1 Preface

1.1 Introduction

Welcome to the **Configurations** user guide for Oracle Banking Origination. It provides an overview of how to configure the Business Process and related workflows for origination of Savings Account, Current Account, Term Deposit, Credit Card and Loans comprising of Home Loan, Vehicle Loan, Personal Loan and Education Loan for Individuals, and Term Loan and Business Loan for Small and Medium Business; Business Product Configuration and Dashboard related configurations.

1.2 Audience

This user guide is intended for back-office and front-end staff who setup and use Oracle Banking Origination.

1.3 Document Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.4 Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches](#), [Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

1.5 Acronyms and Abbreviations

The list of the acronyms and abbreviations that you are likely to find in the manual are as follows:

Table 1: Acronyms Table

Abbreviation	Description
DS	Data Segment
IPA	In-Principle Approval
SMB	Small and Medium Business

SLA	Service Level Agreement
System	Oracle Banking Origination Module

1.6 List of Topics

This user guide is organized as follows:

Table 2: List of Topics

Topics	Description
Configurations	This topic provides detailed information about configurations that needs to be performed Retail Origination processes.
Error Codes and Messages	This topic provides the error messages that you encounter while working with Oracle Banking Origination.
List Of Glossary	List Of Glossary has the list of alphabetical list of functional activity codes of the dashboards.

1.7 Related Documents

The related documents are as follows:

1. Operations User Guide
2. Savings Account Origination User Guide
3. Current Account Origination User Guide
4. Term Deposit Origination User Guide
5. Retail Loans Origination User Guide
6. Credit Card Origination User Guide
7. Alerts and Dashboard User Guide
8. Oracle Banking Common Core User Guide

1.8 Symbols

This user guide may refer to all or some of the following icons:

2 Configurations

This section includes following subsections:

- [2.1 Introduction](#)
- [2.2 Business Product Configuration](#)
- [2.3 Business Process Configuration](#)
- [2.4 Rule Configuration](#)
- [2.5 Credit Decision Configuration](#)
- [2.6 Dashboard Configuration](#)
- [2.7 Initial Funding Configuration](#)
- [2.8 Application Submission Configuration](#)
- [2.9 Machine Learning Configuration for Predicting Account Opening Date](#)
- [2.10 Batch Process Configuration](#)
- [2.11 FOP for Advices](#)
- [2.12 Service Level Agreement \(SLA\) Maintenance](#)

2.1 Introduction

Oracle Banking Origination includes comprehensive coverage of Origination Processes for Savings Account, Current Account, Term Deposit, Credit Cards and Loans comprising of Home Loan, Personal Loan, Education Loan and Vehicle Loan for Individual customers, and Term Loan and Business Loan for Small and Medium Business customers. This document provides an overview of the configuration that are required for the various Oracle Banking Origination processes.

Oracle Banking Origination is factory shipped with referenced workflows for the mentioned product origination. It is capable of configuring the workflows based on the bank's internal policy and requirements. Configuration such as Business Product, Business Process, Qualitative Scorecard, Facts, Rules and Credit Decision allows the bank to define their own workflows and banks can provide access to the various dashboard widgets based on the user roles. The brief summary of the configurations is described as below:

The Origination Processes in Oracle Banking Origination are driven based on the below configurations:

- Business Product
- Business Process

For the Assessment of the Loan Applications and Overdraft Limit creation in Current Accounts, the below mentioned two configurations are required:

- Credit Decision Configuration
- Facts and Rules

The module also supports comprehensive dashboard widgets for bank person as such as Relationship Manager, Branch Manager, Loan Officer and Credit Head. The configuration for the same is supported by providing access to the Function ID of the dashboard widgets.

Detailed information on all these configurations is enumerated in the below sections.

- [2.2 Business Product Configuration](#)
- [2.3 Business Process Configuration](#)
- [2.4 Rule Configuration](#)
- [2.5 Credit Decision Configuration](#)
- [2.6 Dashboard Configuration](#)
- [2.7 Initial Funding Configuration](#)
- [2.8 Application Submission Configuration](#)
- [2.9 Machine Learning Configuration for Predicting Account Opening Date](#)
- [2.10 Batch Process Configuration](#)
- [2.11 FOP for Advices](#)
- [2.12 Service Level Agreement \(SLA\) Maintenance](#)

2.2 Business Product Configuration

Business Product Configuration allows you to configure the various products for Retail Bank offerings. The details captured in the Business Products configuration are used for the display of the Product Suite that the bank is offering in the Product Catalogue and the Product Details view. The parameters configured are also relevant for the Origination Processes of the respective product origination.

The Business Product created in Oracle Banking Origination are linked with the Host Product. It is important to note that there is only one Golden Source for Product creation or configuration, which is in the HOST. The Business Product created in Oracle Banking Origination allows to configure parameters that are more customer facing and how the products are sold in Banks. Unlike the Host Product definition that looks at Product Configuration more from processing and transaction aspect. This helps in the product comparison and gauge what benefit the customer wants to derive from the product. In addition to this, the Business Product configuration in Oracle Banking Origination, allows the flexibility to inherit other pertinent product features allowing to build a stronger and stringent origination process flow with added validations which are done during the defined stages in the origination workflow. Example: Allow Offer Amendment, Offer Acceptance Method, and Assessment Methods etc., are defined in the Business product and further are validated in the origination process of the specific Business Product.

The Business Product is linked to the Business Process, so that the origination process related to the selected Business Product will flow as per the Business Process Definition. This allows capability to configure two different Business Products within the same Product Type to have dissimilar origination workflows. **Example:** Current Account with or without Overdraft Limit Facility.

The Business Product process allows to create Business Product and view the existing Business Products; the details of that are explained in the further sections.

This section includes following subsections:

- [2.2.1 Create Business Product](#)
- [2.2.2 View Business Product](#)

2.2.1 Create Business Product

The Create Business Product configuration process comprises of the below mentioned data segments, allowing you to define the various elements for the products:

- [2.2.1.1 Business Product Details](#)
- [2.2.1.2 Business Product Attributes](#)
- [2.2.1.3 Business Product Host Mapping](#)
- [2.2.1.4 Business Product Preferences](#)

2.2.1.1 Business Product Details

The Business Product Details is the first data segment of Create Business Product application.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Business Product**. Under **Business Product**, click **Create Business Product**.

→ The **Business Product Details** screen is displayed.

Figure 1: Business Product Details

3. Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 4: Business Product Details – Field Description

Field	Description
Product Type*	<p>Select the product from the drop-down list.</p> <p>Available options are:</p> <ul style="list-style-type: none"> • Savings Account • Current Account • Loan Account • Term Deposit Account • Credit Card
Product Category*	<p>Select the product category.</p> <p>Available options are</p> <ul style="list-style-type: none"> • Individual • Small and Medium Business <p>If Product Type is selected as Credit Card, the system defaults as Individual in read-only mode.</p>
Product Sub Type*	<p>Select the product sub-type from the drop-down list.</p> <p>This field appears and is supported for the below listed Product types and the respective product categories only.</p> <ol style="list-style-type: none"> 1. Loan Account <ul style="list-style-type: none"> • Home Loan (Individuals) • Vehicle Loan (Individuals) • Education Loan (Individuals) • Personal Loan (Individuals) • Business Loan (Small and Medium Business) • Term Loan (Small and Medium Business) 2. Term Deposit <ul style="list-style-type: none"> • Simple Term Deposit • Reinvestment Term Deposit

Field	Description
	3. Credit Card <ul style="list-style-type: none"> • Retail Credit Card
Business Product Code*	Specify the business product code. NOTE: Maximum length of business product code should not be more than 6 characters. Alphanumeric and alphabets should be in capital.
Business Product Name*	Specify the business product name.
Business Product Date Range*	Select the date range as per the business requirement. System displays the logged in application date in Start Date by default. The End date has to be ahead of the Start Date and the Business Product Review Date .
Business Product Review Date	Select the review date as per the business requirement. Review date has to be ahead of the Business Product Start Date and earlier than the Business Product End Date .
Channel Allowed*	Select the channels which are allowed for the business product from the drop-down list. Available options are: <ul style="list-style-type: none"> • RPM • OBDX
Fintech Allowed	Select the toggle if the business product is supported for Origination from 'Fintech' Companies.
Fintech Name*	Select the Fintech Company name from the drop-down list. System allows selection of multiple companies. This field is displayed only if Fintech Allowed toggle is selected.

Field	Description
IPA Applicable	<p>Select the toggle to indicate whether the In-Principal Approval (IPA) is applicable for loan. By default, this will be disabled.</p> <p>This field is displayed if Product Type is selected as Loan and Product Category is selected as Individuals.</p>
Application Submission is Mandatory	<p>Select the toggle to make the Application Entry stage as mandatory in Product Details data segment for the business product.</p> <p>This configuration will be possible only if the Application submission configuration is set as 'Y'. Please refer section 2.8 Application Submission Configuration for more details.</p>
Audit	Click Audit button to view the Maker and Checker details with status and timestamp.
Back	<p>Click Back to navigate to the previous data segment within a stage.</p> <p>NOTE: Since this is the first screen on the workflow, Back will be disabled.</p>
Next	<p>Click Next to navigate to the next data segment, after successfully capturing the data.</p> <p>The system will validate for all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action.</p> <p>Users will not be able to proceed to the next data segment, without capturing the mandatory data.</p>
Save & Close	Click Save & Close to save the data captured, provided all the mandatory fields are captured and will be available in the My Task list for the user to continue later.

Field	Description
Cancel	Click Cancel to close the Business Product screen, the status of this get updated as 'In-Progress'. The user can work on it later by picking it from the View Business Product screen.

2.2.1.2 Business Product Attributes

In this data segment, the details such as business product summary, business product image, feature, eligibility so on are captured, and are ultimately used for displaying in the product catalogue process and the product details.

1. Click **Next** in **Business Product Details** screen to proceed with next data segment, after successfully capturing the data.

→ The **Business Product Attributes** screen is displayed.

Figure 2: Business Product Attributes

The screenshot displays the 'Business Product Attributes' screen within the 'Business Product Details' section. The interface includes a sidebar with navigation options: Business Product Details, Business Product Attributes (selected), Business Product Host Mapping, and Business Product Preference. The main content area is divided into several sections:

- Business Product Image:** Includes a '+Click to Add Product Image' button, a 'Selected file:' field with an 'Upload' button, and a file name 'AM8612_1719583155950.png'.
- Business Product Summary:** Contains a text field with the value 'Testing the summary'.
- Feature:** A table with columns for Feature Name, Feature Description, and Display On Catalogue. It lists 'Locker Rent' (10% discount on annual locker rental) and 'Balance' (Unlimited number of cash withdrawals).
- Eligibility:** A table with columns for Eligibility Name, Eligibility Description, and Display On Catalogue. It lists 'Resident' (Tax Resident of Country) and 'Age' (Above or 18 years).
- Fees & Charges:** A table with columns for Fees & Charges Name, Fees & Charges Description, and Display On Catalogue. It lists 'Processing Charge' (1% of Loan Amount or INR 5000 whichever is lower).
- Terms & Conditions:** Includes a '+Click to Add Terms & Conditions' button, a 'Selected file:' field, and an 'Upload' button.
- Product Brochure:** Includes a '+Click to Add Product Brochure' button, a 'Selected file:' field, and an 'Upload' button.
- Comments:** A text area with a 'Max 300 characters' limit.

