1. Preface

1.1 Intended Audience

This document is intended for the following audience:

- Customers
- Partners

1.2 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.3 Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

1.4 Structure

This manual is organized into the following categories:

Preface gives information on the intended audience. It also describes the overall structure of the User Manual.

Introduction provides brief information on the overall functionality covered in the User Manual.

The subsequent chapters provide information on transactions covered in the User Manual.

Each transaction is explained in the following manner:

- Introduction to the transaction
- Screenshots of the transaction
- The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.
- Procedure containing steps to complete the transaction- The mandatory and conditional fields of the transaction are explained in the procedure. If a transaction contains multiple procedures, each procedure is explained. If some functionality is present in many transactions, this functionality is explained separately.

1.5 Related Information Sources

[Home](#)

3. Electronic Bill Presentment And Payment

Electronic bill presentment and payment (EBPP) is a process that enables the billers to create, and present the bills / invoices online to their customers including corporates. This feature also enables the customers/ users to pay the bills online. The EBPP services are widely used in many areas like utility bill payment, fund transfer through net banking against various purchases of utility products and services by the customers, payment to service providers, mobile/ DTH bill payment etc.

The main advantage of electronic bill presentment and payment is that customers can pay their bills anytime quickly and conveniently, which saves lots of time and paper work.

[Home](#)

4. Add Billers

The online banking application enables the corporate user to add billers of the specific categories for the payment of bills and prepaid recharge electronically. Following types of billers are added.

- Presentment type: Billers presents the bill or invoice to the customer/ user online before paying the bill
- Payment type: Biller does not present bills. Biller allows the users to pay their bills anytime using their current and savings or credit card account that is credited to the billers account
- Presentment and Payment type: Billers has features similar to both Presentment as well as Payment type of billers. The bills/ invoice can be presented to the users for bill payment or the users can pay bills without the invoice
- Recharge type: Billers allows users to do “Recharge” their prepaid services like Mobile, DTH or Internet

Corporate users can add billers by specifying the Nickname of the biller(nickname should be unique), biller specific single /multiple unique customer IDs e.g. Relationship no, Account number etc., and other Biller labels as maintained in the Biller Maintenance administration screen. Multiple but unique registrations with the same biller are allowed.

When a channel customer does an “Add Biller” transactions, he is essentially registering with the biller to make online bill payments. At this stage some billers may want to validate that the customer is a genuine customer. The behaviour is based on how customer validation has been set up when biller got on-boarded

Auto: When a biller is of Customer Validation type as “Auto”, customers who add this biller do not need any validation from biller and their registrations are auto-approved and they can initiate online bill payments to this biller

Offline: When a biller is on boarded with Validation type as “Offline”, for retail or corporate customers who add this biller, their registration status will be “Pending”. This means that the biller will have to do an offline validation of these registrations and can approve or reject them. OBDX does not provide any OOTB (Out of the box) mechanism for downloading the “Pending” registrations and changing their status by banker or biller.

Online: When a biller is on boarded with Validation type as “Online”, for retail or corporate customers who add this biller, their registrations need to be validated by biller online. The online validation could be a redirect to the biller’s website where he can do the validation through REST type web service through which validation happens. OBDX does not provide for OOTB implementation of the online validation.

Prerequisites:

- Transaction access is provided to the retail user
- Billers are maintained in OBDX by administrator
- Admin Biller Category maintenance is done

Features supported in the application

- Add Biller

Select Frequency	<p>The frequency for future bill payments.</p> <p>The frequency can be:</p> <ul style="list-style-type: none"> • Daily • Weekly • Fortnightly • Monthly • Bi-Monthly • Quarterly • Semi-Annually • Yearly <p>This field appears if you select the option Recurring in the Payment Type field.</p>

To add a biller:

1. From the **Biller Name** list, select the registered biller name.
2. In the **Biller Nickname** field, specify the biller nickname.
3. In the biller specific fields, enter information as required.
4. If you have selected the **Presentment** or **Presentment or Payment** type of biller from the **Biller Name** list:
 - a. From the **Payment Type** field, select the option of choice;

Select the option **Manual** if you wish to make bill payments manually every time the bills are due.

