4.5. BA008 - Old New Customer Inquiry	326
4.6. CI041-KYC Verification Status Inquiry*	329

1. Customer Information Capture

Oracle FLEXCUBE supports capture of customer details at a global level. The CIF module encompasses the whole process of adding a new customer to the bank's customer base, subsequent maintenance of their details and cross-references between the customer and their accounts in the bank.

1.1. 8053 - Customer Addition

Using this option you can add the details of a new customer to the customer information database . A customer can be added to the system at initiation of an account opening, or even before opening an account.

During the process of account opening, the system validates if the customer is new or an existing customer. If the given details of the customer do not meet the search criteria, the system prompts the teller stating that 'It is a new customer' and displays this option.

The system also restricts the teller from operating the account of a customer, who is a staff of the bank for security reasons.

Definition Prerequisites

- CIM01 - Signature Types Maintenance
- CIM02 - Business Type Maintenance
- CIM03 - Customer Prefixes Maintenance
- CIM04 - Profession Codes Maintenance
- CIM08 - Customer Types Maintenance
- BAM75 - State Codes Maintenance
- BAM72 - Customer City Maintenance

Modes Available

Not Applicable

To add a new customer

1. Type the fast path **8053** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Addition**.
2. The system displays the **Customer Addition** screen.

Field Description

Field Name	Description
Home Branch	[Mandatory, Pick List] Select the home branch of the customer from the drop-down list. It is defaulted to the branch code of the user who is logged in.
Customer IC	[Mandatory, Alphanumeric, 20] Type the identification code of the customer. A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.
Category	[Mandatory, Drop-Down] Select the category of the customer from the drop-down list. For example, Tax Paying Individual, Church, Foreign Corporate, etc. You can choose to set up multiple customer types to segregate the customers using the Customer Types Maintenance (Fast Path: CIM08) option. Further processing such as tax applicable, Service Charges, etc., are levied based on the customer type.

Field Name	Description
CIF Type	[Display] This field displays the customer type.
IC Type	[Display] This field displays the IC type of the customer, based on the option selected in the Category field. An IC type is internally linked to every customer category/customer type. This field is displayed when the category is selected for the customer.
Language	[Mandatory, Drop-Down] Select the appropriate language from the drop-down list. It is the language in which the bank would interact with the customer.
Customer ID	[Display] This field displays the ID of the customer. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.
Full Name	[Mandatory, Alphanumeric,40] Type the full name of the customer.
Salutation	[Mandatory, Drop-Down] Select the customer salutation from the drop-down list.
First Name	[Mandatory, Alphanumeric,30] Type the first name of the customer.
Middle Name	[Mandatory, Alphanumeric,25] Type the middle name of the customer.
Last Name	[Mandatory, Alphanumeric,20] Type the last name of the customer.
Short Name	[Mandatory, Alphanumeric, 20] Type the short name of the customer. The short name is defaulted when the user enters the full name of the customer. The user can modify it, if required. The full name as well as the short name will be displayed in capital letters only, even if it is entered in small letters.
Address	[Mandatory, Alphanumeric, 35] Type the address of the customer. It has 3 lines for the address. Special Characters can also be entered.
Town/City	[Mandatory, Pick List] Select the name of the town or city, where the customer resides, from the pick list.
State	[Mandatory, Drop-Down] Select the name of the state, where the customer resides, from the drop-down list.

Field Name	Description
Country	[Mandatory, Drop-Down] Select the name of the country, where the customer resides, from the drop-down list.
Nationality	[Mandatory, Drop-Down] Select the nationality of the customer from the drop-down list.
Country of Residence	[Mandatory, Drop-Down] Select the customer's country of residence from the drop-down list.
Zip	[Mandatory, Alphanumeric, 10] Type the zip code of the city where the customer resides.
Birth/Reg Date	[Mandatory, Pick List, dd/mm/yyyy] Select the birth date in case of the individual customer or the registration date in case of a corporate customer. Based on the details entered in this field the system identifies a customer as a major or a minor.
Resi Phone No	[Optional, Alphanumeric, Three, Five, 15] Type the residence contact number of the customer. <div>Note: System allows to enter the special characters except “ @ & ^ > < !.</div>
Customer Education	[Conditional, Drop-Down] Select the education of the customer from the drop-down list. This field is disabled for corporate type of customer.
Mobile No	[Optional, Numeric, 12] Type the mobile number of the customer.
Email ID	[Optional, Alphanumeric, 40] Type the email address of the customer.
Gender	[Conditional, Drop-Down] Select the gender of the individual customer from the drop-down list. This field is disabled for corporate type of customer.
Marital Status	[Conditional, Drop-Down] Select the marital status of the individual customer from the drop-down list. This field is disabled for corporate type of customer.
Staff	[Conditional, Check box] Select the Staff check box, if the customer is a staff of the bank. This field is disabled for corporate type of customer.
Employee Id	[Conditional, Alphanumeric, 40] Type the employee id of the bank staff. This field is enabled if the Staff check box is selected.
Business	[Conditional, Pick List] Select the business of the corporate customer from the pick list. The values displayed in the option are the business segments to which the customer's belong. Each business type is defined in the Business Type Maintenance (Fast Path: CIM02) option. This field is disabled for individual type of customer.

Field Name	Description
Profession	[Conditional, Drop-Down] Select the profession of the customer from the drop-down list. The profession codes are maintained in the Profession Codes Maintenance (Fast Path: CIM04) option. This field is disabled for corporate type of customer.
Mother's Maiden Name	[Conditional, Alphanumeric, 252] Type the mother's maiden name. This field is enabled for individual customers.
MIS Class	[Optional, Pick List] Select the MIS class from the pick list.
MIS Code	[Optional, Pick List] Select the MIS code from the pick list.
Group Code	[Optional, Pick List] Select the group code to which the customer belongs. If no value is selected, group code is defaulted to '0'.
Group Name	[Display] This field displays the description of selected group code.

