# 1 Preface

## 1.1 Purpose

This User Guide helps you to familiarize you with the Oracle Banking Branch application. It gives an overview of the module and explains all the maintenances required for its smooth functioning. It also takes you through the different types of transactions that can be handled through this module

## 1.2 Audience

This guide is intended for the Branch Tellers, Vault Operators, and Branch Supervisors to provide quick and efficient service to customers and prospects of your bank.

## 1.3 Document Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

## 1.4 Conventions

The following text conventions are used in this document:

Convention	Meaning
<b>Boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

## 1.5 Screenshot Disclaimer

Personal information used in the interface or documents are dummy and does not exist in the real world. It is only for reference purposes.

## 1.6 Acronyms and Abbreviations

The following acronyms and abbreviations are used in this guide:

<b>Acronym/ Abbreviation</b>	<b>Description</b>
<b>ARC</b>	Account, Rate, and Charge
<b>BC</b>	Bankers Cheque
<b>CASA</b>	Current Account and Saving Account
<b>CCY</b>	Currency
<b>CIF</b>	Customer Information File
<b>DD</b>	Demand Draft
<b>EJ</b>	Electronic Journal
<b>FCY</b>	Foreign Currency
<b>FX</b>	Foreign Exchange
<b>GL</b>	General Ledger
<b>HO</b>	Head Office
<b>LCY</b>	Local Currency
<b>LOV</b>	List of Values
<b>MIS</b>	Management Information System

<b>Acronym/ Abbreviation</b>	<b>Description</b>
<b>ML</b>	Machine Learning
<b>RD</b>	Recurring Deposit
<b>SD</b>	Safe Deposits
<b>System</b>	Unless specified, it shall always refer to Oracle BankingBranch.
<b>TC</b>	Travellers Cheque
<b>TD</b>	Term Deposit
<b>UDF</b>	User Defined Fields
<b>VAT</b>	Value Added Tax

## 1.7 List of Topics

This manual is organized into the following chapters:

<b>Topic</b>	<b>Description</b>
Overview of Oracle Banking Branch	Provides a snapshot of the features of the application.
Annexure 1	Provides a list of functional activity codes and descriptions.
Annexure 2	Provides a list of error codes and respective error messages.
Annexure 3	Provides a list of function codes and their descriptions arranged in numerical order.

Topic	Description
Annexure 4	Provides the format of available transaction advices.
Annexure 5	Provides order of replacement of parameters with wild card entries.
Annexure 6	Provides the column names and descriptions of the significant parameters in the static maintenance tables.
List Of Menus	Provides a list of menus arranged in alphabetical order.

## 1.8 Basic Actions

Most of the screens contain buttons to perform all or few of the basic actions. The actions which are called here are generic, it varies based on the usage and the applicability. The table below gives a snapshot of them:

Action	Description
<b>Submit</b>	Click to complete the transaction after you specify all the input parameters for a particular transaction.
<b>Cancel</b>	Click to cancel the transaction input midway without saving any data.
<b>Clear</b>	Click to clear the transaction input data. The system displays a pop-up screen with confirmation to clear data. You can click <b>OK</b> to confirm or click <b>x</b> icon to retain the data.
<b>Query</b>	On completion of input of necessary parameters, click this button to fetch and display the details.
<b>Save</b>	Click to save the details specified in the screen.
<b>Exit</b>	Click to close the screen and go to Home screen.

Action	Description
OK	Click to confirm the details in the pop-up screen.

## 1.9 Symbols and Icons and Shortcut Keys

The following are the symbols/icons you are likely to find in this guide:

Symbol/Icon	Function
→	Represents Results
	Minimize
	Maximize
	Close
	Perform search
	Open a list
	Increase/decrease value
	Edit a row
	Delete a row
	Open calendar
	Add a new record

Symbol/Icon	Function
	Navigate to the first page
	Navigate to the last page
	Navigate to the previous page
	Navigate to the next page
	Grid view
	List view
	Refresh
+ icon	Add a row
– icon	Delete a row

**Shortcut Keys:**

The following shortcut keys can be used only for the screens which has the icons specified in the Function:

Shortcut Key	Function
<b>Tab</b>	Used to shift focus from one input field to other.  <b>NOTE:</b> The last field of the last accordion will shift focus to <b>Submit/Cancel</b> button.
<b>Alt + S</b>	Used to select <b>Submit</b> button.
<b>Alt + C</b>	Used to select <b>Cancel</b> button.
<b>Alt + A</b>	Used to select <b>Charge Details</b> data segment.
<b>Alt + Y</b>	Used to select <b>Denominations</b> data segment.

## 2 Overview of Oracle Banking Branch

### 2.1 Introduction

Oracle Banking Branch is a retail banking application that gives a 360-degree view of the customer and financial transactions to the Teller of the bank. This enables you as the Teller, to provide better customer-focused services as well as cross-sell and up-sell the other products and services of the bank.

A typical transaction under branch is classified into the following stages:

1. Teller capturing the transaction request and transaction enrichment
2. Authorization by the Supervisor
3. Teller Resubmission – applicable for certain transactions

### 2.2 Pre-Requisites

To launch Oracle Banking Branch through FLEXCUBE Universal Banking, perform the following steps:

1. Specify **User Id** and **Password**, and login to FLEXCUBE Universal Banking **Home screen**.

→ The FLEXCUBE Universal Banking **Home screen** is displayed.

**Figure 1: FLEXCUBE Universal Banking Home screen**

2. Specify **CSDNGUIM** in the top right corner text box, and click **Next**.

→ The **Next Gen UI Products Maintenance** screen is displayed.

**NOTE:** Make sure that user has roles for the screen.

**Figure 2: Next Gen UI Products Maintenance**

Next Gen UI Products Maintenance

New Enter Query

**Product Details**

Function Id \*

Product Name \*

Product URL \*

Product Description

Maker Date Time: Mod No Record Status

Checker Date Time: Authorization Status

Exit

3. Update the **Next Generation UI** Product URL in the maintenance screen **CSDNGUIM**.

**NOTE:** For example, **NEW TELLER** can be used as the Function id, with the description as **Teller Next Generation Product**. It is released as Static Data and ensure the user roles has been maintained for the same in FLEXCUBE Universal Banking.

4. Once the roles are maintained in FLEXCUBE Universal Banking, click **Next Generation UI** on the tool bar.

→ **Next Gen UI Dashboard** displays with the list of products.

**Figure 3: Next Gen UI Dashboard**

Next Gen UI Dashboard

Product Name	Product Description
NEW TELLER	Teller Next Generation Product

- Click **NEW TELLER**.

→ The **Next Generation – Home screen** is displayed.

**NOTE:** Make sure that the same user id is maintained in FLEXCUBE Universal Banking. In addition, make sure that the **Next Generation UI** is maintained and it has necessary roles. For example, if the user id is JOHN, the same needs to be present in FLEXCUBE Universal Banking SMS system and **Next Generation UI** SMS system.

- Do the following **Next Generation UI** changes:

SECURITY\_CONFIG table in PLATO\_SECURITY schema must have the following entries:

INTEGRATION\_ENABLED {id} true

INTEGRATION\_CALLBACK\_URL {id}

<https://10.00.00.00:1010/FCJNeoWeb/ValidationService/FCNonceValidation/validate>

**NOTE:** Update the IP and port number of the FLEXCUBE Universal Banking server.

→ The **Home screen** (Branch Dashboard) is displayed.

**Figure 4: Next Gen UI Dashboard**

## 2.3 Oracle Banking Branch Application

This section describes the overview, general layout, and features of the Oracle Banking Branch. It contains the following sub-sections:

- [2.3.1 Branch Teller Application](#)
- [2.3.2 Application Layout](#)
- [2.3.3 Salient Features of Servicing](#)

### 2.3.1 Branch Teller Application

The Branch Teller Application is grouped into the several menus. For more information on menus, refer to [Figure 5: Mega Menu - Teller](#) and [Menu Item – Field Description](#) table.

**Menu Item – Field Description table**

Field	Description
<b>Branch Operations</b>	Branch Manager, Vault Teller, or Teller can use to cover the internal activities done at the branch where the Customer is not involved. This facilitates branch, vault, Till opening, or closing for the day and monitoring the transactions done during the day and Cash Balancing.
<b>Till-Vault Operations</b>	Vault Teller or Teller can use to monitor the cash and currency boxes for the day and to perform cash transfers from or to the Vault or Till as and when required.
<b>Customer Transactions</b>	Teller can use to perform financial transactions for Customer accounts, which includes, Cash Deposits, Cash Withdrawals, Cheque Withdrawal, Forex Transactions, and Account Closure.
<b>Miscellaneous Transactions</b>	Teller can use to perform General Ledger transactions such as miscellaneous debit and credit transactions against a Customer's CASA account and GL account.

<b>Field</b>	<b>Description</b>
<b>Transfers</b>	Teller can use to perform inter-bank transfer, intra-bank transfer, and cross border transactions.
<b>Clearing</b>	Teller can use to capture the Inward Clearing Data Entry, Outward Clearing Data Entry, Cheque Return, and Cheque Deposit transactions.
<b>Remittances</b>	Teller can use to issue remittances such as demand drafts and bankers cheques, perform payment or cancellation of the issued remittances, and perform further operations on the issued remittances.
<b>Term Deposits</b>	Teller can use to initiate Term Deposit account opening and perform redemption, top up on the existing term deposit accounts.
<b>Credit Card Transactions</b>	Teller can use to perform credit card advance and payment transactions.
<b>Loan Transactions</b>	Teller can use to perform loan disbursement and loan repayment transactions.
<b>Islamic Transactions</b>	Teller can use to perform various Islamic transactions.
<b>Bill Payments</b>	Teller can use to perform various bill payment transactions.
<b>Session Teller Transactions</b>	Teller can use to perform financial transactions for Customer accounts in the Teller Session.
<b>Journal Log</b>	Teller or Supervisor can use to view the status of transactions performed by them. Also, it allows to resubmit or reject an incomplete transaction, or to reverse a completed transaction.

Field	Description
<b>Prediction</b>	Supervisor can use to predict the number of service counters required for a specific period.
<b>Customer Service</b>	Teller or Operations Executive can use to maintain customer accounts and ancillary services, and to enquire about customer account balance.
<b>Branch Dashboard</b>	Teller can use the Branch Dashboard to view the cash position, transaction status, alerts, to access the frequently used transaction screens, and to view the alerts and notifications.
<b>Branch Maintenance</b>	Covers a set of definitions maintained to perform the branch based operations, transactions, and services.
<b>Customer/Account Search</b>	Used to query for a specific Customer ID or Customer Account Number.

You can select an operation using any of the following methods:

- From **Home screen** navigate to left menu and then click the necessary operation.
- Click **Frequent Operations** widget placed at the right side of the transaction area.

### 2.3.2 Application Layout

The general layout of Oracle Banking Branch application consists of Main Menu, Customer Search, Transaction Area including Customer Summary and additional widgets available to display the Current Till Position and frequently used transaction icons.

### 2.3.2.1 Main Menu

The Teller Main Menu is a Mega Menu that makes all the menu items visible at once. It is a large panel divided into groups of menu items, which simplifies the navigation. The menu items are grouped based on the type of operation performed. In addition, the **Menu Item Search** can be used to search and select a specific screen from any of the main menu items. The main menus are listed below:

- Branch Operations
- Till-Vault Operations
- Customer Transactions
- Miscellaneous Transactions
- Transfers
- Clearing
- Remittances
- Term Deposit Transactions
- Credit Card Transactions
- Loan Transactions
- Islamic Transactions
- Bill Payments
- Session Teller Transactions
- Journal Log
- Customer Services
- Branch Dashboard
- Branch Maintenance

The main menus are further categorized into specific functions that are represented by menu items in the Mega Menu.

### 2.3.2.2 Customer Search

The **Customer Search** is located in the Branch Dashboard and **Teller Transaction** screens. It is used to query and find a specific customer account with any of the following information:

- Customer ID
- Customer Name
- Account Number

**Figure 6: Customer Search Widget**

1. To process the **Customer Search** screen, click LOV.

→ The **Customer Search** screen is displayed.

**Figure 7: Customer Search Screen**

A screenshot of the Customer Search screen. At the top, there are three input fields labeled "Customer ID", "Customer Name", and "Account Number". To the right of these fields are two buttons: "Search" and "Reset". Below the input fields is a section titled "Customer Results". Inside this section, there is a table with two columns: "Customer ID" and "Customer Name". The table is empty, and the text "No data to display." is shown. Below the table, there is a pagination bar showing "Page 1 (0 of 0 items)" and navigation arrows. Below the "Customer Results" section is another section titled "Account Details". Inside this section, there is a table with three columns: "Account Number", "Account Name", and "Account Currency". The table is empty, and the text "No data to display." is shown. Below the table, there is a pagination bar showing "Page 1 (0 of 0 items)" and navigation arrows.

The Teller can query the details using **Customer ID** or **Customer Name** or **Account Number**.

For more information on fields, refer to table [Field Description: Customer Search Screen](#).

**Field Description: Customer Search Screen**

<b>Field</b>	<b>Description</b>
<b>Customer ID</b>	Specify the customer ID which the details needs to be queried.
<b>Customer Name</b>	Specify the name of the customer for which the details needs to be queried.
<b>Account Number</b>	Specify the account number for which the details needs to be queried.
<b>Search</b>	Click <b>Search</b> to get the results for the specified <b>Customer ID, Customer Name, or Account Number</b> .
<b>Reset</b>	Click <b>Reset</b> to clear the search results.
<b>Customer Results</b>	Displays the customer search results.
<b>Customer ID</b>	Displays the customer ID.
<b>Customer Name</b>	Displays the customer name.
<b>Account Details</b>	Displays the account search results.
<b>Account Number</b>	Display the account number.
<b>Account Name</b>	Display the description of the account.
<b>Account Currency</b>	Display the currency of the account.

### 2.3.2.3 Transaction Area

The Transaction Area consists of Transaction Panel, Customer Information widget, and additional widgets within the **Teller Transaction** screens. The Transaction Panel is specific to each transaction screen, and the current branch date is displayed in the transaction header. The Customer Information widget consist of the following details that are validated during transaction submission. For information on the amount-based signature verification, refer to topic [2.3.3.12 Amount-Based Signature Verification](#) in this guide.

- Option to display the widget
- Customer image with customer name and KYC status
- Signature with option to verify
- Account details (CASA/Loan/Credit Card)
- Address and contact details

**Figure 8: Transaction Area**

### 2.3.2.4 Additional Widgets

The additional widgets are located at the right side of the Transaction Area in the **Teller Transaction** screens. The additional widgets include the following:

- **Current Till Position** – displays the cash position of the logged in Teller Id in branch currency.
- **Memo Alerts** – displays the instructions maintained in FLEXCUBE Universal Banking for the specified account number.

**NOTE:** To enable memo alerts, in transaction schema the memo\_enabled flag should be set to 'Y' in SRV\_TM\_BC\_PARAM\_DTLS and UBS Entries should be maintained.

- **Alerts** – contains notifications specific to the Customer.
- **Frequent Customer Operations** – includes some frequently used transaction icons placed to the right side of the Transaction area.

**Figure 9: Additional Widgets**

## 2.3.3 Salient Features of Servicing

### 2.3.3.1 Generating Teller Sequence Number

The system generates a unique Teller Sequence Number and displays an information message **Teller Sequence Number nnn** indicating the generated number after submission of each teller transaction. The generated sequence number is also displayed at the following levels:

- Completion
- Authorization Submission
- Re-submission
- Reversal
- Rejection

### 2.3.3.2 Generation of Advices for Teller Transactions

The system generates the transaction advice if it is enabled in the definition of function code. The advice includes the currency and amount values involved in the transaction.

### 2.3.3.3 Transaction Approval

When you perform a transaction for an amount greater than the allowed limit, it needs approval from the Supervisor. Based on the **Assignment Mode** in **Function Code Preferences** screen, the following conditions apply:

- **Manual** – The system will show a list of approval if the request status is **Approval**.
- **Auto** – The transaction is automatically assigned to the default authorizer if the request status is **Approval**.

The transaction approval flow consists of the following steps:

- Initiation
- Pending Approval
- Pending
- Completed

#### 2.3.3.3.1 Initiation to Pending Approval

If the transaction amount exceeds the limit defined in Branch User Limits and on click of **Submit**, the system shows a popup message **Amount exceeds limit for this transaction** and request status is shown as **Approval**.

If assignment mode is manual and on click of **Confirm**, the system shows a list of approval based on branch code, transaction amount, currency, and function code. The user can give a narrative and click **Submit for Approval** button.

#### 2.3.3.3.2 Pending Approval to Pending

The Approver/Supervisor needs to log in and fetch the transaction from **Journal Log** with transaction status as **Pending Approval**. The Supervisor can approve the pending transaction by clicking **Approve/Reject** with the supervisor comment.

