Preface

Understanding the PeopleSoft Online Help and PeopleBooks

The PeopleSoft Online Help is a website that enables you to view all help content for PeopleSoft Applications and PeopleTools. The help provides standard navigation and full-text searching, as well as context-sensitive online help for PeopleSoft users.

PeopleSoft Hosted Online Help

You access the PeopleSoft Online Help on Oracle’s PeopleSoft Hosted Online Help website, which enables you to access the full help website and context-sensitive help directly from an Oracle hosted server. The hosted online help is updated on a regular schedule, ensuring that you have access to the most current documentation. This reduces the need to view separate documentation posts for application maintenance on My Oracle Support, because that documentation is now incorporated into the hosted website content. The Hosted Online Help website is available in English only.

Note: Only the most current release of hosted online help is updated regularly. After a new release is posted, previous releases remain available but are no longer updated.

Locally Installed Help

If your organization has firewall restrictions that prevent you from using the Hosted Online Help website, you can install the PeopleSoft Online Help locally. If you install the help locally, you have more control over which documents users can access and you can include links to your organization’s custom documentation on help pages.

In addition, if you locally install the PeopleSoft Online Help, you can use any search engine for full-text searching. Your installation documentation includes instructions about how to set up Elasticsearch for full-text searching. See PeopleTools Installation for your database platform, “Installing PeopleSoft Online Help.” If you do not use Elasticsearch, see the documentation for your chosen search engine.

Note: See Oracle Support Document 2205540.2 (PeopleTools Elasticsearch Home Page) for more information on using Elasticsearch with PeopleSoft.

Note: Before users can access the search engine on a locally installed help website, you must enable the Search field. For instructions, go to your locally installed PeopleSoft Online Help site and select About This Help, Managing Locally Installed PeopleSoft Online Help, Enabling the Search Button and Field in the Contents sidebar.

Downloadable PeopleBook PDF Files

You can access downloadable PDF versions of the help content in the traditional PeopleBook format. The content in the PeopleBook PDFs is the same as the content in the PeopleSoft Online Help, but it has a different structure and it does not include the interactive navigation features that are available in the online help.
Common Help Documentation

Common help documentation contains information that applies to multiple applications. The two main types of common help are:

- Application Fundamentals
- Using PeopleSoft Applications

Most product families provide a set of application fundamentals help topics that discuss essential information about the setup and design of your system. This information applies to many or all applications in the PeopleSoft product family. Whether you are implementing a single application, some combination of applications within the product family, or the entire product family, you should be familiar with the contents of the appropriate application fundamentals help. They provide the starting points for fundamental implementation tasks.

In addition, the *PeopleTools: Applications User's Guide* introduces you to the various elements of the PeopleSoft Pure Internet Architecture. It also explains how to use the navigational hierarchy, components, and pages to perform basic functions as you navigate through the system. While your application or implementation may differ, the topics in this user’s guide provide general information about using PeopleSoft Applications.

Field and Control Definitions

PeopleSoft documentation includes definitions for most fields and controls that appear on application pages. These definitions describe how to use a field or control, where populated values come from, the effects of selecting certain values, and so on. If a field or control is not defined, then it either requires no additional explanation or is documented in a common elements section earlier in the documentation. For example, the Date field rarely requires additional explanation and may not be defined in the documentation for some pages.

Typographical Conventions

The following table describes the typographical conventions that are used in the online help.

<table>
<thead>
<tr>
<th>Typographical Convention</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Key+Key</td>
<td>Indicates a key combination action. For example, a plus sign (+) between keys means that you must hold down the first key while you press the second key. For Alt+W, hold down the Alt key while you press the W key.</td>
</tr>
<tr>
<td>. . . (ellipses)</td>
<td>Indicate that the preceding item or series can be repeated any number of times in PeopleCode syntax.</td>
</tr>
<tr>
<td>{ } (curly braces)</td>
<td>Indicate a choice between two options in PeopleCode syntax. Options are separated by a pipe (</td>
</tr>
<tr>
<td>[ ] (square brackets)</td>
<td>Indicate optional items in PeopleCode syntax.</td>
</tr>
<tr>
<td>Typographical Convention</td>
<td>Description</td>
</tr>
<tr>
<td>--------------------------</td>
<td>-------------</td>
</tr>
<tr>
<td>&amp; (ampersand)</td>
<td>When placed before a parameter in PeopleCode syntax, an ampersand indicates that the parameter is an already instantiated object. Ampersands also precede all PeopleCode variables.</td>
</tr>
<tr>
<td>⇒</td>
<td>This continuation character has been inserted at the end of a line of code that has been wrapped at the page margin. The code should be viewed or entered as a single, continuous line of code without the continuation character.</td>
</tr>
</tbody>
</table>

### ISO Country and Currency Codes

PeopleSoft Online Help topics use International Organization for Standardization (ISO) country and currency codes to identify country-specific information and monetary amounts.

ISO country codes may appear as country identifiers, and ISO currency codes may appear as currency identifiers in your PeopleSoft documentation. Reference to an ISO country code in your documentation does not imply that your application includes every ISO country code. The following example is a country-specific heading: "(FRA) Hiring an Employee."

The PeopleSoft Currency Code table (CURRENCY_CD_TBL) contains sample currency code data. The Currency Code table is based on ISO Standard 4217, "Codes for the representation of currencies," and also relies on ISO country codes in the Country table (COUNTRY_TBL). The navigation to the pages where you maintain currency code and country information depends on which PeopleSoft applications you are using. To access the pages for maintaining the Currency Code and Country tables, consult the online help for your applications for more information.

