5. Log Monitors	5-1
5.1 Sweep Monitor	5-3
5.2 Pool Monitor	5-5
5.3 Hybrid Monitor	5-8

1. Preface

1.1 Intended Audience

This document is intended for the following audience:

- Customers
- Partners

1.2 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.3 Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

1.4 Structure

This manual is organized into the following categories:

Preface gives information on the intended audience. It also describes the overall structure of the User Manual.

Introduction provides brief information on the overall functionality covered in the User Manual.

The subsequent chapters provide information on transactions covered in the User Manual.

Each transaction is explained in the following manner:

- Introduction to the transaction
- Screenshots of the transaction
- The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.
- Procedure containing steps to complete the transaction- The mandatory and conditional fields of the transaction are explained in the procedure. If a transaction contains multiple procedures, each procedure is explained. If some functionality is present in many transactions, this functionality is explained separately.

1.5 Related Information Sources

3. Liquidity Management

Liquidity Management solution provides with an ability to the corporate customers to manage their liquidity by optimizing interest by offsetting account balances, reducing interest costs, maximizing net returns and by providing greater visibility over cash positions. It helps to mobilize and manage funds corrective actions, helps to reduce external borrowing and liquidity risk, manages foreign currency liquidity requirements, and enhances visibility of cash across the group.

As a part of Liquidity Management module of OBDX, following features are available to the corporate customers of the Bank.

- **Liquidity Management Overview Dashboard**

The liquidity management dashboard provides an important information to the corporate on digital banking platform. Various widgets are a part of the dashboard which gives the complete information about the corporate position.

- Position of a corporate by region/geographical location
- Position of a corporate by currency
- Net corporate position along with assets and liabilities information
- Top sweeps in local currency and cross currency
- Sweep Monitor

- **Account Structure Maintenance:**

Account structure is an efficient tool to optimize the working capital of the business. The objective of creating an account structure is to bring together the credit and debit balances of different current and savings accounts into one single concentration account of a corporate. This enables the corporate customer to manage daily liquidity in their business in a consolidated fashion to derive maximum benefits at minimal cost.

OBDX enables the corporate users to maintain account structures by providing sweep or pool instructions.

As a part of account structure maintenance, OBDX enables the customer to,

- **Build Account Structure**

Application allows the corporate user to build new account structure using digital banking platform. While building a structure, corporate can capture.

- Structure Type and Details (Sweep, Pool, Hybrid)
- Account Mapping and specify the hierarchies
- Check basic validations
- Set up instructions between each account pair.

- **View and Edit Account Structure**

A facility is provided to corporates to search the account structures maintained between the internal and external accounts of their parties. Further, can see and edit the structure details along with the instructions set between an account pair.

- Pause/Resume account structure and Adhoc Execution

Corporates can pause the processing of a structure for a specific time period and also can initiate an adhoc execution of sweeps for specific structure.

- **Sweep Monitor**

A feature is enabled to the corporate user to select the structure and view the sweep logs of a structure with specific statuses

- Executed Sweeps
- Upcoming Sweeps
- Exceptions (Failed executions)

- **Liquidity Management using Virtual Accounts**

The Liquidity Management module in OBDX can handle both real accounts as well as Virtual Accounts. Below are the key points:

- In order to be able to do liquidity management using Virtual Accounts, the bank must also be using the Virtual Accounts module of OBDX along with product processors Oracle Banking Virtual Accounts Management (OBVAM) and Oracle Banking Liquidity Management (OBLM). Further the OBVAM & OBLM must have an integrated setup.
- Virtual Accounts and Virtual Account Structures created in the OBDX Virtual Accounts module with Interest Calculation required flag as Yes will be available in the OBDX Liquidity Management module.
- The party/customer and user must have the necessary access management rights enabled for Virtual Accounts in liquidity management.
- Once the Virtual Accounts are visible, rest of the steps in creating liquidity management structure, capturing sweep instructions etc. remain same for both real and Virtual Accounts. At this point only Sweep structures are allowed for Virtual Accounts.
- The Virtual Account balances visible on the screen are fetched from OBVAM.

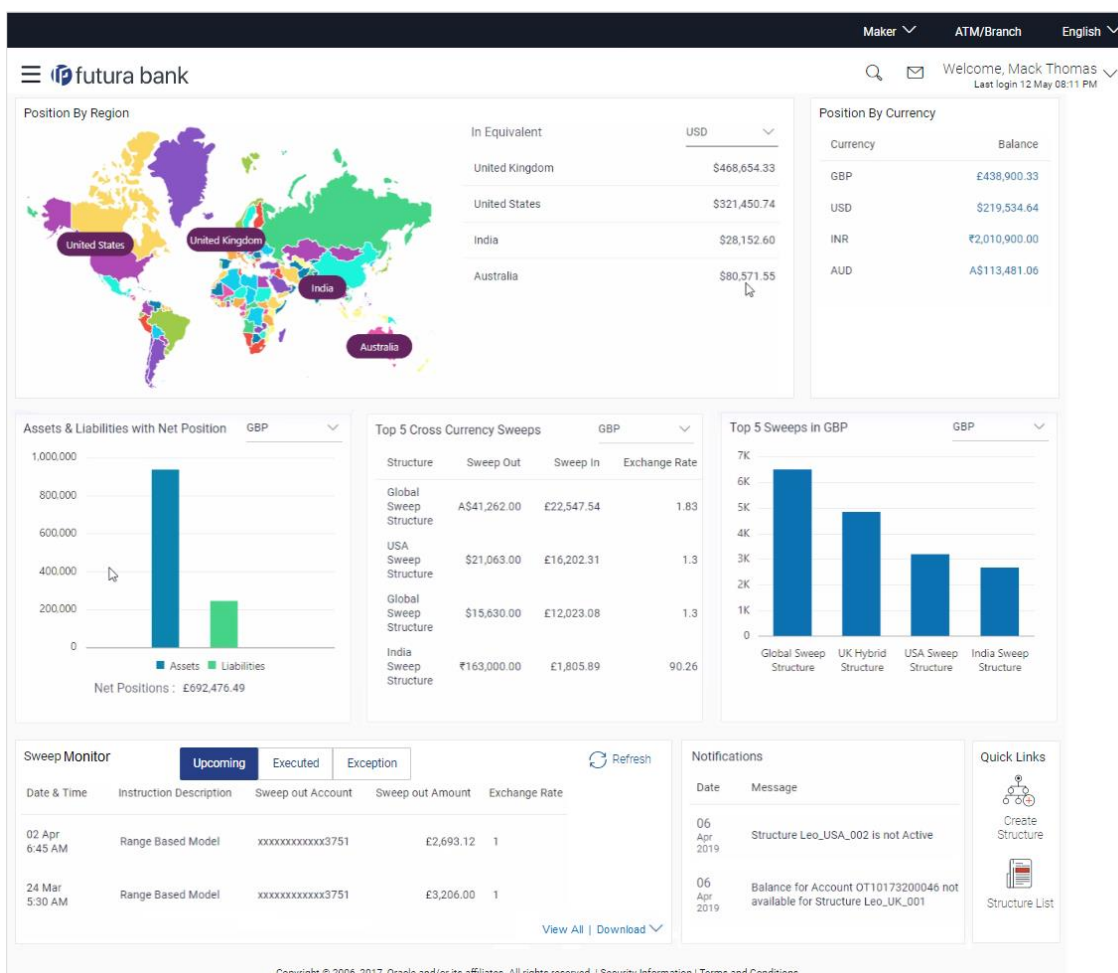

Note: Corporate Liquidity Management module support is currently not available on mobile and tablet devices.

3.1 Overview (Dashboard)

Dashboard provides a quick view of the most relevant functions, to achieve a particular objective or complete a process. Cash and Liquidity Management Dashboard provides the detailed information about the corporate position. The dashboard is organized in the form of different widgets. Screen displays the consolidated balance available in all accounts enabled for liquidity management with the number of accounts mapped to the logged in user.

The widgets shown in on the Liquidity Management Dashboard are as follows:

- Position of Region
- Position by Currency
- Balances Summary
- Top 5 sweeps in local currency and in cross currency
- Sweep Monitor
- Notifications
- Quick Links

Dashboard Overview

Position By Region

This widget displays the information of the corporate position based on the internal and external current and savings account held under the primary and linked party IDs across different geographical location. Total available balance in all the accounts which are enabled for liquidity management and which are mapped to the logged in user is converted in local currency, consolidated by region and the information is shown in the world map. Also the region wise balance is displayed in the tabular form.

By clicking on the specific region in world map, corporate can view the number of accounts held under a region in different currencies along with the balances. Further drill down is available to view the region-currency wise account summary.

