1. About This Manual

1.1 Introduction

Welcome to Oracle FLEXCUBE Investor Servicing™, a comprehensive mutual funds automation software from Oracle Financial Servicing Software Ltd. ©.

This Oracle FLEXCUBE Investor Servicing User Manual helps you use the system to achieve optimum automation of all your mutual fund investor servicing processes. It contains guidelines for specific tasks, descriptions of various features and processes in the system and general information.

1.2 Related Documents

The User Manual is organized in to various parts, each discussing a component of the Oracle FLEXCUBE Investor Servicing system.

1.3 Audience

This Fund Manager User Manual is intended for the Fund Administrator users and system operators in the AMC.

1.4 Organization

This volume of the Fund Manager User manual is organized under the following chapter sequence:

Chapter 1	<i>About This Manual</i> explains the structure, audience, organization, and related documents of this manual.
Chapter 2	<i>Admin</i> – explains Purge frequency maintenance, Purge processing, query builder.

1.5 Conventions Used in this Manual

Before you begin using this User Manual, it is important to understand the typographical conventions used in it.

1.5.1 General Conventions

Convention	Type of Information
<i>Italics type</i>	Functional /foreign terms Validations for fields on a screen References to related Headings/Users Manuals For emphasis
Numbered Bullet	Step by step procedures

1.5.2 Keyboard Conventions

Convention	Type of Information
Keys	All keys of the keyboard are represented in capital letters. For example, <CTRL>.
Shortcut keys	All short cut keys are contained in brackets. For example, <ALT+SHIFT>.

1.6 Glossary of Icons

This User Manual may refer to all or some of the following icons.

Icons	Function
	Exit
	Add Row
	Delete Row
	Option List

1.7 Abbreviations and Acronyms

The following acronyms and abbreviations are adhered to in this User Manual:

Abbreviation/ Acronym	Meaning
ADMIN	User Administrator
AGY	The Agency Branch component of the system
AMC	Asset Management Company
BOD	Beginning of Day
CDSC	Contingent Deferred Sales Charge
CGT	Capital Gains Tax

Abbreviation/ Acronym	Meaning
CIF	Customer Information File
EOD	End of Day
EPU	Earnings per unit
FC-IS	Oracle FLEXCUBE Investor Servicing
FMG	The Fund Manager component of the system
FPADMIN	Oracle FLEXCUBE Administrator
ID	Identification
IHPP	Inflation Hedged Pension Plan
IPO	Initial Public Offering
LEP	Life and Endowment Products
LOI	Letter of Intent
NAV	Net Asset Value
REG	The Registrar component of the system
ROA	Rights of Accumulation
ROI	Return on Investment
SI	Standing Instructions
SMS	Security Management System
URL	Uniform Resource Locator
VAT	Value Added Tax
WAUC	Weighted Average Unit Cost

1.8 Getting Help

Online help is available for all tasks. You can get help for any function by clicking the help icon provided or by pressing F1.

2. Administration

2.1 Introduction

The Fund Manager component is equipped to manage administrative activities, which include the purging of data, maintenance of extraction information for extraction of data from the FIC application. This chapter explains these functions.

This chapter also explains the Query Builder, which can be used to construct user defined query statements to obtain information from the database.

2.2 Purge Frequency Maintenance

You can use this screen to maintain the frequency of purging for the tables in the system. According to the frequency specified here, the tables are purged during the End of Day processes.

Invoke the 'Purge Frequency Maintenance Detail' screen by typing 'UTDPURGS' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button. The 'Purge Frequency Maintenance Detail' screen is displayed. Select 'New' from the Actions menu in the Application tool bar or click new icon to enter the details.

Purge Frequency Maintenance Detail

New Enter Query

Basic Information

Purge Key * Retention Period
Table Name Retention Frequency
Purge Frequency Retention Period in Days
Last Purge Date

Additional Information

Backup Required Before Purge Installation Criteria
Column referred for Last Purge Date comparison User Criteria

Authorized

2.2.1 Fields in Purge Frequency Screen

2.2.1.1 Basic Information Section

Purge Key

Purge key is the purge name that you need to maintain.