### Region and Industry Identifiers

Information that applies only to a specific region or industry is preceded by a standard identifier in parentheses. This identifier typically appears at the beginning of a section heading, but it may also appear at the beginning of a note or other text.

Example of a region-specific heading: "(Latin America) Setting Up Depreciation"

### Region Identifiers

Regions are identified by the region name. The following region identifiers may appear in the PeopleSoft Online Help:

- Asia Pacific
- Europe
- Latin America
- North America
Industry Identifiers

Industries are identified by the industry name or by an abbreviation for that industry. The following industry identifiers may appear in the PeopleSoft Online Help:

- USF (U.S. Federal)
- E&G (Education and Government)

Translations and Embedded Help

PeopleSoft 9.2 software applications include translated embedded help. With the 9.2 release, PeopleSoft aligns with the other Oracle applications by focusing our translation efforts on embedded help. We are not planning to translate our traditional online help and PeopleBooks documentation. Instead we offer very direct translated help at crucial spots within our application through our embedded help widgets. Additionally, we have a one-to-one mapping of application and help translations, meaning that the software and embedded help translation footprint is identical—something we were never able to accomplish in the past.

Using and Managing the PeopleSoft Online Help

Click the Help link in the universal navigation header of any page in the PeopleSoft Online Help to see information on the following topics:

- What’s new in the PeopleSoft Online Help.
- PeopleSoft Online Help accessibility.
- Accessing, navigating, and searching the PeopleSoft Online Help.
- Managing a locally installed PeopleSoft Online Help website.

PeopleSoft HCM Application Fundamentals

Additional, essential information describing the setup and design of your system appears in a companion volume of documentation called Application Fundamentals. Each PeopleSoft product line has its own version of this documentation.

Chapter 1

Getting Started with Track Global Assignments

Track Global Assignments Business Process Overview

Track Global Assignments business process in PeopleSoft HR enables you to assign employees to a global assignment and to monitor, compensate, and track education and qualification for the employees and their dependents as they move from project to project in your organization's operations in multiple countries.

These topics provide an overview of global assignment tracking and discuss:

• Temporary versus permanent assignments.
• Managing employees on global assignment.

Understanding Global Assignment Types

If your organization has operations in more than one country, you process large amounts of information about employees as they move from project to project. PeopleSoft HR enables you to ensure smooth transitions for employees on global assignments.

You can manage temporary assignments for:

• Expatriate employees.
  Home base employees who work in other countries or locations.
• Inpatriate employees.
  Employees from other countries who work in your organization's home country.
• Third country nationals.
  Employees who are citizens of one country and have a home base in a second country but go on assignment to a third country. For example, a Canadian citizen with a home base in the United States may go on assignment to Saudi Arabia.

Temporary Versus Permanent Assignments

Before you begin to administer a new assignment, determine whether the assignment is temporary or permanent.

• Temporary Assignments
  In a temporary assignment, you expect the employee to return to a home base when the assignment end. An assignment is considered temporary even if it lasts up to several years.
Before the employee leaves for a temporary global assignment, you establish a home base (where the employee is permanently based) for the employee where you keep central employee, benefit, and payroll data for that employee. Create new records to track employee data for the new location. The new location is referred to as the host location.

You maintain two sets of employee data: one set is home data and the other is host data for the new assignment abroad. To keep two sets of current data for an employee, you create new employment record numbers, which precludes you from overwriting existing home information.

- **Permanent Assignments**

  A permanent assignment is one where the host location becomes the employee's new home base. You do not expect the employee to return to his or her previous home base. For permanent assignments, all employee, benefit, and payroll data tracking should occur at the new location. You no longer need to keep employee data at the previous home base. When employees change to permanent assignments elsewhere, you transfer employee data using the Job Data pages in the Workforce Administration menu.

See "Understanding Job Data" (PeopleSoft HCM 9.2: Human Resources Administer Workforce).

**Managing Employees on Global Assignment**

To manage employees on global assignment:

1. Ensure that employees have home data—standard, permanent personnel administration data in Human Resources, including employee IDs.
2. Establish host data for each assignment, such as location, job code, and department.
3. Enter assignment details, including the start and end date of the assignment, the disposition of the employee residence, vehicle information, and furniture arrangements.
4. Set up data for dependents who are accompanying the employee on the assignment, including non-family members such as nannies.
5. Enter payment instructions for supplemental earnings or deductions, such as cost-of-living adjustments, school tuition reimbursements, hypothetical tax deductions, and housing allowances.
6. When the assignment is completed, enter the end date.

Human Resources also contains several supplemental pages to help you process assignments. You can:

- Track visas and permits required for employees and their dependents.
- Track company-paid travel.
- Provide information on international schools and programs.
- Review educational qualifications, competencies, accomplishments, and languages of employees.

**Related Links**

"Adding Organizational Instances for Employees, Contingent Workers, and POIs" (PeopleSoft HCM 9.2: Human Resources Administer Workforce)
Track Global Assignments Business Processes

Track Global Assignment provides the following business processes:

- **Track assignees qualifications.**
  Track assignees qualifications for assignments, such as education, languages, and competencies.

- **Track assignments.**
  - **Manage assignments.**
    Manage assignees assignment details, such as their home base job information and their job information (host) while on assignment, in addition to assignment beginning and end dates, travel details, residence details, and vehicle assignments.

- **Track dependent information.**
  Track information about assignee's dependents.

- **Track company paid travel.**
  Track company paid travel for assignees and their dependents.

- **Track assignment compensation.**
  Track employee compensation that results from an assignment.

