover rate on the loan.</p> <p>If a loan account is opened with a combination of rates for example fixed rate rolling over to variable rate, then the margin code selected in this field will be applicable only for the rollover rate on the loan.</p> <p>This field is not applicable, if a loan is opened with a single rate (fixed /variable) for the entire term of the loan.</p>
Discount Code	<p>[Optional, Pick List]</p> <p>Select the discount code from the pick list.</p> <p>The discount is applied over and above the base rate.</p> <p>The discount is applicable for the initial rate or rollover rate or both, it is based on the parameters set in the Discount Rate Setup (Fast Path: PR005) option.</p>
Subsidy Margin Code	<p>This field is for future use.</p>
Fixed Term	<p>[Optional, Numeric, Three]</p> <p>Type the fixed term of the loan in months.</p> <p>If the loan is on fixed rate for the entire term, then the value in this field is equal to total term of the loan.</p> <p>If the loan is on fixed rate for initial term and then rolls over to a variable rate for the remaining term, then the initial fixed term is set in this field and it should be less than the total term of the loan. The base rate for fixed period is derived using the fixed term specified.</p>

Field Name	Description
Interest Variance Type	<p>[Mandatory, Radio Button]</p> <p>Click the appropriate Interest Variance Type to select the interest variance at the account level to define a variance for the schedule related interest rate applicable to the account.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Absolute Value • Percentage Value
Variance	<p>[Optional, Numeric, 13, 10]</p> <p>Type the value for variance.</p>
Subsidy Control Parameter	
Subsidy Type	<p>[Optional, Drop-Down]</p> <p>Select the type of subsidy that will be offered on the loan from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Interest rate subsidy- fixed subsidy rate based subsidy • Percentage share in Interest- percentage based subsidy • Interest Subsidy on Loan Amount- fixed amount subsidy type <p>Interest rate subsidy refers to a fixed subsidy rate based subsidy.</p> <p>Percentage share in interest refers to the percentage based subsidy.</p> <p>Interest subsidy on loan amount refers to a fixed amount subsidy type.</p>
Subsidy Margin Rate	<p>[Optional, Numeric, 10]</p> <p>Type the subsidy fixed rate based on which the subsidy interest will be calculated.</p> <p>Can not be more than the net effective interest rate applicable on the loan account.</p> <p>The value cannot be negative and must be greater than 0% and lesser than 100%.</p> <p>This field will be enabled if Subsidy Type is selected as Interest rate Subsidy.</p>
Percentage share of Subsidised interest	<p>[Optional, Numeric]</p> <p>Type the value for percentage share of subsidy interest.</p> <p>The value must be greater than 0% and less than or equal to 100% and cannot be negative.</p> <p>This field will be enabled if Subsidy Type is selected as Percentage share in Interest.</p>

Field Name	Description
Loan Amount for Subsidised interest	<p>[Optional, Numeric]</p> <p>Type the intended fixed subsidy amount.</p> <p>The value entered must be greater than 0 and equal to or lesser than the loan amount entered.</p> <p>The entered amount has to be equal to or lesser than the amount to be disbursed.</p> <p>This field will be enabled if Subsidy Type is selected as Interest Subsidy on Loan Amount .</p>
Subsidy Start Date	<p>[Conditional, Pick List, DD/MM/YYYY]</p> <p>Select the subsidy stage start date from the pick list.</p> <p>This date can be either equal to the FLEXCUBE process date or a future date. If it is a future date, it has to be lesser than the process date + loan term.</p>
Subsidy End Date	<p>[Conditional, Pick List, DD/MM/YYYY]</p> <p>Select the subsidy stage end date from the pick list.</p> <p>This is the date on which the subsidy is intended for expiry. This date has to be greater than the FLEXCUBE process date and subsidy start date and less than the FLEXCUBE process date + loan term.</p> <p>This field is enabled and mandatory if Subsidy Type is selected.</p>

3. Select the product from the drop-down list
4. Select the schedule type from the pick list.
5. Enter the other relevant information.

Field Description

Column Name	Description
-------------	-------------

Stage No	[Display]
-----------------	-----------

This column displays the serial number for the stages.

There can be a maximum of 99 stages defined for an account schedule.

Column Name	Description
Stage Name	<p>[Display]</p> <p>This column displays the stage type attached to a loan account. This is defined in at the Schedule Type definition under Global Definitions.</p> <p>The options are:</p> <ul style="list-style-type: none"> • IOI • EPI • IPI • PMI • FPI
Stage Start Date	<p>[Display]</p> <p>This column displays the start date for the corresponding stages. For the first stage, the start date will be the date of the first disbursement. For the remaining stages, it is the End Date of the previous preceding stage.</p>
Principal Amount	<p>[Display]</p> <p>This column displays the principal amount payable by the customer.</p> <p>This field is applicable only for IPI, EPI and FPI type of loans. If any debit type disbursement charges are levied at the time of disbursement, the same is added to the disbursed amount.</p>
Principal Payments	<p>[Display]</p> <p>This column displays the number of installments in which the principal is paid.</p> <p>For the IOI stage, the principal payments will be zero as in this stage, only the interest is repaid and not the principal.</p> <p>Based on this number, the system calculates the End Date column and the Stage Start Date column for the next stage.</p> <p>For the EPI stage, the sum of principal payments and interest payments are equal.</p>
Interest Payments	<p>[Display]</p> <p>This column displays the number of installments in which the interest on the loan amount is paid.</p> <p>For the IOI stage, the tenure will be defaulted from the schedule type definition, which can be modified.</p>

Column Name	Description
First Principal Due Date	<p>[Display]</p> <p>This column displays the first due date for the principal to be paid.</p> <p>For the IOI stage, this field is not applicable as only interest is repaid and not the principal.</p> <p>For the EPI stage, the first principal due date is same as the first interest due date. For the first stage, this is same as the Stage Start Date. For subsequent stages for the same stage name, it is calculated using First Principal Due Date and principal payments of previous stage. For the IPI stage, it can be different.</p> <p>Based on this date, the system calculates the End Date column and the Stage Start Date column for the next stage.</p>
First Interest Due Date	<p>[Display]</p> <p>This column displays the first due date for the interest to be paid.</p> <p>This date will be defaulted to the end of the month, in case of calendar type of products. In case of anniversary type, it should be the same date or a greater date of the next month.</p> <p>For the EPI stage, this field is the same as First Principal Due Date column.</p>
Installment amount	<p>[Display]</p> <p>This column displays the installment amount to be repaid by the customer in each stage. The installment amount is the sum of the principal and the interest component.</p> <p>This field is not applicable for the IOI stage.</p>
Stage End Date	<p>[Display]</p> <p>This column displays the end date for the particular stage.</p> <p>The preceding end date is the start date for the next stage.</p>

8. Click the **Stage No** link. The system displays the **Edit Stage Details** tab screen.
9. Modify the relevant information.
10. Click **VPI Schedule** button to open the tab **VPI schedule**. This button is activated only if the installment rule of the stage is VPI.

VPI Schedule

VPI Schedule tab is active only if schedule is VPI Installment type. Here you can increase or decrease the term and Upto Installments.

Field Description

Column Name	Description
Stage No	[Display] This field displays the stage number of the loan.
Upto Installment No.	[Numeric, Mandatory] Enter the installment number upto which the installment amount is applicable. The maximum value can be Total number of installments -1. If the stage of the loan is IOI, MOR or charging already done, then this value will be auto populated in display mode
Installment Amount	[Numeric, Mandatory] Enter the installment amount of the loan. If the stage of the loan is IOI or MOR, then this value will be auto populated as zero. If the stage is Charging Already Done, then the installment amount is displayed.

- Click on **Term+** or **Term -** buttons to add or delete the rows in the Installment Details table as required.

Edit Stage Details

Field Description

Field Name	Description
Stage Type	
Stage No.	[Display] This field displays the stage number.
Name	[Display] This field displays the stage name defined in the schedule for the product.
Calendar Base	[Display] This field displays the calendar base.
Installment Rule	[Display] This field displays the installment rule applicable for the stage. For more information, refer to the Installment Rule (Fast Path: LNM43) option.
Installment Type	[Display] This field displays the installment type applicable for the stage.

Field Name	Description
Stage Start Date	[Display] This field displays the start date of the stage.
Stage End Date	[Display] This field displays the end date of the stage.
Stage Details	
Principal Repay Amount	[Display] This field displays the principal repay amount.
No. of Repayments	
Principal	[Conditional, Numeric, Four] Type the principal amount paid during repayment. This field is enabled if Schedule Type is selected as EPI , MOR , IPI or ARM .
Interest	[Conditional, Numeric, Four] Type the number of interest payment. This field is enabled if Schedule Type is selected as IPI , IOI or ARM .
Frequency	
Principal	[Conditional, Drop-Down] Select the frequency for repaying the principal loan amount from the drop-down list. The options are: <ul style="list-style-type: none"> • None/At Maturity • Monthly • BiMonthly • Quarterly • Half Yearly • Yearly This field is enabled if Schedule Type is selected as EPI , IPI or ARM .

Field Name	Description
Interest	<p>[Conditional, Drop-Down]</p> <p>Select the frequency for repaying the interest amount from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • None/At Maturity • Monthly • BiMonthly • Quarterly • Half Yearly • Yearly <p>This field is enabled if Schedule Type is selected as PMI , IPI or IOI.</p>
Installment Amount	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the installment amount.</p> <p>This field is enabled if Schedule Type is selected as EPI, IPI or ARM.</p>
First Repay Dates	
Principal	<p>[Conditional, Pick List, dd/mm/yyyy]</p> <p>Select the first repayment date of principal amount of the loan from the pick list.</p> <p>This field is enabled if Schedule Type is selected as ARM, EPI or IPI.</p>
Interest	<p>[Display]</p> <p>This field displays the first repayment date of interest on the loan.</p>
Term	<p>[Conditional, Numeric, Nine, Three]</p> <p>Type the total duration/period, in years and months, to repay the loan.</p> <p>This field is enabled if Schedule Type is selected as MOR.</p>
Compounding Frequency	<p>[Conditional, Numeric,]</p> <p>Type the compounding frequency.</p> <p>This field is enabled if Schedule Type is selected as IPI.</p>

10. Click the **Validate** button to validate the schedule.
11. Click the **Save** button. The system displays the **Schedule Definition** tab screen.
12. Click the **Validate Schedule** button.
13. Click the **Schedule Details** button. The system displays the **Schedule Details** tab screen with the disbursement details.

Field Description

Column Name	Description
Sr No.	[Display] This column displays the serial number of the record. It is automatically generated by the system.
Stage No.	[Display] This column displays the serial number of the stages in chronological order.
Installment No.	[Display] This column displays the installment number. This is a running serial number automatically generated by the system.
Start Date	[Display] This column displays the start date for a particular installment. This is basically the date of the first disbursement.
Repayment Date	[Display] This column displays the interest and principal repayment date for a particular installment, i.e., the date on which the installment falls due for payment.

Column Name	Description
Interest Rate	<p>[Display]</p> <p>This column displays the interest rate applicable for a particular installment. The interest rate is defaulted from the product interest rate + or - the variance specified in APS/Loan Account Opening. It displays upto 10 digits after decimal .</p> <p>For Mudharabah products , the field name will be Margin Rate.</p> <p>For Mudharabah products , the field name will be Revenue Projection Rate.</p>
Principal	<p>[Display]</p> <p>This column displays the principal component for a particular installment. This field is applicable only for IPI, EPI and FPI stages of loans.</p>
Interest	<p>[Display]</p> <p>This column displays the interest component for a particular installment.</p> <p>For Mudharabah products , the field name will be Margin.</p> <p>For Mudharabah products , the field name will be Revenue Projection.</p>
Subsidy Interest	<p>[Display]</p> <p>This field displays the subsidy interest as per the provided parameters. It displays upto 10 digits after decimal.</p> <p>If subsidy parameters are provided for simulation, the fields under this column head will display 0.</p>
Charge	<p>[Display]</p> <p>This column displays the service charge component for a particular installment. This field will populate values only when a charge rule is defined in the Schedule Type definition (Fast Path: LNM98) option.</p>
Premium	<p>[Display]</p> <p>This column displays the insurance policy premium attached to the loan account.</p>
Capitalized Amount	<p>[Display]</p> <p>This column displays the capitalization schedule for the loan.</p>
Installment	<p>[Display]</p> <p>This column displays the total installment amount. The installment comprises the sum of the principal, interest and the charges components.</p>
Outstanding Balance	<p>[Display]</p> <p>This column displays the total outstanding or the scheduled balance after paying the installment.</p>

Column Name	Description
Total Installment	<p>[Display]</p> <p>This column displays the total installment is the amount which is paid by the customer at the repayment.</p> <p>The total installment amount includes principal, interest, insurance premium and charges.</p>
Days	<p>[Display]</p> <p>This column displays the number of days for which the interest has been calculated.</p> <p>The number of days is arrived at after considering the difference between the Start date and the Repayment date.</p>

14. Click the **Close** button.
OR
Click the **Print** button to print the schedule details.

1.46. LN502 - Loans Event Simulation Maintenance

Using this option, you can simulate the following events for loan accounts:

- Partial Pay-off
- EFS
- Rate Change

FLEXCUBE supports future/current dated simulation of EFS and **PPF**⁶ for loan accounts and rate change simulation for the current day. In the case of future/current date partial pay-off the system generates the revised schedule and the schedule details will be displayed. Prepayment charges will be calculated and displayed based on the penalty method selected.

This option will also support the display of schedule where user specified repayment flag is checked in Installment Rules (FP: LNM43) and where the installment type is selected as IPI.

When partial pay off is simulated using this screen on loan with user specified repayment, the revised schedule of repayment will be worked out online by system using the same logic as actual partial pay off transaction.

When rate change is simulated using this screen on loan with user specified repayment, the future interest will be recomputed and displayed by the system as per the new rate. Principal repayment details (date and amount) will remain unchanged. The same logic as actual rate change processing will be applied to simulation processing logic.

The **Current Balances** section displays the arrears due on the loan account on process date as below:

- Past unpaid arrears (overdue accounts)
- Arrears charged on the inquiry date /process date
- Installment arrears if the installment date is same as the inquiry / process date.