Table Name

Display Only

The name of the table for which a purge frequency must be set up is displayed here.

Purge Frequency

Alphanumeric, Mandatory

Specify the frequency at which the selected table must be purged as part of the End of Day processes. You can use the drop-down list to make your choice. Following are the options available in the drop-down list:

- Daily
- Weekly
- Bi-Weekly
- Monthly
- Quarterly
- Half Yearly
- Yearly
- Not Scheduled

If purge frequency is maintained as not scheduled, the system will ignore this purge activity from execution during EOD.

Last Purge Date

Display Only

The most recent date on which the purge was performed is displayed in this field.

Retention Period

Display Only

The system will compute retention period in days based on retention period and frequency maintained.

Retention Frequency

Select the retention frequency from the drop-down. Following are the options available in the drop-down list:

- Daily
- Weekly
- Bi-Weekly
- Monthly
- Quarterly
- Half Yearly
- Yearly

Retention Period in Days

Display

The system will calculate the days based on the Retention Period Value and Frequency, system will calculate the days and is displayed here. For instance, If Retention Period is 1, and Retention Frequency is selected as weekly then 7 will be displayed in this field (1*7days in a week=7)

2.2.1.2 Additional Information Section

Archive Required?

Select 'Yes' if you want backup to be taken before purge. Else select 'No'.

If you select 'Yes', the system will copy the existing data into corresponding purge tables specified in the grid.

Note

Actual Table and corresponding purge table should be in same number of columns and order of columns. If there is mismatch, dynamic procedure creation will fail and maintenance cannot be authorized.

If you select 'No', the system will delete the data from the table.

Column referred for Retention

Displays the Column in the table which will be referred before processing purge. If purge is already processed, then process will start from the last purge date.

Installation Criteria

Enter the installation criteria based on which the purge will be maintained.

If any new purge activity is maintained, the same can be provided during first time maintenance only. Subsequent amendment of this value is restricted.

User defined Criteria

You can amend the purge details before process and enter the user defined criteria.

User defined Criteria is an additional criteria which will be appended to installation criteria to filter parent table data to be archived.

Dynamic Procedure Creation Related

Dynamic Procedure Name

Specify the name of the dynamic procedure to be created.

The system will create dynamic procedure during authorization. The system will validate the parameters provided for purging. If the specified procedure name already exists, then the system displays an override message.

Authorization will fail if dynamic procedure cannot be created without errors.

Pre Purge Procedure Related

You can execute a pre-defined procedure before the purging activity. Following are the options available:

- Yes
- No

If you select 'Yes', then the system will capture Pre Purge Procedure Name.

If you select 'No', then Pre Purge Procedure Name is not required.

Commit Counter

Specify commit frequency for archival/purging activity. If maintained, it should be greater than zero. If you do not provide commit frequency, then the system will consider static maintenance available. In the absence of static data, system will default 10000 as commit counter.

2.2.1.3 Archived Table Information

Table Name

Specify the archived table name.

Archived Table Name

The archived table name will be displayed.

The system performs the following validations for Purge Order:

- Purge Order defines the order in which the tables needs to be purged.
- Purge order for Master table should be 0.
- If master table is not provided in the grid, the system will use master table only for identifying the data for purge; during purge process the system will purge only the tables provided in the grid.
- If no table information are provided in the grid, the system will delete the parent table data based on the criteria provided. If no criteria is provided, then the system will truncate the table.
- Purge order of child tables should be greater than 0.
- Purging of master table will be done after purging of all the child tables (if master table is provided in the grid).
- Primary Key Column Name and Parent Primary Key Column Name. Column names of master and child tables to be provided here.
- Details of child table to be provided in Primary Key Column Name and details of master table to be provided in Parent Primary Key Column Name
- Data is mandatory for all child tables

2.2.2 Purge Frequency Summary screen

2.2.2.1 Retrieving Record in Purge Frequency Summary Screen

You can retrieve a previously entered record in the Summary Screen, as follows:

Invoke the 'Purge Frequency Maintenance Summary' screen by typing 'UTSPURGS' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button. Specify any or all of the following details in the corresponding fields:

- The status of the record in the Authorized field. If you choose the 'Blank Space' option, then all the records are retrieved.
- The status of the record in the Open field. If you choose the 'Blank Space' option, then all records are retrieved
- The Purge Key
- The Purge Frequency
- The Last Purge Date
- Archive Required

- Dynamic Procedure Name

Click 'Search' button to view the records. All the records with the specified details are retrieved and displayed in the lower portion of the screen.

Note

You can also retrieve the individual record detail from the detail screen by querying in the following manner:

- Press F7
 - Input the Purge Key.
 - Press F8
-

You can perform Edit, Delete, Amend, Authorize, Reverse, Confirm operations by selecting the operation from the Action list. You can also search a record by using a combination of % and alphanumeric value.

Example

You can search the record for Purge Key by using the combination of % and alphanumeric value as follows:-

- Search by A%: System will fetch all the records whose Purge Key starts from Alphabet 'A'. For example, AGC17, AGVO6, AGC74 etc.
- Search by %7: System will fetch all the records whose Purge Key ends by numeric value '7'. For example AGC17, GSD267, AGC77 etc.
- Search by %17%:- System will fetch all the records whose Purge Key contains the numeric value 17. For example, GSD217, GSD172, AGC17 etc.

2.2.2.2 Editing Purge Frequency Maintenance

You can modify the details of Purge Frequency Maintenance that you have already entered into the system, provided it has not subsequently authorized. You can perform this operation as follows:

- Invoke the Purge Frequency Summary screen from the Browser.
- Select the status of the record that you want to retrieve for modification in the Authorized field. You can only modify records that are unauthorized. Accordingly, choose the unauthorized option.
- Specify any or all of the details in the corresponding fields to retrieve the record that is to be modified.
- Click 'Search' button. All unauthorized records with the specified details are retrieved and displayed in the lower portion of the screen.
- Double click the record that you want to modify in the list of displayed records. The Purge Frequency Maintenance Detail screen is displayed.
- Select Unlock Operation from the Action list to modify the record. Modify the necessary information.
- Click Save to save your changes. The Purge Frequency Maintenance Detail screen is closed and the changes made are reflected in the Purge Frequency Summary screen.

2.2.2.3 Viewing Purge Frequency Maintenance record

To view a record that you have previously input, you must retrieve the same in the Purge Frequency Summary screen as follows:

- Invoke the Purge Frequency Summary screen from the Browser.
- Select the status of the record that you want to retrieve for viewing in the Authorized field. You can also view all records that are either unauthorized or authorized only, by choosing the Unauthorized/Authorized option.
- Specify any or all of the details of the record in the corresponding fields on the screen and click 'Search' button. All records with the specified fields are retrieved and displayed in the lower portion of the screen.
- Double click the record that you want to view in the list of displayed records. The Purge Frequency Maintenance Detail screen is displayed in View mode.

2.2.2.4 Deleting Purge Frequency Maintenance record

You can delete only unauthorized records in the system. To delete a record that you have previously entered:

- Invoke the Purge Frequency Summary screen from the Browser.
- Select the status of the record that you want to retrieve for deletion.
- Specify any or all of the details and click 'Search' button. All records with the specified fields are retrieved and displayed in the lower portion of the screen.
- Double click the record that you want to delete in the list of displayed records. The Purge Frequency Maintenance Detail screen is displayed.
- Select Delete Operation from the Action list. The system prompts you to confirm the deletion and the record is physically deleted from the system database.

2.2.2.5 Authorizing Purge Frequency Maintenance

An unauthorized Purge Frequency must be authorized in the system for it to be processed. To authorize a record:

- Invoke the Purge Frequency Summary screen from the Browser.
- Select the status of the record that you want to retrieve for authorization. Typically, choose the unauthorized option.
- Specify any or all of the details and click 'Search' button. All records with the specified details that are pending authorization are retrieved and displayed in the lower portion of the screen.

