# 1. Preface

## 1.1 Intended Audience

This document is intended for the following audience:

- Customers
- Partners

## 1.2 **Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <a href="http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.">http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.</a>

# 1.3 Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit

http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit

http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

## 1.4 Structure

This manual is organized into the following categories:

*Preface* gives information on the intended audience. It also describes the overall structure of the User Manual.

Introduction provides brief information on the overall functionality covered in the User Manual.

The subsequent chapters provide information on transactions covered in the User Manual.

Each transaction is explained in the following manner:

- Introduction to the transaction
- Screenshots of the transaction
- The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.
- Procedure containing steps to complete the transaction- The mandatory and conditional fields of the transaction are explained in the procedure. If a transaction contains multiple procedures, each procedure is explained. If some functionality is present in many transactions, this functionality is explained separately.

# 1.5 Related Information Sources

# 3. Corporate Administrator

In large corporate organizations, there is a need to have user(s) with an admin role to carry out certain administrative functionalities for the corporate party.

Such delegated user with an administrator role will have restricted scope over these administration functionalities and scope will be restricted to manage the corporate to which they belong.

Following administrative functions are extended for Corporate Administrator.

- User Management
- Party Preferences
- Approval Workflow Maintenance
- Approval Rules Maintenance
- Account Access
- Resource Access
- Alerts Subscription
- User Group Management
- File Upload
- Transaction Limit Maintenance
- Reports Generation and Mapping

#### **Dashboard Overview**

#### lcons

Following icons are present on the corporate administrator dashboard:

- UP: Clicking this icon takes you to the dashboard.
- Clicking this icon takes you to the Mailbox screen.
- Click this icon to search the transactions.
- Welcome, Sweta Thakur Last login 04 May 02:44 PM
   Click this icon to get option to log out from the application.
   Displays the welcome note with last login details. Click this icon to view the logged in user's profile or log out from the application.
- = : Click the toggle menu to access the transaction.

#### Menus

Following menus are present on the dashboard:

- Onboarding Click this menu to manage users. Approvals Click this menu to access Approval related transactions. Limits Click this menu to manage limits. Ю Access Management : Click this menu to set up account access rules on the . transactions. File Upload Click this menu to create a file identifier and map it to the user. . Reports Click this menu to generate reports and view the generated reports. . 000 Others (User Group Management, Alert Subscription) Mail Box Click this menu to view the Mails, Alerts and Notifications. My Profile : Click this icon to view the profile of the logged in user. Session Summary : Click to view the login details like start date and time, end date and time, Channel and IP address of the last sessions of the logged in user.
- ATM/Branch Locator Click to view the address and location of the ATMs and the branches of the Bank.

- Security Settings : Click here for security settings.
- Click this to launch the online help.
- Click this to view the information about the application like version number, copyright etc.

## Quick Links

#### Onboarding

#### (a) User Management

The Corporate Administrator can search and view users, create users, modify and delete users. He can reset passwords of the users. Administrator can lock / unlock a user, through this option and grant access to various channels.

#### (b) Party Preferences

Corporate Administrators can view the preferences set for his party by accessing the Party Preferences screen.

#### Approvals

#### (a) Workflow Management

Approval workflows are created to support requirements where multiple levels of approval are required in a specific sequence for a transaction/maintenance. Each workflow can be configured to have up to five levels of approval with a specific user or a user group configured at each level.

The Corporate Administrator can search and view approval workflows maintained and create new workflows. As part of creating workflows, Administrator can add various levels of approvals and map users or user groups to each level. Administrator can also modify workflows maintained.

#### (b) Rules Management

The Corporate Administrator can set up rules for approvals. Applying a rule makes the requirement for an approval more customized. For instance, through this screen, the corporate administrator can create a rule, so that all admin maintenances initiated by a certain user-group, always require approval.

#### Account Access

(a) Party Account Access

Corporate Administrator can set up account and transaction access rules at the corporate party level. The corporate administrator can provide access to accounts held by the party with the bank as available in the core banking system. Corporate Administrator maker can search & view own accounts & transactions mapped, as well as those of linked parties. Administrator can create, modify and delete mapping.

#### (b) User Account Access

Using this option the Corporate Administrator can set up account and transaction access for user(s) of the corporate party. This maintenance can be done only after the Party Account Access is setup for the party of the user(s). Corporate Administrator maker can search & view own accounts & transactions mapped to a user. Administrator can create, modify and delete mapping of a user to an account / transaction.

#### **Resource Access**

#### (a) Party Resource Access

As part of Resource Access Management, corporate administrator can define access on resources other than CASA, TD Loan accounts like Remitter List from Virtual Account Management for his Corporate Party.

#### (b) User Resource Access

As part of Resource Access Management, corporate administrator can define access on resources other than CASA, TD Loan accounts like Remitter List from Virtual Account Management for users associated to his party ID.

#### File Upload

#### (a) File Identifier Maintenance

The Corporate Administrator – Maker, can create file identifiers (FI) for a corporate entity. A File Identifier is always mapped to a specific single file template. Maintenance permits configuration of corporate preferences like approval type (file level/ record level) for a particular type of file. This is a pre-requisite for the File Uploads functionality, for a corporate.

#### (b) User File Identifier Mapping

Through this option the Corporate Administrator – Maker, can map a file identifier to a user to grant access rights to the user, for this specific file type. This maintenance enables a user to upload a specific file, approve the uploaded file and view its status. The Corporate Administrator maker can map / un-map an FI to a User. Further, an administrator can enable or disable the sensitive data check. This is a pre-requisite maintenance, for the File Uploads functionality, for a corporate.

Options accessible only via Toggle Menu

#### **Onboarding**

#### (a) Party to Party linkage

Party to Party linkage is required by medium and large corporate if the user(s) of the parent company need to access accounts of the subsidiary companies. The Corporate Administrator can view the parties already linked to the parent party ID.

#### <u>Limits</u>

#### (a) Limit Definition

Limits are defined by the bank to set up amount and duration based restrictions on the transactions that can be carried out by the user.

As part of Limits Definition maintenance, the Corporate Administrator can define:

- Transaction Limits: It is the transaction initiation limit with minimum and maximum amount, defined typically for a user with role 'Maker'.
- Cumulative Limits: It is the collective transaction amount limit for all the transactions that can be performed during a day and the maximum number of transactions permitted in a day.

This Option allows the Corporate Administrator to search and view limits, create limits and edit / delete existing limits.

#### (b) Limits Package

As part of the Limits Package definition, the created limits can be mapped to relevant transactions and/or roles.

The Limits Packages once created can be associated at User Level.

This Option allows the Corporate Administrator to search and view Limit Package, create a new Limit Package, and edit / delete existing Limit Package.

#### Reports

#### (a) Report Generation

Using this option, the Corporate Administrator, can generate various adhoc and scheduled banking reports. Application provides an option to generate and schedule reports using Oracle Analytics Publisher and / or by using an internal application.

#### (b) My Reports

On accessing 'My Reports' menu, the Corporate Administrator, can view the last 10 reports generated with the respective report status. He can choose to search a specific report using the search criteria or can opt to view/ download detailed report.

#### (c) User Report Mapping

The user report mapping maintenance allows the Corporate Administrator to map the report or set of reports to a specific corporate user. The corporate users can generate and view the reports of which they have an access to.

Corporate Administrator searches a corporate user based and view the reports mapped to him, administrator can also un-map the reports from specific corporate user so that access of the specific report/ s can be removed to that corporate user.

#### Others

#### (a) User Group Management

The Corporate Administrator can create User Groups with two or more users. Administrator can search and views already maintained groups and also update them. The maintained user groups are used for further maintenances like – User Group Subject Mapping or while creating approval rules.

#### (b) Alert Subscription

The Corporate Administrator can subscribe users to non-mandatory alerts, through this option. The corporate Administrator processes the subscription request, as required by various users of his party (for non- mandatory alerts).

#### Note:

 If the setup requires an approval workflow, initiated transaction/maintenance will be sent for approval. Once approved by the required number of approvers, the maintenance will be effective.
 If the setup does not require an approval workflow or is self / auto approved, the maintenance will come into effect on saving & confirming.

#### **Activity Log**

The Corporate Administrator can view the log of activities here. For ease of use, he can provide a Date Range to search.

#### lcons

.

: Click this icon to search the transactions that are performed on a particular date. It has two fields **From** and **To**, you can select the start and end date to search the transaction.

#### (a) Corporate Activity Log

Q.

In the Corporate activity log, the Corporate Administrator, can view the activities done by a user with regards to a corporate maintenances. The following fields are displayed.

- > Date: Date of the maintenance
- > Description: Description of the maintenance
- > Party Name: Party Name
- > Reference Number: Reference Number of the maintenance.
- Status: Status of the maintenance

#### **Activity Log**

Activity Log (1)					9

# 5. User Management

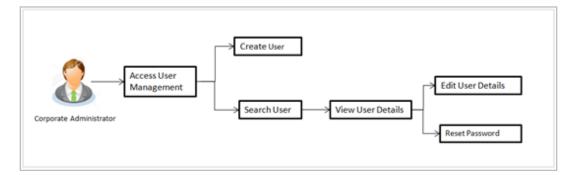

User Management function enables Corporate Administrator to onboard and manage users along with their login credentials for channel banking access. This module facilitates channel banking access to corporate users of a party that the Corporate Administrator belongs to.

This function also lets the Corporate Administrator to define the various touch points from which the user can access the channel banking and assign the limit package applicable for the same.

#### Prerequisites:

- Application roles and child roles are maintained
- Transactions are associated with each Application role
- Corporate Administrator is maintained for a party.
- Transaction (User Management) access is provided to Corporate Administrator.
- Approval rule set up for Corporate Administrator to perform the actions.
- Party Preference is maintained for corporate user

#### Workflow:

#### Features supported in application

The User Management module allows the Corporate Administrator to:

- Create User
- Search User
- Edit User

#### How to reach here:

Corporate Administrator Dashboard > Quick Links > OnBoarding > User Management OR

Corporate Administrator Dashboard > Toggle menu > Menu> OnBoarding > User Management

**Note:** Non Customer Corporate users (for which the linked party id is not maintained in UBS or in Core banking system), can also be on boarded on OBDX. For such cases i.e. for non customer corporate users (counterparties on boarded by Corporates) the system will look for the party ID in OBSCF/OBCMS.

## 5.1 <u>User Management – Create User</u>

Corporate Administrator logs into the system and navigates to the User Management screen. This function allows the administrator to create corporate type of user for a party ID mapped to administrator.

As a part of create user, administrator captures following details of user:

- Personal Information
- Contact Details
- Assign Transaction Limits
- Assign Child Roles
- Define User Status

**Note:** In case of multi entity implementation, if the corporate administrator has access to multiple entities, then the administrator can select the entity from the entity switcher on which the user needs to be on boarded. The selected entity of the user as part of onboarding will be the default/home entity of the user being created.

#### To create a new user:

1. In the **User Management** screen, click **Create**. The **User Management** screen with mapped party appears.

#### User Management – Create New User

## **Field Description**

Field Name	Description
User Type	User type is always defaulted to 'Corporate User'.
Party ID	Party ID mapped to the logged in Corporate Administrator.
	<b>Note:</b> For Non Customer Corporates (counterparties on boarded by Corporates) the system will look for the party ID in OBSCF/OBCMS
Party Name	Party name of Party ID mapped to the logged in Corporate Administrator.
Personal Information	

Field Name	Description
User Name	Define the name of the user (login ID) which is to be created. Note: Usernames are case insensitive i.e. User can login in OBDX with any case.
Title	Title of the user. The options are: Mr Mrs Miss Miss Dr Master
First Name	Specify first name of the user.
Middle Name	Specify middle name of the user.
Last Name	Specify last name/ surname of the user.
Date of Birth	Specify date of birth of the user.
Contact Details	
Email ID	Specify an email ID of the user.
Contact Number (Mobile)	Specify mobile number of the user.
Contact Number (Land Line)	Specify phone number (land line) number of the user.
Address Line 1-4	Address of the user.
Country	Country of the user.
City	Specify city in which the user resides.
Zip Code	The postal code of the city in which the user resides.
Limits & Roles	
User Groups	Indicates an option to add the user being onboarded to existing user groups.

#### Field Name Description

#### Limits – Touch Point/Group

If limit check is required, assign a limit package for applicable touch points. All the touch points and touch point groups maintained in the system are listed. Packages can be mapped for each touch point and for touch point group. Also an option is provided to map the limit package at Global level (a system created group with all internal and external touch points).