OR

Select the option **Auto Pay** to set up automatic bill payments.

OR

Select the option **Scheduled Pay**, if you wish to schedule bill payments for either a single instance or recurring instances.
 - b. If you have selected the option **Auto Pay** under the **Payment Type** field:
 - i. From the **Payment Method** list, select an option of choice to identify the mode through which payment will be made. The options can be Account, Debit Card and Credit Card, depending on the administrator maintenance for the specific biller. The values in the **Pay From** list will be populated on the basis of selection.
 - ii. From the **Pay From** list, select the CASA account/Debit Card/Credit Card, which is to be debited for bill payment.

- iii. If you have selected the option **Credit Card**, select the month and year of card expiry in the **Expiry Date** fields.
- iv. From the **Pay** field, select an option as follows:
 1. Select the **Bill Amount** option, if you want the entire amount of the generated bill to be paid at every cycle.
OR
 2. Select the **Limit Amount** option, if you want to specify a maximum amount for bill payment.
 - a. Enter an Amount in the **Limit Amount** field.
- c. If you have selected the option **Scheduled Pay** under the **Payment Type** field:
 - i. From the **Payment Method** list, select an option of choice to identify the mode through which payment will be made. The options can be Account, Debit Card and Credit Card. The values in the **Pay From** list will be populated on the basis of selection.
 - ii. If you have selected the option **Credit Card**, select the month and year of card expiry in the **Expiry Date** fields.
 - iii. In the **Amount** field, enter the amount to be paid towards the bill at every instance.
 - iv. In the **Occurrence** field, select the desired option:
 1. If you select the **One Time** option, select a date on which the payment towards the biller is to be made.
 2. If you select the **Recurring** option:
 - i. From the **Frequency** list, select the frequency at which payments towards the biller are to be made.
 - ii. Enter the date from which recurring payments are to be made towards the biller in the **Start From** field.
 - iii. Enter the date upto which recurring payments are to be made towards the biller in the **End Date** field.
5. Click **Submit** to add the biller.
OR
Click **Cancel** to cancel the operation and navigate back to the Dashboard.
6. The **Add Biller - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Back** to navigate back to the previous screen.
OR
Click **Cancel** to cancel the operation and to navigate back to 'Dashboard'.
7. The success message appears along with the biller details.
Click **Pay Bill** to make a payment towards the biller.
OR
Click **Add Another Biller** to add more billers.
OR
Click **Home**, to navigate to the dashboard.

[Home](#)

5. Billers

This screen lists down all the registered billers of the customer.

Billers are maintained in OBDX either manually using Biller Maintenance functionality or through a bulk file upload. All the registered billers (of all types) and bills are displayed on the screen. The billers can be of 'Presentment', 'Payment', 'Presentment and Payment' and 'Recharge' type.

The customer either can pay the bills instantly or can schedule it to a later date. The customer also has an option to enter the payment amount, select the payment frequency and the source account from which payment can be made.

The online banking application enables customers to register and maintain the billers towards whom utility payments are to be made frequently or on a regular basis.

Note: Send to Modify functionality is now supported for this transaction.

Prerequisites:

- Transaction access is provided to the corporate user
- Approval rule set up for corporate user to perform the actions
- Transaction working window is maintained
- Billers are maintained
- Transaction limits are assigned to the corporate user to perform the transaction

Features supported in application

- Bill Payment

*Access through the kebab menu of transactions available under the **Bill Payments** module*

5.1 Billers - Summary

All the registered billers of the customer are listed on this page. The customers can initiate bill payments towards those billers against which bills are due. Apart from paying bills, the customer can also view the details of each biller and can edit or delete a biller record by selecting the provided option.

