## 3. Introduction

As the word suggests, Cash Management refers to the optimum utilization of cash to ensure the right amount of liquidity and maximum profitability for an organization.

Money is the lifeline for any business and therefore every organization aims to ensure that there is adequate cash to meet the obligations while making sure that there are no idle funds. Cash management functions help businesses in achieving this goal.

On a broad level, Cash management functions include Collections, Receivable/Payable Management, Reconciliation of payments, and Cash Flow Forecasting.

---

**Note:** The Cash Management module is currently only supported on **Desktops** and **Landscape** mode of **Tablet** devices.

---

Functions of Cash Management:

- **Cash Flow Forecasting**

Cash flow forecast helps corporates in estimating the amount of money that will move in and move out of the business during a specific period like for a month, date, or for a particular week. Based on the forecast, businesses can plan their future investments and ensure that they have enough liquidity to meet their future payables. For more information, refer the [Cash Flow Forecasting](#) section below.

- **Collections**

It is a process of managing collection of physical instruments like cash and cheques along with collection of electronic payments on behalf of the corporate. It not only saves the corporate's time and resources but also provides them a clear and detailed view of their collection status across locations

# 4. Overview

The Cash Management Overview screen provides a quick view of the corporate’s cashflow transactions expected in the near future so that the corporates can prepare business activities basis the inflows and outflows. The collection widgets also give a quick view of cash or cheques deposited or withdrawn into/from the accounts. This enables corporates to plan cash positions easily, in advance.

## Overview (on mobile device)

The Overview screen can also be viewed on a mobile device.

The **Overview** screen consists of the following widgets:

- Cashflow for next 30 Days
- Collections Summary
- Unrealized Cheque Aging
- Collections as per Pickup Points
- Cash Withdrawal Summary
- Cash Flow Forecast

---

**Note:** All the above widgets can also be viewed on a mobile device. The features, links, filters, and data that are available in these widgets on the web browsers on desktop computers, are also available on the mobile device.

---

**Cashflow for next 30 Days:** This widget displays the total cash in local currency that will flow during the next 30 days. You can also select different number of days from the dropdown list at the top of the widget. The options available are: 30 days, 15 days, 7 days, and today. The data can be viewed separately for cash inflows (in the **To Receive** tab) and cash outflows (in the **To Pay** tab). To view this information account-wise, you can select the required account from the dropdown list available at the top of this widget. The Reset icon in the top right corner, enables you to reset the widget data.

A doughnut graph depicts the 'To Receive' or 'To Pay' amounts, currency-wise, for the selected span of days. The amounts are also listed in figures along with the count of transactions for each currency. On clicking the arrow beside a count, an overlay section appears with the itemized categories or cashflow transactions, such as Credit Transfers, Cheques, Cash Deposits, and so on. The overlay section includes the **View Details** link, which when clicked displays the [View Expected Cash Flow](#) screen. The data displayed in this screen is based on what you select in the widget, with respect to the number of days, 'To Receive' or 'To Pay' options, account number, and currency.

**Collections Summary:** This widget displays a bar graph representing the amounts received through cheque collection or cash collection, or both. Daily collections for the last 10 days or monthly collections for the last 10 months can be viewed. All amounts are expressed in the local currency of the corporate. The bars representing the cheque collections are color coded to indicate the amounts that are realized and unrealized. The Collections Summary widget also displays the [View Cheque Deposits](#) and the [View Cash Deposits](#) links that can be clicked to visit the respective screens, which display detailed records of the summary.

**Unrealized Cheque Aging:** This widget displays the number of cheques that are presently unrealized, and will be realized in the coming days. These are grouped in terms of number of days, such as, cheques that will be realized in 0 – 7 days, 8 – 14 days, 15 – 21 days, and Above 21 days. A doughnut graph represents the percentage of cheques that will be realized in each of these time frames. Click on each specified time frame link to view the cheque number, the cheque amount, and the actual day on which the cheque will be realized. Click the [View Cheque Details](#) link in this widget to view further cheque details.

**Collections as per Pickup Points:** This widget displays a line graph indicating the amounts collected from the top 10 pickup points in the last 7 days. This data can also be viewed for the last 5 days, the previous day, or the present day. The graph consists of the pickup point codes on the X axis and the amounts in local currency on the Y axis. Data can be viewed with respect to cheque (default) or cash collections, using the switch on the top right corner of the widget. On selecting the 'Cheque' option, the [View Cheque Deposits](#) link appears at the bottom of the widget, which when clicked, displays the corresponding screen. Similarly, on selecting the 'Cash' option, the [View Cash Deposits](#) link appears. You can also view the collections for specific pickup locations, by clicking the filter icon and selecting the required locations.