- **Touch Points/ Group** Name of touch points/ groups under a specific entity to which the limit packages are to be mapped. Also an option is provided to map the limit package at Global level (a group created with all internal and external touch points).
- Package
   List of the packages which can be mapped to touch points/ groups.

   Only limit packages maintained for the selected touch point/group will get listed here.
- **Roles** Application roles like maker, checker etc. maintained under respective user type are listed.

Multiple application roles can be mapped to the user.

Application roles mapped to the corporate in Party preference screen will be available for selection here.

#### **Touch Points**

**Select Touch Points** The touch points (banking channels) allows a user to perform transactions using the touch points.

The touch points could be:

- Mobile Application
- Mobile (Responsive)
- Internet
- Missed Call Banking
- SMS Banking
- Wearables
- Snapshot
- Siri / Chatbot
- API Access
- Soft Token Application
- 3. In the **User Name** field, enter the name of the user.
- 4. Click **Check Availability** to check the uniqueness of the user ID, to ensure that it has not already been used.
- 5. In the Personal Information section, enter the relevant information.
- 6. In the **Contact Details** section, enter the relevant information.

- 7. Add the user groups to be assigned to the user in the **User Groups** field.
- 8. In the **Limits** section, select the limit packages to be mapped to touch points from the limit package list.
  - a. Click C to reset the limit package assigned.
  - b. Click (1) to view the details of touch points group. The **View Details -Touch Point Group** popup window appears. For more information, refer the **Touch Point Group - View Details** section below.
- 9. Select the roles to be mapped from the **Roles** section.
- 10. Select the touch points to be mapped to the user from the **Touch Points** section.

Click **Cancel** to cancel the operation and navigate back to 'Dashboard'. OR

Click **Back** to go back to previous screen.

14. The success message of user creation appears along with the transaction reference number.

Click  $\ensuremath{\text{OK}}$  to complete the transaction.

# 5.2 <u>User Management – Search/ View User</u>

Using this option, Corporate Administrators can search and view details of the existing users. Administrator can search only those users who are associated with the same party ID mapped to him.

Corporate administrators can also change the user status or the channel access permission for a user using this screen.

Default search is available with User Name, whereas user can be searched by providing other details also.

**Device Registration** 

Field Name	Description
Android Devices	This option lets the administrator to deregister the android devices/s. Enabling of the device happens when the user installs and registers on the app on the android device. Administrator cannot manually enable the device.
	If the Administrator deregisters the device, the user gets logged out from all the android devices and his alternate login gets disabled from all the android devices on which the user has installed the application.
iOS Devices	This option lets the administrator to deregister the iOS devices/s. Enabling of the device happens when the user installs and registers on the app on the iOS device. Administrator cannot manually enable the device.
	If the Administrator deregisters the device, the user gets logged out from all the iOS devices and his alternate login gets disabled from all the iOS devices on which the user has installed the application.
Push Notifications	
Android Devices	This option lets the administrator disable push notifications for android devices. Enabling of the push notification is done by user himself and administrator cannot do the same.
	If the administrator disables this, the user will stop getting notifications as a pop-up message (push notification) on the user's registered mobile number.
iOS Devices	This option lets the administrator disable push notifications for iOS devices. Enabling of the push notification is done by user himself and administrator cannot do the same.
	If the administrator disables this, the user will stop getting notifications as a pop-up message (push notification) on the user's registered mobile number.

**Note:** To receive push notifications (for both iOS and android) user will have to allow the same on the device settings

 Click Edit to edit the user details. The User Management - Edit User screen appears. OR Click Reset Password to reset user's password. A warning message 'Do you want to

reset the password?' appears on the screen. If user clicks 'Yes', a reset password confirmation screen is displayed. New password gets communicated to the user on registered email address (if the alert for the same is maintained) and the record for that user gets available in the Print password screen, from where it can be printed. If user clicks 'No', the action gets cancelled.

OR

Click  $\mbox{Cancel}$  to cancel the operation and navigate back to 'Dashboard'. OR

Click **Back** to go back to the previous screen.

OR Click Download Profile to download the user details.

#### User Management - Change user status

This section allows you to lock and unlock a user.

#### To lock or unlock a user:

 Enter the search criteria, click Search. The search results appear on the User Management screen based on the search parameters.

#### Limit

If limit check is required, update a limit package for applicable touch points. All the touch points and touch point groups maintained in the system are listed. Packages can be mapped for each touch point and for touch point group. Also an option is provided to map the limit package at Global level (a system created group with all internal and external touch points).

Touch Points/ Group	Name of touch points/ groups under a specific entity to which the limit packages are to be mapped.
Package	List of the packages which is to be mapped to the touch point/group. Only limit packages maintained for the selected touch point will get here.
Roles	Application roles like maker, checker etc. maintained under respective user types are listed.
	Multiple Application roles can be mapped to the user.
	Application roles mapped to the corporate in Party preference screen will be available for selection here.
Touch Points	

Field Name	Description						
Select Touch Points	The touch points (banking channels) allows a user to perform transactions using the touch points.						
	The touch points could be:						
	Mobile Application						
	Mobile (Responsive)						
	Internet						
	Missed Call Banking						
	SMS Banking						
	Wearables						
	Snapshot						
	Siri / Chatbot						
	API Access						
	Soft Token Application						
Device Registration							
This section does not a	appear if you select Administrator option from User Type list.						
Android Devices	This option lets the administrator to deregister the android devices/s. Enabling of the device happens when the user installs and registers on the app on the android device. Administrator cannot manually enable the device.						
	If the Administrator deregisters the device, the user gets logged out fror all the android devices and his alternate login gets disabled from all th android devices on which the user has installed the application.						
iOS Devices	This option lets the administrator to deregister the iOS devices/s Enabling of the device happens when the user installs and registers o the app on the iOS device. Administrator cannot manually enable th device.						
	If the Administrator deregisters the device, the user gets logged out fror all the iOS devices and his alternate login gets disabled from all the iOS devices on which the user has installed the application.						
Push Notifications							
Android Devices	This option lets the administrator disable push notifications for android devices. Enabling of the push notification is done by user himself an administrator cannot do the same.						
	If the administrator disables this, the user will stop getting notifications a a pop-up message (push notification) on the user's registered mobil number.						

Field Name	Description
iOS Devices	This option lets the administrator disable push notifications for iOS devices. Enabling of the push notification is done by user himself and administrator cannot do the same.
	If the administrator disables this, the user will stop getting notifications as a pop-up message (push notification) on the user's registered mobile number.
	<b>Note:</b> To receive push notification user will have to allow the same on the device settings

- 3. In the **User Name** filed, enter the required details. Click **Check Availability** to check the uniqueness of the user ID, to ensure that it has not already been used.
- 4. In the **Personal Information** section, enter the required details.
- 5. In the **Contact Details** section, enter the required details.
- 6. Add the user groups to be assigned to the user, in the User Groups field.
- 7. In the **Limit** section, select the limit packages to be mapped to touch points from the limit package list.
  - a. Click C to reset the limit package assigned.
  - b. Click (i) to view the details of touch points group. The View Details popup window appears. For more information, refer the Touch Points Group View Details section below.
- 8. Select the roles to be mapped to the user from the Roles section.
- 9. Select the touch points to be mapped to user from the **Touch Points** section.

### <u>FAQ</u>

#### 1. Can I edit the party id mapped to the user?

No, party ID mapped to the user cannot be edited. It is defaulted to the party id mapped to Corporate Administrator.

#### 2. When does the system update a user status as 'locked'?

When administrator needs to temporarily block access for any user, 'Lock user' functionality can be used. Also if there are multiple unsuccessful login attempts, the user's status will get updated as 'Locked'.

#### 3. Can I set the user name which is already used in the application?

No, uniqueness of a user ID is checked while creating or modifying a user.

#### 4. Can one assign multiple Application roles to a user?

Yes, multiple Application roles can be assigned to the user. e.g. Corporate user is acting as maker of few transactions and approver of few other transactions.

#### 5. What are the different child roles available out of box?

Following are the child role associated with corporate user role out of box.

User Type	Application Roles
Corporate User	Maker
	Checker
	Viewer
	Corporate Admin Maker
	Corporate Admin Checker
Corporate Non Customer (This falls under Corporate User Type)	Non Customer Maker
	Non Customer Checker
	Non Customer Viewer
	Non Customer Corp Admin Maker
	Non Customer Corp Admin Checker

# 6. Can I update the limit package associated with a user, If Yes, what will happen to the in-flight transactions?

Yes, new limit package can be mapped to a user. Limits get applied from an immediate effect if the effective date is less than or equal to current date. And if the effective date is future date, the limit package will be applied from the date available in the package.

# 7. If I update the child role associated to a user, what will happen to the in-flight transactions?

In case of any update of child roles mapped to the user as edit user functionality, the privileges associated with new child roles get applied to the user with an immediate effect. So if any transaction is pending with approver for approval, user can view and approve those transactions only if checker role is mapped to him. As soon as checker role is unmapped, then user will not be able to view and approve the transactions which were pending for his approval.

# 8. Can a corporate administrator create a corporate user and assign multiple entities?

No, currently corporate administrator cannot create a corporate user with multiple entities.

# 9. If a user's User ID is locked and he/she has requested for a reset password, does the admin needs to unlock it separately ?

No, the user ID will automatically get unlocked at the time of resetting the password by Admin.

Home

## 6. Party Preference

Party Preferences maintenance enables the Bank to define certain parameters for a party like limits, approval flow, channel access permission etc. This maintenance is done only for corporate type of parties and is not applicable for retail type of parties.

Corporate Administrators can only view the preferences set for a corporate party by accessing the Party Preferences screen. Corporate Administrator does not have the rights to maintain or edit the party preferences

Parameter values maintained against a corporate party defines the system behavior for the following:

- Cumulative daily limits per transaction for the corporate party
- User Transaction Limits Transaction limits for the users
- Type of Approval flow applicable
- Channel Access Preferences
- Availability of Corporate Administrator facility

#### Prerequisites

- Party preference is maintained by the Bank administrator
- Approval rule set up for Corporate Administrator
- Corporate Administrator is maintained for a party
- Transaction access is provided to Corporate Administrator

#### Features Supported In Application

Party Preference maintenance available for Corporate Administrator users in the application includes;

• View Party Preferences

#### How to reach here:

Corporate Administrator Dashboard > Toggle menu > Menu > OnBoarding > Party Preferences OR Corporate Administrator Dashboard > Quick Links > OnBoarding > Party Preferences

### 6.1 Party Preferences - View

Corporate Administrator logs into the system and navigates to the Party Preferences screen.

System displays the preferences maintained for the Party linked to the Corporate Administrator. Corporate administrator can view the details but cannot edit anything in the screen.

Field Name	Description	
Party ID	Party ID mapped to the logged in Corporate Administrator.	
Party Name	Party name of Party ID mapped to the logged in Corporate Administrator.	
Grace Period	Provision of time period is made to allow user to approve the transact after the actual due date.	
	<b>Note</b> : The tooltip with information will appear on dashboard in the Pending for Approvals section only when the user hovers on grace period.	
Grace Period Expiry Alert	Displays the days prior to Grace Period Expiry ,to alert Maker and Approver regarding transaction approval expiry period.	

Field Name	Description	
Occurrence	Displays the alert preference set is recurring or needs to be sent once.	
Alert on Transaction Expiry	Displays the alert is required to be sent on the transaction expiry date or not.	
Approval Flow	The approval type for the party.	
	It can be one of the following options:	
	Sequential	
	Parallel	
	No Approval	
Channel Access	Whether the corporate user can transact through channel banking. It can be one of the following:	
	<ul> <li>Enable : Allows corporate administrator to enable the party for channel access</li> </ul>	
	<ul> <li>Disable: Allows corporate administrator to disable the party for channel access</li> </ul>	
Forex Deal Creation	Whether users associated with a party can create forex deals. It can be one of the following:	
	<ul> <li>Enable: If this option is enabled, corporate user associated with this party can create forex deals.</li> </ul>	
	• Disable: If this option is disabled, corporate user associated with this party cannot create forex deals.	
Corporate Administrator Facility	Whether the corporate has Corporate Administrator rights and can one of the user perform the administrator functionalities on behalf of Party. It can be one of the following:	
	Enable	
	Disable	
Accessible Roles	This field lists the type of roles that will be available to the Corporate Administrator while on-boarding a user for the corporate party.	
	Corporate administrator will be able to onboard, modify, reset password, enable/disable user ID and grant/deny channel access (using User Management screen) only for the users having the roles assigned in this field.	
	Corporate Administrator will be able to view the details of all the users using User Management screen) associated to his party irrespective of the roles assigned here.	