Position By Region

Australia EUR

Party Name	Account Number	Account Type	Balance
JOHNSON	xxxxxxxxxxx0262	Internal	£1,000,000.00
JOHNSON	xxxxxxxxxxx0273	Internal	£0.00

Page 1 of 1 (1-2 of 2 items) < 1 >

Ok

- Region Name – Name of the region for which the user wants to view the corporate position
- Currency – Currency in which the accounts are held under the selected region
- Party Name – Name of the party mapped to the corporate accounts
- Account Number – Account number held by the corporates
- Account Type – The type of the account Internal/External
- Net Balance – Balance in the account

Position By Currency

Corporate user can view the position of the corporate by currency based on the internal and external current and savings account held under the primary and linked party IDs and which are enabled for liquidity management and mapped to the user. Further drill down is available to view the currency wise account summary grouped by region.

Party Name	Account Number	Account Type	Net Balance
XYZ Corp	xxxxxxxxxxxx1067	Internal	£11,200.00
XYZ Corp	xxxxxxxxxxxx1075	Internal	-£1,100.00
XYZ Corp	xxxxxxxxxxxx1057	Internal	£10,000.00

Page 1 of 1 (1-3 of 3 items) | < 1 >

Ok

- Party Name - Name of the party mapped to the corporate accounts
- Account Number – Account number held by the corporates
- Account Type – The type of the account Internal/External
- Net Balance – Net balance in the account.

Assets and Liabilities with Net Position

The section displays the total position of assets and liabilities in graphical form. The information is based on the balances available in the Liquidity Management enabled current and savings accounts. Default, corporate position is shown in the local currency, whereas the user can choose to view the information in specific currency.

A further drilldown is available on the Assets and Liabilities column, which opens an overlay with the individual account details.

Quick Links

The following commonly used transactions can be initiated from this section:

- Create Structure - allowing the corporate users to create new account structure using digital platform
- Structure List - allowing the corporate users to view the account structures maintained between the accounts of their parties

Notifications

The notification section allows the corporate user to view latest three notifications sent by the bank. Click View All to view all the notifications sent by the bank.

Top 5 Sweeps in Currency

This section displays the top five latest sweeps based on the sweep amount in the form of bar graph. The sweeps of last 30 days are converted in local currency for comparison and the highest amount of sweeps are listed along the Account Structure IDs. User can further choose to view the information in specific currency.

User can see the top sweeps based on the account structures access availability. Account Structure access is granted only if the user has an access to all accounts participating in the account structure.

Top 5 Cross Currency Sweeps

The section displays the list of top five cross currency sweeps which are executed in last 30 days. By default, the 5 sweep outs in local currency which are swept-in in child account in cross currency are listed. User can further choose to view the top sweeps of specific currency.

User can see the top sweeps based on the account structures access availability. Account Structure access is granted only if the user has an access to all accounts participating in the account structure.

Sweep Monitor

This section allows the user to view the last 5 upcoming, executed and the logs which went into an exception along with the sweep details. User can choose to download sweep log or can also choose to view the detailed information of sweeps by clicking on 'View All'.

Click **View All** to view all the logs via 'Log Monitors' transaction.

Click **Download** to download the log record in PDF or CSV formats.

Click  to refresh the logs.

4. Account Structure Maintenance

Account structure is an efficient tool to optimize the working capital of a business processes. A suitable physical account structure provides greater degree of control and flexibility, to the corporate treasuries. It also allows the better visibility and control of corporate accounts. With the account structures corporate customers gets the holistic view of all group of accounts to take funding or investment decisions

The structure reflects the hierarchical relationship of the accounts as well as the corporate strategies in organizing accounts relationships.

Account Structures are broadly classified as under:

- **Sweeping:**

Sweeping works on principles of automatic fund transfer between parent and child accounts to aggregate balances physically and achieves the mobilization and consolidation of the available balances into a central account called header account. OBDX enables the corporate customer to define various forms of Sweeps/Cash Concentration methods while building the sweep type of account structure. Sweeps are executed automatically based on a pre-arranged sweep instruction set by the customer at account structure level and at account pair level and per the set frequency.

- **Notional Pooling:**

Notional pooling refers to the off set of interest income and expense (credit and debit interest), resulting from the varying cash positions in different accounts held with the bank. It is mechanism for calculating interest on the combined credit and debit balances of accounts that a corporate chooses to cluster together, without actually transferring any funds. The balances in accounts are pooled on a notional basis.

Account structure maintenance of OBDX enables the corporate customer to build their own account structures between the accounts available under primary Party ID also between the linked internal and external accounts which are enabled for liquidity management. Further the application also supports viewing and modifying existing account structures using digital banking platform.

Pre-requisites:

- Transaction and Party ID access is provided to corporate user.
- Approval rule set up for corporate user to perform the actions.
- Accounts are enabled at in the respective host application for liquidity management.
- Account and Transaction access has been provided to the user

Workflow

Features supported in application

Account structure allows the corporate user to

- Build an Account Structure
- View Account Structure
- Edit Account Structure
- Adhoc Execution
- Pause-Resume Account Structure

How to reach here:

Toggle menu > Liquidity Management > Overview > Quick Links > Structure List
OR

Toggle menu > Liquidity Management > Structure List

4.1 Account Structure - Summary

Account Structure Summary page displays the summary of all the account structures available under the primary Party ID of the logged in corporate user, in a card form. Account Structures are listed based on the User- Account access maintenance. Account Structure access is granted only if the user has an access to all accounts participating in the account structure.

Different types of structures (Sweep, Pool and Hybrid) and statuses (Active, Inactive and Paused) are depicted in different colors for easy identification. An option is also provided on the screen to search the specific structure with the name associated with it. The user can also choose to create a new structure from this screen.

It also has an option to customize the information displayed on the screen based on the three default views provided. The options available are:

- Summarized View
- Detailed View
- Tabular View

In case there are no structures available under the Party ID mapped to the logged in user, a screen with the related information and an option to create a new account structure is shown to the user.

4.1.1 Account Structure - Summarized View

This is a default view; the user is landed on this screen on accessing 'Structure List' menu option. A summary all the structures of a corporate user are listed with basic information of each structure. The user can choose to check the complete details of a specific structure by clicking on a card.

The screenshot displays the 'Account Structures' interface. At the top, there's a navigation bar with 'futura bank' logo, a search icon, and user information: 'Welcome, Mack Thomas' and 'Last login 12 May 09:11 PM'. Below the navigation, there's a search bar labeled 'Search By Structure Name'. The main area is a grid of 40 cards, each representing an account structure. Each card contains the structure name, a category (Hybrid, Sweep, Pool), and a status indicator (Active, Paused). A 'Cancel' button is located at the bottom left of the grid. The footer contains the text: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

1. Select and click the structure card whose details you want to view.
OR
In the **Search By Structure Name** field, enter the name of the specific account structure whose details you want to view.
The specific Account Structure detail record appears.
OR
Click  to refine and display the account structure based on account structure 'Status' and 'Type'. Click **Reset** to reset the refine criteria.
OR
Click  to create a new Account Structure.
OR
Click **Cancel** to cancel the operation and navigate back to the Dashboard.