**Cash Withdrawal Summary:** This widget displays a line graph depicting the daily cash withdrawals for the past 5 days, in local currency. You can also view the withdrawals for the past 5 months. The [View Cash Withdrawal](#) link is present at the bottom of the widget, which when clicked displays the [View Cash Withdrawal](#) screen. The data displayed in this screen will correspond to the past 5 days or past 5 months (in local currency) as per the selection in the widget.

**Cash Flow Forecast:** This widget displays the cash flow forecast data of the corporate on a bar graph for a span of 12 months, which includes today's date plus 6 months and minus 6 months. On the landing page, a monthly view of the expected inflows, outflows, surplus/deficit, reconciled for inflow, and reconciled for outflow data, is displayed. You can use the respective buttons to get daily, weekly, or quarterly views as well. You can zoom in, zoom out and scroll in this widget to go to a particular date/week/month/quarter range. You can also use the area graph at the bottom of this widget to set a specific period to view the details. The slider present on the area graph, can be moved or resized, as required.

## 5. Cash Flow

### 5.1 Cash Flow Forecasting

Cash flow forecasting is a projection of an organization's financial position based on records entered in the system for payments and receivables. While planning investments, the Corporate also needs to forecast future contingencies and ensure profitability. To enable this, the Corporate must use efficient cash flow forecasting and management tools. The Cash Flow Forecasting application facilitates financial liquidity within an organization and ensures that the business has the necessary cash to meet its future obligations, by efficiently managing cash inflows and outflows.

The **Cash Flow Forecasting** screen gives the Actual forecast as well as the Predicted forecast of the corporate's inflows and outflows. In the Predicted forecast, the system predicts the possible payment day of the cash flows on the basis of the patterns of its history. The system also projects a graphical representation and gives a detailed summary of the cash flows.

The application also gives an option to view the combined forecasts of Actual and Predicted data in a single screen.

**The widgets shown on the Cash Flow Forecasting screen are as follows:**

- Today's Snapshot

This widget provides a quick overview of the current day's expected inflows and outflows along with the opening and projected closing balances. The data is displayed in local currency by default on the landing page. If any filter value is selected from the top filter, then the data will be displayed as per the selected value in the filter.

- Cash Flow Forecast

This widget provides a graphical representation of the cash flow forecast for the Corporate for future and past months. The data is displayed in local currency by default on the landing page. If any filter value is selected from the top filter, then the data will be displayed as per the selected value in the filter. It provides quarterly, monthly, weekly, or daily views of the expected inflows and outflows on a bar graph. A line graph depicts whether there is a surplus or deficit for a given quarter or month or week or day.

- Cash Flow Summary

This widget provides the corporate user a quarterly, monthly, weekly, or daily view of the aggregated summary of cash flows (inflows and outflows) at a cash flow category level. It displays the total sum of inflows or outflows at a category level for a particular quarter or month or week or day, depending on which frequency is selected. The data is displayed in local currency by default on landing. If any filter value is selected from the top filter, then the data will be displayed as per the selected value in the filter.

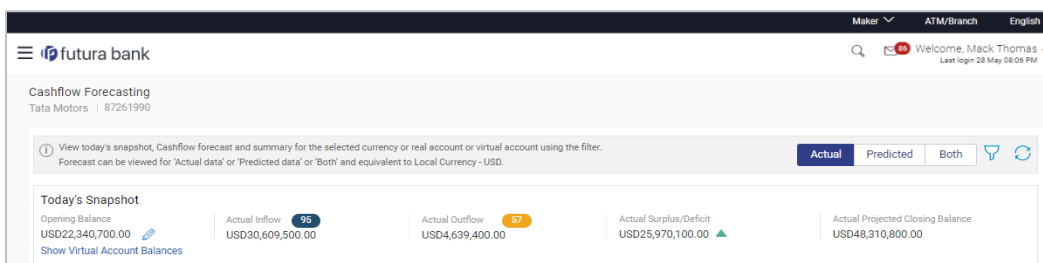

- Cash Flow Details: This is an overlay window which appears on clicking any category link in the Cash Flow Summary widget. It displays detailed cash flow records for the entire period selected by the user. The records are grouped at a Real Account level by default. The user can choose to change the grouping to a Virtual Account level or a Counter-party level. The data is displayed in local currency by default on the landing page. Once the grouped data is expanded, the data is displayed in the currency of the respective record. If any filter value is selected from the top filter, then the data will be displayed as per the selected value in the filter.

**Prerequisites:**

- Transaction access is provided to the corporate user

### Area graph

Under the cash flow forecasting widget, an area graph is displayed, which replicates the part displayed in the main graph. You can slide the rectangular box available in the area graph to navigate to a particular date range. You can also expand or contract the box to include different time frames. The data in the Cash Flow Forecast graph is updated based on the movement of the rectangular box in the area graph.