- **Track educational allowances.**
  Track educational allowances for assignees and their dependents.

**Related Links**

- Understanding Global Assignment Tracking
- Managing International Schools and Programs Allowances

Track Global Assignments Business Process Integrations

Human Resources integrates with all PeopleSoft HCM applications, other PeopleSoft applications, and third-party applications.

Human Resources shared tables are available to many PeopleSoft HCM applications. In addition, data in many HR tables is available to PeopleSoft applications set up to subscribe to the published messages.
Track Global Assignments Business Process Implementation

PeopleSoft Setup Manager enables you to generate a list of setup tasks for your organization based on the features that you are implementing. The setup tasks include the components that you must set up, listed in the order in which you must enter data into the component tables, and links to the corresponding documentation.

Other Sources of Information

In the planning phase of your implementation, take advantage of all PeopleSoft sources of information, including the installation guides, table-loading sequences, data models, and business process maps.

See the product documentation for PeopleTools: Setup Manager

Setting Up Global Assignments

Understanding Special Security Options for Global Assignments

Employees on global assignment have two Job Data records: a Home assignment and Host assignment. Because of the challenges of managing someone with two job data records that are separate, yet connected, PeopleSoft HCM security provides you with Home/Host security options that apply to the data permission security that you have already set up for your users.

Using Home/Host security options you can:

• Limit a user's access to the Job Data records to which their standard data permission grants them access.

  **Note:** This is the default option in effect when you choose not to enable any Home/Host security options.

• Enable a user who has access to an employee's Home data to also be able view the Host data.

• Enable a user who has access to an employee's Host data to also be able to view the Home data.

• Enable users with Host data to be able to view Host data and users with access to Host data to be able to view Home data.

**Example: Using Home/Host Security Options**

Jan Smit is ordinarily based in New York but has been sent on assignment to Sydney, Australia. Jan's organization uses the Business Unit field to secure person data. Her Home Job Data record is in the Eastern US business unit and her Host Job Data record is in the Australia Business Unit.

The following table illustrates who can access Jan's data, depending on how Home/Host access has been set up:

**Note:** The system uses a number of fields from the Job Data pages to secure the data of people with jobs, but their data is secured using this data on a variety of pages throughout the system, not just the job pages.

<table>
<thead>
<tr>
<th>Home/Host Access Type</th>
<th>Data Tied to Home Job Data</th>
<th>Data Tied to Host Job Data</th>
</tr>
</thead>
<tbody>
<tr>
<td>No Home/Host Security Option</td>
<td>Eastern BU users*</td>
<td>Australia BU users**</td>
</tr>
<tr>
<td>Home can see Host</td>
<td>Eastern BU users</td>
<td>• Australia BU users</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Eastern BU users</td>
</tr>
</tbody>
</table>
### Setting Up Home/Host Access Type

<table>
<thead>
<tr>
<th>Home/Host Access Type</th>
<th>Data Tied to Home Job Data</th>
<th>Data Tied to Host Job Data</th>
</tr>
</thead>
<tbody>
<tr>
<td>Host can see Home</td>
<td>• Eastern BU users</td>
<td>Australia BU users</td>
</tr>
<tr>
<td></td>
<td>• Australia BU users</td>
<td></td>
</tr>
<tr>
<td>Both (Home can see</td>
<td>• Eastern BU users</td>
<td>• Australia BU users</td>
</tr>
<tr>
<td>Host and Host can see</td>
<td>• Australia BU users</td>
<td>• Eastern BU users</td>
</tr>
<tr>
<td>Home)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Note:** Eastern BU users: People with access to the Eastern US business unit, such as Jan's Home manager or the Eastern US HR Administrator. Australia BU users: People with access to Australia business unit, such as Jan's Host manager or the Australian HR Administrator.

### Setting Up Home/Host Security Options

To enable home host security:

1. Select the Include Home/Host Access? check box on the Security Install Settings page (SCRTY_INSTALL) and indicate which version of Home/Host security you want to use.

2. On the Security Access Type page (SCRTY_TYPE2_TBL), select which version of Home/Host security to use.

   By enabling Home/Host security at the security access type level, you can use it with one security type but not another.

   For example, managers many have data permission using the Job Department Tree security access type and HR administrators have access using the Job Location access type. You could enable Home/Host Security for the Job Location access type to allow HR administrators to continue to administer employees on assignment, while not enabling it for managers so that they can continue to only see their current direct reports.

   **Note:** The options available depend on which option you selected on the Security Install Settings page.

### Defining Global Assignment Types

To set up global assignment types, use the Assignment Type Table (ASSGN_TYPE_TABLE) component.

This topic discusses how to create new types of employee assignments.
Page Used to Define Global Assignment Types

<table>
<thead>
<tr>
<th>Page Name</th>

**(GER) Defining German Assignment Types**

When entering assignment types for Germany, select from these options:

<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A01</td>
<td>Assignment In-Country</td>
</tr>
<tr>
<td>A02</td>
<td>Assignment Expat DBA taxfree</td>
</tr>
<tr>
<td>A03</td>
<td>Assignment Expat DBA taxable</td>
</tr>
<tr>
<td>A04</td>
<td>Assignment Expat ATE taxfree</td>
</tr>
<tr>
<td>A05</td>
<td>Assignment Expat ATE taxable</td>
</tr>
<tr>
<td>D01</td>
<td>Business Trip In-Country</td>
</tr>
<tr>
<td>D02</td>
<td>Business Trip Out-of-Country</td>
</tr>
</tbody>
</table>
## Classifying Types of Company-Paid Travel

To set up types of company-paid travel, use the Travel Type Table (TRAVEL_TYPE_TABLE) component.