#### 2.3.3.3.3 Pending to Completed

The user needs to fetch the transaction from **Journal Log** with transaction status as **Sent Back** and click **Submit**.

#### 2.3.3.3.4 Override Flow (Initiation to Completed)

Based on the branch maintenance setup at certain levels like Function Code, Function Code Preferences, Branch User Limits, and Branch role limits, if the transaction is validated with any warning override, the system shows a popup message with request status as **Warning**. Once the user confirms, the transaction status will be shown as **Completed**.

#### 2.3.3.4 Transaction Reversal with Approval

A transaction can be reversed with the auto approval or approval from the Supervisor. Based on the **Assignment Mode** in **Function Code Preferences** screen, the following conditions apply:

- **Manual** – The system will show a list of approval if the request status is **Approval**.
- **Auto** – The transaction is automatically assigned to the default authorizer if the request status is **Approval**.

The transaction approval flow consists of the following steps:

- Completed
- Pending Approval
- Pending
- Reversed

#### 2.3.3.4.1 Completed to Pending Approval

The completed transaction can be selected from the **Electronic Journal** screen. Once you click **Reverse**, the system shows a popup message **Amount required for Reversal** and request changes to **Approval**.

If assignment mode is manual and on click of **Confirm**, the system shows a list of approval based on branch code, transaction amount, currency, and function code. The user can give a narrative and click **Submit for Approval** button.

#### 2.3.3.4.2 Pending Approval to Pending

The Approver/Supervisor needs to log in and fetch the transaction from **Journal Log** with transaction status as **Pending Approval**. The Supervisor can approve the pending transaction by clicking **Approve/Reject** with the supervisor comment.

#### 2.3.3.4.3 Pending to Reversed

The user needs to fetch the transaction from **Journal Log** with transaction status as **Sent Back** and click **Submit**.

#### 2.3.3.4.4 Override Flow (Completed to Approval)

The user needs to select the completed transaction in the **Electronic Journal** screen and click **Reverse**. If the **Reversal Requires Authorization** is enabled in **Function Code Definition** screen, the system displays an information message to select the Approver based on Manual or Auto assignment mode. After selecting the approver internally, reversal override will be called and request status will be updated as **Approval**.

### 2.3.3.5 Transaction Reversal

A transaction can be manually reversed only when it is authorized and completed from the **Journal Log**.

When you reverse a transaction, the data remains in the system with the status **Reversed** and the accounting entries are reversed (negative amounts are posted into the accounts). Also, this will update the Till Balance for the currencies (for cash transactions), wherever applicable.

You can select the transaction to be reversed from the transaction screen. If the reversal is applicable for the function code, **Reversal** icon will be enabled. When you click this icon, the reversal request will be initiated.

If cash transactions are reversed, the system validates the following:

- the Till used for the reversal is the same as that used in the original transaction

- the denominations are input (If the transaction is reversed the same day of its input, the denominations of the transaction is altered.)
- a batch is open

### 2.3.3.6 Transaction Rejection

You can manually reject the authorized customer transactions from the Teller **Journal Log**.

**NOTE:** When you reject a transaction, the data remains in the system with the contract status **Discarded** and no further action is allowed on the transaction.

### 2.3.3.7 UDF and MIS

UDF and MIS are supported during accounting via common core Additional Fields. MIS Codes can be sent from Oracle Banking Branch, which will be validated and processed as part of accounting.

### 2.3.3.8 External API

External APIs will be processed only if called by an external system, which is maintained in Oracle Banking Branch. External system can be maintained using External System Maintenance screen. For more information on External System Maintenance screen, refer to the topic [External System Maintenance](#) in this guide. External APIs are supported for the following transactions:

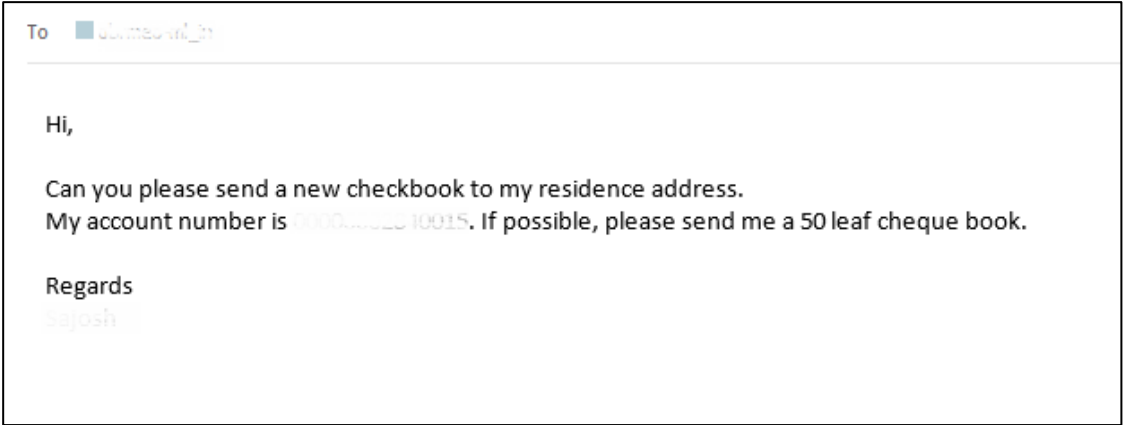

- Cash Deposit
- Cash Withdrawal
- Account Balance Inquiry
- Account Transfer

**NOTE:** These transactions will work only if OAuth is enabled.

2.3.3.9 Machine Learning

Oracle Banking Branch uses machine learning to process an email request from a customer automatically. When a customer sends an email request, the requirement is understood using machine learning, and the transaction is processed. A sample email request is shown in [Figure 10](#). Based on pre-defined machine learning in External System Maintenance, the transaction is processed automatically.

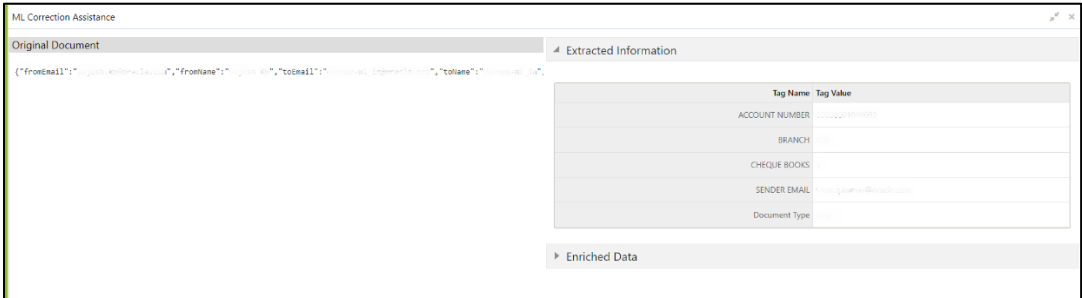

Figure 10: Sample Email Request

The following conditions apply to the machine learning use case for cheque book request:

- If sufficient details are provided in the email request, the transaction will be processed until completion.
- If details are insufficient in the email request to process a transaction, it will be assigned in the Servicing Journal for user correction. After the assigned user does the correction, the transaction will be processed.

Figure 11: ML Correction Assistance – Extracted Information

### Figure 12: ML Correction Assistance – Enriched Data

In the **Electronic Journal**, you can view the details of the Cheque Book Request initiated through the email request. The **View Request** button will be enabled for the transactions that is submitted or completed. You can view the details of the email request by clicking the **View Request**.

The following conditions apply to the machine learning use case for card block request:

- If sufficient details are provided in the email request, the transaction will be processed until completion.

### 2.3.3.10 Oracle Digital Assistant

The Oracle Digital Assistant (ODA) helps the Teller to reduce the time taken to access the transaction screens through automatic text/voice processing. To enable this feature, navigate to user menu, and select **Virtual Assistant**.

**Figure 15: Virtual Assistant**

The Virtual Assistant supports the following use cases:

- Teller can either type/say, **Cash Withdrawal Account Number, Do Cash Withdrawal Account Number** in ODA Chat bot. Based on the input provided, the **Cash Withdrawal** screen will be opened automatically with the specified account number.  
**NOTE:** Teller need to type/say the specific account number while giving the input text/voice.
- Teller can either type/say, **Cash Deposit Account Number, Do Cash Deposit Account Number** in ODA Chat bot. Based on the input provided, the **Cash Deposit** screen will be opened with the specified account number.
- Teller can type/say the name of the operation like **Open Teller Batch** or **Open My Batch**. If the Teller batch is closed, the ODA will check the current Till balance and prompt for confirmation from Teller. Once the Teller confirms, then it will open the teller batch. In case the Teller batch is already open, a response message (**Teller batch already open**) will be displayed.

- Teller can type/say the name of the operation like **Check Batch Status**, **What is my Batch Status**, or **Check Batch**. Based on the input, the following conditions apply:
  - If the Teller batch is open, the ODA will show the message **Your Teller Batch is Open**.
  - If the Teller batch is closed, the ODA will show the message **Your Teller Batch is Closed** and prompts **Do you want to open your Batch** with following options:
    - Yes** – Select to open the Teller batch
    - No** – Select if it is not required to open Teller batch.

Figure 16: Use Case with Account Number

The screenshot shows the 'Teller Transaction' interface. On the left, there's a 'Cash Deposit' form with fields for 'Account Number', 'Transaction Amount' (set to GBP), 'Exchange Rate', 'Total Charge Amount' (GBP0.00), and 'Narrative' (set to 'Cash Deposit'). Below the form are sections for 'Charge Details' and 'Denomination'. On the right, the 'Customer Informatic' panel shows a customer profile for 'John Smith' with 'KYC Status' as 'Not Verified'. A chat window on the far right shows a conversation about a 'Cash deposit'.

Figure 17: Use Case without Account Number

The screenshot shows the 'Customer Service Request' interface. It features a grid of icons for various services like 'Cheque Book Request', 'Stop Cheque Request', 'Customer Address Update', 'Customer Contact Update', 'Passbook Update', 'Account Balance Inquiry', 'Account Statement Inquiry', and 'Account Address Update'. A 'My Transaction Status' section displays a donut chart showing 'Total 86' transactions, with '5 PENDING' and '81 COMPLETED'. Below this is an 'Inventory In Hand' section with 'Bankers Cheque' (2) and 'Demand Draft' (1). A 'Frequent Links' section lists 'Reference Rates', 'FRB Portal', and 'NIMC Verification'. A 'Frequent Branch Operations' section shows icons for different branches. An 'Alerts' section at the bottom displays messages like 'Your till is reached to minimum limits, please' and 'ECB removes NEFT/RTGS payment charges'. A chat window on the right shows a conversation about 'Open my batch' and 'Teller batch already open'.

### 2.3.3.11 Virtual Identifier

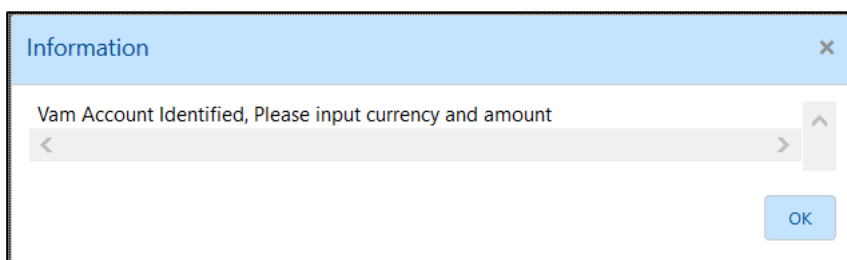

The Virtual Identifier is used to validate the specified account number of the customer. It is supported for the following screens:

- Cash Deposit
- Miscellaneous Customer Credit
- Account Transfer
- In-House Cheque Deposit

If Virtual Identifier is enabled, the validation is performed as follows:

- After you specify the account number, and on tab out, the system will validate the specified account number.
- If the account number is invalid, the system prompts information message to input the currency and amount.
- Once the currency and amount is entered, the Virtual Identifier service will be invoked to validate if it is a valid Virtual Account or not.

**Figure 18: Virtual Identifier – Information Message**

### 2.3.3.12 Amount-Based Signature Verification

The Teller can use this feature is used to verify the signature displayed in the Customer Information widget while performing the transactions. To enable/disable this feature, configure the value as Y/N in the *AMOUNT\_BASED\_SV* flag. This flag is present in *srv\_tm\_bc\_param\_dtls* table in the transaction domain.

If the amount-based signature verification is disabled, and the user specifies the Account Number in a transaction screen and presses the Tab key, the system displays the signature in the Customer Information widget.

**Figure 19: Amount-based Signature Verification Disabled**

The screenshot displays a 'Customer Information' widget. At the top, there is a placeholder for a customer image with the text 'No Customer image to display'. Below this, the 'Customer Id, Name' is shown as 'John Smith' with a yellow 'NA' tag. The 'KYC Status' is 'Verified'. A 'Signature' section shows a handwritten signature. Below the signature, account details are listed: 'Account Name' (John Smith), 'Account Branch' (000), 'Account Status' (Active), and 'Account Balance' (£477,837.00). At the bottom, contact information is provided: 'Phone' (01234 567890), 'Email' (john.smith@abc.com), and 'Address Of Communication' (1234 Tower St, 10th Fl, 10000, New York, NY).

If the amount-based signature verification is disabled, and the user specifies the Account Number and Amount in a transaction screen and presses the Tab key, the system displays the following details of signature in the Customer Information widget:

- Signature
- Signature Type
- Group ID
- Number of Signatories

2.3.4 Keyboard Navigation for Transaction Screens

This topic describes Navigation of various interactive elements using shortcut keys. The keyboard navigation can be used as an alternative method to navigate through interactive elements on a screen – fields, buttons, data segments, tables, etc. It can be used to navigate through the application, input the necessary values, and perform the transactions.

2.3.4.1 Input Values in Fields

After you launch the transaction screen, press Tab key to navigate to the desired field, and specify the value.

### 2.3.4.2 Select Date

To select the appropriate date, perform the following steps:

1. Press Tab/Shift + Tab keys to navigate to the desired calendar icon.
2. Use Arrow keys to navigate to the desired date.
3. Press Enter key or Spacebar to select the date.

### 2.3.4.3 Select from Drop-down Lists

To select value from the drop-down list, perform the following steps:

1. Press Tab/Shift + Tab keys to navigate to the desired drop-down list.
2. Use Arrow keys to navigate to the desired value.
3. Press Enter key to select the value.

### 2.3.4.4 Select from List of Values

To select value from the list of values, perform the following steps:

1. Press Tab/Shift + Tab keys to navigate to the desired list of values.
2. Press Enter key or Spacebar to enter into list of values.
3. If the exact value is known, specify the value in search field, and press Tab key to navigate to **Fetch** button. Press Enter key to select **Fetch** button.  
  
→ The results will be fetched based on the input value.
4. Press Tab key to navigate to the results.
5. Use Arrow keys to navigate to the desired value.
6. Press Spacebar to select the value.

### 2.3.4.5 Navigating through Tables

To specify/select value in the fields/cells of a table, perform the following steps:

1. Press Tab/Shift + Tab keys to navigate to the desired data segment, and navigate to the desired table row.
2. Press Enter key to enter into the data fields/cells.
3. Specify the necessary value in the fields.
4. If there are more cells in the row, use Tab key to navigate to the other cells and specify the values.
5. After you specify the values in the cells, press Esc key to change the selection from cell to the row.
6. Press Tab key to navigate to the other tables/data segments/fields/buttons.

### 2.3.4.6 Select Option Buttons/Icons

To select option buttons, perform the following steps:

1. Press Tab/Shift + Tab keys to navigate to the desired option button.
2. Press Enter key or Spacebar to select the option button.

### 2.3.4.7 Perform Transaction

To specify/select the necessary values and submit a transaction using keyboard navigation, perform the following steps:

1. Use the appropriate shortcut keys to navigate to the fields, buttons, data segments, tables, etc., and specify/select the necessary values.
2. After you specify the necessary values, use appropriate shortcut keys to select **Submit** button to complete a transaction.

### 2.3.5 Business Process Codes

Business Process Code defines the various stages for the servicing transactions. The screens available in the Oracle Banking Branch application are using the conductor flow. As a part of Oracle Banking Branch releases, a set of default process codes are factory-shipped for the following Customer Servicing transactions:

- Customer Address Update
- Account Address Update
- Customer Contact Details Update

For more information on business process, refer to section 2.3 in Servicing Configurations User Guide.