At the bottom of the screen, there is an 'Audit' button on the left and a row of navigation buttons: 'Back', 'Next', 'Save & Close', and 'Cancel'.

2. Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 5: Business Product Attributes – Field Description

Field	Description
Business Product Image*	Select the image that you want to display for the business product in the Product Catalogue. Click Upload to upload it.
Business Product Summary*	Specify the content for the business product summary.
Feature	Specify the feature details.
Feature Name*	Specify the feature name.
Feature Description*	Specify the feature description of the business product.
Display On Catalogue*	Select this checkbox if the same information should be displayed in the Product Catalogue.
Add Feature/Remove Feature	Click Add Feature or Remove Feature to add or remove the rows respectively.
Eligibility	Specify the eligibility details.
Eligibility Name*	Specify the eligibility name.
Eligibility Description*	Specify the eligibility description of the business product.
Display On Catalogue*	Select this checkbox if the same information should be displayed in the product catalogue.
Add Eligibility /Remove Eligibility	Click Add Eligibility or Remove Eligibility to add or remove the rows respectively.
Fees & Charges	Specify the fees and charges details.

Field	Description
Fees & Charges Name*	Specify the fees and charges name.
Fees & Charges Description*	Specify the fees and charges description of the business product.
Display On Catalogue*	Select this checkbox, if the same information should be displayed in the product catalogue.
Add Fees & Charges/Remove Fees & Charges	Click Add Fees & Charges or Remove Fees & Charges to add or remove the rows respectively.
Terms & Conditions	Select the Terms & Condition PDF file and click Upload to upload it.
Product Brochures	Select the Business Product Brochure PDF file and click Upload to upload it.
Comments	Specify the comments, if required.
Audit	Click Audit button to view the Maker and Checker details with status and timestamp.
Back	Click Back to navigate to the previous data segment within a stage.

Field	Description
Next	<p>Click Next to navigate to the next data segment, after successfully capturing the data.</p> <p>The system will validate for all mandatory data segments and data fields. If mandatory details are not provided, the the system displays an error message for the user to take action.</p> <p>Users will not be able to proceed to the next data segment, without capturing the mandatory data.</p>
Save & Close	<p>Click Save & Close to save the data captured, provided all the mandatory fields are captured and will be available in the My Task list for the user to continue later.</p>
Cancel	<p>Click Cancel to close the Business Product screen, the status of this gets updated as 'In-Progress'. The user can work on it later by picking it from the View Business Product screen.</p>

2.2.1.3 Business Product Host Mapping

In this data segment, the business product is mapped to the host product and parameters for Interest and Charges that are linked to the host product are defined.

1. Click **Next** in **Business Product Attributes** screen to proceed with next data segment, after successfully capturing the data.

→ The **Business Product Host Mapping** screen is displayed.

Figure 3: Business Product Host Mapping

- Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 6: Business Product Host Mapping – Field Description

Field	Description
Business Product Code	Displays the business product code defaulted from Business Product Code entered in the Business Product Details data segment.
Select Host Product*	<p>Select the host product from the drop-down list.</p> <p>Note: Without Oracle Banking Routing Hub Configuration, Host products will not be displayed. Refer to Oracle FLEXCUBE Universal Banking Integration Guide.</p> <p>Without Card Management System Integration, the Credit card product cannot be configured.</p> <p>Refer to Card Management System Integration Guide.</p>
Product Description	Displays the product description once the host product is selected in Select Host Product .

Field	Description
Get Products Details	Click Get Product Details , and the system will display various interest codes and the charge codes linked to the host product in the Interest Details and Charge Details panel.
Audit	Click Audit button to view the Maker and Checker details with status and timestamp.
Back	Click Back to navigate to the previous data segment within a stage.
Next	<p>Click Next to navigate to the next data segment, after successfully capturing the data.</p> <p>The system will validate for all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action.</p> <p>Users will not be able to proceed to the next data segment, without capturing the mandatory data.</p>
Save & Close	Click Save & Close to save the data captured, provided all the mandatory fields are captured and will be available in the My Task list for the user to continue later.
Cancel	Click Cancel to close the Business Product screen, the status of this gets updated as 'In-Progress'. The user can work on it later by picking it from the View Business Product screen.

3. Click **Get Product Details**.

→ The **Business Product Host Mapping – Interest Details and Charge Details** screen is displayed.

Figure 4: Business Product Host Mapping – Interest Details and Charge Details

- Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 7: Business Product Host Mapping with Interest Details and Charge Details – Field Description

Field	Description
Interest Configuration	Specify the required interest details.
Interest Code	Displays the interest code linked to the host product.
Description	Displays the description of the interest code linked to the host product.
User Defined Element ID	Displays the user defined element ID linked to the Interest Code .

Field	Description
Description	Displays the description of the user defined element ID linked to the Interest Code .
Display Name	Specify the display name of the interest user defined element. This is the interest name that would be displayed in the Oracle Banking Origination screens such as Interest details data segment for Current and Savings account origination process and Loan Interest Details data segment for loan origination process.
Display	Select the toggle to display the specified interest user defined element in the Interest Details data segment.
Margin Allowed	<p>Select the toggle if the margin can be provided to the Business Product in the Interest Details data segment of product origination process.</p> <p>This toggle is always ON if the Risk Based Pricing Applicable toggle is ON in Business Product Preferences screen.</p> <p>NOTE: Currently, the margin is not supported for Savings and Current Account, hence this switch should be off for Savings Account and Current Account.</p>
Charge Configuration	Specify the required charge details.
Charge Code	Displays the charge code linked to the Host Product.
Description	Displays the description of the charge code linked to the Host Product.
User Defined Element ID	Displays the user defined element ID linked to the charge code.
Description	Displays the description of the user defined element ID linked to the charge code.

Field	Description
Display Name	Enter the display name of the interest user defined element This is the interest name that would be displayed in the Oracle Banking Origination screens such as Interest Data Segment.
Display	Select to display the specified charge code or charge user defined element in the Charge Details data segment.
Waiver Allowed	Select if specified charges can be waived during Product Origination.
Amend Allowed	Select if specified charges can be amended during Product Origination.
Audit	Click Audit button to view the Maker and Checker details with status and timestamp.
Back	To navigate back to the previous data segment within a stage, click Back . Being a maintenance Screen, the data segment will populate in Read only mode.
Next	<p>Click Next to navigate to the next data segment, after successfully capturing the data.</p> <p>The system will validate for all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action.</p> <p>Users will not be able to proceed to the next data segment, without capturing the mandatory data.</p>
Save & Close	On click of Save & Close , to save the captured details. If mandatory fields have not been captured, system will display error until the mandatory fields have been captured.
Cancel	Click Cancel to close the Business Product window, the status of this gets updated as 'In-Progress'. The user can work on it later by picking it from the View Business Product process.

The number of panels for interest details and charges details will depend on the number of interest codes and charge codes linked to the Host Product.

2.2.1.4 Business Product Preferences

The Business Product Preference data segment allows to define preferences based on whether the product is Savings Account, Current Account or Loans.

1. Click **Next** in **Business Product Host Mapping** screen to proceed with next data segment, after successfully capturing the data.

Prerequisite

Only if **Product Type** is selected as Loan Account and **Product Category** is selected as Individual in Business Product Details data segment

→ The **Business Product Preference – Loan Product** screen is displayed.

If mandatory details are not provided, the system displays an error message for the user to take action.</p> <p>Users will not be able to proceed to the next data segment, without capturing the mandatory data.</p>
Save & Close	<p>Click Save & Close to save the data captured, provided all the mandatory fields are captured and will be available in the My Task list for the user to continue later.</p>
Cancel	<p>Click Cancel to close the Business Product window, the status of this gets updated as 'In-Progress'. The user can work on it later by picking it from the View Business Product process.</p>

2. Click **Submit** to create business product.

At this point, the status of business product is unauthorized. User with supervisor access has to approve the business product. Once approved, status of the business product changes from unauthorized to authorized and is available for linking in the business process.

2.2.2 View Business Product

Oracle Banking Origination supports to view the business product created. The View Business Product allows the user to view all of the authorized, un-authorized and closed business product. Authorize option is also available for supervisor users for approving unauthorized business product.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Business Product**.
3. Under **Business Product**, click **View Business Product**.

→ The **View Business Product** screen is displayed.

Figure 12: View Business Product

4. Click  icon on the top right-hand side of the business product tile.

Prerequisite

Only if business product is authorized.

→ The following **View Business Product Pop-up** is displayed.

Figure 13: View Business Product Pop-Up**Prerequisite**

Only if business product is un-authorized.

→ The following **View Business Product Pop-up** is displayed.

Figure 14: View Business Product Pop-Up

For more information on options, refer to the field description table below.

Table 15: View Business Product – Option Description

Field	Description
Unlock	<p>As specified in Figure 10 and Figure 11, this option is common for authorized and unauthorized business product. Click Unlock to edit the business product information in Create Business Product data segment.</p> <p>System will not allow to edit the following fields:</p> <ul style="list-style-type: none"> • Product Type • Product Sub-Type • Business Product Code. <p>Make the required changes in the other relevant data segment and submit the business product.</p>
Close	Click Close to close the business products that are no more relevant for banking product offering. User can close only authorized business products.
Copy	Click Copy to copy the authorized or unauthorized business products to quickly create new business product.
View	Click View to view the authorized or unauthorized business products.
Authorize	User with supervisor access will be able to authorize the unauthorized business product. Once approved, the business product status changes to 'Authorized' and is available for linking in the Business Process.
Delete	Click Delete to delete the business products that are unauthorized and no more required.

2.3 Business Process Configuration

Oracle Banking Origination is equipped with Business Process configuration helping banks to build desired workflow for origination by defining the stages for the product origination and defining the respective data segments, checklists, documents required and advice generation for the stages.

A business process can be defined as a set of activities and tasks that, once completed, will accomplish the distinct origination processes. The business process must involve clearly defined inputs and a single output.

The business process definition will determine the different stages which are required for a given combination of the process code, life cycle and business product code. The workflow management of these stages and the relevant stage movements are defined in Workflow Orchestrator to help us orchestrate the micro-services based process-flow and ensure seamless transition of the Account Origination process across various stages in that given order. The Workflow Orchestrator process will drive the workflow from one stage to another based on the process outcomes at the respective stages and subject to fulfilling of the mandatory data capture, confirmation on the mandatory checklist items and submission of mandatory documents at the respective stages. The stages defined in the business process can be dynamically assigned to different user profiles or roles.