Customer can select multiple presented bills for payment from the same screen. Further, customer will be able to specify payment details for each record.

Billers

The screenshot displays the 'Billers' section of the Futura Bank interface. At the top, there is a search bar and a 'Pay' button. Below this is a table listing various billers. The table has columns for 'Biller Name', 'Bill Type', 'Status', and 'Actions'. The 'MyElectricBill' entry is highlighted with a 'Pay' button. To the right of the table is a promotional banner titled 'Pay bills...hassle-free' with text explaining the service and a 'Pay' button.

Field Description

Field Name	Description
Billor Name	Name of the billor.
Category	The category of the registered billor.
From Account	The current and savings bank account from which customer can pay the bill.
Amount	The amount that is to be paid by the customer along with the currency.
Reference Number	The generated OBDX reference number.
Status	<p>The current status of the bill.</p> <p>The different status options are:</p> <ul style="list-style-type: none"> • Processed- The transaction was eligible for auto-approval and hence the transaction was automatically approved and sent to the core banking system for further processing. In this case assigning of approval workflow is not required. • Failed- The transaction has failed in OBDX due to validation errors. In this case, the transaction is not sent to the core banking system for further processing. • Initiated- The transaction is initiated in OBDX however is pending for approval. The approval will be initiated only once the user selects the approval workflow manually.
Approval Workflow	In case of Initiated status, an option is available to assign the approval workflow manually.

- If status is **Processed**, the transaction was eligible for auto-approval and hence the transaction was automatically approved.
- If status is **Failed**, the transaction has failed in OBDX due to error and hence the failure reason is displayed without any approval.
- If status is **Initiated**,
 - a. Click on the **Assign** link, and all the resolved rules will be shown on an overlay. For each resolved rule, details like rule name, approval levels, sequential/parallel, rule amount range, users of a group are displayed.

Assigning Workflow

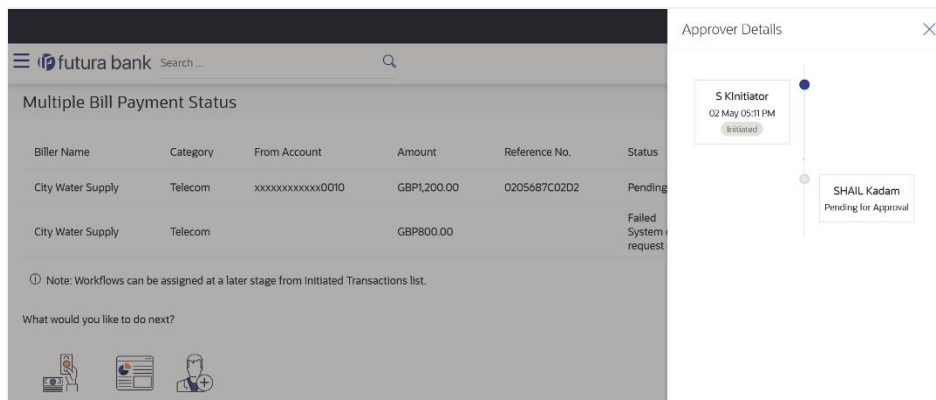

- b. Select a workflow from all the resolved rules from the overlay screen.
- c. Click **Assign** to assign the workflow, the transaction will be sent for approval as per the selected approval rule.
- d. On assignment, a message of workflow assigned successfully appears along with the reference number. The status is updated as 'Pending for Approval' and approval workflow is 'Assigned'.

Assign Workflow- success message

Note:

Click on  icon to view the transaction journey of the selected workflow.
In case the user wants to assign the workflow at a later stage, then it can be achieved from the 'Initiated Transactions' list.

