1. Account Opening

1.1 AL057-Agri Loan Direct Account Opening

This option facilitates the user to directly open a loan account without having to go through the APS work flow. Unlike APS, the necessary document records and collateral details are maintained after the account is opened.

You can open Loan Accounts using the Loan Direct Account Opening option.

When a new Loan Account is being opened, the Transaction Processing application will perform a check depending upon the search criteria selected by the user. The search criteria could be either of Customer Short Name, Customer IC or Customer ID. Using the data input by the user the system will perform a check on the centralized customer information database to find out whether the customer is new or an existing customer.

Field Description

Field Name	Description
Customer Information	<p>[Mandatory, Drop-Down] Select the search criteria from the drop-down menu to search for the customer.</p> <p>The search criteria are as follows:</p>
Search Criteria	<ul style="list-style-type: none"> • Customer short name • Customer IC Identification criteria (IC) arrived at by the bank during customer addition. • Customer ID- Unique identification given by the bank.
Search String	<p>[Mandatory, Alphanumeric] Enter the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.</p> <p>If the search criterion is specified as customers' short name or IC then any of the letter(s) of the letter of the short name or ID can be entered. The system displays the Search List of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list.</p> <p>For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>
Customer ID	<p>[Display] The ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully and can be used to search the customer. The system displays the customer ID, when the customer is validated.</p>
Customer IC	<p>[Display] Type the appropriate customer IC.</p> <p>A customer IC with customer type is a unique method of identifying a customer across the bank (across all branches). Based on the IC, the system can identify the customer as an existing customer, even when the customer opens a new account in another branch.</p> <p>The IC should be in conjunction with the customer. This can determine if the customer is an existing customer.</p> <p>For example, a social security number, passport number can be used as Customer IC for Individual Customers.</p>
Loan Application No.	<p>[Conditional, Numeric] The application number is generated for each loan application that is made. This is used to retrieve data related to that loan application to amend, cancel or authorize the loan application.</p>
Full Name	<p>[Display] This column displays the Full name of the primary customer after validation.</p>
Short Name	<p>[Display] This column displays the short name of the primary customer after validation.</p>
Branch Code	<p>[Mandatory, Drop-Down]</p>

	<p>The branch code.</p> <p>The account opening procedure can be either centralized or decentralized. In a centralized setup, one centralized processing center will open accounts for all branches of a region. You have to select the code of the centralized processing branch if the bank follows the centralized setup for account opening.</p> <p>In Decentralized setup, the branch code will default to the name of the branch which triggered this transaction.</p>
Product Category	<p>[Optional, Search List]</p> <p>Select the product category under which an account has to be opened from the search list.</p>
Customer Relation	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate relation from the drop-down list.</p> <p>A customer is linked to an account, by a relations tag. This drop-down list contains different relations. For example, Sole Owner, Joint And First, Joint and Other and other relations.</p> <p>For successful account opening transaction, a customer with primary relationship viz. Sole Owner, Joint And First, or Joint Or First must be linked. If primary relationship linked is Joint And First or Joint Or First, another customer with secondary relationship viz. Joint and other or Joint or other must be linked to the account.</p> <p>A maximum of three customers can be linked to an account in the account-opening screen. You can attach additional customers to the accounts using the Account Customer Relationship Maintenance option (C1142). These relationships are maintained in FLEXCUBE only for information purposes.</p>
Product Code	<p>[Mandatory, Picklist]</p> <p>A manually generated unique identifier for the Loan product.</p> <p>The product code that is being assigned should be within the range for Loans module as specified in the FLEXCUBE table ba_prod_acct_info (Internal table). The product code and the Branch Product Cross Reference must be downloaded to the branch.</p> <p>The picklist list has a list of authorized loan products available for the selected branch.</p> <p>The user has to select the product for which the account has to be opened.</p>
Currency	<p>[Display]</p> <p>The currency code in which the product is defined.</p> <p>The list of valid currencies are maintained in Currency Code Maintenance option.</p> <p>All the entries are posted in the account in the account currency. The exchange rate values must be defined and downloaded.</p>
Loan Purpose	<p>[Mandatory, Alphanumeric]</p> <p>Enter the purpose for which the loan is required.</p>
Take Over Loan	<p>[Optional, Check-Box]</p> <p>User can select this check box, if the loan is a taken over from another financial institution.</p>
Loan Term	<p>[Mandatory, Numeric]</p>

	<p>Enter the tenure of the loan in months. The value is validated against the minimum and maximum term of the loan product defined at the product level.</p> <p>[Mandatory, Character, 10]</p>
Bank / FI Name	<p>Enter the name of the bank or financial institution code.</p> <p>If the field Take over loan is checked, this field will be enabled.</p>
Asset Value/Project Cost	<p>[Mandatory, Numeric] Enter the value of the asset for which the loan application is submitted.</p>
Contribution /Margin	<p>[Conditional, Numeric] Enter the contribution value for purchasing the asset. In case there is no margin or contribution this field can be left blank. The contribution value should be less than the asset value.</p>
Loan Amount	<p>[Display] The loan amount. The loan amount is calculated as the difference in value between the asset and contribution. <i>Loan Amount = Asset Value - Contribution</i> The loan amount value is validated against minimum and maximum amount defined in the Loans Product Master (LNM11).</p>
Schedule Code	<p>[Mandatory, Search List] The repayment schedule code. Only the schedules, which are attached to the product, are displayed in the Search List. The name of the schedule is displayed adjacent to the schedule code. At the time of disbursement the default selected schedule will be attached to the loan account. However, if there is more than one schedule attached to the product the user can still change the default schedule from the picklist during actual disbursement (AL521).</p>
Net Rate	<p>[Display] Displays the net product rate. Net Product rate is the interest rate associated with the loan. It depends on the schedule code selected .</p>
Interest Variance	<p>[Optional, Numeric] Enter the interest variance to be offered to the customer. The variance is validated based on the min. and max. interest variance defined in the Loans Product Master (LNM11).</p>
Subsidy Available	<p>[Mandatory, Drop-down] The 'Subsidy Available' field will be enabled only in case the product codes defined in day 0 table are selected. Select 'Yes' on availability of Subsidy for the account, applicable for Loan and Agri loan accounts.</p>
Date of Sanction	<p>[Conditional, dd/mm/yyyy] Provide the date on which the loan application was sanctioned</p>
Sanctioning Authority	<p>[Optional, Drop-Down] Provide the sanctioning authority .</p>

	This refers to the officer or group of officers who sanction the loan
Sanction Reference	[Optional, AlphaNumeric] Enter the reference given by the sanctioning authority
Date of Loan Papers	[Optional, dd/mm/yyyy] Enter the date on which the loan papers are drawn up by the officer
Fixed/Floating Switch Due Date	[Optional, dd/mm/yyyy] Enter the date on which the rate switch is to be done.
Originator Name	[Display] This field displays the name of originator attached to the pool id.
Crop Loans	[Conditional, Picklist] The loans for cultivation of crop. The check box is selected if the loan account is opened in agri master product.
AC Plan code	[Conditional, Picklist] If Crop loans checkbox is checked, user has to mandatory select one of the values from the picklist 'AC plan code'. If Crop loans checkbox is not checked, AC plan code will be defaulted from the product and disabled. [Optional, Alphanumeric, 18] Enter the pool id. The currency of pool id provided should be same as the loan account number.
Pool ID	Validation with the Pool Amount maintained at the Pool Id level, <ul style="list-style-type: none"> • Sum of all the loan sanction amount (not the loan disbursement or loan outstanding amount) of the individual loan account opened and attached to the Pool Id provided for the current loan account. • The sum of above should be less than equal to the 'Pool amount' mentioned. • In case the sum is more than the 'Pool amount', system will not allow loan account opening for the Pool Id attached to the loan account.
Crop Type	[Conditional, Search List] The crop type for which the loan account is opened. This field is enabled only if the Crop Loans check box is selected.
Season	[Mandatory, Drop-Down] The season of the crop. The options are: <ul style="list-style-type: none"> • Kharif • Rabi
Review Period	[Drop-Down] The review period of the loan amount. The review period is in months. The options are:

- 6
- 12
- 18
- 24

Review Date [Display, dd/mm/yyyy]
 The review date of the loan amount.
 This field is system generated, as the review period is selected the review date is displayed.
 The system generates the report and also displays a warning message if the user attempts any transaction on the account after this date is over.

Repayment Mode [Drop-Down]
 The repayment mode of the loan. The options are:

- Cash
- Cheque
- Account Transfer
- GL

Agri Loan/ Advance Purpose [Optional, Drop-Down]
 Enter the purpose of the agricultural loan.
 The options are :

- Farm Credit
- Agriculture Infrastructure
- Ancillary Activities

Concession Rate [Optional, Numeric]
 Enter the concession rate allowed for the loan.

Date of Concession Rate [Date]
 Enter the date from which the concession is allowed.

Concession Rate Permitted By [Optional, Drop-Down]
 Select the authority who provided the concession from the drop down.
 The options are:

- Manager
- Director
- Supervisor

Agri Infra Unit [Drop-Down]
 The field is mandatory in case of Loan accounts opened under the product category as 'Agriculture' in LNM11 screen and 'Agriculture Infrastructure' in 'Agri Loan /Advance purpose' field in AL057.
 The data captured here will be used for MIS code update for Priority sector lending classification.
 The options are:

- a. Cold storage
- b. Soil conservation
- c. Godowns

- d. Market yards
- e. Water shed development
- f. Plant tissue culture
- g. Agri biotechnology
- h. Seed production
- i. Production of bio pesticides and bio fertilizers
- j. Vermi composting
- k. Warehouses
- l. Silos

[Drop-Down]

The field is mandatory in case of Loan accounts opened under the product category as 'Agriculture' in LNM11 screen and 'Ancillary Activities' in 'Agri Loan /Advance purpose' field in AL057

The data captured here will be used for MIS code update for Priority sector lending classification.

The options are:

- a. Co-operative societies of farmers for disposing of the produce of members
- b. Agri-clinics and Agri-business centres
- c. Food and Agro-processing units
- d. custom service units
- e. Primary Agricultural Credit Societies (PACS)
- f. Farmers' Service Societies (FSS)
- g. Large-sized Adivasi Multi-Purpose Societies (LAMPS)
- h. MFIs for on-lending to agri sector

Activities

[Drop-Down]

Sub Category

When Loan is opened under product 'Other Priority', the fields 'Sub category' will be enabled. User must select one value from these fields.

[Mandatory, Numeric]

Other Bank Limit

User will have to input the Other Bank limit in this field. Sum of Other bank limit and Sanctioned limit should auto-populate in Aggregate Sanctioned limit field and it is mandatory only for agri Loans.

[Display]

Aggregate Bank limit

The field displays the aggregate bank limit. Value should be summation of Sanctioned limit and other bank limit.

Account Number Generated

[Display]

After all the above details are correctly entered the system-generated

loan account number is displayed on the screen.

Drawdown Account Details

Remitter Account No	[Mandatory, Input, Numeric] Enter the CASA account number from which Drawdown needs to perform.
Branch Code	[Display] Branch for above CASA account number will get populated.
Customer Name	[Display] Customer Name for above CASA account number will get populated.
Product Code	[Display] Product Code for above CASA account number will get populated.
KCCS	
Aggregate Limit (5th Year Limit)	[Display] System will derive the aggregate limit based on the loan amount and period and review percentage and display the aggregate limit for KCCS account.
Crop Cultivation Amount - Kharif	[Optional, Numeric, 13,2] User can enter Crop Cultivation Amount in this field. Applicable only for KCCS account. The value should be greater than or equal to zero.
Crop Cultivation Amount - Rabi	[Optional, Numeric, 13,2] User can enter Crop Cultivation Amount in this field. Applicable only for KCCS account. The value should be greater than or equal to zero.
Crop Cultivation Amount - summer	[Optional, Numeric, 13,2] User can enter Crop Cultivation Amount in this field. Applicable only for KCCS account. The value should be greater than or equal to zero.
Crop Insurance Premium	[Optional, Numeric, 13, 2] Enter the crop insurance premium depending upon the crop cultivation area, crop etc. This will be set as per the government guidelines. The crop insurance premium entered during agri loan account opening will be constant over years and will not be considered for 10% increase. This field is applicable only for KCCS accounts.
WC for Allied Activities Amount	[Optional, Numeric, 13,2] User can enter Allied Activities Amount in this field. Applicable only for KCCS account. The value should be greater than or equal to zero.
WC for Farm Machinery Amount	[Optional, Numeric, 13,2] User can enter Farm Machinery Amount in this field. Applicable only for KCCS account. The value should be greater than or equal to zero.

Non-Farm Sector Amount	[Optional, Numeric, 13,2] User can enter Non-Farm Sector Amount in this field. Applicable only for KCCS account. The value should be greater than or equal to zero.
Consumption Purpose Amount	[Optional, Numeric, 13,2] User can enter Consumption Purpose Amount in this field. Applicable only for KCCS account. The value should be greater than or equal to zero.

To open loan account directly

1. Select the search criteria from the list.
2. Type the search string and press the Tab key and select the customer from the Search List.
3. Enter the relevant information and click OK.
4. The system displays the message "Application number."
5. Click OK.
6. The system displays Record added.

1.2 BA437 - Account Memo

You can maintain memos for accounts using this option. For any CASA, Loan or TD account a memo can be attached, which will be displayed to the teller when any transaction is done against the account in the branch.

A memo can be a reminder about important actions that have taken place on the account.

In case the primary customer of the account has a memo linked (customer level memo), then both the customer memo and account memo will be displayed in a concatenated fashion.

Sometimes multiple memos are required for the same customer. The memos are of two types: high level and low level. There is a maximum limit of 5 memos for each customer out of which four memos are active memos and one is an internal memo.

If a low level memo is encountered during transaction, authorization is not required for it. A high level memo requires authorization. The transaction will proceed only if the authorizer overrides any high level memo. This is applicable for both account level as well as customer level memo. However system will not validate the existence of memo in case of batch upload.

Definition Prerequisites

- Availability of CASA/LOAN/TD account for the customer
- BAM40 - Reason Codes

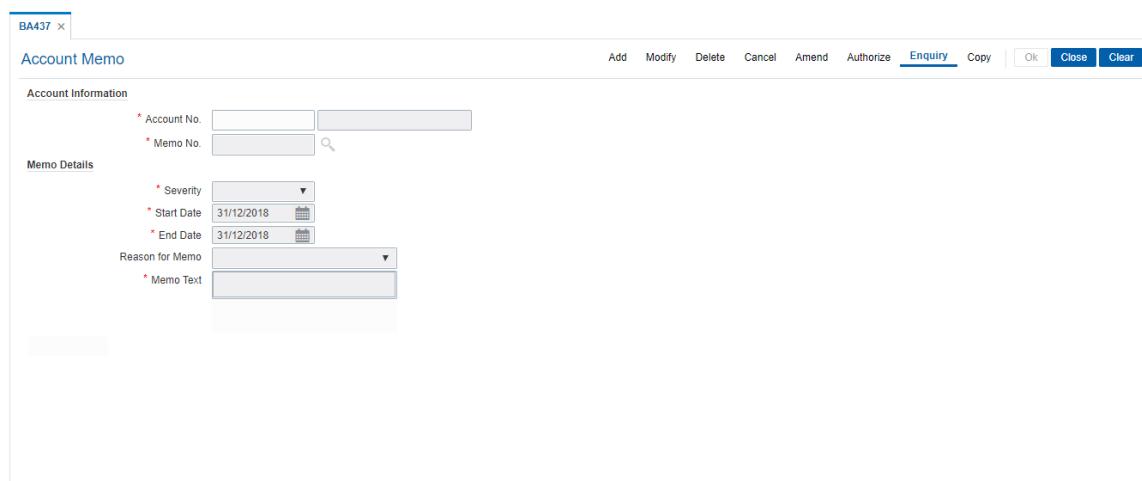

Modes Available

Add, Modify, Delete, Cancel, Authorize, Enquiry, Copy. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To add a memo to an account

1. In the **Dashboard** page, Enter the Task code **BA437** and then click  or navigate through the menus **Front Office Transactions > Internal Transactions > Others > Account Memo**.
2. You will be navigated to **Account Memo** screen.

Account Memo

Field Description

Field Name	Description
------------	-------------

Account Information

Account No.	[Mandatory, Numeric, 16] Type the valid account number.
Short Name	[Display] This field displays the short name of the primary customer of the account. The short name of the primary customer is defaulted from the Customer Addition option.
Memo No.	[Display] This field display serial number of the memo and is auto-generated at the time of memo addition. This field is disabled in the Add mode. For all the other modes, this field is mandatory.

Memo Details

Severity	[Mandatory, Drop-Down] Select the appropriate severity level from the drop-down list. A memo can be sent with two types of severity levels. The options are: <ul style="list-style-type: none">• High• Low
Start Date	[Mandatory, Date editor, dd/mm/yyyy] Select the date from which the memo will be in effect from the date editor. The start date should not be less than the system date.
End Date	[Mandatory, Date editor, dd/mm/yyyy] Select the date from which the memo will not be in affect from the date editor. The end date must be greater than or equal to the start date. In Add mode the end date will be defaulted to 01/01/1800. The user will have the option to change the end date of memo maintenance.
Reason For Memo	[Optional, Drop-Down] Select the reason for the memo from the drop-down menu. The reasons are maintained in Reasons Code Maintenance (Task Code: BAM40) option. The reason for memo drop-down displays the reason code along with the reason description.
Memo Text	[Mandatory, Alphanumeric, 254] Type the message that will appear on the screen when the account is accessed.

3. Click **Add** .
4. Enter the account number, for which the memo is to be added.
5. Enter the memo details like the severity, the reason for Memo, the date and the text of the memo.

Field Description

Field Name	Description
Account No.	[Mandatory, Numeric, 16] Enter the loan account number for which the installment payment is to be made. The short name of the account holder is populated adjacent to the account number.
Account Ccy	[Display] The field displays the currency assigned to the product, under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default. This field is non-editable.
Disbursement Mode	[Mandatory, Drop-Down] The multiple disbursement modes are possible for Loan Disbursement. Following are the disbursement mode. The options are: <ul style="list-style-type: none"> • CASA Transfer • Cash • GL Transfer • Bankers Cheque • Demand Draft
Outstandings	
Principal Balance	[Display] The actual principal balance as on the date of installment payment is displayed considering all dues were paid on time.

DND	[Display] The amount that is debited to the agri loan account.
Installment Arrears	[Display] The total installment arrears that are outstanding in the loan account is displayed. <i>Total Installment = Principal + Interest</i>
Interest Arrears	[Display] The total interest arrears that are outstanding in the loan account is displayed.
Other Arrears	[Display] Any other type of arrears due not forming part of the Principal or Interest arrear component are displayed here. These dues could be Outgoing Arrears, Legal Fees, Insurance Premium arrears, Service Charge arrears etc. These arrears could be raised using Agri Loans Common Billing Transactions screen (Task Code: AL050).
Penalty Arrears	[Display] The penalty interest is levied on the customer for the non-payment of the dues. It is basically the interest on arrears commonly known as IOA (Interest on Arrears). The unpaid penalty interest arrears due but not paid is displayed.
Unapplied Credits	
Amount Paid Today	[Display] Any Credits made to account today is displayed here.
Funds in RPA	[Display] RPA stands for "Repayment Pending Appropriation". In loans module any amount paid towards disbursement of the loan is first credited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.
Balance Details	
Total Amount Disbursed from Host	[Display] The gross amount (before disbursement deduction, if any) that is disbursed on the current date is displayed.
Disbursement Deductions	[Display] The amount to be deducted from the amount that is disbursed on the current date. The deduction is defaulted from the selection done during the host disbursement under Account schedule. If the deduction was waived during the host disbursement this field will have zero value.
Available Balance for Branch Disbursement	[Display] The available balance for branch disbursement amount.
Margin Amount	[Display] The margin amount.