3. Enter the customer IC and select the category from the drop-down list.
4. Click the **Val. Customer** button. The system will validate the existence of the customer using the above combination.
5. The system displays the message "This is a new Customer". Click the **OK** button.
OR
The system displays the message "This is an existing Customer". The system will disable the addition process.
6. Enter the contact details, address details, and the personal information of the customer.
7. Click the **Ok** button.
8. The system displays the unique customer identification number. Click the **Ok** button.

1.2. CI501- Assisted Customer Creation

Using this option you can add the details of a new customer or a prospect. A customer can be added to the system at the time of account opening, or before it. During the process of account opening, the system validates to check if the customer is new or an existing customer.

You can also perform a CRM search using this option. The detail of the customer added in Oracle FLEXCUBE is also updated in CRM.

Note: The validations provided in this option are based on **Oracle FLEXCUBE**.

Field Description

Field Name	Description
Address	[Mandatory, Alphanumeric, 35, Three Lines] Type the address of the customer. It has three lines for the address. It accepts character, numbers and "#" as special character.
State	[Mandatory, Drop-Down] Select the name of the state, where the customer resides, from the drop-down list.
Town/City	[Mandatory, Drop-Down] Select the name of the town or city, where the customer resides, from the drop-down list. This can be configured to be optional, if the bank so desires.
Country	[Mandatory, Drop-Down] Select the name of the country, where the customer resides, from the drop-down list.
Country Of Residence	[Mandatory, Drop-Down] Select the name of the country where the customer resides, where the customer resides, from the drop-down list.
Postal Code	[Mandatory, Numeric, 10] Type the postal code of the customer.

Field Name	Description
Phone(Resi)	[Mandatory, Numeric, 24] Type the residence phone number of the customer.
Mobile	[Optional, Numeric, 10] Type the mobile number of the customer.

7. Click the **Ok** button.
8. The system displays the message "Transaction Completed successfully". Click the **Ok** button.

1.3. CIM09 - Customer Information Master Maintenance

This back-office maintenance allows for maintenance of additional customer information apart from the basic customer information added during customer addition. Since the customer addition is done as a separate transaction, the Add mode is disabled in this option.

Using this option, a customer can opt for spend analysis at any point of time that is on the date of account opening or at any day before the account is closed.

This option also enables the spend analysis for all the open accounts under the customer who is a primary holder.

Definition Prerequisites

- 8053 - Customer Addition
- CIM06 - Income Slabs Maintenance
- CIM07 - Relation Master Maintenance

Modes Available

Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To modify the customer information master details

1. Type the fast path **CIM09** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Information Master Maintenance**.
2. The system displays the **Customer Information Master Maintenance** screen.

Customer Block Status	<p>[Display]</p> <p>This check box displays whether the customer is blocked for transaction.</p>
Reason for Risk category change	<p>[Optional, Picklist]</p> <p>Select the reason code applicable for risk category change.</p> <p>The list of reason codes defined in BAM40 for CIM09 will be displayed in the pick list</p>

Field Name	Description
Reason	[Display] This field displays the reason for the customer block.
Verification Status	[Optional, Check Box] Select the Verification Status check box to indicate confirmation of the verification for the customer.
Verification Status	[Optional, Check Box] Select the Verification Status check box to indicate confirmation of the verification for the customer.
Risk category review date	[Optional,Date] Enter the date on which the risk category is updated.
Reason for Verification	[Optional, Drop-Down] Select the reason for the status verification from the drop-down list.
Spend Analysis	[Optional, Check Box] Select the Spend Analysis check box, to enable spend analysis for all the accounts under the customer. By default it is un-selected.
IC Details	
Category	[Display] This field displays the category of the customer. For example, Tax Paying Individual, Church, Foreign Corporate, etc. You can choose to set up multiple customer types to segregate the customers using the Customer Types Maintenance (Fast Path: CIM08) option. Further processing such as tax applicable, Service Charges, etc., are levied based on the customer type.
IC Type	[Display] This field displays the IC type of the customer, based on the category to which the customer belongs. This is maintained in the Customer Types Maintenance (Fast Path: CIM08) option.
Current IC No	[Display] This field displays the current IC number of the customer.
Old IC No	[Display] This field displays the old IC number of the customer, if any.
Customer Name	

Field Name	Description
First Name	[Display] This field displays the first name of the account holder.
Middle Name	[Display] This field displays the middle name of the account holder.
Last Name	[Display] This field displays the last name of the customer.

Mailing Address

This is the address to which customer's account statements are mailed. The system, by default displays the address mentioned in the **Customer Addition** option (Fast Path: 8053). To modify the mailing address of the customer, the following details are captured:

The screenshot shows the 'Customer Information Master Maintenance*' window. The 'Search Criteria' is set to 'Customer Short Name' with a search string of 'ABH'. The 'IC' is 'CUSC1' and 'ID' is '603895'. The 'Home Branch' is 'SANDOZ - MUMBAI'. The 'Full Name' is 'ABHAY PATIL' and 'Short Name' is 'ABHAY PATIL'. The 'Mailing Address' tab is selected under 'Composite MIS Info'. The address fields are: Address (567, XYZ Road), City (MUMBAI), State (MAHARASHTRA), Country (INDIA), Postal Code (400058), Telex/Hand Phone, Fax No., Mobile, and Addr Change Date (01/01/1800). The 'Phone(Office)', 'Phone(Res.)', and 'Contactable' fields are also present. The 'Updated on' date is 04/02/2014. The 'Address Change Advice' checkbox is checked. The 'Record Details' section shows 'Input By: TTEST10', 'Authorized By: TTEST10', 'Last Mnt. Date: 04/02/2014 16:48:18', 'Last Mnt. Action: Authorize', and 'Authorized' checkbox checked. The bottom bar contains buttons for Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry, and a toolbar with UDF, Ok, Close, and Clear.

Field Description

Field Name	Description
Address	[Mandatory, Alphanumeric, 35] Type the mailing address of the customer. The address can be mentioned in three lines.