Transaction journey of the workflow

The screenshot shows the 'Multiple Bill Payment Status' page in the Futura Bank app. The page displays a table with columns: Biller Name, Category, From Account, Amount, Reference No., and Status. Two rows are visible, both for 'City Water Supply' under the 'Telecom' category. The first row has a status of 'Pending' and a reference number '0205687C02D2'. The second row has a status of 'Failed System request' and an amount of 'GBP800.00'. A note below the table states: 'Note: Workflows can be assigned at a later stage from Initiated Transactions list.' Below the note, there is a section titled 'What would you like to do next?' with three icons: a hand holding a bill, a document with a checkmark, and a person with a plus sign.

An 'Approver Details' modal is open on the right side of the screen. It shows a vertical timeline with two steps:

- Step 1: S K Initiator, 02 May 05:11 PM, Status: Initiated.
- Step 2: SHAIL Kadam, Pending for Approval.

14. The success message appears along with the reference number, status and payment details with workflow assigned for reference number.
15. Click **Pay Another Bill** to pay another bills.
OR
Click **Home**, to navigate to the dashboard.
OR
Click **Add Biller** to add the billers.

5.3 **Pay Bill - Payment Type**

Payment type of billers there is no bill presented online (there may be an offline bill presentation) and hence biller allows the customers to pay their bills anytime using their current and savings or credit card account that is credited to the billers account. The customers can pay their bills immediately/ same business date or can schedule the payment. The customers can set up a recurring payment by selecting payment amount and payment frequency. This option allows the customer to manually enter the payment amount.

In case of multiple bill payment, if in **Group Corporate Onboarding - Group Corporate Profiling** setup, **Approval Routing Type** is selected as **Manual**, system will allow initiator to choose the approval workflow from the resolved rules as part of transaction initiation. This selection is applicable to transactions whose status is **Initiated**. Refer **Group Corporate Onboarding - Group Corporate Profiling** section in **User Manual Oracle Banking Digital Experience Core** for more details.

5.4 Pay Bill - Presentment and Payment Type

A Presentment and Payment type of biller has features similar to both Presentment as well as Payment type of billers. The bills/ invoice can be presented to the customers for bill payment or bills can be paid by the customers without the invoice. In the system when the biller presents a bill he will appear in the presentment section of the Bills screen and when there is no bill presented he will appear in the Payment section of the screen. This way customer can be the biller when there is a bill presented or even otherwise when there is no bill presented.

The customer has can pay the bills immediately or can schedule the payment. The customers can set up a recurring payment or auto payment. Both auto pay and recurring pay (scheduled payment) cannot be active at the same time.

In case of multiple bill payment, if in **Group Corporate Onboarding - Group Corporate Profiling** setup, **Approval Routing Type** is selected as **Manual**, system will allow initiator to choose the approval workflow from the resolved rules as part of transaction initiation. This selection is applicable to transactions whose status is **Initiated**. Refer **Group Corporate Onboarding - Group Corporate Profiling** section in **User Manual Oracle Banking Digital Experience Core** for more details.

Pay Bill - Payment and Presentment Type

Click **Add Biller** to add the billers.

5.5 Pay Bill - Recharge Type

Recharge type biller allows customers to do “Recharge” their prepaid services like Mobile, DTH or Internet. The customer can re-charge by selecting a “plan” offered by the biller or top –up/add money to an existing plan.

In case of multiple bill payment, if in **Group Corporate Onboarding - Group Corporate Profiling** setup, **Approval Routing Type** is selected as **Manual**, system will allow initiator to choose the approval workflow from the resolved rules as part of transaction initiation. This selection is applicable to transactions whose status is **Initiated**. Refer **Group Corporate Onboarding - Group Corporate Profiling** section in **User Manual Oracle Banking Digital Experience Core** for more details.