- Double click the record that you wish to authorize. The Purge Frequency Maintenance Detail screen is displayed. Select Authorize operation from the Action List.

When a checker authorizes a record, details of validation, if any, that were overridden by the maker of the record during the Save operation are displayed. If any of these overrides results in an error, the checker must reject the record.

2.2.2.6 Amending Purge Frequency Maintenance

After a Purge Frequency Maintenance is authorized, it can be modified using the Unlock operation from the Action List. To make changes to a record after authorization:

- Invoke the Purge Frequency Summary screen from the Browser.
- Select the status of the record that you want to retrieve for authorization. You can only amend authorized records.
- Specify any or all of the details and click 'Search' button. All records with the specified details that are pending authorization are retrieved and displayed in the lower portion of the screen.
- Double click the record that you wish to authorize. The Purge Frequency Maintenance Detail screen is displayed in amendment mode. Select Unlock operation from the Action List to amend the record.
- Amend the necessary information and click on Save to save the changes.

2.2.2.7 Authorizing Amended Purge Frequency Maintenance

An amended Purge Frequency Maintenance must be authorized for the amendment to be made effective in the system. The authorization of amended records can be done only from Fund Manager Module and Agency Branch module.

The process of subsequent authorization is the same as that for normal transactions.

2.2.2.8 Copying Attributes

If you want to create a new Purge Frequency Maintenance with the same attributes of an existing maintenance, you can copy the attributes of an existing Purge Frequency Maintenance to a new one.

To copy the attributes:

- Retrieve the record whose attributes the new Purge Frequency should inherit. You can retrieve the record through the Summary screen or through the F7-F8 operation explained in the previous sections of this chapter.
- Click on Copy.
- Indicate the ID for the new Purge Frequency Maintenance. You can, however, change the details of the new maintenance.

2.3 Purge Use Case Maintenance

This section contains the following topics:

- [Section 2.3.1, "Invoking Purge Use Case Maintenance Screen"](#)

2.3.1 Invoking Purge Use Case Maintenance Screen

You can provide the purge fund data along with relevant audit/ history information using 'Purge Use Case Maintenance' screen. All tables from which data will be archived/purged will be available as factory shipped maintenance. You can purge or archive fund data based on

predefined criteria. You can also purge or archive fund information along with associated maintenances, transaction data and audit trail information.

There will be a pre purge procedure which will populate the identified records for authorization. The screen will also identify records which cannot be purged for business reasons.

On authorization of the pre purged record, the system will actual archive/ purge process based on the maintained schedule. The system will log the detail of records which could not be purged along with reasons.

The system will purge/ archive all fund data including the following information:

- Fund Rules (UTNFNDRL)
- Fund Bank Account (UTDFNDAC)
- Fund Entity (UTDFNENT)
- Fund Calendar (UTDHOLID)
- Fund conversion (UTDFNCVR)
- Fund Dividend Records including payment/ reinvestment records at fund level
- Fund WHT (UTDWHTAX)
- Fund Price (UTDFPRIC)
- Periodic Load (UTDPERLM)
- Fund Switch Restriction (UTDFNSWR)
- GL (UTDGLISD)
- Mock Dividend (UTDMOCKD)
- UH Balledger
- BOD Outstanding Units
- Corporate Action Tables
- Fund User (UTDFNDUS)
- Fund Sub Acc Mapping (UTDFSAMS)
- Fund Price Holiday (UTDFPHOL)
- Fund Investment Component (UTDFICRM)
- Fund CPMF (UTDFCPMF)
- Fund Agency Limit (UTDFALMT)
- Auto-switch Set up (UTDASSSD)
- ADHOC price (UTDAHPRM)
- Agent Price Basis (UTDAGTPR)
- Fund UH Category Holding Period (UTDMINHL)
- Unit Price Rounding (UTDPRRRL)
- Target-based Fee (UTDTGBFE)

Note

Only the data which is not interlinked to any other record will be purged/archived. Inter-linked data which will lead to system inconsistency will not be archived/purged. Data once archived cannot be restored back to main tables.