### Cash Flow Forecast (Actual-Predicted) widget (Displayed on selection of 'Both' option)

This widget displays both actual and predicted cash flow forecast data of the corporate on a bar graph for a span of 12 months, which includes today's date plus 6 months and minus 6 months. The default data of 12 months is displayed only if the user has navigated from the default view of the Actual/Both forecast. If any filter values (top level or second level) are selected in the Actual/Both forecast, and if user has navigated to the Predicted forecast, then the data is displayed as per the filter. On the landing page, a monthly view of the actual and predicted inflows, outflows, and surplus/deficit is displayed. The actual values of 'reconciled for inflow', and 'reconciled for outflow' are also displayed. For the **Both** option, only monthly data can be viewed.

The time frame for viewing this data and a specific category (for inflow or outflow) can be entered by clicking the Filter () icon. A pop-up window appears, where you can set the desired parameters, and click **Apply**. The graph is updated accordingly. In order to reset the time frame, either click the Reset () icon, or click the Filter () icon again, and select the desired time frame.

You can zoom in, zoom out and scroll in this widget to go to a particular time range. You can also use the area graph at the bottom of this widget to set a specific period to view the details. The slider present on the area graph, can be moved or resized, as required.

## **FAQ**

### **1. Can the user see the past month's inflows and outflows as well?**

On the landing page, the system displays default data for a period of 12 months, which includes today's date plus 6 months and minus 6 months. However, you can search for any desired period range using the filter option available on top of the Cash Flow Forecast graph.

### **2. What is Surplus and Deficit and how does it get calculated?**

A surplus occurs when the inflow of money exceeds the outflows for a particular period. After subtracting the outflows for a particular period from inflows for that period, if a positive amount is obtained, it is called as Surplus. It denotes that corporate will have surplus of cash during that period.

A deficit occurs when the outflow of money exceeds the inflows for a particular period. After subtracting the outflows for a particular period from inflows for that period, if a negative amount is obtained, it is called as Deficit. It denotes that corporate will have a shortfall of cash during that period.

### **3. What does Cash flow categories signifies?**

Cash flow categories are the high-level inflow, out flow heads under which the inflows and out flows are expected. For example, under Outflows Payroll, Marketing, Taxes, Operating Expenses can be some of the examples of categories. Similarly, for Inflows, Collections, Royalties, Interest, Sale of Property can be some of examples. By looking the amount against these categories, user can get to know the aggregated sum of amount expected to receive or pay for each head.

## 5.2 **Expected Cash Flow**

The corporate user can record cash flows that are expected to occur in the future. Both inflow and outflow records can be added. For each cash flow entry, the user can add the expected date of the cash flow, the account number to be debited/credited, the linked reference number (such as, cheque number or invoice number), the amount, and the currency. Expected cash flow records are also considered in the Cash Flow Forecasting functionality.

The following functions are available for managing expected cash flow.

- Create Expected Cash Flow
- View Expected Cash Flow
- Edit Expected Cash Flow
- Delete Expected Cash Flow

### **Pre-requisites:**

- Transaction access is provided to the corporate user.

### 5.2.1 **Create Expected Cash Flow – Onscreen and Bulk File Upload**

Expected cash flow records can be created in one of the following ways:

- By manually entering the details of the cash flow on the screen.
- By uploading a file (in one of .csv, .xls, .xlsx, or .xml format) that contains the cash flow details. This method enables the user to create bulk records.

Both one-time transaction records as well as recurring transaction records can be created.