## 2.4 Branch Operations

This section describes the various screens used to perform the branch operations. The screens are described in the following sub-sections:

- [2.4.1 TC Denomination Enquiry](#)
- [2.4.2 Open Branch Batch](#)
- [2.4.3 Open Vault Batch](#)
- [2.4.4 Open Teller Batch](#)
- [2.4.5 Current Open Tills](#)
- [2.4.6 Branch Breaching Limits](#)
- [2.4.7 Till Vault Position](#)
- [2.4.8 Branch Total Position](#)
- [2.4.9 Close Teller Batch](#)
- [2.4.10 Close Vault Batch](#)
- [2.4.11 Close Branch Batch](#)
- [2.4.12 Book Shortage](#)
- [2.4.13 Book Overage](#)
- [2.4.14 Teller Session](#)

### 2.4.1 TC Denomination Enquiry

This screen is used to enquire the TC denomination position of the branch Vault. To process this screen, type **TC Denomination Enquiry** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **TC Denomination Enquiry**.

→ The **TC Denomination Enquiry** screen is displayed.

**Figure 21: TC Denomination Enquiry**

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory.

For more information on fields, refer to table [Field Description: TC Denomination Enquiry](#).

**Field Description: TC Denomination Enquiry**

Field	Description
<b>Branch Code</b>	Displays the logged-in branch code.
<b>Posting Date</b>	Displays the current posting date of the branch.
<b>Till Vault Indicator</b>	Select the Till Vault Indicator from the drop-down values ( <b>Till</b> or <b>Vault</b> ).
<b>Till ID</b>	Displays the Till ID.
<b>TC Currency</b>	Click search icon, and select the TC currency from the list of values.
<b>Issuer Code</b>	Click search icon, and select the issuer code from the list of values.
<b>Refresh</b>	Click this button to fetch the TC details.
<b>Denomination Code</b>	Displays the denomination code of the TC.
<b>Description</b>	Displays the description of the denomination code.

Field	Description
<b>System Count</b>	Displays the system count.
<b>Series</b>	Displays the series.
<b>Start Number</b>	Displays the start number.
<b>End Number</b>	Displays the end number.
<b>Amount</b>	Displays the amount.

After you specify the **TC Currency** and **Issuer Code** fields, click **Refresh** button to fetch and display the details of the TC.

## 2.4.2 Open Branch Batch

This screen is used to initiate the branch operations for the **Posting Date**. The Supervisor or Branch Manager with necessary access can open this screen. The Teller or Vault Teller can perform the branch operations only after the branch batch is submitted for the posting date. When a branch batch is closed for the day, system derives the next working day automatically, based on the branch calendar.

To process this screen, type **Open Branch Batch** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

- From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Open Branch Batch**.

→ The **Open Branch Batch** screen is displayed.

**Figure 22: Open Branch Batch**

Specify the details in the **Open Branch Batch** screen. For more information on fields, refer to table [Field Description: Open Branch Batch](#).

**Field Description: Open Branch Batch**

Field	Description
<b>Posting Date</b>	Indicates the date on which the branch batch need to be opened.  <b>NOTE:</b> By default, the system displays the current date.

Click **Submit** to open the branch batch for the specified posting date.

**NOTE:** Opening branch batch indicates to the head office that the branch is open for business operations on the specified posting date. You can open a Teller batch for the posting date only after the branch batch is opened.

### 2.4.3 Open Vault Batch

The Vault Teller can use this screen to open a vault batch on a specified date. On the specified posting date, the Vault Teller can open only one vault batch. To open another vault batch, the vault batch which is opened previously needs to be closed. All the tellers buy additional cash and sell their excess cash to the Vault Teller. When this screen is launched, the system will default the cash balances.

To process this screen, type **Open Vault Batch** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

- 3. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Open Vault Batch**.

→ The **Open Vault Batch** screen is displayed.

**Figure 23: Open Vault Batch**

Open Vault Batch

Specify the details in the **Open Vault Batch** screen. For more information on fields, refer to table [Field Description: Open Vault Batch](#).

**Field Description: Open Vault Batch**

Field	Description
Posting Date	Indicates the date on which the vault batch needs to be opened.  <b>NOTE:</b> By default, the system displays the current

Field	Description
<b>Currency</b>	Displays the currency code.
<b>Total Cash</b>	Specify the total cash for a particular currency, physically present in the bank vault, at the beginning of the current posting date.
<b>Cash Available</b>	<p>Displays the system calculated cash for a particular currency, which is available in the vault at the beginning of the current posting date.</p> <p><b>NOTE:</b> The amount shown in this column depends on the cash transactions that were carried out by the vault until the last posting date.</p>
<b>Shortage/Overage Amount</b>	Displays the difference between the total cash and the cash available in the Vault, at the end of the current posting date.
<b>Currency</b>	Displays the currency code.
<b>Denomination</b>	Displays the denomination code.
<b>Total Units</b>	Specify the total units available while closing the batch.
<b>Total Value</b>	Displays the total value based on the total units.
<b>System Units</b>	Displays the units available in the system.
<b>System Total</b>	Displays the total value available in the system.
<b>Shortage/Overage Units</b>	Displays the shortage/overage units.
<b>Shortage/Overage Amount</b>	Displays the shortage/overage amount.
<b>Total Cash Amount</b>	Displays the total cash amount.

Field	Description
<b>Denomination Total</b>	Displays the total denomination value with the currency.
<b>Validate Denominations</b>	Click this button to calculate and display the <b>Total Cash</b> and <b>Shortage/Overage Amount</b> fields based on the currency selected.

Click **Submit** to open the vault batch for the specified posting date. During vault batch open, system will internally transfer the available balance from the Primary vault of the branch to the current open Vault ID. The Vault Teller can perform the relevant vault operations for the posting date.

**NOTE:** System does not allow to open the vault batch if the physical cash entered is not same as the system cash.

## 2.4.4 Open Teller Batch

This screen is used to open a teller batch on a specified date. A Teller can initiate the teller batch with the current cash position that has been retained from the previous day or start with zero cash and subsequently buy cash from the vault. The system will default the cash balances on opening a teller batch.

To process this screen, type **Open Teller Batch** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Open Teller Batch**.

→ The **Open Teller Batch** screen is displayed.

**Figure 24: Open Teller Batch**

Specify the details in the **Open Teller Batch** screen. For more information on fields, refer to table [Field Description: Open Teller Batch](#).

#### Field Description: Open Teller Batch

Field	Description
<b>Posting Date</b>	Indicates the date on which the vault batch need to be opened.  <b>NOTE:</b> By default, the system displays the current date.
<b>Currency</b>	Displays the currency code.

Field	Description
<b>Total Cash</b>	Specify the total cash for a particular currency, physically present in the bank teller, at the beginning of the current posting date.
<b>Cash Available</b>	<p>Displays the system calculated cash for a particular currency, which is available in the vault at the beginning of the current posting date.</p> <p><b>NOTE:</b> The amount shown in this column depends on the cash transactions that were carried out by the vault until the last posting date.</p>
<b>Shortage/ Overage Amount</b>	<p>Displays the difference between the total cash and the cash available with the Teller, at the end of the current posting date. Based on this difference, the overage or the shortage amount is displayed.</p> <p><b>NOTE:</b> An overage indicates that the physical cash with the Teller is more than the available cash as calculated by the system. A shortage indicates that the available cash calculated by the system is more than the physical cash present with the Teller.</p>
<b>Currency</b>	Displays the currency code.
<b>Denomination</b>	Displays the denomination code.
<b>Total Units</b>	Specify the total units available while closing the batch.
<b>Total Value</b>	Displays the total value based on the total units.
<b>System Units</b>	Displays the units available in the system.
<b>System Total</b>	Displays the total value available in the system.

Field	Description
<b>Shortage/Overage Units</b>	Displays the shortage/overage units.
<b>Shortage/Overage Amount</b>	Displays the shortage/overage amount.
<b>Total Cash Amount</b>	Displays the total cash amount.
<b>Denomination Total</b>	Displays the total denomination value with the currency.
<b>Validate Denominations</b>	Click this button to calculate and display the <b>Total Cash</b> and <b>Shortage/Overage Amount</b> fields based on the currency selected.

Click **Submit** to open the teller batch for the specified posting date. The Teller can perform the relevant teller operations for the posting date.

**NOTE:** System does not allow to open the vault batch if the physical cash entered is not same as the system cash. The system also allows to re-open the Teller batch for the current system date.

## 2.4.5 Current Open Tills

This screen is used to view the open tills or vault for the branch during the day or before performing the end of day activity. The branch user can use this screen to view the list of logged-in tellers and to view the pending, unassigned, assigned, or tanked transactions under each Teller or Vault Teller's ID.

To process this screen, type **Current Open Tills** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Current Open Tills**.

→ The **Current Open Tills** screen is displayed.

**Figure 25: Current Open Tills**

Specify the details in the **Current Open Tills** screen. For more information on fields, refer to table [Field Description: Current Open Tills](#).

**Field Description: Current Open Tills**

Field	Description
<b>Branch Code</b>	Displays the logged-in branch.
<b>Posting Date</b>	Indicates the date on which the current open tills need to be enquired.  <b>NOTE:</b> By default, the system displays the current date.
<b>Refresh</b>	Click this button to refresh the details.

Field	Description
<b>User ID</b>	Displays the list of Tellers or Vault Tellers of the branch.
<b>Till/Vault Indicator</b>	Displays the checkbox if the <b>User ID</b> is a Vault Teller.
<b>User Working</b>	Displays the user working as <b>Y</b> or <b>N</b> .
<b>Pending Transactions</b>	Displays the number of pending transactions for the Teller or Vault Teller.
<b>Assigned Transactions</b>	Displays the number of assigned transactions for the Teller or Vault Teller.

## 2.4.6 Branch Breaching Limits

This screen helps to view the details of Till or Vault which is breaching the currency limits along with the current balance position. In addition, the branch supervisor can view the branch total cash position and its breaching limits for the posting date.

To process this screen, type **Branch Breach Limits** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Branch Breach Limits**.

→ The **Branch Breaching Limits** screen is displayed.

**Figure 26: Branch Breaching Limits**

Branch Breach Limits

Specify the details in the **Branch Breaching Limits** screen. For more information on fields, refer to table [Field Description: Branch Breaching Limits](#).

#### Field Description: Branch Breaching Limits

Field	Description
<b>Branch Code</b>	Displays the logged-in branch.
<b>Posting Date</b>	Indicates the date on which the branch breaching limits needs to be enquired.  <b>NOTE:</b> By default, the system displays the current date.
<b>Refresh</b>	Click this icon to refresh the details.
<b>Tills Breaching Limit</b>	Specify the fields.

Field	Description
<b>User ID</b>	Displays the list of Tellers/Vault Tellers of the branch.
<b>Vault User</b>	Displays the checkbox if <b>User ID</b> is a Vault Teller.
<b>Currency</b>	Displays the list of currencies in which the <b>User ID</b> has performed the transactions.
<b>Minimum Limit</b>	Displays the minimum till balance that needs to be maintained for the <b>User ID</b> and currency combination.
<b>Maximum Limit</b>	Displays the maximum till balance that needs to be maintained for the <b>User ID</b> and currency combination.
<b>Current Till Balance</b>	Displays the current till balance based on the till cash position for the specified currency.
<b>Branch Breaching Limit</b>	Specify the fields.
<b>Branch Code</b>	Displays the code of the logged-in branch.
<b>Currency</b>	Displays the currency code.
<b>Minimum Limit</b>	Displays the minimum limit that needs to be maintained for the branch.
<b>Maximum Limit</b>	Displays the maximum limit that needs to be maintained for the branch.
<b>Current Total Balance</b>	Displays the branch total cash position, currency wise.

### 2.4.7 Till Vault Position

This screen used to view the cash position of all the currencies at any time for the **Teller ID** or **Vault ID**, which is logged in for the current posting date. It also shows the **Denomination Details**.

To process this screen, type **Till Vault Position** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Till Vault Position**.

→ The **Till Vault Position** screen is displayed.

**Figure 27: Till Vault Position**

The screenshot shows the 'Till Vault Position' application window. It contains the following elements:

- Input Fields:**
  - Branch Code:** A text input field.
  - Branch Posting Date:** A date picker field.
  - Teller/Vault ID:** A text input field.
  - Refresh:** A green button to refresh the data.
- Currency Details Table:**

	Currency	Opening Balance	Incoming Cash Amount	Outgoing Cash Amount	Total Cash	Till/Vault Indicator
No data to display.						
- Denomination Details Table:**

	Denomination Code	Denomination Value	Opening Balance	Incoming Cash Amount	Outgoing Cash Amount	Total Cash	Units
No data to display.							

Specify the details in the **Till Vault Position** screen. For more information on fields, refer to table [Field Description: Till Vault Position](#).

**Field Description: Till Vault Position**

Field	Description
<b>Branch Code</b>	Displays the logged-in branch.
<b>Branch Posting Date</b>	Displays the date on which the Till/Vault batch is opened.
<b>Teller/Vault ID</b>	Displays the logged-in Teller ID or Vault Teller ID.
<b>Currency Details</b>	Specify the fields.
<b>Currency</b>	Displays the currency code.
<b>Opening Balance</b>	Displays the opening balance of the till or vault.

<b>Field</b>	<b>Description</b>
<b>Incoming Cash Amount</b>	Displays the incoming cash in the till or vault for the current posting date.
<b>Outgoing Cash Amount</b>	Displays the outgoing cash in the till or vault for the current posting date.
<b>Total Cash</b>	Displays the total cash available in the till or vault.
<b>Till Vault Indicator</b>	Displays whether the currency details apply to Till or Vault. ( <b>T</b> or <b>V</b> )
<b>Denomination Details</b>	Specify the fields.
<b>Denomination Code</b>	Displays the denomination code maintained for the currency.
<b>Denomination Value</b>	Displays the denominations maintained for the currency.
<b>Opening Balance</b>	Displays the opening balance in the Till or vault in terms of denominations.
<b>Incoming Cash Amount</b>	Displays the incoming cash in the Till or vault in terms of denominations.
<b>Outgoing Cash Amount</b>	Displays the outgoing cash in the Till or vault in terms of denominations.
<b>Total Cash</b>	Displays the total cash currently available in the Till or vault for the day in terms of denominations.
<b>Units</b>	Displays the total units available for the specific denomination code.

## 2.4.8 Branch Total Position

The supervisor can use this screen to view the currency wise cash position of all the Tellers and Vault Teller on the posting date for the logged-in branch.

To process this screen, type **Branch Total Position** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Branch Total Position**.

→ The **Branch Total Position** screen is displayed.

**Figure 28: Branch Total Position**

Specify the details in the **Branch Total Position** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Branch Total Position](#).

### Field Description: Branch Total Position

Field	Description
<b>Branch Code</b>	Displays the logged-in branch.
<b>Posting Date</b>	Indicates the date on which the teller totals position need to be enquired.  <b>NOTE:</b> By default, the system displays the current date.

<b>Field</b>	<b>Description</b>
<b>Currency</b>	Displays the currency code for which the teller totals details needs to be displayed.
<b>Teller ID</b>	Displays the logged-in teller ID from the LOV.
<b>All Till</b>	This radio button when selected displays all the open Teller Till details of the day.
<b>All Vault</b>	This radio button when selected displays all the open Vault details of the day.
<b>All Till and Vault</b>	This radio button when selected displays all the open Till and open Vault details of the day.
<b>Query</b>	Displays the details if you click this icon.
<b>Currency</b>	Displays the currency code for which the cash position is shown.
<b>Teller ID</b>	Displays the Teller ID for which the cash position is shown.
<b>Opening Balance</b>	Displays the opening balance of the Teller ID for the specific currency.
<b>Incoming Cash</b>	Displays the total incoming cash received in the Till.
<b>Outgoing Cash</b>	Displays the outgoing cash moved out of the Till.
<b>Closing Balance</b>	Displays the total amount pending in the Till.

## 2.4.9 Close Teller Batch

This screen is used to close the teller batch for the given posting date. The system allows closing the teller batch only when the below conditions are met:

- Verify that all the transactions are successfully processed to a logical end. If there are any pending transactions, the system prompts to either complete or reject the transaction.
- Verify that there is a difference between the physical cash and the cash calculated by the system. You need to book the overage or shortage accordingly, and then each Teller can close the teller batch for that day.
- Verify that the teller cash position retains the minimum limit for every currency as maintained in the User limits. If you breach the minimum limit, the system prompts the error to maintain the required minimum balance.

**NOTE:** The teller batch can be opened and closed only once for the posting date.

To process this screen, type **Close Teller Batch** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Close Teller Batch**.

→ The **Close Teller Batch** screen is displayed.

**Figure 29: Close Teller Batch**

Specify the details in the **Close Teller Batch** screen. For more information on fields, refer to table [Field Description: Close Teller Batch](#).