Definition Prerequisites

- LN057 - Loan Direct Account Opening
- LNM98 - Schedule Type

Modes Available

Not Applicable

To view loans event simulation

1. Type the fast path **LN502** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transact > Other Transactions > Loans Event Simulation Maintenance**.
2. The system displays the **Loans Event Simulation Maintenance** screen.

⁶(Partial Pay-off: It is the payment of any principal amount before the same becomes due. The amount paid is less than the total amount of principal outstanding.)

Loans Event Simulation Maintenance

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 16] Type the loan account number for which the loans event simulation is to be maintained.
Branch	[Display] This field displays the name of the home branch where the loan account is opened and maintained.
Product	[Display] This field displays the loan product under which the loan account is opened.
Currency	[Display] This field displays the currency assigned to the product, under which the account is opened.
Disbursed Amount	[Display] This field displays the total disbursed amount in account currency. This is the gross amount exclusive of deductions.
Disbursement Date	[Display] This field displays the disbursement date of the loan amount.

Field Name	Description
Current Balances	
Principal Arrears	[Display] This field displays the total principal arrears due on the process date.
Funds in RPA	[Display] This field displays the funds lying in RPA for the account, pending appropriation.
Interest Arrears	[Display] This field displays the total interest arrears due on the process date.
Amount Paid Today	[Display] This field displays the amount paid in the loan account on the process date.
Penalty Arrears	[Display] This field displays the total penalty arrears due on the process date.
Compounding Interest Arrears	[Display] This field displays the total of compounding interest arrears due and not paid.
<p>Note: Compounding interest is an interest type which is defined when compounding interest is to be computed on the outstanding arrears.</p>	
Diverting Interest Arrears	[Display] This field displays the total diverting interest arrears due and not paid.
<p>Note: If the loan amount disbursed, is used by the customer for the purpose other than the purpose for which loan is disbursed, then the account is charged with diverting interest and is accounted for in diverting interest receivable GL and will be considered as a separate arrear type.</p>	
Book Balance	[Display] This field displays the book balance as on the process date (total loan outstanding – Funds in RPA).
Other Arrears	[Display] This field displays the total other arrears due on the process date.

Field Name	Description
Total Arrears	<p>[Display]</p> <p>This field displays the total arrears due on the process date.</p> <p><i>Total Arrears = Principal Arrears + Interest Arrears + penalty Arrears + Other Arrears + Compounding Interest Arrears + Diverting Interest Arrears.</i></p>
Subsidy Parameters	
Subsidy Type	<p>[Optional, Drop-Down]</p> <p>Select the type of subsidy, if the loan account is disbursed with the subsidy parameters from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Interest Rate Subsidy • Percentage of Subsidy Interest • Interest Subsidy on Loan Amount <p>This field will enabled for input if Interest Rate Subsidy is selected as the Subsidy Type else it is disabled.</p> <p>The interest which has to be entered should be greater than 0% and lesser than 100%. The interest rate entered has to be less than the interest rate applicable to the loan Account. Only 2 digits after decimals will be allowed.</p>
Subsidy Margin Rate	<p>[Optional, Numeric, Ten]</p> <p>Type the subsidy margin rate.</p> <p>This field displays the subsidy percentage share, if the loan account is disbursed under Interest Rate Subsidy Subsidy Type.</p>
Percentage share of Subsidized interest	<p>[Optional, Numeric]</p> <p>Type the value percentage share of subsidy interest.</p> <p>This field displays the subsidy percentage share, if the loan account is disbursed under Percentage of Subsidy Interest Subsidy Type.</p>
Loan Amount for Subsidized interest	<p>[Optional, Numeric]</p> <p>Type the intended fixed subsidy amount.</p> <p>This field will display the fixed subsidy amount, if the loan account is disbursed under Interest Subsidy on Loan Amount Subsidy Type.</p>
Subsidy Start Date	<p>[Conditional, Pick List, DD/MM/YYYY]</p> <p>Select the subsidy stage start date from the pick list.</p> <p>This date can be either equal to the FLEXCUBE process date or a future date but can not be a back date.If it is a future date, it has to be lesser than the Process Date + Loan Term.</p>

Field Name	Description
Subsidy End Date	<p>[Conditional, Pick List, DD/MM/YYYY]</p> <p>Select the subsidy stage expiry date from the pick list.</p> <p>This date has to be greater than the FLEXCUBE process date and subsidy start date. This date has to be less than the FCR Process Date + Loan Term.</p>
Event	<p>[Mandatory, Drop-Down]</p> <p>Select the type of event from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Partial Pay • Rate Change • EFS • Subsidy
Change Term/Installment	<p>[Conditional, Drop-Down]</p> <p>Select the appropriate criteria from the drop-down list.</p> <ul style="list-style-type: none"> • Term • Installment <p>This field is disabled if the EFS option is selected in the Event field.</p>
Penalty Method	<p>[Conditional, Drop-Down]</p> <p>Select the penalty method for applying penalty on EFS / PPF from the drop down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • On Amount: If this option is selected, penalty is charged as x% of amount. The penalty is calculated on the excess amount repaid towards appropriation of the balance principal amount • On Amount + Term: If this option is selected, penalty is charged as x% p.a. for the remaining period. The penalty is calculated on the excess amount repaid towards appropriation of the balance principal amount • Waive: If this option is selected, No penalty is levied on EFS / PPF • Manual : In this option, the method for penalty computation on full pay off or partial pay off simulation will be specified. Penalty will not be computed using the rate specified in interest rate plan for penalty rate type. <p>This field is disabled if the Rate Change option is selected in the Event field.</p>

Field Name	Description
Penalty Amount	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the value for penalty amount.</p> <p>The penalty amount entered should be zero or a value greater than zero.</p> <p>This field is enabled if the Manual option is selected in the Penalty Method field.</p> <div style="border: 1px solid black; background-color: #e0f0ff; padding: 5px;"> <p>Note: Unlike PPF this field is newly added in this screen - it was not available earlier</p> </div>
Apply Interest Till date	<p>[Optional,Checkbox]</p> <p>Select the checkbox.</p> <p>This field will decide application of accrued interest (regular/penalty) during PPF event simulation.</p> <p>This checkbox will be enabled only if Partial payoff event is selected in the event drop down. For all the other drop down options this field will remain disabled for user input.</p>
Effective Date	<p>[Conditional, Pick List, dd/mm/yyyy]</p> <p>Select the date for partial pay-off / full pay off simulation from the pick list.</p> <p>The effective date can be current date or a future date. The future date can be maximum 30 calendar days from the process date including holidays. It can be greater than or equal to the charging date but cannot be a holiday as per the Bank Calendar Maintenance (Fast Path: BA090) option.</p> <p>Effective date cannot be greater than maturity date/ last installment date of the loan account. It cannot be greater than the end date of regular stage or a date in IOI or PMI stage.</p> <p>If the Rate Change option is selected in the Event field, the system displays the current process date in this field.</p>
Partial Payoff Amount	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the partial amount of the loan that will be paid off.</p> <p>This field is enabled only if the Partial Pay option is selected in the Event field.</p>
New Rate	<p>[Conditional, Numeric, Three, Five]</p> <p>Type the new rate for the loan payoff.</p> <p>This field is enabled only if the Rate Change option is selected in the Event field.</p>
Subsidy start Date	<p>[Optional, Pick List, dd/mm/yyyy]</p> <p>Select the subsidy start date from the pick list. The date can either be the Account opening date, back date not lesser than the last charging date or the process date.</p>

Field Name	Description
------------	-------------

Apply Interest Till date	[Optional,Checkbox]
---------------------------------	---------------------

This field will decide application of accrued interest (regular/penalty) during PPF event simulation. This checkbox will be enabled only if Partial payoff event is selected in the event drop down.

3. Enter account number and press the <Tab> key.
4. Select the event, charge term/installment, penalty method from the drop-down list.
5. Enter the relevant information.

Field Description

Column Name

Description

Stage No

[Display]

This column displays the serial number for the stages.

There can be a maximum of 99 stages defined for an account schedule.

Stage Name

[Display]

This column displays the stage type attached to a loan account.

This is defined in at the **Schedule Type** definition under Global Definitions.

The options are:

- IOI
- EPI
- IPI
- PMI
- FPI

Column Name	Description
Stage Start Date	<p>[Display]</p> <p>This column displays the start date for the corresponding stages.</p> <p>For the first stage, the start date will be the date of the first disbursement. For the remaining stages, it is the End Date of the previous preceding stage.</p>
Principal Amount	<p>[Display]</p> <p>This column displays the principal amount payable by the customer.</p> <p>This column is applicable only for IPI, EPI and FPI type of loans.</p> <p>If any debit type disbursement charges are levied at the time of disbursement, the same is added to the disbursed amount.</p>
Principal Payments	<p>[Display]</p> <p>This column displays the number of installments in which the principal is paid.</p> <p>For the IOI stage, the principal payments will be zero as in this stage, only the interest is repaid and not the principal.</p> <p>Based on this number, the system calculates the End Date column and the Stage Start Date column for the next stage.</p> <p>For the EPI stage, the sum of principal payments and interest payments are equal.</p>
First Principal Due Date	<p>[Display]</p> <p>This column displays the first due date for the principal to be paid.</p> <p>For the IOI stage, this column is not applicable as only interest is repaid and not the principal.</p> <p>For the EPI stage, the first principal due date is same as the first interest due date.</p> <p>For the first stage, this is same as the Stage Start Date. For subsequent stages for the same stage name, it is calculated using First Principal Due Date and principal payments of previous stage.</p> <p>For the IPI stage, it can be different.</p> <p>Based on this date, the system calculates the End Date column and the Stage Start Date column for the next stage.</p>
First Interest Due Date	<p>[Display]</p> <p>This column displays the first due date for the interest to be paid.</p> <p>This date will be defaulted to the end of the month, in case of calendar type of products. In case of anniversary type, it should be the same date or a greater date of the next month.</p> <p>For the EPI stage, this column is the same as First Principal Due Date column.</p>

Column Name	Description
Installment Amount	<p>[Display]</p> <p>This column displays the installment amount to be repaid by the customer in each stage. The installment amount is the sum of the principal and the interest component.</p> <p>This column is not applicable for the IOI stage.</p>
Stage End Date	<p>[Display]</p> <p>This column displays the end date for the particular stage.</p> <p>The preceding end date is the start date for the next stage.</p>

7. Click the **Schedule Details** button to view the schedule details.
8. Click **VPI Schedule** button to open the tab **VPI schedule**. This button is activated only if the installment rule of the stage is VPI.

VPI Schedule

VPI Schedule tab is active only if schedule is VPI Installment type. Here you can view the updated VPI Schedule that will be computed while doing partial pay off/ Rate Change/ EFS Event.

The screenshot displays the 'Loans Event Simulation Maintenance' window with the 'VPI Schedule' tab selected. Key sections include:

- Disbursement Info:** Disbursed Amount: 2,00,000.00; Disbursement Date: 18/08/2019.
- Current Balances:** Principal Areas: 36,356.85; Funds in RPL: 0.00; Interest Areas: 4,840.15; Amount Paid Today: 0.00; Penalty Areas: 175.75; Book Balance: 2,54,928.87; Total Areas: 41,175.75.
- Event Settings:** Event: Partial Pay; Change Term/Installment: Term; Penalty Method: On Amount; Apply Interest Till Date: []; Effective Date: 18/11/2019; Partial Payoff Amount: 50,000.00; New Rate: 0.0000.
- Installment Details Table:**

Stage No.	Up to Installment No.	Installment Amount
1	1	12900
1	2	14000
1	3	15000
2	5	15000

Field Description

Field Description

Column Name	Description
Srl No.	[Display] This column displays the serial number of the record. It is automatically generated by the system.
Stage No.	[Display] This column displays the serial number of the stages in chronological order.
Installment No.	[Display] This column displays the installment number. This is a running serial number automatically generated by the system.
Start Date	[Display] This column displays the start date for a particular installment. This is basically the date of the first disbursement.
Repayment Date	[Display] This column displays the interest and principal repayment date for a particular installment, i.e., the date on which the installment falls due for payment. If the User Specified Repayment check box selected in Installment Rules (FP:LN43), the interest and principal repayment date will be different.
Interest Rate	[Display] This column displays the interest rate applicable for a particular installment. The interest rate is defaulted from the product interest rate + or - the variance specified in APS/Loan Account Opening.
Principal	[Display] This column displays the principal component for a particular installment. This column is applicable only for IPI, EPI and FPI stages of loans.
Interest	[Display] This column displays the interest component for a particular installment.
Subsidy Interest	[Display] This field displays the subsidy interest for a simulated schedule based on the existing events in the simulation screen. This fields will display 0, if the loan account simulated belongs to a non subsidy loan.

Column Name	Description
Charge	[Display] This column displays the service charge component for a particular installment. This column will populate values only when a charge rule is defined in the Schedule Type (Fast Path: LNM98) option.
Installment	[Display] This column displays the total installment amount. The installment comprises the sum of the principal, interest and the charges components.
Outstanding Balance	[Display] This column displays the total outstanding or the scheduled balance after paying the installment.
Days	[Display] This column displays the number of days for which the interest has been calculated. The number of days is arrived at after considering the difference between the Start date and the Repayment date.

8. Click the **Pay-off Details** tab to view the Pay-off details.

Pay-off Details

The Pay-off Details tab is enabled only for EFS and partial Pay-off events and only when the effective date is a future date. The future arrears will display the arrears that will be due on the future date/ next installment date as below:

- If the immediate next installment date falls due on the future date, then the system displays the installment dues under future arrears as on future date. For Example: Process date : 31/04/07, Next installment date : 15/05/07, Effective date : 15/05/07 future arrears will display arrears due on 15/05/07
- If the immediate next installment date falls due after the future date, then the system displays the installment dues under unbilled arrears as on future date. For Example: Process date : 31/04/07, Next installment date : 15/05/07, Effective date : 10/05/07 arrears from 31/04/07 till 10/05/07 will be displayed under unbilled arrears
- If the effective date entered is beyond next installment date, then the future arrears tab displays the arrears due on next installment date. The amount due from next installment date till the effective date will be displayed under unbilled arrears. For Example: Process date : 31/04/07, Next installment date : 15/05/07, Effective date : 18/05/07. Arrear due on 15/05/07 will be displayed under future arrears and arrears from 15/05/07 till 18/05/07 will be displayed under unbilled arrears .