Field Name	Description
	Out of the box Application roles available for a corporate are:
	<ul> <li>Corporate Admin Maker – If this is selected, Corporate Administrator will be able to onboard a user in corporate admin maker role.</li> </ul>
	<ul> <li>Corporate Admin Checker – If this is selected, Corporate Administrator will be able to onboard a user in corporate admin checker role.</li> </ul>
	<ul> <li>Maker – If this is selected, Corporate Administrator will be able to onboard a user in corporate maker role.</li> </ul>
	<ul> <li>Checker – If this is selected, Corporate Administrator will be able to onboard a user in corporate maker role.</li> </ul>
	<ul> <li>Viewer – If this is selected, Corporate Administrator will be able to onboard a user in corporate viewer role.</li> </ul>
	For Non Customer Corporate, the options are:
	<ul> <li>Non Customer Corporate Admin Maker – If this is selected, non-customer corporate administrator will be able to onboard a user in non-customer corporate admin maker role.</li> </ul>
	<ul> <li>Non Customer Corporate Admin Checker – If this is selected, non-customer corporate administrator will be able to onboard a user in corporate non-customer admin checker role.</li> </ul>
	<ul> <li>Non Customer Corporate Maker – If this is selected, non- customer corporate administrator will be able to onboard a user in corporate maker role.</li> </ul>
	<ul> <li>Non Customer Corporate non-customer Checker – If this is selected, corporate administrator will be able to onboard a user in non-customer corporate maker role.</li> </ul>
	<ul> <li>Non Customer Corporate Viewer – If this is selected, corporate administrator will be able to onboard a user in non-customer corporate viewer role.</li> </ul>
Cumulative Limit	

This displays the cumulative daily limits (CCL) package associated to the party. All the touch points and touch point groups for which the limit package is associated are displayed here.

Touch Points/ Group	Name of touch points/ groups maintained, for which the limit package is to be mapped. Also the limit package mapped at Global level can be seen (a system created group with all internal and external touch points).
Package	Limit packages mapped for the selected touch point will get listed here.

#### Field Name Description

#### **User Limits**

This field displays customer user level limits (CUL) mapped to the party. All the touch points and touch point groups for which the limit package is associated are displayed here. Also an option is provided to show the limit package mapped at Global level (a system created group with all internal and external touch points).

<b>Touch Points/ Group</b>	Name of touch points/group maintained, for which the limit packages are
	mapped.

Package List of the packages mapped to touch points/ group are listed here.

1. Click **Cancel** to cancel the transaction and navigate back to '**Dashboard**'.

## <u>FAQ</u>

#### 1. What is sequential type of approval flow?

Under Sequential approval flow, the approval can be done only in the sequence as mentioned in approval workflow. So, at the first level of approval, users/ user groups who are assigned to authorize only can view and approve the transaction. After the transaction is approved by level 1 user, the users/ user groups having rights for second level of approval will be able to view and authorize the transaction. The transaction is marked as approved only after the user at the last level approves/ authorizes it.

#### 2. What is Parallel type of approval flow?

It is "Non-Sequential" type of approval flow which doesn't follow any specific sequence. Any user (who is part of the approval flow) from any approval level can pick up the transaction/maintenance and approve it. The transaction/maintenance is marked as approved if one user from each approval level (as configured) has approved/ authorized the transaction.

#### 3. What is cumulative daily limit package?

This limit package acts as a cumulative limit for all users of a corporate party and is utilized as and when any user authorizes the transaction as a final approver. The daily limit per transaction and number of transactions allowed limit is checked and updated against the cumulative limit set. It is mandatory to assign a cumulative daily limit package to each party preference created.

#### 4. What is User limit package?

This limit package is applicable for all users of the party (Users to whom this party ID is mapped as primary Party ID). This package will be overridden by User level limits package, if defined, at User Maintenance.

# 5. Can corporate administrator view the party preference maintained for a linked party?

No, preferences can be viewed only of a primary party ID mapped to a logged in corporate administrator.

<u>Home</u>

## 7. Party to Party Linkage

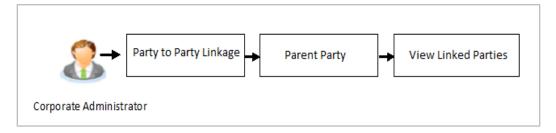

Party to Party linkage is required by medium and large corporates if the user(s) of the parent company needs to access accounts of the subsidiary companies. For e.g. consider a case wherein say 'ABC Industries' is the parent company with a subsidiary company 'PQR Enterprises' and the users of ABC Industries needs to access accounts of PQR Enterprises to carry out transactions and/or inquiries. The corporate will provide a mandate/ board resolution to the bank for creation of Party to Party linkage. Bank Administrator will setup a Party to Party linkage by selecting the parent party and the parties to be linked.

Corporate Administrators can only view party to party linkage. They do not have the rights to maintain or edit the party linkages.

#### **Pre-Requisites**

- Party preferences should be maintained for the parent as well as the party to be linked
- Channel Access should be enabled for both the parent as well as the party to be linked

#### Workflow

#### Features Supported In Application

The following options are available as part of P2P linkage maintenance

View an existing Party to Party Linkage

#### How to reach here:

Corporate Administrator Dashboard > Toggle menu > Menu > OnBoarding > Party To Party Linkage

Once the logged in user navigates to the Party to Party Linkage screen, they can view linkages that have been maintained for the parent party. A corporate admin user can only view the linkages. Linkage creation rights are not provided.

## 7.1 Party to Party Linkage- View

The Corporate Administrator can view the details of the linked parties to the parent party id.

#### To view the party to party linkage:

1. Navigate to the **Party to Party Linkage** screen.

## 8. Limits Definition

Limits are defined by the bank to set up amount and duration based restrictions on the transactions that can be carried out by the user.

As part of limits definition maintenance, following limits can be defined:

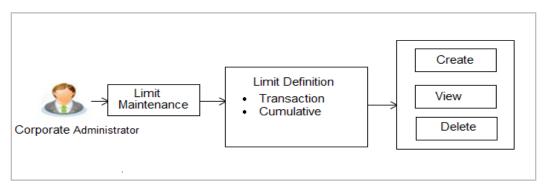

- Transaction: It is the initiation limit with minimum and maximum amount defined
- Cumulative: It is the collective transaction amount limit for all the transactions that can be performed during a day and maximum number of transaction in a day

Limit package maintenance allows the administrator to map these definitions to every transaction.

#### **Pre-Requisites**

- Transaction access is provided to Corporate Administrator.
- Approval rule set up for Corporate Administrator to perform the actions.

#### Workflow

#### Features supported in application

Using this option Corporate Administrator can perform the following actions:

- Search/ View Limits
- Create Limit
- Delete Limits

#### How to reach here:

Corporate Administrator Dashboard > Toggle menu > Menu > Limits > Limits Definition

## 8.1 Limits Definition - View

Using this option, Administrator can search for particular limit based on different search parameters. The search results displays a limit list based on different search filters selected.

#### To search and view limits:

 In the Limits Definition screen, enter the search parameters and click Search. The Limits Definition screen with search results appears based on the searched criteria. OR

Click **Cancel** to cancel the search process. OR

Click **Clear** to reset the search parameters.

## 9. Limits Package Management

Limit package is a group of transaction limits. As part of the limit package management, defined limits (created through 'Limit Definition') can be mapped to each transaction or to a transaction group (Created using Transaction Group Maintenance). Each package is associated with a specific channel/touch point or with a group of touch points.

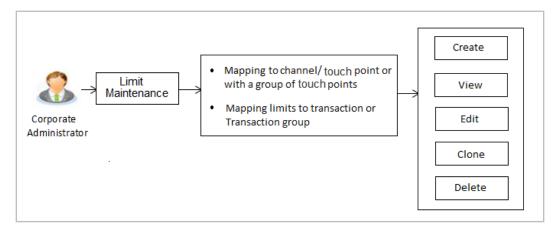

The limits packages once created can be mapped to

- User Type using System Rules maintenance
- Party using Party Preferences (Cumulative User Limits and Cumulative Customer limits)
- User using User Management

#### Prerequisites:

Required Limits (i.e. Transaction/ Cumulative) should be defined for association to transactions in limits package

#### Workflow

#### Features supported in application

The administrator can perform the following actions:

- Search/ View Limit Package
- Create Limit Package
- Edit Limit Package
- Clone Limit Package
- Delete Limit Package

#### How to reach here:

Corporate Administrator Dashboard > Toggle Menu > Menu > Limit > Limit Package Management

## 9.1 Limit Package Management - View

Using this option, Corporate Administrator can search for particular limit package created for a specific channel/ touch point based on different search parameters. The search results displays a list or particular limit package based on different search filters selected.

If the search parameters are not specified, records of all the packages maintained in the application are displayed.

#### To search and view limit package:

 In the Limit Package Management screen, click Search. The Limit Package Management screen with search results appears based on the searched criteria. OR Click Clear to reset the search parameters. OR

Click **Cancel** to cancel the search process.

#### Limit Package Management - Search

## <u>FAQ</u>

# 1. Can I delete transaction and/ or cumulative limits against a transaction in limit package?

No, existing limits against a transaction cannot be deleted; it can only be edited if effective date is starting from a future date.

## 2. Why am I unable to delete a limit through limit definition screen?

There is a possibility that the limit that you are trying to delete is associated in the limit package against a transaction(s) and therefore the system is not allowing you to delete the same.

## 3. Why am I unable to delete limits package through limit Package?

There is a possibility that the limit package that you are trying to delete is associated with a user.

## 4. As part of edit, what can I update in the limits package maintenance?

You can edit the transaction and/ or cumulative limits against the transaction. You can delete the transaction(s) from the limits package and/or you can also add new transaction(s) as part of the limits package?

# 5. Have created/ edited/ deleted Limits and/ or Limits package but it is not reflecting in the system even after a successful maintenance save message?

There is a possibility that the maintenance is saved but the status is 'Pending Approval'. For the maintenance, if there is an approval required then the changes will reflect only once the approver(s) approve the submitted request. If the setup does not require an approval workflow or is self / auto approved, then the same will reflect immediately.

Home

## 10. Approvals

In a Corporate each user is assigned a particular task to perform as per their role in the organization. For instance, some user(s) may be given rights to do data entry for transactions such as domestic fund transfer, draft issuance by logging in to channel banking. Transaction created by initiator in the system is routed to the appropriate authorized signatory or group of signatories for approval depending upon the rules configured. A transaction once approved by all the required approvers gets processed.

Approval Management function enables the Corporate Administrator to configure approval flows for various financial and non-financial transactions on channel banking for the linked corporate party.

Approval flow includes configuration of rules for the users with following access types:

- Maker/ Initiator User who is a creator of the transaction.
- Authorizer/ Approver User who authorizes the transactions created by the maker. His authorization rights are maintained by an administrator.

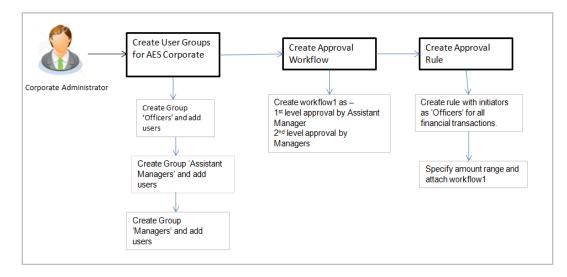

## Features supported in application

Approval management supported for Corporate Administrator users in OBDX includes;

- Workflow Management
- Rule Management

#### Business scenario

AES Corporation wants to enable approval workflow for all financial transactions. The requirement is – All the financial transactions will be initiated by 'Officers' of the corporate. The transactions initiated by 'Officers' should be sent to 'Assistant Managers' for 1st level approval. After the transaction is approved by any one user from a group of 'Assistant Managers' then the transaction should be sent to 'Managers' for final level of approval. The transaction processing should happen only after final approval.

## 10.1 Workflow Management

The Approval workflow management is maintaining series of approval levels that are necessary to complete an approval flow. It is triggered when initiators initiate a transaction. As per the approval workflow maintenance, the transaction will follow the levels of approvals and complete the transaction only when one of user from all the approval levels approves the transaction.