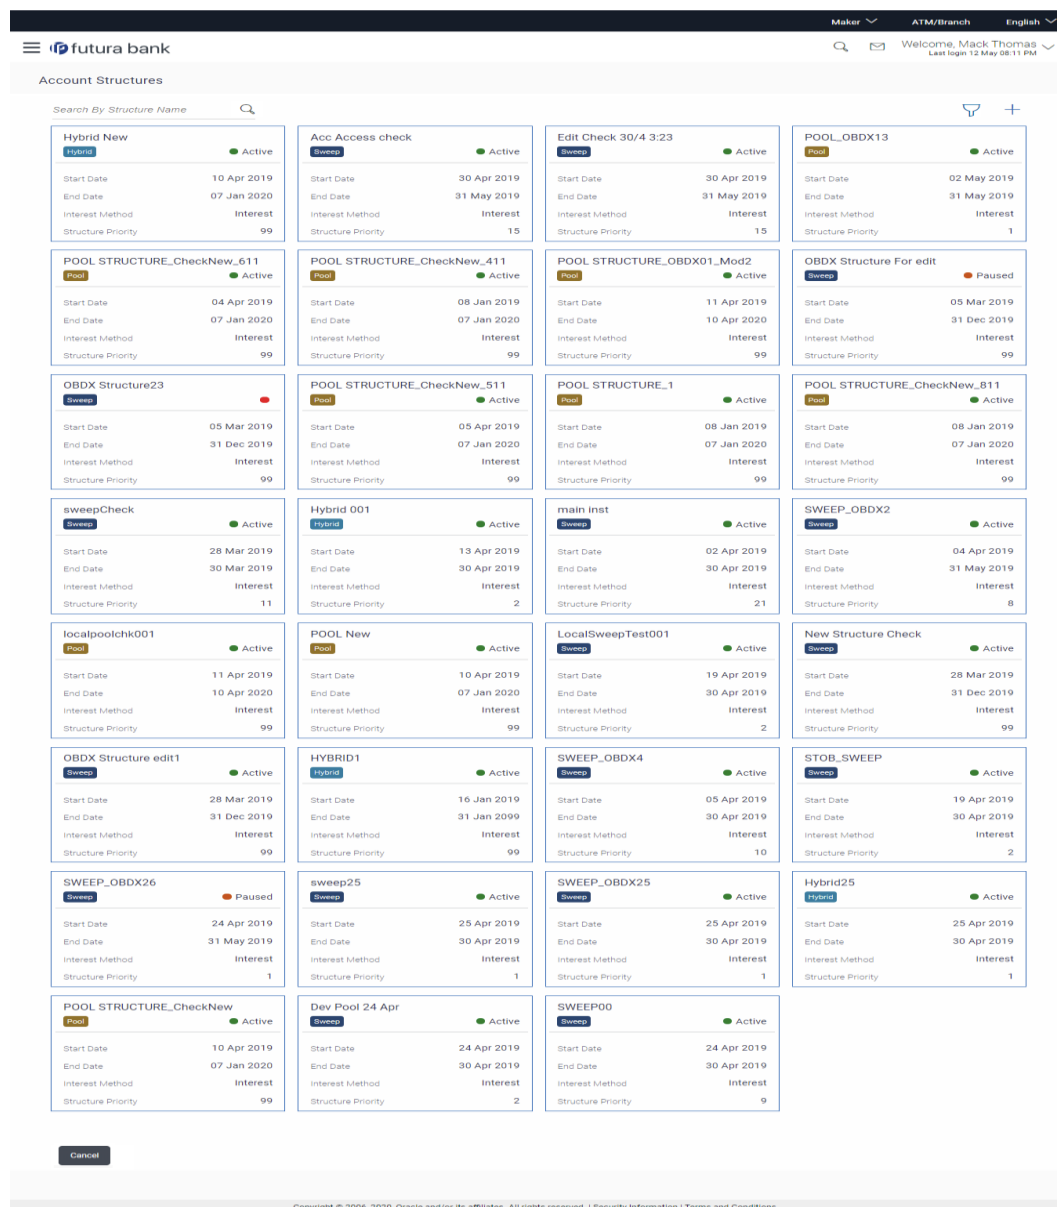

4.1.2 Account Structure - Detailed View

The Account Structure - Detailed View allows the corporate user to view the details of each account structure. The details like, type of account structure, name and status of account structure, start date, end date, interest method and structure priority are displayed on the Account Structure - Detailed View page. User can choose to check the complete details of a specific structure by clicking on a card.

To view the detailed account structure:

1. In the **Account Structure - Summary** page, click  and then click the **Detailed** icon in the **Views** section.
The **Account Structure** detailed view page appears.

Account Structure - Detailed View

The screenshot shows the 'Account Structures' page in the Futura Bank system. The page header includes the bank logo, user name 'Welcome, Mack Thomas', and last login time '12 May 08:11 PM'. A search bar is present with the text 'Search By Structure Name'. The main content area displays a grid of 40 account structure cards, each with the following details:

- Hybrid New** (Active): Start Date 10 Apr 2019, End Date 07 Jan 2020, Interest Method Interest, Structure Priority 99.

1. Select and click the structure card whose details you want to view.
OR
In the **Search By Structure Name** field, enter the name of the specific account structure whose details you want to view.
The specific Account Structure detail record appears.
OR
Click  to refine and display the account structure based on account structure 'Status' and 'Type'. Click **Reset** to reset the refine criteria.
OR
Click  to create a new Account Structure.
OR
Click **Cancel** to cancel the operation and navigate back to the Dashboard.

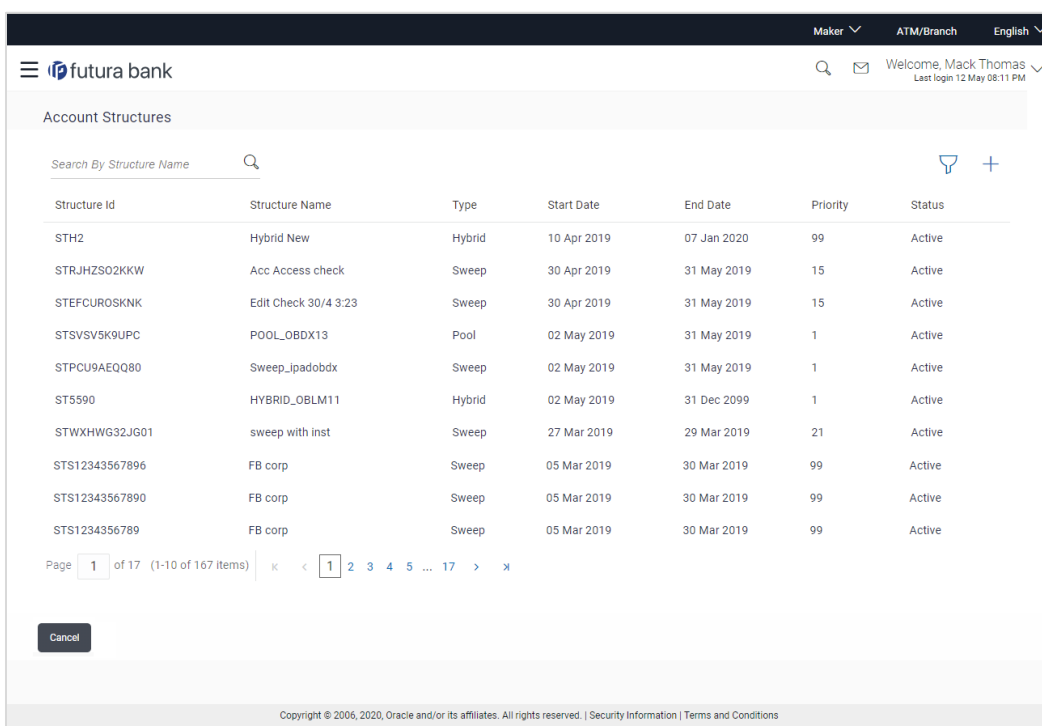

4.1.3 Account Structure - Tabular View

The Account Structure - Tabular View allows the corporate user to view the account structure in table format.

To view the account structure in tabular form:

1. In the **Account Structure - Summary** page, click  and then click the **Tabular** icon in the **Views** section.
The **Account Structure** tabular view page appears.

Account Structure - Tabular View

Field Description

Field Name	Description
Search By Structure Name	Enter the name of the account structure to search and view its details. In case of no matching structures as per the search criteria provided is available, then an image with the specific result and an option to create new structure is provided on the screen.
Structure Id	The unique id associated to each account structure.
Structure Name	This name of the account structure.

Field Name	Description
Type	<p>The type of account structure.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Sweep - Funds moved physically with in the account structure • Pool - Notional movement of funds, the account balances are notionally consolidated and 'interest computations' carried out on such notional balances • Hybrid – A structure is a combination of sweep and pool instructions.
Start Date	Start date of the date range within which the instruction has been setup.
End Date	End date of the date range within which the instruction has been setup.
Priority	The priority of the account structure.
Status	<p>The status of account structure.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Active • Inactive • Paused
<p>The following fields appear on clicking the  icon available on the screen.</p>	
Status	<p>The status of the account structure by which the data is to be filtered.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Active • Inactive • Paused
Structure Type	<p>The type of the account structure by which the data is to be filtered.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Sweep - Funds moved physically between the parent and child account pairs. • Pool - Notional movement of funds, the account balances are notionally consolidated and 'interest computations' carried out on such notional balances • Hybrid – A structure is a combination of sweep and pool instructions.

Field Name	Description
Views	The user can select the view type <ul style="list-style-type: none">• Summarized• Detailed• Tabular

2. Select and click the structure card whose details you want to view.
OR
In the **Search By Structure Name** field, enter the name of the specific account structure whose details you want to view.
The specific Account Structure detail record appears.
OR
Click  to refine and display the account structure based on account structure 'Status' and 'Type'. Click **Reset** to reset the refine criteria.
OR
Click  to create a new Account Structure.
OR
Click **Cancel** to cancel the operation and navigate back to the Dashboard.

4.2 View Account Structure Details

User can view the structure details by clicking on a specific Account Structure Card. By default, the structure details are displayed in a tree format with the details of header/parent and child accounts linked with each other. The user can choose to change the view to table format, if required.