Field Description

Field Name	Description
Future Balances	
Principal Arrears	[Display] This field displays the total principal arrears due on the next charging date, if the effective date is equal to or greater than the next charging date.
Total Arrears	[Display] This field displays the total arrears due on the effective date. <i>Total Arrears = Principal Arrears + Interest Arrears + penalty Arrears + Other Arrears</i>
Interest Arrears	[Display] This field displays the total interest arrears due on the next charging date, if the effective date is equal to or greater than the next charging date.

Field Name	Description
Book Balance	[Display] This field displays the book balance as on the effective date.
Penalty Arrears	[Display] This field displays the total penalty arrears due on the next charging date, if the effective date is equal to or greater than the next charging date.
Next Due Date	[Display] This field displays the next installment due date.
Other Arrears	[Display] This field displays the total other arrears due on the next charging date, if the effective date is equal to or greater than the next charging date.
Compounding Interest Arrears	[Display] This field displays the compounding arrears from the last charging date till the future charging date, if the effective date for simulation is provided with a date equal to or greater than the next charging date.
Unbilled Interest	[Display] This field displays the unbilled arrears if the effective date is less than the next charging date. The interest accrued from the process date till the effective date will be displayed. If the effective date is greater than the next charging date, the interest accrued from the next charging date till the effective date will be displayed.
Total Unbilled Due	[Display] This field displays the total unbilled dues as of the effective date. <i>Total unbilled dues = Unbilled Interest + Unbilled Penalty</i>
Unbilled Penalty	[Display] This field displays the unbilled penalty if effective date is less than the next charging date. Penalty interest accrued from the process date till the effective date will be displayed. If effective date is greater than the next charging date, the penalty interest accrued from the next charging date till the effective date will be displayed.

Field Name	Description
Unbilled Compounding Interest	<p>[Display]</p> <p>This field displays the unbilled compounding interest.</p> <p>If the simulation effective date is equal to the current process date - In this case, the unbilled compounding interest from the last charging date till the effective date/process date will be displayed.</p> <p>If the simulation effective date is greater than the current process date, but lesser than the next charging date - The unbilled compounding interest from the last charging date till the effective date will be displayed.</p> <p>If the effective date is greater than the current process date and also greater than the next charging date - The unbilled compounding interest from the next charging date till the effective date will be displayed in this field.</p>
Prepayment Charges	<p>[Display]</p> <p>This field displays the value as per the penalty method selected.</p>
Expected Loan Pay-off Amount	<p>[Display]</p> <p>This field displays the expected loan pay-off amount in the case of partial pay- off or EFS.</p> <p>The events are:</p> <ul style="list-style-type: none"> • Partial Pay-off and Future dated : Expected loan payoff amount = total arrears (Current) + Total Arrears (Future)+ Total Unbilled Dues + Prepayment Charges – Amount Paid Today. • Partial Pay-off and Current dated : Expected Loan Payoff Amount = Total Arrears (current) + Prepayment Charges – Amount Paid Today • Early and Final Settlement and Future Date : Expected Loan Payoff Amount = Total Arrears (Current) + Total Arrears (Future)+ Total Unbilled Dues + Prepayment Charges + Loan Principal Outstanding as of Effective Date – Amount Paid Today • Early and final settlement and Current date : Expected Loan Pay off amount = Total Arrear(current) + Loan Principal o/s as of Process date + Prepayment Charges - Amount Paid Today.
Principal Paid Off	<p>[Display]</p> <p>This field displays the total amount paid towards principal in case of PPF only.</p> <p><i>Principal Paid off = Partial Pay off Amount - Expected Loan Pay off Amount.</i></p>

1.47. LN522 - Account Schedule Inquiry

Using this option, you can view the account schedule of a loan account, once the schedule is generated or after reschedule.

The system displays a brief view of the different stages and the term of each stage. You can then drill down on each stage and view the details/parameters such as repayment frequency, interest and installment processing parameters, penalty, charges parameters, etc., set for each stage of the schedule. This inquiry is not available immediately on account disbursement but only after end of day.

Definition Prerequisites

- LN521 - Account Schedule
- LNM41 - Interest Rules
- **LN060 - Loans Product Rates Plan**
- LNM43 - Installment Rules
- LNM98 - Schedule Type

Modes Available

Not Applicable

To view account schedule details

1. Type the fast path **LN522** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Inquiries > Account Schedule Inquiry**.
2. The system displays the **Account Schedule Inquiry** screen.

Account Schedule Inquiry

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 16] Type the loan account number for which you want to view the loan schedule.
Branch	[Display] This field displays the branch code where the loan account is opened and maintained.
Product	[Display] This field displays the product code under which the loan account is opened.
Currency	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened.

Field Name	Description
Schedule Type	<p>[Display]</p> <p>This field displays the schedule code.</p> <p>The default schedule type linked to the loan account selected either in APS or during direct Loan account opening is displayed.</p> <p>The system displays the name of the schedule adjacent to the field.</p>

Field Description

Column Name	Description
Stage	<p>[Display]</p> <p>This column displays the system-generated serial number to indicate stage numbers.</p> <p>There can be a maximum of 99 stages defined for an account schedule.</p>
Stage Name	<p>[Display]</p> <p>This column displays the stage type attached to the loan account.</p> <p>This is defined in at the Schedule Type (Fast Path: LNM98) option under Global Definitions.</p> <p>The options are:</p> <ul style="list-style-type: none"> • IOI • EPI • IPI • PMI • FPI

Column Name	Description
Term Months	<p>[Display]</p> <p>This column displays the tenure in months for each stage of the loan.</p>
Term Year	<p>[Display]</p> <p>This column displays the tenure in days for each stage of the loan.</p>
Stage Start Date	<p>[Display]</p> <p>This column displays the start date for the corresponding stages. For the first stage, the start date will be the date of the first disbursement. For the remaining stages, it is the End Date of the previous preceding stage.</p>
Principal Amount	<p>[Display]</p> <p>This column displays the principal amount payable by the customer.</p> <p>This column is applicable only for IPI, EPI and FPI type of loans.</p>
Principal Payments	<p>[Display]</p> <p>This column displays the number of installments in which the principal is paid.</p> <p>For the IOI stage, the principal payments will be zero as in this stage, only the interest is repaid and not the principal.</p> <p>Based on this number, the system calculates the End Date column and the Stage Start Date column for the next stage.</p> <p>For the EPI stage, the sum of principal payments and interest payments are equal.</p>
Interest Payments	<p>[Display]</p> <p>This column displays the number of installments in which the interest is paid.</p>
First Principal Due Date	<p>[Display]</p> <p>This column displays the first due date for the principal to be paid.</p> <p>For the IOI stage, this field is not applicable as only interest is repaid and not the principal.</p> <p>For the EPI stage, the first principal due date is same as the first interest due date. For the first stage, this is same as the Stage Start Date. For subsequent stages for the same stage name, it is calculated using First Principal Due Date and principal payments of previous stage. For the IPI stage, it can be different.</p> <p>Based on this date, the system calculates the End Date column and the Stage Start Date column for the next stage.</p>

Column Name	Description
First Interest Due Date	<p>[Display]</p> <p>This column displays the first due date for the interest to be paid.</p> <p>This date will be defaulted to the end of the month in case of calendar type of products. In case of anniversary type, it should be the same date or a greater date of the next month from the date of disbursement.</p> <p>For the EPI stage, this field is the same as First Principal Due Date column.</p>
Installment Amount	<p>[Display]</p> <p>This column displays the installment amount to be repaid by the customer in each stage. The installment amount is the sum of the principal and the interest component.</p> <p>This column is not applicable for the IOI stage.</p>
Stage End Date	<p>[Display]</p> <p>This column displays the stage end date for the corresponding stage.</p> <p>The preceding end date is the start date for the next stage.</p>

6. The system displays the **Stage Details** for the selected stage.
7. Click **VPI Schedule** button to open the tab **VPI schedule**. This button is activated only if the installment rule of the stage is VPI.

VPI Schedule

VPI Schedule tab is active only if schedule is VPI Installment type. Here you can view the updated VPI Schedule

The screenshot shows the 'Account Schedule Inquiry' application window. The top section contains input fields for Account No (0000000413038), Branch (9999), Product (00000-Retail Loans Monthly), Currency (INR), Schedule Type (601 VPI), Loan Term (12 Months), Sanctioned Amount (2,00,000.00), and Disbursed Amount (2,00,000.00). Below this, the 'VPI Schedule' tab is active, showing a 'Total No of Installments' field set to 12. The main area displays a table titled 'Installment Details' with the following data:

Stage No.	Upto Installment No.	Installment Amount
1	1	12000
1	2	14000
1	9	19000
1	11	30000

The bottom of the window features a navigation bar with buttons for 'Back', 'OK', 'Close', and 'Clear'.

Field Description

Column Name	Description
Total No of Installments	[Display] This field displays the total number of installments in all stages of loan.
Installment Details	
Stage No	[Display] This field displays the stage number of the loan.
Upto Installment No.	[Display] This field displays the installment number upto which the installment amount is applicable. The maximum value can be total number of installments -1.
Installment Amount	[Display] This field displays the installment amount of the loan.

Field Description

Field Name	Description
Stage Change	
End Stage Today	This field is for future use.
End Of Period	This field is for future use.
Repayment Frequencies	
Principal Frequency	[Display] This field displays the frequency at which the principal is calculated on the loan account. For IOI stage, this has to be None/At maturity. For IPI and FPI type of loans, the principal repayment frequency can be None/At Maturity, Monthly, Bimonthly, Quarterly, Half Yearly, or Yearly. For EPI type of loans, this has to be one of Monthly, Bimonthly, Quarterly, Half Yearly, or Yearly.

Field Name	Description
Interest Frequency	<p>[Display]</p> <p>This field displays the frequency at which the interest will be calculated on the loan account.</p> <p>For IPI and FPI type of loans, the interest repayment frequency can be either of None/At Maturity, Monthly, Bimonthly, Quarterly, Half Yearly, or Yearly.</p> <p>For other stages, this has to be one of Monthly, Bimonthly, Quarterly, Half Yearly, or Yearly.</p>
Penalty Frequency	<p>[Display]</p> <p>This field displays the frequency at which the penalty should be repaid for the respective stage.</p>
Calendar Plan	<p>[Display]</p> <p>This field displays the calendar plan code attached to the loan account for the respective stage is displayed.</p>
Stage Type	
Installment Rule	<p>[Display]</p> <p>This field displays the installment rule attached to the loan account for the respective stage.</p> <p>For more information, refer to the Installment Rule (Fast Path LNM43) option.</p>
Interest Rule	<p>[Display]</p> <p>This field displays the interest rate rule attached to the loan account for the respective stage.</p> <p>For more information, refer to the Interest Rule (Fast Path LNM41) option.</p>
Interest Rate	<p>[Display]</p> <p>This field displays the present interest rate applicable on the loan account. For more information on interest rates, refer to the Loans Product Rates Plan (Fast Path LN060) option.</p>
Interest Processing	
Compounding Frequency	<p>[Display]</p> <p>This field displays the frequency at which the interest is compounded to the principal for the respective stage.</p>
RestPeriod Frequency	<p>[Display]</p> <p>This field displays the rest period frequency applicable for the respective stage. Rest period is the frequency at which the interest base will be updated for computation of interest.</p>

Field Name	Description
Arrear Compounding Frequency	<p>[Display]</p> <p>This field displays the frequency at which the arrears are compounded for the respective stage.</p> <p>The system maintains an interest calculation base as separate from the principal. Depending on the frequency selected, the interest base is increased by the interest arrears and the compounding effect is achieved.</p> <p>For more information, refer to the Schedule Type (Fast Path LNM98) option.</p>
Penalty-Non Payments	
Interest Rule	<p>[Display]</p> <p>This field displays the penalty for non-payment interest rule, attached to the loan account for the respective stage.</p> <p>For more information, refer to the Schedule Type (Fast Path LNM98) option.</p>
Interest Rate	<p>[Display]</p> <p>This field displays the interest rate applicable for the penalty interest.</p> <p>For more information on interest rates, refer to the Loans Product Rates Plan (Fast Path LN060) option.</p>
Compounding Frequency	<p>[Display]</p> <p>This field displays the penalty interest compounding frequency associated with the selected stage.</p> <p>For more information, refer to the Schedule Type (Fast Path LNM98) option.</p>
Penalty-Early Settlements	
PPF Interest Rule	<p>[Display]</p> <p>This field displays the partial payoff interest rule applicable for the stage.</p> <p>For more information, refer to the Interest Rule (Fast Path: LNM41) option.</p>
PPF Interest Rate	<p>[Display]</p> <p>This field displays the partial payoff interest rate plan applicable for the stage.</p> <p>For more information on interest rates, refer to the Loans Product Rates Plan (Fast Path: LN060) option.</p>

Field Name **Description**

- EFS Interest Rule** [Display]
 This field displays the early final settlement interest rule applicable for the stage.
 For more information, refer to the **Interest Rule (Fast Path: LNM41)** option.
- EFS Interest Rate** [Display]
 This field displays the early final settlement interest rate applicable for the stage.
 For more information on interest rates, refer to the **Loans Product Rates Plan (Fast Path: LN060)** option.