This topic discusses how to classify types of company-paid travel.

### Pages Used to Classify Types of Company-Paid Travel

<table>
<thead>
<tr>
<th>Page Name</th>
<th>Definition Name</th>
<th>Usage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Travel Type Table Page</td>
<td>TRAVEL_TYPE_TABLE</td>
<td>Classify types of company-paid travel. Use the codes that you set up here to make travel arrangements for employees and their dependents in the Company Paid Travel page.</td>
</tr>
</tbody>
</table>

### Travel Type Table Page

Use the Travel Type Table page (TRAVEL_TYPE_TABLE) to classify types of company-paid travel.

Use the codes that you set up here to make travel arrangements for employees and their dependents in the Company Paid Travel page.

**Navigation**

Set Up HCM, Product Related, Workforce Administration, Global Assignments, Travel Type Table, Travel Type Table

**Image: Travel Type Table page**

This example illustrates the fields and controls on the Travel Type Table page. You can find definitions for the fields and controls later on this page.

![Travel Type Table](image)

- **Effective Date**
  - Enter the date the travel type becomes effective.

- **Status**
  - Select a status for the travel type. Available options: *Active* or *Inactive*
**Chapter 2 Setting Up Global Assignments**

**Description**
Enter a descriptive label for the travel type you are defining.

**Home Leave**
Select to indicate that a worker is going on leave to his or her home (permanent) location.

If you select *Home Leave*, the system automatically disables the fields in the *To* section on the Company Paid Travel page when this travel type is used.

---

**Defining Deductions and Earnings for Assignment Compensation**

To set up deductions and earning for assignment compensation, use the Earnings (EARNINGS_TABLE1), and Deductions (DEDUCTION_TABLE1) components.

These topics discuss assignment deductions and earnings.

**Pages Used to Define Deductions and Earnings for Assignment Compensation**

<table>
<thead>
<tr>
<th>Page Name</th>
<th>Definition Name</th>
<th>Usage</th>
</tr>
</thead>
<tbody>
<tr>

<td>DEDUCTION_TABLE2</td>
<td>Define tax treatments for assignment deductions.</td>
</tr>
<tr>
<td>Earnings Table Page</td>
<td>EARNINGS_TABLE1</td>
<td>Add earnings codes for global assignments.</td>
</tr>
</tbody>
</table>

---

**Understanding Assignment Deductions and Earnings**

Employees on global assignments often are entitled to supplemental earnings, such as cost-of-living adjustments and hardship premiums. You might also take additional deductions from the employee's paycheck because of estimated taxes.

Enter earnings and deductions as they relate to home and host assignment data. For example, an employee might receive a cost-of-living adjustment that is paid for by the host location and a hardship premium that the home location absorbs. Enter these components in multiple currencies; the system automatically calculates the equivalent amounts in the home currency.

To identify recurring payments or isolated incidents of supplemental earnings or deductions, track compensation data by employee and payment instruction type. PeopleSoft includes two types of payment instructions: global compensation and one-time payments. These are sufficient for most compensation that relates to global assignments.

If the organization is not using PeopleSoft Payroll for North America and you want to track assignment compensation, set up deduction, tax, and earnings information on the Earnings and Deductions components.
You can track assignment compensation on the Assignment Compensation component.

See Deduction Table Page.

**Note:** Use the Payroll for North America Earnings and Deductions tables (Set Up HCM, Product Related, Payroll for North America) to set up earnings and deductions if you use Payroll for North America. The global assignments tables do not contain enough information to substitute for the payroll tables. Make the tables in the Global Assignments menu display-only to ensure that all updates take place by using the pages in North American Payroll.

</tr>
</tbody>
</table>
### Understanding Assignment Education Data

The organization may provide financial assistance to employees who are on global assignments, such as school tuition for children and language and orientation classes for adults. PeopleSoft HR helps determine any educational assistance to which employees are entitled and tracks multiple institutions.

If the organization offers education allowances for employees or dependents, set up information about the schools and programs that are available to the employees and their dependents.

#### Setting Up Majors

Use the Majors page if you need to set up a new major for global assignments.

See "Understanding Managing Profiles" (PeopleSoft HCM 9.2: Human Resources Manage Profiles).

#### School/Program Table Page

Use the School/Program Table page (INTL_SCHPGM_TABLE) to enter school and program information.

**Navigation**

This example illustrates the fields and controls on the School/Program Contact Table page. You can find definitions for the fields and controls later on this page.

**Contact Nbr (contact number)**

Enter the contact number of the school or program. For example, enter the headmistress of a school as the first contact, and the assistant headmistress as the second contact.

**Contact Phone Numbers**

Select the phone type and enter the phone number for the contact. Add new data rows to list more than one contact phone number for each contact.
Chapter 3

Tracking Assignments

Understanding Global Assignment Tracking

When you send an employee on a global assignment, you track new assignment details, additional employee earnings and deductions, and different benefits packages. You might also administer an employee's personal affairs, such as housing, vehicles, and furniture. With PeopleSoft Human Resources, you can settle employees and their dependents in new locations.

**Note:** Before you process a global assignment, a human resources record and emplID must already exist in the PeopleSoft HR system for the employee.

Creating Checklists

To set up checklists, use the Checklist Items (CHKLST_ITEM_TBL) and Checklist (CHECKLIST_TABLE) components.

This topic discusses creating checklists.