Field Name	Description
City	<p>[Mandatory, Pick List]</p> <p>Select the name of the city where the customer's mails should be sent from the pick list.</p>
State	<p>[Mandatory, Pick List]</p> <p>Select the name of the state where the customer's mails should be sent from the pick list.</p>
Country	<p>[Mandatory, Drop-Down]</p> <p>Select the name of the country, where the customer's mails should be sent, from the drop-down list.</p>
Phone (Office)	<p>[Optional, Alphanumeric]</p> <p>Type the customer's office contact number. It is split into 4 parts:</p> <ul style="list-style-type: none"> • Country code • Area Code • Phone Number • Extension <div> Note: System allows to enter the special characters except “ @ & ^ > < . </div>
Postal Code	<p>[Mandatory, Alphanumeric]</p> <p>Type the postal code of the customer's mailing address.</p>
Phone (Res.)	<p>[Optional, Alphanumeric]</p> <p>Type the customer's residential contact number. It is split into 4 parts:</p> <ul style="list-style-type: none"> • Country code • Area Code • Phone Number • Extension <div> Note: System allows to enter the special characters except “ @ & ^ > < . </div>
Telex/ HandPhone	<p>[Optional, Alphanumeric, 15]</p> <p>Type the mobile number of the customer.</p>

Field Name	Description
Contactable	[Display] This field displays whether the customer is contactable. <ul style="list-style-type: none"> • “Y” denotes that the customer is contactable on any of the given telephone number. • “N” denotes that the customer is not contactable on any of the given telephone number. • “NE”, (not established) denotes that the telephone number is proper but it was not answered or the customer does not reside there.
Fax No	[Optional, Numeric, 15] Type the fax number of the customer.
Updated on	[Display] This field displays the date on which the last contact update was made.
Mobile	[Optional, Numeric, 15] Type the mobile number.
Address Change Advice	[Optional, Check Box] Select Address Change Advice check box to generate address change advice whenever any change is made in the customer details.
Address Change Date	[Display] This field displays the date on which the address change is made.

Permanent/Registration Address

The system, by default displays the address mentioned in the **Customer Addition** (Fast Path: 8053) option as the permanent address of the customer. This address can however be modified using this maintenance.

12. The customer information details are modified once the record is authorised.

1.4. CIM11 - Customer Detail Maintenance

Using this option you can maintain additional data for individual customer. The background information of the customer such as their employment details and relationship details can be captured in this option.

These details, though not mandatory, are in addition to the ones which have been maintained in the **Customer Information Master Maintenance** (Fast Path: CIM09) option.

Definition Prerequisites

- CIM04 - Profession Codes Maintenance
- 8053 - Customer Addition
- 7101 - IC No - Short Name Change

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To add the customer details

1. Type the fast path **CIM11** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Detail Maintenance**.
2. The system displays the **Customer Detail Maintenance** screen.

Short Name	<p>[Display]</p> <p>This field displays the short name of the customer.</p> <p>The short name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.</p> <p>The customer short name can be changed through the Change Customer Name/IC Number (Fast Path: 7101) option.</p>

3. Click the **Add** button.
4. Select the search criteria from the drop-down list.

5. Enter the search string and press the <Tab> or <Enter> key and select it from the pick list.

Customer Detail Maintenance

The screenshot displays the 'Customer Detail Maintenance' window. At the top, the title bar reads 'Customer Detail Maintenance*'. Below the title bar, there are search criteria fields: 'Search Criteria' (a dropdown menu), 'Search String' (a text box containing 'lak'), 'IC' (a text box containing '8956'), 'ID' (a text box containing '606900'), 'Full Name' (a text box containing 'LAKHAN'), 'Short Name' (a text box containing 'LAKHAN'), and 'Home Branch' (a text box containing '9999'). Below the search criteria, there are three tabs: 'Employment Details', 'Prev. Employment Details', and 'Spouse/Parent Details'. The 'Employment Details' tab is selected. It contains fields for 'Occupation' (a dropdown menu with 'CHARTERED ACCOUNTANT' selected), 'Designation' (a text box containing 'Accountant'), 'Tenure' (a dropdown menu with 'Permanent' selected), and 'Annual Income' (a text box containing '5,00,000.00'). Below the employment details, there is a section titled 'Employer/Business Detail' which contains fields for 'Name' (a text box containing 'Test trial'), 'Address' (a text box containing 'Mumbai'), 'City' (a text box containing 'Mumbai'), 'State' (a text box), 'Country' (a text box), 'Phone' (a text box), 'Telex No' (a text box), 'Fax No' (a text box), 'Postal Code' (a text box), 'Mobile' (a text box), 'Email ID' (a text box), 'Number of years in present Employment/Business' (a text box containing '25'), and 'Retirement age' (a text box containing '58'). At the bottom of the window, there is a 'Record Details' section with a table. The table has five columns: 'Input By', 'Authorized By', 'Last Mnt. Date', 'Last Mnt. Action', and 'Authorized'. The 'Input By' column contains the text 'Test trial'. Below the table, there are buttons for 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', and 'Inquiry'. At the bottom right, there are buttons for 'UUF', 'Ok', 'Close', and 'Clear'.

Field Description

Field Name	Description
Major Shareholder Names	[Optional, Alphanumeric, 40] Type the name of all the major shareholders of the company.
Relationship	[Optional, Pick List] Select the appropriate relationship from the pick list. It is the relationship of the shareholder to corporate customer.

7. Click the **Ok** button.

8. The system displays the message "Record Authorised". Click the **Ok** button.

1.6. CI052 - Customer Document Maintenance

Using the **Document Plan Code Maintenance** (Fast Path: ORS35) option you can create a document plan code. **Oracle FLEXCUBE** allows you to attach a document plan at the customer level or at account level. The documents are attached at the customer level based on the plan code selected for a particular customer type in the **Customer Type Maintenance** (Fast Path: CIM08) option.