You can invoke the 'Purge Use Case Maintenance' screen by typing 'UTDFNPUR' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can specify the following details:

Basic Information

Purge Function

Alphanumeric; 16 Characters; Mandatory

Specify the purge function details.

Purge Frequency

Mandatory

Select the purge frequency from the drop-down list. The list displays the following values:

- Daily
- Monthly
- Fortnight
- Quarterly
- Half Yearly
- Yearly

Last Purge Date

Display

The system displays the last purge date.

Pre Purge Mode

Mandatory

Select the pre purge model from the drop-down list. The list displays the following values:

- EOD
- Manual

Commit Counter

Numeric; 8 Characters; Mandatory

Specify the commit counter.

Archive Required?

Optional

Select if archive is required or not from the drop-down list. The list displays the following values:

- Yes
- No

Table Name

Alphanumeric; 50 Characters; Mandatory

Specify the table name.

Retention Period Basis

Mandatory

Select the retention period basis from the drop-down list. The list displays the following values:

- Daily
- Monthly
- Fortnight
- Quarterly
- Half Yearly
- Yearly

Retention Period

Numeric; 8 Characters; Optional

Specify the retention period.

Column Referred For Retention

Alphanumeric; 50 Characters; Mandatory

Specify the column referred for retention.

Post Purge Mode

Mandatory

Select the post purge mode from the drop-down list. The list displays the following values:

- EOD
- Manual
- Automatic

User Criteria

Alphanumeric; 50 Characters; Mandatory

Specify the user criteria details.

Purge Key Details

Purge Key

Alphanumeric; 8 Characters; Mandatory

Specify the purge key. Alternatively, you can select purge key from the option list. The list displays all valid purge keys maintained in the system.

Purge Order

Numeric; 2 Characters; Mandatory

Specify the purge order.

Pre Purge Procedure Name

Alphanumeric; 50 Characters; Mandatory

Specify the pre purge procedure name.

Dependent Purge Key

Alphanumeric; 8 Characters; Mandatory

Specify the dependent purge key. Alternatively, you can select dependent purge key from the option list. The list displays all valid dependent purge keys maintained in the system.

2.4 Purge Use Case Maintenance Summary

This section contains the following topics:

- [Section 2.4.1, "Retrieving Record in Purge Use Case Record"](#)
- [Section 2.4.2, "Editing Purge Use Case Record"](#)
- [Section 2.4.3, "Viewing Purge Use Case Record"](#)
- [Section 2.4.4, "Deleting Purge Use Case Record"](#)
- [Section 2.4.5, "Authorizing Purge Use Case Record "](#)
- [Section 2.4.6, "Amending Purge Use Case Record"](#)
- [Section 2.4.7, "Authorizing Amended Purge Use Case Record"](#)

2.4.1 Retrieving Record in Purge Use Case Record

You can retrieve a previously entered record in the Summary Screen, as follows:

Invoke the 'Purge Use Case Maintenance Summary' screen by typing 'UTSFNPUR' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button. Specify any or all of the following details in the corresponding fields:

- The status of the record in the Authorized field. If you choose the 'Blank Space' option, then all the records are retrieved.
- The status of the record in the Open field. If you choose the 'Blank Space' option, then all records are retrieved
- Purge Function
- Retention Period
- Purge Frequency
- Retention Period Basis
- Pre Purge Mode
- Post Purge Mode

Click 'Search' button to view the records. All the records with the specified details are retrieved and displayed in the lower portion of the screen.

Note

You can also retrieve the individual record detail from the detail screen by querying in the following manner:

- Press F7
 - Input the Purge Frequency
 - Press F8
-

You can perform Edit, Delete, Amend, Authorize, operations by selecting the operation from the Action list. You can also search a record by using a combination of % and alphanumeric value.