Pages Used to Create Checklists

<table>
<thead>
<tr>
<th>Page Name</th>
<th>Definition Name</th>
<th>Usage</th>

<td>PERSON_CHECKLIST</td>
<td>Identify checklist items to use as a guide to process people.</td>
</tr>
</tbody>
</table>

Understanding Creating Checklists

Much of the information that you process for different assignment types and countries remains constant. To save yourself work (and prevent data entry errors or omissions), create standard checklists to streamline global assignment processing. For special situations, use standard checklists as the basis for creating modified checklists.
Set up checklists by using the Checklist Items and Checklist pages. To tailor a checklist for an employee, use the Person Checklist page.

</tr>
</tbody>
</table>
Defining and Maintaining Home Location Information

To manage employee global assignments, first establish an employee's permanent, or home, location and data on the Job Data component (JOB_DATA). The home location is the place to which the employee returns when a temporary assignment ends, and the home data is the employee's job data when the employee is not on assignment.

If you added an employment instance for a person into the PeopleSoft HR system, the employee has a job data record that serves as the home information. If the employee is a new employee, create an employment instance before processing the assignment.

**Note:** An employee may have more than one job at home, and so may have more than one home human resources record.

**Related Links**

"Adding Organizational Instances for Employees, Contingent Workers, and POIs" (PeopleSoft HCM 9.2: Human Resources Administer Workforce)
Defining and Maintaining Host Location Information

Each time that you send an employee on a temporary assignment, you need to create a separate set of host and benefits data for that assignment. Host data includes information such as job, department, and location. Host benefits data consists of the employee's benefits program participation. By creating a separate set of data for the assignment, you retain permanent home and benefits data for the employee and track data for the current assignment.

The first time that you add host data for a new assignment, create a new job record on the Add a Host Assignment component (ADD_HOST_ASSIGN).

When you create a host job record, the job information fields are available for entry on the Home/Host Data page. Use the Home and Host Data component (HOME_HOST_DATA) to manage and review employees' host location information and to assign job records to assignments. When you save the new host information, the system stores the data in the employee's employment, job, and benefit program participation tables. These are the same tables in which all standard job data is stored.

When one global assignment ends, reuse the same job record and enter a new data row for the new assignment.

Note: You generally use one host employment record to track all global assignments for an employee, except in special circumstances, such as concurrent host assignments or different sets of benefits for a particular assignment. For these cases, add another employment record number to track the data separately.

Defining Assignee Qualifications

To identify the best-qualified employees to send on assignments, review employees' person profiles. You can use person profiles to record employees' educational qualifications and skills, and track additional education and skills acquired while on assignments.

You can access the Person Profiles component (JPM_PERSON_PROFILE) from Workforce Administration, Global Assignments, Assignee Qualifications.

Related Links
"Understanding Managing Profiles" (PeopleSoft HCM 9.2: Human Resources Manage Profiles)

Beginning Assignments

To begin an employee's assignment:

• Create a host job record if one does not already exist.

Note: Use the same job record for all assignments, entering a new data row for each assignment.

See Defining and Maintaining Host Location Information.

• The Action code Assignment (ASG) is selected automatically. Select any appropriate Reason code.

• Enter the host information for this assignment.
Ending Assignments

To end an assignment, insert a data row on the Home/Host Data page and select Assignment Completion (ASC) in the Action field.

End an assignment only if the employee is not immediately sent on a new assignment.

If the employee is going on a new assignment immediately, enter a new row for the new assignment.

Transferring an Employee Permanently

Sometimes an employee on temporary assignment stays at a location permanently. As a permanent employee, he or she shares the same status as a local employee and should no longer be managed as an employee on temporary assignment. All employee, benefit, and payroll data tracking for the employee takes place at the new location because it is the employee's new home base.

To transfer an employee permanently:

1. End all open temporary global assignments.
2. Access the Work Location page, insert a row, and enter the department, location, and job code for the permanent host assignment.

Related Links
"Updating Job Data" (PeopleSoft HCM 9.2: Human Resources Administer Workforce)

Add Host Assignment Page

Use the Add Host Assignment page (PER_ORG_INST_ASGN) to add a host assignment and review a summary of an employee's home and host assignments.

Navigation

Workforce Administration, Global Assignments, Track Assignment, Add a Host Assignment, Add Host Assignment
Image: Add Host Assignment page

This example illustrates the fields and controls on the Add Host Assignment page. You can find definitions for the fields and controls later on this page.

Create Host Assignment

Click to access the Home/Host Data page, on which you create a host assignment. For employees with more than one organizational instance, click the Create Host Assignment button that corresponds to the organizational instance for which you want to create a host assignment.

Note: You normally use the same job data record for all of an employee's host assignments. Do not create a new assignment record unless you have a compelling reason to do so. Instead, insert a new row into the employee's existing host record.

Next Empl Rcd (next employee record)

When you create a new host record, the system identifies it using this employee record number.

Refresh

Click to refresh the Assignments table and view a new assignment. The Refresh button appears when a new assignment is created.

Assignments

Displays all current assignments.

Empl Record (employee record)

For employees with multiple assignments, the system generates employment record numbers to track data for each concurrent job. A new hire's employee record number for his or her initial job is set to 0. For each subsequent job that the employee receives, an additional, sequential employee record number is assigned.
Home/Host

For employees with multiple assignments, the system populates this field with:

- *Home* if an assignment is based at the employee's home location.
- *Host* if an assignment is based at a location other than the employee's home location.

Home/Host Data Page

Use the Home/Host Data page (HOME_HOST_DATA) to add or view home information, and view and update host information.

The page accessed from the button is an enterable page. The page accessed from the menu navigation path is a view-only page.