**Field Description: Close Teller Batch**

Field	Description
<b>Posting Date</b>	Indicates the date on which the teller batch needs to be closed.  <b>NOTE:</b> By default, the system displays the current date.
<b>Currency</b>	Displays the currency code in which the Teller deals.
<b>Total Cash</b>	Specify the total cash for a particular currency, physically present in the bank Teller, at the end of the current posting date.
<b>Cash Available</b>	Displays the system calculated cash for a particular currency, which is available in the teller at the end of the current posting date.  <b>NOTE:</b> The amount displayed in this column depends on the cash transactions that were carried out by the Teller until the last posting date.
<b>Shortage/ Overage Amount</b>	Displays the difference between the <b>Total Cash</b> and the <b>Cash Available</b> . Based on this difference, the overage or the shortage amount is displayed.  <b>NOTE:</b> An overage indicates that the physical cash with the Teller is more than the available cash as calculated by the system. A shortage indicates that the available cash calculated by the system is more than the physical cash present with the Teller.
<b>Currency</b>	Displays the currency code.

Field	Description
<b>Denomination</b>	Displays the denomination code.
<b>Total Units</b>	Specify the total units available while closing the batch.
<b>Total Value</b>	Displays the total value based on the total units.
<b>System Units</b>	Displays the units available in the system.
<b>System Total</b>	Displays the total value available in the system.
<b>Shortage/Overage Units</b>	Displays the shortage/overage units.
<b>Shortage/Overage Amount</b>	Displays the shortage/overage amount.
<b>Total Cash Amount</b>	Displays the total cash amount.
<b>Denomination Total</b>	Displays the total denomination value with the currency.

### 2.4.9.1 TC Denomination Details

This data segment provides the denomination details for the Traveller's Cheque. For more information on fields, refer to the field description table.

**Figure 30: TC Denomination Details**

The screenshot shows a web interface titled "TC Denomination Details". It contains two tables. The first table has four columns: "TC Currency", "Total TC Amount", "TC Available", and "Shortage/Overage Amount". Below it, a message states "No data to display." The second table has twelve columns: "Issuer Code", "TC Currency", "TC Denomination", "TC Count", "Series", "Start Number", "End Number", "TC Amount", "TC Denomination Value", "System Count", "Shortage/Overage Units", and "Shortage/Overage Amount". Below this table, another message states "No data to display." At the bottom of the form, there are two input fields labeled "Total TC Amount" and "TC Denomination". A green button labeled "Validate TC Denominations" is located in the bottom right corner.

**Field Description: Close Teller Batch**

<b>Field</b>	<b>Description</b>
<b>TC Currency</b>	Displays the TC currency code in which the Teller deals.
<b>Total TC Amount</b>	Displays the total TC amount for a particular currency, physically present in the bank Teller, at the end of the current posting date.
<b>TC Available</b>	<p>Displays the TC for a particular currency, which is available in the teller at the end of the current posting date.</p> <p><b>NOTE:</b> The amount displayed in this column depends on the cash transactions that were carried out by the Teller until the last posting date.</p>
<b>Shortage/ Overage Amount</b>	<p>Displays the difference between the total cash and the cash available with the Teller, at the end of the current posting date. Based on this difference, the overage or the shortage amount is displayed.</p> <p><b>NOTE:</b> An overage indicates that the physical cash with the Teller is more than the available cash as calculated by the system. A shortage indicates that the available cash calculated by the system is more than the physical cash present with the Teller.</p>
<b>Issuer Code</b>	Displays the issuer code.
<b>TC Currency</b>	Displays the currency code of the TC.
<b>TC Denomination</b>	Displays the denomination code of the TC.
<b>TC Count</b>	Specify the TC count available with the Teller, at the end of the current posting date.

Field	Description
<b>Series</b>	Displays the TC series.
<b>Start Number</b>	Displays the start number.
<b>End Number</b>	Displays the end number.
<b>TC Amount</b>	Displays the total TC amount.
<b>TC Denomination Value</b>	Displays the total denomination value with the TC currency.
<b>System Count</b>	Displays the system count.
<b>Shortage/Overage Units</b>	Displays the shortage/overage units.
<b>Shortage/Overage Amount</b>	Displays the shortage/overage amount.
<b>Total TC Amount</b>	Displays the total TC amount.
<b>TC Denominations</b>	Displays the TC denomination code.
<b>Validate TC Denominations</b>	Click this button to calculate and display the <b>Total Cash</b> and <b>Shortage/Overage Amount</b> fields based on the currency selected.

### 2.4.9.2 Transaction Submission

Click **Submit** to update the cash balance and close the teller batch for the posting date.

**NOTE:** If there is any overage or shortage, the system displays an error message stating that the cash/TC is not balanced for the Teller ID. Also, if any of the conditions mentioned above fail, the system displays an appropriate error message on submit.

## 2.4.10 Close Vault Batch

This screen is used to close the vault batch for a specific date. The Vault Teller can log in and close the vault batch only if the below conditions are met:

- Verify if there is a difference in the physical cash and that calculated by the system, the overage or shortage has to be booked accordingly. After the overage or shortage is booked, the Vault Teller can close the vault batch for that day.
- Verify that the cash position of the Vault Teller retains the minimum limit for every currency as maintained in the User limits. If the minimum limit is breached, the system prompts the error to maintain the required minimum balance.

**NOTE:** The Vault Teller can close the vault batch even if the Tills are open. When the Vault Batch is closed, the user will not be able to post transactions like **Buy Cash from Vault** that involve Vault.

To process this screen, type **Close Vault Batch** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Close Vault Batch**.  
→ The **Close Vault Batch** screen is displayed.

**Figure 31: Close Vault Batch**

Specify the details in the **Close Vault Batch** screen. For more information on fields, refer to table [Field Description: Close Vault Batch](#).

**Field Description: Close Vault Batch**

Field	Description
<b>Posting Date</b>	Indicates the date on which the vault batch needs to be closed.  <b>NOTE:</b> By default, the system displays the current date.
<b>Currency</b>	Displays the currency code in which the Vault Teller deals.
<b>Total Cash</b>	Specify the total cash for a particular currency, physically present in the bank Vault Teller, at the end of the current posting date.
<b>Cash Available</b>	Displays the system calculated cash for a particular currency, which is available in the Vault Teller at the end of the current posting date.  <b>NOTE:</b> The amount displayed in this column depends on the cash transactions that were carried out by the Teller until the last posting date.
<b>Shortage/Overage Amount</b>	Displays the difference between the total cash and the cash available in the Vault, at the end of the current posting date.
<b>Currency</b>	Displays the currency code.
<b>Denomination</b>	Displays the denomination code.
<b>Total Units</b>	Specify the total units available while closing the batch.
<b>Total Value</b>	Displays the total value based on the total units.
<b>System Units</b>	Displays the units available in the system.

Field	Description
<b>System Total</b>	Displays the total value available in the system.
<b>Shortage/Overage Units</b>	Displays the shortage/overage units.
<b>Shortage/Overage Amount</b>	Displays the shortage/overage amount.
<b>Total Cash Amount</b>	Displays the total cash amount.
<b>Denomination Total</b>	Displays the total denomination value with the currency.

#### 2.4.10.1 TC Denomination Details

This data segment provides the denomination details for the Traveller's Cheque. For more information on fields, refer to [2.4.9.1 TC Denomination Details](#).

#### 2.4.10.2 Transaction Submission

Click **Submit** to update the cash balance and close the vault batch for the posting date. During vault batch closure, system will internally transfer the closing balance from the current open Vault ID to the Primary vault of the branch.

**NOTE:** If there is any overage or shortage, the system displays an error message stating that the cash not balanced for the Teller ID. Also, if any of the conditions mentioned above fail, the system displays an appropriate error on submit.

### 2.4.11 Close Branch Batch

This screen is used to close the branch batch, after confirming that all the branch transactions have been accounted for in the account books. The posting date for closing a branch batch must be the same date on which the respective branch batch was opened. You need to close all the teller batches and the vault batches of the branch before closing the branch batch for that posting date. Archiving is done as a part of Close Branch Batch as per the archival days set up for the branch.

To process this screen, type **Close Branch Batch** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Close Branch Batch**.

→ The **Close Branch Batch** screen is displayed.

**Figure 32: Close Branch Batch**

Close Branch Batch

Posting Date

Submit Clear Cancel

Specify the details in the **Close Branch Batch** screen. For more information on fields, refer to table [Field Description: Close Branch Batch](#).

**Field Description: Close Branch Batch**

Field	Description
<b>Posting Date</b>	Indicates the date on which the branch batch needs to be closed.  <b>NOTE:</b> By default, the system displays the current date.

Click **Submit** to close the branch batch for the specified posting date.

## 2.4.12 Book Shortage

The Teller or Vault Teller can use this screen to book the shortage if the actual or physical cash present is less than the system cash. While booking the shortage, the system lowers the cash balance to bring it in sync with the physical cash balance of the Teller by passing the difference to a cash shortage GL. After the system cash and the physical cash are synchronized, the Teller can perform the cash balancing and close the Teller/Vault Teller batch for the posting date.

To process this screen, type **Book Shortage** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Book Shortage**.

→ The **Book Shortage** screen is displayed.

#### 2.4.12.1 Main Transaction Details

Specify the details in the **Book Shortage** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Book Shortage](#).

### Field Description: Book Shortage

Field	Description
Transaction Amount	<p>Displays the local currency of the branch.</p> <p><b>NOTE:</b> The user can select another currency from the drop down values in which shortage amount is to be booked.</p> <p>Specify the amount that needs to be booked for shortage.</p>
Narrative	Displays the default narrative Book Shortage and it can be modified.

#### 2.4.12.2 Denomination Details

### Figure 34: Denomination Details

Denomination					
Bills			Coins		
Denom Code	Units	Value	Denom Code	Units	Value
No data to display.			No data to display.		
Total Cash Amount			Denomination Amount		
<div></div>			<div>GBP0.00</div>		

The **Denomination** segment is used to view the denominations maintained for the transaction currency and enter the denomination units. The denomination details for the withdrawal transactions (when cash is disbursed to the Customer) will be populated automatically based on the cash availability in the Teller's Till. For more information on fields, refer to table [Field Description: Denomination Details](#).

**Field Description: Denomination Details**

<b>Field</b>	<b>Description</b>
<b>Denom Code</b>	Displays the unique denomination codes for each currency.
<b>Units</b>	<p>Indicates the number of units for the specified denomination.</p> <p><b>NOTE:</b> By default, the till contents are incremented for inflow transactions such as cash deposits and decremented for outflow transactions such as cash withdrawal. To reverse the transaction, you can specify units in negative.</p>
<b>Value</b>	<p>Displays the system-computed face value of the denomination based on the number of units.</p> <p><b>NOTE:</b> For example, if the denomination code represents USD 100 and the unit is specified as 3, the value will be displayed as 300.</p>
<b>Denomination Amount</b>	<p>Displays the system-computed value of the denomination by multiplying the denomination value with the number of units.</p> <p><b>NOTE:</b> For example, if the denomination code represents USD 100 and the number of units is 10, the denomination amount will be 1000.</p>
<b>Total Cash Amount</b>	<p>Displays the total cash amount.</p> <p><b>NOTE:</b> The system computes the Denomination Amount and validates if it is equal to the Total Cash Amount. It also prompts error during saving if there is any difference.</p>

### 2.4.12.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the system reduces the cash balance by this transaction amount to synchronize with physical cash held with Teller.

### 2.4.13 Book Overage

The Teller or Vault Teller can use this screen to book the physical cash held in a particular currency, which exceeds the cash in that currency shown in the system. While booking a cash overage, the system passes the difference to a cash overage liability GL and increases the cash balance, and brings it to synchronize with the physical balance with the Teller. After the system cash and the physical cash are synchronized, the Teller can perform the cash balancing and close the Teller/Vault Teller batch for the posting date.

To process this screen, type **Book Overage** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Book Overage**.

→ The **Book Overage** screen is displayed.

#### Field Description: Book Overage

Field	Description
<b>Transaction Amount</b>	<p>Displays the local currency of the branch.</p> <p><b>NOTE:</b> The user can select another currency from the drop-down values in which shortage amount is to be booked.</p> <p>Specify the amount that needs to be booked for overage.</p>
<b>Narrative</b>	<p>Displays the default narrative Book Overage and it can be modified.</p>

### 2.4.13.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.4.13.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the system increases the cash balance by this transaction amount to synchronize with physical cash held with Teller.

## 2.4.14 Teller Session

This section describes the various screens used to perform several transactions with the teller before leaving, all the transactions done by the customer is grouped under a single session. At the end of the session, teller accepts the cumulative amount (of all the transactions done in the session) from the customer. The screens are described in the following topics:

- [2.14.13.1 Start Teller Session](#)
- [2.4.13.2 Stop Teller Session](#)

### 2.4.14.1 Start Teller Session

The Teller can use this screen start the teller session for a customer. To process this screen, type **Start Teller Session** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Start Teller Session**.

→ The **Start Teller Session** screen is displayed.

**Figure 36: Start Teller**

#### 2.4.14.1.1 Main Transaction Details

Specify the details in the **Start Teller Session** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Start Teller Session](#).

**Field Description: Start Teller Session**

<b>Field</b>	<b>Description</b>
<b>Customer Number</b>	Specify the customer number .The adjoining Option list displays all open and authorized CIF IDs maintained in the system. You can choose the appropriate one.
<b>Operation Type</b>	<p>Select the operation types of the customer from the drop-down list. The drop-down list shows following values:</p> <ul style="list-style-type: none"> <li>• <b>Transaction</b></li> <li>• <b>Account/Contract</b></li> <li>• <b>Both</b></li> </ul> <p><b>NOTE:</b> By default, <b>Transaction</b> value is selected.</p>
<b>Incoming Cash Amount</b>	Specify the cash amount at the start of teller session.
<b>Remarks</b>	Here, you can enter remarks for the transaction.

### 2.4.14.1.2 CIF Details

Figure 37: CIF Details

The screenshot shows a web application window titled "CIF Details". It contains two main sections, each with a table header and a data area. The first section is for "Executor CIF" with columns "Select", "Executor CIF Number", and "Executor CIF Name". The second section is for "Beneficial Owner CIF" with columns "Select", "Beneficial Owner CIF Number", and "Beneficial Owner CIF Name". Both data areas show "No data to display." and pagination controls indicating "Page 1 (0 of 0 items)".

Specify the details in the **CIF Details** segment. For more information on fields, refer to table [Field Description: CIF Details](#).

Field Description: CIF Details

Field	Description
<b>Executor CIF Number</b>	When you press Tab key, the system defaults the value which can be modified.
<b>Executor CIF Name</b>	Displays the executor CIF.
<b>Beneficial Owner CIF Number</b>	The adjoining option list displays all open and authorized CIF IDs maintained in the system. You can choose the appropriate one.
<b>Beneficial Owner CIF Number</b>	Displays the beneficial owner CIF number.

### 2.4.14.1.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

### 2.4.14.2 Stop Teller Session

The Teller can use this screen to stop the teller session for a customer. To process this screen, type **Stop Teller Session** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Stop Teller Session**.

→ The **Stop Teller Session** screen is displayed.

**Field Description: Teller Session Denomination Details**

<b>Field</b>	<b>Description</b>
<b>Transaction Currency</b>	Displays the currency for the <b>Total Transaction Amount</b> .
<b>Total Transaction Amount</b>	Displays the total transaction amount for a particular currency with in the teller session.
<b>IN/OUT Flow</b>	System displays In/out for the <b>Total Transaction Amount</b> .
<b>Add Denomination</b>	Click <b>Add</b> to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic <a href="#">2.4.11.2 Denomination Details</a> in this guide.

**2.4.14.2.4 Transaction Submission**

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

## 2.5 Till-Vault Operations

This section describes the various screens used to perform the Till Vault operations. The screens are described in the following sub-sections:

- [\*2.5.1 Buy TC From Agent\*](#)
- [\*2.5.2 Buy TC From Head Office \(HO\)\*](#)
- [\*2.5.3 Buy TC From Vault\*](#)
- [\*2.5.4 Return TC to Vault\*](#)
- [\*2.5.5 Return TC to HO\*](#)
- [\*2.5.6 Buy Cash from Currency Chest\*](#)
- [\*2.5.7 Sell Cash to Currency Chest\*](#)
- [\*2.5.8 Buy Cash from Vault\*](#)
- [\*2.5.9 Sell Cash to Vault\*](#)
- [\*2.5.10 Buy Cash from Till\*](#)
- [\*2.5.11 Sell Cash to Till\*](#)
- [\*2.5.12 Denomination Exchange\*](#)
- [\*2.5.13 Interbranch Transactions\*](#)

## 2.5.1 Buy TC From Agent

This screen is used to buy TC from Agents into branch's vault. Only a Vault user can access this screen. To process this screen, type **Buy TC From Agent** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Buy TC From Agent**.

→ The **Buy TC From Agent** screen is displayed.