Field Description

Field Name	Description
Balance Details	
Total Amount Disbursed from Host	[Display] The gross amount (before disbursement deduction, if any) that is disbursed on the current date is displayed.
Disbursement Deductions	[Display] The amount to be deducted from the amount that is disbursed on the current date. The deduction is defaulted from the selection done during the host disbursement under Account schedule. If the deduction was waived during the host disbursement this field will have zero value.
Available Balance for Branch Disbursement	[Display] The available balance for branch disbursement amount.
Margin Amount	[Display] The margin amount.
Account Ccy	[Display] The currency assigned to the product at the product level, under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default. This field is non-editable.
Txn Ccy	[Mandatory, Drop-Down] This field, by default, displays the account currency as the transaction currency. Select the appropriate cash currency, from the drop-down list. This is the currency in which the transaction will take place. While posting the transaction entries to the account, the transaction currency is converted into the account currency and for posting the GL entries it is converted into the local currency of the bank. This field is editable.
Acct Ccy Rate	[Display] The rate at which the account currency is converted to the local currency of the bank. The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the account currency and the local currency are same, the field takes the default value as 1, which cannot be modified.
Txn Ccy Rate	[Display] This field displays the rate at which the transaction currency is converted to local currency of the bank. The teller's right to change the transaction currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the transaction currency and the local currency are same, the field takes the default value as 1, which cannot be modified.

Disbursement Amount	[Display] The loan amount that has to be disbursed. This amount is in the currency of the loan account and is non-editable.
Txn Amount	[Display] The disbursement amount in cash is converted into the account currency, using the transaction currency rate and account currency rate. This amount is calculated in the transaction currency.
Margin Amount	[Input] Enter the margin amount in cash.
User Reference No.	[Alphanumeric, 40] The user reference number assigned to the customer. This field is enabled or disabled depending on the profit booking being enabled or disabled for the particular transaction.
Instrument No.	[Mandatory, Numeric] The instrument number.
Narrative	[Mandatory, Alphanumeric, 40] This field displays the default narration, based on the transaction. The user can change the narration, if required.

Field Description

Field Name	Description
Balance Details	
Total Amount Disbursed from Host	[Display] The gross amount (before disbursement deduction, if any) that is disbursed on the current date is displayed.
Disbursement Deductions	[Display] The amount to be deducted from the amount that is disbursed on the current date. The deduction is defaulted from the selection done during the host disbursement under Account schedule. If the deduction was waived during the host disbursement this field will have zero value.
Available Balance for Branch Disbursement	[Display] The available balance for branch disbursement amount.
Margin Amount	[Display] The margin amount.
Bank Code	[Mandatory, Drop-Down] This field displays the bank / issuer on which the BC is drawn. The list of banks on which DDs can be issued are maintained in the Issuer Maintenance [BAM09] screen and downloaded to the branch. Normally banks issue DDs drawn. This field is non-editable.
Txn Ccy	[Mandatory, Search List] The currency of the cheque. This field, by default, displays the account currency as the transaction currency. This is the currency in which the transaction will take place. Select the appropriate currency, from the drop-down list. While posting the transaction entries to the account, the transaction currency is converted into the account currency and for posting the GL entries it is converted into the local currency of the bank.
Tcy Rate	[Display] This field displays the rate at which the transaction currency is converted to the local currency of the bank. The exchange rate values are defined and downloaded from FCC. The teller's right to change the transaction currency rate is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.
Acct Ccy Rate	[Display] The rate at which the account currency is converted to the local currency of the bank. The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the account currency and the local currency are the same, the field takes a default value as 1, which cannot be modified.
Disbursement Amt	[Display] The loan amount that has to be disbursed is displayed. This amount will be in the currency of the loan account.

Margin Amount	<p>[Display] The margin amount.</p>
BC Amount (Acy)	<p>[Display] This field displays the net disbursement amount for which the Bankers cheque will be issued in account currency after deduction of charges. This amount is in the account ccy.</p>
BC Date	<p>[Display] The date of the Cheque, which takes a default value of the posting date. This field, by default, displays the posting date as the date on which the local cheque is issued. This field is non-editable.</p>
Serial No.	<p>[Display] For a remittance instrument such as a local cheque, at the time of issue, the system generates a serial number comprising the branch code, instrument type and a running serial number. The serial number for each instrument type is maintained separately and on reversal of an instrument issue, the instrument serial number will not be reused for the next instrument issue. When an instrument comes for clearing, it may be referred by the MICR number, and Routing number which needs to be maintained for each instrument, if it is expected to come through an inward clearing batch. If an instrument is liquidated by the teller, the instrument serial number is sufficient, as this is the number by which FLEXCUBE tracks the instrument uniquely. This field is non-editable.</p>
Micr No.	<p>[Mandatory] Type the MICR number of the DD. This is a number pre-printed on the instrument. For every remittance instrument it is necessary to maintain a MICR number that is printed on the instrument if the instrument is expected to come for clearing through inward clearing. A cross reference is maintained using option Maintaining Instrument MICR Number (Task Code: STM57) with the system generated serial number so that the instrument can be tracked by the system whether it is liquidated or enquired upon by MICR number or the serial number.</p>
Routing No.	<p>[Mandatory, Numeric, Nine] This field displays the routing number against which the cheque has been drawn. The routing number is the combination of the bank code and the branch code. The combination can be obtained from the Routing Branch Maintenance [STM54] screen. <i>Routing Number = Sector Code / Bank Code + Branch Code</i> For a cheque deposited, this routing number is used by the system to determine the float days and thus the value date of the instrument. For an inward clearing cheque this routing number should belong to the bank. The order, in which the codes in the routing number are to be entered, is determined by the set up at the Settlement Bank</p>

Parameters [STM59] screen.

Beneficiary Name	[Mandatory, Alphanumeric, 40] Type the name of the beneficiary for the local cheque.
Passport / IC No.	[Alphanumeric, 14] Type the passport or IC number of the beneficiary. This is an identification collected from the beneficiary of the local cheque at the time of liquidation. This field is mandatory.
Purchaser Name	[Mandatory, Alphanumeric, 60] Type the Purchaser Name. Short Name of the Primary customer will be defaulted and it is editable.
Beneficiary Addr 1,2	[Alphanumeric, 40] Type the contact address of the beneficiary. This is normally needed for record purposes and provided as additional information. This field is mandatory.
User Reference No.	[Alphanumeric, 40] The user reference number assigned to the customer. This field is enabled or disabled depending on the profit booking being enabled or disabled for the particular transaction.
Instrument No.	[Mandatory, Numeric] The instrument number.
Narrative	[Display] The default narration, based on the transaction. The user can change the narration, if required.

Agri Loan Disbursement by Demand Draft- 1032

The screenshot shows a web application window titled "Agri Loan Disbursement by Demand Draft". The window has a breadcrumb trail "1660 > 1032" and navigation buttons "OK", "Close", and "Clear". Below the title bar, there is a section titled "Balance Details" with the following data:

Total Amount Disbursed from Host	₹40,000.00	Disbursement Deductions	₹0.00
Available Balance for Branch Disbursement	₹0.00	Margin Amount	₹0.00

Field Description

Field Name	Description
Balance Details	
Total Amount Disbursed from Host	[Display] The gross amount (before disbursement deduction, if any) that is disbursed on the current date is displayed.
Disbursement Deductions	[Display] The amount to be deducted from the amount that is disbursed on the current date. The deduction is defaulted from the selection done during the host disbursement under Account schedule. If the deduction was waived during the host disbursement this field will have zero value.
Available Balance for Branch Disbursement	[Display] The available balance for branch disbursement amount.
Margin Amount	[Display] This field displays the margin amount.
Payable Branch Code	[Mandatory, Drop-Down] This field displays the bank / issuer on which the BC is drawn. The list of banks on which DDs can be issued are maintained in the Issuer Maintenance [BAM09] screen and downloaded to the branch. Normally banks issue DDs drawn. This field is non-editable.
Payable Branch Name	[Mandatory, Search List] The currency of the cheque. This field, by default, displays the account currency as the transaction currency. This is the currency in which the transaction will take place. Select the appropriate currency, from the drop-down list. While posting the transaction entries to the account, the transaction currency is converted into the account currency and for posting the GL entries it is converted into the local currency of the bank.
Bank Code	[Mandatory, Drop-Down] This field displays the bank / issuer on which the BC is drawn. The list of banks on which DDs can be issued are maintained in the Issuer Maintenance [BAM09] screen and downloaded to the branch. Normally banks issue DDs drawn. This field is non-editable.
Account No	[Display] The loan account number for which the loan disbursement is to be made. The name of the account holder is populated adjacent to the account number. This number is defaulted from the Loan Disbursement Inquiry screen.
Pan Card No	[Alphanumeric, 14] Type the passport or IC number of the beneficiary. This is an identification collected from the beneficiary of the DD at the time of liquidation.

	[Display]
Acct Ccy	The rate at which the account currency is converted to the local currency of the bank. The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the account currency and the local currency are the same, the field takes a default value as 1, which cannot be modified.
DD Ccy	[Display] This field displays Demand Draft currency.
Acct Ccy Rate	[Display] The rate at which the account currency is converted to the local currency of the bank. The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the account currency and the local currency are the same, the field takes a default value as 1, which cannot be modified.
DD Ccy Rate	[Display] This field displays DD Ccy rate.
DD Amount	[Display] This field displays the net disbursement amount for which the DD will be issued in account currency after deduction of charges.
Charges (Lcy)	[Display] The charges levied by the bank on whom the DD is issued for the transaction. The charges will be denominated in the local currency of the bank. The service charge codes are added and maintained in the Service Charge Code Maintenance option. The service charges can be attached at the product level, transaction mnemonic level or at the issuer maintenance level. The service charges are levied in the local currency of the bank. The system displays the total of all the service charges if more than one SC code is attached to the transaction. The user has the flexibility to modify/nullify the charges. This can be done by clicking on the Service Charge Details sub-menu where the default service charges can be suitably modified.
Acct Amount	[Display] This field displays account amount.
DD Date	[Display] The date of the DD, which takes a default value of the posting date. This field, by default, displays the posting date as the date on which the DD is issued. This field is non-editable.
Serial No	[Display] For a remittance instrument such as a DD, at the time of issue, the system generates a serial number comprising the branch code, instrument type and a running serial number. The serial number for each instrument type is maintained separately and on reversal of an

instrument issue, the instrument serial number will not be reused for the next instrument issue. When an instrument comes for clearing, it may be referred by the MICR number, and Routing number which needs to be maintained for each instrument, if it is expected to come through an inward clearing batch. If an instrument is liquidated by the teller, the instrument serial number is sufficient, as this is the number by which FLEXCUBE tracks the instrument uniquely. This field is non-editable.

Cheque No	[Display] This field displays cheque number.
Cheque Date	[Display] This field displays cheque date.
Routing No	[Mandatory, Numeric, Nine] This field displays the routing number against which the cheque has been drawn. The routing number is the combination of the bank code and the branch code. The combination can be obtained from the Routing Branch Maintenance [STM54] screen. Routing Number = Sector Code / Bank Code + Branch Code For a cheque deposited, this routing number is used by the system to determine the float days and thus the value date of the instrument. For an inward clearing cheque this routing number should belong to the bank. The order, in which the codes in the routing number are to be entered, is determined by the set up at the Settlement Bank Parameters [STM59] screen.
DD No	[Mandatory] User needs to enter DD number. [Alphanumeric, 14]
Passport / IC No	Type the passport or IC number of the beneficiary. This is an identification collected from the beneficiary of the BC at the time of liquidation. This field is mandatory.
Beneficiary Name	[Mandatory, Alphanumeric, 40] Type the name of the beneficiary for the BC. [Alphanumeric, 40]
Beneficiary Address, Address 2, Address 3	Type the contact address of the beneficiary. This is normally needed for record purposes and provided as additional information. This field is mandatory. [Alphanumeric, 40]
User Reference No	The user reference number assigned to the customer. This field is enabled or disabled depending on the profit booking being enabled or disabled for the particular transaction. [Display]
Narrative	The default narration, based on the transaction. The user can change the narration, if required.
Print Remark	[Input] User can enter print remark.

Purchaser Name [Mandatory]
This field is use to enter Purchaser name.

To disburse the loan

1. Type the account number and press the **Tab** key.
2. Select the disbursement mode from the list.
3. Click **OK**.
4. The system displays the message "Do You Want to continue?"
5. Click **OK**.
6. The system displays the **Loan Disbursement** screen depending on the selected disbursement mode.
7. Enter the relevant information and click **OK**.
8. The system displays the transaction sequence number. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

Note: Depending on the set up, there will be validation that the customer of the Debit account and the customer of the Credit should have the same Customer ID.
For more information on Authorization transactions, refer to the **Oracle FLEXCUBE Introduction User Manual**.

2.2 AL045-Agri Loan Disbursement Reversal

The loan, which is disbursed, can be reversed using the **Loan Disbursement Reversal** option. A loan disbursement transaction may have to be reversed due to administrative reasons or any error in the disbursement set-up for the loan account. The loan disbursement reversal transaction will reverse the disbursement as well as any charges deducted at the time of disbursement.

If the teller has already disbursed the loan amount at the branch, the same teller should reverse the loan disbursement transaction on the same day using option 6006- **Search Electronic Journal** . Subsequently, this reversal at the host should be done. Without the branch reversal of the disbursement the host disbursal reversal cannot be performed. At the head office, you can also reverse the loan disbursement transaction using this option.

Field Description

Field Name	Description
Account No.	[Mandatory, Numeric, 16] Enter the valid loan account number.
Payout Mode	[Display] The mode in which the loan was disbursed will be displayed. For example in cash, cheque, and transfer to savings.
Disbursed Amount	[Display] The total disbursed amount in account currency disbursed will be displayed. This is the gross amount exclusive of deductions.
Total Deductions	[Display] The total amount deducted from the disbursed loan amount will be displayed.
Net Disbursed	[Display] The net amount disbursed in account currency. <i>Net Disbursed = Gross Amount disbursed - Total deductions.</i>
Total Billed	[Display] The total amount of deduction in the account currency.
Column Name	Description
Type	[Display] The type of deduction. Some of the deduction types are service charge, premium, installment etc.
Amount in LCY	[Display] The deduction amount in local currency.
Deduction Currency	[Display] The deduction currency.
Rate	[Display] The exchange rate for converting the deduction amount from local currency to account currency.
Amount in ACY	[Display] The amount deducted in account currency.
Currency	[Display] The currency mode in which the service charge was deducted.
Mode	[Display] The mode in which the service charge was deducted i.e. Bill, Deduct, Debit.

To reverse a loan disbursement

1. Type the account number and press the **Tab** key.
2. Click **OK**.

3. The system displays the message "Authorization required. Do You Want to continue?"
4. Click **Yes**.
5. The system displays the **Authorization Reason** screen.
6. Enter the relevant information and click **OK**.
7. The system displays the message "Disbursement Reversal Done".

Note: The reversal transaction will reverse all the entries passed during the original disbursement and the reversal transaction shows all the relevant information for confirmation.

2.3 ALM38-Agri Loan Approved Amount Maintenance

The loan amount, which is sanctioned for a particular account can be modified using the **Loan Approved Amount Maintenance** option.

This option has to be used when the borrower decides not to use the full amount sanctioned. **FLEXCUBERetail** does not allow the user to increase the amount over the sanctioned loan. It is possible to revise the loan amount below the sanctioned amount. The lower limit for the revision is the utilized amount. In case the loan is partially disbursed the lower limit for the revision i.e. the New Approved Amount will be the utilized amount.

4. Click **OK**.
5. The system displays the message "Record Amended Authorization Required. Click Ok to Continue".

To authorize the approved loan amount details

1. Click **Authorize**.
2. Type the appropriate account number or select it from the Search List.
3. Click **OK**.
4. The system displays the message "Record Authorized.". Click **OK**.

2.4 ALM39-Agri Loan Account Application Details Maintenance

The user can extend the validity period for accepting the loan offer, using the **Loan Account Application Details Maintenance** option. Disbursements cannot be done if the acceptance validity period has expired. This maintenance is applicable when the loan account is opened using APS module and has not been disbursed. The offer validity period is defined in **Loan Product Master (LNM11)**. Offer validity period is the stage where bank makes an offer to the customer and customer should be giving his/ her acceptance to the terms and conditions of the loan before the loan offer expires. Offer validity period starts after the Offer letter is printed.

5. You can view loan account application details.

3. Loan Repayments

3.1 1670-Agri Loan Installment Payment Enquiry

The Installment payment Enquiry option allows a user to enter details of regular repayments on an account by a customer. The installment payment option is used for amounts equal to or less than the arrears due on the account. Excess payment is allowed for Revolving Loans, where accounts have arrears already due. The initial Enquiry screen will display all the outstanding arrears (interest/ principal etc.) along with the unbilled penalty arrears till date (calculated online) due to late payment of arrears on the account.

The payment can be by multiple modes viz., Cash, Local Cheque, CASA Transfer or GL transfer. After the payment is made the system updates the amount paid today for the account. The set-off of paid amount against arrears happens in end of day based on the appropriation sequence for arrear type and date of arrear as set at the product level.

Field Description

Field Name	Description
Account No.	[Mandatory, Numeric, 16] Enter the loan account number for which the installment payment is to be made. The short name of the account holder is populated adjacent to the account number.
Account Ccy	[Display] The field displays the currency assigned to the product, under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default. This field is non-editable.
Installment Mode	[Mandatory, Drop-Down] Multiple repayment modes are possible for Loan Installment Payment. However, the modes are validated against the parameters defined at the Loans Product Master Level option (Task Code: LNM11). Following are the installment mode. The options are: <ul style="list-style-type: none"> • Cash • Local Cheque • CASA Transfer • GL Transfer
Outstanding	
Principal Balance	[Display] The actual principal balance as on the date of installment payment is displayed considering all dues were paid on time.
DND	[Display] The DND (Debit but not Due amount) amount that is debited to the agri loan account.
Installment Arrears	[Display] The total installment arrears that are outstanding in the loan account is displayed. <i>Total Installment = Principal + Interest</i>
Interest Arrears	[Display] The total interest arrears that are outstanding in the loan account is displayed.
Other Arrears	[Display] Any other type of arrears due not forming part of the Principal or interest arrear component are displayed here. These dues could be Outgoing Arrears, Legal Fees, Insurance Premium arrears, Service Charge arrears etc. These arrears could be raised using Agri Loans Common Billing Transactions screen (Task Code: AL050).
Penalty Arrears	[Display]

The penalty interest is levied on the customer for the non-payment of the dues. It is basically the interest on arrears commonly known as IOA (Interest on Arrears). The unpaid penalty interest arrears due but not paid is displayed.

Unbilled Penalty Interest

[Display]

Unbilled Penalty Interest is the interest accrued on the loan account from the last penalty charging date till the current date. The Unbilled penalty interest till date due to late payment of arrears on the account is calculated online.

Upto

[Display]

The system-generated date up to which the unbilled penalty interest calculated is displayed.

Unapplied Credits

Amount Paid Today

[Display]

The amount paid today into the loan account by way of installment payment, advance payment, partial payoff or standing instruction from CASA account is displayed here.

Funds in RPA

[Display]

RPA stands for "Repayment Pending Appropriation". In loans module any amount paid towards repayment of the loan is first credited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.

Installment Payments

Total Due

[Display]

The total amount payable by the customer is displayed.