Field Description

Column Name **Description**

Column Name	Description
Record No	<p>[Display]</p> <p>This column displays the installment number.</p> <p>This is a running serial number automatically generated by the system.</p>
Stage No	<p>[Display]</p> <p>This column displays the serial number for the stages. For example there are 3 stages for the loan account, viz., IOI, EPI and PMI. The stage numbers will be displayed as 1, 2 and 3 for the respective stages and Rec No. wise.</p> <p>There can be maximum 99 stages defined for an account schedule.</p>
Start Date	<p>[Display]</p> <p>This column displays the start date for the particular installment.</p> <p>This is basically the date of the first disbursement.</p>
Repayment Date	<p>[Display]</p> <p>This column displays the date on which the installment is to be repaid.</p>
Interest Rate	<p>[Display]</p> <p>This column displays the interest rate applicable for the installment. It displays up to 10 digits after decimal.</p>
Principal	<p>[Display]</p> <p>This column displays the principal component of the particular installment.</p> <p>This column is applicable only for IPI, EPI and FPI stages of loans.</p>
Interest	<p>[Display]</p> <p>This column displays the interest component of the particular installment. It displays up to 10 digits after decimal.</p>
Subsidy Interest	<p>[Display]</p> <p>This column displays the subsidy interest only for a subsidy loan account, else it will be displayed a 0.</p>
Charge	<p>[Display]</p> <p>This column displays the service charge component for a particular installment.</p> <p>This column will populate values only when a charge rule is defined in the Schedule Type (Fast Path: LNM98) option.</p>
Premium	<p>[Display]</p> <p>This column displays the insurance premium amount.</p>

Column Name	Description
Capitalized Interest	<p>[Display]</p> <p>This field displays the capitalized interest component in an exceptional case where interest component exceeds loan installment amount.</p> <p>This field displays '0' wherever interest is not capitalized to principal. Since FLEXCUBE supports the rate of interest in loans for more than 100%, in a rare case where the interest component of an installment is more than the installment amount itself, the arrears will be raised to the extent of installment amount only.</p> <p>During appropriation of payment received towards arrears the entire installment amount will be appropriated towards the interest and the appropriation towards the principal will be zero and the outstanding interest amount will be capitalized into principal and it will be recovered with the last installment.</p> <p>Example:</p> <p>Installment amount = 5000</p> <p>Due to rate of interest component for that month, Installment amount = 5100</p> <p>Arrear will be raised for installment amount = 5000</p> <p>5000 will be appropriated towards interest. No appropriation towards principal remaining interest of Rs. 100 will be capitalized into principal.</p>
Installment	<p>[Display]</p> <p>This column displays the total installment amount.</p> <p>The installment comprises the sum of the principal, interest and the charges components.</p>
Outstanding Balance	<p>[Display]</p> <p>This column displays the total outstanding or the scheduled balance after paying the installment.</p>
Total Installment	<p>[Display]</p> <p>This column displays the total number of installments.</p>
Days	<p>[Display]</p> <p>This column displays the number of days for which the interest has been calculated.</p> <p>The number of days is arrived at after considering the difference between the Start date and the Repayment date.</p>

Field Description

Field Name

Description

Value Date From

[Mandatory, Pick List, dd/mm/yyyy]

Type the start value date of the transaction or select it from the pick list.

The system displays the first disbursement date by default.

Value Date To

[Mandatory, Pick List, dd/mm/yyyy]

Type the end value date of the transaction or select it from the pick list.

The system displays the current system date by default.

Note: The system can display only 100 records under a given selection. If the number of records are more than 100 the user will have to suitably modify the Value date from and to dates

Column Name

Description

Transaction Date

[Display]

This column displays the date of the transaction.

Column Name	Description
Value Date	[Display] This column displays the value date of the transaction.
Transaction Description	[Display] This column displays the description of the transaction.
GL Code	[Display] This column displays the GL code for different transaction.
Dr/Cr	[Display] This column displays the type of transaction. If the transaction is credit type then C is displayed, and if the transaction is debit type of transaction then D is displayed.
Amount	[Display] This column displays the transaction amount in the account currency.

8. Double-click the appropriate record to view the **Txn Details** tab.

Field Name	Description
Amount TCY	[Display] This field displays the currency in which the transaction was performed.
Amount LCY	
Description	[Display] This field displays the description of the transaction.
SC Code	[Display] This field displays the service charge code attached to the transaction. This field will display a value only if the transaction being inquired is related to a Service Charge.
Txn Type	[Display] This field displays the type of the transaction associated with the particular transaction. Transaction types are predefined in the system.
GL Code	[Display] This field displays the GL code, which was affected due to the transaction.
GL Description	[Display] This field displays the description of the GL code which was affected due to the transaction.
Correction Reversal	[Check Box] This field will be enabled only in Case of Same Day reversal or Partial Reversal. This is for information purpose only .

9. Click the **Arrears Inquiry** option to view the **Arrears Details** tab.
10. Click the **Ok** button.

Arrears Inquiry

Arrear information for the required kind of arrear or for all arrears can be inquired upon using the Arrears Inquiry option. The user can specific the arrear type like installment/principal/interest/penalty and other miscellaneous types of arrears. The user has the option to filter the inquiry on a certain type of arrear or all arrears. Further selection of arrears based on either of All arrears or Unpaid arrears or Paid arrears is also available for inquiry.

For each arrear the system displays details like the arrear type, its due date, the amount that was assessed by system, the amount still due, if paid then the date of payment and if not fully paid then the days that the arrear has been outstanding.

Field Description

Field Name	Description
Account Open Date	[Display] This field displays the date on which the loan account is opened.
Application No.	[Display] This field displays the application number generated by the system for the loan account.
Sanctioned Amount	[Display] This field displays the sanctioned loan amount.
Sanctioned Term of Loan	[Display] This field displays the sanctioned term of the loan account.
Current Term of Loan	[Display] This field displays the current term of the loan account.
Disbursed Amount	[Display] This field displays the total loan amount disbursed till date.
Available for Disbursement	[Display] This field displays the balance loan amount to be disbursed. This field displays value only in case the loan is partially disbursed.

Field Name	Description
Outstanding Principal	[Display] This field displays the outstanding principal amount to be paid by the customer.
Line No.	[Display] This field displays the central liability line number of the customer against which this credit has to be tracked. The central liability of the customer is tracked using the Central Liability module. This line number or liability number is the FLEXCUBE customer ID of the customer under which the liability of the customer/group is being tracked.
Unclear Amount	[Display] This field displays the uncleared cheque amount, if any clearing cheque has been deposited in the loan account and the cheque is pending clearance.
Drawdown Account	[Display] This field displays the drawdown account number, in case the loan account has drawdown instructions from a CASA account. For more details refer to Account Payment Instructions (Fast Path: LNM31) option.
Advance Amount	[Display] This field displays the advance amount, if any amount is paid by the customer.
Next Due Date	[Display] This field displays the next due date for the repayment of loan installment by the customer.
Amount Paid Today	[Display] This field displays the amount paid by the customer on the current date.
Accrued Interest	[Display] This field displays the accrued interest for the amount.
Written Off Principal Recovered	[Display] This field displays the cumulative principal amount recovered in written off status.
View Collateral Details	[Optional, Pick List] Select the view collateral details from the pick list to view the details of the collateral linked to the loan account. This option will be enabled only if the selected loan account is a Secured loan account with collateral attached to it.

Field Name	Description
View Account Relationship	[Optional, Pick List] Select the view account relationship from the pick list to view the details of the relationship associated to the loan account. The system will display the Customer ID, Customer Name and the Relationship.
View Hold on CASA	[Optional, Pick List] Select the appropriate CASA account hold from the pick list. If the selected loan account has a CASA account attached and the CASA account has a hold on it, the details of such hold will be displayed on selection of this pick list.

Interest Details

A teller can view the interest related details of the loan account. This inquiry tab is available under the Account Details option itself. This includes details like the interest rate applicable, the variance applied at account level, interest base (for next charging) and interest freeze status (freeze or not). Penalty interest details like the rate and base are also available on inquiry.

Product

Field Description

Field Name	Description
Fixed Rate Account	<p>[Display]</p> <p>This field displays whether the rate of interest is fixed or not.</p> <p>If the rate of interest is fixed it displays Y or else if the rate of interest is not fixed, i.e., Floating it displays N. The criteria or the rate definition for interest being Fixed or Floating is defined in the Loans Product Rate Plan (Fast Path: LN060) option.</p>
Interest Freeze Status	<p>[Display]</p> <p>This field displays the interest freeze status.</p> <p>If the loan account is recalled and interest is frozen, the frozen status of the interest on the loan account is displayed in this field. Interest freeze results in stoppage of the interest accruals and charging in the loan accounts, and only the interest base will be updated.</p>
Interest Variance	<p>[Display]</p> <p>This field displays any interest rate variance applied to the loan account. It displays up to 10 digits after decimal.</p>
Interest Rate	<p>[Display]</p> <p>This field displays the interest rate applicable to the loan account. It displays up to 10 digits after decimal.</p>
Penalty Interest Rate	<p>[Display]</p> <p>This field displays the penalty interest rate applicable to the loan account. It displays up to 10 digits after decimal.</p>
Interest Charged Upto	<p>[Display]</p> <p>This field displays the date up to which interest has been charged on the loan account.</p>
Interest Base	<p>[Display]</p> <p>This field displays the base on which interest will be calculated during the accrual.</p>
Penalty Interest Base	<p>[Display]</p> <p>This field displays the base on which the penalty interest will be calculated on the next penalty calculation day.</p>
Cumulative Interest Reduced Due to Principal option	<p>[Display]</p> <p>This field displays the cumulative interest amount saved by the customer if the Principal offset Allowed check box is selected for the defined product under which the account is maintained.</p> <p>This field displays the interest amount saved till the last interest charging date by the customer.</p>

17. Click the **Arrear Totals** tab to view the arrears details.

Arrear Totals

A snap-shot view of all the statistical details related to the dues in the loan account can be viewed using the Arrear tab. System makes available the account related details like the amount of interest, post maturity interest, fees, penalty, premium, legal fees, outgoings, compounding interest arrears and diverting interest arrears due on date. The total principal arrears, total of normal arrears, total of suspended arrears and sum total of arrears is also displayed.

The screenshot shows the 'Account Transactions Inquiry' window with the following details:

- Account No: 00000000012001
- Product: 40003-Test-Regular Loan - EPI
- Currency: RMB
- Name: AJAY RANA
- Accrual Status: NORMAL
- Account Status: ACCOUNT OPEN REGULAR

Outgoings :	0.00	0.00	Total Arrears :	27,422.78
Compounding Interest Arrears:	6.63	0.00		
Diverting Interest Arrears:	0.00	0.00		

Field Description

Field Name	Description
------------	-------------

Normal

If arrears are due in the loan account with accrual status of the loan account as normal, then the values will be displayed in the following fields. Arrears which were due and have not been clawed back post suspension of the loan account will also display values under the normal arrears column.

Interest

[Display]

This field displays the normal interest due paid in the loan account.

Field Name	Description
Post Maturity Interest	<p>[Display]</p> <p>This field displays the post maturity interest.</p> <p>If the loan account is in Post Maturity stage, the post maturity interest amount will be displayed. Ideally this field should not have any value as banks usually treat loans in Post maturity stage as Suspended and hence the Post Maturity interest arrears should appear in the suspended column as against the normal.</p>
Fees	<p>[Display]</p> <p>This field displays the fees that are due in the loan account.</p>
Penalty	<p>[Display]</p> <p>This field displays the penalty due from the customer under the normal period.</p>
Premium	<p>[Display]</p> <p>This field displays the premium due under the normal period.</p>
Legal Fees	<p>[Display]</p> <p>This field displays the legal fees due under the normal period.</p>
Outgoings	<p>[Display]</p> <p>This field displays the outgoings due under the normal period.</p>
Compounding Interest Arrears	<p>[Display]</p> <p>This field displays the compounding interest arrears due under the normal period.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note: Compounding interest is an interest type which is defined when compounding interest is to be computed on the outstanding arrears.</p> </div>
Diverting Interest Arrears	<p>[Display]</p> <p>This field displays the diverting interest arrears due under the normal period.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note: If the loan amount disbursed, is used by the customer for any purpose other than the purpose for which loan is disbursed, then the account is charged with diverting Interest and is accounted for in diverting interest receivable GL and will be considered as a separate arrear type.</p> </div>
Suspended	
<p>If arrears are due in the loan account with accrual status of the loan account as suspended, then the values will be displayed in the following fields. Arrears which were due prior to suspension of the loan account and clawed back will also display values under the Suspended arrears column.</p>	
Interest	<p>[Display]</p> <p>This field displays the interest due in the suspended period.</p>

Field Name	Description
Post Maturity Interest	[Display] This field displays the post maturity interest due for the suspended period.
Fees	[Display] This field displays the fees due under the suspended period.
Penalty	[Display] This field displays the penalty due from the customer under the suspended period.
Premium	[Display] This field displays the premium due under the suspended period.
Legal Fees	[Display] This field displays the legal fees due under the suspended period.
Outgoings	[Display] This field displays the outgoings due under the suspended period.
Compounding Interest Arrears	[Display] This field displays the Compounding Interest arrears due under the suspended period.
	Note: Compounding Interest is an interest type which is defined when compounding interest is to be computed on the outstanding arrears.
Diverting Interest Arrears	[Display] This field displays the Diverting Interest arrears due under the suspended period.
	Note: If the loan amount disbursed, is used by the customer for any purpose other than the purpose for which loan is disbursed, then the account is charged with Diverting Interest and is accounted for in Diverting Interest Receivable GL and will be considered as a separate arrear type.
Principal Arrears	[Display] This field displays the total principal arrears due on the loan account till date.
Total Normal Arrears	[Display] This field displays the total normal arrears for the loan account till date. This field displays the total of all the arrears under the normal column.

Field Name	Description
Total Suspended Arrears	[Display] This field displays the total suspended arrears for the loan account till date. This field displays the total of all the arrears under the suspended column.
Total Arrears	[Display] This field displays the total arrears for the loan account till date. This field displays the total of Principal Arrears + Total Normal Arrears + Total Suspended Arrears.

18. Click the **Min Amt Dues** option to view the **Min Amount** tab.

Min Amt Due

A teller can inquire about the MAD arrears raised on the revolving loan account.

1.50. LNM52 - Quote for Economic Cost

Economic cost is the expense incurred by the bank on early repayment of a fixed rate loan due to movement and deployment of funds.