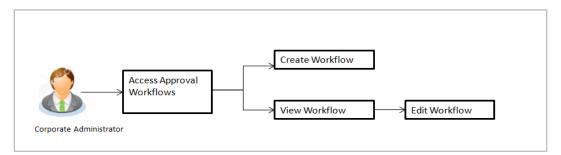

The Workflow Management allows Corporate Administrator to:

- Create Workflow Management
- View Workflow Management
- Edit Workflow Management

## Prerequisites:

- Party preference is maintained
- Corporate Administrator is maintained for the party
- Transaction access is provided to Corporate Administrator
- Multiple corporate users are maintained under a party
- Approval rule set up for Corporate Administrator to perform the actions
- Necessary user groups are maintained

## Workflow

## How to reach here:

Corporate Administrator Dashboard > Quick Links > Approvals > Workflow Management OR

Corporate Administrator Dashboard > Toggle Menu > Menu > Approvals > Workflow Management

## Note:

- Once a transaction is initiated by the Corporate maker, system checks for the account access of all the approver/s (found as part of approval rule/workflow maintained). In case approver/s at one or more level does not have the required account access for the account/s involved in the transaction, system rejects the transaction and an alert will be triggered to initiator notifying the same.
- 2) Approval Workflow can also be maintained for Non Customer Corporate users (for which the party id is not maintained in UBS or in Core banking system). For such cases i.e. non customer

corporates (counterparties on boarded by Corporates) the system will look for the party ID in OBSCF/OBCMS.

## 10.1.1 Workflow Management – Summary

Corporate Administrator logs into the system and navigates to the Approval Workflow screen; workflows maintained (if any) under a party mapped to the user are displayed on the screen. User can opt to view the details of existing workflows or can create new approval workflow using this screen.

## 10.2 Rules Management

This function enables the Corporate Administrator to set up conditions for approval as per the bank/ corporate requirements. Rule can be set up for financial transactions, non-financial transactions for maintenances. Flexibility exists to define approval rules with conditions stating that and 'specific transaction' if initiated by a 'specific user/user group' has to be approved by a 'specific approver/approver group' along with other attributes like amount range etc.

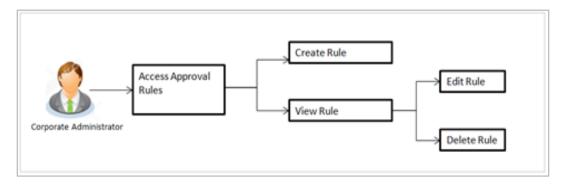

## Prerequisites:

- Party preference is maintained for setting up rules for corporates •
- Corporate Administrator is maintained for a party
- Transaction access is provided to Corporate Administrator •
- Corporate users are maintained under a party •
- Workflow configuration is maintained if approval required is to be set as 'Yes' •
- Approval rule set up for Corporate Administrator to perform the actions .

Necessary user groups and approval workflows are maintained

## Workflow

## Features supported in application

The Approval Rule maintenances allow the Corporate Administrator to:

- Create Approval Rules
- View Approval Rules
- Edit Approval Rules
- Delete Approval Rules

## How to reach here:

Corporate Administrator Dashboard > Quick Links > Approvals > Rules Management OR Corporate Administrator Dashboard > Toggle Menu > Menu > Approvals > Rules Management

## Note:

- Once a transaction is initiated by the Corporate maker, system checks for the account access of all the approver/s (found as part of approval rule/workflow maintained). In case approver/s at one or more level does not have the required account access for the account/s involved in the transaction, system rejects the transaction and an alert will be triggered to initiator notifying the same.
- Approval rules can also be maintained for Non Customer Corporates (for which the party id is not maintained in UBS or in Core banking system). For such cases i.e. non customer corporate (counterparties on boarded by Corporates.

## 10.2.1 Rules Management- Summary

Corporate Administrator logs into the system and navigates to the Rules Management screen, approval rules maintained (if any) for the party mapped to the user are displayed on the screen. User can view the details of existing rules or can create new approval rule using this screen.

Click Cancel to cancel the operation and navigate back to 'Dashboard'.

OR

Click Back to go back to previous screen.

## 10.2.3 Rules Management- Create

Corporate Administrator can create approval rules for the corporate users. Administrator is allowed to create an approval rule only if the party preference is maintained and is in active status.

Rules management can be done based on the following parameters.

## Type of Transactions

- Financial Transactions
  - To set the rules for the transactions, which involves exchange of money
  - E.g. Money Transfer, Draft Issuance, Redeem Term Deposit etc.
- Non Financial Transactions
  - To set the rule for the transaction which are for an account, but does not involve exchange of money
  - E.g. Cheque Book Request, Statement Request, Stop Cheque etc.
- Maintenance
  - To set the rule for the transaction which are at the party level and not for a specific account
  - E.g. Payee Maintenance, Biller Maintenance etc.
- Non Account Financial Transactions: This option is used to setup approval rules for the transaction with amount range and no debit account
  - E.g. Initiate LC, Supply Chain Finance related transactions i.e. Create Invoice.

#### Initiator

- Specific User
- User Group
  - All Users

#### Accounts

### Transactions

#### Currency

#### **Amount Range**

Administrator can create multiple approval rules for party users. In a scenario when a transaction is initiated and multiple rules are applicable as per set conditions, then the complex rule amongst all the applicable rules is applied for approval.

User can further define if for a condition, the transaction should be auto approved (which means there is no approval workflow and the transaction gets approved as soon as initiator submits it) or should follow a set approval workflow and should get approved by the defined set of approvers. The same is achieved by attaching a workflow maintained for the corporate party.

#### To create an approval rule:

1. Click **Create**. The **Approval Rules - Create** screen appears.

	The transaction rule types for a non-customer-corporate user are:			
	Maintenance			
	Non Account Financial			
Rule Code	Approval rule code provided by the user.			
Rule Description	Approval rule description provided by the user in editable form.			
Initiator				
Initiator Type	Initiator type who initiates the transaction will be displayed and it will be one of these User / User Group Name of the user or user group as initiator will be displayed in editable form.			
	If initiator is selected as User, then all the users belonging to the party will be listed for selection.			
	If initiator is selected as User Group, then all the user groups belonging to the party will be listed for selection.			
	If Initiator is selected as 'All Users', then the rule which is being created is applicable for all users of Corporate Party.			
Transactions				
Transactions	Type of transactions to set the approval rules will be displayed in editable form.			
	Type of transactions depends on the selection of rule type.			
Accounts				
Accounts	List of accounts will be displayed in editable form.			
	This field appears if you select <b>Financial</b> and <b>Non Financial</b> in the <b>Rule Type</b> field.			
Currency				

Field Name	Description
Currency	Name of Currency in which the financial approval rule for a corporate is defined.
Amount Range	
From Amount	Transactions allowed for the user from (beginning of the amount ranges).
	This field appears if you select <b>Financial and Non Account</b> <b>Financial</b> in the <b>Rule Type</b> field.
To Amount	Transactions allowed for the user to (end of the amount ranges).
	This field appears if you select <b>Financial and Non Account</b> <b>Financial</b> in the <b>Rule Type</b> field.
Workflow Details	
Approval Required	Whether approval is required or not will be displayed in editable form.
Workflow Details	Details of the approval workflow along with the defined approval levels for a condition will be displayed in editable form.
	This field appears if you select <b>Yes</b> in the <b>Approval Required</b> field.

- 3. Edit the required details.
- Click Save to save the approval rule.
   OR
   Click Cancel to cancel the operation and navigate back to 'Dashboard'.
   OR
   Click Back to go back to previous screen.
- The Rules Management Edit Review screen appears post necessary validations. Verify the details, and click Confirm. OR Click Cancel to cancel the operation and navigate back to 'Dashboard'. OR Click Back to go back to previous screen.
- The success message of saving the approval rule modification appears along with the transaction reference number and status.
   Click OK to complete the transaction and navigate back to 'Dashboard'.

## 10.2.5 Rules Management - Delete

Using this option, Corporate Administrator can delete the approval rules.

## To delete an approval rule:

- 1. In the **Rules Management** screen, click the **Rule Code** link, for which you want to view the details. The **Rules Management View** screen appears.
- Click **Delete** to delete the approval rules. The application will prompt the Corporate Administrator with a deletion message, Click **Yes** to confirm. User is directed to **Rules Management – Delete** confirmation page.

### **Rules Management - Delete**

## <u>FAQ</u>

### 1. Can user be a part of multiple user groups created under a party?

Yes, same user can be part of multiple user groups. Whereas creating a user group without any user is not allowed.

#### 2. Maximum how many levels of approvals one can set up?

Administrator can set up minimum one and maximum five levels of approvals as a part of approval workflow.

3. Which approval rule will get applied when multiple applicable approval rules are found for specific transaction?

In a scenario when a transaction is initiated and multiple rules are applicable as per set conditions, then the complex rule amongst all the applicable rules is applied for approval.

# 4. What happens to the approval process when approval rule gets edited when a transaction is pending with one of the approver for approval?

Edited rules are applicable for new transactions initiated post rule modification. Previously initiated transactions which are pending for approval will follow a rule which was already applied at the time of transaction initiation.

Home

## 11. Account Access

Access management enables the Corporate Administrator to enable access of accounts of the corporate party for channel banking. With this access defined, users of the corporate party can transact on their own or linked party accounts through internet banking. They can view accounts, statements, initiate payments, upload files, and various other transactions available for corporate users.

Account access management maintenance is designed to allow and/ or restrict the corporate accounts for online access. Typically, there are multiple users from different departments who transact on behalf of the corporate using specific accounts and specific transactions.

- Party Account Access
- User Account Access
- Party Resource Access
- User Resource Access

## 12. Party Account Access

Corporate Administrator can set up account and transaction access rules at the corporate party level. The Corporate Administrator can provide access to accounts held by the party with the bank as available in the core banking application.

Upon navigating to the specific category tab viz. Demand Deposits, Term Deposits, Loans etc., the administrator can select a global check box of 'Map all accounts' to enable all the existing accounts under the selected category for channel banking. If specific accounts are required to be given access then the user needs to select the respective check boxes preceding the account number.

As part of this maintenance, own accounts and transaction mapping as well as accounts of the linked parties can be mapped to the parent party.

The Corporate Administrator can only provide access to the party to which the corporate administrator is associated to.

Corporate Administrator cannot provide access to the party to which the administrator is not associated to.

**Note**: 1) Access Management for Loan Accounts are for accounts fetched from Core Banking System i.e. FCUBS. It is not supported for accounts from Oracle Banking Corporate Loan (OBCL) system.

2) Linked Party Access Management can be provided to parent party or users of the parent party only for Account Types CASA, TD and Loans.

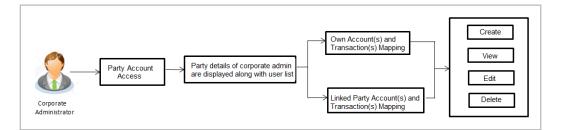

3) Linked party account mapping is not supported for Account Types 'VAM-Real Accounts, Virtual Accounts and Liquidity Management'.

If there is any party to party linkage maintained in the mid-office system 'OBLM', then those accounts will appear in own account linkage itself on the OBDX side for access management.

## **Pre-Requisites**

- Corporate Administrator has the required rights to provide account and transaction access to the corporate party
- Party preferences should be created for the party of the user for which access is to be maintained
- Channel Access should be enabled for party for which account access is to be maintained
- Account access maintenance for linked party accounts can be done once there is a party to party linkage maintained.

#### Workflow

## **Features Supported In Application**

The following options are available as part of this maintenance:

- Party Account Access Mapping (Own accounts and linked party accounts)
- Party Account Access View (Own accounts and linked party accounts)
- Party Account Access Edit (Own accounts and linked party accounts)
- Party Account Access Delete (Own Accounts and linked party accounts)

## How to reach here:

Corporate Administrator Dashboard > Quick Links > Account Access > Party Account Access OR

Corporate Administrator Dashboard > Toggle menu > Menu > Access Management > Account Access > Party Account Access

## 12.1 Party Account Access - Mapping (Create)

The Corporate Administrator can map list of account(s) and transactions for which access needs to be provided to the party.

Party ID and Party Name of the corporate administrator are defaulted and not allowed for input.

#### To provide the party with account and transaction access:

- Navigate to the screen, account access summary page with two sections Own Account Mapping Summary and Linked Party Account Mapping Summary appears. Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained.
- 2. Click on **Map** to map the transactions and account OR

Click **Cancel** to cancel the transaction.

## **Field Description**

Field Name	Description
Party ID	The party ID of the corporate administrator.
Party Name	The name of the party.

#### **Own Account Mapping Summary**

Click on Account Type to view the respective mapping details.

- Account Type All account types available under the party. The account type can be:
  - Current & Savings
  - Term Deposits
  - Loans
  - Liquidity Management
  - Virtual Account Management Real Account
  - Virtual Account

# Total Number of<br/>AccountsTotal number of accounts available under the party.

Number of AccountsNumber of accounts mapped to the particular account type.Mapped

#### Field Name Description

### Linked Party Account Mapping Summary

Click on Account Type to view the respective mapping details.