During product origination, the system picks the business process run-time and initiates the workflow based on the configuration.

The Prerequisites for configuring the Business Process are enumerated below:

- **Lifecycle**

Lifecycle represents the lifecycle of the process for which the Business Process is created.

These are factory shipped codes and currently support 'Origination' lifecycle for products types such as Savings Account, Current Account, Loans and Credit Card.

The list of lifecycle codes is available in Lifecycle Codes.

- **Process Code**

Process Code defines the various stages relevant for the origination workflow. Process Code configuration allows you to define the business process flow that needs to be mapped for the business product and lifecycle code combination in the Business Process configuration.

A set of default process codes are factory-shipped for the reference workflow. User can also create process codes in "CMC_TM_PROCESS_CODE" and "CMC_TM_PROCESS_STAGE" tables. The list of shipped process codes is available in Process Codes.

- **Business Product**

Business Product maintenance allows configuring the various business products in accordance with the product offerings that the bank deals in. Each business product has a unique business process defined for a specific lifecycle code selected.

This section includes following subsections:

- [2.3.1 Create Business Process](#)
- [2.3.2 View Business Process](#)

2.3.1 Create Business Process

The Create Business Process aids in configuring the workflow for product originations. As mentioned earlier, this process will allow to define the data segments, checklists, documents and advices for the stages defined in the process code selected for the lifecycle code and business product combination.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Business Process**.
3. Under **Business Process**, click **Create Business Process**.

→ The **Create Business Process** screen is displayed.

Figure 15: Create Business Process

4. Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 16: Create Business Process – Field Description

Field	Description
Business Process Code*	Specify an alphanumeric business process code. Maximum Length allowed is 16.
Business Process Description*	Specify the description of the business process code. Maximum Length allowed is 60.
Lifecycle*	Search and select the lifecycle code.
Lifecycle Description	Displays the description of the lifecycle selected.
Product Category*	Select the product category. Available options are <ul style="list-style-type: none"> • Individual • Small and Medium Business. If Product Type is selected as Credit Card , the system defaults as Individual in read-only mode.
Process Code*	Search and select the process code of the business process flow that needs to be mapped for the lifecycle code and business process code combination.
Process Description	Displays the description of the selected process code.
Business Product Code*	Select the business product code for which the business process is being created. Alternatively, the system allows to select 'All' or select the multiple product codes respectively, for which the business process will be applicable to the selected business products that are associated with the Lifecycle and Process Code.

Field	Description
Business Product Name	Displays the business product name based on the product code selected.
Save	To save the captured details, click Save .
Cancel	Click Cancel to close the Business Process window, the status of this gets updated as 'In-Progress'. The user can work on it later by picking it from the View Business Process.

NOTE: System will allow you to configure only one business process for a combination of **Lifecycle** and **Business Product Code**.

5. Search and select the **Process Code**.

→ The **Create Business Process** screen with stages is displayed.

Figure 16: Create Business Process screen with stages

The Create Business Process configuration allows to configure the below elements for each of the stages of the Product Origination workflow:

- [2.3.1.1 Data Segment](#)
- [2.3.1.2 Document](#)
- [2.3.1.3 Checklist](#)
- [2.3.1.4 Advices](#)

2.3.1.1 Data Segment

A data segment, as the name suggests is an individual block of data. Bringing in data segments allows to break down a huge process into smaller units, which will be easier to update, maintain and process. Business Process will consist of such several data segments that makes up the stage.

Business Process Definition enables the user to perform the following:

1. Add n number of data segments to each stage.
2. Set the data segment as mandatory or non-mandatory.
3. Set the data segment as editable or non-editable.
4. Control the sequence order of the data segments.
5. Select the stage.
6. Click **Data Segments** tab and then click  icon on the header panel.

→ The **Data Segments** screen is displayed.

Figure 17: Data Segments

7. Select the required data segment or data segments for the selected stage and specify the details in the relevant data fields. For more information on fields, refer to the field description table below.

Table 17: Data Segments – Field Description

Field	Description
Preview	User can click on Preview tab to view the data segment.
Settings	Specify the settings.
Mandatory	Select if data segment is mandatory.
Editable	Select if data segment is editable.
Select Products	Select the Products for which the data segment is relevant.

8. Click **Add**.

→ The **Create Business Process with Data Segments** screen is displayed with data segment added.

Figure 18: Create Business Process with Data Segments

System allows to re-sequence the data segment by dragging and dropping over the specific data segment.

2.3.1.2 Document

This section describes about the documents that are to be submitted by the customer for the Product Origination process.

1. Select the stage and click **Document** tab to define the specific documentation requirement for different stage.

→ The **Create Business Process – Documents** screen is displayed.

Figure 19: Create Business Process – Documents

2. Specify details in the relevant data fields. For more information on fields, refer to the field description table below.

Table 18: Create Business Process – Documents – Field Description

Field	Description
Document Type	Search and select the document type.
Document Description	Displays the corresponding description of the document.
Mandatory	Select if the document submission for the stage is mandatory.

Field	Description
Business Products	Select the required option for the document submission requirement. Available options are: <ul style="list-style-type: none"> • Single Product • List of Products • All
Save	To save the captured details, click Save .
Cancel	Click Cancel to close the Business Process screen, the status of this gets updated as 'In-Progress'. The user can work on it later by picking it from the View Business Process screen.

2.3.1.3 Checklist

Checklist are the distinct and this section describes list of mandatory checkpoints by the bank to its users to adhere to during the Product Origination processes.

1. Select the stage and click **Checklist** tab.

→ The **Create Business Process – Checklist** screen is displayed.

Figure 20: Create Business Process – Checklist

The screenshot displays the 'Create Business Process' interface. At the top, there are input fields for 'Business Process Code', 'Business Process Description', 'Lifecycle', and 'Lifecycle Description'. Below these are fields for 'Product Category' (set to 'Individual'), 'Process Code' (set to 'SAVORG'), and 'Business Product Code'. A 'Process Description' section shows 'Savings Account Origination Process' with a 'Process Full View' button. A horizontal process flow bar contains six steps: 'Application Entry' (highlighted in pink), 'Overdraft Limit Details', 'Application Enrichment', 'Account Funding', 'Supervisor Approval', and 'Handoff Retry'. Below the flow bar, the 'Application Entry' section is expanded, showing a 'Checklist Data' table with columns for 'Checklist Data', 'Mandatory' (a toggle switch), and 'Business Products'. At the bottom right, there are 'Save' and 'Cancel' buttons.

2. Specify details in the relevant data fields. For more information on fields, refer the field description table below.

Table 19: Create Business Process – Checklist – Field Description

Field	Description
Checklist Data	It is a free-text field that allows to user to enter the checklists that must be validated as part of selected stage.
Mandatory	Select if the document submission for the stage is mandatory.
Business Products	Select the required option to restrict the checklist. Available options are: <ul style="list-style-type: none"> • Single Product • List of Products • All
Save	Click Save to save the captured details.
Cancel	Click Cancel to close the Business Process screen, the status of this gets updated as 'In-Progress'. The user can work on it later by picking it from the View Business Process screen.

2.3.1.4 Advices

Advices are official letter of notices detailing an action taken or to be taken on a stated date by the bank. This is the final configuration for the Business Process creation.

1. Select the stage and click **Advices** tab.

→ The **Create Business Process – Advices** screen is displayed.

Figure 21: Create Business Process – Advices

2. Specify details in the relevant data fields. For more information on fields, refer the field description table below.

Table 20: Create Business Process – Advices – Field Description

Field	Description
Advice Type	Search and select the required advice type from the displayed list of all the valid advices maintained, and that must be mapped to this stage.
Advice Description	Displays the corresponding description of the advice.
Business Products	Select the required option to restrict the advices. Available options are: <ul style="list-style-type: none"> • Single Product • List of Products • All

Field	Description
Save	Click Save to save the captured details.
Cancel	Click Cancel to close the Business Process screen, the status of this gets updated as 'In-Progress'. The user can work on it later by picking it from the View Business Process screen.

3. Click **Save** to create business process.

At this point, the status of business process is unauthorized. User with supervisor access has to approve the business process. Once approved, status of the business process changes from unauthorized to authorized and is activated for usage in the Product Origination Process.

2.3.2 View Business Process

Oracle Banking Origination supports to view the business process created. The View Business Process allows the user to view all of the authorized, un-authorized and closed business process. Authorize option is also available for supervisor users for approving unauthorized business process.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Business Process**.
3. Under **Business Process**, click **View Business Product**.

→ The **View Business Process** screen is displayed.

Figure 22: View Business Process

Tiles representing the various Business Process in different state such as Open, In-Progress, Closed and in Authorized and Unauthorized status are visible in this process.

4. Click  icon on the **Business Process Tile** and click **View** to view the specific business process.

→ The **Business Process Definition – View** screen is displayed.

Figure 23: Business Process Definition - View

5. Click  icon on the **Business Process Tile** and click **Unlock** to edit the specific business process.

→ The **Business Process Definition – Unlock** screen is displayed.

Figure 24: Business Process Definition – Unlock

For more information on options, refer to the field description table below.

Table 21: View Business Product – Option Description

Field	Description
View	Click View to view the business process
Unlock	<p>As specified in Figure 10 and Figure 11, this option is common for authorized and unauthorized business product. Click Unlock to edit the business product information in Create Business Product data segment.</p> <p>System will not allow to edit the following fields:</p> <ul style="list-style-type: none"> • Product Type • Product Sub-Type • Business Product Code <p>Make the required changes in the other relevant data segment and submit the business product.</p>
Close	Click Close to close the business products that are no more relevant for banking product offering. User can close only authorized business products.
Authorize	<p>User with supervisor access will be able to authorize the unauthorized business product. Once approved, the business product status changes to 'Authorized' and is available for linking in the Business Process.</p> <p>This option will appear for the unauthorized business process.</p>
Close	Click Close to close the business products that are unauthorized and no more required.

2.4 Rule Configuration

Rule Configuration enables the user to create, view, and modify the facts and rules.

This section includes following subsections:

- [2.4.1 Fact](#)
- [2.4.2 Rule](#)

2.4.1 Fact

Fact is the information carrying entity which can be used for creating the rules or features.

The following list of facts are factory shipped with the product.