How to reach here:

Toggle menu > Liquidity Management > Overview > Quick Links > Structure List > Click on Specific Card

OR

Toggle menu > Liquidity Management > Structure List > Click on Specific Card

To search the specific account structure:

1. In the **Account Structure - Summary** screen, enter the name of the specific account structure in the **Search By Structure Name** field.
The specific Account Structure detail record appears.

4.2.1 View Account Structure Details – Sweep Type

The hierarchical relationship between the accounts is displayed on clicking on the specific 'Sweep Type Account Structure'. An option is provided to view the structure in tabular view or in tree view format.

View Account Structure Details – Tree View

The screenshot displays the 'View Account Structure Details' page for 'STdny92djymo struct 002 | Sweep'. The main content area shows a tree view of accounts:

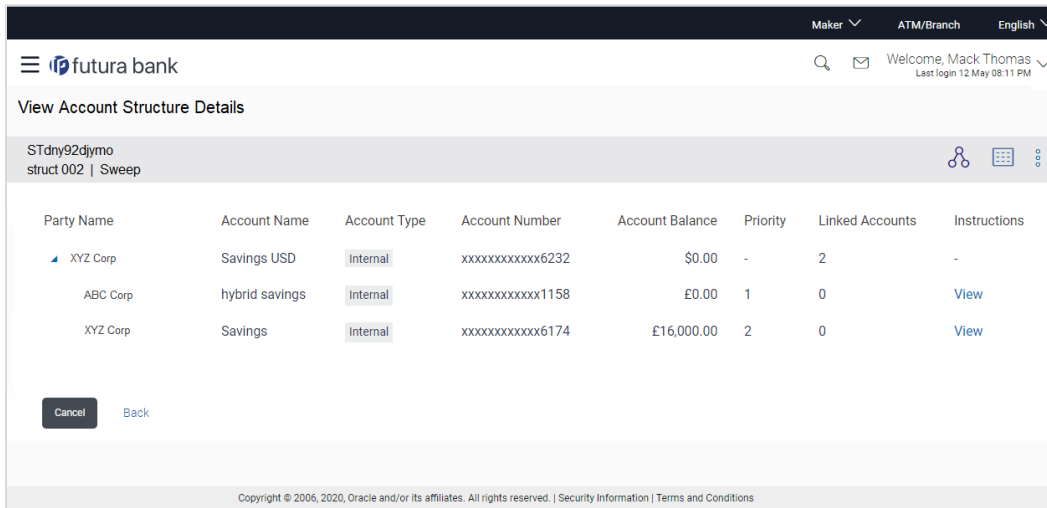

- Parent Account: Jason Smith Savings USD, Internal, \$0.00
- Child Accounts (via Sweep):
 - John Doe hybrid savings, Internal, Priority 1, £0.00
 - Jason Smith Savings, Internal, Priority 2, £16,000.00

The interface includes a navigation bar with 'Maker', 'ATM/Branch', and 'English' options. The user is identified as 'Welcome, Mack Thomas' with a last login of '12 May 08:11 PM'. There are icons for search, mail, and a dropdown menu. At the bottom, there are 'Cancel' and 'Back' buttons, and a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Account Structure Name	The name of the account structure is displayed.

View Account Structure Details - Structure Parameters (Overlay)

Following screen is displayed to the user on accessing 'View Details' option available on 'View Account Structure Details' screen. The parameters set at the account structure level are shown on the screen.

The screenshot shows the 'View Account Structure Details' screen for 'futura bank'. The main screen displays a table of account structures. An overlay titled 'Structure Parameters' is shown on the right, displaying the following details:

Field Name	Description
Structure Description	OBDX Hybrid Demo
Structure Type	Hybrid
Structure Status	Active
Start Date	09 Oct 2018
End Date	31 Oct 2018
Interest Method	Interest
Structure Priority	1
Reallocation Method	Even Distribution

The main screen table (partially visible) has columns: Party Name, Account Name, Type, Account Type, Account Number, and Account Balance. It lists several accounts for Jason Smith, including 'OBDX_SYSACC_2298', 'hybrid savings', 'Saving Pause', 'Savings', 'Savings USD', and 'Savings USD'.

Field Description

Field Name	Description
Structure Description	The name of the account structure is displayed.
Structure Type	The type of account structure is displayed. The options are: <ul style="list-style-type: none"> Sweep - Funds moved physically between the parent and child account pairs Pool - Notional movement of funds, the account balances are notionally consolidated and 'interest computations' carried out on such notional balances Hybrid – A structure is a combination of sweep and pool instructions

Field Name	Description
Structure Status	The status of account structure. The options are: <ul style="list-style-type: none">• Active• Inactive• Paused
Start Date	Start date of the date range within which the instruction has been setup.
End Date	End date of the date range within which the instruction has been setup.
Interest Method	The method by which the interest is calculated.
Structure Priority	The priority of the account structure.
Reallocation Method	The method in which the interest is shared with the participating accounts with in the account structure.

1. Click  to close the overlay displayed with Structure Parameters.

4.3 Create Account Structure

The Liquidity Management module enables the corporate customer to build their own account structures between the accounts available under primary Party ID also between the linked internal and external accounts which are enabled for liquidity management and are mapped to the user.

While building a structure, corporate user is expected to capture:

- Basic parameters of the structure
- Choose Accounts for mapping and specifying the hierarchies
- Linking of Accounts
- Check basic validations
- Set up instructions between each account pair

The left side of the screen displays the various steps of creating the account structure that gets enabled when the user reaches to that step.

How to reach here:

Toggle menu > Liquidity Management > Overview > Quick Links > Create Structure

OR

Toggle menu > Liquidity Management > Create Structure

OR

Toggle menu > Liquidity Management > Structure List > Click + (Create New Structure)

To create an account structure:

1. Navigate to the **Create Account Structure** screen.
OR

In the **Account Structure - Summary** page, click .

The **Create Account Structure - Structure Parameters** screen appears.

4.3.1 Create Account Structure - Structure Parameters

The first step of account structure creation involves defining the basic details of the account structure like structure description, structure type, start-end dates etc.

Create Account Structure - Structure Parameters

Field Description

Field Name	Description
Structure Description	The name of the account structure that is to be created.
Structure Type	The type of account structure. The options are: <ul style="list-style-type: none"> • Sweep - Funds moved physically between the parent and child account pairs • Pool - Notional movement of funds, the account balances are notionally consolidated and 'interest computations' carried out on such notional balances • Hybrid - A structure is a combination of sweep and pool instructions

Field Name	Description
Start Date	The date and time from which the account structure execution should take place.
End Date	The date and time till which the account structure execution should take place.
Interest Method	<p>The method by which the interest is calculated.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Advantage • Interest • Optimization <p>This field is enabled for selection if you select, Pool from the Structure Type list. Else will be defaulted to 'Interest' for Sweep' and 'Hybrid' structure types.</p>
Reallocation Method	<p>The method in which the interest is shared with the participating accounts with in the account structure.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Absolute Pro-Data Distribution - Absolute balances of all accounts are considered and the interest is shared proportionally to all accounts. • Central Distribution - The interest arrived at is credited to one central account, which can be any one of the participating accounts or a separate account. • Even Direct Distribution - Interest reward is evenly spread across all accounts with positive balances • Even Distribution - The interest is evenly distributed among the participating accounts. • Fair Share Distribution - If the interest is positive, it is distributed among the positive contributors in the ratio of their contribution and if the interest is negative, it is distributed among the negative contributors in the ratio of their contribution. • No Reallocation - No interest is paid back to the child accounts • Reallocation with benefit - Interest is allocated back to the child account with the additional benefits of accumulation. • Reallocation without benefits - Interest is allocated back to child account but without the additional benefits of accumulation. • Reverse Fair Share Distribution - If the interest is positive, it is distributed among the negative contributors in the ratio of their contribution and if the interest is negative, it is distributed among the positive contributors in the ratio of their contribution.

Field Name	Description
Central Account	The account in which the interest arrived is credited to one central account, which can be any one of the participating accounts or a separate account. This field appears if you select Central Distribution from the Reallocation Method list.
Structure Priority	The priority of the account structure.

Default Instructions Details

This section appears if you select **Sweep** or **Hybrid** from the Structure Type list.

(Information specified here is defaulted at each parent-child account pair whereas user can override and define a specific frequency for a specific pair of account as a part for instruction set up.)

Reverse Frequency	The reverse frequency at which the reverse sweep for account structure should be executed. The list displays all the frequencies maintained in the core banking application.
Default Frequency	The default frequency at which the account structure should be executed. The list displays all the frequencies maintained in the core banking application.

Instruction Type The instruction type that is to be applied to the structure.