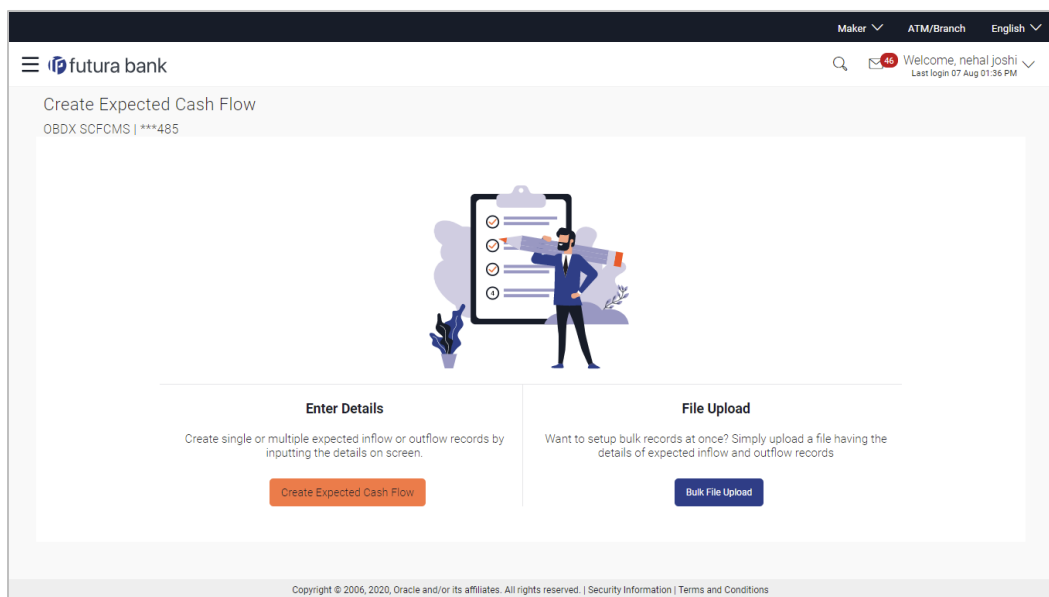

### 5.2.1.1 Creating Single/Recurring Cash Flow Records (manual entry)

**How to reach here:**

*Dashboard > Toggle menu > Cash Management > Cash Flow > Create Expected Cash Flow*

**To create expected cash flow record (manual entry):**

#### **Create Expected Cash Flow**

#### **Field Description**

<b>Field Name</b>	<b>Description</b>
<b>Create Expected Cash Flow</b>	
<b>Party Name &amp; ID</b>	Displays the name and ID of the logged-in corporate party.
<b>Enter Details</b>	Indicates the option to create single or recurring expected cash flow records by manual entry of cash flow details.
<b>File Upload</b>	Indicates the option to create bulk expected cash flow records through file upload. The file formats supported are .xls, .xlsx, .csv, and .xml.

1. In the **Create Expected Cash Flow** screen, click **Create Expected Cash Flow**. The overlay window appears.

## Create Expected Cash Flow (overlay window)

## 6. Collections

Several corporates, such as retail stores, have a huge inflow of physical cash/cheques on a daily basis. This has to be deposited in the corporate's bank account(s) on a regular basis. The corporate can either arrange for the cash/cheques to be deposited at a branch or opt for the pick-up service, where a bank representative collects the cash/cheques and makes the deposit on behalf of the corporate.

The Collections services offered by the bank enable the corporate user to enter the details of the cash/cheque being deposited.

### Pre-Requisites:

- Transaction access is provided to the corporate user.

## 6.1 Cash Deposits

### 6.1.1 Create Cash Deposit

Using this screen, you can enter the details of the physical cash being deposited into the corporate's account. Once you enter the cash details, you can also save the entry as a draft, to resume later.

### How to reach here:

*Dashboard > Toggle menu > Cash Management > Collections > Cash Deposit*

### To create a deposit slip:

The screenshot displays the 'Create Cash Deposit' interface for 'ABZ Solutions | \*\*\*462'. It features a table of drafts and a 'Draft' modal.

Draft Name	Creation Date	Number of Deposit Slips	Last Updated
Draft	25 Aug 2021	2	25 Aug 2021
nullcheck	10 Aug 2021	1	13 Aug 2021
check	10 Aug 2021	1	10 Aug 2021
Tax1	10 Aug 2021	2	10 Aug 2021
nehsendtomod	09 Aug 2021	4	10 Aug 2021
branchTest	09 Aug 2021	1	09 Aug 2021
nehbranchdraft	09 Aug 2021	1	09 Aug 2021
nehdes	06 Aug 2021	2	06 Aug 2021
nehsearch	05 Aug 2021	3	05 Aug 2021
nehuserstory	05 Aug 2021	1	05 Aug 2021

The 'Draft' modal contains the following text:

**Draft**

You can save the data entered while creating a deposit slip for cash deposit in a draft.

On saving the data in draft user can resume the submission of cash deposit where the user had left it. Simply select the draft which needs to be submitted from the given list. It will open the details in Deposit Slip page and user can update the data as required and submit the same. Once successfully submitted to host it will no longer appear in the draft list.

## 6.2 Cheques

### 6.2.1 Create Cheque Deposit

Using this screen, you can enter the details of the cheques being deposited into the corporate's account. Once you enter the cheque details, you can also save the entry as a draft, to resume later.

For creating a cheque deposit slip, there are two separate entries to be made:

- Add Deposit Slip Details – It is mandatory to create a deposit slip for every deposit being made.
- Add Cheque Details – You can link one or more cheques to a single deposit slip.

**How to reach here:**

*Dashboard > Toggle menu > Cash Management > Collections > Cheque Deposit*

**To create a deposit slip and add cheques to it:**

The screenshot shows the 'Create Cheque Deposit' interface for 'ABZ Solutions | \*\*\*462'. It features a 'Draft' section with a table listing draft entries. A 'Draft' modal is open on the right, providing instructions on how to use drafts to save data and resume the submission process later.

Draft Name	Creation Date	Number of Deposit Slips	Last Updated