Table 22: List of Facts – Factory shipped

Fact Code	Description	Type
AGE	Customer Age	Number
PRODUCTCODE	Business Product Code	Text
TOTAL_INCOME	Total Income	Number
TOTAL_EXPENSE	Total Expense	Number
OBS_SCORE	Bureau Score	Number
INSTALMENT	Proposed Loan Instalment	Number
COLLATERAL_VALUE	Collateral Value	Number
LOANAMOUNT	Loan Amount	Number
ASSETS	Total Assets	Number
LIABILITY	Total Liability	Number
QUALITY_SCORE	Qualitative Score	Number
NETINCOME	Net Income	Number

Fact Code	Description	Type
CDS_GRADE	Risk Grade For Pricing	Text
LOANTENURE	Loan Tenure	Number

SMB_RETURN_ON_INVESTMENT	Return on Investment for SMB	Number
SMB_RETURN_ON_EQUITY	Return on Equity for SMB	Number
SMB_RETURN_ON_ASSET	Return on Asset for SMB	Number

This section includes following subsections:

- [2.4.1.1 Create Fact](#)
- [2.4.1.2 View Fact](#)

2.4.1.1 Create Fact

The **Create Fact** screen allows the user to create fact through single creation or bulk upload.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Rule**. Under **Rule**, click **Fact**.
3. Under **Fact**, click **Create Fact**.
4. Click **New** to create a single fact.

→ The **Create Fact** screen is displayed.

Figure 25: Create Fact

5. Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 23: Create Fact – Field Description

Field	Description
Code*	Specify the alphanumeric code without space for the fact.
Description	Specify the description of the fact.

Field	Description
Product Processor*	Select the product processor.
Type*	Select the type of the fact.
Save	To save the captured details, click Save .

2.4.1.2 View Fact

The **View Fact** screen allows the user to view and edit the facts.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Rule**.
3. Under **Rule**, click **Fact**.
4. Under **Fact**, click **View Fact**.

→ The **View Fact** screen is displayed.

Type*	Select the type of the fact.
Save	To save the captured details, click Save .

2.4.2 Rule

Rule enables the user to build the expression to perform the calculation with the facts created.

Steps to build the expression is explained with the below example.

The Rule Expression for Loan to Value (LTV) is

Loan to Value (LTV) = (LOANAMOUNT / COLLATERAL_VALUE) * 100

For now, the above expression is not supported directly, and LTV calculation is achieved by the below steps.

Step 1: Create a Rule1 - LOAN_TO_COLLATERAL

Expression - LOANAMOUNT/COLLATERAL_VALUE

Step 2: Create a rule2 - Loan to Value (LTV)

Expression - LOAN_TO_COLLATERAL * 100

This section includes following subsections:

- [2.4.2.1 Create Rule](#)
- [2.4.2.2 View Rule](#)
- [2.4.2.3 Create Rule Group](#)
- [2.4.2.4 View Rule Group](#)
- [2.4.2.5 View Audit Rule](#)

2.4.2.1 Create Rule

The **Create Rule** screen allows the user to create the rule.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Rule**. Under **Rule**, click **Rule**.
3. Under **Rule**, click **Create Rule**.

→ The **Create Rule** screen is displayed.

Figure 28: Create Rule

- Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 26: Create Rule – Field Description

Field	Description
Code*	Specify the alphanumeric code without space for the fact.
Description	Specify the description of the fact.
Product Processor*	Displays the product processor.
Expression Builder	Select the expressions to build the rule.
Add Expression	Click Add Expression to create the expression for the rule.
+ icon	Click this icon to add new expression.
Fact / Rules	Select the fact or rule from the drop-down list.
Operator	Select the comparison operator from the drop-down list.

Field	Description
Data Type	<p>Select the data type for the fact or rule. Once you select the data type, the new field appears adjacent to the data type.</p> <p>Update the same based on the selected data type.</p> <p>The available options are:</p> <ul style="list-style-type: none"> • Text • Number • Boolean • Date • Fact
Output	<p>Select the output from the drop-down list. Once you select the output, the new field appears adjacent to the output.</p> <p>Update the same based on the selected output option.</p> <p>The available options are:</p> <ul style="list-style-type: none"> • Text • Number • Boolean • Date • Fact • NA
Expression	Displays the expression and output updated in the expression builder.
Save	To save the captured details, click Save .

2.4.2.2 View Rule

The View Rule screen allows the user to view and modify the existing rules.

Prerequisite

Specify **User Id** and **Password**, and login to **Home** screen.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Rule**.
3. Under **Rule**, click **Rule**.
4. Under **Rule**, click **View Rule**.

→ The **View Rule** screen is displayed.

Expression	Displays the expression and output updated in the expression builder.
Save	To save the captured details, click Save .

2.4.2.3 Create Rule Group

The **Create Rule Group** screen allows the user to combine the rule.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Rule**. Under **Rule**, click **Rule**.
3. Under **Rule**, click **Create Rule Group**

→ The **Create Rule Group** screen is displayed.

Figure 31: Create Rule Group

4. Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 29: Create Rule Group – Field Description

Field	Description
Group Name	Specify the unique group name for the selected rules.
Product Processor	Click search and select the product processor.
Tag	Specify the tag for rulegroup.
Evaluate Group	<p>Select the toggle to evaluate the expression in sequence.</p> <p>NOTE: If the toggle is disabled, the evaluation of the expression stops when the condition of expression is True.</p>

Field	Description
 icon	Click this icon to add expression.
Save	To save the captured details, click Save .

2.4.2.4 View Rule Group

The View Rule Group screen allows the user to view and modify the existing rules group.

Prerequisite

Specify **User Id** and **Password**, and login to **Home** screen.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Rule**. Under **Rule**, click **Rule**.
3. Under **Rule**, click **View Rule Group**

→ The **View Rule Group** screen is displayed.

Figure 32: View Rule Group

4. Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 31: View Audit Rule – Field Description

Field	Description
Request ID	Specify the request ID available from the output.

5. Click **Submit**, to view to details.

6. Click **Show Rule log**, to view the log rule for selected request ID.

2.5 Credit Decision Configuration

A credit score is the number that depicts a consumer's credit worthiness. The higher the score the better a borrower looks to potential lenders. A credit score is based on the various features linked to the score model. Lenders such as banks and credit card companies, use credit scores to evaluate the risk of lending money to the customer.

This section includes following subsections:

- [2.5.1 Questionnaire](#)
- [2.5.2 Logical Model](#)
- [2.5.3 Borrowing Capacity](#)
- [2.5.4 Scoring Feature](#)
- [2.5.5 Quantitative Scoring Model](#)
- [2.5.6 Qualitative Scoring Model](#)
- [2.5.7 Decision Grade Matrix](#)
- [2.5.8 Pricing](#)

2.5.1 Questionnaire

Questionnaire allows you to create the set of questions and answers to evaluate the qualitative score for each applicant. This questionnaire is used in the qualitative scoring model and the response to the questions are sent from the Oracle Banking Origination to Decision Service.

This section includes following subsections:

- [2.5.1.1 Create Questionnaire](#)
- [2.5.1.2 View Questionnaire](#)

2.5.1.1 Create Questionnaire

The **Create Questionnaire** screen allows the user to create the qualitative questionnaire based on the various parameters. This questionnaire is further linked to define qualitative scoring model.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**. Under **Credit Decision**, click **Questionnaire**.
3. Under **Questionnaire**, click **Create Questionnaire**.

→ The **Create Questionnaire** screen is displayed.

Figure 34: Create Questionnaire

4. Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 32: Create Questionnaire – Field Description

Field	Description
Questionnaire Code*	Specify the unique questionnaire code.
Questionnaire Description*	Specify the description of the questionnaire.

 - Questionnaire Code
 - Questionnaire Description
 - Authorization Status
 - Record Status
6. Click  icon on the top right-hand side of the questionnaire tile and click **Unlock**.

→ The **Questionnaire Maintenance** screen is displayed.

Figure 37: Questionnaire Maintenance

The screenshot displays the 'Questionnaire Maintenance' interface. At the top, there's a header bar. Below it, the 'Basic Details' section contains four fields: 'Questionnaire Code' (value: QUAL01), 'Questionnaire Description' (value: Qualitative Questionnaire), 'Product Processor' (value: OFLO), and 'Category' (value: 1). A 'Preview' button is located to the right of the 'Category' field. Below the 'Basic Details' section, there's a list of questions. The first question is 'Q101 How long applicant staying in the current residence ?' and the second is 'Q102 How many members dependent on borrower ?'. At the bottom of the screen, there are four buttons: 'Add Question', 'Audit', 'Save', and 'Cancel'.

7. Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to [Table 26: Create Questionnaire – Field Description](#).

The below fields are non-editable in **Maintenance** screen.

- Questionnaire Code
- Product Processor

2.5.2 Logical Model

Logical Model allows you to define logical model to evaluate the application even before the Credit Assessment, only those application where Logical Model is Pass will be proceeded further. If the Logical Model is Failed, then the application will be terminated.

This section includes following subsections:

- [2.5.2.1 Create Logical Model](#)
- [2.5.2.2 View Logical Model](#)

2.5.2.1 Create Logical Model

The **Create Logical Model** screen allows the user to create the logical model as per the requirement. The Logical Model can be created by linking the rules and expressions.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**. Under **Credit Decision**, click **Logical Model**.
3. Under **Logical Model**, click **Create Logical Model**.

→ The **Create Logical Model – Selection Criteria** screen is displayed.

2.5.3 Borrowing Capacity

Borrowing Capacity allows the user to calculate the maximum lendable amount based on the various criteria of the lenders such as debt to income ratio, credit score, credit history etc. The rules are linked for calculating the borrowing capacity for the applicant.

A sample rule to calculate borrowing capacity is given below:

Scenario: Based on Income and FICO score

Rule 1:

IF MIN(FICO_SCORE) >= 500 AND MIN(EMPLOYMENT_PERIOD) < 1 YEAR THEN
MULTIPLIER = 5 ELSEIF MIN(FICO_SCORE) < 500 AND MIN(EMPLOYMENT_PERIOD) > 1
YEAR THEN MULTIPLIER = 4

Rule 2: Max Lendable Amount

MIN(Income) * Rule1

This section includes the following subsections:

- [2.5.3.1 Create Borrowing Capacity](#)
- [2.5.3.2 View Borrowing Capacity](#)

2.5.3.1 Create Borrowing Capacity

The **Create Borrowing Capacity** screen allows the user to calculate the borrowing capacity based on the various inputs. The borrowing capacity can be created by linking the rule.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**. Under **Credit Decision**, click **Borrowing Capacity**.

- Under **Borrowing Capacity**, click **Create Borrowing Capacity**.

2.5.5 Quantitative Scoring Model

Quantitative Scoring Model allows the user to define quantitative scoring model based on the various features.

This section includes following subsections:

- [2.5.5.1 Create Quantitative Scoring Model](#)
- [2.5.5.2 View Quantitative Scoring Model](#)

2.5.5.1 Create Quantitative Scoring Model

The **Create Quantitative Scoring Model** screen allows the user to create the quantitative scoring model by linking the various features. The user needs to create quantitative scoring models for both the application and applicant level.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**. Under **Credit Decision**, click **Quantitative Scoring Model**.
3. Under **Quantitative Scoring Model**, click **Create Quantitative Scoring Model**.

→ The **Create Quantitative Scoring Model** screen is displayed.