  Home
  Add Biller

Field Description

Field Name	Description
Billor Name	Name of the biller.
Category	The category of the registered biller.
From Account	The current and savings bank account from which customer can pay the bill.
Amount	The amount that is to be paid by the customer along with the currency.
Reference Number	The generated OBDX reference number.
Status	<p>The current status of the bill.</p> <p>The different status options are:</p> <ul style="list-style-type: none"> • Processed- The transaction was eligible for auto-approval and hence the transaction was automatically approved and sent to the core banking system for further processing. In this case assigning of approval workflow is not required. • Failed- The transaction has failed in OBDX due to validation errors. In this case, the transaction is not sent to the core banking system for further processing • Initiated- The transaction is initiated in OBDX however is pending for approval. The approval will be initiated only once the user selects the approval workflow manually
Approval Workflow	In case of Initiated status, option is available to assign the approval workflow manually.

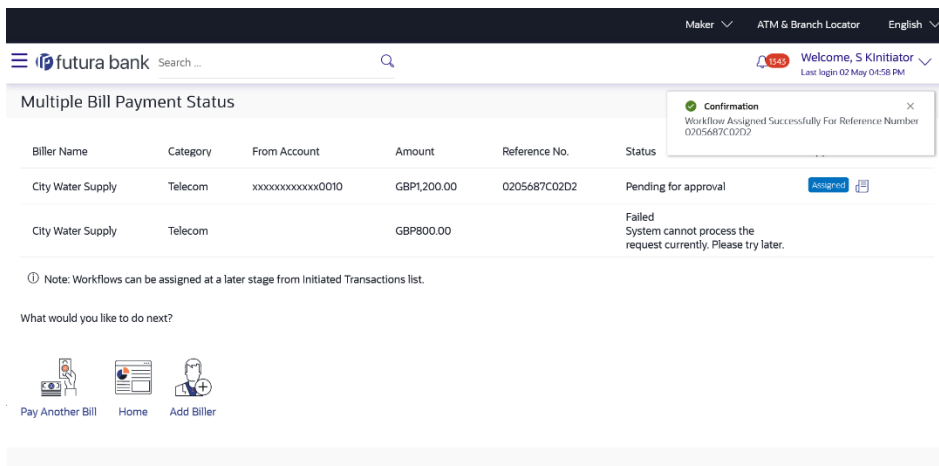

-
- If status is **Processed**, the transaction was eligible for auto-approval and hence the transaction was automatically approved.
 - If status is **Failed**, has failed in OBDX due to error and hence the failure reason is displayed without any approval.
 - If status is **Initiated**,
 - a. Click on the **Assign** link, and all the resolved rules will be shown on an overlay. For each resolved rule, details like rule name, approval levels, sequential/parallel, rule amount range, users of a group are displayed.

Assigning Workflow

- Select a workflow from all the resolved rules from the overlay screen.
- Click **Assign** to assign the workflow, the transaction will be sent for approval as per the selected approval rule.
- On assignment, a message of workflow assign successfully appears along with the reference number. The status is updated as 'Pending for Approval' and approval workflow is 'Assigned'.

Assign Workflow- success message

Note:

Click on  icon to view the transaction journey of the selected workflow. In case the user wants to assign the workflow at a later stage, then it can be achieved from the 'Initiated Transactions' list.

Transaction journey of the workflow

The screenshot shows the Futura Bank interface. The main content area displays a table titled "Multiple Bill Payment Status" with the following data:

Bill Name	Category	From Account	Amount	Reference No.	Status
City Water Supply	Telecom	xxxxxxxxxxxx0010	GBP1,200.00	0205687C02D2	Pending
City Water Supply	Telecom		GBP800.00		Failed System request

Below the table, there is a note: "Note: Workflows can be assigned at a later stage from Initiated Transactions list." and a prompt: "What would you like to do next?" with three icons: a hand holding a bill, a document with a checkmark, and a person with a plus sign.

An "Approver Details" modal is open on the right, showing a workflow timeline:

- S K Initiator**: 02 May 05:11 PM, Status: Initiated
- SHAIL Kadam**: Pending for Approval

12. The success message appears along with the reference number, status and payment details with workflow assigned for reference number.
13. Click **Pay Another Bill** to pay another bills.
OR
Click **Home**, to navigate to the dashboard.
OR
Click **Add Biller** to add the billers.