Example

You can search the record for Purge Key by using the combination of % and alphanumeric value as follows:

- Search by A%: System will fetch all the records whose Purge Frequency starts from Alphabet 'A'. For example, AGC17, AGVO6, AGC74 etc.
- Search by %7: System will fetch all the records whose Purge Frequency ends by numeric value '7'. For example AGC17, GSD267, AGC77 etc.
- Search by %17%:- System will fetch all the records whose Purge Frequency contains the numeric value 17. For example, GSD217, GSD172, AGC17 etc.

The screenshot shows the 'Purge Use Case Maintenance' application window. The window title is 'Purge Use Case Maintenance'. The interface includes a search bar with options for 'Search', 'Advanced Search', 'Reset', and 'Clear All'. Below the search bar, there are several input fields: 'Authorized', 'Purge Function', 'Pre Purge Mode', 'Open', 'Retention Period', 'Retention Period Basis', and 'Post Purge Mode'. A table below these fields shows search results with columns for 'Authorized', 'Open', 'Purge Function', 'Retention Period', 'Purge Frequency', 'Retention Period Basis', and 'Pre Purge Mode'. The table is currently empty. At the bottom right of the window is an 'Exit' button.

2.4.2 Editing Purge Use Case Record

You can modify the details of Purge Use Case Maintenance that you have already entered into the system, provided it has not subsequently authorized. You can perform this operation as follows:

- Invoke the Purge Use Case Maintenance Summary screen from the Browser.

- Select the status of the record that you want to retrieve for modification in the Authorized field. You can only modify records that are unauthorized. Accordingly, choose the unauthorized option.
- Specify any or all of the details in the corresponding fields to retrieve the record that is to be modified.
- Click 'Search' button. All unauthorized records with the specified details are retrieved and displayed in the lower portion of the screen.
- Double click the record that you want to modify in the list of displayed records. The Purge Use Case Maintenance Detail screen is displayed.
- Select Unlock Operation from the Action list to modify the record. Modify the necessary information.
- Click Save to save your changes. The Purge Use Case Maintenance Detail screen is closed and the changes made are reflected in the Purge Use Case Maintenance Summary screen.

2.4.3 Viewing Purge Use Case Record

To view a record that you have previously input, you must retrieve the same in the Purge Use Case Maintenance Summary screen as follows:

- Invoke the Purge Use Case Maintenance Summary screen from the Browser.
- Select the status of the record that you want to retrieve for viewing in the Authorized field. You can also view all records that are either unauthorized or authorized only, by choosing the Unauthorized/Authorized option.
- Specify any or all of the details of the record in the corresponding fields on the screen and click 'Search' button. All records with the specified fields are retrieved and displayed in the lower portion of the screen.
- Double click the record that you want to view in the list of displayed records. The Purge Use Case Maintenance Detail screen is displayed in View mode.

2.4.4 Deleting Purge Use Case Record

You can delete only unauthorized records in the system. To delete a record that you have previously entered:

- Invoke the Purge Use Case Maintenance Summary screen from the Browser.
- Select the status of the record that you want to retrieve for deletion.
- Specify any or all of the details and click 'Search' button. All records with the specified fields are retrieved and displayed in the lower portion of the screen.
- Double click the record that you want to delete in the list of displayed records. The Purge Use Case Maintenance Detail screen is displayed.
- Select Delete Operation from the Action list. The system prompts you to confirm the deletion and the record is physically deleted from the system database.

2.4.5 Authorizing Purge Use Case Record

An unauthorized Purge Use Case Maintenance must be authorized in the system for it to be processed. To authorize a record:

- Invoke the Purge Use Case Maintenance Summary screen from the Browser.
- Select the status of the record that you want to retrieve for authorization. Typically, choose the unauthorized option.

- Specify any or all of the details and click 'Search' button. All records with the specified details that are pending authorization are retrieved and displayed in the lower portion of the screen.
- Double click the record that you wish to authorize. The Purge Use Case Maintenance Detail screen is displayed. Select Authorize operation from the Action List.

When a checker authorizes a record, details of validation, if any, that were overridden by the maker of the record during the Save operation are displayed. If any of these overrides results in an error, the checker must reject the record.