- 3. If there is no mapping done for a party (own/ linked), there will be a message **No** Accounts mapped for the party with Map.
- Click Map. The Party Account Access Create screen appears. OR Click Cancel to cancel the transaction. OR Click Back to navigate to the previous screen.
- 5. All the accounts held by the selected party as a relationship with the bank as available in the core banking system or the respective mid office system will be fetched and displayed in the respective categories i.e. Current and Savings, Term Deposits, Loans, Liquidity Management, Virtual Account Management Real Account, Virtual Account.. In case of mapping of linked party accounts to the parent party, user will select the parent party as part of party search section and click **Map** against the linked party of which account access is to be provided.
- 6. Navigate to the specific category tab viz. Current Savings, Term Deposits, Loans, Liquidity Management, Virtual Account Management Real Account, Virtual Account etc., and select a global check box of **Map all accounts** to enable all the existing accounts under the selected category for channel banking (on screen, it will serve as a **Select All** function).

OR

If specific accounts are required to be given access then the user needs to select the respective check boxes preceding the account number.

 To map the new accounts, select appropriate option from Map Accounts field; Select Auto if you wish to allow access to all future Current and Savings/Term Deposits/ Loans, Liquidity Management/ Virtual Account Management – Real Account/ Virtual Account. OR

Select **Manual** if you wish to explicitly map new accounts and transactions.

8. The cookie message appears at the bottom of the category tab indicating the administrator that account mapping for other category tabs can be done by visiting the respective tabs.

### Party Account Access - Transaction- Account Mapping (Linked Account)- Create

10. To map the transactions to the account, click against the particular account number to view the transaction mapping.

11. Select the respective check boxes preceding the transaction to be mapped. OR

Select Map All Transactions, if you want to map all the transactions to all accounts.

12. Click **Save** to save the changes.

OR Click **Cancel** to cancel the transaction. OR Click **Back** to navigate to the previous screen.

- 13. The **Party Account Access Review** screen appears. Verify the details, and click **Confirm**.
  - OR

Click **Cancel** to cancel the transaction.

OR

Click **Back** to navigate to the previous screen.

 The screen with success message appears. Click OK to complete the transaction. After following above steps the summary of mapped accounts and transactions available for party.

# 12.2 Party Account Access- View

The Corporate Administrator can view the list of account(s) and transactions for which access has been provided to the party.

Account(s) and transactions for which access has been provided to the corporate party.

Party ID and Party Name of the corporate administrator are defaulted and not allowed for input. User list of the corporate party is displayed with details like user ID, user name and mapping details.

#### **Field Description**

Field Name	Description
Party ID	Party Id of the corporate user.
Party Name	Party name of the corporate user.

#### To view the party account and transaction access:

 Navigate to the screen, account access summary page with two sections Own Account Mapping Summary and Linked Party Account Mapping Summary appears. Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained. OR Click Cancel to cancel the transaction.

 Click Account Type i.e. Current and Savings / TD / Loans/ Liquidity Management/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page. OR

Click  $\ensuremath{\textbf{Cancel}}$  to cancel the transaction and navigate back to 'Dashboard'. OR

Click **Back** to navigate to the previous screen.

Party Account Access - Transaction- Account Mapping (Linked Account Mapping) - View

Click against the particular account number to view the mapped transactions.
 OR

Click **Edit** to update transaction mapping. OR Click **Cancel** to cancel the transaction.

 Click Edit to update the Party Account Access account mapping for new accounts and existing accounts. OR Click Cancel to cancel the transaction. OR Click Back to navigate to the previous screen.

# 12.3 Party Account Access - Edit

This option enables the corporate administrator to edit the transaction access for the party.

Party ID and Party Name of the corporate administrator are defaulted and not allowed for input.

#### To edit account and transaction access for the party:

 Navigate to the screen, account access summary page with two sections Own Account Mapping Summary and Linked Party Account Mapping Summary appears. Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained. OR

Click **Cancel** to cancel the transaction.

 Click Account Type i.e. Current and Savings/ Term Deposits/ Loans/ Liquidity Management/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page. OR Click Cancel to cancel the transaction and navigate back to 'Dashboard'

Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'. OR

Click **Back** to navigate to the previous screen.

- 3. If there is no mapping done for a party (own/ linked), the message **No Accounts mapped for the party** with **Map** appears.
- 4. Click Account Type i.e. Current and Savings/ Term Deposits/ Loans/ Liquidity Management/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page. All the accounts held by the selected party as a relationship with the bank as available in the core banking system or respective mid-office system will be fetched and displayed in the respective categories i.e. Current and Savings, Term Deposits, Loans, Liquidity Management, Virtual Account Management – Real Account, Virtual Account. OR Click Cancel to cancel the transaction and navigate back to 'Dashboard'

Click  $\ensuremath{\textbf{Cancel}}$  to cancel the transaction and navigate back to 'Dashboard'. OR

Click **Back** to navigate to the previous screen.

- 5. In case the selected party is mapped as a parent party to another party, select on the account type in the linked party summary section.
- 6. Click on **Account type** link to view/edit the details.
- 7. Navigate to the specific category tab viz. Current and Savings, Term Deposits, Loans, the administrator can view both the accounts for which access has been provided and the ones for which access is not provided.

8. Click Edit. The Party Account Access - Edit screen appears. This enables the selection and de-selection option against the accounts and also allow changing the map accounts from Auto to Manual and vice-versa. OR
Click Next to next tab (Current and Savings/ Term Deposits/ Loans/ Liquidity Management/ Virtual Account Management – Real Account/ Virtual Account) OR
Click Delete to delete the Party Account Access setup.
OR
Click Cancel to cancel the transaction.
OR
Click Back to navigate to the previous screen.

- 9. Click Account Type for which you want to edit the mapping of the accounts.
- 10. The cookie message displayed indicating the administrator that account mapping for other category tabs can be viewed by visiting the respective tabs.

Save Cancel Back				

16. Click **Save** to save the changes. OR

Click **Cancel** to cancel the transaction.

OR

Click **Back** to navigate to the previous screen.

17. The **Party Account Access - Review** screen appears. Verify the details, and click **Confirm**.

OR Click **Cancel** to cancel the transaction. OR Click **Back** to navigate to the previous screen.

18. The screen with success message appears. Click **OK** to complete the transaction.

# 12.4 Party Account Access - Delete

As part of this option, own account mapping and/or linked party account mapping can be deleted.

#### To delete account and transaction access for the party:

 Navigate to the screen, account access summary page with two sections Own Account Mapping Summary and Linked Party Account Mapping Summary appears. Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained. OR

Click **Cancel** to cancel the transaction.

- 2. If there is no mapping done for a party (own/ linked), the message **No Accounts mapped for the party** with **Map** appears.
- Click Account Type i.e. Current and Savings/ Term Deposits/ Loans/ Liquidity Management/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page. All the accounts held by the selected party as a relationship with the bank as available in the core banking system or respective mid office system will be fetched and displayed in the respective categories i.e. Current and Savings, Term Deposits, Loans, Liquidity Management, Virtual Account Management – Real Account, Virtual Account. OR
   Click Cancel to cancel the transaction and pavigate back to 'Dephendry'.

Click  $\ensuremath{\textbf{Cancel}}$  to cancel the transaction and navigate back to 'Dashboard'. OR

Click **Back** to navigate to the previous screen.

- 4. In case of mapping of linked party accounts to the parent party, select on the account type in the linked party summary section.
- 5. Navigate to the specific category tab viz. Current and Savings, Term Deposits, Loans, Liquidity Management, Virtual Account Management – Real Account, Virtual Account., the administrator can view both the accounts for which access has been provided and the ones for which access is not provided.
- Click **Delete**. The application prompt the administrator with a message 'Are you sure you want to delete Party Account Access setup for linked Party ID – Party name' with an option of Yes / No.
- Click Yes to proceed with the deletion request. It will navigate to confirmation page with a success message and the status. OR Click No if you do not wish to proceed with deletion.
- 8. The success message and the status appear. Click **OK** to complete the transaction.

# 1. Is it necessary to setup Party Account Access Management before setting up User Account Access?

Yes. Party account access management setup must be done before the user level mapping of accounts and transactions.

### 2. What is the significance of Auto and Manual option in 'Map Accounts'?

This feature allows the administrator to configure access policies for accounts and associated transactions which may get added subsequently in the future.

Auto: This option gives access to the newly added accounts and transactions of the party as soon as the account is opened. This option can be selected whenever corporate administrator wishes to provide access to new accounts by default

Manual: If this option is selected newly added accounts and transactions does not get access by default. This is to ensure that access to accounts and transactions is provided only upon receiving specific instructions from corporates

# 3. Party Account Access has not been maintained for the party for Own or Linked party, still there is no 'Map' button available?

It is possible that the channel access and/or party preferences has not been maintained for the party whose accounts needs to be provided for access to the selected party. There will be an appropriate message provided to the user below the party details. Before proceeding with account access, administrator can visit 'Party Preferences' screen and maintain the preferences and/or channel access for the party.

# 4. Will Party Account Access – Deletion for a party (Own/Linked) lead to automatic deletion of User Account Access?

Yes. Deletion of account access for a party will lead to automatic deletion of access for the users of that party.

# 5. If I remove access of account(s) and transaction(s) for a party, will it lead to automatic access removal for the users of that party

Yes. Access removal at party level for an account and/or transaction will automatically remove access at user level of the selected party.

# 6. I have mapped/edited/deleted party account access for a party but it is not reflecting in the system even after a successful maintenance save message?

There is a possibility that the maintenance is saved but the status is 'Pending Approval'. For the maintenance, if there is an approval required then the changes will reflect only once the approver(s) approve the submitted request. If the setup does not require an approval workflow or is self / auto approved, then the same will reflect immediately.

**Home** 

# 13. User Account Access

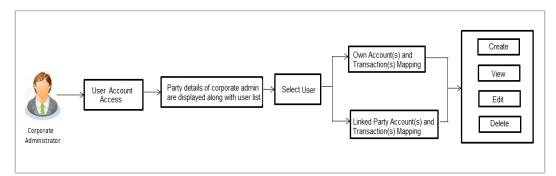

Using this option the Corporate Administrator can set up account and transaction access for user(s) of the corporate party. This maintenance can be done only after the Party Account Access is setup for the party of the user(s). The user level mapping of accounts and transactions must be done in order to provide access to the accounts for performing transactions to the specific user. If this step is not followed, the corresponding user will not be able to view any accounts on the dashboard screen or at the individual transactions.

**Note:** User Account Access is a non-mandatory step. If the Admin does not maintain the user account access for any of the corporate users, system will refer to the party account access rules maintained for his associated party ID.

#### **Pre-Requisites**

- Account Access should be maintained for the corporate party of the user for which access is to be maintained
- Account Access for the party should be maintained for linked party accounts if the user needs access to linked party accounts.
- Party preferences should be created for the party of the user for which access is to be maintained
- Channel Access should be enabled for party of the user for which account access is to be maintained
- Transaction access is provided to Corporate Administrator.
- Approval rule set up for Corporate Administrator to perform the actions.

#### Workflow

#### Features Supported In Application

The following options are available as part of this maintenance:

- User Account Access Mapping (Own accounts and linked party accounts)
- User Account Access View (Own accounts and linked party accounts)
- User Account Access Edit (Own accounts and linked party accounts)
- User Account Access Delete (Own Accounts and linked party accounts)

#### How to reach here:

Corporate Administrator Dashboard > Quick Links > Account Access > User Account Access OR

Corporate Administrator Dashboard > Toggle Menu > Menu > Access Management > Account Access > User Account Access

## 13.1 User Account Access - Mapping (Create)

The Corporate Administrator has the list of account(s) and transactions for which access needs to be provided to the user(s) of the corporate party. Party Id and Party Name of the Corporate Administrator are defaulted and not allowed for input. User list of the corporate party is displayed with details like user ID, user name and mapping details.

This option lets the Corporate Administrator to provide account access to specific users of a party.

#### To provide the user with account and transaction access:

1. In the User Account Access screen, click the <u>User ID</u> link, to navigate to Account Access summary section with two sections Own Account Mapping Summary and Linked Party Account Mapping Summary.

Linked party account mapping will only be available if the party to which Corporate Administrator is associated has Party to Party Linkage maintained. OR

Click Cancel to cancel the transaction.