After a customer is added, you can capture the details of documents submitted by the customer as per bank's norms by performing document maintenance. The system tracks the mandatory documents based on the receipt date. The mandatory documents need to be marked as received. The non-mandatory documents can be marked either as received or waived.

Using this option you can maintain the document status for each customer.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Not Applicable

To maintain document status for a customer

1. Type the fast path **CI052** and click **Go** or navigate through the menus to Transaction Processing > **Account Transactions** > **CASA Account Transactions** > **Cash** > **Customer Document Maintenance**.
2. The system displays the **Customer Document Maintenance** screen.

1.10. CIM60 - Customer Contact Details Updation

You can mark a customer as contractible/non-contractible using this option. Further you can also maintain customer contact details for a particular customer. This screen can also be accessed through hotkey **ALT+E** from the following screens:

- CIM39 - Customer ID Change Maintenance
- CI141 - Customer To Customer Relation
- CIM13 - Customer Memo Maintenance
- CIM11 - Customer Detail Maintenance

For a detailed customer related maintenance you can use the **Customer Information Master Maintenance** (Fast Path: CIM09) option.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Modify, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To modify customer contact details

1. Type the fast path **CIM60** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transaction > Customer Contact Details Updation**.
2. The system displays the **Customer Contact Details Updation** screen.

1.11. TDS05 - Customer Special Tax Code Maintenance

Using this option, you can maintain special tax codes for a specified period at customer level. After changing tax codes, the additional tax 1 and additional tax 2 is applicable as maintained in the **Additional Tax Maintenance** (Fast Path: BAM51) option. The new tax codes are updated during BOD after remote authorization. During account opening, if special tax code exists for the customer, then the special tax code will be applicable for the account.

Note 1 : If special tax code has to be maintained, then tax waiver should be discontinued. Both cannot coexist.

Note 2: You can only delete the special tax codes which have not been activated.

Definition Prerequisites

- 8053 - Customer Addition
- BAM51 - Additional Tax Maintenance

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To maintain customer special tax codes

1. Type the fast path **TDS05** and click **Go** or navigate through the menus to **Global Definitions > Master > Customer Special Tax Code Maintenance**.
2. The system displays the **Customer Special Tax Code Maintenance** screen.

Reason Description	[Mandatory, Drop-Down] Select the appropriate reason from the drop-down list. The system displays the reason code along with the reason description. The reason codes are maintained using the Reason Codes Maintenance (Fast Path: BAM40) option.
Reference Details	[Optional, Alphanumeric, 120] Type the additional details, if any.

10. Click the **Ok** button.
11. The system displays the message "Record Added...Authorisation Pending..". Click the **Ok** button.
12. The customer special tax codes are added once the record is authorised.

2. Customer Image Capture

The system allows the banker to capture the specimen signature and/or the photograph of customer's to facilitate the online verification process for the teller. This feature will replace the manual storage and retrieval of specimen signatures and photographs. A customer can be linked with a maximum of one signature and one photograph. In an offline scenario, these images can be retrieved from the customer's home branch.

The specimen signature and photograph of the customer is scanned and stored as a .jpeg or .jpg image. The teller can attach the scanned image to an account using the Linking Customer Image option.

2.1. 7102 - Link Cust Image

Using this option the photograph and/or specimen signature of the customer can be linked to a **Oracle FLEXCUBE** customer. This feature of capturing signature and identity photograph of the customer is required by the teller to facilitate the online verification process.

This linking can be done in the online mode using the **FLEXCUBE** Customer ID or Customer IC and Customer type combination. A customer can be linked with a maximum of one signature and one photograph.

In an offline scenario, these images can be retrieved from the customer's home branch. The supervisor can authorise the photograph and signatures linked to the customer, using the **Authorise Captured Image** (Fast Path: 7104) option. The image can be viewed only after it has been authorised.

Definition Prerequisites

5. Click the **Ok** button.
Note: If the signature/image is not attached to the customer, the "Image not available" error message appears.
6. The system displays the **Signature/Image** screen.

Signature/Image

7. Type the appropriate path for the image file or click the **Browse** button to select the image file. The system will display the image to be linked.
8. Click the **Ok** button.
9. The system displays the message "Image Linked Successfully. Authorisation Pending". Click the **Ok** button.
10. The modified image is linked to the account successfully once the record is authorised.

2.6. 3000 - Thumb Print Interface

Using this option you can verify the thumbprint of the customer. It is an interface with the thumbprint application online and displays whether the verification is successful or not.

It will also display the customer ID and all the accounts linked to the customer ID. Once the account in which the customer wants to perform transaction is selected, you can navigate to that particular screen, and the details of the account number are displayed in the subsequent screen.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Not Applicable

To verify the thumb print

1. Type the fast path **3000** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Thumb Print Interface**.
2. The system displays the **Thumb Print Interface** screen.

Scan Cancel Clear

Field Description

3. Connect the thumb scanner to the system.

4. Click the **Scan** button.
5. The system displays the message "Please Insert The Card".
6. Insert the smart card in the scanner and click the **Ok** button.
7. The system displays the message "Sensor Feedback".
8. Scan the thumb impression of the customer on the sensor.
9. The system displays the message "Verification Successful". Click the **Ok** button.
10. The system displays the customer account numbers.
11. Click the appropriate account number. Once the account number is selected the customer session is started.
12. Enter the fast path for the required transaction. The account details are automatically populated on the screen.

Note: If the thumb verification is not successful then the user will be prompted for dual authorization. If the user clicks the **Cancel** button then the transaction is aborted. If **Ok** button is clicked then user has to enter the supervisor login details. Once the login details are verified then user can proceed with the transaction else the transaction is aborted.

3. Customer Based Transactions

Oracle FLEXCUBE provides the comprehensive customer-based information to a user of the financial service provider. The customer-based transaction allows the user to search for all details of the customer. Inquiries related to the account, can be conducted based on the customer search and the name of the customer can be changed on genuine circumstances, etc.