Total Due = DND + Installment Arrears + Other Arrears + Penalty Arrears + UnBilled Penalty Interest

Field Description

Field Name	Description
Account No.	<p>[Display]</p> <p>The loan account number for which the loan installment payment is to be made is displayed. The short name of the account holder is populated adjacent to the account number. This number is defaulted from the Loan Installment PaymentEnquiry screen.</p>
Account Ccy	<p>[Display]</p> <p>This field displays the currency assigned to the loan product at the product level, under which the loan account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default. This field is non-editable.</p>
Txn Ccy	<p>[Mandatory, Drop-Down]</p> <p>This field displays the transaction currency. This is the currency in which the transaction has to be done. The teller has to select the Transaction Currency from the drop-down list. While posting the transaction entries to the account, the transaction currency is converted into the account currency, based on the defined transaction rate. This field is editable.</p>
Acct Ccy Rate	<p>[Display]</p> <p>This field displays the rate of conversion used for converting the loan account currency to the local currency of the bank. The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the local currency and the account currency are the same, the field takes a default value as 1, which cannot be modified.</p>
Txn Ccy Rate	<p>[Display]</p> <p>This field displays the rate at which the transaction currency is converted to the local currency of the bank. The teller's right to change the transaction currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the transaction currency and the local currency are same, the field takes the default value as 1, which cannot be modified.</p>
Txn Amount	<p>[Mandatory, Numeric]</p> <p>Type the appropriate transaction amount. This is the cash amount that is being paid as an installment. The system will default the total arrears payable by the customer. The teller can modify this amount by reducing the default amount but the amount cannot be greater than the due installment amount. The amount is entered in the transaction currency for depositing cash. The cash deposit amount is converted into the account currency, using the transaction currency rate and account currency rate. This is a numeric field. This field is mandatory.</p>

Acy Amount	<p>[Display]</p> <p>This field displays the amount, in Loan account currency, which will be credited to the loan account. The account amount is derived as follows: $Account\ Amount = Txn\ Amount * Txn\ Ccy\ Rate / Acct\ Ccy\ Rate$. The amount will be calculated in the account currency. The system posts the entries to the accounts in the account currency. If the local currency of the bank is different from the account currency of the customer, the amount entered in the Txn Amount field is converted to the account currency at the specified exchange rate. If the currency of the local bank and the account currency are the same, the amount in the Txn Amount field and the Account Amt field will be the same. Account currency is the currency assigned to the product at the product level, under which the account is opened. If the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency. This field is non-editable.</p>
Total Arrears	<p>[Display]</p> <p>The total amount of arrears that the customer has to pay is displayed. Irrespective of the amount entered in the Txn Amount field, the system will display the total arrears due as on the date of payment. This field is non-editable.</p>
User Reference No.	<p>[Alphanumeric, 40]</p> <p>The user reference number assigned to the customer. This field is enabled or disabled depending on the profit booking being enabled or disabled for the particular transaction.</p>
Narrative	<p>[Display]</p> <p>The field displays the default narration, based on the transaction. The user can change the narration, if required.</p>
Existing PAN / Aadhaar Reference	<p>[Display]</p> <p>This field displays the PAN number / Aadhaar Reference number of primary customer of the account. This field is displayed when account number is entered and tabbed out. If PAN is available for the primary customer in the Customer Master, default it in "Existing PAN/Aadhaar Reference". If not, check if Aadhaar number of the primary customer is available in the system. If yes, default it in this field.</p>
PAN / Aadhaar Reference for Transaction	<p>[Alphanumeric, 12]</p> <p>If neither PAN, nor Aadhaar is maintained for the primary customer, the field "PAN/Aadhaar Reference for Transaction" will be mandatory. It will accept PAN or Aadhaar as input, whichever the depositor chooses to furnish for the transaction. The validation for this field will be-</p> <ol style="list-style-type: none"> i. Check the length of the value entered. If it is neither 10 nor 12 characters long, the transaction will not be allowed ii. If the string entered is a 10 character alphanumeric value, check if it is as per prescribed PAN format. The PAN number should be entered in the 'AAAAAnnnnA' format, where 'A' is the alphabetic part and n is the numeric part. iii. If the above validation for PAN fails, check if the entered field is of length 12 and numeric. If yes, it is to be recognized as Aadhaar number and the transaction is to be allowed iv. If both the above validations fail or if no value is entered, transaction will not be allowed.

Form 60 / 61

[Optional, Drop-down]

Select the value from the drop-down list.

The options are:

- Form 60
- Form 61
- None

This field is applicable if **Existing PAN / Aadhaar Reference** and **PAN / Aadhaar Reference for Transaction** fields is not provided.

This field displays the default narration, based on the transaction. The user can change the narration, if required.

Agri Loan Installment Payment by GL - 1673

Loan Installment payment can be done by using an intermediate GL. This selected GL is debited and the loan account credited. The GI has to be a normal GL on which direct posting is allowed.

The loan account gets credited and the appropriation for the credit happens in EOD.

The screenshot shows the Oracle Agri Loan Installment Payment by GL form. The form is titled "Agri Loan Installment Payment by GL" and has a window title "1673 x". The form contains the following fields:

While posting the transaction entries to the account, the transaction currency is converted into the account currency, based on the defined transaction rate. This field is editable.</p>
Acct Ccy Rate	<p>[Display]</p> <p>This field displays the rate of conversion used for converting the loan account currency to the local currency of the bank. The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the local currency and the account currency are the same, the field takes a default value as 1, which cannot be modified.</p>
Txn Ccy Rate	<p>[Display]</p> <p>This field displays the rate at which the transaction currency is converted to the local currency of the bank. The teller's right to change the transaction currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the transaction currency and the local currency are same, the field takes the default value as 1, which cannot be modified.</p>
Txn Amount	<p>[Mandatory, Numeric]</p> <p>Type the appropriate transaction amount. This is the cheque amount that is being paid as an installment. The system will default the total arrears payable by the customer. The teller can modify this amount by reducing the default amount but the amount cannot be greater than the due instalment amount. The amount converted to the account/local currency should not exceed 15 digits. The amount is entered in the transaction currency for depositing the cheque. The cheque deposit amount is converted into the account currency, using the transaction currency rate and account currency</p>

rate.
This is a numeric field.
This field is mandatory.

Account Amount [Display]
This field displays the amount, in Loan account currency, which will be credited to the loan account. The account amount is derived as follows:
$$\text{Account Amount} = \text{Txn Amount} * \text{Txn Ccy Rate} / \text{Acct Ccy Rate}$$

The amount will be calculated in the account currency. The system posts the entries to the accounts in the account currency.
If the local currency of the bank is different from the account currency of the customer, the amount entered in the Txn Amount field is converted to the account currency at the specified exchange rate. If the currency of the local bank and the account currency are the same, the amount in the Txn Amount field and the Account Amt field will be the same.
Account currency is the currency assigned to the product at the product level, under which the account is opened.
If the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency.
This field is non-editable.

Total Arrears [Display]
The total amount of arrears that the customer has to pay is displayed. Irrespective of the amount entered in the Txn Amount field, the system will display the total arrears due as on the date of payment.
This field is non-editable.

User Reference No. [Alphanumeric, 40]
The user reference number assigned to the customer.
This field is enabled or disabled depending on the profit booking being enabled or disabled for the particular transaction.

Narrative [Display]
The field displays the default narration, based on the transaction.
This field is non-editable.

To Enquire on loan installment payment

1. Type the account number and press the **Tab** key.
2. Select the appropriate option from the **Installment Mode** list.
3. Click **OK**.
4. Depending up on the option selected from **Installment Mode** list, the system displays the relevant transaction screen.
5. Enter the relevant information and click **OK**.
6. The system displays the transaction sequence number message box. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

Note: For information on Denomination Detail, Instrument Detail and Cheque Detail and Authorisation transactions, refer to the **FLEXCUBE Introduction User Manual**

3.2 1680-Agri Loan Partial Payoff Enquiry

Partial payoff indicates that part of the principal amount due, over and above the arrears due is paid off. Since Partial Payoff results in reduction in the outstanding principal the loan account will get rescheduled on the lower principal base. When performing the partial payoff the teller can chose the reschedule option - as "Recalculate installment" or "Recalculate term". A new schedule will be generated in the EOD accordingly.

In case of partial payoff, it is possible to charge interest accrued till current date i.e. upto the date the Partial Payoff transaction is performed.

The Payoff benefit specifies when the effect of the payment should be reflected on the interest base.

The available options are:

- **Immediate** – The Interest base is updated from the date of payment
- **Next Rest period** - The rest period is specified at the schedule setup (LNM98) and the interest base will be updated as per rest period specified in the schedule attached to the loan account
- **Next due date** - The interest base will be updated when the next installment falls due
- **None** - The interest base is not affected by the payment. This may be used in simple interest kind of loans

Partial Payoff of loan can be made by cash, Local Cheque, CASA Transfer or GL Transfer by using this option.

Access

- Task Code: 1680
- Front Office Transactions > Account Transactions > Agri Loan Account Transactions > Enquiries > Agri Loan Partial Payoff Enquiry

Definition Prerequisites

- CYDCPAIR - Currency Pair Definition

Other Prerequisites

- The exchange rate values must be defined and downloaded
- Amount to be repaid should be greater than the due arrears

Field Description

Field Name	Description
Account No.	<p>[Mandatory, Numeric, 16] Enter the loan account number for which the partial payment is to be made. The short name of the account holder is populated adjacent to the account number.</p>
Account Ccy	<p>[Display] This field displays the currency assigned to the product, under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default. This field is non-editable.</p>
Partial Payoff Mode	<p>[Mandatory, Drop-Down] Multiple repayment modes are possible for Loan Partial Payoff Payment. However, the modes are validated against the parameters defined at the Loans Product Master Level option (Task Code: LNM11). Following are the Partial Payoff modes of payment. The options are:</p> <ul style="list-style-type: none"> • Cash • Local Cheque • CASA Transfer • GL Transfer
Reschedule Mode	<p>[Mandatory, Drop-Down] Select from either of the mode for rescheduling. The options are:</p> <ul style="list-style-type: none"> • Recalculate Term – If this option is selected the system will keep the installment constant (as it was before rescheduling) and change the term of the loan • Recalculate Installment – If this option is selected the system will keep the maturity date i.e. the Term of the loan as constant and change the installment
Apply Interest till Date	<p>[Check Box] Select the checkbox to choose the option of charging/applying accrued interest, the system will calculate the interest till date and display it on the screen. If the flag “Apply Interest Till Date” is selected then the interest will be immediately capitalized on account. This will mean that the principal base for reschedule will include this interest. Else the interest will continue to accrue and will be charged as part of interest at next due date. Note: If DND is raised, then interest will be appropriated against the PPF¹ txn amount even if this checkbox is not selected.</p>

¹Partial Pay-off: It is the payment of any principal amount before the same becomes due. The amount paid is less than the total amount of principal Outstanding.

Principal Balance	[Display] The actual principal balance on the date of partial payoff if all dues were paid on time. This field is non-editable.
DND	[Display] The DND (Debit but not Due amount) amount that is debited to the agri loan account.
Total Arrears	[Display] The field displays the total arrears due on the date of partial payoff excluding Unbilled Penalty Interest. <i>Total Arrears = principal arrears + interest arrears + fee arrears + legal fee arrears + premium arrears + outgoing arrears + penalty arrears</i> This field is non-editable.
Unbilled Penalty Interest	[Display] Unbilled Penalty Interest is the interest accrued on the loan account from the last penalty charging date till the current date. The Unbilled penalty interest till date, due to late payment of arrears on the account is calculated online. This field is non-editable.
Unbilled Penalty Interest Upto	[Display] The system-generated date up to which the unbilled penalty interest is calculated is displayed. This field is non-editable.
UnBilled Interest	[Display] This field displays the interest from the last due date to the date of partial repayment of loan. This field will populate value only when the Apply Interest Till Date check box is selected. This field is non-editable.
UnBilled Interest Upto	[Display] The date up to which unbilled interest is calculated will be displayed. This field will populate value only when the "Apply Interest Till Date" check box is selected. This field is non-editable.
Unapplied Credits	
Amount Paid Today	[Display] The amount paid today into the loan account by way of installment payment, advance payment, partial payoff or standing instruction from CASA account is displayed here.
Funds in RPA	[Display] RPA stands for "Repayment Pending Appropriation". In loans module any amount paid towards repayment of the loan is first credited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.

Partial Payoff

Total Due Including DND

[Display]

The total amount payable by the customer is displayed.

If 'Apply interest till date' is unchecked

$Total\ Due = DND + Total\ arrears + Unbilled\ penalty\ interest$

If 'Apply interest till date' is checked

$Total\ Due = DND + Total\ arrears + Unbilled\ penalty\ interest + unbilled\ interest$

Loan Partial Payoff By Cash - 1681

Partial Payoff payment can be made by Cash mode. Partial payment indicates that part of the principal amount due, over and above the arrears due is paid off. This is followed by rescheduling of the loan as part of EOD process. The cash payment for an account will update the teller balance in that currency. The payment may be in a currency different from the account currency.

Penalty Method	<p>[Mandatory, Drop-Down]</p> <p>Select the penalty method from the drop-down list.</p> <p>A bank may choose to charge a partial payoff penalty. This penalty is set up as an interest rule and attached to the stage at which the penalty is to be charged. This is usually applied in the regular stage of the loan.</p> <p>This is the method to be used to charge penalty for early repayment of the loan.</p> <p>The teller can select from anyone of the following options:</p> <ul style="list-style-type: none"> • On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the penalty interest • On Amount And Term – Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the penalty interest • Waive – Penalty is waived

- Manual – If penalty method is selected as manual, then the penalty amount field is enabled where the user needs to enter the amount of penalty to be charged. The penalty rate field will be blank. The penalty amount can be entered as 'Zero' or a value greater than that.

The accounting entries will be passed to the GLs specified in the **Product Interest Attributes** (Task Code: LNM42) applicable for partial pay off penalty type of interest.

If penalty amount is entered as 'Zero', accounting entries will not be passed. Penalty amount will be paid from the transaction amount. Penalty will not be computed using the rate specified in Interest rate plan for penalty rate type.

If appropriation sequence is entered then all four options available currently will not be available. Only waive and manual will be available

For more information refer to **Example 01** provided at the end of the topic.

Penalty Rate	<p>[Display]</p> <p>This field displays the penalty rate.</p> <p>The PPF penalty rate gets defaulted from the Schedule Type Definition (Task Code: LNM98) option attached to the product under which the loan account exists.</p> <p>This field not displays any value if the Penalty Method selected as either 'Waive' or 'Manual' .</p>
Txn Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the appropriate transaction amount. This is the cash amount that is being paid as Partial Payoff. The amount entered here should be greater than the total arrears due including the penalty interest. If the amount entered is less than or equal to the arrear amount the system will display message “Transaction Amount should be greater than amount to pay”. However, this amount should not be greater than the total outstanding loan amount. If the amount is greater than the outstanding loan amount the system will display message “Transaction amount is sufficient to settle the loan – Do EFS Transaction”.</p> <p>The amount is entered in the transaction currency for depositing cash. The cash deposit amount is converted into the account currency, using the transaction currency rate and account currency rate.</p>
Partial Payoff Amount	<p>[Display]</p> <p>This field displays the partial amount (of the loan) that will be paid off. Initially the system will display the total arrears due in this field. After the teller enters the partial payoff amount in the Txn Amount field above the amount, this field will display the value as mentioned in the Txn Amount field.</p>
Penalty Amount	<p>[Display]</p> <p>This field displays the penalty amount charged by the bank for early partial repayment of the loan.</p> <p>The value in this field will be calculated by the system based on the penalty method selected and the default rate applicable for the loan account.</p> <p>If the penalty method selected Waive then no amount will be displayed in this field.</p>

If the penalty Method selected either of **On Amount** or **On Amount + Term**, this field displays the penalty amount charged by the bank for early partial repayment of the loan.

The value in this field will be calculated by the system based on the penalty method selected and the default rate applicable for the loan account.

If the penalty method selected is **Waive** then no amount will be displayed in this field.

If the penalty method is selected as **Manual**, this field is available to enter the amount which can be 'Zero' or a value greater than that.

User Reference No.	[Optional, Alphanumeric, 40] Type the user reference number. The user reference number is assigned to identify the transaction.
Narrative	[Optional, Alphanumeric, 40] Type the narration. This field displays the default narration, based on the transaction.
Existing PAN / Aadhaar Reference	[Display] This field displays the PAN number / Aadhaar Reference number of primary customer of the account. This field is displayed when account number is entered and tabbed out. If PAN is available for the primary customer in the Customer Master, default it in "Existing PAN/Aadhaar Reference". If not, check if Aadhaar number of the primary customer is available in the system. If yes, default it in this field.
PAN / Aadhaar Reference for Transaction	[Alphanumeric, 12] If neither PAN, nor Aadhaar is maintained for the primary customer, the field "PAN/Aadhaar Reference for Transaction" will be mandatory. It will accept PAN or Aadhaar as input, whichever the depositor chooses to furnish for the transaction. The validation for this field will be- <ol style="list-style-type: none">Check the length of the value entered. If it is neither 10 nor 12 characters long, the transaction will not be allowedIf the string entered is a 10 character alphanumeric value, check if it is as per prescribed PAN format. The PAN number should be entered in the 'AAAAAnnnnA' format, where 'A' is the alphabetic part and n is the numeric part.If the above validation for PAN fails, check if the entered field is of length 12 and numeric. If yes, it is to be recognized as Aadhaar number and the transaction is to be allowedIf both the above validations fail or if no value is entered, transaction will not be allowed.
Form 60 / 61	[Optional, Drop-down] Select the value from the drop-down list. The options are: <ul style="list-style-type: none">• Form 60• Form 61• None This field is applicable if Existing PAN / Aadhaar Reference and PAN / Aadhaar Reference for Transaction fields is not provided.

Agri Loan Partial Payoff By CASA Transfer - 1682

Partial Payoff by transfer from a CASA account can be performed. The system validates that the CASA account entered is a valid account. If the account is a liability account, system will not allow the account to go into debit balance. The CASA account gets debited to the extent of the Partial Payoff payment and the same can be seen in the CASA statement Enquiry. The loan account gets credited and the appropriation for the credit happens in EOD.

Loan Partial Payoff By GL - 1683

Partial Payoff for Loan account can be done by using an intermediate GL. The selected GL is debited and the loan account is credited. The GL has to be a normal GL on which direct posting is allowed.

The screenshot shows the 'Agri Loan Partial Payoff by GL' form. At the top, there are two tabs labeled '1680' and '1683', with '1683' being the active tab. The form contains several input fields and dropdown menus. On the left side, there are fields for 'Account No.' (700000000315158), 'Account Ccy' (INR), 'GL Acct Ccy' (INR), 'GL Acct No.' (with a search icon), 'Penalty Method' (dropdown), 'GL Acct Amount' (₹0.00), 'Partial Payoff Amount' (₹459.90), 'Reference No.', and 'Recon Serial No.'. On the right side, there are fields for 'Loan Acct Ccy Rate' (1.00000), 'GL Acct Ccy Rate' (1.00000), 'Penalty Rate' (2.70000), and 'Penalty Amount' (₹0.00). At the bottom, there is a 'Narrative' field with the text 'Agri Partial Payoff By GL'. The form has 'OK', 'Close', and 'Clear' buttons at the top right.

Agri Loan Partial Payoff By Local Cheque - 1684

Partial Payoff payment can be made by Local Cheque mode. Partial payment indicates that part of the principal amount due, over and above the arrears due is paid off. This is followed by rescheduling of the loan as part of EOD process. When Partial Payoff payment for a loan is made by cheque, system accepts the cheque details such as the instrument number, routing number, the clearing type and amount. The uncleared amount of the loan is updated and the cheque is sent for clearing. The cheque date has to be less than or equal to current date. If the cheque date is less than current date the system will validate that the cheque has not crossed its stale period.