The options are:

- Zero Balance Model
- Fixed Amount Model
- Collar Model
- Target Model - Constant
- Target Model - Fixed
- Threshold Model
- Range Based Model
- Cover Overdraft Model

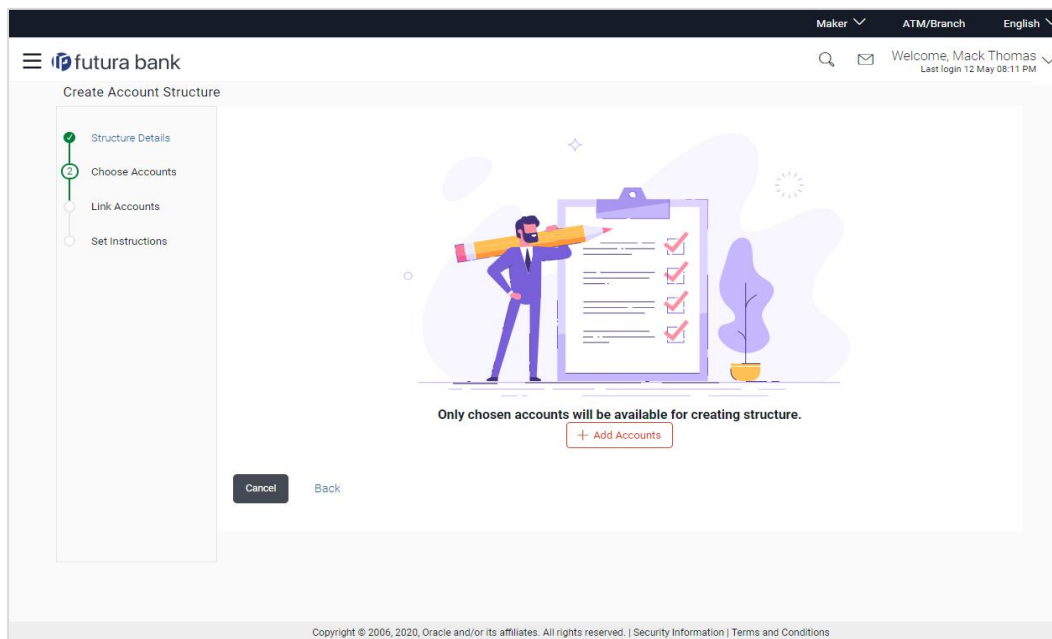

2. In the **Structure Description** field, enter the name of the account structure.
3. From the **Structure Type** list, select the type of account structure.
4. From the **Start Date** and **End Date** list, select the appropriate date to set up the instruction.
5. From the **Interest Method** list, select the appropriate method for interest calculation, in case you have selected **Pool** option from the **Structure Type** list.
6. From the **Reallocation Method** list, select the appropriate reallocation method.

- a. If you have selected Central Distribution option:
From the **Central Account** list, select the appropriate account.
7. In the **Structure Priority** field, enter the priority of the account structure.
8. In the Default Instructions Details section, select the Reverse Frequency and Default Frequency for the structure.
9. From the **Instruction Type** list, select the appropriate instruction type for **Sweep** or **Hybrid Structure Type**.
10. Click **Next**. A popup screen appears displaying the information that default instruction is applied to all the account pairs and user can modify the instructions for any account pair.
OR
Click **Cancel** to cancel the operation, and navigate back to 'Dashboard'.
OR
Click **Back** to navigate back to the previous screen.
11. Click **Yes** to continue. The Create Account Structure - Choose Account screen appears.
OR
Click **No**, if you do not want to continue with account structure creation.

4.3.2 Create Account Structure - Choose Accounts

As a part of the second step, corporate user can filter the accounts within which the account structure needs to be built. All the accounts available under the primary party IDs and linked party ids (Internal and external accounts) and which are enabled for liquidity management and which are mapped to the user for Account Structure Creation are listed for selection.

Create Account Structure - Choose Accounts

12. Click **Add Accounts**. The **Create Account Structure - Add Accounts** screen with the list of account to be chosen for structure creation appears.
- OR
- Click **Cancel** to cancel the operation, and navigate back to 'Dashboard'.
- OR
- Click **Back** to navigate back to the previous screen.

Create Account Structure - Add Accounts

The screenshot displays the 'Add Accounts' interface. On the left, a sidebar shows the 'Create Account Structure' process with steps: Structure Details, Choose Accounts (active), Link Accounts, and Set Instructions. The main area features a table of accounts:

Party Name	Account Type	Account Number	Branch	Current Balance	Available Balance
<input checked="" type="checkbox"/> XYZ Corp	Internal	xxxxxxxxxxxx0168	AT3	£30,000.00	£30,000.00
<input checked="" type="checkbox"/> XYZ Corp	Internal	xxxxxxxxxxxx0146	AT3	£30,000.00	£30,000.00
<input checked="" type="checkbox"/> XYZ Corp	Internal	xxxxxxxxxxxx0157	AT3	£30,000.00	£30,000.00
<input type="checkbox"/> XYZ Corp	Internal	xxxxxxxxxxxx0135	AT3	£30,000.00	£30,000.00

Below the table is a pagination control: 'Page 1 of 1 (1-4 of 4 Items)' with navigation arrows and a page number '1'. An 'Add' button is located below the table. At the bottom of the screen are 'Cancel' and 'Back' buttons. The footer indicates 'Copyright © 2006, 2020'.

Field Description

Field Name	Description
Party Name	The name of the party linked to the user's account.
Account Type	Account type is displayed if internal or external.
Account Number	Internal and External account numbers mapped to the user in masked format.
Branch	This name of the bank branch of the user's account.
Current Balance	The current balance in the account.

Field Name	Description
Available Balance	The available balance in the account.

13. In the **Add Accounts** screen, **select** the accounts that you want to add in the structure.
OR
In the **Search By party Name, Account Number** field, enter and search the specific account numbers that you want to add for structure creation.
14. Click **Add**. The selected **account** is added.

Create Account Structure - Added Accounts

The following screen displays the filtered account list for creating structure. User can choose remove the accounts from the list or can add more accounts using 'Add Accounts' button.

The screenshot shows the 'Create Account Structure' interface. On the left, a navigation pane includes 'Structure Details', 'Choose Accounts' (selected), 'Link Accounts', and 'Set Instructions'. The main area displays a table of accounts with the following data:

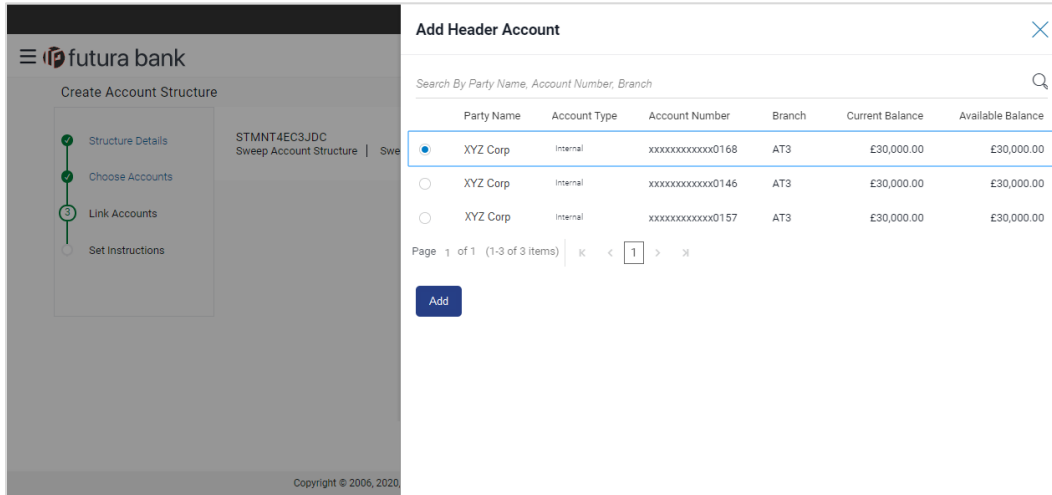

Party Name	Account Type	Account Number	Branch	Current Balance	Available Balance	Action
XYZ Corp	Internal	xxxxxxxxxxxx0168	AT3	£30,000.00	£30,000.00	Remove
XYZ Corp	Internal	xxxxxxxxxxxx0146	AT3	£30,000.00	£30,000.00	Remove
XYZ Corp	Internal	xxxxxxxxxxxx0157	AT3	£30,000.00	£30,000.00	Remove

Below the table, there is a pagination control showing 'Page 1 of 1 (1-3 of 3 items)' and navigation arrows. At the bottom, there are 'Next', 'Cancel', and 'Back' buttons. An 'Add Account' button is located at the top right of the table area.

15. Click **Next**. The **Create Account Structure - Add Header Accounts** screen appears.
OR
Click **Add Accounts** to add more accounts.
OR
Click the **Remove** link against the added account, if you want to remove the account from the structure creation.
OR
Click **Cancel** to cancel the operation, and navigate back to 'Dashboard'.
OR
Click **Back** to navigate back to the previous screen.