**Figure 41: Buy TC From Agent**

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory.

For more information on fields, refer to table [Field Description: Buy TC From Agent](#)

**Field Description: Buy TC From Agent**

Field	Description
<b>TC Amount</b>	Select the currency from the drop-down values, and specify the TC Amount.
<b>Issuer Code</b>	Click the search icon, and select the issuer code from the list of values.  <b>NOTE:</b> The list of values provides the issuer codes maintained in the <b>Issuer Code Maintenance</b> screen.
<b>Issuer Code Description</b>	Displays the description of the specified issuer code.
<b>Narrative</b>	Displays the narrative as <b>Buy TC From Agent</b> and it can be modified.

## 2.5.1.1 TC Denomination Details

**Figure 42: TC Denomination**

Specify the details in this data segment. For more information on fields, refer to table [Field Description: TC Denomination Details](#).

**Field Description: TC Denomination Details**

Field	Description
	Click this icon to add a new row.
<b>Denom Code</b>	Specify the TC denomination code from the list of values.
<b>Currency</b>	Displays the default TC Currency.
<b>Series</b>	Specify the series of the TC denomination code that needs to be purchased from the Agent.  <b>NOTE:</b> This field accepts alphanumeric values.
<b>Count</b>	Specify the units.
<b>Start Number</b>	Specify the start number of the series.
<b>End Number</b>	Displays the end number, which is the sum of start number and the count.
<b>TC Amount</b>	Displays the TC Amount, which is the product of the denomination and the count.
<b>Total TC Amount</b>	Displays the total TC amount along with the currency.

Field	Description
<b>Denomination Amount</b>	Displays the denomination amount along with the currency.
 icon	Click this icon to delete a row.

### 2.5.1.2 Transaction Submission

2. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the TC position (TC Inflow) is updated to the branch vault (vault ID that is opened) for the combination of Issuer code, TC Currency, TC Denom Code, and Series.

In addition, during transaction completion, the system creates individual TC records for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number with TC status as Null.

## 2.5.2 Buy TC From Head Office (HO)

This screen is used to buy TC from HO into branch's vault. Only a Vault user can access this screen. To process this screen, type **Buy TC From HO** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Buy TC From HO**.

→ The **Buy TC From HO** screen is displayed.

**Figure 43: Buy TC From HO**

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Buy TC from HO](#).

**Field Description: Buy TC from HO**

Field	Description
<b>TC Amount</b>	Select the currency from the drop-down values, and specify the TC Amount.
<b>Issuer Code</b>	Click the search icon and select the issuer code from the list of values.  <b>NOTE:</b> The list of values provides the issuer codes maintained in the <b>Issuer Code Maintenance</b> screen.
<b>Issuer Code Description</b>	Displays the description of the specified issuer code.
<b>Narrative</b>	Displays the narrative as <b>Buy TC From HO</b> and it can be modified.

### 2.5.2.1 TC Denomination Details

The **TC Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.5.1.1 TC Denomination Details](#) in this guide.

### 2.5.2.2 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the TC position (TC Inflow) is updated to the branch vault (vault ID that is opened) for the combination of Issuer code, TC Currency, TC Denom Code, and Series.

In addition, during transaction completion, the system creates individual TC records for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number with TC status as Null.

### 2.5.3 Buy TC From Vault

This screen is used to buy TC from Vault to transfer TCs into logged-in Teller's Till. Only a Teller can access this screen. To process this screen, type **Buy TC From Vault** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

2. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Buy TC From Vault**.

→ The **Buy TC From Vault** screen is displayed.

**Figure 44: Buy TC From Vault**

The screenshot shows the 'Buy TC from Vault' interface. It includes a title bar, a 'TC Amount' dropdown menu (currently showing 'GBP'), an 'Issuer Code' search field, an 'Issuer Code Description' text area, a 'Narrative' dropdown menu (currently showing 'Buy TC from Vault'), and a 'TC Denominations' text area. At the bottom right, there are 'Submit' and 'Cancel' buttons.

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory.  
For more information on fields, refer to table [Field Description: Buy TC From Vault](#).

**Field Description: Buy TC From Vault**

Field	Description
<b>TC Amount</b>	Select the currency from the drop-down values, and specify the TC Amount.
<b>Issuer Code</b>	Click the search icon and select the issuer code from the list of values.  <b>NOTE:</b> The list of values provides the issuer codes maintained in the <b>Issuer Code Maintenance</b> screen.
<b>Issuer Code Description</b>	Displays the description of the specified issuer code.
<b>Narrative</b>	Displays the narrative as <b>Buy TC From Vault</b> and it can be modified.

### 2.5.3.1 TC Denomination Details

**Figure 45: TC Denomination**

TC Denominations	Denom Code	Currency	Series	Count	Start Number	End Number	TC Amount
1							0

Total TC Amount: Denomination Amount:

Specify the details in this data segment. For more information on fields, refer to table [Field Description: TC Denomination Details](#).

**Field Description: TC Denomination Details**

Field	Description
	Click this icon to add a new row.
<b>Denom Code</b>	Specify the TC denomination code from the list of values.
<b>Currency</b>	Displays the default TC Currency.
<b>Series</b>	<p>Specify the series of the TC denomination code that needs to be purchased from the Vault.</p> <p><b>NOTE:</b> The list of values contains the valid TC series that are available with Vault. On click of LOV, the search criterion field will have <b>Series</b> and result criterion will display the <b>Series</b> and <b>Start Number</b>.</p>
<b>Count</b>	Specify the count of the TC.
<b>Start Number</b>	<p>Displays the starting number of the series.</p> <p><b>NOTE:</b> Based on the series selected, system will populate the Start Number available for the combination of <b>Currency</b>, <b>TC Denom Code</b> and <b>Series</b>.</p>

Field	Description
<b>End Number</b>	Displays the end number, which is the sum of start number and the count.
<b>TC Amount</b>	Displays the TC Amount, which is the product of the denomination and the count.
<b>Total TC Amount</b>	Displays the total TC amount along with the currency.
<b>Denomination Amount</b>	Displays the denomination amount along with the currency.
 icon	Click this icon to delete a row.

### 2.5.3.2 Transaction Submission

- Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the TC position (TC Outflow) is updated to the branch vault and TC Inflow is updated to the logged-in Teller for the combination of Issuer Code, TC Currency, TC denom Code, and Series to the extent of TC denomination units being purchased.

In addition, during transaction completion, system updates the TC status as **Unused** for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number.

## 2.5.4 Return TC to Vault

This screen is used to sell TC to the branch's vault, and only a Teller can access this screen. To process this screen, type **Return TC to Vault** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Return TC to Vault**.

→ The **Return TC to Vault** screen is displayed.

**Figure 46: Return TC to Vault**

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Return TC to Vault](#).

**Field Description: Return TC to Vault**

Field	Description
<b>TC Amount</b>	Select the TC currency from the drop-down values, and specify the TC Amount.
<b>Issuer Code</b>	Click the search icon and select the issuer code from the list of values.  <b>NOTE:</b> The list of values provides the HO code of the logged-in branch and the issuer codes maintained in the <b>Issuer Code Maintenance</b> screen.
<b>Issuer Code Description</b>	Displays the description of the specified Issuer Code.

Field	Description
Narrative	Displays the narrative as <b>Sell TC to Vault</b> and it can be modified.

### 2.5.4.1 TC Denomination Details

<b>Denomination Amount</b>	Displays the denomination amount along with the currency.
 icon	Click this icon to delete a row.

### 2.5.4.2 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the TC position (TC outflow) is decreased for logged-in Teller ID, and the TC Position (TC Inflow) is incremented for Vault ID of the branch. It is performed for the combination of Issuer Code, TC Currency, TC Denom code, and Series to the extent of TC denomination units being purchased.

In addition, during transaction completion, the system updates the TC Status as **Null** for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number.

### 2.5.5 Return TC to HO

This screen is used to sell TC to the HO, and only a Vault Teller can access this screen. To process this screen, type **Return TC to HO** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Return TC to HO**.

→ The **Return TC to HO** screen is displayed.

<b>Issuer Code Description</b>	Displays the description of the specified Issuer Code.
<b>Narrative</b>	Displays the narrative as <b>Return TC to HO</b> and it can be modified.

**2.5.5.1 TC Denomination Details**

The **TC Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.5.4.1 TC Denomination Details](#) in this guide.

**2.5.5.2 Transaction Submission**

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the TC position (TC outflow) is decreased for the Vault ID for the combination of Issuer Code, TC Currency, TC Denom code, and Series to the extent of TC denomination units being purchased.

## 2.5.6 Buy Cash from Currency Chest

The Vault Teller can use this screen to get cash from the currency chest after opening the vault batch and deposit it into the vault. Once the cash is transferred from the currency chest, the system updates the cash position.

To process this screen, type **Buy Cash from Ccy Chest** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Buy Cash from Ccy Chest**.

→ The **Buy Cash from Currency Chest** screen is displayed.

**Figure 49: Buy Cash from Currency Chest**

### 2.5.6.1 Main Transaction Details

Specify the details in the **Buy Cash from Currency Chest** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Buy Cash from Currency Chest](#).

**Field Description: Buy Cash from Currency Chest**

Field	Description
<b>Total Required Cash</b>	Specify the total cash that you need to buy from Currency Chest.  <b>NOTE:</b> By default, the system displays the local currency of the branch. You can select another currency

Field	Description
	from the drop-down values in which cash needs to be bought from the currency chest.
Narrative	Displays the default narrative <b>Buy Cash from Currency Chest</b> and it can be modified.

### 2.5.6.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.5.6.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of the Vault Teller is updated successfully.

## 2.5.7 Sell Cash to Currency Chest

The Vault Teller can use this screen to sell cash to the Central Bank from the vault after all the Tellers have sold the additional cash to the Vault Teller. The Vault Teller can close the batch only if the excess cash is not available at the end of the day.

To process this screen, type **Sell Cash to Ccy Chest** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Sell Cash to Ccy Chest**.

→ The **Sell Cash to Currency Chest** screen is displayed.

**Figure 50: Sell Cash to Currency Chest**

### 2.5.7.1 Main Transaction Details

Specify the details in the **Sell Cash to Currency Chest** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Sell Cash to Currency Chest](#).

**Field Description: Sell Cash to Currency Chest**

Field	Description
<b>Total Required Cash</b>	Specify the total cash that you need to sell to the Currency Chest.  <b>NOTE:</b> By default, the system displays the local currency of the branch. The user can select another currency from the drop-down values in which cash needs to be sold to the currency chest.
<b>Narrative</b>	Displays the default narrative <b>Sell Cash to Currency Chest</b> and it can be modified.

### 2.5.7.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.5.7.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of the Vault Teller is updated successfully.

### 2.5.8 Buy Cash from Vault

The Teller can use this screen to get cash from the vault. To process this screen, type **Buy Cash from Vault** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Buy Cash from Vault**.

→ The **Buy Cash from Vault** screen is displayed.

**Figure 51: Buy Cash from Vault**

### 2.5.8.1 Main Transaction Details

Specify the details in the **Buy Cash from Vault** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Buy Cash from Vault](#).

**Field Description: Buy Cash from Vault**

Field	Description
<b>Total Required Cash</b>	Specify the total cash that you need to transfer from the vault to the till of the logged-in Teller.  <b>NOTE:</b> By default, the system displays the local currency of the branch. The user can select another currency from the drop-down values in which cash needs to be transferred from the vault.
<b>Narrative</b>	Displays the default narrative <b>Transfer Cash from Vault</b> and it can be modified.

### 2.5.8.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.5.8.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the accounting entries (For example, Dr Teller Cash GL & Cr Vault Cash GL) for the transaction will be handed off to FCUBS based on the Settlement definition maintained for the function code. Also the cash positions of the Teller is increased and the Vault Teller is decreased successfully.

**NOTE:** If the cash position of the Vault Teller is less than the total cash requested by the Teller, the system displays an error message and the Teller need to perform this transaction after the vault is replenished sufficiently.

## 2.5.9 Sell Cash to Vault

The Teller can use this screen to sell cash to the vault. It is used only when the cash held exceeds the limit set at the template level for any currency. For transferring cash to vault, the Teller batch and the Vault batch need to be opened for the posting date.

To process this screen, type **Sell Cash to Vault** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Sell Cash to Vault**.

→ The **Sell Cash to Vault** screen is displayed.

**Figure 52: Sell Cash to Vault**

### 2.5.9.1 Main Transaction Details

Specify the details in the **Sell Cash to Vault** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Sell Cash to Vault](#).

**Field Description: Sell Cash to Vault**

Field	Description
<b>Total Required Cash</b>	<p>Specify the total cash that you need to transfer to the vault from the till of the logged-in Teller.</p> <p><b>NOTE:</b> By default, the system displays the local currency of the branch. The user can select another currency from the drop-down values in which cash needs to be transferred to the vault.</p>

Field	Description
Narrative	Displays the default narrative <b>Transfer Cash to Vault</b> and it can be modified.

### 2.5.9.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.5.9.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the accounting entries (For example, Dr Vault Cash GL & Cr Teller Cash GL) for the transaction will be handed off to FCUBS based on the Settlement definition maintained for the function code. Also the cash balance of the Teller is decreased and Vault Teller is increased successfully.

## 2.5.10 Buy Cash from Till

The Teller can use this screen to transfer cash from another Teller in case of insufficient funds available in the till to perform the customer cash transactions. Teller can request for the required cash in a specific currency, and on completing this transaction, the system updates the cash position of both the Tellers to the extent of transaction amount.

To process this screen, type **Buy Cash from Till** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Buy Cash from Till**.

→ The **Buy Cash from Till** screen is displayed.

**Figure 53: Buy Cash from Till**

### 2.5.10.1 Main Transaction Details

Specify the details in the **Buy Cash from Till** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Buy Cash from Till](#).

**Field Description: Buy Cash from Till**

Field	Description
<b>Teller ID</b>	Displays the Teller ID from where the cash needs to be transferred.

Field	Description
<b>Total Required Cash</b>	Specify the total cash that you need to transfer from the specified <b>Teller ID</b> to the till of logged-in Teller.  <b>NOTE:</b> By default, the system displays the local currency of the branch. You can select another currency from the drop-down values in which cash needs to be transferred.
<b>Narrative</b>	Displays the default narrative <b>Transfer Cash from Till</b> and it can be modified.

### 2.5.10.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.5.10.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of both the Tellers are updated successfully.

### 2.5.11 Sell Cash to Till

The Teller can use this screen to transfer cash to another Teller in case of excess funds available in his Till. In addition, the Teller can request to transfer from the Till in a specific currency. Once the transaction is completed, the system updates the cash position of both the Tellers to the extent of transaction amount.

To process this screen, type **Sell Cash to Till** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Sell Cash to Till**.

→ The **Sell Cash to Till** screen is displayed.

**Figure 54: Sell Cash to Till**

### 2.5.11.1 Main Transaction Details

Specify the details in the **Sell Cash to Till** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Sell Cash to Till](#).

**Field Description: Sell Cash to Till**

Field	Description
<b>Teller ID</b>	Displays the <b>Teller ID</b> from which the cash needs to be transferred.
<b>Total Required Cash</b>	Specify the total cash that you need to transfer to the specified <b>Teller ID</b> from the till of the logged-in Teller.  <b>NOTE:</b> By default, the system displays the local currency of the branch. The user can select another currency from the drop-down values in which the cash needs to be transferred.
<b>Narrative</b>	Displays the default narrative <b>Transfer Cash to Till</b> and it can be modified.

### 2.5.11.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.5.11.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of both the Tellers are updated successfully.

## 2.5.12 Denomination Exchange

The Teller can use this screen to exchange the currency denominations. The exchange can be performed for internal purpose of the bank or based on the customer's request. This transaction involves only denomination exchange from the Till. The total value in the Till remains the same, and accounting entries are not posted for this exchange. However, the denomination count in the Till changes and hence it needs to be updated.

To process this screen, type **Denomination Exchange** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Denomination Exchange**.

→ The **Denomination Exchange** screen is displayed.

**Figure 55: Denomination Exchange**

### 2.5.12.1 Main Transaction Details

Specify the details in the **Denomination Exchange** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Denomination Exchange](#).

**Field Description: Denomination Exchange**

Field	Description
<b>Branch Code</b>	Displays the logged-in branch code.
<b>Transaction Currency</b>	Specify the currency for which the denominations to be exchanged.

### 2.5.12.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.5.12.3 Transaction Submission

1. Click **Submit** to complete the transaction.

A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of both the Tellers are updated successfully.

## 2.5.13 Interbranch Transactions

This screen is used to send a request from a bank branch to the central cash depository, for pickup or delivery of cash. A branch requests delivery of cash when it is having a shortage of cash and request for pickup of cash when it has excess cash. The process steps to request cash delivery and pickup are explained below.