On the cheque being cleared, the uncleared amount is reduced accordingly and the loan account is credited.

The screenshot shows a web-based form titled "Agri Loan Partial Payoff By Local Cheque". The form is divided into two columns of input fields. The left column contains: Account No. (7000000000315158), Account Ccy. (INR), Account Ccy. Rate (1.00000), Penalty Method (On Amount), Txn Amount (₹10,000.00), Partial Payoff Amt. (₹10,000.00), and Narrative (Agri LN Partial Payoff Local Cheque). The right column contains: Txn Ccy. (INR), Txn Ccy. Rate (1.00000), Penalty Rate (2.70000), and Penalty Amount (₹250.81). At the top of the form, there are two progress indicators: a checkmark in a circle labeled "1680" and a "2" in a circle labeled "1684". There are also "OK", "Close", and "Clear" buttons at the top right.

Field Description

Field Name	Description
Account No.	<p>[Display]</p> <p>Displays the loan account number for which the partial payment is to be made.</p> <p>The short name of the account holder is displayed adjacent to the account number.</p>
Account Ccy	<p>[Display]</p> <p>This field displays the currency assigned to the product, under which the account is opened.</p> <p>All the entries posted in the account are in the account currency.</p>
Txn Ccy	<p>[Mandatory, Drop-Down]</p> <p>Select the transaction currency from the drop-down list.</p> <p>This is the currency in which the transaction has to be done.</p> <p>While posting the transaction entries to the account, the transaction currency is converted into the account currency based on the defined transaction rate.</p>
Acct Ccy Rate	<p>[Display]</p> <p>This field displays the rate of conversion used for converting the loan account currency to the local currency of the bank.</p> <p>The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p> <p>If the account currency and the local currency are same, the field takes the default value as 1, which cannot be modified.</p>
Txn Ccy Rate	<p>[Display]</p> <p>This field displays the rate at which the transaction currency is converted to the local currency of the bank.</p> <p>The teller's right to change the transaction currency rate within range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p> <p>If the transaction currency and the local currency are same, the field takes the default value as 1, which cannot be modified.</p>
Penalty Method	<p>[Mandatory, Drop-Down]</p> <p>Select the penalty method from the drop-down list.</p> <p>A bank may choose to charge a partial payoff penalty. This penalty is set up as an interest rule and attached to the stage at which the penalty is to be charged. This is usually applied in the regular stage of the loan.</p> <p>This is the method to be used to charge penalty for early repayment of the loan.</p> <p>The teller can select from anyone of the following options:</p> <ul style="list-style-type: none"> • On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest • On Amount And Term – Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest • Waive – Penalty is waived

- Manual – If penalty method is selected as manual, then the penalty amount field is enabled where the user needs to enter the amount of penalty to be charged. The penalty rate field will be blank. The penalty amount can be entered as 'Zero' or a value greater than that.

The accounting entries will be passed to the GLs specified in the **Product Interest Attributes** (Task Code: LNM42) applicable for partial pay off penalty type of interest. If penalty amount is entered as 'Zero', accounting entries will not be passed. Penalty amount will be paid from the transaction amount. Penalty will not be computed using the rate specified in Interest rate plan for penalty rate type.

For more information refer to **Example 01** provided at the end of the topic.

Penalty Rate	<p>[Display]</p> <p>This field displays the penalty rate.</p> <p>The PPF penalty rate gets defaulted from the Schedule Type Definition (Task Code: LNM98) option attached to the product under which the loan account exists.</p> <p>If the Penalty Method selected is either 'Waive' or 'Manual' this field not displays any value.</p>
Txn Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the appropriate transaction amount. This is the cheque amount that is being paid as Partial Payoff. The amount entered here should be greater than the total arrears due including the penalty interest. If the amount entered is less than or equal to the arrear amount the system will display message “Transaction Amount should be greater than amount to pay”. However, this amount should not be greater than the total outstanding loan amount. If the amount is greater than the outstanding loan amount the system will display message “Transaction amount is sufficient to settle the loan – Do EFS Transaction”.</p> <p>The amount is entered in the transaction currency for depositing the cheque. The cheque deposit amount is converted into the account currency, using the transaction currency rate and account currency rate.</p>
Partial Payoff Amt	<p>[Display]</p> <p>This field displays the partial amount (of the loan) that will be paid off. Initially the system will display the total arrears due in this field. After the teller enters the partial payoff amount in the Txn Amount field above the amount in this field will display the value as mentioned in the Txn Amount field.</p>
Penalty Amount	<p>[Display]</p> <p>This field displays the penalty amount charged by the bank for early partial repayment of the loan.</p> <p>The value in this field will be calculated by the system based on the penalty method selected and the default rate applicable for the loan account.</p> <p>If the penalty method selected Waive then no amount will be displayed in this field.</p> <p>If the penalty Method selected either of On Amount or On Amount + Term, this field displays the penalty amount charged by the bank for early partial repayment of the loan.</p>

The value in this field will be calculated by the system based on the penalty method selected and the default rate applicable for the loan account.

If the penalty method selected is **Waive** then no amount will be displayed in this field.

If the penalty method is selected as **Manual**, this field is available to enter the amount which can be 'Zero' or a value greater than that.

Narrative

[Optional, Alphanumeric, 40]

Type the narration.

Field Description

Field Name	Description
Clearing Type	<p>[Mandatory, Drop-Down] The clearing type.</p> <p>The bank can set up multiple clearing types, where cheques that are required to be cleared at different times of the day are deposited so that they can be treated differently. All processes for a cheque from outward clearing, running of value date, and marking late clearing, etc. takes place on the basis of the clearing type.</p>
Cheque No.	<p>[Mandatory, Numeric, 12] The cheque number, which is present on the MICR line of the instrument.</p> <p>When the cheque is deposited into any payee's account, the cheque number is used to ensure that the duplicate entries are not made in the system (that the same cheque is not deposited multiple times in the system.). On deposit of every cheque, cheque number, routing number and drawer account number (all the three are present on the MICR line) are used to check for the presence of duplicate instrument. If duplicate instruments are found, cheque deposit will be rejected unless the earlier cheques are all marked as Returned.</p>
Cheque Literal	<p>[Mandatory, Drop-Down] The cheque literal.</p> <p>Options are:</p> <ul style="list-style-type: none"> • Drawing Voucher Deposit • Guaranteed Cheque Deposit • House Cheque Deposit • Local Cheque Deposit • MO/PO Deposit • Outstation Cheque Deposit <p>This field is not used in any processing.</p>
Cheque Date	<p>[Mandatory, dd/mm/yyyy] The cheque date from the calendar, which is present on the instrument. This date has to be less than or equal to current posting date. This date is used in checking validity of the instrument. Instruments become stale if the cheque date is prior to the current posting date by the stale period (defined in the Settlement Bank Parameters option).</p>
Routing No.	<p>[Mandatory, Numeric, 9] The routing number against which the cheque has been drawn. The routing number is a combination of the bank code, the branch code and the sector code from where the instrument was drawn. The combination can be obtained from the Routing Branch Maintenance option.</p> <p><i>Routing Number = Sector Code / Bank Code + Branch Code</i></p> <p>For a deposited cheque, this routing number is used by the system to determine the float days and thus the value date of the instrument. For an inward clearing cheque, this routing number should belong to the bank. The order, in which the codes in the routing number are to be</p>

entered, is determined by the set up using the **Settlement Bank Parameters** option.

Bank	[Display] The bank name to which the cheque belongs, corresponding to the bank code extracted from the routing number.
Branch	[Display] The branch name from where the cheque is drawn, corresponding to the branch code and bank code extracted from the routing number.
Drawer Acct No.	[Mandatory, Numeric, 16] The drawer account number is the account number of the person who has issued the cheque. The drawer account, generally printed on the cheque leaf is the account from where the funds will come into the beneficiary account. If the cheque is drawn on a different bank, the drawer account number will not be validated by the system. If the cheque is drawn on your own bank, the system will validate the drawer account number for its correctness.
Value Date	[Display] The value date of the cheque. When a cheque is deposited on an account, the system uses the routing number to check the float days from the Endpoint Float Maintenance option and the working days from the Calendar for End Point option to generate the value date of the cheque. The value date is the date on which the cheque is expected to be cleared. On the value date, the system updates the customer's available balance and credits the account with the cheque amount and reduces the un-cleared funds on the account. For more information on maintaining value date, refer to the Clearing Definitions chapter in the <i>Definitions User's Guide</i> .
Sector	[Display] The clearing sector name to which the cheque branch belongs, corresponding to the sector code extracted from the routing number. Sector Codes are defined using Sector Master option.
Late Clearing	[Display] The values Y or N for late clearing. The options are: <ul style="list-style-type: none">• Y - If the late clearing is marked• N - If the late clearing is not marked <p>This field displays Y when a customer deposits a cheque after the clearing cut-off time is over, for current posting date for the selected clearing type.</p> <p>The instruments that are deposited in late clearing will be considered as 'Late for clearing'. Such instruments will be treated as deposit for the next working date for all value date calculation.</p>
Chg Commission	[Display] This field is currently not used in any processing.

Examples of calculating the penalty for a Partial Payoff transaction:

Following are the options or methods of calculating the Penalty Interest for a Partial Payoff transaction:

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

Assume a Loan account with the following status :

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
PPF Penalty Rate	5%
Total Arrears	INR 22820.00
Partial Payoff amount paid	INR 46000.00

The arrears will first be appropriated against the payment of INR 46000.00 i.e. $46000 - 22820 = \text{INR } 23180.00$ - Assuming Partial Payoff Penalty @ 5% (Amount Based method) will be calculated as $23180 * 5/105 = \text{INR } 1103.81$

The residual amount of the Partial Payoff less the Penalty amount (A-B) will be appropriated against the principal Outstanding – i.e. $23180 - 1103.81 = \text{INR } 22076.19$

On Amount + Term - Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest

Assume a Loan account with the following status

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
PPF Penalty Rate	5%
Total Arrears	INR 22820.00
Partial Payoff	INR 46000.00

The appropriation will be done as under

The arrears will first be appropriated against the payment of INR 46000.00 i.e. $46000 - 22820 =$ INR 23180.00 - Assuming Partial Payoff Penalty @ 5% (Amount + Term Based method assuming the total term of the loan was 60 months and the balance amount is 42 months, the rate discounting factor is $42/60 = 0.7$ and the rate is $5 * 0.7$ i.e. 3.5%) Thus the calculation will be $23180 * 3.5 / 103.5 =$ INR 783.86

The residual amount of the Partial Payoff less the Penalty amount (A-B) will be appropriated against the principal outstanding – i.e. $23180 - 783.86 =$ INR 22396.14

To inquire on loan partial payoff

1. Type the account number and press the **Tab** key.
2. Select the penalty method and type the penalty rate.
3. Select the appropriate option from the **Partial Payoff Mode** list.
4. Click **OK**.
5. Depending up on the option selected from **Partial Payoff Mode** list, the system displays the relevant transaction screen.
6. Enter the relevant information and click **OK**.
7. The system displays the message "Authorisation Required."
8. Click **Continue**.
9. The system displays the **Authorization Reason** screen.
10. Enter the relevant information and then click **Grant**.
11. The system displays the transaction sequence number message box. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

Note: For information on Denomination Detail, Instrument Detail, Cheque Detail and Authorization transactions, refer to the **FLEXCUBE Introduction User Manual**.

3.3 ALM36-Agri Loan Stop Cheque Instructions

The **Agri Stop Cheque Instructions** option allows you to stop a cheque that has been issued or lost.

Access

- Task Code: ALM36
- Front Office Transactions > Account Transactions > Agri Loan Account Transactions > Other Transactions > Agri Loan Stop Cheque Instructions

Definition Prerequisites

Not Required

Modes Available

Modify, Cancel, Amend, Authorize, Enquiry, Copy

To stop a cheque:

1. In the **Dashboard** page, Enter the Task Code **ALM36** and then click  icon.
2. You will be navigated to **Agri Stop Cheque Instruction** screen.
3. Click **Add**.
4. In the Account Number field, enter the account number.
5. Select the **cheque start number and end number** from the search list.
6. Enter other required details.
7. Click Lost or stop option.
8. Click **OK** to stop a cheque.

Field Description

Field Name	Description
------------	-------------

Account Number	[Mandatory, Numeric, 16] Enter the loan account number for which the document status is to be maintained.
Customer Name	[Display] Displays the short name of the primary customer of the Loan account. This field is non-editable.
Cheque Start Number	[Mandatory, Numeric, 12] Enter the start number of the cheque.
Cheque End Number	[Mandatory, Numeric, 12] Enter the end number of the cheque. The start number and the end number of the cheque will determine the range of cheques. If a single cheque is to be stopped, the start number and end number will be the same.
Amount	[Optional, Numeric, 13, Two] Enter the amount of the stopped cheque. This will be the consolidated amount, if more than one cheque is stopped for payment.
Cheque Beneficiary Name	[Mandatory, Alphanumeric, 120] Enter the name of the beneficiary of the cheque.
Reason	[Mandatory, Alphanumeric, 120] Enter the reason for the stop cheque request.
Stop Cheque Date	[Mandatory, Date editor, dd/mm/yyyy] Select the stop cheque date from the date editor. This is the date on the cheque, which is stopped.
Stop Cheque Instruction Date	[Display] Displays the stop cheque instruction date and time. This is the date on which the customer issues the instruction to stop the cheque.
SC Waiver	[Optional, Check Box] Select this option to waive the service charges for the stop cheque instruction issued by the customer.
Stop Cheque	[Mandatory, Radio Button] Select the appropriate stop cheque option. The options are: <ul style="list-style-type: none"> • Lost • Stop
Maintained On	[Optional] This is the process date on which the instruction to stop the cheque is maintained.

3.4 ALM37-Agri Loans Cheque Book Issue Maintenance

The **Agri Loan Cheque Book Issue Maintenance** option allows you to maintain and issue cheque books.

4. Loan Closure

4.1 1730- Agri Loans Refund Enquiry

Using this option you can refund the excess balance of a loan account that shows credit balance after the outstanding is cleared by the customer, Further, the loan account having the credit balance should be over and above the small balance forfeiture amount set in the product level.

In such case the loan account will not be closed, till the refund is made. Once the refund is made, system will pass the necessary GL entries and mark the loan account as closed. The bank can refund the credit balance in the loan account by Cash mode or by transferring the amount to the customer's CASA account.

Definition Prerequisites

Other Prerequisites

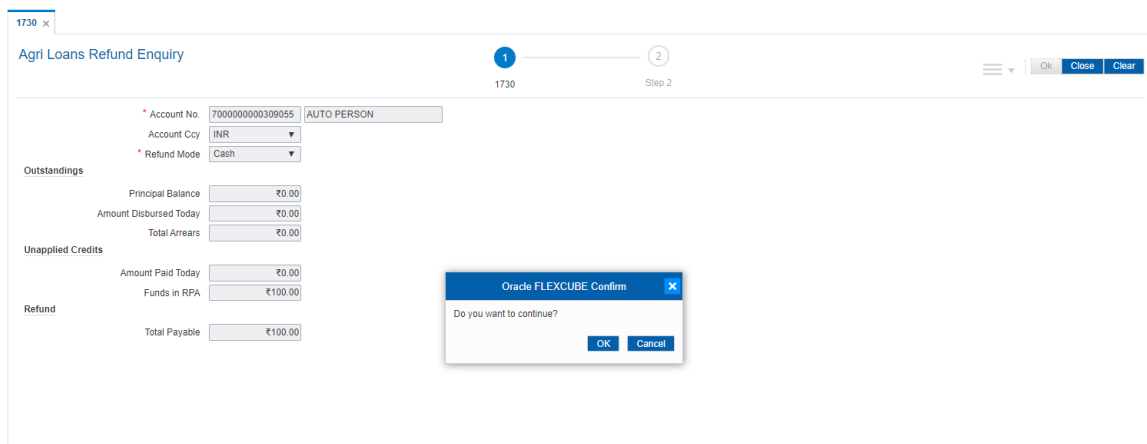

Modes Available

Not Applicable

To refund loan amount

1. In the **Dashboard** page, Enter the Task code **1730** and then click  or navigate through the menus to **Front Office Transactions > Account Transactions > Agri Loan Account Transactions > Enquiries > Agri Loans Refund Enquiry**
2. You will be navigated to **Agri Loans Refund Enquiry** screen.

Agri Loans Refund Enquiry

The screenshot shows the 'Agri Loans Refund Enquiry' interface. At the top, there are step indicators for '1730' and 'Step 2'. The form contains the following fields:

- Account No.: 7000000000309055 (AUTO PERSON)
- Account Ccy: INR
- Refund Mode: Cash

Outstandings:

- Principal Balance: ₹0.00
- Amount Disbursed Today: ₹0.00
- Total Arrears: ₹0.00

Unapplied Credits:

- Amount Paid Today: ₹0.00
- Funds in RPA: ₹100.00

Refund:

- Total Payable: ₹100.00

A confirmation dialog box is overlaid on the screen, asking 'Do you want to continue?' with 'OK' and 'Cancel' buttons.

Field Description

Field Name	Description
Account No.	[Mandatory, Numeric, 16] Type the loan account number of the customer who is eligible to receive the excess credit refund amount. The short name of the account holder is populated adjacent to the account number.
Account Ccy	[Display] The field displays the currency assigned to the product, under which the account is opened.

All the entries posted in the account are in the account currency.
For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.

Refund Mode [Mandatory, Drop-Down]
Select the refund mode from the drop-down list.
The options are:

- Cash
- CASA Transfer

Outstandings

Principal Balance [Display]
This field displays the actual principal balance of loan, as on the date of the refund. Ideally this field should have NIL value.

Amount Disbursed Today [Display]
This field displays the amount that is disbursed on the current date, if the loan is disbursed on the current date, i.e., on the date of Loans Refund Enquiry.

Total Arrears [Display]
The field displays the total arrears due on the date of Loans Refund Enquiry. Ideally this field should be NIL value.

Unapplied Credits

Amount Paid Today [Display]
This field displays the amount paid today into the loan account by way of installment payment, advance payment, partial payoff, or standing instruction from CASA account.

Funds in RPA [Display]
This field displays the funds in RPA.
RPA stands for "Repayment Pending Appropriation". In loans module any amount paid towards repayment of the loan is first credited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.

Refund

Total Payable [Display]
This field displays the excess refund amount payable to the customer.

Screen Description

The above screen is used to refund the loan to the customer if there is any excess balance at the time of closure. It must be noted that the excess in the account must exceed the forfeiture amount defined. Once the account number is updated, the mode of repayment may be selected from the drop down menu. The Total Payable under Total Refund is what will be paid to the customer.

Exercise

Make an excess payment towards closure and then use this screen to refund the customer.

3. Type the account number and press the **Tab** key.
4. Select the refund mode from the list for loan refund by cash.

Agri Loans Refund Enquiry

5. Click **OK**.
6. The system displays the message "Do You want to continue?" Click **OK**.
7. Depending on the option selected the system displays the relevant transaction screen.