Figure 51: Create Quantitative Scoring Model

The screenshot shows the 'Create Quantitative Scoring Model' interface. It features a 'Basic Details' section with the following fields: 'Scoring Model' (a dropdown menu), 'Scoring Model Code', 'Effective Date', 'Product Processor', 'Scoring Model Description', 'Expiry Date', and 'Priority'. Below this is a 'Selection Criteria' section with two radio buttons: 'Use Existing Rule' (selected) and 'Create New Rule'. The 'Rules' section contains a 'Rule Code' dropdown menu and a 'Rule Name' text field. At the bottom right, there are 'Save' and 'Cancel' buttons.

4. Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Scoring Rule:

Scoring Rule tab enables the user to define the rule at the application level for evaluating the application when there are multiple applicants by using the aggregation formula.

This tab will be enabled only if the **Scoring Model** is selected as **Application Scoring Model**.

Prerequisites

Create Rule Expression - Min (applicant_score)

NOTE: For now, this rule expression needs to be created through Postman.

- Click **Scoring Rule** tab in **Create Quantitative Scoring Model** screen.

→ The **Create Quantitative Scoring Model – Scoring Rule** screen is displayed.

Figure 52: Create Quantitative Scoring Model – Scoring Rule

- Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 41: Create Quantitative Scoring Model – Scoring Rule – Field Description

Field	Description
Scoring Rule	The following fields appear if Scoring Rule tab is selected.
Rule Code*	Select the rule code from the dropdown list.
	Click this icon to get the information about the rule.
Rule Name	Displays the rule name.

Feature:

Feature tab enables the user to define the link the features to the quantitative scoring model.

This tab will be enabled only if the **Scoring Model** is selected as **Applicant** or **Multi-Applicant Scoring Model**.

- Click **Feature** tab in **Create Quantitative Scoring Model** screen.

→ The **Create Quantitative Scoring Model – Feature** screen is displayed.

Figure 53: Create Quantitative Scoring Model – Feature

- Click the **Define** link under **Define Range/Value** column to define a range or absolute values for each scoring feature to be considered for scoring model and score for that range or value.
- Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 42: Create Quantitative Scoring Model – Feature – Field Description

Field	Description
Scoring Feature The following fields appear if Feature tab is selected.	
+ icon	Click this icon to add a new row.
- icon	Click this icon to delete an existing row.

Field	Description
Feature	Select the feature from the drop-down list.
Weightage (%)	Specify the weightage to be assigned to each feature code. NOTE: The sum of all the weightage percentage should be 100.
Range Type	Select the range type from the dropdown list. The options are: <ul style="list-style-type: none"> • Max Value • Param Percent% • Value For Applicant Scoring Model , this field is editable.
Define Range/Value	Specify the range to be defined for the feature.
Enable	Select the toggle if the scoring parameter is enabled. By default, this option is enabled.
Range/Value Definition	The following fields appears only if the Delink link under Define Range/Value column is selected.
+ icon	Click this icon to add a new row.
- icon	Click this icon to delete a row, which is already added.
Range From	Specify the minimum range of the scoring feature. This field appears only if the Data type is Numeric.
Range To	Specify the maximum range of the scoring feature. This field appears only if the Data type is Numeric.
Value	Specify the value of the feature. This field appears only if the Data type is Alphanumeric.

Field	Description
Score	Specify the score to be assigned for each range or value.
Category	Specify the category for each range or value from the drop-down list. The available options are: <ul style="list-style-type: none"> • Low • Medium • High
Done	To save the data and close the range panel, Click Done .

2.5.5.2 View Quantitative Scoring Model

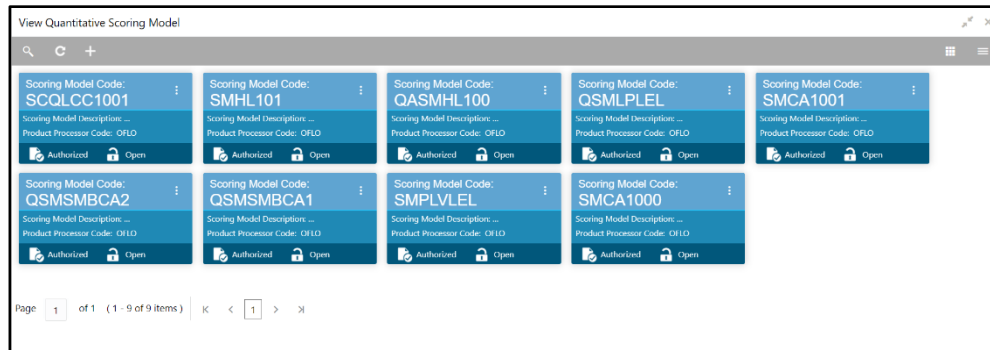

The **View Quantitative Scoring Model** screen allows the user to view the Quantitative Scoring Model created. The status of the uploaded Quantitative Scoring model is displayed as **Unauthorized** and **Open**. Once the checker authorizes the Quantitative Scoring model, the status is updated to **Authorized** and **Open**.

Prerequisite

Specify **User Id** and **Password**, and login to **Home** screen.

1. From **Home** screen, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**. Under **Credit Decision**, click **Quantitative Scoring Model**.
3. Under **Quantitative Scoring Model**, click **View Quantitative Scoring Model**.

→ The **View Quantitative Scoring Model** screen is displayed.

2.5.8 Pricing

Risk-based pricing refers to the offering of different interest rates to the different customers based on their credit worthiness.

Risk-based pricing methodologies allows lenders to use credit profile characteristics to charge borrowers interest rates that vary by credit quality. Thus, the borrowers for a single product will receive the different interest rates and credit terms. It means the higher-risk borrowers will be charged higher rate of interest while the lower risk borrowers who has greater capacity to make payments will be charged lower rate of interest.

This section includes following subsections:

- [2.5.4.1 Create Pricing Model](#)
- [2.5.4.2 View Pricing Model](#)

2.5.8.1 Create Pricing Model

The **Create Pricing Model** screen allows the user to create pricing model based on various pricing features.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**. Under **Credit Decision**, click **Pricing**.

- Under **Pricing**, click **Create Pricing Model**.

→ The **Create Pricing Model** screen is displayed.

Figure 72: Create Pricing Model

The screenshot shows the 'Create Pricing Model' interface. The 'Selection Criteria' tab is active, displaying a 'Basic Details' section with fields for 'Pricing Code *', 'Effective Date *', 'Product Processor *', 'Pricing Description *', 'Expiry Date *', and 'Priority *'. Below this is the 'Rules' section, which includes an 'Expression Builder' with a list of facts and a logical expression: 'PRODUCTCODE == "PLLOAN" AND RATE_TYPE < "FLOAT"'. The 'Output' section shows 'TEXT' and 'TRUE'. The 'Expression' section shows the logical expression: 'When ((PRODUCTCODE == "PLLOAN") && (RATE_TYPE < "FLOAT")) Output TRUE'. At the bottom right are 'Save' and 'Cancel' buttons.

- Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Expression Builder	Select the expressions to build the rule.
Add Expression	Click Add Expression to create the expression for the rule.
 icon	Click this icon to add new expression.
Fact / Rules	Select the fact or rule from the drop-down list.
Operator	Select the comparison operator from the drop-down list.

Field	Description
Data Type	<p>Select the data type for the fact or rule. Once you select the data type, the new field appears adjacent to the data type.</p> <p>Update the same based on the selected data type.</p> <p>The available options are:</p> <ul style="list-style-type: none"> • Text • Number • Boolean • Date • Fact
Output	<p>Select the output from the drop-down list. Once you select the output, the new field appears adjacent to the output.</p> <p>Update the same based on the selected output option.</p> <p>The available options are:</p> <ul style="list-style-type: none"> • Text • Number • Boolean • Date • Fact • NA
Expression	Displays the expression and output updated in the expression builder.
Save	To save the captured details, click Save .
Cancel	Click Cancel to close the Create Pricing Model window.

- Click **Price Definition** tab to define decision for the application based on the score calculated by the scoring model.

→ The **Create Pricing Model – Price Definition** screen is displayed.

Figure 73: Create Pricing Model – Price Definition

- Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 53: Create Pricing Model – Price Definition – Field Description

Field	Description
Price Definition	The following fields appear only if Price Definition tab is selected.
Minimum Rate*	Specify the minimum rate applicable for the defined pricing code.

Field	Description
Maximum Rate*	Specify the maximum rate applicable for the defined pricing code.
Rate Type*	Specify the rate type from the drop-down list. The available options are: <ul style="list-style-type: none"> • Flat • Tiered
Rate %	Specify the interest rate application for the defined pricing. This field appears only if the Rate Type is selected as Flat .
Rate	The following fields appears only if the Rate Type is selected as Tiered .
+ icon	Click this icon to add a new row.
- icon	Click this icon to delete a row, which is already added.
Loan Amount From	Specify the minimum range of loan amount to which the interest rate is applicable.
Loan Amount To	Specify the maximum range of loan amount to which the interest rate is applicable.
Term From	Specify the minimum term from which the interest rate is applicable.
Term To	Specify the maximum term from which the interest rate is applicable.
Rate %	Specify the interest rate applicable for the defined pricing.

2.5.8.2 View Pricing Model

The **View Pricing Model** screen allows the user to view the pricing model created. The status of the uploaded model is displayed as **Unauthorized** and **Open**. Once the checker authorizes the model, the status is updated to **Authorized** and **Open**.

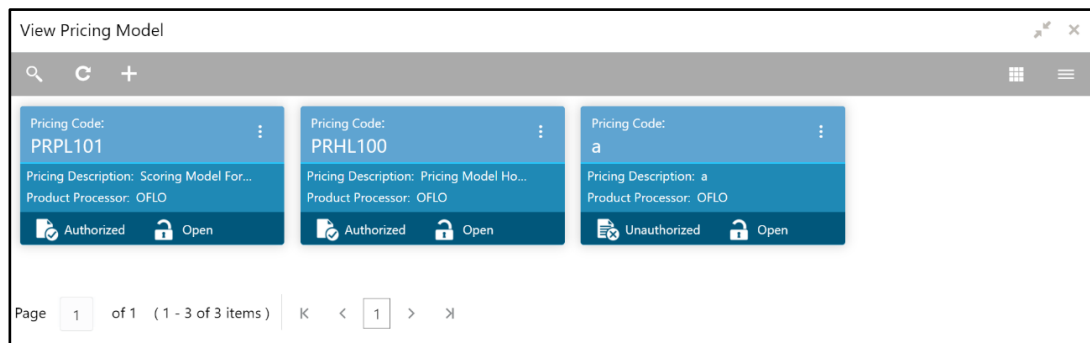

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**.
3. Under **Credit Decision**, click **Pricing**.
4. Under **Pricing**, click **View Pricing Model**.

→ The **View Pricing Model** screen is displayed.

Figure 74: View Pricing Model

5. Click  to search the scoring feature based on the following search criteria.

- Pricing Code
- Pricing Description
- Authorization Status
- Record Status

6. Click  icon on the top right of the pricing model tile and click **Unlock**.

→ The **Pricing Model Maintenance** screen is displayed.