The economic cost is levied on the occurrence of any of the following events in a Loan account:

- Advance Payment in the Fixed rate Period
- Partial Pay Off in the Fixed rate period
- Early Final Settlement in the Fixed Rate period
- Customer initiated rollovers from fixed to variable resulting in the reduction of the fixed rate term
- Split of an existing Loan in the fixed rate period resulting in a PPF of the existing Loan in Fixed rate period

Using this option, you can generate a quote for economic cost for full settlement of the Loan. During prepayment of a loan the economic cost is verified, incase a valid quote is available it is applied to the account, otherwise this option is used to generate the economic cost. The generated quote for economic cost is stored for a period of seven working days. An expiry date is stored for every quote of economic cost. If a new quote is taken within the 7-day period, the original quote is over-written.

Definition Prerequisites

- LN057 - Loan Direct Account Opening

Modes Available

Add, Modify, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To generate a quote for economic cost

1. Type the fast path **LNM52** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Quote for Economic Cost**.
2. The system displays the **Quote for Economic Cost** screen.

1.51. LNM83 - Account Rates

Using this option you can view the interest rate at the account level against the loan product. This option displays the regular interest, penalty, PPF⁷ and EFS interest rates. Interest for regular and PMI stages of an account is maintained in the Rate Chart Maintenance (Fast Path: PR002), Discount Rate Setup (Fast Path: PR005) and Rate Chart Validity Maintenance (Fast Path: PR003) options. For other stages interest rate is configured at product level using the Loans Product Rates Plan (Fast Path: LN060) option. This option also allows you to view the percentage or absolute variance defined for the regular or penalty interest.

This is an Inquiry Screen only

Definition Prerequisites

- LN057 - Loan Direct Account Opening
- PR003 - Rate Chart Validity Maintenance
- LN060 - Loans Product Rates Plan

Modes Available

Not Applicable

To view the account rates details

1. Type the fast path **LNM83** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Account Rates**.
2. The system displays the **Account Rates** screen.

⁷(Partial Pay-off: It is the payment of any principal amount before the same becomes due. The amount paid is less than the total amount of principal outstanding.)

Field Name Description

Plan Name [Mandatory, Pick List]
 Select the plan name from the pick list.

3. Type the account number and press the **<Tab>** key.
4. Select the plan name from the pick list. The system displays the tier definition and summary details based on the plan name selected.

Account Rates - Penalty Rate Type

The screenshot shows the 'Account Rates*' application window. At the top, there are input fields for Account Number (0010000500000182), Product (70000-Index Level - A), Plan Name (Regular), Branch (BR1000), and Currency (RMB). Below this is the 'Summary Details' section with fields for Rate Chart Code (2) and Discount Code (0). The main part of the window is a table with the following data:

Rate Type	Start Date	Index Code	Rate of Interest	Margin Code	Margin	Discount	Subsidy Rate	Account Variance Absolute	Account Variance Percentage	Net Rate
Regular	24/02/2012	9	0.3612398765		0	0	0	0.0000000000	0.00000	0.3612398765

At the bottom of the window, there is a navigation bar with buttons for Card, Change Pin, Cheque, Cost Rate, FCY Change, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signature, Travellers Cheque, UDF, OK, Close, and Clear.

Field Description

Field Name Description

Rate Type [Display]
 This field displays the rate type of the loan account.

Rate Definition [Display]
 This field displays the rate definition of the loan account.

Tier Definition

Field Name	Description
Slab Definition	[Display] This field displays the slab definition. If the attached rate plan is a tiered one, it displays either amount based tiered or the term based tiered. Else it displays non-tiered.
Ceiling Rate	[Display] This field displays the ceiling rate applicable to the account. The system displays the rate of interest defined at the Product level.
Floor Rate	[Display] This field displays the minimum rate of interest applicable to the account.
Tier Criteria	[Display] This field displays the tier criteria of a loan account. The options are: <ul style="list-style-type: none"> • Cumulative • Incremental
Tiered Term Lookup	[Display] This field displays the criteria to be entered for the amount based tier structure.
Tiered Lookup Balance	[Display] This field displays the Tiered Lookup Balance which is the criteria for restructuring. The criteria is based on the sanctioned amount/disbursed amount/ outstanding balance.

Column Name	Description
Summary Details	
Start Date	[Display] This column displays the start date. If plan name is selected for compounding interest type of rate, then this field is blank.
Amount	[Display] This column displays the amount. If plan name is selected for compounding interest type of rate, then this field is blank.
Interest Index	[Display] This column displays the interest index.

Column Name	Description
Interest Rate	<p>[Display]</p> <p>This column displays the interest rate or index rate.</p> <p>The value displayed is rounded off, up to ten decimal points, on the higher side.</p>
Interest Variance	<p>[Display]</p> <p>This column displays the interest variance.</p>
Fixed Amount	<p>[Display]</p> <p>This column displays the fixed amount.</p> <p>If plan name is selected for compounding interest type of rate, then this field displays '0.00'.</p>
Account Variance Absolute	<p>[Display]</p> <p>This field displays the account variance as an absolute value for regular or penalty rate, if the variance provided at the account level is an absolute variance. If plan name is selected for compounding interest type of rate, then this field displays '0.00000'. The absolute variance displayed in this column as an interest rate supported up to 10 digits after decimal.</p> <p>Example- Assuming that the penalty rate at account level is 5.99999% and the absolute variance provided is 2.98765%, the net penalty rate for the account would be:</p> $(5.99999\% + 2.98765\%) = 8.98764\%.$
Account Variance Percentage	<p>[Display]</p> <p>This field displays the account variance as a percentage if defined as a percentage of base rate for regular or penalty rate.</p> <p>If plan name is selected for compounding interest type of rate, then this field displays '0.00000'.</p> <p>Example 1- Assuming that the penalty is based on product rates.</p> <p>Assuming that the factor provided for penalty at account level is 20.99999% and the penalty index (as defined in Interest Index Rates, FP: BAM13 option) is 5.99999%, the penalty variance calculated at the account level would be:</p> $(5.99999\% + [5.99999\% * 20.99999\%]) = 7.259987300001\%$ <p>which would be rounded off to 7.25999%.</p>
Net Rate %	<p>[Display]</p> <p>This column displays the net rate percentage.</p> <p>If plan name is selected for compounding interest type of rate, then net rate will be derived and displayed as = Index rate +/- product variance. The net rate displayed will be rounded off till five digits after decimals on the higher side. It displays up to 10 digits after decimal.</p>

1.53. LNM37 - Loan Account Payoff Notice Maintenance

Using this option you can keep a track of the payoff notice period given by the customer. The payoff notice period is set in the **Product Master Maintenance** option.

If the customer pays off the amount without prior notice, penalty is charged for the entire period, i.e., till the date of Early or **Final Settlement**⁸ (EFS). If the customer gives notice, and pays off before the expiry of the notice period, then no EFS penalty will be charged to the customer.

If the payoff notice expires, then the payoff done after the expiry is treated as a payoff without notice and penalty for EFS will become applicable.

Definition Prerequisites

- LNM11 - Loans Product Master: The Minimum Notice period for Early Settlement should be specified.
- LN057 - Loan Direct Account Opening

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add the payoff notice

1. Type the fast path **LNM37** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Loan Account Payoff Notice Maintenance**.
2. The system displays the **Loan Account Payoff Notice Maintenance** screen.

⁸(It is the liquidation of the loan account on or after maturity date by paying the final installment due.)

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 16] Type the appropriate loan account number of the customer who has given the payoff notice period.
Customer Name	[Display] This field displays the short name of the primary customer of the Loan account.
Branch	[Display] This field displays the name of the home branch of the loan account.

Field Name	Description
Currency	<p>[Display]</p> <p>This field displays the currency assigned to the product, under which the account is opened.</p> <p>All the entries that are posted into the account will be in the account currency. The exchange rate values must be defined and downloaded.</p> <p>For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.</p>
Product Name	<p>[Display]</p> <p>This field displays the loan product under which the loan account is opened.</p>
Date of Payoff Notice	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the payoff notice date from the pick list.</p> <p>It is the date on which the customer gives the loan payoff notice to the bank, informing about the early settlement of the loan account.</p> <p>The system displays the current date by default which can be modified by the teller.</p>
Expected Payoff Date	<p>[Display]</p> <p>This field displays the expected date of early paying off the Loan balance.</p> <p>The system calculates the number of days from the date of Payoff notice till the expected payoff date and validates the number of days as specified in the Loans Product Master (Fast Path: LNM11) option. If the repayment is done prior to the expected payoff date of pay off notice, a penalty interest is charged. The penalty rate is defined in the schedule definition attached to the account and the calculation is done at the time of payoff.</p> <p>By default, the system displays the current date.</p>

3. Click the **Add** button.
4. Enter the account number and press the **<Tab>** key.
5. Enter the relevant information and click the **Ok** button.
6. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **Ok** button.
7. The loan account payoff details are added once the record is authorised.

1.54. 1067 - Loan Full Payoff Inquiry

Using this option, the balance loan outstanding amount can be repaid by the customer in full by Cash, Local Cheque, transfer from CASA or GL Transfer .

Final settlement indicates that the loan account is being closed before the term of the loan ends. This is also called as EFS in the system. The bank may charge some penalty for such early settlements.

At the time of EFS, system calculates the interest and arrears (IOA interest) due till date. The EFS closure date is always taken as the Value date. Banks may require the customer to provide sufficient notice prior to full payoff of the Loan account. The payoff notice period is set in the **Product Master Maintenance** (Fast Path: LNM11) option. In case an EFS notice has been given then the end of notice period is taken as the EFS date.

Once final settlement is made, the system marks the account as closed today. The system then passes the GL entries and closes the account in EOD. No further transactions or processing will occur on this account.

Definition Prerequisites

- BAM97 - Currency Codes Cross Reference
- LNM11 - Product Master Maintenances
- LN057 - Loan Direct Account Opening
- LNM52 - Quote for Economic Cost
- BAM40 - Reason Code Maintenance
- The exchange rate values must be defined and downloaded

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 16] Type the appropriate account number for which the early/final settlement of the loan is to be made. The name of the loans account holder is populated adjacent to the account number.
Account Ccy	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries posted in the account are in the account currency. The exchange rate values must be defined and downloaded. For example, if the currency assigned to a Loan product is USD, the account opened under that product has USD as its account currency, by default.

Field Name	Description
Penalty Method	<p>[Mandatory, Drop-Down]</p> <p>Select the penalty method from the drop-down list.</p> <p>A bank may choose to charge an EFS penalty. This penalty is set up as an interest rule and attached to the stage at which the penalty is to be charged. This is the method to be used to charge penalty for Early/Final Settlement⁹ of the loan.</p> <p>The teller can select from anyone of the following options:</p> <ul style="list-style-type: none"> • On Amount - The penalty will be charged as x% of the outstanding principal amount. • On Amount and term -The penalty will be charged as x% of the outstanding principal amount for the remaining period. • Waive - The penalty is waived. • Manual -If penalty method is selected as Manual, then the penalty amount field will be enabled where the user will need to enter the amount of penalty to be charged. The penalty rate field will be blank. The penalty amount can be entered as 'Zero' or a value greater than that. <p>The accounting entries will be passed to the GLs specified in the Product Interest Attributes (Fast Path: LNM42) applicable for 'EFS' type of interest.</p> <p>If penalty amount is entered as 'Zero', accounting entries will not be passed. Penalty amount will be paid from the transaction amount. Penalty will not be computed using the rate specified in Interest rate plan for penalty rate type.</p> <p><i>* Examples of calculating the penalty is mentioned at the end of Full Payoff option</i></p>
Penalty Amount	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the penalty amount to be charged.</p> <p>The value entered should be 'zero' or a value greater than that. The accounting entries will be passed to the GLs specified in the Product Interest Attributes (Fast Path: LNM42) applicable for 'EFS' type of interest.</p> <p>If penalty amount is entered as 'Zero', accounting entries will not be passed. Penalty amount will be paid from the transaction amount. Penalty will not be computed using the rate specified in Interest rate plan for "Penalty" rate type.</p> <p>This field is enabled if the Penalty Method is selected as Manual.</p>

⁹(It is the liquidation of the loan account on or after maturity date by paying the final installment due.)