Loan Excess Refund By Cash - 1731

Field Description

Field Description

Field Name	Description
CASA Acct No.	[Mandatory, Numeric, 16] Type the provider CASA account number to which the funds will be transferred towards the Loan Refund.
CASA Acct Ccy	[Display] This field displays the currency assigned to the product under which the provider CASA account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a CASA product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.
Agri Acct Ccy Rate	[Display] This field displays the rate of conversion used for converting the loan account currency to the local currency of the bank. The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the account currency and the local currency are same, the field takes the default value as 1, which cannot be modified.
CASA Acct Ccy Rate	[Display] This field displays the rate at which the CASA account currency is converted to the local currency of the bank. The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the account currency and the local currency are same, the field takes the default value as 1, which cannot be modified.
Refund Amount	[Display] This field displays the refund amount payable to the customer. This amount is in the currency of the loan account.
Txn Amount	[Display] This field displays the transaction amount. The refund amount payable to the customer is calculated and displayed in the currency of the transaction.
User Reference No.	[Optional, Alphanumeric, 30] Type the user reference number. The user reference number is assigned to identify the transaction. This field is enabled or disabled depending on the profit booking being enabled or disabled for the particular transaction.
Narrative	[Mandatory, Alphanumeric, 40] Type the narration. The default narration, based on the transaction is displayed.

9. Click **OK**.
10. The system displays the relevant transaction screen depending on the option selected.
11. Enter the relevant information and click **OK**.

12. The system displays the transaction number. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

Note: Depending on the set up, there will be validation that the customer of the Debit account and the customer of the Credit should have the same Customer ID.

4.2 1690-Agri Loan Full Payoff Enquiry

The balance loan outstanding amount can be refunded by the customer in full by Cash, transfer from CASA or GL Transfer by using this option. Full payoff indicates that the loan account is being settled and closed before the term of the loan ends. The bank may charge some penalty for such early settlements.

At the time of EFS, system calculates the interest and arrears (IOA interest) due till date. The EFS closure date is always taken as the Value date. Banks may require the customer to provide sufficient notice prior to full payoff of the Loan account. The payoff notice period is set in the **Product Master Maintenance** option. In case an EFS notice has been given then the end of notice period is taken as the EFS date. Else in case EFS is done without notice no account is taken of the notice period.

Once final settlement is made, the system marks the account as closed today. The system then passes the GL entries and closes the account in EOD. No further transactions or processing will occur on this account.

Revolving Type of Agri Loans (Those loans which are maintained as Revolving Type 'Immediate' or Yearly' in ALM21) can be closed online during Full Payoff Enquiry post authorization, if there are no Credit Balance present in Agriculture Loan account and Total Due to be paid by customer is zero.

Field Description

Field Name	Description
Account No.	<p>[Mandatory, Numeric, 16] Type the appropriate account number for which the early/final settlement of the loan is to be made. The name of the loans account holder is populated adjacent to the account number. This is a numeric field and can hold up to 16 digits. This field is mandatory.</p>
Account Ccy	<p>[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries posted in the account are in the account currency. The exchange rate values must be defined and downloaded. For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default. This field is non-editable.</p>
Penalty Method	<p>[Mandatory, Drop-Down] A bank may choose to charge a EFS penalty. This penalty is set up as an interest rule and attached to the stage at which the penalty is to be charged. This is the method to be used to charge penalty for Early/Final Settlement¹ of the loan. The teller can select from anyone of the following options. The options are:</p> <ul style="list-style-type: none"> • On Amount – The penalty is will be charged as x% of the outstanding principal amount. • On Amount and Term – The penalty is will be charged as x% of the Outstanding principal amount for the remaining period. • Waive – The penalty is waived. <p><i>* Examples of calculating the penalty is mentioned at the end of Full Payoff option</i></p>
Penalty Rate	<p>[Mandatory, Numeric] The penalty rate for the early/final settlement is displayed. The EFS penalty rate gets defaulted from the Schedule Type Definition option (Task Code: LNM98) attached to the product under which the loan account exists. This rate cannot be modified. This field is disabled if the penalty method is selected as Waive.</p>
Settlement Mode	<p>[Mandatory, Drop-Down] Multiple repayment modes are possible for Loan EFS. However, the modes are validated against the parameters defined at the Loans Product Master Level option (Task Code: LNM11). Following are the EFS modes of payment. The options are:</p> <ul style="list-style-type: none"> • Cash • CASA Transfer • GL Transfer

¹It is the liquidation of the loan account on or after maturity date by paying the final installment due.

Value Date	[Display] Displays the process date and is disabled. By default, the current date is displayed.
Outstanding	
Principal Balance	[Display] The actual principal balance on the date of early or final payoff considering if all dues were paid on time is displayed. This field is non-editable.
Total Arrears	[Display] The field displays the total arrears due on the date of EFS excluding Unbilled Interest+ Penalty interest. <i>Total Arrears = principal arrears + interest arrears + fee arrears + legal fee arrears + premium arrears + outgoing arrears + penalty arrears</i>
Unbilled SC	[Display] Displays the unbilled SC if any.
Unbilled Interest	[Display] Unbilled Interest is the interest accrued on the loan account from the last interest charging date till the current date i.e. the date of partial repayment of loan. This field is non-editable.
Upto	[Display] The system generated date up to which unbilled interest is calculated is displayed. This field is non-editable.
Unbilled Penalty Interest	[Display] Unbilled Penalty Interest is the interest accrued on the loan account from the last penalty charging date till the current date. The Unbilled penalty interest till date, due to late payment of arrears on the account is calculated online. This field is non-editable.
Upto	[Display] The system-generated date up to which the Unbilled penalty interest is calculated is displayed. This field is non-editable.
Unbilled Penalty Fee	[Display] In case any unbilled penalty charges/Fees in the schedule is attached to the loan account the same is calculated and displayed.
Upto	[Display] The system-generated date up to which the penalty charges are calculated. By default, the system displays the process date.
Unapplied Credits	
Amount Paid Today	[Display] The amount paid, on the current date, into the loan account by way of installment payment or partial payoff is displayed here.

Funds in RPA [Display]
RPA stands for "Repayment Pending Appropriation". In loans module any amount paid towards repayment of the loan is first credited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.

Settlement

Prepayment Charges [Display]
The prepayment charges based on the penalty method selected is displayed. This field will be blank if **Waive** option is selected in the Penalty Method.
If the **On Amount** option is selected from the **Penalty Method** drop-down list, the system calculates the prepayment penalty on the amount being paid towards the principal after all current arrears are paid at the specified penalty rate.
If the **On Amount & Term** option is selected from the **Penalty Method** drop-down list, the system calculates the prepayment penalty on the amount being paid towards the principal after all current arrears are paid from date of full payoff to the maturity date of the loan.
If the **Waive** option is selected from the **Penalty Method** drop-down list, the value in this field will be zero.

Upto Maturity Date [Display]
The maturity date of the loan will be displayed. The penalty will be calculated from the date of the EFS upto the Maturity Date displayed in this field.

Total Due [Display]
The total amount payable by the customer.
$$\text{Total Due} = \text{Total arrears (Installment Arrears + Penalty Arrears)} + \text{UnBilled Penalty Interest} + \text{Unbilled Interest} + \text{Unbilled SC} + \text{Unbilled Penalty Fee} + \text{DND} + \text{Prepayment charges} + \text{Principal Balance}$$

Agri Loan EFS By Cash - 1691

EFS can be made by Cash mode. The cash payment for an account will update the teller balance in that currency. The payment may be in a currency different from the account currency.

Agri Loan EFS By CASA Transfer - 1692

EFS by transfer from a CASA account can be performed. The system validates that the CASA account entered is a valid account, without a block or debit block status. If the account is a liability account, system will not allow the account to go into debit balance. The CASA account gets debited to the extent of the EFS amount and the same can be seen in the CASA statement Enquiry.

Loan Acct Ccy Rate	[Display] This field displays the rate of conversion used for converting the loan account currency to the local currency of the bank. The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the local currency and the account currency are the same, the field takes a default value as 1, which cannot be modified.
GL Acct Ccy Rate	[Display] This field displays the rate at which the CASA account currency is converted to the local currency of the bank. The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the account currency and the local currency are same, the field takes the default value as 1, which cannot be modified.
Future Interest Charged #	[Conditional, Numeric, 13, Two] Type the quantum of the future interest amount, to be booked at the time of EFS to interest income GL. The future interest amount is calculated as follows: <i>Future Interest = Total of all future interest installments that will be due after the value date - uncollected interest.</i> The value in this field can be reduced to zero but it cannot be more than the current value in the field.

This field is enabled only if the **Add On Loan** check box is selected in the **Loan Product Master** (Task Code: LNM11) option (Syariah Loans).
 For Non-Syariah term loans this field will display zero value and will not be available for modifications even after the user chooses to continue with EFS.

Interest Waived	[Display] This field displays the future interest amount reduced by the user in the adjacent field.
EFS Amount	[Mandatory, Numeric, 13, Two] Type the amount that will be paid as full settlement of the loan. This amount will be in the same currency as that of the loan account. It is inclusive of the future interest amount.
GL Acct Amount	[Display] This field displays the amount that will be debited from the provider CASA account, for the final settlement of the loan.
Narrative	[Optional, Alphanumeric, 40] Type the narration. The field displays the default narration, based on the transaction.

To payoff full loan account

1. Type the account number and press the **Tab** key.
2. Select the settlement mode from the drop-down list.
3. Click **OK**.
4. The system displays the relevant transaction screen depending on the settlement mode selected.
5. Enter the relevant information and click **OK**.

Note: For information on Denomination Detail, Instrument Detail, Cheque Detail and Authorization transactions, refer to the **FLEXCUBE Introduction User Manual**.

** Examples of calculating the penalty for a Early or Final Settlement (EFS) Transaction:*

Following are the options or methods of calculating the Penalty Interest for a EFS transaction:

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Assume a Loan account with the following status:

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
EFS Penalty Rate	5%

Thus, the total arrears is INR 22820.00

Assuming all the above arrears i.e. INR 22820 is paid the balance principal amount after repayment of Principal arrears will be
120000 less 20000 = INR 100000

Penalty will be calculated on the net amount of principal which is to be closed prematurely – i.e. INR 100000

Assuming EFS Penalty @ 5% (Amount Based method) will be calculated as $100000 * 5 / 100 = \text{INR } 5000$

On Amount + Term - Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Assume a Loan account with the following status:

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00

Other Arrear : INR 120.00 (also includes Interest arrear till date)

EFS Penalty Rate 5%

Thus, the total arrears is INR 22820.00

Assuming all the above arrears i.e. INR 22820 is paid the balance principal amount after repayment of Principal arrears will be
120000 less 20000 = INR 100000

Penalty will be calculated on the net amount of principal which is to be closed prematurely – i.e. INR 100000

Assuming EFS @ 5% (Amount + Term Based method assuming the total term of the loan was 60 months and the balance term is 42 months, the rate discounting factor is $42/60 = 0.7$

Thus the calculation will be $100000 * 5\% * 0.7 = \text{INR } 3500$

Loan Account Ccy Rate	[Display] This field displays the loan account currency rate for the transaction amount.
GL Acct Ccy Rate	[Display] The rate at which the GL account currency is converted to the local currency of the bank. The teller's right to change the GL account currency rate is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. If the GL account currency and the local currency are same, the field takes the default value as 1, which cannot be modified.
GL Account No.	[Mandatory, Numeric, Nine, Pick List] Type the GL account number or select it from the pick list.
Penalty Method	[Mandatory, Drop-Down] A bank may choose to charge a partial payoff penalty. This penalty is set up as an interest rule and attached to the stage at which the penalty is to be charged. This is usually applied in the regular stage of the loan. This is the method to be used to charge penalty for early repayment of the loan. The teller can select from anyone of the following options: On Amount Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest On Amount + Term Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest Waive Penalty is waived
GL Acct Amount	[Display] This field displays the amount that will be debited to the GL account towards Partial Payoff repayment of the Loan in GL currency. The amount will be calculated in the GL account currency.
Account Amount	This field is non-editable. [Display] [Display] This field displays the amount, in Loan account currency, which will be credited to the loan account. The account amount is derived as follows : $\text{Account Amount} = \text{Txn Amount} * \text{Txn Ccy Rate} / \text{Acct Ccy Rate}$ The amount will be calculated in the account currency. The system posts the entries to the accounts in the account currency. If the local currency of the bank is different from the account currency of the customer, the amount entered in the Txn Amount field is converted to the account currency at the specified exchange

rate.

If the currency of the local bank and the account currency are the same, the amount in the Txn Amount field and the Account Amt field will be the same.

Account currency is the currency assigned to the product at the product level, under which the account is opened.

If the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency

**Reference
No**

[Mandatory, Alphanumeric, Nine]

The user has to input the reference number when the transaction is done for the implemented GL screen.

**Recon Serial
No.**

[Mandatory, Alphanumeric, text box]

The user has to input the Recon Serial No.

Narrative

[Display]

The default narration, based on the transaction.

The user can change the narration, if required.

9. Click the **Ok** button.
10. The system displays the message "Authorization Required. Do you want to continue?". Click the **Ok** button.
11. The system displays the **Authorisation Reason** screen.
12. Enter the relevant information and click the **Grant** button.
13. The system displays the transaction sequence number message box. The transaction number is system generated and it uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

5.2 7066 - Agri Loan Balance Enquiry

Using this option you can inquire about loan account details such as account status, the maturity date (final date of installment) and the next installment date. For the given account, loan account outstanding, arrears details, uncleared funds and available balance are also displayed.

In addition the screen also displays the arrears postponed details and unapplied credit details.

Definition Prerequisites

- AL057- Agri Loan Direct Account Opening

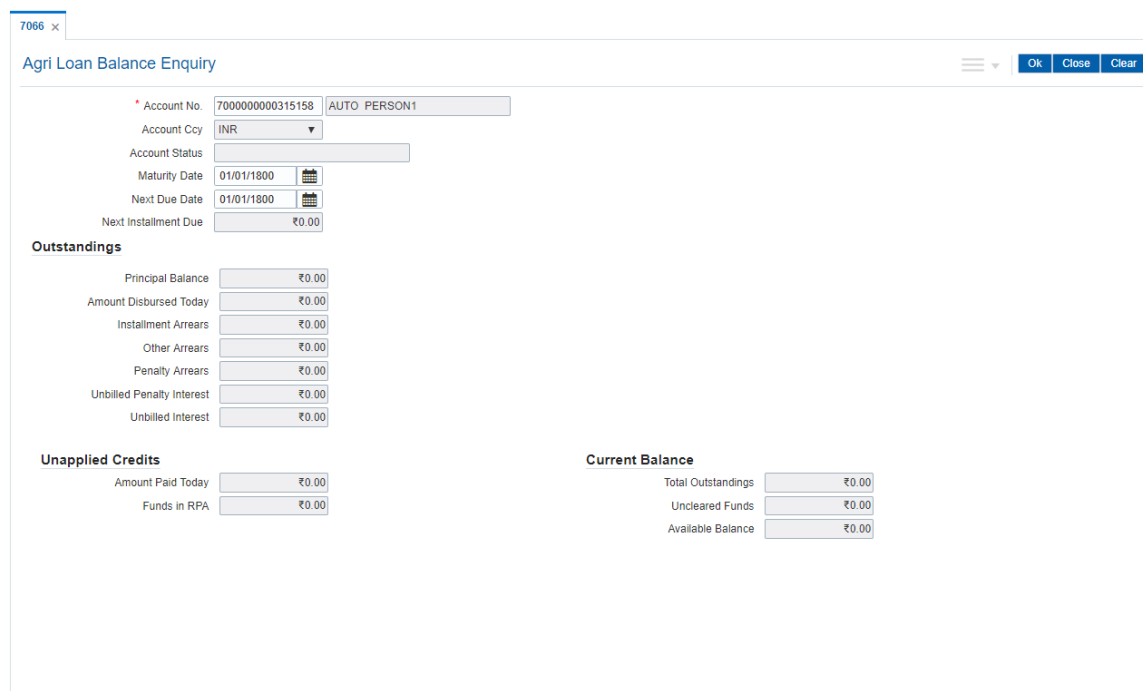

Modes Available

Not Applicable

To inquire balance of the Agri loan account

- In the **Dashboard** page, Enter the Task code **7066** and then click  or navigate through the menus to **Front Office Transactions > Account Transactions > Agri Loan Account Transactions > Enquiries > Agri Loan Balance Enquiry**.
- You will be navigated to **Agri Loan Balance Enquiry** screen.

Agri Loans Balance Enquiry

Field	Value
Account No.	700000000315158
Account Ccy	INR
Account Status	
Maturity Date	01/01/1800
Next Due Date	01/01/1800
Next Installment Due	₹0.00
Principal Balance	₹0.00
Amount Disbursed Today	₹0.00
Installment Arrears	₹0.00
Other Arrears	₹0.00
Penalty Arrears	₹0.00
Unbilled Penalty Interest	₹0.00
Unbilled Interest	₹0.00
Amount Paid Today	₹0.00
Funds in RPA	₹0.00
Total Outstandings	₹0.00
Uncleared Funds	₹0.00
Available Balance	₹0.00

Field Description

Field Name	Description
Account No.	[Mandatory, Numeric, 16] Type the appropriate loan account number for which you want to view the loan account balance. The name of the Loan account holder is populated, adjacent to the account number.
Account Ccy	[Display]

This field displays the currency assigned to the product at the product level, under which the account is opened.

All the entries posted in the account are in the account currency. The exchange rate values must be defined and downloaded.

For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.

Account Status

[Display]

This field displays the status of the loan account.

The options are:

- Closed
- Blocked
- Closed Today
- Open Today
- Dormant
- Regular
- Written Off
- Paid Off
- Cheque Pending Settlement
- Product Transferred Out
- Transferred Out

Maturity Date

[Optional, Date editor]

Select the final date for installment payment for the loan, i.e., the date on which the loan account will mature.

Next Due Date

[Optional, Date editor]

Select the next due date from the current system date for payment of the loan installment.

Next Installment Due

[Display]

This field displays the next installment amount which will be due as per the next due date.

Outstandings

Principal Balance

[Display]

This field displays the principal balance on the date of Loan balance Enquiry if all dues were paid on time. In other words the amount displayed will be the schedule balance as on the date of Enquiry not including any unpaid arrears.

Amount Disbursed Today

[Display]

This field will display the amount that is disbursed on the current date, if the Loan balance Enquiry is done on the date when the loan was disbursed.

Installment Arrears

[Display]

This field displays the total installment arrears that are Outstanding in the loan account. Installment arrears will comprise of only the Principal and Interest arrears.

Installment Arrears = Principal + Interest

Other Arrears	[Display] This field displays the other arrears to be paid in the account. Other arrears would include arrears like Fee arrears, Premium arrears, Outgoing arrears, Legal fee arrears, etc.
Penalty Arrears	[Display] This field displays the penalty interest amount due on the loan account for the non-payment of the dues.
Unbilled Penalty Interest	[Display] This field displays the unbilled penalty interest amount. Unbilled Penalty Interest is the penalty interest accrued on the loan account from the last penalty charging date till the current date. The same is calculated online as on the date of loan balance Enquiry.
Unbilled Interest	[Display] This field displays the unbilled interest amount.
Unapplied Credits	
Amount Paid Today	[Display] This field displays any amount paid today, i.e., current date into the loan account by installment payment, advance payment, partial payoff or standing instruction.
Funds in RPA	[Display] This field displays the amount in RPA GL. Any amount which is paid to the credit of the loan account is always routed or credited to the RPA account. The same is appropriated at EOD. If the amount paid into the loan account is in excess of the arrears due, the credit balance will be reflected in RPA. RPA is a liability type GL. Generally Loan Advance Payment amounts are shown in RPA.
Current Balance	
Total Outstanding	[Display] This field displays the total of all the Outstanding in the loan account. <i>Total Outstanding = Principal Balance + Installment Arrears + other Arrears + Penalty Arrears - Amount Paid Today - Funds in RPA + Penalty Interest Accrued + Unbilled Compounding Interest</i>
Uncleared Funds	[Display] This field displays the uncleared funds. Any amount paid by clearing cheque by the customer into the loan account, but pending clearance of the cheque, such unclear cheque deposit amounts are displayed in this field.
Available Balance	[Display] This field displays the available balance. This field indicates the available balance in the cash card, i.e., Revolving loan.