Create Account Structure - Add Header Account

As a part of following step, user can select the header account in which the funds will be concentrated. The filtered account list will appear on the screen. In case of a Sweep type of structure, user will be expected to select one of the real accounts from the chosen account list as the header account.

16. In the **Add Header Accounts** screen, select the accounts that you want to add as a header.

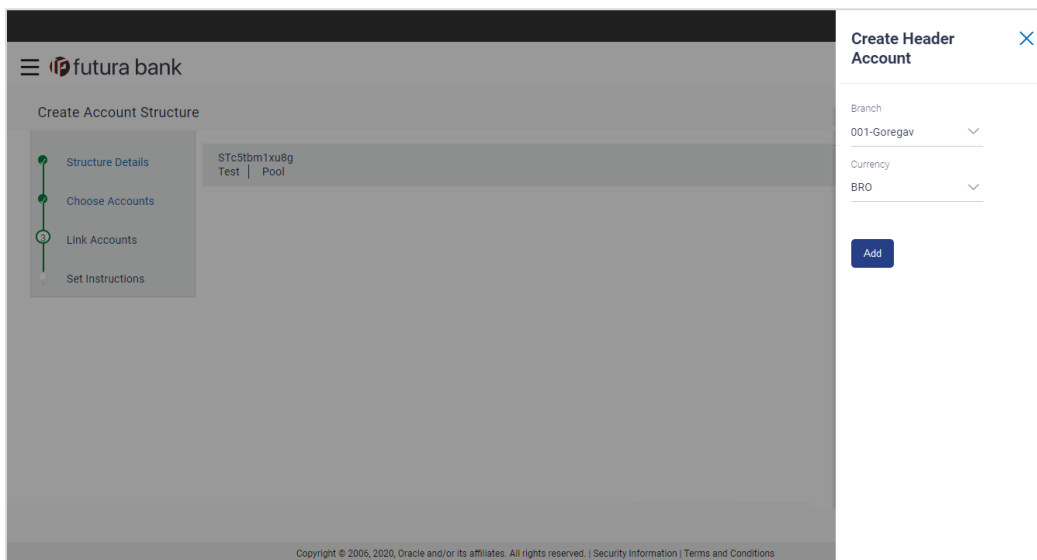

OR

In the **Search By party Name, Account Number** field, enter and search the specific account number that you want to add as a header.

17. Click **Add**. The selected account is added as a header account.

Create Account Structure - Create Header Account

As a part of following step, user can create the notional header account in which the funds will be concentrated. User is expected to select the bank branch and currency in which the notional header account to be added. This step will be displayed if the account structure you are creating is either 'Pool' or 'Hybrid'.

Field Description

Field Name	Description
Branch	Select the branch in which the notional header account to be opened. All bank branches in which the notional account opening is permitted are listed for selection.
Currency	Select the currency in which the notional header account to be opened. All permissible currencies in which the notional account can be opened are listed for selection.

- In the **Create Header Accounts** screen, select the **Branch** and the **Currency** to open the notional header account.
- Click **Add**. The dummy account is added as a header account. (Notional Account will be created once the account structure creation request is saved).

Add Header Account

The screenshot shows the 'Create Account Structure' interface. On the left, a vertical progress bar indicates the current step is 'Link Accounts'. The main content area shows a card for 'XYZ Corp' with account details: 'SAVLM', 'xxxxxxxxxxxx0168', and '£30,000.00'. Below the card are buttons for 'Validate', 'Next', 'Cancel', and 'Back'. The top navigation bar includes 'Maker', 'ATM/Branch', and 'English' dropdowns, and a user greeting 'Welcome, Mack Thomas'.

- Click  and then **Link** on the Account Header card.
The **Create Account Structure - Link Accounts** screen appears.
OR
Click **Remove**. A Remove pop appears confirming the removal of accounts.
Click **OK**, if you want to remove the added header and child accounts.
OR
Click **Cancel** to cancel the removing process.

4.3.3 Create Account Structure - Choose Accounts - Link Accounts

Once the header account is selected, you can further link the child accounts. You can pick and choose the accounts to be linked to the selected header/parent account. The filtered account list will appear for linking the accounts.

OR
In the **Search By party Name, Account Number** field, enter and search the specific account numbers that you want to link to the header account.
23. Click **Link**. The selected account is linked.

Create Account Structure - Choose Accounts - Validate

After creating a structure, you will have to validate the structure. Once the validation is successful, you can set up the instructions and reallocation method for each account pair.

24. Click **Validate**. The success message appears on the screen.

OR

Click  to view the account structure in tree format.

OR

Click  to view the account structure in the tabular format.

OR

Click the Panning Window  to move the structure with in the screen.

OR

Click **Cancel** to cancel the operation, and navigate back to 'Dashboard'.

OR

Click **Back** to navigate back to the previous screen.

25. Click **Next**. The **Create Account Structure – Link Accounts** screen appears with a pop up message to set the instructions between the account pair

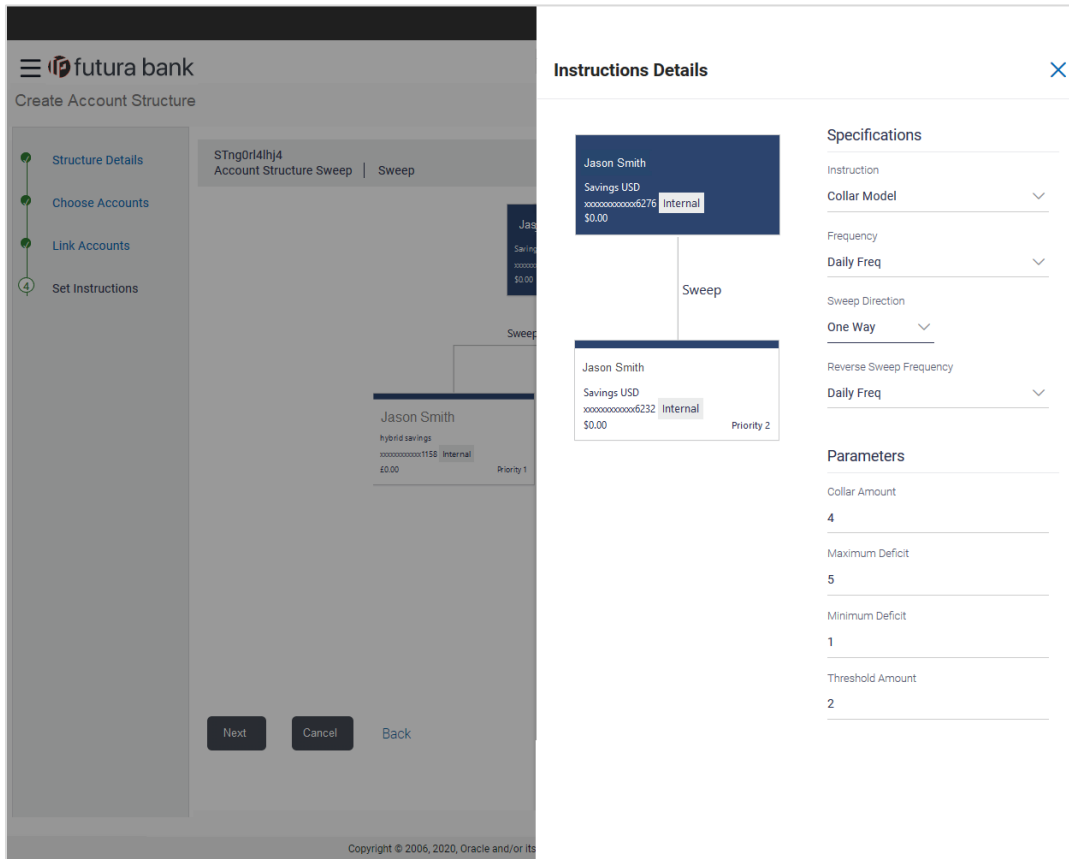

Create Account Structure – Link Accounts

26. If you have selected **Sweep** option from the **Structure Type** list:

- a. Click the link available between parent and child account in the sweep account structure. The **Create Account Structure – Instruction Details** screen appears.

4.3.4 Create Account Structure – Instruction Details / Reallocation Method

The sweep instructions set between an account pair along with the parent and child account information is displayed on the screen.

Field Name	Description
------------	-------------

Specifications

Instruction Specify the cash concentration method set between the account pair. Value defined as a part of 1st step will be shown in an editable form.

Frequency Specify frequency at which the sweep is to be executed. Value defined as a part of 1st step will be shown in an editable form.