3.1. 7101 - IC No - Short Name Change

Using this option you can change the Customer IC, Short Name, or Full Name.

Due to various reasons, customer's may want to change their name on records; for example, a merger or acquisition may result change of name for a corporate.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Not Applicable

To change customer short name or IC number

1. Type the fast path **7101** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > IC No – Short Name Change**.
2. The system displays the **IC No - Short Name Change** screen.

3.3. 7118 - Delete Customer Image

Using this option, the photograph and/or specimen signature of the customer can be deleted from the Oracle FLEXCUBE customer. This feature of capturing signature and identity photograph of the customer is required by the teller to facilitate the online verification process. This linking can be done in the online mode using the FLEXCUBE Customer ID or Customer IC with Customer type combination. A customer can be linked with a maximum of one signature and one photograph.

In an offline scenario, these images can be retrieved from the customer's home branch. The supervisor can authorise the photograph and signatures linked to the customer, using the Authorise Captured Image (Fast Path: 7104) option. The image can be viewed only after it has been authorised.

Using the (Fast Path: 7102) Link Cust Image option, you can link photograph and/or specimen signature of the customer. If in case wrong image is linked and noticed at the time of authorization, then you can delete the unauthorized image using the Cancel option. If in case wrong image is linked/image need to be deleted after authorization, then you can delete the authorized image using the Delete option for the selected customer using this option

Definition Prerequisites

- 7102 - Link Cust Image
- 7104 - Authorise Captured Image

3.5. CI162 - Combined Statement Plan

Using this option you can prepare a combined statement of customer accounts. You can maintain instructions for providing a single statement to customers who own multiple accounts. Each combined statement plan must have at least two accounts associated with it.

An account cannot be included in more than one statement plan. A plan number is given to each combination of accounts that are associated with a plan. Closed accounts cannot be included in statement plans. Each account in the combined statement plan will have a flag called Details/Summary.

If the flag is selected as Summary, then only summary will be printed in the combined statement.

The default value for Details/Summary flag will be as follows:

- Details- For CASA with statement (including OD account)
- Summary- For CASA with passbook, Term Deposit & Loan accounts (FCR and FCC)

The following account types are available for the combined statement:

- Current account
- Savings account with statement
- Savings account with passbook (can be identified with the passbook flag at the account level)
- Term deposit accounts
- Loan accounts(in FCR and FCC).

Also the bank can decide to have bank level maintenance as ' Automatic combined statement plan generation' during FCR setup. In this case automatic inclusion of accounts in combined statement plan process happens in the end of day process.

For Example:

If a customer has at least one CASA account with relation as **SOW**⁹ and Non Syariah and is not part of any combined statement plan, opens any new CASA (With relation as SOW), TD or Loan account then that account along with existing CASA account will be automatically included in Automatic Combined Statement Plan i.e. Plan No.1.

However, if the customer doesn't want or have a special request for his/her combined statement structure, branch can uncombined the statement of accounts manually. In case the customer opts for more than one combined statement, the user can create separate combined statement plan manually. The address in the combined statement plan will be defaulted with the customer mailing address (at the time of automatic plan generation or manual addition).

By default, customer accounts (under 1 CIF) will be included into one combined statement automatically except joint account (And/Or). If customer requests, the joint accounts will be included in the combined statement manually.

If there is only one account in a combined statement plan, because of closure of other accounts, then combined statement plan will be deleted automatically and only single statement will be printed for the month.

If there are more than one combined statement plan for the customer, then the new accounts will be combined with the high priority plan i.e. the one created first.

The maximum number of combined statement plans which can be created per customer can be 99. Any user generated Combined Statement Plan will start from 2 and will carry on till 99 as plan

⁹(Sole Owner)

number 1 is reserved for the system. The maximum number of accounts that can be included in a combined statement plan can be 9999.

Note: The system automatically authorises this transaction.

Definition Prerequisites

Summary: If this option is selected, then the system will include this account in the combined statement in the summary mode. <p>For CASA with statement (including OD Account), default value will be Detail.</p> <p>For CASA with passbook, Loan and TD Accounts, default value will be Summary.</p> <p>For the system initiated combined statement plans, the default options, based on the conditions above, will be set by the system.</p>

8. Click the **Ok** button.
9. The system displays the message "Record Authorised...Click Ok to Continue". Click the **Ok** button.

Examples for combined statement plan

Example 1: When a new customer opens account,

On 01/01/2007, a customer comes to branch and opens one CASA account No.111.

The customer has no other accounts other than the account which is opened during the day. Hence no system initiated combined statement plan will be generated in the EOD.

On 25/01/2007, customer comes to the branch for opening another TD account.

During the EOD, system will check whether any CASA accounts are available for the customer.

In this case, CASA Account No.111 already exists. Hence, in the EOD, a new system initiated combined statement plan (plan NO 1) will be generated and both the CASA account (111) as well as the newly opened TD account will be introduced in that plan.

Example 2:

When there are some TD accounts already available for the customer, and customer ZZZ has three TD accounts and one loan account with the bank. Since there are no CASA accounts, no combined statement will be created for the customer as combined statement plan requires at least one CASA account.

On 25/01/2007, customer ZZZ opens a CASA account with statement (passbook flag not ticked).

In the EOD, system will check whether there is any other account exists for the customer.

In this case, there are three TD accounts and one loan account available. Hence, system will create a combined statement plan and include the CASA account with statement along with three TD accounts and one loan account.

3.6. CIM10 - Customer NLS Details Maintenance

Using this option you can capture the customer address in native language such as Arabic, Japanese, etc., which aids in delivering correspondence through courier/post.

Definition Prerequisites

- CIM03 - Customer Prefixes Maintenance
- 8053 - Customer Addition
- 7101 - IC No - Short Name Change

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To maintain customer NLS details

1. Type the fast path **CIM10** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer NLS Details Maintenance**.
2. The system displays the **Customer NLS Details Maintenance** screen.