Home data comes from the job data pages. You must have created an employment instance for the employee.

You must establish a host employment record to manage assignments from the Assignment Data component.

Navigation

- Click the Create Host Assignment button on the Add Host Assignment page.
- Workforce Administration, Global Assignments, Track Assignment, Home and Host Data, Home/Host Data
Image: Home/Host Data page

This example illustrates the fields and controls on the Home/Host Data page. You can find definitions for the fields and controls later on this page.

To create a host assignment and enter the employee's job information for the assignment, you access this page using the Add a Host Assignment component. To add or change assignment data for an existing host, access this page using the Home and Host Data component by selecting the employee's host employment record number.

If you access the component by using an employee's home employment record number, the elements on this page are display-only, showing data from the employee's job record. The Assignment tab is not available if you access the component by using an employee's home employment record number.

The elements that are on this page are the same as those that appear on the Job Data component.

**Action Date**

Displays the date on which you enter this row.

**Action**

Select an action to distinguish global assignments from other administrative actions. For new assignments, the action *Assignment* is automatically selected. When an assignment is completed and you add a new row, *Assignment Completion* is automatically selected.

**Reason**

You can identify specific reasons for sending employees on assignments. For example, you might process some assignments
that are due to a transfer of skills and others that are due to a shortage of local skilled personnel. To track assignment types more easily, specify reasons for them.

Use the Action Reason table to set up reasons that are specific to global assignments.

**Payroll Data Page**

Use the Payroll Data page (JOB_DATA_2) to add or view home and host payroll data.

Home data comes from the job data pages. You must have already created an employment instance for this employee.

The page accessed from the button is an enterable page. The page accessed from the menu navigation path is a view-only page.

**Navigation**

- Click the Create Host Assignment button on the Add Host Assignment page, and then select the Payroll Data page.
- Workforce Administration, Global Assignments, Track Assignment, Home and Host Data, Payroll Data

**Image: Payroll Data page**

This example illustrates the fields and controls on the Payroll Data page. You can find definitions for the fields and controls later on this page.
The elements that are on this page are the same as those that appear in the Job Data component.

**Payroll System**

Enter the payroll system used for the host. Doing so does not affect employee home data.

You can make changes on the Payroll Data page, or on the Payroll page in the Workforce Administration menu.

**Tax Location Code**

Select the tax location code for the assignment.

**Related Links**

"Payroll Page" (PeopleSoft HCM 9.2: Human Resources Administer Workforce)

**Assignment Page**

Use the Assignment page (HOME_HOST_ASGN) to add or view host assignment data.

You must have already created an employment instance for this employee.

The page accessed from the button is an enterable page. The page accessed from the menu navigation path is a view-only page.

The system displays this page on the Home and Host Data component only when the employee has a current assignment and you have used a Host employee record number to access it.

**Navigation**

- Click the Create Host Assignment button on the Add Host Assignment page, and then select the Assignment page.

- Workforce Administration, Global Assignments, Track Assignment, Home and Host Data, Assignment
This example illustrates the fields and controls on the Assignment page. You can find definitions for the fields and controls later on this page.

This page appears only when you are creating a new host assignment, or when an existing assignment exists and you use a host employee record number to access the Home and Host Data component.

The elements that are on this page are the same as those that appear in the Job Data component.

**New Assignment Begin Date**

Select the beginning date for the assignment. When you select the date, the following fields appear on the page.

**Existing Assignment Begin Date**

This field appears when you have an existing assignment. When you are in the correction mode, you can select a new date to change the assignment date, or change the assignment that is associated with the host.

**Choose an Existing Assignment**

This link appears when you are in the correction mode. Click this link to access the Global Assignment Detail page (ASGN_VLD_VW) and select an existing assignment. The current host will then be associated with the selected assignment. An assignment date can have up to two hosts associated with it.

**End Date**

Enter the ending date for the assignment.
**Assignment Type**
Select a value that is created in the Assignment Type table.

**Departure Date and Arrival Date**
Enter or change the employee's estimated date of departure from the home location and arrival at the new primary host.

**Country**
Select the assignment host country.

**Benefits Page**

Use the Benefits page (JOB_DATA_BENPRG) to add or view home and host benefits data.

Home data comes from the job data pages. You must have already created an employment instance for this employee.

The page accessed from the button is an enterable page. The page accessed from the menu navigation path is a view-only page.

**Navigation**

- Click the Create Host Assignment button on the Add Host Assignment page, and then select the Benefits page.
- Workforce Administration, Global Assignments, Track Assignment, Home and Host Data, Benefits

**Image: Benefits page**

This example illustrates the fields and controls on the Benefits page. You can find definitions for the fields and controls later on this page.
The elements that are on this page are the same as those that appear in the Job Data component.

**Benefits System**

Enter a benefit program. Doing so does not affect other employee home data.

You can make changes on the Benefits page, or on the Benefit Program Participation page which you select from the Workforce Administration menu.

### Managing Assignments with Multiple Home or Host Data Records

These topics discuss how to:

- Add assignments when an employee has multiple jobs at home.
- Add assignments when an employee has multiple host locations.
- Associate multiple home or host data with an assignment.

### Adding Assignments When an Employee Has Multiple Jobs at Home

For most global assignments, the employee has one home job record and one host job record; however, you may encounter situations in which an employee has more than one job at home or more than one assignment.

Some employees have more than one employment record in the system before they go on a global assignment. For example, an American university professor going to teach at Oxford for a year might have two jobs in the U.S., one as a professor and another as a researcher. The employee already has two employment records in the system for the home jobs, so you need to create a third employment record for the host.