Sweep Direction Select the sweep direction between the account pair. The options are:

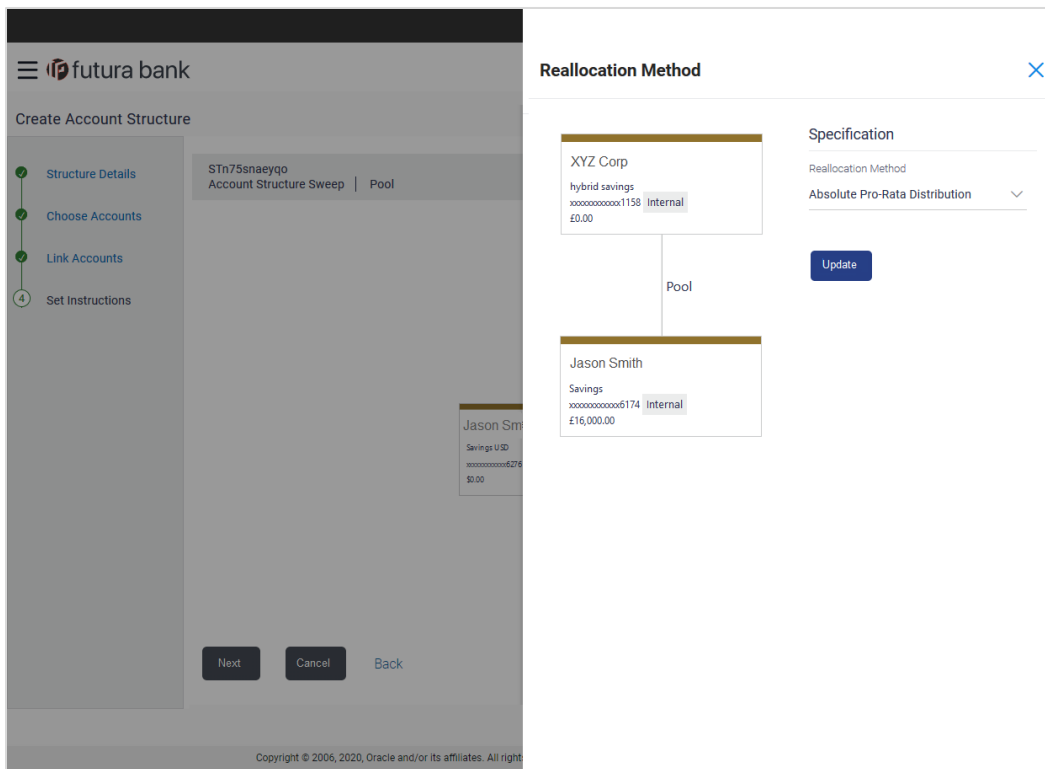

- One Way - Credit balances are only swept out of the account
- Two Way – Sweep in is also supported when the balance of the child account are overdrawn

Field Name	Description
Reverse Sweep Frequency	Specify the reverse sweep priority between the account pair. Value defined as a part of 1 st step will be shown in an editable form.
Parameters	
Collar Amount	The collar amount set for executing sweep is displayed. This field appears for if you have selected Collar Model from Instruction Type list. Value set at the Core Banking Application is displayed in an editable form.
Maximum	Enter the maximum amount for executing sweep. Value set at the Core Banking Application is displayed in an editable form.
Maximum Deficit	Enter the maximum deficit amount for executing sweep. Value set at the Core Banking Application is displayed in an editable form.
Minimum	Enter the minimum amount for executing sweep. Value set at the Core Banking Application is displayed in an editable form.
Minimum Deficit	Enter the minimum deficit amount for executing sweep. Value set at the Core Banking Application is displayed in an editable form.
Threshold Amount	Enter the threshold amount for which the sweep is to be executed. Value set at the Core Banking Application is displayed in an editable form.
Multiple	Enter the amount in multiples of which the sweep is to be executed. Value set at the Core Banking Application is displayed in an editable form.

27. In the **Instruction Details** overlay screen, do the following:
- From the **Instruction** list, select the appropriate option.
 - From the **Frequency** list, select the appropriate frequency.
 - From the **Sweep Direction** list, select the appropriate option.
 - From the **Reverse Sweep Frequency** list, select the appropriate option.
 - In the **Collar Amount** field, enter the value for collar amount, if you have selected **Collar Model** from **Instruction Type** list.
 - In the **Maximum** field, enter the value.
 - In the **Maximum Deficit** field, enter the value for deficit.
 - In the **Minimum** field, enter the value, if required.
 - In the **Minimum Deficit** field, enter the value for deficit.

- j. Click  to close the overlay displayed.
- 28. If you have selected **Pool** option from the **Structure Type** list:
 - a. Click the link available between parent and child account in the pool account structure. The **Create Account Structure – Reallocation Method** screen appears.
 - b. From the **Reallocation Method** list, select the appropriate option.
 - c. Click **Update**.

Reallocation Method

Field Name	Description
Specifications	
Reallocation Method	Reallocation method set at the parent and child account pair is displayed.

Note: In case of Hybrid type of account structure, user has to set both Instruction Details and reallocation Method.

29. Click **Next**.
The **Create Account Structure - Review** screen appears with instruction details. Verify the details, and click **Confirm**.
OR
Click the **View Account Structure** link to view the created structure details. The Structure Details overlay appears.
OR
Click **Cancel** to navigate to **Dashboard** Screen.
OR
Click **Back** to navigate back to the previous screen.
30. The success message appears along with the transaction reference number, status and structure details.
Click **Go To Dashboard** to go to **Dashboard** screen.
OR
Click **Overview** to go to the liquidity management dashboard.
OR
Click **List Structure** to view the complete list of account structures.
OR
Click **Download Structure Details** to download the created structure.

4.4 **Edit Account Structures**

OBDX enables the corporate user to edit the account structure details. A user can add or remove the linked accounts and also can change the instructions set between an account pair. The account structure details are displayed in an editable mode. In case any new accounts are added in the structure, the user is expected to provide the linkage and provide the instructions between child and parent account.

How to reach here:

Toggle menu > Liquidity Management > Overview > Structure List > View Account Structure Details > Edit Structure

OR

Toggle menu > Liquidity Management > Structure List > View Account Structure Details > Edit Structure

To edit an account structure:

1. In the **Account Structure** page, click the **Account Structure** card, of which you want to edit the details. The **View Account Structure Details** screen appears.
2. Click  and then **Edit Structure** to edit the details of the account structure. The **Structure Parameters** screen appears in the editable form.

Edit Account Structure - Structure Parameters

Account structure parameters, linkage between the accounts, instructions will be shown editable form. User can choose to edit the structure level information, can add new accounts and linkage or remove the existing account linkage. Also user can edit the instructions set up for each account pair.

Field Description

Field Name	Description
Structure Description	The name of the account structure will be shown in an editable mode.
Structure Type	The type of account structure will be shown, no modification will be allowed. The options are: <ul style="list-style-type: none"> • Sweep - Funds moved physically between the parent and child account pairs. • Pool - Notional movement of funds, the account balances are notionally consolidated and 'interest computations' carried out on such notional balances • Hybrid - A structure is a combination of sweep and pool instructions.

Field Name	Description
Start Date	<p>The date from which the account structure execution should take place.</p> <p>If the date and time is of future, then the information will be shown in an editable format.</p>
End Date	<p>The date till which the account structure execution should take place.</p> <p>If the date and time is of future, then the information will be shown in an editable format.</p>
Interest Method	<p>The method by which the interest is calculated.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Advantage • Interest • Optimization <p>This field is displayed if structure type is <code>Pool</code>. Else will be defaulted to 'Interest' for Sweep' and 'Hybrid' structure types.</p>
Reallocation Method	<p>The method in which the interest is shared with the participating accounts with in the account structure.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Absolute Pro-Data Distribution - Absolute balances of all accounts are considered and the interest is shared proportionally to all accounts. • Central Distribution - The interest arrived at is credited to one central account, which can be any one of the participating accounts or a separate account. • Even Direct Distribution - Interest reward is evenly spread across all accounts with positive balances • Even Distribution - The interest is evenly distributed among the participating accounts. • Fair Share Distribution - If the interest is positive, it is distributed among the positive contributors in the ratio of their contribution and if the interest is negative, it is distributed among the negative contributors in the ratio of their contribution. • No Reallocation - No interest is paid back to the child accounts • Reallocation with benefit - Interest is allocated back to the child account with the additional benefits of accumulation. • Reallocation without benefits - Interest is allocated back to child account but without the additional benefits of accumulation. • Reverse Fair Share Distribution - If the interest is positive, it is distributed among the negative contributors in the ratio of their contribution and if the interest is negative, it is distributed among the positive contributors in the ratio of their contribution.