Field Name	Description
Penalty Rate	<p>[Display]</p> <p>This field displays the penalty rate.</p> <p>This field is disabled if the penalty method is selected as Waive or Manual.</p>
Settlement Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the Settlement Mode from the drop-down list.</p> <p>Multiple repayment modes are possible for Loan EFS. However, the modes are validated against the parameters defined at the Loans Product Master Level (Fast Path: LNM11) option. Following are the EFS modes of payment.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Cash • Local Cheque • Savings Transfer • GL Transfer
Value Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the value date of the transaction from the pick list.</p> <p>By default, the current date is displayed.</p> <p>The date entered should be less than or equal to the current date.</p> <p>The transaction should be conducted only if the Payment Mode is Savings transfer and GL Transfer.</p> <p>The value date should not be earlier than the last charging date or the last date of reschedule in the account, whichever is later.</p> <p>Based on this value date and the choice of mode of EFS penalty, the system calculates the EFS penalty up to the input value date.</p>
Reason for Closure	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate reason for closure of the loan account from the drop-down list.</p> <p>These reason codes are maintained in the Reason Code Maintenance (Fast Path: BAM40) option.</p>
Outstandings	
Principal Balance	<p>[Display]</p> <p>This field displays the actual principal balance on the date of early or final payoff, considering if all dues were paid on time.</p> <p>This field is non-editable.</p>

Field Name	Description
Total Arrears	<p>[Display]</p> <p>The field displays the total arrears due on the date of EFS excluding unbilled interest+ penalty interest.</p> <p><i>Total Arrears = principal arrears + interest arrears + fee arrears + legal fee arrears +premium arrears + outgoing arrears + penalty arrears + Compounding Interest Arrears + Diverting Interest Arrears</i></p>
Future Interest Computed #	<p>[Display]</p> <p>This field displays the difference of the future interest installments which are due after the value date and the uncollected interest.</p>
UnBilled SC	<p>[Display]</p> <p>This field displays the unbilled service charge amount.</p>
Uncollected Interest	<p>[Display]</p> <p>This field displays the uncollected interest.</p>
UnBilled Interest	<p>[Display]</p> <p>This field displays the unbilled interest.</p> <p>Unbilled Interest is the interest accrued on the loan account from the last interest charging date till the current date, i.e., the date of partial repayment of loan.</p>
Upto	<p>[Display]</p> <p>This field displays the system generated date up to which unbilled interest is calculated.</p>
UnBilled Penalty Interest	<p>[Display]</p> <p>This field displays the unbilled penalty interest.</p> <p>Unbilled Penalty Interest is the interest accrued on the loan account from the last penalty charging date till the current date. The Unbilled penalty interest till date, due to late payment of arrears on the account is calculated online.</p>
Penalty Interest Accrued	<p>[Display]</p> <p>This field displays the total of penalty interest accrued on the loan account if the value in the field Interest Accrual Frequency (Penalty) in Product Master Maintenance (Fast Path: LNM11) is not set to None.</p>
UnBilled Compounding Interest	<p>[Display]</p> <p>This field displays the unbilled compounding interest from the last charging date till date.</p>
<p>Note: There is no accrual for compounding interest, this field is a dynamic calculation for display purpose only.</p>	

Field Name	Description
Upto	[Display] This field displays the system-generated date up to which the Unbilled penalty interest is calculated.
UnBilled Penalty Fee	[Display] This field displays the unbilled penalty fee, in case any unbilled penalty charges/fees in the schedule is attached to the loan account.
Upto	[Display] This field displays the system-generated date up to which the penalty charges are calculated. By default, the system displays the process date.
Arrears Postponed	
Principal Arrears Postponed	[Display] This field displays the principal arrears that are due to be paid as on that day.
Interest Arrears Postponed	[Display] This field displays the sum of principal arrears and interest arrears.
Penalty Arrears Postponed	[Display] This field displays other arrears like fees arrears, service charge arrears, insurance premium, etc. which are due as on date.
Others Arrears Postponed	[Display] This field displays the penalty levied on the customer for non payment or late payment of arrears.
UnApplied Credits	
Amount Paid Today	[Display] This field displays the amount paid, on the current date, into the loan account by way of installment payment, advance payment, partial payoff or standing instruction from CASA account.
Funds in RPA	[Display] This field displays the funds in RPA. RPA stands for "Repayment Pending Appropriation". In loans module any amount paid towards repayment of the loan is first credited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.
Settlement	

Field Name	Description
Prepayment Charges	<p>[Display]</p> <p>This field displays the prepayment charges based on the selected penalty method. This field will be blank if Waive option is selected in the Penalty Method.</p> <p>If the Manual option is selected from the Penalty Method drop-down list, the user will be able to enter the amount in this field which can be 'zero' or a value greater than that.</p> <p>If the On Amount option is selected from the Penalty Method drop-down list, the system calculates the prepayment penalty on the amount being paid towards the principal after all current arrears are paid at the specified penalty rate.</p> <p>If the On Amount and Term option is selected from the Penalty Method drop-down list, the system calculates the prepayment penalty charges on the amount being paid towards the principal after all current arrears are paid from date of full payoff to the maturity date of the loan.</p> <p>If the Waive option is selected from the Penalty Method drop-down list, the value in this field will be zero.</p>
Upto Maturity Date	<p>[Display]</p> <p>This field displays the maturity date of the loan The penalty will be calculated from the date of the EFS upto the Maturity Date displayed in this field.</p>

Loan EFS By Cash

EFS can be made by Cash mode. The cash payment for an account will update the teller balance in that currency. The payment may be in a currency different from the account currency.

Field Description

Field Name	Description
Repayment Appropriation (Normal and Suspended)	
Override Appropriation Sequence	[Optional, Checkbox] Select the Override Appropriation Sequence check box to do the appropriation as per amounts set for each arrear type. If unchecked, the below grid will be disabled with the Arrear Due column displaying the dues against each arrear type. The Payment Amount and Waiver Amount columns will be defaulted to zero.
Arrear Due	
Installment	[Display] This field displays the installment arrears due on the loan account. Arrear value = Principal Arrears + Interest Arrears + Insurance Premium Arrears
Penalty Interest	[Display] This field displays the penalty arrears due on the loan account.
Post Maturity Interest	[Display] This field displays the PMI arrears due on the loan account.

Field Name	Description
Fees/ SC	[Display] This field displays the fee type of arrears due on the loan account.
Legal Fees	[Display] This field displays the legal fee type of arrears due on the loan account.
Outgoing	[Display] This field displays the outgoing type of arrears due on the loan account.
Payment	
Installment	[Display] This field displays the amount to be appropriated against installment arrears of the loan account. This value will be automatically updated to include the waiver when a value is entered in waiver field.
Penalty Interest	[Display] This field displays amount to be appropriated against penalty arrears of the loan account. This value will be automatically updated to include the waiver when a value is entered in waiver field.
Post Maturity Interest	[Display] This field displays the amount to be appropriated against PMI arrears of the loan account. This value will be automatically updated to include the waiver when a value is entered in waiver field.
Fees/ SC	[Display] This field displays the amount to be appropriated against SC arrears of the loan account. This value will be automatically updated to include the waiver when a value is entered in waiver field.
Legal Fees	[Display] This field displays the amount to be appropriated against Legal Fees arrears of the loan account. This value will be automatically updated to include the waiver when a value is entered in waiver field.
Outgoing	[Display] This field displays the amount to be appropriated against Outgoing arrears of the loan account. This value will be automatically updated to include the waiver when a value is entered in waiver field.

Field Name	Description
Waiver	
Installment	[Display] This field is disabled and the default value is zero..
Penalty Interest	[Optional, Numeric] Enter the amount to be waived against penalty arrears of the loan account.
Post Maturity Interest	[Optional, Numeric] Enter the amount to be waived against PMI arrears of the loan account.
Fees/ SC	[Optional, Numeric] Enter the amount to be waived against SC arrears of the loan account.
Legal Fees	[Optional, Numeric] Enter the amount to be waived against Legal Fees arrears of the loan account.
Outgoing	[Optional, Numeric] Enter the amount to be waived against Outgoing arrears of the loan account.
Payment Details	
Txn Ccy	[Mandatory, Drop-Down] Select the transaction currency from the drop-down list. This is the currency in which the transaction has to be done. While posting the transaction entries to the account, the transaction currency is converted into the account currency, based on the defined transaction rate.
Acct Ccy Rate	[Display] This field displays the rate of conversion used for converting the loan account currency to the local currency of the bank. The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the local currency and the account currency are the same, the field takes a default value as 1, which cannot be modified.

Field Name	Description
Txn Ccy Rate	<p>[Display]</p> <p>This field displays the rate at which the transaction currency is converted to the local currency of the bank.</p> <p>The teller's right to change the transaction currency rate within a range is configurable at the bank level. Narrative	<p>[Optional, Alphanumeric, 40]</p> <p>Type the narration.</p> <p>The field displays the default narration, based on the transaction.</p>

Loan EFS By Local Cheque

EFS can be made by Local Cheque mode. When EFS for a loan is made by cheque, system accepts the cheque details such as the instrument number, routing number, the clearing type and amount. The unclear amount of the loan is updated and the cheque is sent for clearing. The cheque date has to be less than or equal to current date. If the cheque date is less than current date the system will validate that the cheque has not crossed its stale period.

On the cheque being cleared, the unclear amount is reduced accordingly and the loan account credited.

Txn Ccy

[Mandatory, Drop-Down]

This field displays the transaction currency.

This is the currency in which the transaction has to be done.

The teller has to select the transaction currency from the drop-down list.

While posting the transaction entries to the account, the transaction currency is converted into the account currency, based on the defined transaction rate.

Acct Ccy Rate

[Display]

This field displays the rate of conversion used for converting the loan account currency to the local currency of the bank.

The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.

If the local currency and the account currency are the same, the field takes a default value as 1, which cannot be modified.

Field Name	Description

Loan EFS By Transfer From Savings

EFS by transfer from a CASA account can be performed. The system validates that the CASA account entered is a valid account, without a block or debit block status. If the account is a liability account, system will not allow the account to go into negative balance. The CASA account gets debited to the extent of the EFS amount and the same can be seen in the CASA statement inquiry.

The screenshot shows the 'Loan EFS By Transfer From Savings' application window. It contains several sections:

- Penalty Arrears Postponed:** 0.00
- Others Arrears Postponed:** 0.00
- Unapplied Credits:** Amount Paid Today: 0.00, Funds in RFA: 0.00
- Settlement:** Prepayment Charges: 2,501.01, Upto Maturity Date: 31/04/2020, Total Due: 75,835.85
- Repayment Appropriation:** A table with columns for Arrears, Normal, and Suspended, each with sub-columns for Arrear Due, Payment Amount, and Waiver Amount. Rows include Installment, Penalty Interest, Post Maturity Interest, Fees/Sci, Legal Fee, Outgoings, and Total.
- Payment Details:** Fields for Sav Acct No, Sav Acct Ccy, Loans Acct Ccy Rate, Future Interest Charged #, EFS Amount (75,835.85), Sav Acct Amt (75,835.85), Customer Id, User Reference No, and Narrative (EFS By Wfr. From CASA).

At the bottom, there is a navigation bar with buttons for 'Print', 'OK', 'Close', and 'Clear'.

Field Name	Description
Economic Cost	[Display] This field displays the economic cost applicable for fixed rate loans.
User Reference No	[Optional, Alphanumeric, 40] Type the user reference number. The user reference number is assigned to identify the transaction. This field is enabled or disabled depending on the profit booking being enabled or disabled for the particular transaction.
Customer Id	[Optional, Numeric, 10, Pick List] Type the customer ID or select it from the pick list. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.
Narrative	[Optional, Alphanumeric, 40] Type the narration. The field displays the default narration, based on the transaction.

10. Click the **Ok** button.
11. The system displays the message "Authorization Required. Do you want to continue?". Click the **OK** button.
12. The system displays the **Authorization Reason** screen.
13. Enter the relevant information and click the **Grant** button.
14. The system displays the transaction sequence number message box. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.
15. Click the **Ok** button.
16. The system displays the **Document Receipt** screen.
17. If you want to print the receipt, select the record that needs to be printed. The system displays the message "Do you want to print the document". Click the **Ok** button.
OR
Click the **Cancel** button.

Note: For information on **Denomination Detail, Instrument Detail, Cheque Detail** and **Authorisation transactions**, refer to the **FLEXCUBE Introduction User Manual**.

* *Examples of calculating the penalty for a Early or Final Settlement (EFS) Transaction:*

As mentioned above following are the options or methods of calculating the Penalty Interest for an EFS transaction:

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Assume a Loan account with the following status:

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrears till date)
EFS Penalty Rate	5%

Thus, the total arrears is INR 22820.00

Assuming all the above arrears, i.e., INR 22820 is paid the balance principal amount after repayment of Principal arrears will be
120000 less 20000 = INR 100000

Penalty will be calculated on the net amount of principal which is to be closed prematurely – i.e., INR 100000

Assuming EFS Penalty @ 5% (Amount Based method) will be calculated as
 $100000 * 5 / 100 = \text{INR } 5000$

On Amount + Term - Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Assume a Loan account with the following status:

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear : INR 120.00 (also includes Interest arrears till date)	
EFS Penalty Rate	5%

Thus, the total arrears is INR 22820.00

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Assuming all the above arrears, i.e., INR 22820 is paid the balance principal amount after repayment of Principal arrears will be

120000 less 20000 = INR 100000

Penalty will be calculated on the net amount of principal which is to be closed prematurely – i.e., INR 100000

Assuming EFS @ 5% (Amount + Term Based method assuming the total term of the loan was 60 months and the balance term is 42 months, the rate discounting factor is $42/60 = 0.7$

Thus the calculation will be $100000 * 5% * 0.7 = \text{INR } 3500$

1.55. 1069 - Loan Rescission Inquiry

Using this option ,loan rescission with specified period can be performed at the product level. Loans Rescission can be done when the customer/bank wants to close the loan account within a certain number of days from the last disbursement date, without any financial impact to the bank or customer. Alternatively, any teller error may also also be reversed .

This facility to **rescind** the loan is offered within a certain number of working days after the disbursement of the loan.

Rescission implies reversal of all entries passed during disbursement. If the customer wants to cancel the loan within the rescission period, then the entire deduction and the interest accrued/charged on the account will be reversed by the system. Any deductions to be levied on the account are to be handled operationally. Rescission is allowed only if interest and/or charge has not been applied on the account.

The number of rescission days is mentioned in the **Loans Product Master** (Fast Path: LNM11) option.

The available mode for performing Loan rescission is cash, savings transfer or GL Transfer.

Loan Rescission mandates the maintenance of **Loan Rescission Calendar** (Fast Path: BA655) option. The rescission calendar is to be maintained separately regardless of whether the bank/composite calendar is maintained or not. The loan rescission calendar is required to determine the actual working days from the first disbursement date.

The available mode for performing Loan rescission is cash, savings transfer or GL Transfer.

Note: Loan rescission is not allowed for the EPI (BOP) schedules. For the EPI (BOP) schedules the first installment is raised and marked as paid on the first disbursement day and this event will be treated as a charging event.

Definition Prerequisites

- BAM97 - Currency Codes Cross Reference
- BA655 - Calendar For Loan Rescission/TD Maturity
- LN057 - Loan Direct Account Opening
- The exchange rate values must be defined and downloaded

Modes Available

Not Applicable

To maintain account provision

1. Type the fast path **1069** and click **Go** or navigate through the menus to Transaction Processing > Account Transactions > Loan Account Transactions > Transfer > Loan Rescission Inquiry.
2. The system displays the **Loan Rescission By Transfer From Savings** screen.

Narrative	[Mandatory, Alphanumeric, 40] Type the narration. This field displays the default narration, based on the transaction.

Loan Rescission By Transfer From Savings

Rescission transaction by transfer from a CASA account can be performed. The system validates that the CASA account entered is a valid account, without a block or debit block status. If the account is a liability account, system will not allow the account to go into negative balance. The CASA account gets debited to the extent of the installment payment and the same can be seen in the CASA statement inquiry. The loan account gets credited and the appropriation for the credit happens in EOD.