To edit a biller:

1. In the **Billers** screen, click  option against a specific Biller whose details you want to update, and then click **Edit**. The **Edit Biller** screen appears.
2. In the **Biller Nickname** field, modify the biller nickname if required.
3. If the biller you have selected to edit is of biller type **Presentment** or **Presentment and Payment**:
 - a. Select the option **Manual** if you wish to make bill payments manually every time the bills are due.
OR
Select the option **Auto Pay** to set up automatic bill payments.
OR
Select the option **Scheduled Pay**, if you wish to schedule bill payments for either a single instance or recurring instances.
 - b. If you have selected the option **Auto Pay** under the **Payment Type** field:
 - i. From the **Payment Method** list, select an option of choice to identify the mode through which payment will be made. The options can be Account, Debit Card and Credit Card, depending on the administrator maintenance for the specific biller. The values in the **Pay From** list will be populated on the basis of selection.
 - ii. From the **Pay From** list, select the CASA account/Debit Card/Credit Card, which is to be debited for bill payment.
 - iii. If you have selected the option **Credit Card**, select the month and year of card expiry in the **Expiry Date** fields.
 - iv. From the **Pay** field, select an option as follows:
 1. Select the **Bill Amount** option, if you want the entire amount of the generated bill to be paid at every cycle.
OR
 2. Select the **Limit Amount** option, if you want to specify a maximum amount for bill payment.
 - i. Enter an Amount in the **Limit Amount** field.
 - c. If you have selected the option **Scheduled Pay** under the **Payment Type** field:

- v. From the **Payment Method** list, select an option of choice to identify the mode through which payment will be made. The options can be Account, Debit Card and Credit Card. The values in the **Pay From** list will be populated on the basis of selection.
- vi. If you have selected the option **Credit Card**, select the month and year of card expiry in the **Expiry Date** fields.
- vii. In the **Amount** field, enter the amount to be paid towards the bill at every instance.
- viii. In the **Occurrence** field, select the desired option:
 1. If you select the **One Time** option, select a date on which the payment towards the biller is to be made.
 2. If you select the **Recurring** option:
 - i. From the **Frequency** list, select the frequency at which payments towards the biller are to be made.
 - ii. Enter the date from which recurring payments are to be made towards the biller in the **Start From** field.
 - iii. Enter the date upto which recurring payments are to be made towards the biller in the **End Date** field.
4. Click **Submit** to edit the biller.
OR
Click **Cancel** to cancel the transaction.
5. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous page.
6. The success message appears along with the updated biller details.
7. Click **Pay Bill** to make a payment towards the biller.
OR
Click **Add Another Biller** to add more billers.
OR
Click **Home**, to navigate to the dashboard.

[Home](#)

8. Delete Biller

Using this option, you can delete a registered biller. If a bill has auto pay set up then you will not be allowed to delete the biller. In order to delete a bill for which auto payment has been set up, you will be required to first delete the auto pay setup.

10. Quick Recharge

The Quick recharge feature enables the users to initiate bill payments without registering the billers to the 'Recharge' type billers.

The user either can pay the bills immediately /same business date or can schedule it to a later date. The user also has options to set up a recurring pre-paid recharge to the biller, stop the ongoing recurring pay (scheduled pay) and modify an existing active recurring payment (scheduled payment).

The user can select the source of funds as allowed by the biller (maintained by bank administrator) like current and savings bank account, credit card or debit card. The user is allowed attach document like invoice or memo per bill payment. To attach multiple documents against one bill payment record, the user has to attach in the form of a ZIP file.

Prerequisites:

- Transaction access is provided to the retail user
- Transaction working window is maintained
- Billers are maintained
- Transaction limits are assigned to the user to perform the transaction
