1. Preface

1.1 Intended Audience

This document is intended for the following audience:

- Customers
- Partners

1.2 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.3 Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

1.4 Structure

This manual is organized into the following categories:

Preface gives information on the intended audience. It also describes the overall structure of the User Manual.

Introduction provides brief information on the overall functionality covered in the User Manual.

The subsequent chapters provide information on transactions covered in the User Manual.

Each transaction is explained in the following manner:

- Introduction to the transaction
- Screenshots of the transaction
- The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.
- Procedure containing steps to complete the transaction- The mandatory and conditional fields of the transaction are explained in the procedure. If a transaction contains multiple procedures, each procedure is explained. If some functionality is present in many transactions, this functionality is explained separately.

1.5 Related Information Sources

3. Electronic Bill Presentment And Payment

Electronic bill presentment and payment (EBPP) is a process that enables the billers to create, and present the bills / invoices online to their customers including corporates. This feature also enables the customers/ users to pay the bills online. The EBPP services are widely used in many areas like utility bill payment, fund transfer through net banking against various purchases of utility products and services by the users, payment to service providers, mobile/ DTH bill payment etc.

The main advantage of electronic bill presentment and payment is that users can pay their bills anytime quickly and conveniently, which saves lots of time and paper work.

[Home](#)

4. Bills

The Bill payment feature enables the corporate users to pay their utility bills online. Through this feature, corporate users are able to pay their bills quickly, securely and at their own convenience.

Billers are maintained in OBDX either manually using Biller Maintenance functionality or through a bulk file upload. All the registered billers (of all types) and bills are displayed on the screen. The billers can be of 'Presentment', 'Payment', 'Presentment and Payment' and 'Recharge' type.

The user either can pay the bills instantly or can schedule it to a later date. The user also has an option to enter the payment amount, select the payment frequency and the source account from which payment can be made.

The online banking application enables users to register and maintain the billers towards whom utility payments are to be made frequently or on a regular basis.

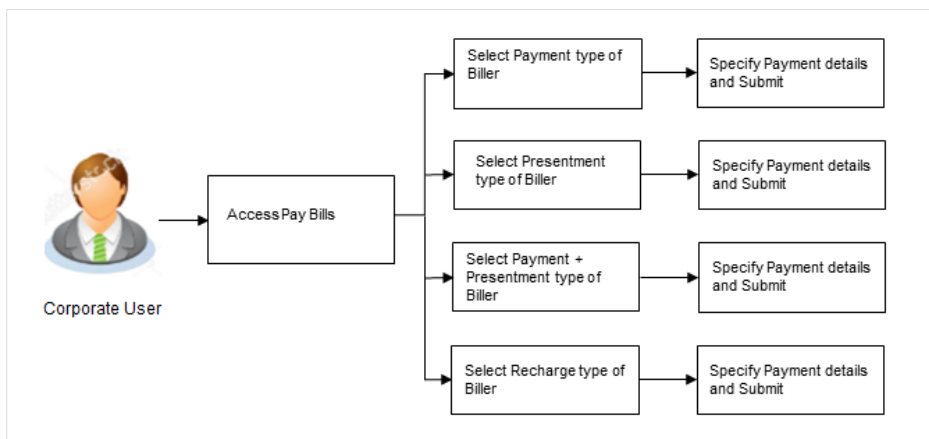

Prerequisites:

- Transaction access is provided to the corporate user
- Approval rule set up for corporate user to perform the actions
- Transaction working window is maintained
- Billers are maintained
- Transaction limits are assigned to the user to perform the transaction

Features supported in application

- Bill Payment

Workflow

How to reach here:

Dashboard > Toggle Menu > Bill Payments > Bills

4.1 Bills - Summary

Corporate users can initiate bill payments towards billers they have already added/ registered. All billers that are previously registered are listed for selection. Once the user selects a biller, the details of that biller are populated on the screen for the user to verify. The user can proceed to initiate the bill payment transaction by specifying details such as the amount to be paid, the account from which the funds are to be transferred, and the bill date and bill number.

Bills

The screenshot displays the 'Bills' section of the Futura Bank user interface. At the top, there are navigation options for 'Viewer', 'ATM/Branch', and 'English'. The user is identified as 'Welcome, Monica Maskeri' with a last login time of '27 Apr 03:51 PM'. The main content area is titled 'Bills' and includes a search bar and an 'Add Biller' button. Below this, bills are grouped into four categories: 'Here are your bills presented', 'Here are your billers, you can pay any time', and 'Here are your billers for recharge'. Each bill entry shows a 'Pay' button and a 'More' menu. A promotional banner on the right side of the page reads 'Pay bills...hassle-free' and provides information about the bank's Bill Payment Service.

Click **Add Biller** to add the billers.

FAQs

1. What is Electronic Bill Presentment and Payment (EBPP)?

Electronic Bill Presentment and Payment, the process by which companies send their bills to the customers and receive payments electronically. Users can pay their bills using current and savings account/ credit card or debit card.

2. Can I initiate future dated bill payments?

Yes, you can initiate future dated bill payments by using the "Pay Later" option under bill payment. Availability of this feature depends on whether the biller allows such payments.

3. Can I do part payment or excess payment to the biller?

Part payment and excess payment can be done only if it is allowed by biller, as maintained by bank administrator in Biller Maintenance screen.

4. Can I make a payment towards a biller who is currently not registered in my biller list?

Yes, using "Quick Bill Pay" functionality you can pay a bill without registering the biller provided the biller allows such payments.

5. Can I set an option to auto pay the bill amount of already generated bills?

Yes, you can set up auto pay for any bill that is presented and is not yet paid.