Note: For information on **Denomination Detail, Instrument Detail, Cheque Detail** and **Authorisation transactions**, refer to the *FLEXCUBE Introduction User Manual*.

1.56. 1412 - Loans Refund Inquiry

Using this option you can refund the excess balance of a loan account that shows credit balance after the outstanding is cleared by the customer, Further, the loan account having the credit balance should be over and above the small balance forfeiture amount set in the product level.

In such case the loan account will not be closed, till the refund is made. Once the refund is made, system will pass the necessary GL entries and mark the loan account as closed. The bank can refund the credit balance in the loan account by Cash mode or by transferring the amount to the customer's CASA account.

Definition Prerequisites

Not Applicable

Other Prerequisites

- 1067 - Loan Full Payoff Inquiry: The loan account should have credit balance over and above the small balance forfeiture amount set in the product level

Modes Available

Field Description

Field Name	Description
Account No	<p>[Mandatory, Numeric, 16]</p> <p>Type the loan account number of the customer who is eligible to receive the excess credit refund amount.</p> <p>The short name of the account holder is populated adjacent to the account number.</p>
Account Ccy	<p>[Display]</p> <p>The field displays the currency assigned to the product, under which the account is opened.</p> <p>All the entries posted in the account are in the account currency.</p> <p>For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.</p>

Field Name	Description
Refund Mode	[Mandatory, Drop-Down] Select the refund mode from the drop-down list. The options are: <ul style="list-style-type: none"> • Cash • Savings Transfer
Outstandings	
Principal Balance	[Display] This field displays the actual principal balance of loan, as on the date of the refund. Ideally this field should have NIL value.
Amount Disbursed Today	[Display] This field displays the amount that is disbursed on the current date, if the loan is disbursed on the current date, i.e., on the date of Loans Refund Inquiry.
Total Arrears	[Display] The field displays the total arrears due on the date of Loans Refund Inquiry. Ideally this field should be NIL value.
UnApplied Credits	
Amount Paid Today	[Display] This field displays the amount paid today into the loan account by way of installment payment, advance payment, partial payoff, or standing instruction from CASA account.
Funds in RPA	[Display] This field displays the funds in RPA. RPA stands for "Repayment Pending Appropriation". In loans module any amount paid towards repayment of the loan is first credited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.
Refund	
Total Payable	[Display] This field displays the excess refund amount payable to the customer.

3. Type the account number and press the **<Tab>** key.
4. Select the refund mode from the drop-down list for loan refund by cash.

1.57. AC005 - Automatic Account Write off

Using this option you can maintain the details of written off accounts. These details will be referred by FLEXCUBE during the equalization process at CIF level.

This option is also used for recording the date on which the written off amount is recovered. If the Exclude from auto write off check box is selected, then those loan/OD accounts will be excluded from the automatic write off process. However such accounts can also be written off manually by the user.

Definition Prerequisites

- AC004 - Account WriteOff
- 8051 - CASA Account Opening
- LN057 - Loan Direct Account Opening

Modes Available

Modify, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To modify the automatic write off account

1. Type the fast path **AC005** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Classification > Automatic Write off Account Maintenance**.
2. The system displays the **Automatic Account Write off** screen.

6. Other Transactions

1.58. 1103 - Entrusted Funds Transfer

This option is used for transferring funds among the entrusted deposit CASA and entrusted settlement CASA. This screen is exclusively meant for transferring funds from these two accounts.

User will be able to transfer the funds from the entrusted deposit account to entrusted settlement account. These funds are the actual available amount funds which are pending for the manual transfer which refers to the principal repaid from entrusted loans which follow "Manual Remittance" mode and are lying in the entrusted deposit account. Transfer of funds from entrusted deposit CASA to entrusted settlement CASA as narrated above will be supported only for those loan accounts wherein the remittance mode is manual and for actual available balance minus the pending amount for transfer under manual transfer.

1.59. 1136 - Loans Subsidy Installment Payment Inquiry

Using this function full or partial repayment of subsidy arrears to the accounts can be done by cash. Repayment of amount greater than the arrear amount is not allowed. Additionally, installment payment through Installment Payment Inquiry (Fast Path: 1065) can be performed however, the installment amount will not include the Subsidy arrears.

Definition Prerequisites

Not Applicable

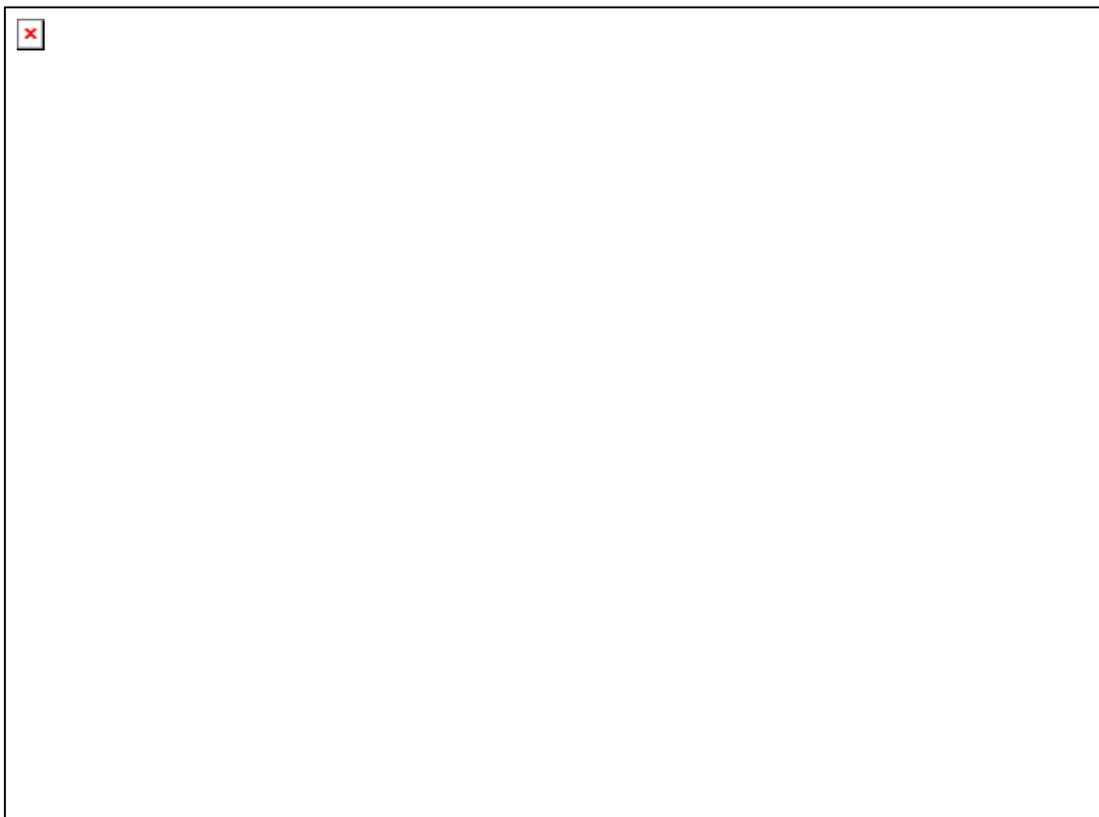

Modes Available

Not Applicable

To repay subsidy arrears

1. Type the fast path **1136** and click **Go** or navigate through the menus to **Global Definitions > Master > - Loan Subsidy Installment Payment Inquiry**.
2. The system displays the **- Loan Subsidy Installment Payment Inquiry** screen.

Loan Subsidy Installment Payment Inquiry

Field Description

Field Name	Description
------------	-------------

Field Name	Description
Account No	<p>[Mandatory, Numeric, 16]</p> <p>Type the loan account number for which the subsidy arrear re-payment is to be done.</p> <p>The short name of the account holder is populated adjacent to the account number.</p>
Account Ccy	<p>[Display]</p> <p>This field displays the currency assigned to the product, under which the account is opened.</p> <p>All the entries posted in the account are in the account currency.</p> <p>For example, if the currency assigned to a Loan product is RMB, the account opened under that product has RMB as its account currency, by default.</p>
Installment Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the installment mode from the drop-down list.</p> <p>The option is: Cash</p>
Arrear Type	<p>[Display]</p> <p>This field displays the arrear type to be paid by the customer. By default, the Subsidy option is displayed.</p>
Charging Date	<p>[Optional, Pick List, DD/MM/YYYY]</p> <p>Select the charging date for which the government wants to repay the subsidy arrears from the pick list.</p> <p>The System will validate the existence of the charging date and the relevant subsidy arrears.</p> <p>If the charging date is incorrect or the subsidy arrears against that particular charging date are already paid, the payment request will be rejected with a valid error message.</p>
Outstanding	
Principal Balance	<p>[Display]</p> <p>This field displays the actual principal balance as on the date of installment payment, considering all dues were paid on time.</p>
Amount Disbursed Today	<p>[Display]</p> <p>This field displays the amount that is disbursed on the current date, if the loan is disbursed on the current date, i.e., on the date of Loan Subsidy Installment Payment Inquiry. Else, this field will have zero value.</p>

Field Name	Description
Installment Arrears	<p>[Display]</p> <p>This field displays the total installment arrears that are outstanding in the loan account.</p> <p>Total Installment = Principal + Interest</p>
Premium Arrears	<p>[Display]</p> <p>This field displays the premium arrears.</p>
Subsidy Arrears	<p>[Display]</p> <p>This field displays the subsidy arrears.</p>
Penalty Arrears	<p>[Display]</p> <p>This field displays the penalty arrears.</p> <p>The penalty interest is levied on the customer for the non-payment of the dues. It is basically the interest on arrears commonly known as IOA (Interest on Arrears). The unpaid penalty interest arrears due but not paid is displayed.</p>
UnBilled Penalty Interest	<p>[Display]</p> <p>This field displays the unbilled penalty interest. Unbilled Penalty Interest is the interest accrued on the loan account from the last penalty charging date till the current date. The Unbilled penalty interest till date due to late payment of arrears on the account is calculated online.</p>
Up to	<p>[Display]</p> <p>This field displays the system-generated date up to which the unbilled penalty interest is calculated.</p>
Unapplied Credits	
Amount Paid Today	<p>[Display]</p> <p>This field displays the amount paid today into the loan account by way of installment payment, advance payment, partial payoff or standing instruction from CASA account.</p>
Funds in RPA	<p>[Display]</p> <p>This field displays the funds in RPA. In loans module any amount paid towards repayment of the loan is first credited to RPA.</p> <p>The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account.</p> <p>In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.</p>

Total Due [Display]
 This field displays the total amount payable by the customer.
 Total Due = Installment Arrears + Other Arrears + Penalty Arrears +
 UnBilled Penalty Interest

3. Enter the loan account number and press the <Tab> key.
4. Select the installment mode from the drop-down list.
5. Click the Ok button. The system displays the message "Do You want to continue".
6. Click the Ok button. The system displays the relevant transaction screen of Subsidy Arrears repayment By Cash.

Loan Subsidy Interest – Payment by Cash

Field Description

Field Name	Description
------------	-------------

Field Name	Description
Txn Ccy	<p>[Mandatory, Drop-Down]</p> <p>Select the transaction currency from the drop-down list.</p> <p>This is the currency in which the transaction has to be done.</p> <p>While posting the transaction entries to the account, the transaction currency is converted into the account currency, based on the defined transaction rate.</p>
Txn Ccy Rate	<p>[Display]</p> <p>This field displays the rate at which the transaction currency is converted to the local currency of the bank.</p> <p>The teller's right to change the transaction currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller.</p> <p>If the transaction currency and the local currency are same, the field takes the default value as 1, which cannot be modified.</p>
Txn Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the appropriate transaction amount. This is the cash amount that is being paid as an installment. The system will default the total arrears payable by the customer. The teller can modify this amount by reducing the default amount but the amount cannot be greater than the subsidy due amount.</p> <p>The amount is entered in the transaction currency for depositing cash. The cash deposit amount is converted into the account currency, using the transaction currency rate and account currency rate.</p>
Acy Amount	<p>[Display]</p> <p>This field displays the amount, in Loan account currency, which will be credited to the loan account. The account amount is derived as follows:</p> $\text{Account Amount} = \text{Txn Amount} * \text{Txn Ccy Rate} / \text{Acct Ccy Rate}.$ <p>The amount will be calculated in the account currency. The system posts the entries to the accounts in the account currency.</p> <p>If the local currency of the bank is different from the account currency of the customer, the amount entered in the Txn Amount field is converted to the account currency at the specified exchange rate. If the currency of the local bank and the account currency are the same, the amount in the Txn Amount field and the Account Amt field will be the same.</p> <p>Account currency is the currency assigned to the product at the product level, under which the account is opened.</p> <p>If the currency assigned to a Loan product is RMB (Chinese Yuan), the account opened under that product has RMB as its account currency.</p>
Total Arrears	<p>[Display]</p> <p>This field displays the total amount of arrears that the customer has to pay. Irrespective of the amount entered in the Txn Amount field, the system will display the total arrears due as on the date of payment.</p>

Field Name	Description
User Reference No	<p>[Optional, Alphanumeric, 40]</p> <p>Type the user reference number.</p> <p>The user reference number is assigned to identify the transaction.</p> <p>This field is enabled or disabled depending on the profit booking being enabled or disabled for the particular transaction.</p>
Customer ID	<p>[Optional, Pick List]</p> <p>Select the ID of the customer from the pick list.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
Narrative	<p>[Optional, Alphanumeric, 40]</p> <p>Type the narration.</p> <p>The field displays the default narration, based on the transaction.</p>

1.60. BAM50 - Common Billing Transactions

Using this option , you can maintain billing details of CASA and Loan accounts and billing of one time / miscellaneous service charges / insurance premium / legal fees. Online authorisation is necessary for the screen.