Screen Description

The above screen displays the current Outstanding loan amount of the customer. It also displays arrears till date and any advance payment in the reserve pending appropriation general ledger.

Example

View the account details of an account opened by you. It would be preferable to use an account with arrears so that you may be able to view the arrears for the account.

3. Enter the account number and press the **Tab** key.
4. Click **OK**.
5. You can view loan account balance details.
6. Click **Close**.

5.3 9550 - Misc Agri Loan Debit

Using this option you can debit agri loan account and credit GL account in case an incorrect payment is made on a loan account.

Definition Prerequisites

- AL057- Agri Loan Direct Account Opening
- [AL521- Agri Loan Setup Account Schedule/Disbursement](#)

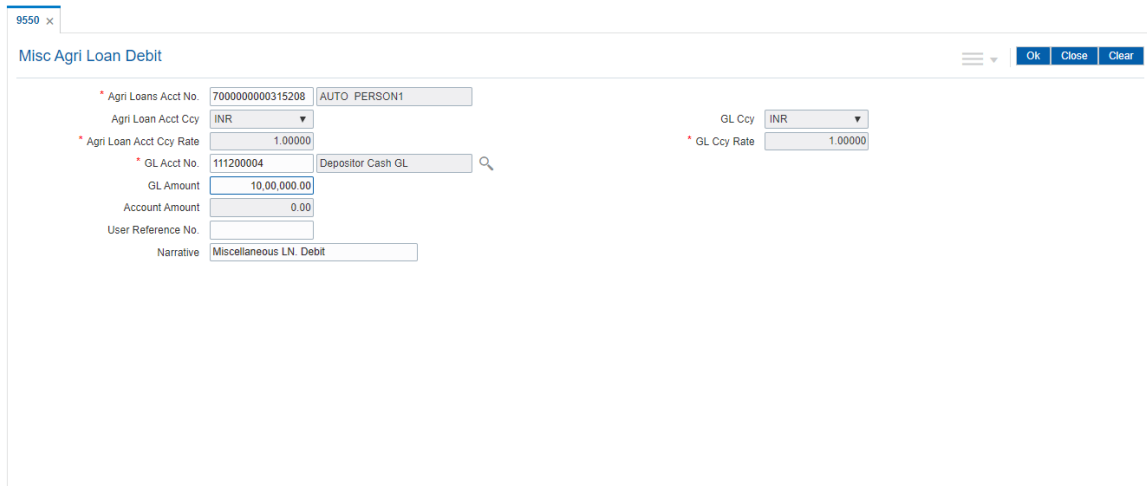

Modes Available

Not Applicable

To do Miscellaneous Agri Loan Debit

1. In the **Dashboard** page, Enter the Task code **9550** and then click  or navigate through the menus to **Back Office Transactions > Agri Loan > Misc Agri Loan Debit**.
2. You will be navigated to **Misc Agri Loan Debit** screen.

6.2 AL063 - Agri Loan Single Account Transfer

AL063 - Agri Loan Single Account Transfer will be developed to convert agri loan account and used for conversion of agri loans.

Definition Prerequisites

- 8053 - Customer Addition
- 7101 - IC No - Short Name Change

Modes Available

Add, Cancel, Amend, Authorized, Enquiry

To Enquire the arrear repaid by the customer

1. In the **Dashboard** page, Enter the Task code **AL063** and then click  or navigate through the menus to **Back Office Transactions > Agri Loans > Agri Loan Single Account Transfer** option.
2. You will be navigated to the **Agri Loan Single Account Transfer** screen.

Agri Loan Single Account Transfer

The screenshot displays the 'Agri Loan Single Account Transfer' form. At the top, there is a breadcrumb trail: 'AL063 x Agri Loan Single Account Transfer'. Below this, there are several tabs: 'Account Info', 'Charging and Balance Info', 'SKCC/OD Limit Validity In Force', and 'CRR History'. The 'Account Info' tab is selected. The form is divided into several sections:

- Customer Info:** Includes fields for Search Criteria (dropdown), ID (text), Full Name (text), Search String (text with magnifying glass), IC (text), and Short Name (text).
- Account Info:** Includes fields for New Account No (text with magnifying glass), Transferor Branch: CBS Branch (checkbox), Old Account No (text with magnifying glass), Account Opening Date (calendar, 15/12/2018), Sanction Term (Months) (text), Maturity Date (calendar, 15/12/2018), Account Conversion Date (calendar, 15/12/2018), Sanction Amount (text, 0.00), Net Product Penalty Rate (text), Rate Definition (dropdown), Accrual Status (dropdown), Account Level Variance (text, 0.00000), Crop Loans (checkbox), Crop Type (text with magnifying glass), Review Period (text), and Last PAIS Date (calendar, 15/12/2018).
- Other Details:** Includes Branch (text with magnifying glass), Branch Code (text with magnifying glass), Product Code (text with magnifying glass), Schedule Type (text with magnifying glass), First Instalment Due Date (calendar, 15/12/2018), First Disbursement Date (calendar, 15/12/2018), Disbursed Amount (text, 0.00), Net Product Rate (text), Tier Criteria (dropdown), Account Status (dropdown, Account Open), Post GL Entry (checkbox), Season (dropdown), and Review Date (calendar, 15/12/2018).

Field Description

Field Name	Description
Customer Info	
Search Criteria	<p>[Mandatory, Drop-Down] Select the search criteria to search for the customer from the drop-down list. The options are:</p> <ul style="list-style-type: none"> • Customer Short Name • Customer IC: Customer Identification criteria (IC) arrived at by the bank during customer addition. • Customer ID: Unique identification given by the bank
Search String	<p>[Mandatory, Alphanumeric, 20, Pick List] Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field. If the Customer Id option is selected from the Search Criteria drop-down list, then the search string accepts 10 numeric characters. If the search criterion is specified as customers' short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list. For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>
ID	<p>[Display] This field displays the ID of the customer. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
IC	<p>[Display] This field displays the identification code of the customer. A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate, or corporate registration can be used as a customer IC.</p>
Full Name	<p>[Display] This field displays the full name of the customer who holds the loan account..</p>
Short Name	<p>[Display] This field displays the short name of the customer. The short name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option. The customer short name can be changed through the IC No – Short Name Change (Fast Path: 7101) option.</p>

6.3 AL444 - Agri Loans Misc Charges Waiver

Miscellaneous charges can be waived using the Miscellaneous Charges Waiver option. These charges are arrears that have been raised on the account, which are still pending payment. Payment pending may be part or all of arrears assessed. The user can waive the entire amount due and cannot modify the due amount to be waived. There is no effect of miscellaneous charges waiver on principal outstanding. If miscellaneous charges are a part of interest base then the interest base gets updated accordingly and the interest base gets reduced by the waived amount. If miscellaneous charges are a part of Penalty interest base then the Penalty interest base gets updated accordingly and the Penalty interest base gets reduced by the waived amount. Miscellaneous charges once waived cannot be reversed.

Field Description

Field Name	Description
Account No.	[Mandatory, Numeric, 16] Enter the loan account number for which the charges are to be waived. If the loan account does not have any charges due the system will display message "No rows Found".
Customer Name	[Display] The name of the customer who holds the loan account will be displayed.
Branch	[Display] The name of the home branch where the loan account is opened and maintained is displayed.
Product	[Display] The product code along with the product description under which the loan account is opened is displayed.
Currency	[Display] The currency assigned to the product at the product level, under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.
Outstanding Balance	[Display] The total outstanding balance in the loan account is displayed. This amount is inclusive of the principal amount and other arrears, which are charged.

Column Name	Description
Ref Bill No.	[Display] The system generated reference bill number is displayed.
Arrear Type	[Display] The type of arrears, which were raised on the loan account and pending payment is displayed. For example, service charges, legal fees or outgoings.
Due Date	[Display] The due date i.e. the date on which the corresponding arrear type has been due is displayed.
Amount Assessed	[Display] The total arrears due from the customer is displayed.
Amount Due	[Display] The charges arrears that have not been paid by the customer. If the arrears have been partly paid the net amount for the corresponding arrear will be displayed. Else, the Assessed Amount will be shown as Amount Due. Amount Due = Total Arrears (Amount Assessed) -

arrears paid

Last Payment Due

[Display]

The date on which the arrears were raised and due is displayed.

Waive

[Mandatory, Toggle Status]

Double click this column to change the toggle status to **Y** to waive the miscellaneous charges.

The options are:

- Y – The charges are waived
- N – The charges are not waived

To waive miscellaneous charges for a loan account

1. Type the Account Number and press the **Tab** key.
2. The system displays the Agri Loans Misc Charges Waiver details.
3. Double-click the toggle status in the **Waive** column, corresponding to the miscellaneous charge that you want to waive for the loan account. The value is changed to **Y**.
4. Click **OK**.
5. The system displays the message "Authorisation Required".
6. The system displays the **Authorisation Reason** screen. The user with specific access rights can authorize the record.
7. Enter the relevant information and then click **OK**.
8. The system displays the message "Total No. Of arrears waived are 1".

Note: For information on Authorization transactions, refer to the [Oracle FLEXCUBE Introduction User Manual](#).

6.4 AL521- Agri Loan Setup Account Schedule/Disbursement

A schedule is a listing of the amounts of principal and interest, due dates, and balance after payment for a given loan.

The **Agri Schedule Setup** option allows you to setup the REV, EPI & FPI accounts schedule. (A detailed explanation of each of these loan schedules/stages have been given in the Installment Rules section of this document). Loan cannot be disbursed without the schedule set up..

Access

- Task Code: AL521
- Front Office Transactions > Account Transactions > Agri Loan Account Transactions > Other Transactions > Agri Loan Setup Account Schedule/Disbursement

Definition Prerequisites

- AL057- Agri Loan Direct Account Opening
- LNM98 - Loan Schedule Type
- BAM56 - Currency Code Maintenance

Other Prerequisites

- LNM43 - Installment Rules

Page 1 of 1 (1-2 of 2 items) | < 1 >

Field Description

Field Name	Description
Account No.	[Mandatory, Numeric, 16] Type the loan account number for which the schedule is being drawn. The system displays the name of the primary customer linked to the account adjacent to the field.
Branch	[Display] This field displays the branch code where the loan account is opened and maintained.
Product	[Display] This field displays the product under which the loan account has been opened.
Currency	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries are posted in the account in the account currency.
Schedule Type	[Display] This field displays the schedule code. The system displays the name of the schedule adjacent to the field.
Loan Term	[Display] This field displays the term of the loan in months.
Sanctioned Amount	[Display] This field displays the sanctioned loan amount.
Disbursed Amount	[Display] This field displays the disbursed amount. If the disbursement is done for the first time, the amount will be

displayed as zero. In case of multiple disbursements, this indicates the amount disbursed till date on that account.

The disbursed amount should be less than or equal to sanctioned amount.

Disbursement Date	[Display] This field displays the date on which the disbursement is being done.
Switch to Base/ MCLR Rate	[Optional, Checkbox] Select the checkbox. This checkbox will be enabled during first disbursement. User will be able to uncheck this flag if the account was opened under MCLR product. a. If the account was opened under an MCLR product, the checkbox 'MCLR account' will be checked by default. User can check the flag 'Switch to Base / MCLR rate'. User can select schedule with non-MCLR rate chart code. The checkbox 'MCLR account' will become unchecked, and account will be a non-MCLR account. b. If the account was opened under a non MCLR product, the checkbox 'MCLR account' will be unchecked by default. If during first disbursement, the product is converted to MCLR product, then user can check the flag 'Switch to Base / MCLR rate'. User can select schedule with MCLR rate chart code. The checkbox 'MCLR account' will become checked, and account will be an MCLR account. The flag 'Switch to Base / MCLR rate' will be disabled. c. If the account was opened under a non MCLR product, the checkbox 'MCLR account' will be unchecked by default. If during first disbursement, the product is still a non MCLR product, then the flag 'Switch to Base / MCLR rate' will be disabled.

Schedule Draw on [Display]
This field displays the date on which the schedule is drawn.

3. Enter the loan account number and press the **Tab** key.
4. The system displays the message "Please select correct schedule." Click **OK**. The system displays the **Schedule Definition** tab.
5. Click **Disbursement**. The system displays the **Disbursement Details** tab.

Disbursement Details

Note: The disbursement can be full or partial depending on the bank. The system displays a message if the disbursement is first and final. The disbursed amount cannot be more than the sanctioned amount.

Field Description

Column Name

Description

Stage No. [Display]
This column displays the serial number for the stages.
There can be a maximum of 99 stages defined for an account schedule.

Stage Name [Display]
This column displays the stage type attached to a loan account.
This is defined in at the Schedule Type definition under Global Definitions.

The options are:

- IOI
- EPI
- REV
- PMI
- FPI

Stage Start Date	<p>[Display]</p> <p>This column displays the start date for the corresponding stages. For the first stage, the start date will be the date of the first disbursement. For the remaining stages, it is the End Date of the previous preceding stage.</p>
Principal Amount	<p>[Display]</p> <p>This column displays the principal amount payable by the customer. This field is applicable only for IPI, EPI and FPI type of loans. If any debit type disbursement charges are levied at the time of disbursement, the same is added to the disbursed amount.</p>
Principal Payments	<p>[Display]</p> <p>This column displays the number of installments in which the principal is paid.</p> <p>For the IOI stage, the principal payments will be zero as in this stage, only the interest is repaid and not the principal.</p> <p>Based on this number, the system calculates the End Date column and the Stage Start Date column for the next stage.</p> <p>For the EPI stage, the sum of principal payments and interest payments are equal.</p>
Interest Payments	<p>[Display]</p> <p>This column displays the number of installments in which the interest on the loan amount is paid.</p> <p>The system calculates the number of interest payments, and it will be one less than the principal payment.</p> <p>For the IOI stage, the tenure will be defaulted from the schedule type definition, which can be modified.</p>
First Principal Due Date	<p>[Display]</p> <p>This column displays the first due date for the principal to be paid.</p> <p>For the IOI stage, this field is not applicable as only interest is repaid and not the principal.</p> <p>For the EPI stage, the first principal due date is same as the first interest due date. For the first stage, this is same as the Stage Start Date. For subsequent stages for the same stage name, it is calculated using First Principal Due Date and principal payments of previous stage. For the IPI stage, it can be different.</p> <p>Based on this date, the system calculates the End Date column and the Stage Start Date column for the next stage.</p>
First Interest Due Date	<p>[Display]</p> <p>This column displays the first due date for the interest to be paid.</p> <p>This date will be defaulted to the end of the month in case of calendar type of products. In case of anniversary type, it should be the same date or a greater date of the next month.</p> <p>For the EPI stage, this field is the same as First Principal Due Date column.</p>
Installment Amount	<p>[Display]</p> <p>This column displays the installment amount to be repaid by the customer in each stage. The installment amount is the sum of the principal and the interest component.</p>
Stage End Date	<p>[Display]</p> <p>This column displays the end date for the particular stage.</p>

The system calculates the stage end date, and it is one day less than the first interest due date.

The preceding end date is the start date for the next stage.

10. Click **Validate**. The system validates the entries.
11. Click **Generate Schedule**.
12. The system displays the **Schedule Details** tab.

Schedule Details

This tab displays the repayment schedule for the entire term of the loan. If the loan has more than one stage, then these stages will be updated with the installments and the term. The date of repayment will be the same as the disbursement date, as the installment is deducted at the time of first disbursement.

Field Description

Field Name	Description
Stage Type	
Stage No.	[Display] This field displays the stage number.
Name	[Display] This field displays the stage name.
Calender Base	[Display] This field displays the calendar base.
Installment Rule	[Display] The interest rule applicable for the stage. For more information, refer to the Maintaining Interest Rule option (LNM41).
Installment Type	[Display] This field displays the installment type applicable for the stage.
Stage Start Date	[Display] This field displays the start date of the stage.
Stage End Date	[Display] This field displays the end date of the stage.
Stage Details	
Principal Repay Amount	[Display] This field displays the principal repay amount.
No. Of Repayments	
Principal	[Display] This field displays the principal amount paid while repayment.
Interest	[Display] This field displays the interest paid while repayment.
Frequency	
Principal	[Display] This field displays the frequency of repaying the principal amount.
Interest	[Display] This field displays the frequency of repaying the interest.
Installment Amount	[Optional, Numeric] Enter the installment amount for the sanctioned loan.
First Repay Dates	
Principal	[Optional, Pick List, dd/mm/yyyy] Select the first repayment date of principal amount of the loan, from the pick list. This date should be greater than the current processing date. The system defaults the Next Charging Date as the first repayment

date. For EPI-BOP Loans, the first repayment date will be disabled during the first disbursement but will be enabled for modification during Reschedule.

FLEXCUBE will charge interest for the broken period as per the new repayment dates and then recover the interest from the first loan installment. Penalty accrual and charging will happen on the new charging dates .

Interest	[Conditional, Pick List, dd/mm/yyyy] Select the first repayment date for interest from the pick list. This date should be greater than the current processing date. This field is enabled for IPI type of loans. For IPI Loans, the first repayment date of principal and first repayment date of interest must be the same even if the repayment frequencies are different.
Term	[Display] This field displays the term. It is the total duration/period, in years and months, to repay the loan.
Compounding Frequency	[Optional, Dropdown] Select the Compounding Frequency from the dropdown list.

Reschedule Parameters

At loan account opening, the loan has a specific schedule of payments attached to it. During the life cycle of a loan, system calculates and charges installment based on this schedule. In case, the customer wants to reduce the amount of installment, or increase the amount of installment and reduce the term this can be done. This can also happen when the customer has been unable to repay the loan for some period of time, and the bank decides to restructure the loan by changing the schedule itself. Any type of loan can be rescheduled e.g.: EPI/ IPI / FPI etc.

The system validates that the loan account is in regular stage with disbursement stage complete.

Rescheduling cannot be done on the installment repayment date.

1. Enter the relevant information and then click **Compute ReSchedule**. The system displays the **Schedule Definition** tab.
2. Click **Validate**.
3. Click **Generate Schedule**.
4. The system displays the **Schedule Details** tab. Click **OK**.
5. The system displays the message "Authorization Required. Do You want to Continue?". Click **OK**.
6. The system displays the **Authorization Reason** screen.
7. Enter the relevant information and click **OK**.
8. The system displays the message "Schedule modification Successful". Click **OK**.

Deferment Option	[Mandatory, Radio Button] Click the appropriate deferment option. Deferment option is used to defer the loan for a specific term or for specific installment. The deferment options are: <ul style="list-style-type: none"> • Defer by specifying Term • Defer by specifying Installment
Term	
Year	[Conditional, Numeric, Four] Type the number of years for deferment. This field is enabled if the Defer by specifying Term option is selected from the Deferment Option field.
Months	[Conditional, Numeric, Four] Type the number of months for deferment. This field is enabled if the Defer by specifying Term option is selected from the Deferment Option field.
No. of Payments	[Conditional, Numeric, Four] Type the number of payments to be deferred. This field is enabled if the Defer by specifying Installment option is selected from the Deferment Option field.
Reason for Disbursement	[Optional, Text box] Enter the reason. Reason is the brief description for the deferment.
Comments	[Optional, Alphanumeric, 120] Type the comments.

3. Enter the relevant information and click **OK**. The system displays the **Schedule Definition** tab.
4. Click **Validate**.
5. Click **Generate Schedule**. The system displays the **Schedule Details** tab. Click **OK**.
6. The system displays the message "Authorization Required". Click **OK**.
7. The system displays the **Authorization Reason** screen.
8. Enter the relevant information and click **OK**.
9. The system displays the message "Schedule modification Successful". Click **OK**.