Field Name	Description
	The information will be shown in an editable form.
Central Account	<p>The account in which the interest arrived is credited to one central account, which can be any one of the participating accounts or a separate account.</p> <p>This field appears if you select Central Distribution from the Reallocation Method list.</p> <p>The information will be displayed in an editable form.</p>
Structure Priority	<p>The priority of the account structure.</p> <p>The information will be displayed in an editable form.</p>

Default Instructions Details

This section appears when the structure type is selected as **Sweep** or **Hybrid**.

(Information specified here is defaulted at each parent-child account pair whereas user can override and define a specific frequency for a specific pair of account as a part for instruction set up.)

Reverse Frequency The reverse frequency at which the reverse sweep for account structure should be executed. The list displays all the frequencies maintained in the core banking application.

Default Frequency The default frequency at which the account structure should be executed. The list displays all the frequencies maintained in the core banking application.

Instruction Type The instruction type that is to be applied to the structure.

The options are:

- Zero Balance Model
- Fixed Amount Model
- Collar Model
- Target Model - Constant
- Target Model - Fixed
- Threshold Model
- Range Based Model
- Cover Overdraft Model

This field appears if you select **Sweep** or **Hybrid** from the **Structure Type** list.

3. In the **Structure Description** field, edit the name of the account structure, if required.
4. From the **Start Date** and **End Date** list, select the appropriate date to set up the instruction, if required.
5. From the **Reallocation Method** list, select the appropriate reallocation method, if required.

6. In the **Structure Priority** field, edit the priority of the account structure, if required.
7. In the **Default Instructions Details** section, select the Reverse Frequency and Default Frequency for the structure, if required.
8. From the **Instruction Type** list, select the appropriate instruction type for **Sweep** or **Hybrid Structure Type**, if required.
9. Click **Next**. The **Edit Account Structure - Choose Accounts** screen appears
OR
Click **Cancel** to cancel the operation, and navigate back to 'Dashboard'.
OR
Click **Back** to navigate back to the previous screen.

Note: The field **Structure Type** and **Interest Method** cannot be edited.

Edit Account Structure - Choose Accounts

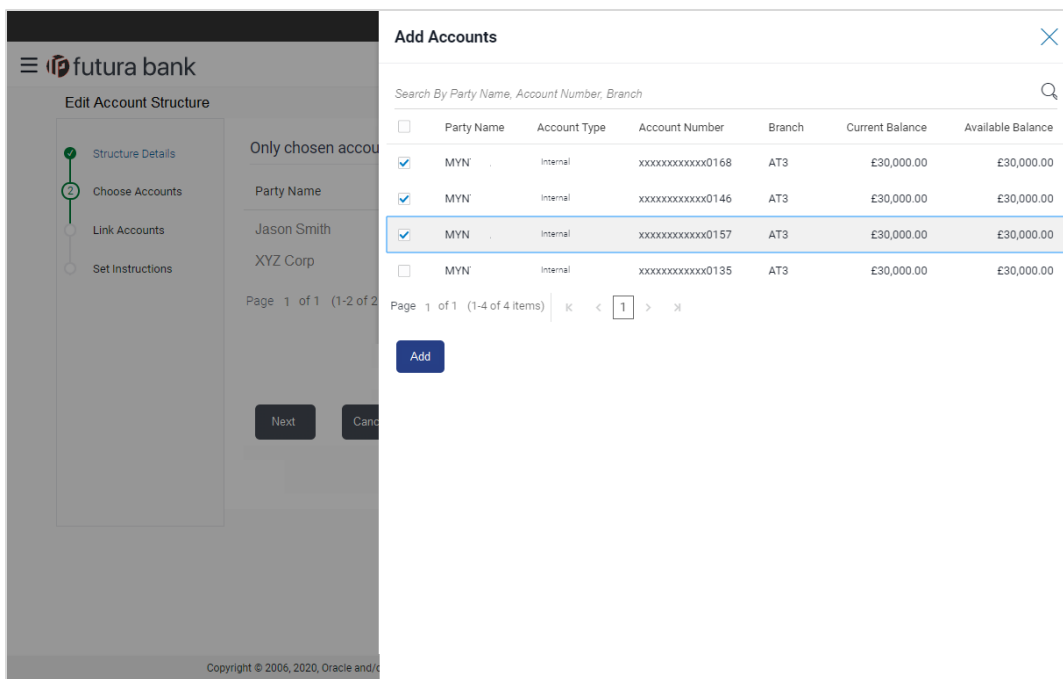

The screenshot displays the 'Edit Account Structure' interface. On the left, a vertical navigation pane shows four steps: 'Structure Details' (completed), 'Choose Accounts' (active), 'Link Accounts', and 'Set Instructions'. The main content area is titled 'Edit Account Structure' and contains the text 'Only chosen accounts will be available for creating structure.' with an 'Add Account' button. Below this is a table of accounts:

Party Name	Account Type	Account Number	Branch	Current Balance	Available Balance	Action
Jason Smith	Internal	xxxxxxxxxxxx0168	AT3	£30,000.00	£30,000.00	Remove
Jason Smith	Internal	xxxxxxxxxxxx0146	AT3	£30,000.00	£30,000.00	Remove
Jason Smith	Internal	xxxxxxxxxxxx0157	AT3	£30,000.00	£30,000.00	Remove

Below the table, there is a pagination control showing 'Page 1 of 1 (1-3 of 3 items)' and navigation arrows. At the bottom of the main content area are three buttons: 'Next' (highlighted in blue), 'Cancel', and 'Back'. Sweep Monitors

The screenshot shows the Futura Bank Log Monitors interface. At the top, there is a navigation bar with the Futura Bank logo, a search icon, a mail icon, and a user profile for Sweta Thakur with the text 'Welcome, Sweta Thakur' and 'Last login 28 Oct 10:20 AM'. Below the navigation bar, the page title is 'Log Monitors'. There are two dropdown menus: 'Structure' set to 'Sweep 0001' and 'Status' set to 'Executed'. Below these are two date pickers: 'From Date' set to '01 Jan 2019' and 'To Date' set to '27 Oct 2020'. A blue 'Submit' button is located below the date pickers. Below the 'Submit' button, the text 'Sweep Monitor' is displayed. A table with the following columns is shown: 'Date & Time', 'Instruction Description', 'Type', 'Sweep Out Account', 'Sweep Out Amount', 'Exchange Rate', 'Sweep In Account', and 'Sweep In Amount'. The table contains one row of data: '22 Oct 2020 12:00 AM', 'CDO', 'Sweep', 'xxxxxxxxxxxx0067', '£0.00', '1', 'xxxxxxxxxxxx0078', and '£0.00'. At the bottom of the table, there is a pagination control showing 'Page 1 of 1 (1 of 1 items)' and navigation arrows.

FAQ

1. Will the 'Assets and Liabilities with Net Position' widget display the complete information of my holdings?

'Assets and Liabilities with Net Position' widget will show position based on only your internal and external current and savings accounts which are enabled for liquidity management and are mapped to the user.

2. Will I be able to see the details of my accounts that are enabled for liquidity management?

Yes, you can see the accounts enabled for liquidity management and which are mapped to you on Digital Banking platform as a part of position by region widget and position by currency widget. This drill down provided on specific region and amounts will display the account break up.

3. Top five sweeps in local currency and in cross currency will display the data of which period?

Out of box, the top 5 sweeps will be shown of last 30 days. Whereas the number of days are configurable.

4. The account information displayed are the accounts which are mapped to me?

All the accounts which are enabled for liquidity management in core banking application and which are mapped to you on Digital Banking Platform using Party and User Resource access maintenance will be shown.

5. In case at one level the number of accounts are more, then how will be the information will be shown in tree format?

If the number of accounts at specific level are more than the specified limits, then the total count of accounts will be shown which are not displayed at that level. Clicking on the link, user will be directed to a table format, in which all the accounts will be listed.

6. What is the meaning of different colors given for the account boxes in tree format?

Different types of structures (Sweep, Pool and Hybrid) and statuses (Active, Inactive and Paused) are depicted in different colors for easy identification in the account structures shown in the tree form.

7. While building a structure, if I realize that I have missed to filter few accounts, can I go back and add more accounts?

Yes, you can go to the Add Account step and add or remove the accounts filtered for building a structure.

8. In case of adhoc execution, will my scheduled execution also be initiated?

Adhoc execution will be a onetime execution and will be initiated once the request is fully authorized. Also your scheduled execution will be initiated on the date and time set by you at the structure level.

9. Can I search the sweep logs of all account structures irrespective of the status of the structure?

Yes, you can search the sweep logs for the structures which are in active, inactive and paused state.

10. In which formats can I download the log?

You can download the sweep log in PDF or in CSV formats.

11. In case the sweeps are already executed, can I also find the amount exchanged between the accounts?

Yes, you can find the sweep in and sweep out amount along with the currency exchange rate for the executed sweeps.