2.4.6 Amending Purge Use Case Record

After a Purge Use Case Maintenance is authorized, it can be modified using the Unlock operation from the Action List. To make changes to a record after authorization:

- Invoke the Purge Use Case Maintenance Summary screen from the Browser.
- Select the status of the record that you want to retrieve for authorization. You can only amend authorized records.
- Specify any or all of the details and click 'Search' button. All records with the specified details that are pending authorization are retrieved and displayed in the lower portion of the screen.
- Double click the record that you wish to authorize. The Purge Use Case Maintenance Detail screen is displayed in amendment mode. Select Unlock operation from the Action List to amend the record.
- Amend the necessary information and click on Save to save the changes.

2.4.7 Authorizing Amended Purge Use Case Record

An amended Purge Use Case Maintenance must be authorized for the amendment to be made effective in the system. The authorization of amended records can be done only from Fund Manager Module and Agency Branch module.

The process of subsequent authorization is the same as that for normal transactions.

2.5 Purge View

This section contains the following topics:

- [Section 2.5.1, "Invoking Purge View Screen"](#)

2.5.1 Invoking Purge View Screen

You can authorize the pre-purge records. Once the record is authorized, the system will generate an interface file to verify the pre-purge records.

You can view the purge details using 'Purge View' screen. You can invoke this screen by typing 'UTDPURVW' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows a window titled "Purge View" with a "Save" icon in the top left. The main area contains four input fields: "Purge Use Case Key" (highlighted with a red box), "Pre Purge Executed date", "Pre Purge Executed Appdate", and "Batch Ref Number". An "Authorize" button is located to the right of the "Pre Purge Executed date" field. A "Cancel" button is at the bottom right.

You can specify the following details:

Purge Use Case Key

Alphanumeric; 16 Characters; Mandatory

Specify the purge use case key. Alternatively, you can select purge use case key from the option list. The list displays all valid purge use case key maintained in the system.

Pre Purge Executed date

Display

The system displays the pre purge executed date based on the selected purge use case key..

Pre Purge Executed Appdate

Display

The system displays the pre purge executed app date based on the selected purge use case key.

Batch Ref Number

Display

The system displays the batch reference number.

Clicking authorize button, the system will authorize the records and will also extract a interface file in text format and will be placed in the export file path. You can use this extract to pre purge records to verify the data being purged. Once authorized, the system will purge/archive record where validations are successful as per purge schedule.

2.6 Purge Batch

This section contains the following topics:

- [Section 2.6.1, "Invoking Purge Batch Screen"](#)

2.6.1 Invoking Purge Batch Screen

You can execute the pre-purge and post-purge process using 'Purge Batch' screen. You can invoke this screen by typing 'UTDPURBT' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can specify the following details:

Purge Use Case Key

Alphanumeric; 16 Characters; Mandatory

Specify the purge use case key. Alternatively, you can select purge use case key from the option list. The list displays all valid purge use case key maintained in the system.

Purge Selection

Mandatory

Select the purge status from the drop-down list. The list displays the following values:

- Pre Purge - A pre purge procedure will be run (either manual or during EOD) and will populate relevant records picked up by the pre purge procedure for purge/archival
- Post Purge - The post-purge process will be run manually or automatically or during EOD for purge/archival. For manual operation, you can use 'Purge Batch' screen and for automatic operation, the same will happen during the authorize button click itself.

Note

Purge keys with pre/post as manual only will be listed in the purge batch screen option list based on the purge selection.

Click 'Execute' button to execute the purge batch.

There will be a pre purge procedure which will populate the identified records for authorization. The screen will also identify records which cannot be purged for business reasons.

On authorization of the pre purged record, the system will archive/purge process based on the maintained schedule. The system will also log the detail of records which could not be purged along with reasons.

Once archived or purged, unitholder details will not be visible in any of the following screens

- Unitholder details including bank, contact details, add info etc (UTDUH)
- UH Deal (UTDUHDEL)
- IDS (UTDUHIDS)

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.