User Account Access - Transaction- Account Mapping (Linked Account)-Create

## **Field Description**

Field Name	Description
Party ID	The party ID searched by the Corporate Administrator. This field appears only in cases of Own Account mapping.
Party Name	The name of the party. This field appears only in cases of Own Account mapping.
Parent Party ID	The party ID of parent party. This field appears only in cases of Linked Account mapping.
Parent Party Name	The name of the parent party. This field appears only in cases of Linked Account mapping.
Linked Party ID	The party ID of parent party. This field appears only in cases of Linked Account mapping.
Linked Party Name	The name of the linked party. This field appears only in cases of Linked Account mapping.
User ID	User ID of the selected user.
User Name	User name of the selected user.
Account Mapping	
CASA/ Term Deposits/	/ Loans
Apply Party Level Changes Automatically	User will get access to accounts that are allowed/ disallowed at the party level.
Map All Transactions to All Accounts	Mapping all the transactions to all the existing accounts.
Account Number	List of account numbers present in a particular account type.
Currency	Account currency.
Product Name	Name of the product.
Account Status	Status of the account access for the party

10. To map the transactions to the account, click against the particular account number to view the transaction mapping.

 Select the respective check boxes preceding the transaction to be mapped. OR

Select Map All Transactions, if you want to map all the transactions to all accounts.

- 12. Select **Apply Party Level Changes Automatically** to automatically apply the party changes.
- 13. Click Save. OR Click Cancel to cancel the transaction. OR Click Back to navigate to the previous screen.
- The User Account Access Review screen appears. Verify the details, and click Confirm. OR

Click **Cancel** to cancel the transaction. OR Click **Back** to navigate to the previous screen.

15. The screen with success message appears. Click **OK** to complete the transaction.

# 13.2 User Account Access- Search

The Corporate Administrator can view the list of account(s) and transactions for which access has been provided to the user.

Party Id and Party Name of the Corporate Administrator are defaulted and not allowed for input. User list of the corporate party is displayed with details like user ID, user name and mapping details.

#### To view the account and transaction access:

1. In the User Account Access screen, click the <u>User ID</u> link, to navigate to Account Access summary section with two sections Own Account Mapping Summary and Linked Party Account Mapping Summary.

Linked party account mapping will only be available if the party to which Corporate Administrator is associated has Party to Party Linkage maintained. OR

Click **Cancel** to cancel the transaction.

 Click Account Type i.e. Current and Savings/ Term Deposits/ Loans/ Liquidity Management/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page. OR

Click  $\ensuremath{\textbf{Cancel}}$  to cancel the transaction and navigate back to 'Dashboard'. OR

Click **Back** to navigate to the previous screen.

User Account Access - Transaction- Account Mapping (Linked Account Mapping) - View

7. Click against the particular account number to view the mapped transactions. OR

Click Edit to update transaction mapping.

OR

Click Cancel to cancel the transaction.

- 8. Click **Edit** to update the **User Account Access** account mapping for new accounts and existing accounts.
  - OR Click **Cancel** to cancel the transaction.
  - OR

Click **Back** to navigate to the previous screen.

# 13.3 User Account Access - Edit

The Corporate Administrator gets a request with the list of account(s) and transactions for which access details needs to be edited for a selected user of the party.

Party Id and Party Name of the Corporate Administrator are defaulted and not allowed for input. User list of the corporate party is displayed with details like user ID, user name and mapping details.

#### To edit account and transaction access for the user:

- 1. In the User Account Access screen, click the User ID link, to navigate to Account Access summary section with two sections Own Account Mapping Summary and Linked Party Account Mapping Summary. Linked party account mapping will only be available if the party to which Corporate Administrator is associated has Party to Party Linkage maintained. OR Click Cancel to cancel the transaction. OR Click **Clear** to clear the search parameters. 2. Click Account Type i.e. Current and Savings/ Term Deposits/ Loans/ Liquidity Management/ Virtual Account Management - Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page. OR Click Cancel to cancel the transaction and navigate back to 'Dashboard'. OR Click **Back** to navigate to the previous screen. In case of mapping of linked party accounts to the parent party, select on the account 3. type in the linked party summary section. 4. Navigate to the specific category tab, namely, Current and Savings, Term Deposits, Loans, Liquidity Management, Virtual Account Management - Real Account, Virtual
- Loans, Liquidity Management, Virtual Account Management Real Account, Virtual Account, the administrator can view both the accounts for which access has been provided and the ones for which access is not provided.
- Click Edit. The User Account Access Edit screen appears. This enables the selection and de-selection option against the accounts. There is also an option to edit check box 'Apply Party Level Changes Automatically' to apply/ remove the party changes. OR

Click **Cancel** to cancel the transaction. OR Click **Back** to navigate to the previous screen.

6. Click **Account Type** for which you want to edit the mapping of the accounts. The cookie message displayed indicating the administrator that account mapping for other category tabs can be viewed by visiting the respective tabs.

Save Cancel Back			

11. Click Save. OR

Click **Cancel** to cancel the transaction. OR Click **Back** to navigate to the previous screen.

 The User Account Access - Review screen appears. Verify the details, and click Confirm. OR Click Edit to edit the transaction.

OR

Click **Cancel** to cancel the transaction.

- 13. The **User Account Access Confirmation** screen with success message appears.
- 14. Click **OK** to complete the transaction.

## 13.4 User Account Access - Delete

The Corporate Administrator gets a request with the user information of a party for which access details needs to be deleted. As part of this option, own account mapping and/or linked party account mapping can be deleted for a user.

To delete account and transaction access for the user:

1. In the User Account Access screen, click the <u>User ID</u> link, to navigate to Account Access summary section with two sections Own Account Mapping Summary and Linked Party Account Mapping Summary.

Linked party account mapping will only be available if the party to which Corporate Administrator is associated has Party to Party Linkage maintained.

OR

Click **Cancel** to cancel the transaction.

OR

Click Clear to clear the search parameters.

 Click Account Type i.e. Current and Savings/TD/Loan/ Liquidity Management/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page. OR

Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'. OR

Click **Back** to navigate to the previous screen.

- 3. In case of mapping of linked party accounts to the parent party, select on the account type in the linked party summary section.
- 4. Navigate to the specific category tab viz. CASA, Term Deposits, Loans etc., the administrator can view both the accounts for which access has been provided and the ones for which access is not provided.
- 5. Click Delete.

The application will prompt the administrator with a deletion message with an option of Yes / No.

 Click Yes to proceed with the deletion request. It will navigate to confirmation page with a success message and the status.
 OR

Click No if you do not wish to proceed with deletion.

7. Click **OK** to complete the transaction.

## <u>FAQ</u>

## 1. Is it necessary to setup Party Account Access Management before setting up User Account Access?

Yes, party account access management setup must be done before the user level mapping of accounts and transactions.

## 2. User Account Access has not been maintained for the user for Own or Linked party, still there is no 'Map' button available?

It is possible that the account access maintenance has not been done for the party to which the user belongs to. In such a case, corporate admin will need to maintain account access for the party and only then proceed with User Account Access.

## 3. Will Party Account Access – Deletion for a party (Own/Linked) lead to automatic deletion of User Account Access?

Yes, deletion of account access for a party will lead to automatic deletion of access for the users of that party.

## 4. If I remove access of account(s) and transaction(s) for a party, will it lead to automatic access removal for the users of that party?

Yes, access removal at party level for an account and/or transaction will automatically remove access at user level of the selected party.

# 5. I am unable to see some of the account(s) and/or transaction(s) for mapping as part of User Account Access that were available in Party Account Access for the party of the user?

There is a possibility that these accounts and/or transactions have not been provided access at party level of the selected user. The accounts and transactions that are unmapped at party level will not be visible at user level of the selected party.

## 6. I have mapped/edited/deleted user account access for a party but it is not reflecting in the system even after a successful maintenance save message?

There is a possibility that the maintenance is saved but the status is 'Pending Approval'. For the maintenance, if there is an approval required then the changes will reflect only once the approver(s) approve the submitted request. If the setup does not require an approval workflow or is self / auto approved, then the same will reflect immediately.

<u>Home</u>

## 14. Party Resource Access

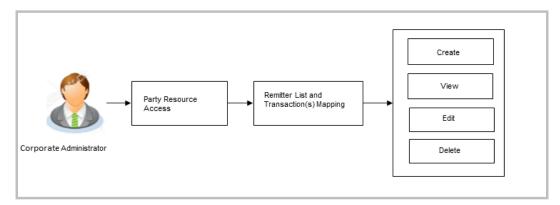

Using this maintenance, the Corporate Administrator can provide access to Virtual Account Management Resource 'Remitter List'.

The Party Resource Access screen lists the remitter IDs for the selected Corporate. The Corporate administrator can select a global check box of 'Map All Remitter List ' to enable all the existing remitter list under the party for channel banking. If specific remitters are required to be given access then the user needs to select the respective check boxes preceding the remitter ID.

#### **Pre-Requisites**

- Party preferences should be created for the party for which access is to be maintained
- Channel Access should be enabled for party for which resource access is to be maintained
- Transaction access is provided to Corporate Administrator.
- Approval rule set up for Corporate Administrator to perform the actions.

#### Workflow

#### Features Supported In Application

The following options are available as part of this maintenance:

- Party Resource Access Mapping
- Party Resource Access View
- Party Resource Access Edit
- Party Resource Access Delete

#### How to reach here:

Corporate Administrator Dashboard > Quick Links > Resource Access > Party Resource Access OR

Corporate Administrator Dashboard > Toggle menu > Menu > Access Management > Resource Access > Party Resource Access

## 14.1 Party Resource Access - Mapping (Create)

The Corporate Administrator gets a request with the Virtual Account Management Remitter list for which access needs to be provided to the party.

#### To provide the party with remitter's access:

1. If there is no mapping done for a party, there will be a message **No Remitter List mapped** with **Map** button.

## 14.4 Party Resource Access - Delete

As part of this option, remitter list mapping and /transaction mapping can be deleted.

To delete remitter list and transaction access for the party:

1. Navigate to the Party Resource Access - Summary screen.

- 2. If there is no mapping done for a party (own/ linked), the message **No Remitters mapped for the party** with **Map** option appears.
- 3. Click the **Remitter List** link to view/ delete the details. The **Party Resource Access** View screen appears.
- Click **Delete**. The application prompt the administrator with a message 'Are you sure you want to delete Remitter List Mapping setup for Party ID – Party name' with an option of Yes / No.
- Click Yes to proceed with the deletion request. It will navigate to confirmation page with a success message and the status. OR Click No if you do not wish to proceed with deletion.
- 6. The success message and the status appears. Click **OK** to complete the transaction.

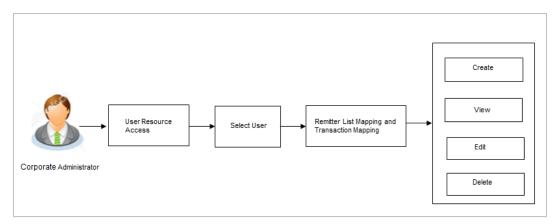

## **15. User Resource Access**

Using this option the Corporate Administrator can set up remitter list mapping and transaction access for user(s) of the corporate party. This maintenance can be done only after the Party Resource Access is setup for the party of the user(s).

#### Pre-Requisites

- Resource Access should be maintained for the party of the user for which access is to be maintained
- Party preferences should be created for the party of the user for which access is to be maintained
- Channel Access should be enabled for party of the user for which resource access is to be maintained
- Transaction access is provided to Corporate Administrator.
- Approval rule set up for Corporate Administrator to perform the actions.

#### Workflow

#### **Features Supported In Application**

The following options are available as part of this maintenance:

- User Resource Access Mapping
- User Resource Access View
- User Resource Access Edit
- User Resource Access Delete

#### How to reach here:

Corporate Administrator Dashboard > Quick Links> Resource Access > User Resource Access OR

Corporate Administrator Dashboard > Toggle menu > Menu > Access Management > Resource Access > User Resource Access

### 15.1 User Resource Access - Mapping (Create)

This option allows the Corporate administrator to provide access to specific users of a party.

#### To provide the user with account and transaction access:

1. In the User Resource Access screen, click the User Name link, to navigate to Account Access summary screen. OR

Click **Cancel** to cancel the transaction.

#### **User Resource Access**

User Resource Access - Transaction Mapping (Map Transaction) - Create

 Select the respective check boxes preceding the transaction to be mapped. OR

Select Map All Transactions, if you want to map all the transactions to all accounts.

- 12. Select **Apply Party Level Changes Automatically** to automatically apply the party changes.
- 13. Click Save.

OR Click **Cancel** to cancel the transaction. OR Click **Back** to navigate to the previous screen.

14. The **User Resource Access - Review** screen appears. Verify the details, and click Confirm.

OR Click **Cancel** to cancel the transaction. OR Click **Back** to navigate to the previous screen.