#### **Process for Cash Delivery:**

1. The requesting branch sends a request for delivery of cash using 1409 screen.
2. The remitting branch queries for the requests, and accepts the request using 1409 screen.

3. On the delivery date, the remitting branch books a transaction using 1410 screen with the denominations being sent and generates.
4. On the delivery date, the remitting branch books a transaction input using 1410 screen, generates advices, and sends money to the requesting branch.
5. On receiving money and advice, the requesting branch uses 1411 screen to verify the denominations and saves the liquidation.

**Process for Cash Pickup:**

1. The requesting branch sends a request for the pickup of cash using 1409 screen.
2. The receiving branch queries for the requests and accepts the request using 1409 screen.
3. On the date of cash pickup, the receiving branch generates an advice and sends to requesting branch.
4. The requesting branch receives the advice, and books transaction using 1410 screen.
5. The requesting branch generates the advice, and sends money and advice to the receiving branch.
6. The receiving branch receives the money and advice, and verifies and liquidates the request using 1411 screen.

### 2.5.13.1 Interbranch Transaction Request

This screen is used to create the inter-branch cash pickup or cash delivery requests. To process this screen, type **Inter Branch Txn Req** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Inter Branch Txn Req**.

→ The **Interbranch Transaction Request** screen is displayed.

**Figure 56: Interbranch Transaction Request**

#### 2.5.13.1.1 Main Transaction Details

Specify the details in the **Interbranch Transaction Request** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Interbranch Transaction Request](#).

**Field Description: Interbranch Transaction Request**

Field	Description
<b>New</b>	Click this button to create a new interbranch transaction and generate the interbranch request reference number.

Field	Description
<b>Query</b>	Click this button to enable the field <b>Inter Branch Request Reference</b> .
<b>Inter Branch Request Reference</b>	<p>The following conditions apply to this field:</p> <ul style="list-style-type: none"> <li>If you click <b>New</b>, the request reference number for the interbranch transaction is displayed.</li> <li>If you click <b>Query</b>, select the interbranch request reference from the list of values. The list of values fetches only the reference numbers that are saved and not submitted.</li> </ul>
<b>Transaction Amount</b>	Select the transaction currency from the option list. Specify the amount that needs to be transferred.
<b>Requesting Branch</b>	Displays the branch code of requesting branch.
<b>Requesting Branch Description</b>	Displays the name of the branch code specified.
<b>To Branch</b>	Select the branch code to which the request is being made.
<b>To Branch Description</b>	Displays the name of the specified <b>To Branch</b> .
<b>Request Type</b>	<p>Select from the following request types:</p> <ul style="list-style-type: none"> <li><b>Cash Delivery</b> - when branch is in short of cash.</li> <li><b>Cash Pickup</b> - when branch has excess cash.</li> </ul>
<b>Request Date</b>	Displays the current date as request date.
<b>Cash Delivery/Pickup Date</b>	Specify the date of cash delivery/pickup. By default, current system date and it can be modified.

Field	Description
<b>Request Status</b>	<p>Select the status of the request. The drop-down list shows following options:</p> <ul style="list-style-type: none"> <li>• <b>Request</b> - to create a new request.</li> <li>• <b>Accept</b> - to accept a request received.</li> <li>• <b>Pending</b> - system defined status indicating that the request has been sent but not accepted.</li> <li>• <b>Initiated</b> - system defined status indicating that the request has been accepted and initiated.</li> <li>• <b>Liquidated</b> - system defined status indicating that the request has been processed and liquidated.</li> </ul>
<b>Narrative</b>	Specify the remarks, if any.

#### 2.5.13.1.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

#### 2.5.13.1.3 Transaction Submission

Click **Submit** to send the request to the receiving/remitting branch for further processing. The destination branch can access the same screen to accept or reject the request.

### 2.5.13.2 Interbranch Transaction Input

This screen is used for a branch to act as a remitting branch to book an input transaction for cash delivery. It is also used for the branch to act as a receiving branch to generate the advice and send it to the requesting branch. This option is allowed only after the destination branch has accepted the Interbranch transaction request.

To process this screen, type **Inter Branch Txn Input** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Inter Branch Txn Input**.

→ The **Inter Branch Transaction Input** screen is displayed.

**Figure 57: Inter Branch Transaction Input**

### 2.5.13.2.1 Main Transaction Details

Specify the details in the **Inter Branch Transaction Input Screen** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Inter Branch Transaction Input](#).

#### Field Description: Inter Branch Transaction Input

Field	Description
<b>Inter Branch Request Reference</b>	Select the request reference from the list of values.
<b>Query</b>	Click this icon to fetch and populate the request details.

Field	Description
<b>From Branch</b>	<p>Displays the branch code of <b>From Branch</b>. The following values are applied based on the request type in the <b>Interbranch Transaction Request</b> screen:</p> <ul style="list-style-type: none"> <li>For <b>Cash Delivery</b>, the <b>To Branch</b> in the <b>Interbranch Transaction Request</b> screen is populated in this field.</li> <li>For <b>Cash Pickup</b>, the <b>Requesting Branch</b> in <b>Interbranch Transaction Request</b> screen is populated in this field.</li> </ul>
<b>From Branch Description</b>	Displays the description of the <b>From Branch</b> .
<b>From Vault ID</b>	Displays the Vault user of the specified <b>From Branch</b> .
<b>To Branch</b>	<p>Displays the branch code of <b>To Branch</b>. The following values are applied based on the request type in the <b>Interbranch Transaction Request</b> screen:</p> <ul style="list-style-type: none"> <li>For <b>Cash Delivery</b>, the <b>Requesting Branch</b> in the <b>Interbranch Transaction Request</b> screen is populated in this field.</li> <li>For <b>Cash Pickup</b>, the <b>To Branch</b> in <b>Interbranch Transaction Request</b> screen is populated in this field.</li> </ul>
<b>To Branch Description</b>	Displays the description of specified <b>To Branch</b> .
<b>To Vault ID</b>	Displays the Vault user of <b>To Branch</b> .
<b>Transaction Amount</b>	Displays the transaction currency and transaction amount based on the request reference.

Field	Description
<b>Requested Date</b>	Displays the date on which the transaction is requested.
<b>Narrative</b>	Specify the remarks, if any.

### 2.5.13.2.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.5.13.2.3 Transaction Submission

Click **Submit** to send the request to the requesting branch for further processing. The request status in **Interbranch Transaction Request** screen will be internally updated to **Initiated** for the related Request Reference Number. In addition, system will post the accounting entries (For example, Dr Sending Branch Inter Branch Transit GL & Cr Sending Branch Vault GL) for the Interbranch Input transaction as per the settlement definition maintained for the function code and an advice will be generated on transaction completion.

### 2.5.13.3 Interbranch Transaction Liquidation

The receiving branch can use this screen to receive the cash, to verify the advices with denomination units, and to liquidate the request. This screen can be accessed by the requesting branch in case of Cash Delivery or by receiving branch for Cash Pickup.

To process this screen, type **Inter Branch Txn Liq** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Inter Branch Txn Liq**.

→ The **Inter Branch Transaction Liquidation** screen is displayed.

**Figure 58: Inter Branch Transaction Liquidation**

### 2.5.13.3.1 Main Transaction Details

Specify the details in the **Inter Branch Transaction Liquidation Screen** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Inter Branch Transaction Input](#).

**Field Description: Inter Branch Transaction Liquidation**

Field	Description
<b>Inter Branch Request Reference</b>	Select the request reference from the list of values.
<b>Query</b>	Click this icon to fetch and populate the request details.
<b>From Branch</b>	Displays the branch code of <b>From Branch</b> .

Field	Description
<b>From Branch Description</b>	Displays the description of the <b>From Branch</b> .
<b>From Vault ID</b>	Displays the Vault user of the specified <b>From Branch</b> .
<b>To Branch</b>	Displays the branch code of <b>To Branch</b> .
<b>To Branch Description</b>	Displays the description of specified To Branch.
<b>To Vault ID</b>	Displays the Vault user of To Branch.
<b>Transaction Amount</b>	Displays the transaction currency and transaction amount based on the request reference.
<b>Requested Date</b>	Displays the date on which the transaction is requested.
<b>Narrative</b>	Specify the remarks, if any.

### 2.5.13.3.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.5.13.3.3 Transaction Submission

When you click **Submit**, the system will post the accounting entries (For example, Dr Receiving Branch Vault Transit GL & Cr Sending Branch Inter Branch Transit GL) for the Interbranch Input transaction as per the settlement definition maintained for the function code . In addition, system updates the request reference as **Liquidated** in **Interbranch Transaction Request** screen for the related request reference.

Note: As the liquidation transaction accounting involves two different branches, the corresponding IB position entries will be processed by FCUBS accordingly.

## 2.6 Customer Transactions

This section describes the various screens used to perform the customer transactions. The screens are described in the following sub-sections:

- [\*2.6.1 Cash Deposit\*](#)
- [\*2.6.2 Cash Withdrawal\*](#)
- [\*2.6.3 Cheque Withdrawal\*](#)
- [\*2.6.4 FX Sale Against Account\*](#)
- [\*2.6.5 FX Sale Against Walk-in\*](#)
- [\*2.6.6 FX Purchase Against Account\*](#)
- [\*2.6.7 FX Purchase Against Walk-in\*](#)
- [\*2.6.8 Close Out Withdrawal\*](#)
- [\*2.6.9 Close Out Withdrawal by Multi-mode\*](#)
- [\*2.6.10 Safe Deposit Rental By Cash\*](#)
- [\*2.6.11 RD Payment by Cash\*](#)
- [\*2.6.12 F23C Tax Payment By Cash\*](#)
- [\*2.6.13 F24C Tax Payment By Cash\*](#)
- [\*2.6.14 F23 Tax Payment By Account\*](#)
- [\*2.6.15 F24 Tax Payment By Account\*](#)

## 2.6.1 Cash Deposit

This screen is used to deposit the cash in a CASA. Cash can be deposited in either account currency or any foreign currency that is allowed. Whenever any transaction in foreign currency is posted to the account, it is converted to the account currency based on the maintained exchange rate for the transaction.

To process this screen, type **Cash Deposit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **Cash Deposit**.

→ The **Cash Deposit** screen is displayed.

**Figure 59: Cash Deposit**

The screenshot displays the 'Cash Deposit' screen with the following fields and controls:

- Account Number \***: A text input field.
- Transaction Amount \***: A field with a currency dropdown (set to 'USD') and a numeric input.
- Exchange Rate**: A numeric input field with up and down arrow buttons.
- Negotiated Exchange Rate**: A numeric input field with up and down arrow buttons.
- Negotiated Reference Number**: A text input field.
- Account Amount**: A disabled numeric input field.
- Total Charge Amount**: A disabled numeric input field.
- Narrative \***: A text area containing the text 'Cash Deposit'.
- Charge Details**: A section header with a right-pointing triangle icon.
- Denomination**: A section header with a right-pointing triangle icon.
- Buttons**: Three buttons at the bottom right: 'Submit', 'Clear', and 'Cancel'.

### 2.6.1.1 Main Transaction Details

Specify the details in the **Cash Deposit** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Cash Deposit](#).

#### Field Description: Cash Deposit

Field	Description
<b>Account Number</b>	Specify a valid account number the customer. When you press <b>Tab</b> key, the corresponding account information will be displayed in the <b>Customer Information</b> widget.  <b>NOTE:</b> In addition, you can use Oracle Banking Virtual Accounts. These Virtual Accounts are used as a routing account to credit the underlying physical account.
<b>Transaction Amount</b>	Displays the local currency of the branch. You can also select other transaction currency from the drop down values. Specify the transaction amount that need to be credited to the customer account.
<b>Negotiated Exchange Rate</b>	Specify the negotiated exchange rate, if it is needed to perform the transaction using negotiated value.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency. If this option is selected, the <b>Negotiated Reference Number</b> field will become mandatory.
<b>Negotiated Reference Number</b>	Specify the reference number for the negotiated cost rate.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency.
<b>Exchange Rate</b>	Displays the exchange rate used to convert the transaction currency into account currency and it can be modified.

Field	Description
	<p><b>NOTE:</b> If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Account Amount</b>	<p>Displays the transaction amount converted in terms of account amount based on the exchange rate.</p> <p><b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Total Charge Amount</b>	<p>Displays the total charge amount, which is computed by the system in local currency of the branch.</p> <p><b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Narrative</b>	<p>Displays the default narrative <b>Cash Deposit</b> and it can be modified.</p>

### 2.6.1.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.6.1.3 Charge Details

**Figure 60: Charge Details**

☒ Charge Details

Total Charges
 Detailed view

Charge Code	Currency	Charge Amount	Waiver	Charge By Cash
-------------	----------	---------------	--------	----------------

No data to display.

The **Charge Details** segment is used to view the computed charge details based on the charge maintenance defined for the function code. This segment is applicable for all Financial Customer transactions. If no charge is maintained for the combination, then transaction is saved without any charges.

You can waive the computed charges. For more information on fields, refer to table [Field Description: Charge Details](#).

**Field Description: Charge Details**

Field	Description
<b>Total Charges</b>	Displays the total charges in transaction currency (TCY) and branch local currency (LCY).
<b>Detailed View</b>	<p>Displays the following charge details of each charge code:</p> <ul style="list-style-type: none"> <li>• Charge Code</li> <li>• Currency</li> <li>• Charge Amount</li> <li>• Waiver</li> <li>• Charge By Cash</li> <li>• Charge TCY</li> <li>• Charge LCY</li> <li>• Basis</li> <li>• Min Charge</li> <li>• Max Charge</li> <li>• Price Rule Id</li> <li>• Credit Account</li> <li>• Debit Account</li> </ul>
<b>Charge Code</b>	The system defaults the charge components applicable to the transaction.
<b>Currency</b>	Displays the currency in which the charge has to be deducted.

Field	Description
<b>Charge Amount</b>	Displays the charge amount that needs to be deducted for the corresponding charge component.
<b>Waiver</b>	<p>If necessary, check this box against the charge component to waive a certain charge for the customer.</p> <p><b>NOTE:</b> Maintain minimum charge as 0 in the charge pricing rule maintenance screen to waive charges.</p>
<b>Charge By Cash</b>	Indicates whether the charges to be collected by Cash.

#### 2.6.1.4 Transaction Submission

Click **Submit** to complete the transaction. Once you **Submit** the transaction, system validates the following:

- Mandatory fields
- Allowed Min/Max limit amount for the User ID
- Allowed currency for Teller User ID
- Till Balance and Branch Breaching Limit
- Function Code preferences
- Duplicate transactions

If any of the validation fails, system will prompt an appropriate information, warning or error message. For more information, refer to the following steps:

- If information message is prompted, click **OK** to confirm and complete the transaction.
- If warning message is prompted, system will move the transaction for authorization. Once approved, the transaction is moved to Teller **Electronic Journal** for completion. Refer Authorization Procedures to know more on authorization processing.
- If any validation error is prompted, you need to update the details to fix the error, and re-submit the transaction.
- If any other error message is prompted, the transaction is discarded and do not get saved.

- If you click **Close** or **Cancel** after specifying the transaction details, then the data will not persist.

When the Teller completes the transaction, the corresponding teller cash position is updated.

→ The **Transaction Completed Successfully** information message is displayed.

## 2.6.2 Cash Withdrawal

This screen is used to withdraw funds from CASA account of the customer. The withdrawal is subject to the availability of sufficient balance or available credit limit. When the transaction is performed, it updates the available balance in the CASA account immediately.

To process this screen, type **Cash Withdrawal** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **Cash Withdrawal**.

→ The **Cash Withdrawal** screen is displayed.

**Figure 61: Cash Withdrawal**

The screenshot displays the 'Cash Withdrawal' screen with the following fields and controls:

- Account Number \***: A text input field.
- Transaction Amount \***: A field with a currency dropdown (set to 'GBP') and a numeric input.
- Exchange Rate**: A numeric input field with up and down arrow buttons.
- Negotiated Exchange Rate**: A numeric input field with up and down arrow buttons.
- Negotiated Reference Number**: A text input field.
- Account Amount**: A disabled text field.
- Total Charge Amount**: A disabled text field.
- Narrative \***: A text area containing the text 'Cash Withdrawal'.
- Charge Details**: A section header with a right-pointing triangle.
- Denomination**: A section header with a right-pointing triangle.
- Buttons**: 'Submit', 'Clear', and 'Cancel' buttons at the bottom right.

**2.6.2.1 Main Transaction Details**

Specify the details in the **Cash Withdrawal** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Cash Withdrawal](#).