To disburse the user defined repayments

1. Type the loan account number and press the **Tab** key.
2. In the **Schedule Definition** tab, click the **User Defined Schedule** button. The system displays the **User Defined Repayment** tab

Revolving Account Structure

You can define the revolving account structure using this tab.

Field Description

Field Name	Description
Holiday Period (Due date of first installment dd/mm/yyyy)	[Input] Select the due date of first installment using the calendar.
Frequency	[Drop down] Select the frequency of installment. The options are: <ul style="list-style-type: none"> • Monthly • Quarterly • Half-Yearly • Yearly • 18 Months
Number of Installments	[Input, Numeric] Enter the number of installments required.
Comments	[Input, Alphanumeric] Enter any comments if required.

3. Click **Restructure**.
4. The system displays the message "Authorization Required". Click **OK**.
5. The system displays the **Authorization Reason** screen.
6. Enter the relevant information and click **OK**.

6.5 AL522-Agri Loan Account Schedule Enquiries

For an agri loan account, once the schedule is generated or after reschedule if the teller wants to view the account schedule, user can do so from this Enquiry.

The brief view of the different stages and the term of each stage is available. The teller can then drill down on each stage and view the details/parameters such as Repayment frequency, interest and installment processing parameters, penalty and charges parameters etc set for each stage of the schedule. This Enquiry is not available immediately on account disbursement but only after end of day.

Details

Field Description

Field Name	Description
Account No.	[Mandatory, Numeric, 16] Enter the loan account number for which you want to view the loan schedule.
Branch	[Display] The branch code where the loan account is opened and maintained is

	displayed.
Product	[Display] The product code under which the loan account is opened is displayed.
Currency	[Display] The currency assigned to the product at the product level, under which the account is opened is displayed.
Schedule Type	[Display] The schedule code. The default schedule type linked to the loan account selected either in APS or during direct Loan account opening is displayed. The system displays the name of the schedule adjacent to the field.
Loan Term	[Display] The tenure of the loan in months is displayed. This value is defaulted from the APS/Direct Loan Account Opening option.
Sanctioned Amount	[Display] The amount sanctioned for the loan. This value is defaulted from the Application Header screen.
Disbursed Amount	[Display] The amount that is disbursed to the customer till date is displayed.
Amend No.	[Optional, Picklist] Select the Amend Number from the picklist.
Amend Date	[Display] The amend date.
Amend Reason	[Display] The amend reason.
Description	[Display] The description for amendment.
Stage No.	[Display] This column displays the system-generated serial number to indicate stage numbers. There can be a maximum of 99 stages defined for an account schedule.
Stage Name	[Display] This column displays the stage type attached to the loan account. This is defined in at the Schedule Type (Task Code: LNM98) option under Global Definitions. The options are: <ul style="list-style-type: none"> • IOI • EPI • IPI • PMI • FPI
Term Months	[Display]

	This column displays the tenure in months for each stage of the loan.
Term Days	[Display] This column displays the tenure in days for each stage of the loan.
Stage Start Date	[Display] This column displays the start date for the corresponding stages. For the first stage, the start date will be the date of the first disbursement. For the remaining stages, it is the End Date of the previous preceding stage.
Principal Amount	[Display] This column displays the principal amount payable by the customer. This column is applicable only for IPI, EPI and FPI type of loans.
Principal Payments	[Display] This column displays the number of installments in which the principal is paid. For the IOI stage, the principal payments will be zero as in this stage, only the interest is repaid and not the principal. Based on this number, the system calculates the End Date column and the Stage Start Date column for the next stage. For the EPI stage, the sum of principal payments and interest payments are equal.
Interest Payments	[Display] This column displays the number of installments in which the interest is paid.
First Principal Due Date	[Display] This column displays the first due date for the principal to be paid. For the IOI stage, this field is not applicable as only interest is repaid and not the principal. For the EPI stage, the first principal due date is same as the first interest due date. For the first stage, this is same as the Stage Start Date. For subsequent stages for the same stage name, it is calculated using First Principal Due Date and principal payments of previous stage. For the IPI stage, it can be different. Based on this date, the system calculates the End Date column and the Stage Start Date column for the next stage.
First Interest Due Date	[Display] This column displays the first due date for the interest to be paid. This date will be defaulted to the end of the month in case of calendar type of products. In case of anniversary type, it should be the same date or a greater date of the next month from the date of disbursement. For the EPI stage, this field is the same as First Principal Due Date column.
Installment Amount	[Display] This column displays the installment amount to be repaid by the customer in each stage. The installment amount is the sum of the principal and the interest component. This column is not applicable for the IOI stage.
Stage End Date	[Display] This column displays the stage end date for the corresponding stage.

The preceding end date is the start date for the next stage.

Field Description

Field Name	Description
Stage Change	
End Stage Today	[Check Box] The end stage today.
End Of Period	[Display] The end of period.
Repayment Frequencies	
Principal Frequency	[Display] The frequency at which the principal is calculated on the loan account is displayed. For IOI stage, this has to be None/At maturity. For IPI & FPI type of loans, the principal repayment frequency can be None/At maturity, Monthly, Bimonthly, Quarterly, Half yearly or Yearly. For EPI type of loans, this has to be one of Monthly, Bimonthly, Quarterly, Half yearly or Yearly.
Interest Frequency	[Display] The frequency at which the interest will be calculated on the loan account is displayed. For IPI & FPI type of loans, the interest repayment frequency can be either of None/At maturity, Monthly, Bimonthly, Quarterly, Half-yearly or Yearly. For other stages, this has to be one of Monthly, Bimonthly, Quarterly, Half yearly or Yearly.
Penalty Frequency	[Display] The frequency at which the penalty should be repaid for the respective stage is displayed.
Calendar Plan	[Display] The calendar plan code attached to the loan account for the respective stage is displayed.

Stage Type

Installment Rule	[Display] The installment rule attached to the loan account for the respective stage is displayed. For more information, refer to the Maintaining Installment Rule option (Task Code LNM43).
Interest Rule	[Display] The interest rate rule attached to the loan account for the respective stage is displayed. For more information, refer to the Maintaining Interest Rule option (Task Code LNM41).
Interest Rate Code	[Display] The present interest rate code applicable on the loan account is displayed. For more information on interest rates, refer to the Loans Product Rates Plan option (Task Code LN060).
Interest Processing	
Compounding Frequency	[Display] The frequency at which the interest is compounded to the principal for the respective stage is displayed.
Rest Period Frequency	[Display] The rest period frequency applicable for the respective stage is displayed. Rest period is the frequency at which the interest base will be updated for computation of interest.
Arrear Compounding Frequency	[Display] The frequency at which the arrears are compounded for the respective stage is displayed. The system maintains an interest calculation base as separate from the principal. Depending on the frequency selected the interest base is increased by the interest arrears and the compounding effect is achieved. For more information, refer to the Maintaining Schedule Type option (Task Code LNM98).
Penalty-Non Payments	
Interest Rule	[Display] The penalty for non-payment interest rule, attached to the loan account for the respective stage is displayed. For more information, refer to the Maintaining Schedule Type option (Task Code LNM98).
Interest Rate Code	[Display] The interest rate code applicable for the penalty interest is displayed. For more information on interest rates, refer to the Loans Product Rates Plan option (Task Code LN060).
Compounding Frequency	[Display] The penalty interest compounding frequency associated with the selected stage is displayed.

For more information, refer to the **Maintaining Schedule Type** option (Task Code LNM98).

Penalty-Early Settlements

- PPF Interest Rule** [Display]
The partial payoff interest rule applicable for the stage is displayed. For more information, refer to the **Maintaining Interest Rule** option (LNM41).
- PPF Interest Rate Code** [Display]
The partial payoff interest rate plan code applicable for the stage is displayed. For more information on interest rates, refer to the **Loans Product Rates Plan** option (LN060).
- EFS Interest Rule** [Display]
The early final settlement interest rule applicable for the stage is displayed. For more information, refer to the **Maintaining Interest Rule** option (LNM41).
- EFS Interest Rate Code** [Display]
The early final settlement interest rate code applicable for the stage is displayed. For more information on interest rates, refer to the **Loans Product Rates Plan** option (Task Code: LN060).

Schedule	[Display] This field displays name for the schedule type.
Stage Name	[Display]

This column displays the stage name.

Ideally the stages could be mentioned as IOI , EPI or IPI or FPI or PMI

Audit Trail Enquiry

This Enquiry provides all the details of the transactions that have affected the loan account for given range of dates. Details like transaction date, Value date, transaction description, GL code effected are displayed. Entries like interest accrual and charging, arrears appropriation, Performing to Non-performing GL movement and vice-a-versa for the particular account, Misc. Loan debits etc. are displayed. As GL posting takes place only during the End of day processing, no details will appear in this option on the date of account opening. Further the user can also drill down on the transaction details by clicking on the transaction for which information is required.

To view the Audit Trail of the loan account, click **Audit Trail Enquiry**.

Transaction No.	[Display] The system-generated transaction number is displayed.
Teller ID	[Display] The number of teller who had performed the transaction is displayed.
Auth ID	[Display] The ID of the officer who has authorised the transaction is displayed.
Amount Tcy	[Display] The currency in which the transaction was performed is displayed.
Amount Lcy	[Display] The transaction amount in the local currency equivalent of the bank is displayed.
Description	[Display] The description of the transaction is displayed.
SC Code	[Display] The service charge code attached to the transaction. This field will display value only if the transaction being inquired is related to a Service Charge.
Transaction Type	[Display]

The type of the transaction associated with the particular transaction is displayed. Transaction types are predefined in the system.

GL Code

[Display]

The GL code, which was affected due to the transaction is displayed.

GL Description

[Display]

The description of the GL code which was affected due to the transaction is displayed.

Arrears Enquiry

Arrear information for the required kind of arrear or for all arrears can be inquired upon using the Arrears Enquiry option. The user can specify the arrear type like installment/principal/interest/penalty and other miscellaneous types of arrears. The user has the option to filter the Enquiry on a certain type of arrear or all arrears. Further selection of arrears based on either of All arrears or Unpaid arrears or Paid arrears is also available for Enquiry.

For each arrear the system displays details like the arrear type, its due date, the amount that was assessed by system, the amount still due, if paid then the date of payment and if not fully paid then the days that the arrear has been outstanding.

Arrears Details

Ref Bill No	Type	Due Date	Amount Assessed	Amount Due	Days Past Due	Last Payment Date

[Display]

This column displays the number of days for which the arrears have been outstanding.

Days past due = Current date - date on which the arrears were raised

This column will hold a value for all arrears, which have an amount due, greater than zero. If the amount due is zero this field will also display value as zero.

Last Payment Date

[Display]

This column displays the last date on which payment was made by the customer against the particular arrear.

Account Details

Basic details related to a loan account such as account opening date, application number, the sanctioned amount, disbursed amount and the term of the loan is available from this option. The unclear amount on account, credit received on account on current date, advance amount (RPA amount), the next due date and accrued interest amount are also displayed.

If there is a drawdown account then the account details and any hold on the casa account due to the loan is also available for Enquiry through this option.

The system provides an option to view the different customers linked to the account and their relationship to the account.

The screenshot displays the 'Agri Loan Account Transactions Enquiry' window. At the top, there are 'OK', 'Close', and 'Clear' buttons. The main area is divided into several sections:

- Account Details:** Includes fields for Account No (700000000312222), Currency (INR), Accrual Status (SUSPENDED), Outstanding Balance (-1,169.33), Date of Maturity (01/11/2019), NPA Date (01/01/1800), and Schedule (105-Revolving). It also shows Product (70002-Interest Subvention), Name (AUTO PERSON1), Account Status (ACCOUNT CLOSED TODAY), Asset Classification (40 Doubtful), and Stage Name (Revolving).
- Enquiry Options:** Radio buttons for Audit Trail Enquiry, Arrears Enquiry, Account Ledger Enquiry, Account Details (selected), Account NoBook Enquiry, and Repricing Details Enquiry.
- Navigation Tabs:** Arrear Details, Transaction Details, Interest Details, Account Details (active), Arrear Totals, Arrear Transactions, and Repricing Details.
- Financial Data:**
 - Account Open Date: 15/09/2018
 - Casa Sweepin Account: 0
 - Sanctioned Amount: 1,00,000.00
 - Disbursed Amount: 1,00,000.00
 - Outstanding Principal: 1,01,820.80
 - Unclear Amount: 0.00
 - Advance Amount: 0.00
 - Amount Paid Today: 1,02,790.13
 - View Security Details and View Hold on CASA (with search icons)
- Application Information:**
 - Application No: 0220570002000011
 - Date Of Loan Papers: 15/09/2018
 - Term of Loan: 12 (months)
 - Available for Disbursement: 1,01,127.57
 - Line No.
 - Drawdown Account: 0
 - Due Date: 28/02/2019
 - Accrued Interest: 751.72
 - View Account Relationship (with search icon)

Field Description

Field Name	Description
Account Open Date	[Display] The date on which the loan account is opened is displayed.
Application No.	[Display] The application number generated by the system for the loan account is displayed.
CASA sweepin Account	[Display] The CASA sweep in account.
Date of Loan Papers	[Display] This field displays date of Loan papers.
Sanctioned Amount	[Display] The loan amount sanctioned is displayed.
Term of Loan	[Display] The term of the loan account is displayed
Disbursed Amount	[Display] The total loan amount disbursed till date is displayed.
Available for Disbursement	[Display] This field will display value only in case the loan is partially disbursed and the balance loan amount to be disbursed will be displayed.
Outstanding Principal	[Display] The outstanding principal amount to be paid by the customer is displayed
Line No.	[Display] The central liability line number of the customer against which this credit has to be tracked is displayed. The central liability of the customer is tracked using the Central Liability module. This line number or liability number is the FLEXCUBE customer ID of the customer under which the liability of the customer/group is being tracked.
Unclear Amount	[Display] If any clearing cheque has been deposited in the loan account and the cheque is pending clearance the unclear cheque amount is displayed.
Drawdown Account	[Display] In case the loan account has drawdown instructions from a CASA account, the drawdown account number is displayed. Agri loans can be maintained no drawdown account . The value in this field will remain as '0'.
Advance Amount	[Display] If any amount is paid by the customer then the advance amount is displayed.
Due Date	[Display] The next due date for the repayment of loan installment by the

	customer is displayed is displayed.
Amount Paid Today	[Display] If any amount paid by the customer on the current date is displayed in this field.
Accrued Interest	[Display] The accrued interest amount.
View Security Details	[Optional, Search List] Select this Search List to view the details of the security linked to the loan account. This option will be enabled only if the selected loan account is a Secured loan account with collateral attached to it.
View Account Relationship	[Optional, Search List] Select this Search List to view the details of the relationship associated to the loan account. The system will display the Customer ID, Customer name and the Relationship.
View Hold on CASA	[Optional, Search List] If the selected loan account has a CASA account attached and the CASA account has a hold on it, the details of such hold will be displayed on selection of this Search List.
Branch Code	[Display] This field displays branch code of the centralized processing branch if the bank follows the centralized setup for account opening. In Decentralized setup, the branch code will default to the name of the branch which triggered this transaction.
Next Installment Amount	[Display] This field displays the next installment amount which will be due as per the next due date
Compromise Scheme	[Mandatory] User needs to enter compromise scheme. [Display]
Buyout ID	This field displays the buyout id attached to the loan account. If user modifies the buyout id details in BA020 screen, the system will show modified details.
Permitted By	[Mandatory, 120] User needs to enter permitted by details. [Display]
Buyout Name	This field displays the buyout name attached to the loan account. If user modifies the buyout name details in BA020 screen, the system will show modified details.
Compromise amount	[Mandatory, Numeric] User needs to enter compromise amount.

	[Display]
Pool Id	This field displays the pool id attached to the loan account. If user modifies the pool id details in BA020 screen, the system will show modified details.
LPD transfer Date	[Display, Date] System displays LPD transfer date. [Display]
Pool Name	This field displays the pool name attached to the loan account. If user modifies the pool name details in BA020 screen, the system will show modified details. [Display]
Originator ID	This field displays the originator id attached to the loan account. If user modifies the originator id details in BA020 screen, the system will show modified details. [Display]
Originator Name	This field displays the originator name attached to the loan account. If user modifies the originator name details in BA020 screen, the system will show modified details.
Aggregate Limit (5th Year Limit)	[Display] System will derive the aggregate limit based on the loan amount, period and review percentage and display the aggregate limit for KCCS account.
AOD/AOS Date	[Display] This field displays Acknowledgment of Debt/ Acknowledgment of Security date.
Last Enhancement Date	[Display] On limit enhancement, system will update the Last enhancement date with the review date.
Last Enhancement Amount	[Display] On limit enhancement, system will update the 'Last Enhancement Amount' with the difference between current limit and enhanced limit.
Date of Last Renewal	[Display] This field displays the date of last renewal of an Agri. Loan revolving account which is renewed through screen ALM38. Then the effective date of renewal displayed during last renewal will be displayed here. If the account is not renewed yet, then blank/null will be displayed in this screen.

Interest Details

A teller can view the interest related details of the loan account. This Enquiry tab is available under the Account Details option itself. This includes details like the interest rate applicable, the variance applied at account level, interest base (for next charging) and interest freeze status (freeze or not) is mentioned. Penalty interest details like the rate and base are also available on Enquiry.

Field Description

Field Name	Description
Normal	Arrears which have been due in the loan account with accrual status of the loan account as Normal then the values will be displayed in the following fields. Arrears which were due and have not been clawed back post Suspension of the loan account will also display values under the Normal arrears column.
Interest	[Display] The normal interest due paid in the loan account is displayed.
Post Maturity Interest	[Display] If the loan account in Post Maturity stage the post maturity interest amount will be displayed. Ideally this field should not have any value as banks usually treat loans in Post maturity stage as Suspended and hence the Post Maturity interest arrear should appear in the suspended column as against the normal.
Fees	[Display] The fees due in the loan account is displayed.
Penalty	[Display] The penalty due from the customer under the normal period is displayed.
Premium	[Display] The premium due under the normal period is displayed.
Legal Fees	[Display] The legal fees due under the normal period is displayed.
Outgoings	[Display] The outgoings due the normal period is displayed.
DND Amount	[Display] The amount that is debited to the agri loan account.
Review Date	[Display, dd/mm/yyyy] The review date of the loan amount. This field is system generated, as the review period is selected the review date is displayed. The system generates the report and also displays a warning message if the user attempts any transaction on the account after this date is over.
Review Period	[Display] The review period of the loan amount. The review period is in months.
Suspended	Arrears which have been due in the loan account with accrual status of the loan account as Suspended then the values will be displayed in the following fields. Arrears which were due prior to suspension of the loan account and clawed back will also display values under the Suspended arrears column.
Interest	[Display] The interest due in the suspended period is displayed.

Post Maturity Interest	[Display] The post maturity interest due for the suspended period is displayed.
Fees	[Display] The fees due under the suspended period is displayed.
Penalty	[Display] The penalty due from the customer under the suspended period is displayed.
Premium	[Display] The premium due under the suspended period is displayed.
Legal Fees	[Display] The legal fees due under the suspended period is displayed.
Outgoings	[Display] The outgoings due under the suspended period is displayed.
Review Date	[Display, dd/mm/yyyy] The review date of the loan amount. This field is system generated, as the review period is selected the review date is displayed. The system generates the report and also displays a warning message if the user attempts any transaction on the account after this date is over.
Principal Arrears	[Display] The total principal arrears due on the loan account till date is displayed.
Folio Arrears	[Display] This field displays the total folio Arrears.
Total Normal Arrears	[Display] The total normal arrears for the loan account till date. This field displays the total of all the arrears under the normal column.
Total Suspended Arrears	[Display] The total suspended arrears for the loan account till date. This field displays the total of all the arrears under the suspended column.
Total Arrears	[Display] The total arrears for the loan account till date. This field displays the total of Principal Arrears + Total Normal Arrears + Total Suspended Arrears.
Review Period	[Display] The review period of the loan amount. The review period is in months.