15. The screen with success message appears along with the reference number and status of the transaction. Click **OK** to complete the transaction.

### 15.2 User Resource Access- Search

The Corporate Administrator can view the list of remitter(s) and transactions for which access has been provided to the user.

#### To view the remitter and transaction access:

 Navigate to the User Resource Access screen. The list of users displayed with information like user ID, full name of the user and initials of the user. OR

Click **Cancel** to cancel the transaction.

OR

Click **Clear** to clear the search parameters.

#### User Resource Access - Search Result

User Resource Access - Transaction- Resource Mapping - Edit

 Select the respective check boxes preceding the transaction to be mapped. OR

Select Map All Transactions, if you want to map all the transactions to all Remitter Lists.

9. Click Save.

OR Click **Back** to navigate to the previous screen. OR Click **Cancel** to cancel the transaction.

 The User Resource Access - Review screen appears. Verify the details, and click Confirm. OR

Click Edit to edit the transaction. OR

Click Cancel to cancel the transaction.

11. The **User Resource Access - Confirmation** screen with success message appears along with the reference number and status of the transaction. Click **OK** to complete the transaction.

## 15.4 User Resource Access - Delete

The Corporate Administrator gets a request with the user information of a party for which access details needs to be deleted. As part of this option, remitter list mapping can be deleted for a user.

#### To delete remitter and transaction access for the user:

- 1. Navigate to the **User Resource Access** screen.
- 2. Click the <u>User Name</u> link against the user record for which you want to delete the details. The User Resource Access – Mapping Summary screen appears.
- 3. Click the **Remitter List** link. The **User Resource Access View** screen, displaying remitter list mapping appears.
- 4. Click **Delete**. The application will prompt the administrator with a deletion message with an option of Yes / No.

OR Click Edit to modify the remitter list mapping. OR Click Next to go to the next screen. The User Resource Access – View (Transaction Mapping) screen appears. OR Click Cancel to cancel the transaction. OR

Click **Back** to navigate to the previous screen.

 Click Yes to proceed with the deletion request. It will navigate to confirmation page with a success message and the status. OR

Click **No** if you do not wish to proceed with deletion.

6. Click **OK** to complete the transaction.

<u>Home</u>

## 16. File Upload Maintenance

File Uploads facilitates processing of multiple transactions through a single file. This is a faster way of processing transactions than entering transactions one after another. Salary payments, fund transfers, vendor payments are few examples of financial transactions that can be supported through file upload. A non-financial transaction to facilitate upload of multiple payee details, at a single instance, is also possible through file upload.

The File Upload functionality enables users to process:

- Internal payments (within the bank)
- Domestic payments (within the country)
- International payments (cross border)
- Mixed payments
- Create Payees / Beneficiaries
- Create Virtual Accounts, Structure & Identifiers

Oracle Banking Digital Experience File Upload module enables Corporates to process files of payments according to agreed operational and business rules and save time. File Uploads facility is simple to use, has daily transaction limits and comes with the security of dual / multi signatory approvals.

File Upload set up enables the corporate administrator to create file identifiers for its party, and map users to file identifiers.

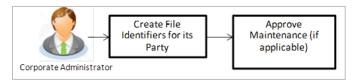

## **17. File Identifier Maintenance**

Corporate Administrator can create file identifiers (FI) for his party. This enables the corporate to process file uploads. A File Identifier is always mapped to a specific single file template. It permits configuration of corporate preferences like approval type (file level/ record level) for a particular type of file.

#### Prerequisites

- Party Preferences is maintained for Corporate
- Party and Account access has been set for corporate and its users
- Approval Rules are setup for the corporate

#### Workflow

#### Features Supported In Application

- View File Identifier
- Create File Identifier
- Edit File Identifier

#### How to reach here:

Corporate Administrator Dashboard > Quick Links > File Upload > File Identifier Maintenance OR

Corporate Administrator Dashboard > Toggle Menu > Menu > File Upload > File Identifier Maintenance

## 17.1 File Identifier Maintenance - Summary

Once the logged in user navigates to File Identifier Maintenance screen, user will be able to view the File Identifiers already created for his party.

#### To view the file identifiers:

 View File Identifier Maintenance screen with FI's mapped to the users. OR

Click **Cancel** to cancel the transaction.

#### File Identifier Maintenance - Summary

	International Payee			
	Mixed Payee			
	Demand Draft Payee			
	Create Virtual Accounts			
	Create Virtual Accounts Structure			
	Create Virtual Identifier			
	Create Invoices			
Maximum No of Records	Maximum number of records in the uploaded file.			
Partial Processing	The partial processing tolerance for a file (in percentage terms).			
Tolerance (%)	Suppose, the user sets this value at 60% - this implies that if 60% or more, of the records in a file clear the Validation stage, then the file can go for further processing. If less than 60% of the records in a file clear the validation stage, then the file is rejected.			
	This field will be displayed only when approval is Record Type and for certain file formats – namely when accounting type is a) Single Debit Single Credit or b) Multi Debit Multi Credit.			

Field Name	Description		
Debit Account	Account number of the account to be debited.		
Number	This field appears only for file templates having <b>Account ID defined</b> at <b>FI level.</b>		
Transaction Type	Type of transaction:		
	The transaction type can be:		
	Internal funds Transfer		
	Domestic Funds Transfer		
	International Funds Transfer		
	Mixed Transfer		
	Internal Payee		
	Domestic Payee		
	International Payee		
	Mixed Payee		
	Demand Draft Payee		
	Create Virtual Accounts		
	Create Virtual Account Structure		
	Create Virtual Identifiers		
	Delete Virtual Accounts		
	Mixed Payments		
	Create Invoices		
File Type	The file type - delimited or fixed length.		
Format Type	The format in which file is uploaded.		
	The format could be CSV, XML, XLS, XLSX.		
Approval Type	The approval type is at file level or record level.		
	<ul> <li>File Level - The approver accepts or rejects the entire file, and all records are either processed or rejected en-masse</li> </ul>		
	<ul> <li>Record Level - The approver could approve some records, and rejects others. Payments are processed only for approved records</li> </ul>		

- 2. In the **File Identifier** field, enter the code of the file to be uploaded.
- 3. In the **Description** field, enter the file description corresponding to the file code.
- 4. From the **File Template** list, select the file template.
  - a. If you select a file templates having Account ID defined at FI level, enter the Debit Account Number.

- 5. Select the appropriate **Approval Type**.
- Click Save. OR Click Cancel to cancel the transaction. OR Click Back to navigate to the previous screen.
- The Review screen appears. Verify the details and click Confirm. OR Click Cancel to cancel the operation and navigate back to 'Dashboard'. OR

Click **Back** to navigate to the previous screen.

8. The success message appears along with the transaction reference number and status. Click **OK** to complete the transaction and navigate back to 'Dashboard'.

# 17.3 File Identifier Maintenance - Edit

Using this option corporate administrator can edit and update a file identifier.

#### To edit file identifier:

1. In the **File Identifier Maintenance** screen, click the file identifier record, for which you want to view the details.

The File Identifier Maintenance - View screen appears.

2. Click Edit to edit the file identifier mapping. The File Identifier Maintenance - Edit screen appears.

#### File Identifier Maintenance - Edit

6. The success message of saving the file identifier modification appears along with the transaction reference number and status. Click **OK** to complete the transaction and navigate back to 'Dashboard'.

# <u>FAQ</u>

# 1. What are the different types of transaction types, accounting types, and file formats supported?

The following table details the different transaction types, accounting types, and file formats supported. A file template supports each of the combination.

Sr No.	Parameter	Types
1	Transaction Type	Internal funds Transfer
		Domestic Funds Transfer
		International Funds Transfer
		Mixed Transfer
		Payee Files
		Create Virtual Accounts, Structure, Identifier
		Create Invoices
2	Accounting Type	Single Debit, Single Credit (SDSC)
		Single Debit, Multi Credit (SDMC)
		Multi Debit, Multi Credit (MDMC)
3	Approval Type	File Level
		Record Level
4	Format Type	CSV, XML, XLS, XLSX

#### 2. What is the business rationale of having different accounting types?

Find below the accounting types catered through file templates, and business examples:

Sr No.	Accounting Type	Business Example	Approval Type
1	Single Debit, Single Credit (SDSC)	A corporate may want to make monthly payments to its various vendors from one central account. So though the debit account is the same across all records, the credit accounts are different and the debit accounting entry is not consolidated.	or File Type
2	Single Debit, Multi Credit (SDMC)	A corporate may want to make monthly salary payments to all its employees. A single consolidated debit entry is passed, against multiple credits to different accounts.	
3	Multi Debit, Multi Credit (MDMC)	This file format caters to a lot of one to one transfers between two parties for various payments. Organizations that are brokers or intermediaries in trade contracts, may find this format more suitable for their business needs.	

#### 3. What is the business rationale of having different approval types?

A record type approval, gives more flexibility to the corporate user – in the sense, that even if some records are not validated, the file could still be processed (only those records that have passed validations) and file type approval, gives more control to the corporate user. Since all records in the file have to pass validations, before a file is processed.

#### 4. What is the role of an administrator in file upload?

The administrator is from the corporate side, who creates file identifiers, for his party.

#### 5. What is a 'File Upload Template'?

A template that is used to upload a file, distinguishes one file from another, depending on the transaction type of the payment, format of the file to be uploaded, approval type set-up for the file, and accounting type of a payment file is known as 'File Upload Template.

<u>Home</u>

# 18. User File Identifier Mapping

This option enables the corporate administrator to map the desired file identifiers to the corporate users. This mapping enables corporate users to upload and view specific bulk files.

#### Prerequisites

- Party Preferences is maintained for Corporate
- Party and Account access has been set for corporate and its users
- Set-up Transaction and account access
- Approval Rules are setup for the corporate File Identifier Maintenance is done

#### Workflow

#### **Features Supported In Application**

This option allows the corporate administrator to:

- View User File Identifier Mapping
- Create User File Identifier Mapping
- Edit User File Identifier Mapping

#### How to reach here:

Corporate Administrator Dashboard > Quick Links > File Upload > User File Identifier Mapping OR

Corporate Administrator Dashboard > Toggle Menu > Menu > File Upload > User File Identifier Mapping

## 18.1 User File Identifier Mapping - Details

Using this option the corporate administrator can view the file identifiers mapped to its users.

# <u>FAQ</u>

# 1. Can all users of a particular corporate access all file types, mapped to the corporate?

No, only users who are mapped to particular File Identifier's can access those files. For example, only the Human Resource Department of a corporate may have access to upload / view and enquire status of salary files. Mapping File Identifier's to users thus enables access of certain types of file, to certain users.

# 2. If a user is mapped to a File Identifier, and he has uploaded a file – but post this, he is no longer mapped to the File Identifier – can he view the status of the file?

No the user will not be able to view the status of the file, if he is not mapped to it, at the point in time when he is checking for the status.

<u>Home</u>

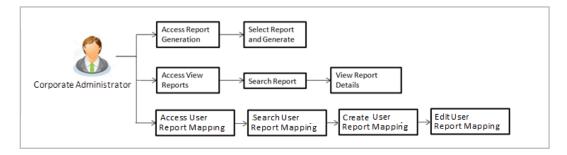

# 19. Reports

Using this option, Corporate Administrators can generate various adhoc and schedule banking reports. Application provides an option to generate and schedule reports using Oracle Analytics Publisher and also by using an internal application. The adoption of Oracle Analytics Publisher provides a simple and easy tool for the Operational and MIS reports

#### Prerequisites:

- Transaction access is provided to Corporate Administrator.
- Approval rule set up for Corporate Administrator to perform the actions.
- Oracle Analytics Publisher is configured.

#### Workflow

#### Features supported in application

Report module allows Corporate Administrator to:

- Generate and schedule Customer and Administrative Reports
- View/ Download generated Reports
- View User Report Mapping
- Create User Report Mapping
- Edit User Report Mapping
- View Scheduled Report

<u>Home</u>

# 20. Report Generation

Corporate Administrator logs into the system and navigates to Report Generation screen. On accessing 'Report Generation menu, Corporate Administrator has to select an option if an adhoc report is to be generated or report needs to be scheduled.

Reports generation is categorized as:

- Adhoc Reports: When a report needs to be generated immediately on a need basis.
- Schedule Reports: When report generation needs to be scheduled at fixed intervals e.g. daily, weekly, monthly etc.

After selecting the report generation category, user has to select a type of a report which needs to be generated. Other reports parameters with respect to each report are displayed on the screen as input fields so that report can be requested with specific data.