3.7. CIM12 - Customer Contact/Complaint log Maintenance

Using this option, you can maintain a log of all contacts that a customer has had at the bank to help maintain continuity of all the discussions between the customer and various bank officers. You can also capture all customer complaints/requests, status of the complaints like whether it has been followed up or not, closed or not, etc.,

This facility is available to Customer/Non Customer (even non-customers can call for some requests or information to the call centre)/ bank staff.

Any fees corresponding to a request will have to be manually handled by the bank.

For Example:

Customer calls up the call center and requests for TPIN Activation on 17th Sep 2009, User has to check 'Customer Complaint/Request log' radio button and by default the request date will be captured as 17th Sep 2009.

User can choose:

- Nature of Request - Service
- Criteria of Request - Account Maintenance
- Measurement - E Channel Maintenance
- Detail Measurement - TPIN Activation

On clicking **OK** the request will be added.

If the request is modified on 19th Sep 2007, then the TPIN of the customer will be activated and the request will be closed. User will visit the screen in Modify mode and the date will be defaulted to 19th Sep 2007 and Officer ID will be modified to the current officer doing the modification (which can be modified).

- Status - The user will change as 'Closed'.
- Description - The user modifies the details.

Note: The system automatically authorises this transaction.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Add, Modify, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To add the customer contact/complaint log

1. Type the fast path **CIM12** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Contact/Complaint log Maintenance**.
2. The system displays the **Customer Contact/Complaint log Maintenance** screen.

3.8. CIM13 - Customer Memo Maintenance

Using this option, you can maintain a note on preferences or special status of a customer which can help in dealing with the customer appropriately at any point of time. A memo maintained at the customer level is applicable for all accounts held by a customer for which this customer is the primary customer.

Customer Memo is a string attached at the customer level which can be displayed when the teller does transactions on **Oracle FLEXCUBE** branch. If the memo severity is high, the memo is automatically displayed when performing a transaction from branch and the system will enforce an authorisation. In case of a low severity memo, the teller can choose to see the memo and the authorisation requirement is not enforced. However system will not validate the existence of memo in case of batch upload.

Note: This transaction is automatically authorised.

Definition Prerequisites

- 8053 - Customer Addition
- Customer Account should be opened

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Authorize, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To add the customer memo

1. Type the fast path **CIM13** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Memo Maintenance**.
2. The system displays the **Customer Memo Maintenance** screen.

3.9. CIM15 - Customer Type Xref for Primary Customer ID Change

Customer Type Xref for Primary Customer id Change is a maintenance to maintain the cross reference of the From and To Customer Types for allowing Primary Customer id Change.

If the cross reference of From and To Customer types is not available then the primary customer id change will not be allowed. The combination of From and To Customer type will always be unique i.e. duplicate records for the same combination cannot exist.

Definition Prerequisites

- 8053 - Customer Addition
- 8051 - CASA Account Opening

Modes Available

Add, Modify, Delete, Cancel, Amend, Inquiry, Authorize

To modify customer type xref for primary customer ID change

1. Type the fast path **CIM15** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Type Xref for Primary Customer ID Change**.
2. The system displays the **Customer Type Xref for Primary Customer ID Change** screen.

3.11. CIM18 - CBR Details Maintenance

The **CBR**¹⁰ details are certain user-defined features or attributes, based on which the customer can be grouped or categorized under a common language, location, salary structure, etc. CBR codes are useful for the Central Bank Reporting purposes.

Using this option you can create user defined fields which were not present in the various customer maintenance options which are a part of the standard **FLEXCUBE** Release. The bank can define the labels as well as contents of fields using the **User Defined Fields Maintenance** (Fast Path: BA078) option and **CBR PickLists Maintenance** (Fast Path: BA080) option.

Defining these categories facilitates generating MIS reports, beyond the standard reports available within **Oracle FLEXCUBE**.

Definition Prerequisites

- BA080 - CBR PickLists Maintenance
- BA078 - CBR Label Maintenance
- 8053 - Customer Addition

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add the CBR code details

1. Type the fast path **CIM18** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > CBR Details Maintenance**.
2. The system displays the **CBR Details Maintenance** screen.

3.13. CIM25 - Reminder

This option is used for setting up reminders by bank users on behalf of the customers. A single reminder can be setup having the same reminder date and expiry date. Frequency based reminders can also be defined which will generate as per the frequency specified till the reminder expiry date.

Generation of the reminders will be done in beginning of day process. In case of frequency based reminders, the number of days before which the reminder should be displayed can also be specified.

Reminder will be displayed on the customer's FCDB dashboard. Reminders displayed will have the ability to be dismissed. Once dismissed, it will no longer be displayed on the dashboard.

Reminders due for each day will be generated using a scheduler driven batch program scheduled to run every day. The generated reminders will be stored which will be accessed by external systems for retrieval and display of reminders at their end.

The Reminder instances that are expired or that got dismissed will be archived.

The following information related to Reminders will be captured –

- Reminder Type
- Reminder Date
- Reminder Subject
- Reminder Message
- The user who created the Reminder
- Frequency of Reminder generation
- View days of Reminder

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To set the reminders

1. Type the fast path **CIM25** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Reminder**.
2. The system displays the **Reminder** screen.

3.15. CIM30 - Customer Maturity Processing Maintenance

Banks have different type of customers like minors, major individuals, corporate customer's, etc and the customer details are added to the customer information database using the **Customer Addition** (Fast Path: 8053) option.

Using this option **Oracle FLEXCUBE** allows you to parameterize the customer status change from a minor to major when a minor customer turns major on attaining maturity or make the change through automation. In case the system is parameterized under automated mode, the functionality associated with this option will not be available.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Not Applicable

To perform the customer maturity processing maintenance

1. Type the fast path **CIM30** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Maturity Processing Maintenance**.
2. The system displays the **Customer Maturity Processing Maintenance** screen.

3.16. CIM39 - Customer ID Change Maintenance

Using this option, you can change the Primary Customer ID linked to an account. You can replace the primary customer ID with another customer ID with the same relationship. Primary customer id change will only be allowed if the cross reference between From and To customer type is maintained in screen CIM15.