Figure 75: Pricing Model Maintenance

7. Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 54: Pricing Model Maintenance – Field Description

Field	Description
Pricing Code*	Displays the unique pricing code.

Field	Description
Pricing Description*	Specify the description of the pricing model.
Effective Date*	Displays the effective date.
Expiry Date*	Select the expiry date.
Product Processor*	Displays the product processor for which the pricing model is being created.
Priority*	Select the priority of the pricing model.
Selection Criteria	The following fields appear if Selection Criteria tab is selected.
Rules	Modify the rule code and description.
Code*	Displays the rule code.
Description	Specify the rule description.
Expression Builder	Select the expressions to build the rule.
Add Expression	Click Add Expression to create the expression for the rule.
 icon	Click this icon to add new expression.
Fact / Rules	Select the fact or rule from the drop-down list.
Operator	Select the comparison operator from the drop-down list.

Field	Description
Data Type	<p>Select the data type for the fact or rule. Once you select the data type, the new field appears adjacent to the data type.</p> <p>Update the same based on the selected data type.</p> <p>The available options are:</p> <ul style="list-style-type: none"> • Text • Number • Boolean • Date • Fact
Output	<p>Select the output from the drop-down list. Once you select the output, the new field appears adjacent to the output.</p> <p>Update the same based on the selected output option.</p> <p>The available options are:</p> <ul style="list-style-type: none"> • Text • Number • Boolean • Date • Fact • NA
Expression	Displays the expression and output updated in the expression builder.

9. Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 55: Pricing Model Maintenance – Price Definition – Field Description

Field	Description
Price Definition	The following fields appear only if Price Definition tab is selected.
Minimum Rate*	Specify the minimum rate applicable for the defined pricing code.
Maximum Rate*	Specify the maximum rate applicable for the defined pricing code.
Rate Type*	Specify the rate type from the drop-down list. The available options are: <ul style="list-style-type: none"> Flat Tiered

Field	Description
Rate %	Specify the interest rate application for the defined pricing. This field appears only if the Rate Type is selected as Flat .
Rate	The following fields appears only if the Rate Type is selected as Tiered .
+ icon	Click this icon to add a new row.
- icon	Click this icon to delete a row, which is already added.
Loan Amount From	Specify the minimum range of loan amount to which the interest rate is applicable. This field appears only if the LOANAMOUNT is selected in column.
Loan Amount To	Specify the maximum range of loan amount to which the interest rate is applicable. This field appears only if the LOANAMOUNT is selected in column.
Term From	Specify the minimum term from which the interest rate is applicable. This field appears only if the LOANTENURE is selected in column.
Term To	Specify the maximum term from which the interest rate is applicable. This field appears only if the LOANTENURE is selected in column.
Rate %	Specify the interest rate applicable for the defined pricing. In case of the floating rate product, margin will be maintained.

NOTE: For now, the **LOANAMOUNT** and **LOANTENURE** is only supported facts for pricing model. These Fields will vary based on the numerical Fact selected.

2.5.9 Strategy Configuration

Decision Service is used for the multiple purposes such as borrowing capacity, borrowing capacity plus pricing, only pricing, only decision, logical plus decision etc. The system should have an ability to configure the strategy like when the decision service is being called for borrowing capacity, should the request pass through the logical check. In addition, the product processor can configure the different strategies for the different product types or customer types. **Strategy Configuration** allows the product processor to configure the strategy as per its requirements for all the modes in which the decision service can be called. In addition, the multiple strategy can be defined for the same module for origination.

2.5.9.1 Create Strategy Configuration

The **Create Strategy Configuration** screen allows the user to create strategy as per the requirement.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**. Under **Credit Decision**, click **Strategy Configuration**.

3. Under **Strategy Configuration**, click **Create Strategy Configuration**.
 → The **Create Strategy Configuration** screen is displayed.

Figure 77: Create Strategy Configuration

4. Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 56: Create Strategy Configuration – Field Description

2.6 Dashboard Configuration

Information from multiple sub-domain viz., Savings Account, Current Account and Loan is integrated and displayed as dashboard on the home page of the Oracle Banking Origination application.

The pre-configured dashboards available in the system are as follows:

- My Applications
- Application Search
- Conversion Analysis
- Account Opening Trends
 - New Savings Account
 - New Current Account
 - New Loan Account
 - New Term Deposits
 - New Credit Cards
- Loan Pipeline
- Loan Offer Status
- Loan Exposure to Collateral
- Product Application Near Expiry
- Loan Offers Near Expiry

The below mentioned sections will provide information on how to map dashboards to a specific 'User Role' or a 'User'.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Security Management**. Under **Security Management**, click **Role**.
2. Under **Role**, click **Create User Role**.

→ The **Create Role** screen is displayed.

Figure 80: Create Role

3. Specify the details in the relevant data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below.

Table 58: Create Role – Field Description

Field	Description
Role Code*	Specify the role code as “Relationship Manager”. You can also specify role as Loan Officer or Credit Manager.
Description*	Specify the role description.
Functional Activity Code	Displays the functional activity code.
Functional Activity Description	Displays the functional activity description.
Save	To save the captured details, click Save .
Cancel	To terminate the application, click Cancel .

4. Click  icon to add row in the Role Activity table.
5. Double click on specific functional activity code.

→ The **Functional Activity Code** screen is displayed.

Figure 81: Functional Activity Code

Functional Activity Code	Functional Activity Description
RPM_FA_PROCESS_DRIVER_Dashboard_ALL_APPLICATIONS	
RPM_FA_PROCESS_DRIVER_Dashboard_LOAN_OFFER_STATUS	
RPM_FA_PROCESS_DRIVER_Dashboard_CONVERSION_ANALYSIS	
RPM_FA_PROCESS_DRIVER_Dashboard_PARKEDLOAN	
RPM_FA_PROCESS_DRIVER_Dashboard_MY_APPLICATION	
RPM_FA_PROCESS_DRIVER_Dashboard_ACCOUNT_OPENING_TREND	
RPM_FA_PROCESS_DRIVER_Dashboard_COLLATERAL	

6. Search and select the functional activity code or alternatively you can directly enter the functional activity code, if available. (Refer to [Section 4.4 Functional Activity Codes of Dashboards](#))
7. Click **Save** to save the record once all the required functional activity codes are selected and assigned.

For more details on Create Role, View Role, Create User, View User, refer **Security Management System** User Guide.

By default, the dashboard widgets get placed based on the selection/addition of the dashboard to the User Role. System allows User to drag and drop the dashboard widgets to change its position. The changes in the order of the widgets are stored as User Preferences automatically, so that in the next User login the dashboard is loaded as per the last saved user preference. Further usage and the addition/deletion of the Dashboards are available in the Alerts and Dashboard User Guide.

2.7 Initial Funding Configuration

The different configuration scenarios for initial funding are as follows:

1. **Fund By Cash** – If **Fund By** is specified as **Cash**, user can proceed with configurations, either automatic or manually.
 - Automatic – In automatic process, during submit of the Application Entry stage of the Savings Account, Current Account and Term Deposit Account, an automatic request for Teller Transaction is triggered. The Initial Funding data segment makes a call to the external Teller Module to check the **Transaction Reference Number** and **Teller Transaction Status** auto-populates the screen. The details are not allowed to be modified. More details on the integration can be referred in the Oracle Banking Branch Integration Guide.
 - Manual – In Manual Process, it is expected that the Teller Transactions are being handled separately, and the details of the **Transaction Reference Number** and **Teller Transaction Status** are thereby manually updated in the Initial Funding data segment.
2. **Fund By Account Transfer** - If **Fund By** is specified as **Account Transfer**, user can proceed with configurations, either manually or via Host.
 - Manual - In Manual Process, it is expected that the Teller Transactions are being handled separately, and the details of the **Transaction Reference Number** and **Teller Transaction Status** are thereby manually updated in the Initial Funding data segment.
 - Host – In 'Host' configuration, it is expected that the Transaction for debit of the customer Account will be handled on the host side. Since the transaction are done as part of the Account Creation in Host, Initial Funding stage will be skipped, and required transaction details will be passed to the Host for funding.
3. **Fund by Other Bank Cheque** - If **Fund By** is specified as **Other Bank Cheque**, user can proceed with Manual configurations.
 - Manual - In Manual Process, it is expected that the Teller Transaction are being handled separately, and the details of the **Transaction Reference Number** and **Teller Transaction Status** are thereby manually updated in the Initial Funding data segment.

The list of configurations to be done in the Property Table for the three flags are as follows:

- casa.fundByCash – Specify A for Automatic and M for Manual
- casa.fundByAcc - Specify M for Manual and H for Host
- casa.fundByCheque - Specify M for Manual

2.8 Application Submission Configuration

Bank level configuration is possible to specify if Application Entry completion is allowed or not as part of the Application Initiation Stage. This configuration is to be done in the Property Table by updating the flag 'applicationEntryInitiationRequired' as **true**.

2.9 Machine Learning Configuration for Predicting Account Opening Date

Bank level configuration required to define the use case and train the Machine Learning model for predicting the account opening date for all the applications. Refer to **Machine Learning Framework** section in **Oracle Banking Common Core User Guide** for the detailed explanation.

2.9.1 Model Definition

1. From **Home** screen, click **Machine Learning**. Under **Machine Learning**, click **Model Definition**.

→ The **Model Definition Summary** screen is displayed.

2. From **Model Definition Summary** screen, click  button to create new use-case definition.

→ The **Use Case Definition** screen is displayed.

Selected Algorithm	This field should be left Blank.
Model Error Statistics	RMSE

2.9.2 Model Training and Scoring

- From **Home** screen, click **Machine Learning**. Under **Machine Learning**, click **Model Training and Scoring**.

→ The **Model Training and Scoring** screen is displayed.

- Specify the use case name as "PREDPRCTIME" and click **Train Model**.

NOTE: The user will not be able to train the model if the ML table does not meet the minimum required number of rows.

Number of rows $\geq 20 \times$ Number of columns

2.10 Batch Process Configuration

Batch Process enables to the bank user to identify and close the applications which has reached the expiry date. Currently, Oracle Banking Origination supports the following batch process.

- **Application Expiry**

Application will be automatically expired, if it is inactive for the specified period as configured in business product.

- **Loan Offer Expiry**

Loan Application will be automatically expired, if the customer has not accepted the Loan Offer for the specified period as configured in business product.

- **IPA Expiry**

IPA Application will be automatically expired, if the IPA is not converted into Loan application for the specified period as configured in business product.

2.10.1 Batch Process Configuration

The Branch code and Frequency schedule needs to be configured to enable the Batch processes.

Prerequisites

The bank user needs to create a user named **SYSTEM** to run the batch process.

Configure the Branch Code

The user needs to update the proper branch code value in the below table.