**Note**: If 2 factor authentication is enabled, the reports get generated only after successful authentication.

Corporate Administrator can also view all the reports that are scheduled and can view and edit the parameters of the scheduled reports, as per requirement. The changes made will be effective from next report generation cycle. Corporate Administrator approver can approve or reject the maintenance initiated for updating existing report schedule.

# 21. My Reports

This option enables the Corporate Administrator to download the generated reports.

Corporate Administrator logs into the system and navigates to My Reports screen. On accessing 'My Reports' menu, last 10 reports which generated for a party are listed with the respective report status. User can choose to search the specific report using the search criteria or can opt to view/ download detailed report.

Reports are categorized as:

- Adhoc Reports
- Scheduled Reports

### How to reach here:

Corporate Administrator Dashboard > Toggle menu > Menu > Reports > My Reports

# 21.1 My Reports - Adhoc

Adhoc reports are generated on demand or on request. Reports can be requested from the 'Reports' screen. Adhoc reports can be viewed using 'My Reports' screen.

To view and download the generated adhoc reports:

# <u>FAQ</u>

1. Can I choose a format in which a report is to be downloaded from My Reports screen?

A report can be downloaded in a format selected while generating a report.

2. I can view and download a report which is generated by other administrator users?

Yes, you can view and download the reports which are generated by other administrator users of the same party using **My Reports** screen.

<u>Home</u>

# 22. User Report Mapping

The user report mapping maintenance allows the Corporate Administrators to map the report or set of reports to a specific corporate user. The corporate users can generate and view the reports of which they have an access to.

Corporate Administrator can view the reports mapped to him, he can also un-map the reports from specific corporate user so that access of the specific report/ s can be removed to that corporate user.

The Corporate Administrator can also map the accounts of primary and linked parties for which the reports can be generated by a corporate user, so that corporate user can generate the report only for the accounts mapped to him.

### **Features Supported In Application**

This option allows the corporate administrator to:

- View User Report Mapping
- Create User Report Mapping
- Edit User Report Mapping

#### How to reach here:

Corporate Administrator Dashboard > Toggle menu > Menu > Reports > User Report Mapping

# 22.1 User Report Mapping - View

Using this option Corporate Administrator can view the reports mapped to the user.

### To view the reports mapping:

1. Navigate to the **User Report Mapping** screen.

## 23. User Group Management

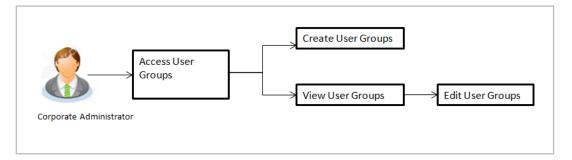

User group is a set created with multiple users to perform certain tasks/actions.

Using this option, Corporate Administrator can maintain the user groups. Only the users of party ID mapped to a Corporate Administrator can be clubbed together in the user group. User groups maintained by administrators are used while creating approval workflows and approval rules.

#### Prerequisites:

- Party preference is maintained and is active.
- Corporate Administrator is maintained for a party.
- Transaction access is provided to Corporate Administrator.
- Multiple corporate users are maintained under a party.
- Approval rule set up for Corporate Administrator to perform the actions.

#### Workflow

#### Features supported in application

User Group Management allows Corporate Administrator to:

- Create User Group
- View User Group
- Edit User Group

#### How to reach here:

Corporate Administrator Dashboard > Toggle menu > Menu > Others > User Groups Management

**Note:** User Groups can also be maintained for Non Customer Corporates (for which the party id is not maintained in UBS or in Core banking system). For such cases i.e. non customer corporate (counterparties on boarded by Corporates) the system will look for the party ID in OBSCF/OBCMS.

## 23.1 User Groups – Summary

Once the logged in Corporate Administrator navigates to User Group Management screen, user groups maintained (if any) under the party mapped to the user are displayed on the screen. User can opt to view the details of existing user groups or can create new user group using this screen.

### **User Groups**

## **Field Description**

Field Name	Description
Party ID	Party Id mapped to the logged in Corporate Administrator.
	<b>Note</b> : For Non Customer Corporate (counterparties on boarded by Corporates) the system will look for the party ID in OBSCF/OBCMS.
Party Name	Party name of Party ID mapped to the logged in Corporate Administrator.
Group Code	User group code.
	(This field will be displayed only if there are existing user groups available under a party).
Group Description	Description provided to the user group.
	(This field will be displayed only if there are existing user groups available under a party).
Users	Number of users available in each user group.
	(This field will be displayed only if there are existing user groups available under a party).

 Click Create to create new User Group. OR Click Cancel to cancel the operation and navigate back to 'Dashboard'.

OR

Click the **<u>Group Code</u>** link to view details of the selected User Group.

## 23.2 User Groups - Create

Corporate Administrator can create a new User Group for the mapped Party ID by using this option. Only the users of party ID mapped to a Corporate Administrator can be clubbed together in a User Group.

Administrator can create multiple user groups and one user can be part of multiple user groups, whereas creating a user group without any user is not allowed.

### To create the user groups:

1. Click **Create**. The **User Groups - Create** screen appears.

# 24. User Alerts Subscription

Using this option Corporate Administrator can subscribe alerts for a user for selected events. The Corporate Administrator subscribes users to alerts, delivered through Email, SMS, through push notification or in their on-screen mailbox.

Note that this functionality is for non-mandatory alerts.

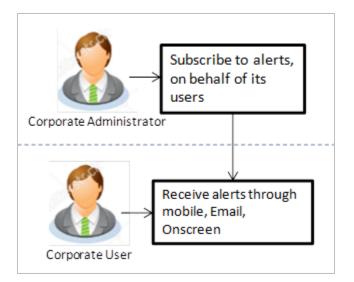

The subscribed alert types are:

- User Level Alerts
- Customer Level Alerts
- Account Level Alerts

#### Prerequisites

- Set-up Transaction access
- Set-up Approval Rules
- Maintain Alerts, so that these are available for subscription

#### Workflow

### **Features Supported In Application**

- Search Subscribe Alerts
- Update Subscription

#### How to reach here:

Corporate Administrator Dashboard > Toggle menu > Menu > Others > User Alert Subscription

## 24.1 User Alerts Subscription - Search

Using this option, administrator can search and view the details of alerts subscribed. All the alerts subscribed for a party users will be displayed in the respective categories viz. Current and Savings, Term Deposits, Loans etc. in a table.

### **User Alert Subscription**

### To view subscribed alerts for a User:

- 1. From the **User Name** list, select the appropriate option whose alerts you wish to view.
- 2. In the **User Name** field, enter the user name.
- 3. Click Search.

The search result appears based on the search criteria.

Via	The options are:
	Email: alert is to be sent as an email
	• SMS : alert is to be sent as an SMS on the user's mobile number
	On screen Mailbox: on screen, alert sent to as an email to user's mailbox
	<ul> <li>Push Notification: notifications are sent as a banner or pop-up message on the user's mobile number</li> </ul>
	Note: The selected mode has 🗹 icon against it.
	Corporate Admin will be allowed to map all modes of alerts subscription for al the transactions in one go for the selected account
6. Click a	against the particular account number to update the details.
a. <sub>Click</sub> [ OR	to send alert as an email.
Click Click	$\int_{\nabla}$ to send alert as a mail to secure mailbox.
Click ( OR	$\stackrel{}{=}$ to send alert as SMS on the user's mobile number.
	to send alert via push notifications. Push notification appears as a banner or message on the user's mobile number.
<b>Note</b> : The sele	ected mode has 🗹 icon against it.
	Save to save the Alert Subscription

- 7. Click **Save** to save the Alert Subscription.
- The User Alert Subscription Edit -Review screen appears post necessary validations. Verify the details, and click Confirm. OR Click Cancel to cancel the transaction. OR

Click **Back** to cancel the operation and to go back to the previous screen.

9. The success message of Alert Subscription appears along with the transaction reference number. Click **OK** to complete the transaction and navigate back to 'Dashboard'.

## <u>FAQ</u>

# 1. Which alerts customer can subscribe or unsubscribe, for the retail or corporate user?

The alerts which are not mandatory can be subscribed or unsubscribed, by the Corporate Administrator for the retail/corporate user.

Home

# 25. Mailbox

Corporate administrator can view all the alerts which are auto generated by the Bank on various events/transactions performed by logged in user. User can view the alert details but is not allowed reply to the alerts received in his mailbox –Alerts section. Count of unread alerts if any is displayed on the screen.

#### Pre-Requisites

• Alerts, notifications and the mails to be sent are configured by the bank on various events.

#### Features supported in Application:

- View summary of Alerts, Mails, Notifications triggered
- View specific Alerts, mails, notification details
- Delete Alerts, mails, notifications

#### How to reach here:

Corporate Administrator Dashboard > Toggle Menu > Menu > Mailbox > Mails OR

Corporate Administrator Dashboard > Click

## 25.1 Mails

The following features are available under Mails:

- Inbox: This folder displays all the mail messages received by the user.
- Sent Mails: This folder displays the list of mail messages sent by the user to the bank.
- Deleted Mails: This folder contains the list of mail messages deleted by the user from the inbox and the sent mail folders.

#### How to reach here:

```
Corporate Administrator Dashboard > Toggle Menu > Menu > Mailbox > Mails
OR
Corporate Administrator Dashboard > > Click 43 > Mails > View All
```

### 25.1.1 Inbox

Using this feature, the user can view the messages received in his Inbox. The user can view an individual message by clicking on the subject of the specific mail.

#### How to reach here:

Corporate Administrator Dashboard > Toggle Menu > Menu > Mailbox > Mails > Inbox OR Access through the kebab menu of any other screens available under Mailbox

#### To view received mails:

6. The list of received messages appears on the **Inbox** screen. Click on the subject link of an individual message to view the details of that message.

#### Mailbox

## 28. Security Settings

Security settings includes changing of password and setting of security questions for the user.

#### **Pre-requisites**

- User must have a valid Login credentials
- Transaction access is provided to Corporate Administrator
- Approval rule set up for Corporate Administrator to perform the actions

#### Workflow

#### Features supported in application

The Security Settings maintenance allow the Corporate Administrator to:

- Changing of old password to new Password
- Set Security Questions
- View Security Questions
- Edit Security Questions

#### How to reach here:

Corporate Administrator Dashboard > Toggle Menu > Menu > Security & Login

## 28.1 Set Security Questions

Security Questions are the second layer of authentication mode set by the Bank to complete various transactions.

This feature allows the administrator user to set up the answers of the security questions, which will then be used as another layer of security (Over and above the Login credentials).

User will be asked to answer these security questions to complete the transactions for which bank would have set Security Question as the second factor authentication.

#### How to reach here:

Corporate Administrator Dashboard > Toggle Menu > Menu > Security & Login > Set Security Question

#### **Set Security Questions**

Field Name	Description
Current Password	Old password for channel access.
New Password	New password for channel access.
Re-enter Password	Re-enter the new password to confirm.

#### To reset the password:

1. In the **Current Password** field, enter the password.

OR

Click icon to enter the password using the virtual keyboard.

2. In the **New Password** field, enter the password.

OR

Click icon to enter the new password using the virtual keyboard. (See Password Condition section on the application screen to view the policy of setting a new password.)

- 3. In the **Re-enter Password** field, re-enter the password.
  - OR

Click I icon to re-enter the password using the virtual keyboard.

- 4. Click Submit.
  - OR

Click Back to go back to previous screen.

- 5. The success message of changing the password appears.
- 6. As the login user changed his password using 'Change Password' option, system will logout the user and user will be shown a confirmation message of password change along with an option to login again. Click **Login** on confirmation screen to log in to the application.

**Note**: Password Conditions gets highlighted in green if the user's password is meeting the Password Policy criteria and similarly in Red if the password is not as per the Password Policy maintained.

## FAQ

### 1. Can I modify the security questions already set by me?

Yes, answer to security questions can be modified.

Home

## 29. Forgot Password

The login password is the password using which the user can log into the internet banking platform. The user cannot access his bank accounts without this password. The Forgot Password feature enables users to reset their login password.

The user is required to enter his User ID and Date of Birth. Post successful validation of the user's details, user is asked to enter the second factor authentication details (as per the authentication mode maintained by the Bank).

Once the user is authenticated, user will receive a link to generate the new password, on his registered email ID.

#### **Pre-requisites**

- The user must have valid login credentials to access the digital banking platform.
- The system administrator must have setup 2 factor authentication for Forgot Password.

#### Features Supported In the Application

- User Verification
- New Password Creation

#### How to reach here:

Portal > Forgot Password

#### To reset the password:

1. In the Login page, click Forgot Password. The Forgot Password screen appears.