[Account NoBook Enquiry](#)

8. Select the **Arrear Type** from the list.
9. Double-click the appropriate record to view the **ArrearTxns** tab.
10. Click the **Account Ledger Enquiry** option to view the **Transactions** tab.
11. Double-click the appropriate record to view the **Transaction Details** tab.
12. Click the **Account Details** option to view the **Account Details** tab.
13. Click the **Interest Details** tab to view the **Interest Details** tab.
14. Click the **Arrear Totals** tab to view the **Arrear Totals** tab.
15. Click the **Account NoBook Enquiry** option to view the **Transactions** tab.
16. Double-click the appropriate record to view the **Transaction Details** tab.
17. Click the **Repricing Details Enquiry** tab to view the Repricing details.

6.7 ALM83-Agri Loan Account Rates

The Account Rates option allows the user to vary the interest rate at the account level against the loan product. In other words the interest rate for a specific loan account can be changed by modifying the account level variance. This option provides the flexibility to the user to provide a preferential interest rate to the customer. The account level variance is validated against the minimum and maximum interest variance parameters specified at the **Loan Product Master level** option (Task Code: LNM11).

There are schemes where borrowers can avail of capital or interest subsidy for the borrowed loan amount. In case of capital subsidy, the amount of subsidy would be placed as a non interest bearing term deposit and there would be no interest charged up to the amount of the subsidy. In case of interest subsidy, the differential interest amount is to be claimed back.

Access

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 16] Enter the loan account number for which the interest rates is to be changed. The name of the account holder is populated adjacent to the account number.
Branch	[Display] The name of the home branch where the loan account is opened and maintained is displayed.
Product	[Display] The product under which the loan account is opened is displayed.
Currency	[Display] The currency assigned to the product at the product level, under which the account is opened is displayed. All the entries posted in the account are in the account currency. The exchange rate values must be defined and downloaded. For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.
Plan Name	[Mandatory, Search List] The user has to select the Plan Name to enable modify the rate type attached to the loan account. For more information on Interest Rate plan refer to the Loan Product Rates Plan (Task Code: LN060).
Rate Change Effective Date	[Display] The date from which the existing rate had taken effect is displayed. In modification mode another date field will be enabled to allow the user to enter the next date from which the new rate being defined has to be made effective. The new date has to be greater than the current date.
Set Fixed	[Conditional, Check Box] If the selected rate plan to be modified is floating the user can select this check box to change the interest rate to fixed.

Page 1 of 1 (1 of 1 items) < 1 >

Field Description

Column Name

Description

Amount

[Display]

The amount defined for the slab. This field is applicable only when the selected plan is tiered amount based.

This is the amount on which the defined interest, penalty rates and variances will be applicable.

For more information, refer to the **Maintaining Tiered Interest Rates for Loan Product** option.

Interest Rate

[Display]

The default interest rate for the loan product is displayed. This rate is the current effective interest rate (without considering the variance) linked to the interest index code.

For more information, refer to the **Index Codes Maintenance**(BAM12) option and **Interest Index Rate** option (BAM13).

Interest Variance

[Display]

The interest variance.

This is the variance defined on the interest for the interest plan.

For more information, refer to the **Maintaining Tiered Interest Rates for Loan Product** option (Task Code: LN060).

Fixed Amount

[Display]

If the selected interest plan attached to the loan account being modified

is tiered amount based type then the fixed amount of interest defined for the respective slab is displayed.

For more information, refer to the **Maintaining Tiered Interest Rates for Loan Product** option (Task Code: LN060).

Rate Account Variance

[Mandatory, Numeric]

The user has to enter the variance value in this field. This is the account level variance and its value should be between the maximum and the minimum level defined at the product level.

Net Rate%

[Display]

The net rate is computed and displayed.

$$Net\ Rate = Interest\ Rate + Rate\ Account\ Variance$$

Rate Change Parameters

The rate change either on the higher or lower side will have an influence on the loan account in terms of the installment or in terms of the tenure of the loan. The loan account schedule will have to be redrawn due to the change in the interest rate. Thus, after modifying the Rate Account Variance the loan account has to be rescheduled.

After entering the relevant information and after modifying the Rate Account Variance click on the **Rate Change Parameters** tab.

Field Description

Field Name	Description
Advice Required	[Optional, Check Box] Select this check box if the advice is required to be sent to the customers informing them of the rate change. For more information, refer to the Maintaining Tiered Interest Rates for Loan Product option (Task Code: LN060).
Reschedule Option	[Optional, Drop-Down] Select the option for rescheduling. The options are:

- Recalculate Term - Select this option to allow the system to keep the installment constant (as before rescheduling) and to change the term of the loan
- Recalculate Installment - Select this option to allow the system to keep the maturity date of the loan constant and to change the installment amount

To view account rates details

1. Click **Enquiry**.
2. Type the account number and press the **Tab** key.
3. You can view account rates details.

To modify account rates details

1. Navigate to the **Account Rates** option (Task Code: ALM83).
2. Click **Modify**.
3. Type the account number and press the **Tab** key.
4. Select the plan name from the Search List.
5. After selecting the appropriate options click on **OK**.
6. The system displays the message "Record Modified...Authorisation Pending..".

To delete account rates details

1. Click **Delete**.
2. Type the account number and press the **Tab** key.
3. Select the plan name from the Search List.
4. Click **OK**.
5. The system displays the message "Record Deleted Authorisation Pending..".

To cancel account rates details

1. Click **Cancel**.
2. Type the account number and press the **Tab** key.
3. Select the plan name from the Search List.
4. Click **OK**.
5. The system displays the message "Record Canceled".

To amend account rates details

1. Click **Amend**.
2. Type the account number and press the **Tab** key.
3. Select the plan name from the Search List.
4. Modify the relevant information and click **OK**.
5. The system displays the message "Record Amended...Authorisation Pending..".

To authorize account rates details

1. Click **Authorize**.
2. Type the account number and press the **Tab** key.
3. Select the plan name from the Search List.
4. Click **OK**.
5. The system displays the message "Record Authorized".

6.8 ALM35-Agri Loan Account Attributes Maintenance

The **Agri Loan Account Master Attributes Maintenance** option allows you to modify the details of a loan account. The account attributes are defaulted at the account level from the various master maintenances. Using this option the user can suitably modify the default parameters at the loan account level. Apart from modification this option allows maintaining of solicitors code, allotting an Account officer, mail control parameters, modification of NPA appropriation sequence etc.

The NPA appropriation sequence set at the product level is defaulted for an account. This sequence can be modified at an account level also. Similarly the longest over due first flag set at product level can be overridden by the appropriation control flag for NPL.

For the account for which the bank requires an override - the account attributes can be modified accordingly.

This maintenance also provides some free format text fields like project status and limit ID etc which the bank can use to maintain miscellaneous loan details.

Access

- Task Code: ALM35
- Front Office Transactions > Account Transactions > Agri Loan Account Transactions > Other Transactions > Agri Loan Account Attributes Maintenance

Interest Subvention Dates	
From Date	[Mandatory, dd/mm/yyyy] Enter the Interest Subvention starting date.
To Date	[Mandatory, dd/mm/yyyy] Enter the Interest Subvention ending date.

6.11 ALM31- Agri Loan Account Payment Instructions

The **Agri Loan Account Payment Instructions** option enables the user to set up the instructions for loan repayment in the mode preferred by the customer. The user can choose any option from the repayment mode as per the instruction given by the customer; i.e., either the bank can transfer the amount from CASA, or recover the amount from the salary during salary upload. Unlike standing instructions the system will invoke the funds transfer as and when the arrears are raised in the loan account. This provides the flexibility to the customer to ensure that arrears raised are settled as and when raised. Where the installment due date falls on a holiday, the system will perform the drawdown as per the set up i.e. whether the drawdown processing should be done on the day before or day after holiday. For further information on drawdown behavior, number of retries etc. refer to the **Loans Product Master Maintenance** (Task Code: LNM11).

During salary upload, if the CASA account is a provider for a loan, there is a facility to earmark the amount equivalent to arrears and the next installment due on the loan. For more information refer to **Company Master Maintenance** (Task Code: BAM81). While setting up the payment instruction, it is recommended to select both the options viz, Transfer from Savings/Current and Drawdown on Salary Credit. This will ensure that the arrear amount as and when raised is recovered to the extent of the available balance in the CASA account. This option is recommended due to the possibility of the arrear generation and the salary credit happening on different dates. If only **Drawdown on Salary Credit** option is selected, then the CASA account will not be debited unless the salary is credited to the CASA account.

Access

- Task Code: ALM31
- Front Office Transactions > Account Transactions > Agri Loan Account Transactions > Other Transactions > Agri Loan Account Payment Instructions

Definition Prerequisites

- Company Master Maintenance (Task Code: BAM81)

Other Prerequisites

- The loan account customer must have a CASA account with the bank
- Loan Product Master Maintenance (Task Code: LNM11): Drawdown parameters as specified under Auto Repayment option

Download

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Enquiry

Field Description

Field Name	Description
Account No.	[Mandatory, Numeric, 16] Enter the loan account number for which the payment instructions are to be maintained.
Customer Name	[Display] The name of the customer who holds the loan account will be displayed.
Branch	[Display] The name of the home branch where the loan account is opened and maintained is displayed is displayed.
Product	[Display] The product code under which the loan account is opened is displayed.
Currency	[Display] The currency assigned to the product at the product level, under which the account is opened is displayed. All the entries are posted in the account in the account currency. For example, if the currency assigned to a loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.
Repayment Mode	This section is optional.
Transfer from Savings/Current	[Radio Button] Select this option, if the customer wishes to repay the loan through transfer from CASA.
Savings/Current Account Details	
Remitter Account No.	[Conditional, Numeric, 16] Enter the CASA account number, which will be debited to repay the loan. This field is enabled only if the Transfer from Savings/Current option is selected in the Repayment Mode section.
Priority	[Display]

This field displays Priority number.

Branch	[Display] The branch code in which the CASA account was opened is displayed.
Customer Name	[Display] The name of the customer who holds the CASA account is displayed.
Currency	[Display] The currency assigned to the product at the product level, under which the CASA account is opened. All the entries are posted in the account in the account currency. For example, if the currency assigned to a CASA product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.
Product	[Display] The product code under which the CASA account is opened is displayed.
Status	
Current DrawDown Status#	[Check Box] Select the check box if the transfer from CASA should happen after the customer's salary has been credited to the CASA. If this option is selected, then the CASA account will not be debited unless the salary is credited to the account.

To add account payment instruction

1. Click **Add**.
2. Type the account number and press the **Tab** key or select it from the Search List.
3. Enter the appropriate information in the relevant fields.
4. Click **OK**.
5. The system displays the message "Record Modified...Authorisation Pending..".

To modify account payment instruction

1. Click **Modify**.
2. Type the account number and press the **Tab** key or select it from the Search List.
3. Modify the relevant information and then click **OK**.
4. The system displays the message "Record Modified...Authorisation Pending..".

To delete account payment instruction

1. Click **Delete**.
2. Type the account number and press the **Tab** key or select it from the Search List.
3. Click **OK**.
4. The system displays the message "Record Deleted...Authorisation Pending..".

To cancel account payment instruction

1. Click **Cancel**.
2. Type the account number and press the **Tab** key or select it from the Search List.
3. Click **OK**.
4. The system displays the message "Record Cancelled..".

To amend account payment instruction

1. Click **Amend**.
2. Type the account number and press the **Tab** key or select it from the Search List.
3. Modify the relevant information and click **Ok**.
4. The system displays the message "Record Amended...Authorisation Pending..".

To authorize account payment instruction

1. Click **Authorize**.
2. Type the account number and press the **Tab** key or select it from the Search List.
3. Click **OK**.
4. The system displays the message "Record Authorized..".

To view account payment instruction

1. Select the **Enquiry** mode.
2. Type the account number and press the **Tab** key or select it from the Search List.
3. The system displays the account payment instruction details.

Note: Depending on the set up, there will be validation that the customer of the Debit account and the customer of the Credit should have the same Customer ID.

Modes Available

Enquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To Inquire Data on Restructured Loan

1. In the **Dashboard** page, Enter the Task Code **BA172** and then click  or navigate through the menus to **Back Office Transactions > Loan > Data on Restructured Loan**
2. You will be navigated to **BA099 - Priority Sector data for Loan / Advance** screen.

Data on Restructured Loan

The screenshot displays the 'Data on Restructured Loan' inquiry screen. At the top, there are tabs for 'Restructure Details' and 'Reschedule Details'. The form is divided into several sections:

- Account Details:** Includes fields for Account No. (7000000000310826), Restructured/Rescheduled (AUTO PERSON1), Customer ID (990100583), Product Code (70000), DP Code of Home Branch (98001), and Date of Implementation of Restructuring/Reschedule (28/03/2019).
- Restructure Details:** Includes fields for Reason for Restructuring, Sanctioning Authority, Next Date for moving account to regular status (01/01/1800), Cut Off Date (01/01/1800), Sanction Reference No., Amount Recovered till the date of restructure, O/S balance on the date of restructure (After restructuring), Date of Previous Restructure (01/01/1800), Credit Risk Rating- External, Internal, and Interest Including Accrued Interest.
- Capitalization Details:** Includes fields for Principal and Other arrears and Interest Including Accrued Interest.
- Asset Classification Details:** Includes fields for Previous to Restructure and Post Restructure.
- Extension of Tenure:** Includes fields for Date of maturity before restructure (01/01/1800) and New Date of maturity after restructure (01/01/1800).

Field Description

Field Name	Description
Account No.	[Mandatory, Pick List] Type the account number or select it from the pick list. Name of the customer is displayed in the adjacent box.

Customer ID	[Display]	Primary Customer ID of the account number selected will be displayed.
Restructured/ Rescheduled	[Mandatory, Dropdown]	Select the appropriate option Restructured/ Rescheduled from the drop down.
Product Code	[Display, Numeric]	Product code of the given account will be displayed.
DP Code of Home Branch	[Display]	System display the DP code of home branch.
Date of Implementation of Restructuring/Reschedule	[Mandatory, Pick List]	Select the Date of restructure / Reschedule. Restructure/Reschedule dates of the given account will be available for selection. If restructure option selected the 'Restructure Details' tab will be enabled and restructure details will be displayed for the date selected. If reschedule option selected the 'Reschedule Details' tab will be enabled and reschedule details will be displayed for the date selected.

Restructure Details

The screenshot shows the 'Restructure Details' form in Oracle. The form is titled 'Data on Restructured Loan' and includes the following fields and sections:

- Account Details:** Account No (700000000310826), Customer ID (990100593), Product Code (70000), Restructured/Rescheduled (dropdown), DP Code of Home Branch (99001), Date of Implementation of Restructuring/Reschedule (28/03/2019).
- Restructure Details:** Reason for Restructuring, Next Date for moving account to regular status (01/01/1800), Cut Off Date (01/01/1800), Sanction Reference No, Amount Recovered till the date of restructure, O/S balance on the date of restructure (After restructuring), Date of Previous Restructure (01/01/1800), Credit Risk Rating- External, Sanctioning Authority, Count of restructure, Reference Date (01/01/1800), Date of Sanction of Restructure (01/01/1800), Sacrifice Amount, O/S amount converted as investment, Internal.
- Capitalization Details:** Principal and Other arrears, Interest including Accrued Interest.
- Asset Classification Details:** Previous to Restructure, Post Restructure.
- Extension of Tenure:** Date of maturity before restructure (01/01/1800), New Date of maturity after restructure (01/01/1800).

Field Description

Field Name	Description
Limit Sanctioned	[Display, Numeric] Sanction Amount displayed during restructure.
Sanction Date	[Display, Date, DD/MM/YYYY] Sanction Date as captured in screen BA020 during restructure will be displayed.
Reason for restructuring	[Display, Alpha numeric] Reason for restructure for the account for the selected restructure date will be displayed.
Sanctioning Authority	[Display, Alpha numeric] Sanctioning Authority as captured during restructure for the account for the selected restructure date will be displayed.
Next Date for Moving account to regular status	[Display] The next date for movement of the loan account CRR to regular status will be stamped here. Following two dates will be compared: 1.first principal payment date as per revised schedule 2.first interest payment date as per revised schedule The later of two dates will be added to the specified period (as maintained in ACM02 screen). This derived date will be stamped in the restructured account.
Count of restructure	[Display] Each time the loan account in regular status or suspended status is restructured, the field value will be updated. Example, after first restructure, the count updated will be 1, after 2nd restructure, count will be updated as 2 and so on. This value will be updated on the life time of the account, irrespective of the specified period i.e. the count will never be reset to 0, even after a loan account gets classified under regular CRR after the expiry of the specified period.
Cut off Date	[Display] The cut off date entered in Account restructure through LN525 and AL525 screens in 'restructure parameters' tab will be displayed in this field.
Reference Date	[Display] The reference date entered in Account restructure through LN525 and AL525 screens in 'restructure parameters' tab will be displayed in this field.
Sanction Reference No.	[Display, Numeric] Sanction Reference Number as captured during restructure for the account for the selected restructure date will be displayed.
Date of Sanction of Restructure	[Display, Date, DD/MM/YYYY] Date of Sanction of Restructure as captured during restructure for the account for the selected restructure date will be displayed.

Amount Recovered till the date of restructure	[Display, Numeric, 13,2] Total Credit amount for account from account opening till restructure date selected for the account will be displayed.
Sacrifice Amount	[Display, Numeric, 13,2] Sacrifice Amount as captured during restructure for the selected date for the account will be displayed.
O/S balance on the date of restructure (After restructuring)	[Display, Numeric, 13,2] Outstanding balance in the account after adjusting the restructure amount for the selected date of the account.
O/S amount converted as investment	[Display, Numeric, 13,2] Outstanding amount converted as investment.
Date of Previous Restructure	[Display, Date, DD/MM/YYYY] Previous restructure date of the account if applicable. If not applicable Blank will be displayed.
Credit Risk Rating - External	[Display, Alpha numeric] External Credit Rating of the account populated during restructure will be displayed.
Credit Risk Rating - Internal	[Display, Alpha numeric] Internal Credit Rating of the account populated during restructure will be displayed.
Capitalization Details	
Principal and Other Arrears	[Display, Numeric, 13,2] Principal and other arrears capitalized during restructure for the selected date for the account.
Interest Including Accrued Interest	[Display, Numeric, 13,2] Interest including accrued interest capitalized during restructure for the selected date for the account
Asset Classification Details	
Previous to Restructure	[Display, Numeric] CRR code and Description for the account prior to the selected restructure will be displayed. <CRR Code>-<CRR Description>
Post Restructure	[Display, Numeric] CRR code and Description for the account after the selected restructure will be displayed. <CRR Code>-<CRR Description> This field will be updated for a restructured account during EOD process. Hence if user tries to inquire the data on the same restructured date then this field will have NULL value. Post EOD the relevant CRR code will be displayed.

Extension of Tenure

Date of maturity before restructure [Display, Date, DD/MM/YYYY]
 Loan maturity date prior to restructure.

New Date of maturity after restructure [Display, Date, DD/MM/YYYY]
 Loan maturity date post restructure.

[Display, Alphanumeric]

Remarks

Remarks captured for the account for the selected restructure date will be displayed.

Maker ID

[Display, Alphanumeric]

Teller ID who performed the restructure will be displayed.

Checker ID

[Display, Alphanumeric]

User ID who authorizes the restructure will be displayed.