**Field Description: Cash Withdrawal**

<b>Field</b>	<b>Description</b>
<b>Account Number</b>	Specify a valid customer account number. When you press <b>Tab</b> key, the corresponding account information will be displayed in the <b>Customer Information</b> widget.
<b>Transaction Amount</b>	Displays the local currency of the branch. The user can select another currency from the drop-down values. Specify the transaction amount that needs to be debited from the customer account.
<b>Negotiated Exchange Rate</b>	Specify the negotiated exchange rate, if it is needed to perform the transaction using negotiated value.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency. If this option is selected, the <b>Negotiated Reference Number</b> field will become mandatory.
<b>Negotiated Reference Number</b>	Specify the reference number for the negotiated cost rate.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency.
<b>Exchange Rate</b>	Displays the exchange rate used to convert the transaction currency into account currency and it can be modified.  <b>NOTE:</b> If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Account Amount</b>	Displays the transaction amount converted in terms of account amount based on the exchange rate.

Field	Description
	<b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Total Charge Amount</b>	Displays the total charge amount, which is computed by the system in local currency of the branch.  <b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Narrative</b>	Displays the default narrative <b>Cash Withdrawal</b> and it can be modified.

### 2.6.2.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.6.2.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.6.2.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the cash is withdrawn successfully from the customer account. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

## 2.6.3 Cheque Withdrawal

This screen is used to withdraw cash from CASA account of the customer against the in-house cheque. The withdrawal is subject to availability of sufficient balance or available credit limit. To

verify the signature for the transactions, you can click **Verify** button in **Customer Information Widget**. The signature verification is applicable for the transactions, which have the **Signature Verification Required** option selected as **Y** at the Function Code Preference level.

To process this screen, type **Cheque Withdrawal** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **Cheque Withdrawal**.

→ The **Cheque Withdrawal** screen is displayed.

**Figure 62: Cheque Withdrawal**

The screenshot displays the 'Cheque Withdrawal' screen with the following fields and controls:

- Account Number \***: Text input field.
- Cheque Number \***: Text input field.
- Exchange Rate**: Input field with up/down arrows.
- Negotiated Reference Number**: Text input field.
- Reject Code**: Text input field with a search icon.
- Narrative \***: Text input field containing 'Cheque Withdrawal'.
- Transaction Amount \***: Input field with a currency dropdown set to 'USD'.
- Cheque Date \***: Date picker showing 'FRI, 27 OCT 24'.
- Negotiated Exchange Rate**: Input field with up/down arrows.
- Account Amount**: Input field.
- Reject Code Description**: Input field.
- Charge Details**: Expandable section.
- Denomination**: Expandable section.
- Buttons**: 'Submit', 'Clear', and 'Cancel' buttons at the bottom right.

### 2.6.3.1 Main Transaction Details

Specify the details in the **Cheque Withdrawal** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Cheque Withdrawal](#).

**Field Description: Cheque Withdrawal**

<b>Field</b>	<b>Description</b>
<b>Account Number</b>	Specify a valid account number the customer. When you press <b>Tab</b> key, the corresponding account information will be displayed in the <b>Customer Information</b> widget.
<b>Transaction Amount</b>	<p>Displays the local currency of the branch. You can select another currency from the drop-down list.</p> <p>Specify the transaction amount that needs to be debited from the customer account.</p>
<b>Cheque Number</b>	Specify the cheque number of the customer account as provided by the Customer.
<b>Cheque Date</b>	Select the date on which cheque has been issued from the calendar option.
<b>Negotiated Exchange Rate</b>	<p>Specify the negotiated exchange rate, if it is needed to perform the transaction using negotiated value.</p> <p><b>NOTE:</b> This field is applicable only if the transaction involves cross currency. If this option is selected, the <b>Negotiated Reference Number</b> field will become mandatory.</p>
<b>Negotiated Reference Number</b>	<p>Specify the reference number for the negotiated cost rate.</p> <p><b>NOTE:</b> This field is applicable only if the transaction involves cross currency.</p>
<b>Reject Code</b>	Select the reject code from the list of values, which are maintained in <b>Reject Code Maintenance</b> screen.

Field	Description
	<p><b>NOTE:</b> If the cheque withdrawal transaction needs to be rejected, you can reject by specifying the appropriate reject code in this field. The transaction can be rejected for any of the following reasons:</p> <ul style="list-style-type: none"> <li>• Insufficient funds</li> <li>• Signature mismatch</li> <li>• Stale cheque</li> </ul>
<b>Reject Code Description</b>	Displays the description of the specified reject code.
<b>Exchange Rate</b>	<p>Displays the exchange rate used to convert the transaction currency into account currency and it can be modified.</p> <p><b>NOTE:</b> If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Account Amount</b>	<p>Displays the transaction amount converted in terms of account amount based on the exchange rate.</p> <p><b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Narrative</b>	Displays the default narrative <b>Cash Withdrawal</b> and it can be modified.

### 2.6.3.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.6.3.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.6.3.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the cash is withdrawn successfully against the customer cheque. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

## 2.6.4 Foreign Exchange (FX) Sale Against Account

This screen is used to sell the foreign currency from the branch through the CASA account. It is performed by debiting the corresponding account currency from the CASA account.

To process this screen, type **FX Sale - Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **FX Sale - Account**.

→ The **FX Sale Against Account** screen is displayed.

### 2.6.4.1 Main Transaction Details

Specify the details in the **FX Sale Against Account** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: FX Sale Against Account](#).

**Field Description: FX Sale Against Account**

Field	Description
<b>Account Number</b>	Specify the CASA account to be debited for the foreign currency sale from the adjacent option list.
<b>Amount Sold</b>	Specify the currency and amount sold against the CASA account. You can select the appropriate code from the adjoining option list that displays all the currency codes maintained in the system. The system also displays the amount that is being sold.
<b>Allow Denom Variance</b>	<p>Select if the denomination wise variance needs to be applied for the transaction.</p> <p><b>NOTE:</b> If the parameter at function code indicator is set as <b>Y</b>, this option will be selected by default and it can be modified. If the parameter at function code indicator is set as <b>N</b>, then this option will be disabled.</p>
<b>Beneficiary Name</b>	Displays the name of the beneficiary customer based on the account number selected.
<b>Address Line 1 to Address Line 4</b>	Displays the address of the beneficiary.
<b>Identification Type</b>	Select the type of identification provided by the customer from the drop-down list.
<b>Identification Number</b>	Specify the identification number provided by the customer.

Field	Description
<b>Negotiated Exchange Rate</b>	<p>Specify the negotiated exchange rate, if it is needed to perform the transaction using negotiated value.</p> <p><b>NOTE:</b> This field is applicable only if the transaction involves cross currency. If this option is selected, the <b>Negotiated Reference Number</b> field will become mandatory.</p>
<b>Negotiated Reference Number</b>	<p>Specify the reference number for the negotiated cost rate.</p> <p><b>NOTE:</b> This field is applicable only if the transaction involves cross currency.</p>
<b>Exchange Rate</b>	<p>Displays the exchange rate used to convert the transaction (sale) currency into account currency and it can be modified.</p> <p><b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Amount Received</b>	<p>Displays the amount received and currency from the CASA account.</p> <p><b>NOTE:</b> The currency of the amount received is defaulted from the CASA account currency. The amount received will be calculated based on the <b>Amount Sold</b> and the <b>Exchange Rate</b>. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Total Charges</b>	<p>Displays the total charge amount which is computed by the system in local currency of the branch.</p> <p><b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>

Field	Description
Narrative	Displays the default narrative <b>FX Sale Against Account</b> and it can be modified.

### 2.6.4.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.6.4.3 FX Out Denomination Details

The **FX Out Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the FX denomination units. The currency code and corresponding denomination codes will be defaulted based on Currency Sold. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.6.4.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the FCY cash is withdrawn and the equivalent account amount is debited. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

## 2.6.5 FX Sale Against Walk-in

This screen is used to sell a foreign currency to a walk-in customer in return for the equivalent amount received in another currency.

To process this screen, type **FX Sale - Walk-in** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **FX Sale - Walk-in**.

→ The **FX Sale Against Walk-in** screen is displayed.

Narrative	Displays the default narrative <b>FX Sale (Walk-in)</b> and it can be modified.

### 2.6.5.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.6.5.3 FX Out Denomination Details

The **FX Out Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the FX Out denomination units. The currency code and corresponding denomination codes will be defaulted based on Currency Sold. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.6.5.4 FX In Denomination Details

The **FX In Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the FX In denomination units. The currency code and corresponding denomination codes will be defaulted based on Currency Received. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.6.5.5 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the teller cash position to the equivalent of Sold currency is deducted and Received currency is incremented. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

## 2.6.6 FX Purchase Against Account

This screen is used to purchase foreign currency from the branch through the CASA account. It is performed by crediting the corresponding amount to CASA account.

To process this screen, type **FX Purchase - Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **FX Purchase - Account**.

→ The **FX Purchase Against Account** screen is displayed.

<b>Narrative</b>	<p>Displays the default narrative <b>FX Purchase (Walk-in)</b> and it can be modified.</p>

### 2.6.7.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.6.7.3 FX In Denomination Details

The **FX In Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the FX In denomination units. The currency code and corresponding denomination codes will be defaulted based on Currency Bought. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.6.7.4 FX Out Denomination Details

The **FX Out Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the FX Out denomination units. The currency code and corresponding denomination codes will be defaulted based on Currency Paid. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.6.7.5 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the teller cash position is updated based on the currency of the **Amount Bought** and the **Amount Paid** fields. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

## 2.6.8 Close Out Withdrawal

This screen is used to initiate an account closure and close the CASA account by either dispersing the cash to the customer or by account transfer or by issuing Bankers Cheque. The balance amount displayed is only the available balance from Oracle Flexcube Universal Banking and Oracle Banking Branch does not consider the closeout withdrawal charges configured in Oracle Flexcube Universal Banking. In case charges are required to be displayed in Oracle Banking Branch, Oracle Banking Branch also supports charges which can be configured.

To process this screen, type **Closure - Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **Closure Account**
  - The **Close Out Withdrawal** screen is displayed.
  - Two buttons **New** and **Query** is displayed. **New** is used to initiate the account closure and **Query** is used to complete the account closure.

### 2.6.8.1 New Transaction

Click on **New** to initiate the new closure request.

Figure 67: Close Out Withdrawal

## 2.6.8.1.1

## Main Transaction Details

Specify the details in the **Close Out Withdrawal** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Close Out Withdrawal](#) by Cash.

## Field Description: Close Out Withdrawal by Cash

Field	Description
<b>Customer Account</b>	Specify the account number for which the account closure to be requested.
<b>Account Name</b>	Displays the name of the specified account number.
<b>Account Amount</b>	Displays the account balance in account currency.
<b>Narrative</b>	Displays the default narrative <b>Close Out Withdrawal</b> and it can be modified.

### 2.6.8.1.2 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated, and the **Transaction Submitted Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the transaction details are handed off to CASA module in the FLEXCUBE Universal Banking for account closure process. During account closure process, the closure amount will be parked in the intermediary suspense GL specified during transaction request handoff.

**NOTE:** Maintain Close mode as CASH and linked product as ZRCD in Account Closing Maintenance (STDCLSM) in FCUBS. This maintenance will ensure the funds are parked to the respective suspense GL during the account closure process at FCUBS.

### 2.6.8.2 Query Transaction

Click on **Query** to query and fetch the initiated closure request for completion. Select the Transaction Reference Number or Account number for which the closure is initiated. On tab out, system display the closure amount details. Select the Close mode of the transaction that has values – Cash, Account and Bankers Cheque. Based on the mode selected, the corresponding Main transaction details will be displayed for input.

#### 2.6.8.2.1 Main Transaction Details (Close out Withdrawal by Cash)

Specify the details in the **Close Out Withdrawal by Cash** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Close Out Withdrawal by Cash](#).

**Field Description: Close Out Withdrawal by Cash**

Field	Description
<b>Customer Account</b>	Display the account number for which the account closure to be requested.
<b>Account Name</b>	Displays the name of the specified account number.
<b>Account Balance</b>	Display the account balance details.

Field	Description
<b>Account Amount</b>	Displays the account balance in account currency.
<b>Transaction Amount</b>	<p>Specify the currency in which the customer requested the cash. The system displays the derived transaction amount based on the exchange rate fetched using account currency and transaction currency. The transaction amount is the account amount deducted with total charges.</p> <p><b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Exchange Rate</b>	<p>Displays the exchange rate based on the Account Currency and Offset Account Currency.</p> <p><b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Total Charge Amount</b>	<p>Displays the total charge amount, which is computed by the system in local currency of the branch. This amount will be deducted from the Intermediary Suspense GL.</p> <p><b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Narrative</b>	Displays the default narrative <b>Close Out Withdrawal by Cash</b> and it can be modified.

### 2.6.8.2.2 2.6.8.2.1. 2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.6.8.2.3 Main Transaction Details (Close out Withdrawal by Account)

Specify the details in the **Close Out Withdrawal** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Close Out Withdrawal by Cash Account Transfer](#).

**Field Description: Close Out Withdrawal by Account Transfer**

Field	Description
<b>Close Account</b>	Specify the account number for which the account closure to be requested.
<b>Account Amount</b>	Displays the account balance in account currency.
<b>Close Mode</b>	Display the close mode as Account Transfer.
<b>Credit Account</b>	Specify the account number to which the funds needs to be transferred during the account closure.
<b>Credit Account Branch</b>	Displays the branch code of the offset account.
<b>Credit Account Name</b>	Displays the name of the offset account.
<b>Credit Account Amount</b>	Displays the offset account amount along with account currency.
<b>Exchange Rate</b>	<p>Displays the exchange rate based on the Account Currency and Offset Account Currency, and it can be modified.</p> <p><b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>

Field	Description
<b>Total Charge Amount</b>	Displays the total charge amount, which is computed by the system in local currency of the branch. The total charge amount will be deducted from the Intermediary Suspense GL.  <b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as Y.
<b>Narrative</b>	Displays the default narrative <b>Close Out Withdrawal by Account</b> and it can be modified.

#### 2.6.8.2.4 Main Transaction Details (Bankers Cheque)

Specify the details in the **Close Out Withdrawal by Bankers Cheque** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Error! Reference source not found.](#)

##### Field Description: Close Out Withdrawal by Bankers Cheque

Field	Description
<b>Account Number</b>	Specify the account number for which the account closure to be requested.
<b>Account Amount</b>	Displays the account balance in account currency.
<b>Close Mode</b>	Display the close mode as <b>Bankers Cheque</b> .
<b>Issue Branch</b>	Displays the issuing branch of the bankers cheque.
<b>BC Amount</b>	Displays the account currency and account balance. You can also modify the account currency.
<b>Instrument Number</b>	Specify the instrument number.

Field	Description
<b>MICR Number</b>	Specify the MICR number.
<b>Payee Name</b>	Specify the payee name.
<b>Address Line 1 to Address Line 4</b>	Specify the address of the payee.
<b>Exchange Rate</b>	<p>Displays the exchange rate used to convert the transaction currency into account currency and it can be modified.</p> <p>This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Total Charge Amount</b>	<p>Displays the total charge amount, which is computed by the system in local currency of the branch.</p> <p><b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Narrative</b>	<b>NOTE:</b> Displays the default narrative <b>BC Withdrawal</b> and it can be modified.

### 2.6.8.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.6.8.4 Transaction Completion

- Click **Submit** to complete the transaction.

On transaction submission, the transaction status is updated as Completed and accounting details are handed off to FLEXCUBE Universal Banking to transfer the funds to the selected closure mode(Cash GL/Account/BC Issuance GL). In case of Closure mode is Cash, Till gets updated based on the outgoing amount.

## 2.6.9 Close Out Withdrawal by Multi-mode

This screen is used to close the CASA account by multi-mode payout options, which includes cash, account transfer, and BC. It can be used only when the closeout withdrawal needs to be done in multiple payout modes. The balance amount displayed is only the available balance from Oracle Flexcube Universal Banking and Oracle Banking Branch does not consider the closeout withdrawal charges configured in Oracle Flexcube Universal Banking. In case charges are required to be displayed in Oracle Banking Branch, Oracle Banking Branch also supports charges which can be configured.

To process this screen, type **Close Out Withdrawal By Multi Mode** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **Close Out Withdrawal By Multi Mode**.

→ The **Close Out Withdrawal By Multi Mode** screen is displayed.

**Figure 68: Close Out Withdrawal By Multi Mode**

### 2.6.9.1 Main Transaction Details

Specify the details in the **Close Out Withdrawal By Multi Mode** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Close Out Withdrawal By Multi Mode](#).