To track host data for an employee with multiple home records:

1. Create a new host employment record on the Add a Host Assignment component (ADD_HOST_ASSIGN).
   
   On the Add Host Assignment page, click the Create a New Assignment button for the organizational instance for the home record for which you are creating the assignment.
   
   The system adds another employment record so that you (and the system) can differentiate between the jobs.

2. Enter payroll information on the Payroll Data page.

3. Enter assignment dates on the Assignment page.
   
   When you enter the assignment end date, the system checks whether other host records have effective dates that are equal to or before the end date that you enter.
4. Enter benefits data on the Benefits page.

5. Click OK to save entries.

**Adding Assignments When an Employee Has Multiple Host Locations**

Some employees split their time between two or more locations during an assignment. For example, a manager who was sent to Japan might also be assigned to work in Korea at the same time. Whether this is known before the assignment starts or arises during the assignment, the jobs are treated as different, concurrent host records in the system.

To track data for an employee with multiple host records:

1. Create a separate employment record for each host on the Add a Host Assignment component.
   
   The system automatically assigns the next available employment record number, such as 2 or 3, for the host assignment.

2. Enter assignment dates and other details on the Home/Host Data, Assignment, Payroll Data, and Benefits pages.

3. Click OK to save entries.

**Tying Multiple Home or Host Data to an Assignment**

Assignments can be associated with only one Home record. If an employee has more than one home record (within an organizational instance), host records will be associated with the first home record.

If the employee has multiple, concurrent host records, associate all the host records with the assignment. Assignments are determined by the assignment begin date. The information that you enter on the Assignment and Assignment Data pages controls the earnings and deductions that track for home and host data on the Assignment Compensation page.

To associate a home and host record with an assignment:

1. Access the Add Host Assignment page.

2. On the Add Host Assignment page, click the Create New Assignment button for the home record for which you are creating the assignment.

3. Enter payroll information on the Payroll Data page.

4. Enter assignment dates on the Assignment page.

5. Enter benefits information on the Benefits page.

6. Click OK to save entries.

To associate multiple host records with an assignment:

1. Access the Assignment page of the Home and Host Data component using the employee record number for the host that you want to associate with an assignment.

2. Click the Correct History button.
To use Correct History, navigate to the Home and Host Data component and access the correct ERN for the employee. When you select the Correct History button from within this component, the Existing Assignment Begin Date and Choose an Existing Assignment fields display on the Assignment page.

3. Click the Choose an Existing Assignment link. The Global Assignment Detail page appears.

4. Select the check box for the assignment that you want to associate with the host.

   If no entries automatically appear on the Additional Assignments page, then you selected an employment record number for a host record that's effective after the end date of the assignment. Either update the effective date of the host job information or change the end date of the assignment.

5. Save entries.

---

Entering Dependent Data

Enter and maintain dependent information on the Dependent Data (DEPEND_BENEF) component.

Navigation

Workforce Administration, Global Assignments, Track Assignment, Dependent Data

See "Tracking Dependent and Beneficiary Data" (PeopleSoft HCM 9.2: Human Resources Administer Workforce).

Dependent Accompanying Page

Use the Dependent Accompanying page (FAMILY_AT_HOST) to enter family and dependent information.

Navigation

Workforce Administration, Global Assignments, Track Assignment, Dependent Accompanying, Dependent Accompanying

Image: Dependent Accompanying page

This example illustrates the fields and controls on the Dependent Accompanying page. You can find definitions for the fields and controls later on this page.

Assignment Type, Begin Date, and End Date

Displays the assignment type, begin date, and end date of the assignment, based on the effective date.

If these fields are not populated, then the information that you enter takes effect after the end date that is entered in the Assignment Data component. To see assignment data, adjust either the effective date here or the end date in Assignment Data.

Family Size

Displays the size of the immediate family, which is defined as dependents who are the employee's spouse, son, or daughter.
**Dependent ID**
Displays information about all dependents who are added by using the Dependent Data pages.

**At Host**
Displays the number of dependents who are accompanying the employee to the host location. The system automatically selects each dependent who is an immediate family member.
Deselect the At Host check box for any dependents who are not accompanying the employee to the host location.
Select the At Host check box for any non-family member, such as a nanny, who is accompanying the employee.
As you make changes to at host information, the system calculates and displays the number for immediate at host and the number for total at host, which includes any non-family members who are accompanying the employee.

**Adding Dependents to the Host Location**
To add another dependent to the Dependent Accompanying page, first add the new dependent by using the Dependent/Beneficiary pages. Move the cursor to the Effective Date field. When you enter the effective date of the change and move out of this field, the system refreshes the dependent list.

**Removing Dependents from the Host Location**
Access the Dependent Accompanying page. To reduce the number of dependents at host, click the Delete Row button and save the changes. The deleted dependents are removed from the list of dependents at host, but are still tracked in the system as dependent or beneficiaries for the given employee.

**Review Immediate Family Data Page**
Use the Review Immediate Family Data page (IMMEDIATE_FAMILY) to view information about an employee's immediate family.

**Navigation**

Image: Review Immediate Family Data page

This example illustrates the fields and controls on the Review Immediate Family Data page. You can find definitions for the fields and controls later on this page.

The system displays the employee's name and employee ID, along with the names and birth information for all dependents who are in the employee's immediate family, their relationship to the employee, occupations (if any), and marital statuses.

**Dependent Data - Name Page**

Use the Dependent Data - Name page (DEPEND_BENEF1) to enter or update information about a dependent's name.