Schema – PLATO

Table – PROPERTIES

application – obremo-rpm-batch-services

key – rpmBatch.branchCode

Value – Update the proper branch code.

Configure the Frequency Schedule

The user needs to update the required frequency value in the below table.

Schema – PLATOBATCH

Table – PLATO_BATCH_TASK_TRIGGER_DEFINITIONS

Column – DEFINITION

cron Expression – Update the cron Expression to the required frequency.

2.11 FOP for Advices

Oracle Banking Origination provides a facility to download the various advices using a template created in Apache FOP.

List of Advices:

1. LoanInitiation
2. LoanApproval
3. LoanRejection
4. OfferIssue
5. OfferSchedule
6. IpaOffer
7. IpaRejection
8. CCApproval
9. CCRejection
10. TDOffer
11. SavingOffer

2.11.1 Prerequisites

1. Create a new schema for PLATO-REPORT-SERVICE in your domain.
2. Ensure that the datasource is created in weblogic server.

PLATOCMC	Jdbc/CMNCORE	Plato Common Core Server
PLATOSMS	jdbc/sms	Plato-SMS-Server
REPORTSERVICE	jdbc/REPORTSERVICE	Plato-Report-Service-Server

3. Enter the below properties in the plato-config-deploy.env file:

```
flyway.domain.placeholders.report-service.hostname=
<http://<REPORT_SERVICE_HOSTNAME>:<REPORT_SERVICE_PORT>
flyway.domain.placeholders.report-service.server.port=<REPORT_SERVICE_PORT>
flyway.domain.placeholders.report-service.domain.jndi=jdbc/REPORTSERVICE
```

```
flyway.domain.placeholders.report-service.template-metadata-
directory=/scratch/OFLO/report-service/template_metadata
flyway.domain.placeholders.report-service.output-directory=/scratch/OFLO/report-
service/output/
flyway.domain.placeholders.report-service.fop-config-file=/scratch/OFLO/report-
service/fop.xconf
```

For more details on Oracle Banking Microservices Architecture for **Step 2** and **Step 3**, refer to **Oracle Banking Microservices Platform Foundation Installation Guide**.

http://docs.oracle.com/cd/F51366_01/install.htm

4. Create the folder structure mentioned in **Step 3**. Place the “fop.xconf” file in the directory:
/scratch/OFLO/report-service

NOTE: Refer to PDF Attachment for downloading the FOP file.

5. Restart plato-config-service
6. Deploy plato-report-services

Once the plato-report-service deployed successfully, ensure that the below tables created in the PLATO-REPORT-SERVICE schema.

- ERTB_MSGS
- flyway_schema_history
- OBMA_DOCUMENT_STORE
- OBMA_EXTRACTOR_CONFIG
- OBMA_REPORT_LOG
- OBMA_TEMPLATE_IMAGE
- OBMA_TM_REPORT_METADATA
- OBMA_TM_TEMPLATE_IMAGE
- OBMA_TM_TEMPLATE_METADATA
- OBMA_TW_REPORT_METADATA
- OBMA_TW_TEMPLATE_IMAGE
- OBMA_TW_TEMPLATE_METADATA

7. Deploy the following services for the advices
 - a. obremo-rpm-lo-loanapplications
 - b. obremo-rpm-creditcardapplication-services
 - c. obremo-rpm-sav-account-service
 - d. obremo-rpm-cmn-ipaservices
 - e. obremo-rpm-term-deposit-service

2.11.2 Template Upload Process

For Template Upload process, refer to **Section 3: Report Template** in **Oracle Banking Microservices Platform Foundation User Guide**.

http://docs.oracle.com/cd/F51366_01/index.htm

Table 60: Parameters for Report Linkage

Naming Convention	XSL Files
LoanInitiation	 loan_initiation.xsl
LoanApproval	 loan_approval.xsl
LoanRejection	 loan_rejection.xsl
OfferIssue	 offer_issue.xsl
OfferSchedule	 offer_issue_repayme nt.xsl

Naming Convention	XSL Files
IpaOffer	 ipa_offer_letter.xsl
IpaRejection	 IPA_REJECTION.xsl
CCApproval	 CREDIT_CARD_APPR OVAL.xsl
CCRejection	 CREDIT_CARD_REJEC TION.xsl
TDOffer	 termdepositoffer.xsl
SavingOffer	 savingoffer.xsl

Refer to PDF Attachment for downloading the Account Statement template.

2.11.3 Generate Advices

Oracle Banking Origination generates and stores the advices based the configuration of each advices under the respective stages of the origination process.

2.12 Service Level Agreement (SLA) Maintenance

Banks requires to have a Service Level Agreement (SLA) with its customers or as an internal policy of the Bank. This User Guide lists the SLA maintenance requirements in Oracle Banking Origination and other Mid-office Applications.

SLA Maintenance is available based on the Business Process-Stage- Priority combination. It has two screens, one screen for Definition of SLA and another for Authorization/Edit/ Delete.

SLA Maintenance screens are used to calculate Service Level Agreement. The user can Create SLA, and View SLA (for Edit, Copy, Delete).

This topic contains the following subtopics:

- [2.12.1 Create SLA](#)
- [2.12.2 View SLA](#)

2.12.1 Create SLA

The **Create SLA** screen enables the bank user to create the SLA Checklist at the Process-Stage- Priority Level.

Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Core Maintenance**. Under **Core Maintenance**, click **SLA Maintenance**.
2. Under **SLA Maintenance**, Click **Create SLA**.

→ The **Create SLA** screen is displayed.

Figure 83: Create SLA

Stage Name	Stage ID	Parallel Stage	SLA Required	Time In	Breach Alert Tolerance	Low Priority (In Mins) Offline	Low Priority (In Mins) Online	Medium Priority (In Mins) Offline	Medium Priority (In Mins) Online	High Priority (In Mins) Offline	High Priority (In Mins) Online
Application Entry	RPM_FA_TDORG_APPEN		<input type="checkbox"/>	Mins							
Application Enrichment	RPM_FA_TDORG_ENRICH		<input type="checkbox"/>	Mins							
Account Funding	RPM_FA_TDORG_FUND		<input type="checkbox"/>	Mins							
Supervisor Approval	RPM_FA_TDORG_APPROV		<input type="checkbox"/>	Mins							
Handoff Retry	RPM_FA_TDORG_ACCEFT		<input type="checkbox"/>	Mins							
Total (in Mins)											
Overall SLA (in Mins)											

3. On **Create SLA** screen, specify the fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field descriptions below.

Table 61: Create SLA – Field Description

Field	Description
Product/Application Code	Click Search icon and select the Product or Application Code.
Product/Application Name	Displays the name of the Product/Application.
Business Process Code	Click Search icon and select the Business Process Code for which the SLA maintenance has to be made.
Business Process Name	Displays the Business Process name based on the Business Process code selected.
Branch	Select the branch code for which SLA maintenance has to be done.
Branch Working Hours	Click the icon to view the branch working hours.
Version Number	Displays the version number on creating/updating the screen.
Include for SLA calculation	<p>Select the checkbox to consider the below options for the SLA calculation.</p> <ul style="list-style-type: none"> • Branch Holidays • Currency Holidays • Hold Time • Customer Clarification • Off Branch Time Transactions

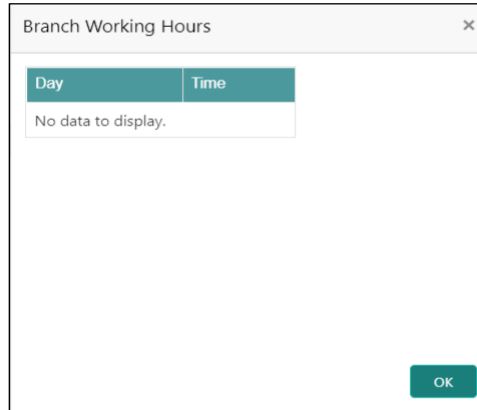

Field	Description
The below fields appear on selection of the Business Process Code.	
Stage Name	Displays the various stages for the selected business process code.
Stage ID	Displays the stage ID based on the stage name.
Parallel Stage	Displays the various stages available for the process.
SLA Required	<p>Select the toggle to indicate whether SLA calculation is required for this stage.</p> <p>By Default, the toggle should be set to ON. The user can turn OFF the toggle manually. If the toggle turned OFF, the user input should be disabled and the SLA values for the stage should be blank.</p>
Time In	<p>Select the time input for the stage.</p> <p>Available options are</p> <ul style="list-style-type: none"> • Mins • Days-Hrs-Mins <p>System converts the Days-Hrs-Mins into minutes and display in the respective fields in minutes. Alternatively, the user can directly input the SLA in Minutes.</p>
Breach Alert Time	<p>Specify the SLA Breach Alert time in minutes for the Stage.</p> <p>This will indicate the minutes before which a user needs to be alerted for likely SLA breach for the stage. This is the same for all the different priority combinations for a stage irrespective of the individual SLA times.</p>

Field	Description
Low Priority (In Mins) Offline	Specify the SLA time in minutes for low priority tasks offline.
Low Priority (In Mins) Online	Specify the SLA time in minutes for low priority tasks online.
Medium Priority (In Mins) Offline	Specify the SLA time in minutes for medium priority tasks offline.
Medium Priority (In Mins) Online	Specify the SLA time in minutes for medium priority tasks online.
High Priority (In Mins) Offline	Specify the SLA time in minutes for high priority tasks offline.
High Priority (In Mins) Online	Specify the SLA time in minutes for high priority tasks online.
Save	Click this button to save and close the task.
Cancel	Click this button to cancel the SLA Maintenance window. The data input will not be saved.

- Click **Branch Working Hours** icon to view the working hours of the selected branch.

→ The **Branch Working Hours** screen is displayed.

Figure 84: Branch Working Hours

2.12.2 View SLA

The user can view the summary of SLAs maintained in the form of tiles. The user can view the maintained SLA, if the SLA is already created in the system. The user can also create a new SLA using View SLA screen, by clicking the '+' icon.

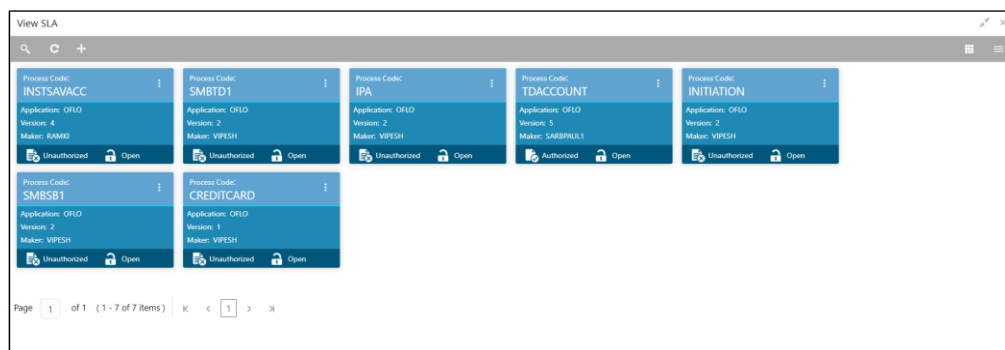

Prerequisite

Specify **User Id** and **Password**, and login to **Home** screen.