Definition Prerequisites

- LN057 - Loan Direct Account Opening

Modes Available

Not Applicable

1.63. LN051 - Loan Account - Offset Account Xref

Oracle FLEXCUBE supports principal offset option for loan accounts. The principal offset option allows the system to take into account the existing credit balance of CASA account by reducing the outstanding principal balance of loan account (by the credit balance amount) for the purpose of interest calculation on loan account. This facility is available to the customer if the products under which CASA and Loan account are opened, are cross referenced using the Loan Product - CASA Product Xref for Offset (Fast Path: LNM51) option.

Using this option you can cross reference the Loan and CASA accounts.

Definition Prerequisites

- LN057 - Loan Direct Account Opening
- 8051 - CASA Account Opening
- LNM51 - Loan Product - CASA Product Xref for Offset

Modes Available

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To maintain a cross reference between loan and CASA account

1. Type the fast path LN051 and click Go or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Loan Account - Offset Account Xref**.
2. The system displays the Loan Account - Offset Account Xref screen.

1.65. LN058 - Loan Interest Adjustment Transaction

Increase / decrease in the debit interest amount charged on a loan account may be required due to various reasons. Using this option, you can modify the interest computed by the system. It also provides an option to specify if the interest adjustment is applicable on the accounted interest portion or the unaccounted interest portion. If interest adjustment is done on the accounted interest portion, respective accounting entries will be passed. If the interest adjustment is done on the unaccounted interest portion, the internal system log is updated. Logs of all such interest adjustments are maintained and a report is generated for the same.

User will be able to adjust the subsidy interest using this option.

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 16] Type the account number.
Customer Name	[Display] This field displays the short name of the customer as entered in the Customer Addition (Fast Path: 8053) option.
Branch	[Display] This field displays the branch in which the account was opened.
Currency	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries are posted in the account in the account currency. The exchange rate values must be defined and downloaded. For example, if the currency assigned to a loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.
Product	[Display] This field displays the product under which the account is opened.
Outstanding Balance	[Display] This field displays the total balance of the account including the interest, penalty and other arrears, which are charged.
Interest Status	[Display] This field displays the interest status. Based on the past due days, an account can be either in normal status or suspended status. The interest status are of two types: <ul style="list-style-type: none">• Normal – If an interest is in normal status, the system does not allow adjusting suspended interest types.• Suspended - If an interest is in suspended status, the system transfers the asset to Suspended Asset GL, as set up in the product definition. In this case, all interest and other incomes are also raised in their respective suspended GLs.
Charged Upto	[Display] This field displays the last date on which the charging on the account took place. This date will be based on the schedule attached to the account, at the time of account opening.

Field Name	Description
Accrued Upto	<p>[Display]</p> <p>This field displays the last date up to which accruals took place for the account.</p> <p>For example, if the accrual frequency is defined as Monthly, then this date will be the date of the previous month end.</p>
Loan	
Regular	
This is the interest charged to an account in the EPI or IPI stage.	
Interest Charged and Due	<p>[Display]</p> <p>This field displays the total interest which has been capitalized and is still due from the customer.</p> <p>This is the maximum amount up to which the credit is allowed when the interest due from the customer is credited from this option. This amount increases when a debit type adjustment is done to the normal debit interest.</p>
Interest Suspended	<p>[Display]</p> <p>This field displays the total amount of interest suspended and due from the customer, if the account is in suspended status.</p> <p>This is the maximum amount up to which the credit is allowed, when the suspended interest due from the customer is credited from this option.</p> <p>This amount increases when a debit type adjustment is done to the suspended debit interest.</p> <p>The interest suspended amount can be adjusted if the account has NPL status.</p>
Penalty	
In case of arrears on the account, penalty interest is set up as a percentage of outstanding balance. The balance base can be principal arrears, principal and the interest arrears, all arrears or none.	
Interest Charged and Due	<p>[Display]</p> <p>This field displays the total penalty interest which has been capitalized and is still due from the customer.</p> <p>This is the maximum amount up to which the credit is allowed when the interest due from the customer is credited from this option. This amount increases when a debit type adjustment is done to the normal debit interest.</p>

Field Name	Description
Interest Suspended	<p>[Display]</p> <p>This field displays the total amount of penalty interest suspended and due from the customer, if the account is in suspended status.</p> <p>This is the maximum amount up to which the credit is allowed when the suspended penalty interest due from the customer is credited from this option. This amount increases when a debit type adjustment is done to the suspended debit interest. The interest suspended amount can be adjusted if the account has NPL status.</p>
Post Maturity	
<p>This is the interest charged on an account when the account has crossed maturity date, and arrears are still pending on the account. A separate interest rate that is to be applicable on such accounts can be set up at the product level.</p>	
Interest Charged and Due	<p>[Display]</p> <p>This field displays the total post-maturity interest which has been capitalized and is still due from the customer.</p> <p>This is the maximum amount up to which the credit is allowed when the interest due from the customer is credited from this option. This amount increases when a debit type adjustment is done to the normal debit interest.</p>
Interest Suspended	<p>[Display]</p> <p>This field displays the total amount of post-maturity interest, suspended and due from the customer if the account is in suspended status.</p> <p>This is the maximum amount up to which the credit is allowed when the suspended interest due from the customer is credited from this option. This amount increases when a debit type adjustment is done to the suspended debit interest. The interest suspended amount can be adjusted if the account has NPL status.</p>
Unacc Penalty Arrears	
Interest Charged and Due	<p>[Display]</p> <p>This field displays the total un accounted penalty interest which has been capitalized and is still due from the customer.</p>
Interest Suspended	<p>[Display]</p> <p>This field displays the total un accounted penalty interest which has been capitalized and is still due from the customer incase the account is in suspended status.</p>
Compounding Interest Arrears	
Interest Charged and Due	<p>[Display]</p> <p>This field displays the total of compounding interest arrears due and not paid under normal interest receivable GL.</p>

Field Name	Description
Interest Suspended	[Display] This field displays the he total of compounding interest arrears due and not paid under Suspended interest receivable GL.
Diverting Interest Arrears	
Interest Charged and Due	[Display] This field displays the he total of diverting interest arrears due and not paid under normal interest receivable GL.
Interest Suspended	[Display] This field displays the total of diverting interest arrears due and not paid under suspended interest receivable GL.
Adjustment Value Date	[Display] This field displays the date on which the adjustment to the interest is done.
Interest Type	[Mandatory, Drop-Down] Select the interest type from the drop-down list. Based on the interest accrual status of the account the system allows interest adjustments. The options are: <ul style="list-style-type: none"> • Accounted Interest – An accounted interest is calculated for an account, for which an interest freeze is not done. • UnAccounted Interest – The unaccounted interest is calculated for an account, for which an interest freeze is done.

Field Name	Description

Dr/Cr	[Mandatory, Drop-Down] Select the status of interest on which the adjustment is carried out from the drop-down list. The options are: <ul style="list-style-type: none"> D - This option is selected for debit interest adjustment. C – This option is selected for the credit interest adjustment.
Adjustment Amount	[Mandatory, Numeric, 13, Two] Type the adjustment amount to be done on the interest.

3. Enter the account number and press the <Tab> key.
4. Enter the relevant information and click the **OK** button.

Loan Interest Adjustment Transaction

5. The system displays the message " Authorisation required... Do You Want to continue?". Click the **Ok** button.
6. The system displays the **Authorization Reason** screen.
7. Enter the relevant information and click the **Grant** button.
8. The system displays the transaction sequence number. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

1.66. LN061 - Customer Initiated Rollover

Loan accounts are opened either with variable rate of interest or fixed rate of interest. Customers have the option to choose any one of the offering on the loan account. Usually fixed rate of interest is higher than floating rate as bank has to bear the risk of fluctuation in ROI. However, for a loan account with higher duration, interest rate in an economic environment may undergo declining trend or rising trend. In such a situation customer has an option to change the applicable ROI from variable to fixed and fixed to variable, after paying the economic cost to the bank. This process of ROI change is known as Rollover.

Rollover is an option given to a customer to alter the fixed and variable components of a loan account. The customer can request for a rollover between "fixed to fixed" or "variable to variable" or "fixed to variable" or "variable to fixed" rate at any point during the life cycle of loan.

There are two types of rollovers, auto rollovers and customer initiated rollovers. The default rollovers are defined during loan account opening. Example: A loan account is to be opened for an 'Interest only' Fixed period of 2 years and then roll over to variable rate at the completion of 2-years.

In customer initiated rollovers, the customer may come prior to the completion of the fixed rate period of the Loan and ask for extension of additional fixed rate periods. In such cases, a future dated instruction is setup such that at the end of the fixed rate period, it automatically rolls over in to the new fixed rate period. (The Loan account is re-priced for every new fixed rate period). For more information refer to Example provided at the end of the topic.

Using this option you can set up customer initiated rollovers and define future dated rollovers or current dated rollovers with a change in repayment type. There can be only one future dated rollover instruction at a given point of time.

Note: Customer initiated rollovers is not allowed in PMI stage.

6. The system displays the message "Record Added Successfully". Click the **Ok** button.

Example:

A Loan Account is opened with the following details:

Date	Rate Type	Installment Rule	Term(in Months)
01/01/2009	Fixed	IOI in Advance	36
01/01/2012	Variable	EPI	84

Case 1: Fixed to Fixed Rollovers

Suppose on 20/12/2011, the customer approaches the bank for an additional 2 year IO in Advance fixed rate period.

In such a scenario, the following set up will be done in this option:

1. The system displays the following details:

Repayment Type: Interest in Advance

Fixed Interest Expiry date: 01/01/2012

Interest Only Expiry date: 01/01/2012

Loan Maturity date: 01/01/2019

2. Rollover Date will be displayed as “Fixed rate expiry Date”.
3. Then, select the “Move to Fixed” option.
4. Repayment Type will be displayed as “Interest in Advance”.
5. Enter fixed Interest rate period as 24 months.
6. Enter Interest Only Period as 24 months.

The instruction is executed on the end of current fixed rate period.

On EOD of 01/01/2012 the loan account is rescheduled to introduce a new Interest in Advance stage.

Date	Rate Type	Installment Rule	Term(in Months)
01/01/2009	Fixed	IOI in Advance	36
01/01/2012	Fixed	IOI in Advance	24
01/01/2014	Variable	EPI	60

Case 2: Fixed to Variable Rollover

Suppose on 05/04/2010, customer approaches the bank and requests to move the account into an IO in Arrears for 2 years variable rate period followed by EPI variable rate period.

In such a scenario, the following set up will be done in this option:

1. The system displays the following details:

Repayment Type: Interest in Advance

Fixed Interest Expiry date: 01/01/2012

Interest Only Expiry date: 01/01/2012

Loan Maturity date: 01/01/2019

2. By default, the Rollover Date will be displayed as “Fixed rate expiry Date”. This date is modified to current process date (05/04/2010).
3. Then, select the “Move to Variable” option.
4. Repayment Type will be displayed as “Interest in Advance”. This is modified to “IO in Arrears”
5. Enter the Interest Only Period as 24 months.

In the above case, Interest will be computed as follows

01/04/2010 to 05/04/2010--- Interest as per IOI Fixed rate period

05/04/2010 to 01/05/2010- Interest as per Variable IO in Arrears.

On 01/05/2010, Interest will be sum of Interest as per IOI Fixed rate period + Interest as per Variable IO in Arrears.

Date	Rate Type	Installment Rule	Term(in Months)
01/01/2009	Fixed	IOI in Advance	15
01/05/2010	Variable	IOI in Arrears	24
01/05/2012	Variable	EPI	89

1.67. LN062 - Loan Account Overridable Attributes Maintenance

The IOI stage can be introduced at various stages in the Loan life cycle. Using this option, you can define the maximum IOI term allowed for a particular loan account. The maximum IOI term defined at the account level overrides the maximum IOI term defined at the schedule level. The term is set at the account level based on the customer's capability of repayment; if it is high, then it is considered as an eligibility for the maximum interest only period and vice versa. The repayment capability of the customer is also decided based on the preferred loan term.

Definition Prerequisites

- LN057 - Loan Direct Account Opening

Modes Available

Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To modify the maximum IOI term at account level

1. Type the fast path **LN062** and click **Go** or navigate through the menus to Transaction Processing > Account Transactions > Other Transactions > Loan Account Overridable Attributes Maintenance.
2. The system displays the **Loan Account Overridable Attributes Maintenance** screen.

1.69. LN444 - Miscellaneous Charges Waiver

Using this option you can waive miscellaneous charges . These charges are arrears that have been raised on the account, which are still pending payment. Payment pending may be part or all of arrears assessed. You can waive the entire amount due, but cannot modify it.

There is no effect of miscellaneous charges waiver on principal outstanding. If miscellaneous charges are a part of interest base, then the interest base gets updated accordingly and the interest base gets reduced by the waived amount. If miscellaneous charges are a part of Penalty interest base, then the Penalty interest base gets updated accordingly and the Penalty interest base gets reduced by the waived amount. Miscellaneous charges once waived cannot be reversed.

Definition Prerequisites

- LN057 - Loan Direct Account Opening
- Arrear type like Service Charges
- Legal Fees or Outgoings type of unpaid arrears should be available in the loan account

Modes Available

Not Applicable

To waive miscellaneous charges for a loan account

1. Type the fast path **LN444** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Miscellaneous Charges Waiver**.
2. The system displays the **Miscellaneous Charges Waiver** screen.

1.70. LNM20 - Loan Product Transfer

Using this option you can record the account transfer instruction. The actual account transfer will be processed in the end of the day batch. The loan product transfer option is required by the bank primarily to move the asset, interest and charges balances to the new product. The product transfer option will allow change of product provided there is no change in the schedule parameters.

This option is required for error correction also, if a user erroneous opens a loan account under incorrect product code.

Definition Prerequisites

- LN057 - Loan Direct Account Opening
- LN521 - Account Schedule

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To transfer a loan product

1. Type the fast path **LNM20** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Loan Product Transfer**.
2. The system displays the **Loan Product Transfer** screen.

Loan Product Transfer

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 16] Type the loan account number for which product transfer instruction is to be recorded during the day. This loan account number needs to be validated with the database. The account should not be written off, frozen, closed today / closed or in PMI stage. If the loan account is undisbursed, the validations around the new product code and schedule code will not apply.
Customer Name	[Display] This field displays the full name of primary holder of the account.