**Navigation**

"Understanding Currency" (PeopleSoft HCM 9.2: Application Fundamentals)

Assignment Compensation Page

Use the Assignment Compensation page (ASSGNMT_EARNS_DED) to enter supplemental earnings and deductions that the home location pays, such as hardship premiums and relocation costs, or that an employee receives from the host location, such as foreign housing or rent.

Navigation

Workforce Administration, Global Assignments, Track Assignment, Assignment Compensation, Assignment Compensation
Image: Assignment Compensation page

This example illustrates the fields and controls on the Assignment Compensation page. You can find definitions for the fields and controls later on this page.

**Amount Frequency**

Enter the amount of compensation frequency from the values that are in the Frequency table. Values are *Annual*, *Hourly*, or *Monthly*. All the amounts that you specify for both earnings and deductions must be for the frequency that you select in this field.

**Assignment Type**

Displays the assignment type, which is based on the effective date that is entered on this page. If no information appears, then the information that you enter takes effect after the end date that you enter in the Assignment Data component. A warning message appears.

If you make a one-time payment that occurs after the end date of the assignment, ignore the message. Otherwise, to see assignment data, adjust either the effective date here or the end date in the Assignment Data component.

**Home or Host**

Enter the employee record numbers that correspond to the home or host records. Generally, enter 0 for the home record and 1 for the host record.

**From Currency Code and To Currency Code**

If assignment data exists, in the From Currency Code field, view the currency for the country that is designated in the employee's home data. View the home currency in the To Currency Code field.
field. The system automatically populates these fields. Override these default values by selecting another currency code from the Currency Code table.

**Exchange Rate**
Displays the exchange rate type. The rate that is specified in the Installation table appears by default.

**Rate Type**
Displays the rate type. The rate type that is specified in the Installation table appears by default. You can override this default value.

**Code**
Enter a code that denotes additional earnings that are charged to the home location. Create these codes in the Earnings table.

**Base Compensation**
Displays the amount that the employee earns at the home location, which you specify in Job Data Compensation.

**Home Amount**
Enter the home amount. Because you are entering information about home data, the Host Amount field doesn't appear.

**Base Compensation**
Displays the amount that the employee earns at the home location, which you specify on the Job Data - Payroll page.

**Code**
Enter a code from the Deductions table that denotes deductions that should be taken from the employee compensation that you specify for the home location.

**Home Amount**
Enter the home amount for the deduction code.

The net earnings and deductions that are specified for the home location appear. The Home/Host Net Amount field displays the net amount of all supplemental earnings and deductions for both home and host. Both amounts appear in the home currency.

Because you are entering information that is related to home data, the Host Amount field doesn't appear.
Chapter 4

Managing Educational Allowances

Managing International Schools and Programs Allowances

This topic discusses how to manage educational data.

Your organization may provide financial assistance to employees on global assignments, such as school tuition for children and language and orientation classes for adults. PeopleSoft HR helps determine any educational assistance to which employees are entitled and tracks multiple institutions.

Use the International School/Program and Dependent International School pages to track educational allowances for your employees and their dependents.

This example illustrates the fields and controls on the International School/Program page. You can find definitions for the fields and controls later on this page.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>School/Program Code</strong></td>
<td>Enter a school/program code. When you complete this field, the system displays the school/program type and indicates whether the school is internal or external. Create this information in the International School/Program table.</td>
</tr>
<tr>
<td><strong>Begin Date</strong></td>
<td>Enter the period during which the employee attends the school or program.</td>
</tr>
<tr>
<td><strong>Amount and Currency</strong></td>
<td>Complete this field only if you pay in a lump sum; enter the total amount. If you set up a payment schedule, leave this field blank. Once you create the schedule, the system calculates and sets the amount to the total scheduled amount. The currency appears by default as the base currency that was designated on the Installation Table - HCM Options page, which you can change. Currency codes are in the Currency Code table.</td>
</tr>
<tr>
<td><strong>Payment Frequency</strong></td>
<td>Enter a payment frequency, if you set up a payment schedule. Values are in the Translate table.</td>
</tr>
<tr>
<td><strong>Total Scheduled Amt</strong> (total scheduled amount)</td>
<td>Displays the total that the system calculates as you enter the payment schedule. Save the information entered on the page; the system sets the amount to the total scheduled amount.</td>
</tr>
<tr>
<td><strong>Payment Schedule</strong></td>
<td>To add more payments, position your cursor in the Payment Schedule group box and click the Insert Row button.</td>
</tr>
<tr>
<td><strong>Due Date</strong></td>
<td>Enter the due date for each payment that is due.</td>
</tr>
<tr>
<td><strong>Total Amt</strong> (total amount)</td>
<td>Enter the total amount of each payment.</td>
</tr>
<tr>
<td><strong>Employer Amt</strong> (employer amount)</td>
<td>Enter the amount that the company pays.</td>
</tr>
<tr>
<td><strong>Employee Amt</strong> (employee amount)</td>
<td>Displays the amount that the employee pays. If the total and employer amounts are different, when you complete the Employer Amt field, the system calculates and displays the employee amount.</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td><strong>Paid</strong></td>
<td>Select when you've paid the total amount to the provider of the school or program.</td>
</tr>
<tr>
<td><strong>Reimbursement Status</strong></td>
<td>Select the status that reflects your organization's reimbursement policy for this particular payment. After you reimburse the employee, change the status from <em>Not Reimbursed</em> to <em>Reimbursed</em>. If the amount that the employee paid can't be reimbursed, select <em>Unreimbursable</em>.</td>
</tr>
</tbody>
</table>