[Home](#)

5. Add Biller

The online banking application enables the corporate user to add billers of the specific categories for the payment of bills and prepaid recharge electronically. Following types of billers are added.

- **Presentment Type:** Billers presents the bill or invoice to the customer/ user online before paying the bill
- **Payment Type:** Biller does not present bills. Biller allows the users to pay their bills anytime using their current and savings or credit card account that is credited to the billers account
- **Presentment and Payment Type:** Billers has features similar to both Presentment as well as Payment type of billers. The bills/ invoice can be presented to the users for bill payment or the users can pay bills without the invoice
- **Recharge Type:** Billers allows users to do “Recharge” their prepaid services like Mobile, DTH or Internet

Corporate users can add billers by specifying the Nickname of the biller(nickname should be unique), biller specific single /multiple unique customer IDs e.g. Relationship no, Account number etc., and other Biller labels as maintained in the Biller Maintenance administration screen. Multiple but unique registrations with the same biller are allowed.

When a channel customer does an “Add Biller” transactions, he is essentially registering with the biller to make online bill payments. At this stage some billers may want to validate that the customer is a genuine customer. The behavior is based on how customer validation has been set up when biller got on-boarded

Auto: When a biller is of Customer Validation type as “Auto”, customers who add this biller do not need any validation from biller and their registrations are auto-approved and they can initiate online bill payments to this biller

Offline: When a biller is on boarded with Validation type as “Offline”, for retail or corporate customers who add this biller, their registration status will be “Pending”. This means that the biller will have to do an offline validation of these registrations and can approve or reject them. OBDX does not provide any OOTB (Out of the box) mechanism for downloading the “Pending” registrations and changing their status by banker or biller.

Online: When a biller is on boarded with Validation type as “Online”, for retail or corporate customers who add this biller, their registrations need to be validated by biller online. The online validation could be a redirect to the biller’s website where he can do the validation through REST type web service through which validation happens. OBDX does not provide for OOTB implementation of the online validation.

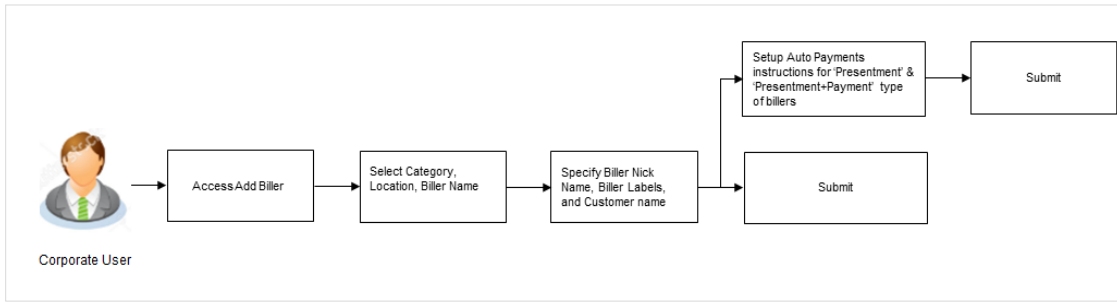

Prerequisites:

- Transaction access is provided to the corporate user
- Approval rule set up for corporate user to perform the actions
- Billers are maintained in host system
- Admin Biller Category maintenance is done

OR

Click **Go to Dashboard**, to navigate to the dashboard.

FAQs

1. Can I delete billers that I no longer need to make payments to?

Yes, you can choose to delete the billers that you no longer need.

2. When can I make the payment to newly added biller?

After successfully adding a biller, you may proceed to pay bills towards the specific biller immediately. However, some billers need to validate your registration in which case you can start paying the biller after a successful validation.

3. If I delete or edit a biller, what will happen to the in-flight transactions?

Biller modification or deletion will not have any impact on the transactions which are initiated towards the payee and that are pending further processing.

6. Manage Billers

Billers are maintained in OBDX either manually using Biller Maintenance functionality or through a bulk file upload.

The online banking application enables corporate users to maintain the billers towards whom utility payments are to be made frequently or on a regular basis. Manage biller functionality allows the users to modify and delete the details of the registered billers. Following details of the registered billers can be modified:

- Nickname
- Auto pay details: Change Bill Amount/ Limit Amount choice, Edit existing Bill Amount, Change Source of funds
- Scheduled Bill Payment/ Recharge: Modify Payment Amount, Specific Date (before the payment date)
- Scheduled Bill Payment/ Recharge - Recurring: Modify Payment Amount, Start and End Dates, Payment Frequency

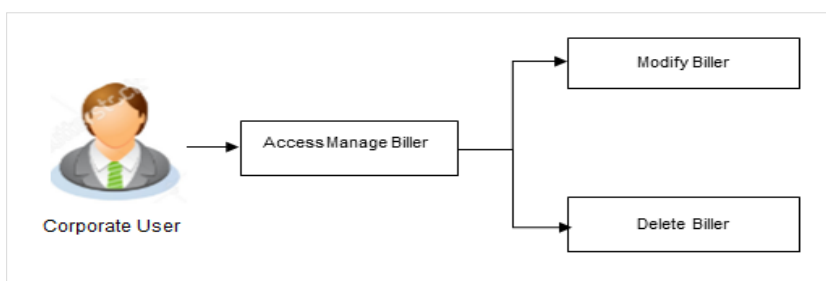

Prerequisites:

- Transaction access is provided to the corporate user
- Approval rule set up for corporate user to perform the actions
- Billers are maintained in host system
- Admin Biller Maintenance is done

Features supported in the application

- Modify Biller
- Delete Biller