The new customer is linked to the accounts in the same relationships as that of the previous customer. If the new customer is applicable for combined statement either through Combined Statement plan or through Customer grouping then the account for which primary customer change is initiated will be a part of combined statement of the new customer.

If the old customer is applicable for combined statement either through Combined Statement plan or through Customer grouping then the account for which primary customer change is initiated will be delinked from combined statement of the old customer. Amount based operating instruction if any for the old customer will be deleted on primary customer change.

Definition Prerequisites

- 8053 - Customer Addition
- 8051 - CASA Account Opening
- CIM15 - Customer Type Xref for Primary Customer ID Change

Modes Available

Modify, Amend, Cancel, Authorize

To change the customer ID

1. Type the fast path **CIM39** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer ID Change Maintenance**.
2. The system displays the **Customer ID Change Maintenance** screen.

Customer ID Change Maintenance

The screenshot shows a software window titled "Customer ID Change Maintenance*". The window has a yellow border and standard OS window controls (minimize, maximize, close) in the top right corner. Below the title bar, there are search fields: "Search Criteria:" with a dropdown menu currently set to "Customer Id", "Search String:" with a text input field and a search icon, "Full Name:" with a text input field, and "ID:" with a text input field. Below these fields are two tabs: "Accounts" (selected) and "Account Details". The "Accounts" tab displays a table with the following columns: "Serial No.", "Account Number", "Old CustomerId", "Relationship", "Account Status", "New Customer ID", "New Customer Name", and "Line No". The table is currently empty. At the bottom of the window, there is a "Record Details" section with fields for "Input By", "Authorized By", "Last Mnt. Date", "Last Mnt. Action", and "Authorized" (with a checkbox). Below this section is a row of action buttons: "Add", "Modify" (highlighted with a blue circle), "Delete", "Cancel", "Amend", "Authorize", and "Inquiry". At the very bottom right are four buttons: "UDF", "OK", "Close", and "Clear".

3.19. CIM78 - Customer Information Maintenance*

Using this option you can update the customer details. The customer can change the details of his address, if any, from a call center using this screen. You can update the customer Kanji, SbKana and DBKana name and address.

All the details entered in this option are maintained in the **Customer Information Master Maintenance** (Fast path: CIM09) option.

Definition Prerequisites

- 8053 - Customer Addition
- CIM09 - Customer Information Master Maintenance

Modes Available

Modify, Cancel, Amend, Authorize, Inquire. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To maintain account provision

1. Type the fast path **CIM78** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Information Maintenance**.
2. The system displays the **Customer Information Maintenance** screen.

Customer Information Maintenance

The screenshot shows the 'Customer Information Maintenance' window. At the top, there are search criteria fields for 'Search String', 'ID', 'Home Branch', 'Full Name', and 'Short Name'. Below these are tabs for 'Kanji Detail', 'D.B. Kana Detail', and 'S.B. Kana Detail'. The 'Customer Current Detail' section contains fields for Salutation, First Name, Last Name, Address1, Address2, Address3, Prefecture, Country, Full Name, Middle Name, Zip Code, and City/Ward/Town/Village. The 'Record Under Processing' section has similar fields plus 'Name Status Update Date', 'Zip Code', 'City/Ward/Town/Village', 'Dosa Common name- Aza/Chome', 'Address2', 'Address3', 'Country', 'Address Status Update Date', 'Full Name', 'Middle Name', 'Name Status', 'Prefecture', and 'Address Status'. A 'Connect To Trillium' button is located below the 'Record Under Processing' section. The 'Record Details' section at the bottom includes fields for 'Input By', 'Authorized By', 'Last Mnt. Date', 'Last Mnt. Action', and 'Authorized'. At the very bottom is a toolbar with buttons for 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', 'Inquire', 'Ok', 'Close', and 'Clear'.

3.20. CIM24 - Customer MIS Details

This transaction enables user to store MIS related information to be used by bank for processing. FLEXCUBE does not use data in this transaction for any processing. This enables information stored at customer level and enables capturing of data related to personal information, loan details and other details such as internet access, credit card details, family relationship with the bank etc. which bank can use externally.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add the customer MIS details

- Type the fast path **CIM24** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer MIS Details**.
- The system displays the **Customer MIS Details** screen.

Field Description

Field Name	Description
Search Criteria	<p>[Display]</p> <p>This field displays the search criteria on which search are going to be performed.</p>
Search String	<p>[Mandatory, Alphanumeric, 10, Pick List]</p> <p>Type the search string to search for a customer, corresponding to the search criteria selected in the Search Criteria field.</p> <p>If the criterion is specified as customer's short name or IC then any of the initial letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters at the start in their respective criteria. Choose the appropriate customer from the existing customer list. If the criterion is specified as Customer ID, one has to enter the complete customer ID</p> <p>For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p> <p>Select the customer who shall be the customer of the group.</p>
IC	<p>[Display]</p> <p>This field displays the identification code of the customer.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.</p>
ID	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
Home Branch	<p>[Display]</p> <p>This field displays the code of the branch, where the customer account is opened.</p> <p>These short names are maintained in the Branch Master Maintenance (Fast Path: BAM03) option.</p>
Full Name	<p>Display]</p> <p>This field displays the full name of the customer.</p> <p>By default the system displays the name as entered in the Customer Addition (Fast Path: 8053) option</p>

Field Name	Description
------------	-------------

Short Name	[Display]
-------------------	-----------

This field displays the short name of the customer.

By default the system displays the name as entered in the **Customer Addition** (Fast Path: 8053) option.

- Click the **Add** button.
- Enter the search string to search for the customer and press the **<Tab>** or **<Enter>** key and select the customer from the pick list.
- The data corresponding to the search is displayed.
- Double-click the record to view the details.

- Click the **OK** button. The system displays the message "Record Added.....Authorization Pending".