- From **Home** screen, click **Core Maintenance**. Under **Core Maintenance**, click **SLA Maintenance**.
- Under **SLA Maintenance**, Click **View SLA**.

→ The **View SLA** screen is displayed.

Figure 85: View SLA

3. For more information on fields, refer to the field descriptions below.

Table 62: View SLA – Field Description

Field	Description
Process Code	Displays the process code.
Product/Application Name	Displays the name of the Product/Application.
Version	Displays the version number on creating/updating the screen.
Maker	Displays the maker ID.
Status	<p>Displays the status of the record.</p> <p>Available options are:</p> <ul style="list-style-type: none"> • Authorized • Unauthorized

4. In the **View SLA** screen, click the search icon.

→ The **Search SLA** screen is displayed.

Figure 86: Search SLA

The screenshot shows the 'View SLA' interface. It features three input fields: 'Process Code' (a text box), 'Auth Status' (a dropdown menu), and 'Record Status' (a dropdown menu). Below these fields are two buttons: 'Search' and 'Reset'. The interface has a light gray background and standard web UI styling.

5. On **Search SLA** screen, specify the fields. For more information on fields, refer to the field descriptions below.

Table 63: Search SLA – Field Description

Field	Description
Process Code	Displays the process code.

Field	Description
Status	Displays the authorization status of the record. Available options are: <ul style="list-style-type: none"> • Authorized • Unauthorized
Record Status	Displays the status of the record. Available options are: <ul style="list-style-type: none"> • Open • Closed

6. Click  icon and
- Click **Authorize** to authorize the SLA.
 - Click **Delete** to delete the SLA.
 - Click **View** to view the SLA maintenance.
 - Click **Unlock** to edit the existing SLA maintenance.
- The **SLA Standard Maintenance** screen is displayed.

For more information on fields, refer to the field description table below.

Table 64: SLA Standard Maintenance – Field Description

Field	Description
Product/Application Code	Displays the Product or Application Code.
Product/Application Name	Displays the name of the Product/Application.
Business Process Code	Displays the Business Process Code for which the SLA maintenance has to be made.
Business Process Name	Displays the Business Process name based on the Business Process code selected.
Branch	Displays the branch code for which SLA maintenance has to be done.
Branch Working Hours	Click this icon to view the branch working hours.
Version Number	Displays the version number on creating/updating the screen.
Include for SLA calculation	<p>Displays the options selected for the SLA calculation.</p> <ul style="list-style-type: none"> • Branch Holidays • Currency Holidays • Hold Time • Customer Clarification • Off Branch Time Transactions
Stage Name	Displays the various stages for the selected business process code.
Stage ID	Displays the stage ID based on the stage name.
Parallel Stage	Displays the various stages available for the process.
SLA Required	Select the toggle to enable the SLA calculation for the stage.

Field	Description
Time In	<p>Select the time input for each stage.</p> <p>Available options are</p> <ul style="list-style-type: none"> • Mins • Days-Hrs-Mins
Breach Alert Time	Specify the SLA Breach Alert time in minutes for the Stage.
Low Priority (In Mins) Offline	Specify the SLA time in minutes for low priority tasks offline.
Low Priority (In Mins) Online	Specify the SLA time in minutes for low priority tasks online.
Medium Priority (In Mins) Offline	Specify the SLA time in minutes for medium priority tasks offline.
Medium Priority (In Mins) Online	Specify the SLA time in minutes for medium priority tasks online.
High Priority (In Mins) Offline	Specify the SLA time in minutes for high priority tasks offline.
High Priority (In Mins) Online	Specify the SLA time in minutes for high priority tasks online.
Save	Click this button to save and close the task.
Cancel	<p>Click this button to cancel the SLA Maintenance window.</p> <p>The data input will not be saved.</p>

2.13 Customer Dedupe Check

Bank level configuration is possible to specify whether the system should support Customer Dedupe check for any customers. This configuration is to be done in the Property Table by updating the flag “dedupeCheckRequired” as **true**. If the value is **true**, then the customer dedupe check will be done for all the new configurations.

2.14 Application Dedupe Check

Bank level configuration is possible to specify whether the system should support Application Dedupe check for any applications. This configuration is to be done in the Property Table by updating the flag “applicationDedupeCheckRequired” as **true**. If the value is **true**, then the application dedupe check will be done for all the new applications during each stage submit.

2.15 Document Extraction Required Check

Bank level configuration is possible to specify whether the system should support Document Extraction Required check during document uploads. This configuration is to be done in the Property Table by updating the flag “documentExtractRequired” as **true**. If the value is **true**, then during customer document uploads, the document data will be extracted automatically via image processing.

2.16 Task Allocation

The Dynamic Task Allocation intends to allocate the tasks/stages dynamically to a user based on pre-configured rule and rule groups. This feature will enable allocation of tasks to different users based on attributes like Branch, Currency, Loan Amount etc. for more details refer to [4.5 FACT list](#) for Dynamic Task Allocation.

Also, a parameter needs to be maintained in server start parameters for enabling dynamic allocation functionality: -Dplato.orchestrator.enableDynamicAllocation=true

Task Allocation will use the existing Rules and Rule Group framework. These RULES can be configured using a set of factory-shipped **FACTS**. Additional facts can also be created as required. Rules are defined first with relevant conditions.

In the Rule Group definition, rules are added with priority assigned for each rule. Rule group will be linked to a business process/stage in the backend.

Once the task is created for a business process, if there is any task allocation linked to that stage, system will run the rule and assign the task accordingly. If all the rules are run without meeting any condition, task will remain as unassigned in free task.

For more details on rule and rule group creation refer to [2.4.2 Rule](#)

3 Error Codes and Messages

This topic contains error codes and messages.

Table 65: Error Codes and Messages

Error Code	Messages
GCS-AUTH-02	Valid modifications for approval were not sent. Failed to match
GCS-AUTH-03	Maker cannot authorize
GCS-AUTH-04	No Valid unauthroized modifications found for approval.
GCS-CLOS-01	Record Already Closed
GCS-CLOS-03	Unauthorized record cannot be closed, it can be deleted before first authorization
GCS-COM-001	Record does not exist
GCS-COM-002	Invalid version sent, operation can be performed only on latest version
GCS-COM-003	Please Send Proper Modification Number
GCS-COM-004	Please send Maker Id in the request
GCS-COM-005	Request is Null. Please Resend with Proper Values
GCS-COM-006	Unable to parse JSON
GCS-COM-008	Modifications should be consecutive.
GCS-COM-009	Resource ID cannot be blank or "null".
GCS-COM-011	Argghhh, \$1 failed to update.
GCS-DEL-003	Modifications didnt match valid unauthorized modifications that can be deleted for this record

Error Code	Messages
GCS-DEL-004	Send all unauthorized modifications to be deleted for record that is not authorized even once.
GCS-DEL-005	Only Maker of first version of record can delete modifications of record that is not once authorized.
GCS-DEL-006	No valid unauthroized modifications found for deleting
GCS-DEL-007	Failed to delete. Only maker of the modification(s) can delete.
GCS-MOD-001	Closed Record cannot be modified
GCS-MOD-003	Record marked for close, cannot modify.
GCS-MOD-004	Only maker of the record can modify before once auth
GCS-MOD-005	Not amendable field, cannot modify
GCS-MOD-006	Scorecard Id cannot be modified (Natural Key)
GCS-MOD-007	Psssttt, only the maker can modify the pending records.
GCS-REOP-01	Unauthorized Record cannot be Reopened
GCS-REOP-02	Failed to Reopen the Record, cannot reopen Open records
GCS-REOP-04	Unauthorized record cannot be reopened, record should be closed and authorized
GCS-SAV-001	Record already exists
RPM_BP_001	Source stage value should be either Y/N not valid
RPM-ATR-001	Invalid Date Format. Expected yyyy-MM-dd.
RPM-BP-002	Cannot have more than one source stage
RPM-BP-003	DatasegmentCode not valid

Error Code	Messages
RPM-BP-004	DocumentType Code not valid
RPM-BP-005	Life cycle not valid
RPM-BP-006	Unable to \$1 Business Process as \$2 datasegment has the following dependencies \$3 in lifecycle \$4 ,which have not been mapped prior to it!
RPM-BP-007	Unable to \$1 Business Process as the mandatory data segments \$2 for the \$3 lifecycle have not been mapped!
RPM-BP-008	In \$1 stage of \$2 Business Process,duplicate datasegements - \$3 are not allowed
RPM-BP-009	Record already exist with same Lifecycle and Business Product
RPM-BP-010	At \$1 in \$2 stage of \$3 Business Process,duplicate record for - \$4 exist
RPM-BP-011	At \$1 in \$2 stage of \$3 Business Process,Business Product List is invalid.
RPM-BP-012	Business Product Code is Invalid
RPM-BP-013	Stage \$1 should have atleast one datasegment attached
RPM-BPA-001	Business Product Image Cannot be Null
RPM-BP-CMN-001	Exception Occurred while Parsing Date
RPM-BPD-001	Expiry date should be greater than Start date
RPM-CMN-000	Illegal State Exception
RPM-CMN-001	Exception Occurred while Executing Query
RPM-CMN-002	Number format exception

Error Code	Messages
RPM-CMN-003	Server Error Occurred during API call
RPM-CMN-004	Illegal State Exception

4.4 Functional Activity Codes of Dashboards

Table 69: Functional Activity Codes

Dashboard Name	Functional Activity Code
My Applications	RPM_FA_DASHBOARD_MY_APPLICATIONS / RPM_FA_PROCESS_DRIVER_Dashboard_MY_APPLICATION
Application Search	RPM_FA_WD_MY_SEARCH
Conversion Analysis	RPM_FA_PROCESS_DRIVER_Dashboard_CONVERSION_ANALYSIS
Account Opening Trends	RPM_FA_PROCESS_DRIVER_Dashboard_ACCOUNT_OPENING_TREND
Loan Pipeline	RPM_FA_PROCESS_DRIVER_Dashboard_PARKEDLOAN
Loan Offer Status	RPM_FA_PROCESS_DRIVER_Dashboard_LOAN_OFFER_STATUS
Loan Exposure to Collateral	RPM_FA_PROCESS_DRIVER_Dashboard_COLLATERAL

4.5 FACT list for Dynamic Task Allocation

The facts required to configure the dynamic task allocation are listed below:

- oDLimitAmount
- currencyCode
- branchCode
- businessProductCode
- priority
- applicationDate
- applicationNumber
- processRefNumber
- amount
- branch
- currentBranch
- user
- customerNumber
- processName
- processCode
- stage
- lifecycleCode