3.21. ETM01 - Customer Alerts Registration

Alerts can be categorized as bank initiated, CASA account level and customer level alerts. The bank initiated alert is sent to all the customers as and when the underlying event occurs while the customer registered and CASA account level alerts are sent to the customers who have registered for the same.

Using this option you can register for alerts and maintain various details required to provide the alert message service to customers. The alert message can be sent either through SMS or Email or both. You can also mark a time period for a customer within which no SMS alert messages will be sent. This flexibility is provided for customers who do not wish to be disturbed during their office hours or early morning etc. The SMS alerts queued during the do not disturb time range are sent to the customer after the end of set time range.

The alerts can be registered at customer level or at account level. Customer is required to specify which all type of transactions and events have to be intimated through alert. The transaction/event triggers the alert generation. For the specified event or transaction, the system sends an alert message to the customer.

Definition Prerequisites

- 8053 - Customer Addition
- Availability of customer accounts

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedure**.

To register customer alerts

1. Type the fast path **ETM01** and click **Go** or navigate through the menus to **Global Definition > Clearing > Customer Alerts Registration**.
2. The system displays the **Customer Alerts Registration** screen.

3.24. CIM47 - Customer Group Maintenance

The Customer Group Maintenance allows for creation and maintenance of a collection of customers (may or may not be related to each other) grouped together and associated with a group code of type customer group. Each group is identified by a group id which is the customer id of the primary customer of the group. Each instance of a customer group is assigned a group code (of group type customer group) and a RM (RM can belong to any group code / branch). The instance of customer group inherits the attributes of the associated group code and whether combined statement is applicable and the annual waiver limit can be modified at each customer level within the customer group level.

Definition Prerequisites

- 8053 - Customer Addition
- CIM45- Group Master Maintenance
- CIM46- RM Master Maintenance

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To maintain the customer group

1. Type the fast path **CIM47** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Group Maintenance**.
2. The system displays the **Customer Group Maintenance** screen.

3.25. CIM48 - Account Group Maintenance

Account Group Maintenance is used for maintenance of a collection of accounts (across different customers) grouped together and associated with a group code of type account group. Each group is identified by a group id (which is the customer id of the primary customer of the parent account of the group) and a running serial number (the same primary customer can have multiple account groups – for each the serial number will increment by 1). Each instance of an account group is assigned a group code (of group type account group). The instance of account group inherits the attributes of the associated group code and only the annual waiver limit can be modified at the account group level. Combined statements not supported for account group.

Definition Prerequisites

- 8053 - Customer Addition
- CIM45- Group Master Maintenance

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To maintain the account group

1. Type the fast path **CIM48** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Account Group Maintenance**.
2. The system displays the **Account Group Maintenance** screen.

Tag ID	[Display] Displays the tag ID defined by the customer.
Tag Name	[Display] Displays the tag name defined by the customer against a tag ID.

3. Click the **Add** button.
4. Select the queue code from the pick list.
5. Click the **+** button to add the details of the document to be maintained.
6. Enter the % of allocation for the allocation.

4. Customer Enquiry

4.1. 7004 - Customer Name and Address Inquiry

Using this option you can inquire about a customer's personal details such as name and address of all customers linked to the account. You have to key in an account number (CASA, Loans or Term Deposit) to display the customer name and address along with IC and the customer's relation to the account.

A maximum of 3 customer details can be displayed using this option. If there are more than three then they have to be looked into individually using the **Customer Account Relationship Maintenance** (Fast Path: CI142) option and the **Customer Master Maintenance** (Fast Path: CIM09) option.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Not Applicable

To view customer name and address

1. Type the fast path **7004** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Name And Address Inquiry**.
2. The system displays the **Customer Name And Address Inquiry** screen.

Field Description

Field Name	Description
Account No	[Mandatory, Alphanumeric, 14] Type the account number, for which the customer details inquiry, needs to be performed. The short name of the primary customer linked to the account is populated adjacent to the account number.
Account Ccy	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries are posted in the account in the account currency. The exchange rate values must be defined and downloaded. For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.
Name	[Display] This field displays the full name of the customer. The full name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.
Address	[Display] This field displays the mailing address of the customer.
City	[Display] This field displays the name of the city.
State	[Display] This field displays the name of the state.
Country	[Display] This field displays the name of the country.
Zip	[Display] This field displays the zip code.
Phone	[Display] This field displays the customer's office contact number. It is split into 3 parts Country code, Area Code, and Phone Number.

Field Name	Description
Relation	<p>[Display]</p> <p>This field displays the relationship of the customer with the account. Some of the relationships defined internal to FLEXCUBE Retail are :</p> <ul style="list-style-type: none"> • SOW • JAF • JOF • JAO • JOO • GUA - Guarantors • NOM - Nominee • TRU – Trustee
Customer IC	<p>[Display]</p> <p>This field displays the identification code of the customer.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.</p>
Customer ID	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>

3. Enter the account number and press the **<Tab> or <Enter>** key.
4. Click the **Ok** button.
5. The system displays the customer details.

Field Description

Field Name	Description
Search Criteria	<p>[Mandatory, Drop-Down]</p> <p>Select the search criteria, to search for the customer, from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none">• Customer short name• Customer IC Identification criteria (IC) arrived at by the bank during customer addition.• Customer ID- Unique identification given by the bank.
Search String	<p>[Mandatory, Alphanumeric, 20]</p> <p>Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.</p> <p>If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.</p> <p>For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>
ID	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
IC	<p>[Display]</p> <p>This field displays the identification code of the customer.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.</p>
Full Name	<p>[Display]</p> <p>This field displays the full name of the customer.</p> <p>The full name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.</p>

Field Name	Description
Based On	<p>[Mandatory, Radio Button]</p> <p>Click on the appropriate option based on which the customer account relation inquiry is to be made.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Profitability Inquiry • Asset Liability Report
3.	Select the search criteria from the drop-down list.
4.	Enter the search string and press the <Tab> or <Enter> key.
5.	Select the customer from the pick list.