**Field Description: Close Out Withdrawal By Multi Mode**

<b>Field</b>	<b>Description</b>
<b>Close Account</b>	Specify the account number, which needs to be closed.
<b>Fetch Balance</b>	Click this button to fetch and display the account amount.
<b>Account Amount</b>	Displays the account amount.
<b>+ icon</b>	Click this icon to add a new row.
<b>- icon</b>	Click this icon to delete a row, which is already added.
<b>Payout Type</b>	<p>Select the payout type from the following drop-down values:</p> <ul style="list-style-type: none"> <li>• <b>Account</b> – If it is selected, user need to specify the <b>Offset Account</b>, to which the transfer to be made. Based on the specified offset account number, the system will default the <b>Offset Branch</b> and <b>Offset Currency</b> fields.</li> <li>• <b>Cash</b> – If it is selected, user need to disburse the cash in the account currency.</li> <li>• <b>Bankers Cheque</b> - If it is selected, either the field <b>Instrument Number</b> is populated or teller can input the value. On submission, the system will validate the instrument number if inputted or derives the instrument number in case of null value. In addition, user needs to capture the BC related details in the <b>Bankers Cheque Details</b> data segment. This data segment is mandatory only if the <b>Payout Type</b> is selected as <b>Bankers Cheque</b>.</li> </ul>

Field	Description
<b>Percentage</b>	Specify the amount of redemption for the payout type selected.  <b>NOTE:</b> Based on the percentage input, system will derive the amount to be paid out.
<b>Amount</b>	Specify the amount needs to be withdrawn in the payout type selected.
<b>Instrument Number</b>	Specify the BC number.  <b>NOTE:</b> This field is applicable only if the <b>Payout Type</b> is selected as <b>Bankers Cheque</b> .
<b>Issuing Branch</b>	Displays the branch code of the specified account number.
<b>Offset Account</b>	Specify the account number to which the payout amount need to be transferred.  <b>NOTE:</b> This field is applicable only if the <b>Payout Type</b> is selected as <b>Account</b> .
<b>Offset Branch</b>	Displays the branch of the specified offset account number.  <b>NOTE:</b> This field is applicable only if the <b>Payout Type</b> is selected as <b>Account</b> .
<b>Offset Currency</b>	Displays the currency of the specified offset account number.  <b>NOTE:</b> This field is applicable only if the <b>Payout Type</b> is selected as <b>Account</b> .
<b>Narrative</b>	Displays the default narrative <b>Close Out Withdrawal by Multimode</b> and it can be modified.

### 2.6.9.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.6.9.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.6.9.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the transaction details are handed off to CASA module in the FLEXCUBE Universal Banking for account closure process. Once the below conditions are met, the transaction status will be changed from **Pending** to **Completed**:

- Account closure confirmation from FLEXCUBE Universal Banking by crediting the account balance to an intermediary bridge GL.

Based on the payout options, the corresponding transaction will be completed successfully.

### 2.6.10 Safe Deposit Rental By Cash

The Teller can use this screen to make payment for the safe deposit locker of the customer. To process this screen, type **Safe Deposit Rental By Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transactions**, click **Safe Deposit Rental By Cash**.  
  
→ The **Safe Deposit Rental By Cash** screen is displayed.

### 2.6.10.1 Main Transaction Details

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Safe Deposit Rental By Cash](#).

**Field Description: Safe Deposit Rental By Cash**

Field	Description
<b>Deposit Locker</b>	Specify the deposit locker number. When you press <b>Tab</b> key, the customer details and deposit locker details will be displayed in the <b>Customer Information</b> widget.
<b>Rental Amount</b>	<p>Select the rental amount currency and specify the amount.</p> <p><b>NOTE:</b> By default, the rental currency is displayed as locker currency. If the <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b>, it can be modified, and if it is <b>N</b>, then the default value cannot be modified.</p>
<b>Exchange Rate</b>	<p>Displays the exchange rate.</p> <p><b>NOTE:</b> If the transaction currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b>.</p>
<b>Total Charge Amount</b>	<p>Displays the total charges in branch local currency.</p> <p><b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code indicator level is set as <b>Y</b>.</p>

Field	Description
<b>Account Amount</b>	<p>Displays the rental amount in locker account currency. This amount will be derived based on the <b>Rental Amount</b> and <b>Exchange Rate</b>.</p> <p><b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as Y.</p>
<b>Narrative</b>	<p>Displays the narrative as <b>Safe Deposit Rental By Cash</b> and it can be modified.</p>

### 2.6.10.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.6.10.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the system will handoff the details to FLEXCUBE Universal Banking system to create 'Payment' transaction in SD module. After the handoff status is success in the Oracle Banking Branch, the system will update the transaction status as **Completed** and update the Till cash position (by increasing the till balance).

### 2.6.11 RD Payment by Cash

This screen is used to make payment against the Recurring Deposit (RD) account of the customer. To process this screen, type **RD Payment – Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **RD Payment – Cash**.  
  
→ The **Recurring Deposit Payment by Cash** screen is displayed.

#### 2.6.11.1 Main Transaction Details

Specify the details in the **Recurring Deposit Payment by Cash** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Recurring Deposit Payment by Cash](#).

**Field Description: Recurring Deposit Payment by Cash**

<b>Field</b>	<b>Description</b>
<b>RD Account</b>	Specify a valid RD account number. When you press <b>Tab</b> key, the corresponding account information will be displayed in the <b>Customer Information</b> widget.
<b>Installments</b>	Specify the number of installments.
<b>Transaction Amount</b>	Displays the local currency of the branch. The user can select another currency from the drop-down values. Specify the payment amount.
<b>Exchange Rate</b>	Displays the exchange rate used to convert the transaction currency into account currency and it can be modified.  <b>NOTE:</b> If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Account Amount</b>	Displays the transaction amount converted in terms of account amount based on the exchange rate.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Total Charge Amount</b>	Displays the total charge amount, which is computed by the system in local currency of the branch.  <b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b> .

Field	Description
Narrative	Displays the default narrative <b>RD Payment by Cash</b> and it can be modified.

### 2.6.11.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.6.11.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.6.11.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the cash is withdrawn successfully from the customer account. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

## 2.6.12 F23C Tax Payment By Cash

This screen is used to capture data related to F23C tax document for a customer and collect the corresponding tax by cash from the customer. To process this screen, type **F23C Tax Payment - Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, navigate to left menu and click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **F23C Tax Payment - Cash**.

→ The **F23C Tax Payment By Cash** screen is displayed.

**Figure 71: F23C Tax Payment By Cash Screen**

The screenshot shows the 'F23C Tax Payment By Cash' screen with the following fields and sections:

- Reference Number Type \*** (dropdown)
- Reference Number Available** (dropdown)
- Reference Number Available** (section header)
- Reference Number** (text input)
- Office or Institute Sub Code** (text input)
- Office or Institute Code** (text input)
- Litigation** (text input)
- Additional Details** (section header)
- Total Tax Amount \*** (text input)
- Total Charge** (text input)
- Narrative \*** (text input)
- F23 Tax by Cash** (text input)
- Exchange Rate** (text input with up/down arrows)
- Payment Amount \*** (text input)
- Payment Data Details** (expandable section)
- Charge Details** (expandable section)
- Denomination** (expandable section)
- Buttons:** Submit, Clear, Cancel

### 2.6.12.1 Main Transaction Details

Specify the details in the **F23C Tax Payment By Cash** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: F23C Tax Payment By Cash Screen](#).

**Field Description: F23C Tax Payment By Cash Screen**

Field	Description
<b>Reference Number Type</b>	Select the reference number types from the drop-down list. The drop-down list shows following values:

Field	Description
	<ul style="list-style-type: none"> <li>• <b>Reference Number Available</b></li> <li>• <b>Reference Number Not Available</b></li> </ul>
<b>Reference Number</b>	Specify the Reference Number of the payment provided by the Public Authority.
<b>Office or Institute Code</b>	Specify the office or institute code that receives the payment.
<b>Office or Institute Sub code</b>	Specify the office or institute sub code that receives the payment.
<b>Litigation</b>	Specify the kind of litigation.
<b>For a Total Amount</b>	Displays the total tax amount.
<b>Total Charge</b>	Displays the total charge amount, which is computed by the system in local currency of the branch.
<b>Exchange Rate</b>	Displays the exchange rate based on the Account Currency and Offset Account Currency.
<b>Payment Amount</b>	<p>Displays the amount paid by the customer.</p> <p><b>NOTE:</b> The currency of the amount paid is defaulted from received currency.</p>
<b>Narrative</b>	Displays the default narrative <b>F23 Tax by Cash</b> and it can be modified.

## 2.6.12.2 Payment Data Details

Figure 72: Payment Data Details

Select	Tax Code	Amount	Beneficiary Code
<input type="checkbox"/>			

Page 1 of 1 (1 of 1 items) < 1 >

Pickup

Specify the details in the **Payment Data Details** segment. For more information on fields, refer to table [Field Description: Payment Data Details](#).

Field Description: Payment Data Details

Field	Description
<b>Tax Code</b>	Specify the Tax Code.
<b>Amount</b>	Specify the tax amount.
<b>Beneficiary Code</b>	Specify the beneficiary institute code.

## 2.6.12.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

## 2.6.12.4 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.6.12.5 Transaction Submission

After you specify the **Reference Number**, click on the **Pickup** button. The system defaults the **Elaboration Date** in the section **Reference Number Available** with the current system date. In case you do not specify the **Reference Number**, then the **Principal Fiscal Code** needs to be specified. After which the system defaults the **Elaboration Date** in the section **Reference Number Not Available** with the current system date. It then adds up the Amounts in the **Payment Data Details** block and defaults the sum in the **For a total Amount** field. The system posts the following accounting entries on save and authorization of the record:

Accounting entries posted for the payment amount:

Dr/Cr	Description	Amount
Dr	Cash Account	For a Total Amount
Cr	Account maintained in ARC of the associated product	For a Total Amount

Accounting entries posted for the charge amount:

Dr/Cr	Description	Amount
Dr	Cash Account	Charges amount computed as per ARC maintenance
Cr	Account maintained in ARC of the associated product	Charges amount computed as per ARC maintenance

### 2.6.12.6 Validations

The following validations are performed by the system:

- The system allows you to maintain a minimum of one row and a maximum of eight rows in the **Payment Data Details** multi entry block. If you do not maintain the minimum row or exceed the maximum row, then the system displays an appropriate error message.

- If the **Principal Fiscal Code** and **Secondary Fiscal Code** fields have a value of 16 character that is for non-individual customers the system validates the last character in the value as per the checksum algorithm for Fiscal Code. If the validation fails, then the system displays an appropriate error message. In case of individual customers, where the **Principal Fiscal Code** and **Secondary Fiscal Code** field has a value of 11 character, the system validates the last character in the value as per the checksum algorithm for VAT number. If the validation fails, then the system displays an appropriate error message.
- The system validates only the data format of the fields specified.
- If the computed value for **Payment Amount** field value is less than or equal to 0, on pickup, the system displays an appropriate error message.

Once Pickup is completed, do the following step:

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the deposit of tax amount is completed successfully.

## 2.6.13 F24C Tax Payment By Cash

This screen is used to capture data related to F24C tax document for a customer and collect the corresponding tax by cash from the customer. To process this screen, type **F24C Tax Payment - Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, navigate to left menu and click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **F24C Tax Payment - Cash**.

→ The **F24C Payment Details** screen is displayed.

**Figure 73: F24C Payment Details Screen**

### 2.6.13.1 Main Transaction Details

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: F24C Payment Details](#).

**Field Description: F24C Payment Details**

Field	Description
<b>Total Tax Amount</b>	Displays the total tax amount.
<b>Payment Amount</b>	Displays the Amount to Pay.

Field	Description
<b>Total Tax Amount</b>	Displays the total tax amount.
<b>Narrative</b>	Displays the default narrative F24 Tax by Cash and it can be modified.
<b>Total Charge</b>	Displays the total charge.

### 2.6.13.2 F24 Tax - By Cash (Standard)

Specify the details in the **F24 Tax – By Cash** segment. Based on the Form Type selection, the input fields will be displayed on this segment.

#### 2.6.13.2.1 F24 Standard Details

**Figure 74: F24 Standard Details**

The screenshot shows a web form titled "F24 Tax - By Cash". At the top, there is a "Form Type" dropdown menu set to "Standard". Below this, the "F24 Standard" section contains several input fields:

- Elaboration Date:** A date field showing "Mar 26, 2020" with a calendar icon.
- Secondary Fiscal Code:** A text input field.
- Total Final Payment:** A text input field.
- Final Payment Fields:** A group of fields including "Erario Institution", "Region Institution", "Inail Institution", and "Accise", each with a text input field.
- Principal Fiscal Code:** A text input field marked with an asterisk (\*).
- Identity code secondary fiscal code:** A text input field.
- Different Tax Year:** A text input field.
- INPS Institution:** A text input field.
- Local Institution:** A text input field.
- Other Institution:** A text input field.

Specify the details in this segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: F24 Standard](#).

#### Field Description: F24 Standard

### 2.6.13.4 F24 Tax - By Cash (Elide)

Specify the details in the F24 Tax – By Cash segment. Based on the Form Type selection, the input fields will be displayed on this segment.

**Figure 83: F24 Elide Details**

Specify the details in this segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: F24 Elide](#).

#### Field Description: F24 Elide

Field	Description
<b>Form Type</b>	Select the Elide tax category from the adjoining drop-down list.
<b>F24 Elide</b>	Specify the fields.
<b>Elaboration Date</b>	Displays the elaboration date
<b>Principal Fiscal Code</b>	Specify the debtor fiscal code.  <b>NOTE:</b> For Individual customers, the allowed principal fiscal code is 16 characters and for non-individual customers, this will be 11-character VAT number.

Field	Description
<b>Secondary Fiscal Code</b>	Specify the secondary fiscal code.  <b>NOTE:</b> For Individual customers, the allowed secondary fiscal code is 16 characters and for non-individual customers, this will be 11-character VAT number.
<b>Identity Code Secondary Fiscal Code</b>	Specify the Identity code secondary fiscal code.
<b>Type of Vehicle/ Element</b>	Specify the vehicle type.
<b>Vehicle/ Element ID</b>	Specify the vehicle ID.
<b>Tax Code</b>	Specify the tax code.
<b>Year</b>	Specify the year.
<b>Debit Amount</b>	Specify the amount to be paid.
<b>Office Code</b>	Specify the office code.
<b>Document Code</b>	Specify the document code.
<b>Total Debit Amount</b>	Displays the Total Amount to Pay.
<b>Final Section Amount</b>	Displays the Final Section Amount.

### 2.6.13.5 F24 Tax - By Cash (Predefined)

Specify the details in the F24 Tax – By Cash segment. Based on the Form Type selection, the input fields will be displayed on this segment.

**Figure 84: F24 Predefined Details**

The screenshot shows the 'F24 Tax - By Cash' form. At the top, 'Form Type' is set to 'Predefined'. Below this, the 'F24 Predefined' section contains 'Elaboration Date' (Mar 26, 2020), 'Secondary Fiscal Code', and 'Total Final Payment'. The 'Final Payment Fields' section includes 'Erario Institution'. The 'Tax Details' section features a table with columns 'Payment ID' and 'Amount to Pay', currently showing 'No data to display'. At the bottom, there are fields for 'Total Debit Amount' and 'Final Section Amount'. Mandatory fields are indicated by an asterisk (\*).

Specify the details in this segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: F24 Predefined](#).

**Field Description: F24 Predefined**

Field	Description
<b>Form Type</b>	Select the Predefined tax category from the adjoining drop-down list.
<b>F24 Predefined</b>	Specify the fields.
<b>Elaboration Date</b>	Displays the elaboration date

Field	Description
<b>Principal Fiscal Code</b>	Specify the debtor fiscal code.  <b>NOTE:</b> For Individual customers, the allowed principal fiscal code is 16 characters and for non-individual customers, this will be 11-character VAT number.
<b>Secondary Fiscal Code</b>	Specify the secondary fiscal code.  <b>NOTE:</b> For Individual customers, the allowed secondary fiscal code is 16 characters and for non-individual customers, this will be 11-character VAT number.
<b>Identity Code Secondary Fiscal Code</b>	Specify the Identity code secondary fiscal code.
<b>Erario Institution</b>	Displays the Erario Institution.
<b>Payment ID</b>	Specify the payment ID.
<b>Amount to Pay</b>	Specify the amount to be paid.
<b>Total Debit Amount</b>	Displays the Total Debit Amount.
<b>Final Section Amount</b>	Displays the Final Section Amount.

### 2.6.13.6 Transaction Submission

On selection of an appropriate value from the **Form Type**, only the corresponding tab will be enabled for input. For example, if you select **F24 Standard** as the Form Type then only the tab **F24 Standard** will be enabled and all other tabs will be disabled. The **Principal Fiscal Code** needs to be specified. After entering all the form details, user need to click on Refresh button in the **F24 Payment Details** block .It then adds up the Amounts and defaults the sum in the **Payment Amount** field. The system posts the following accounting entries on save and authorization of the record.

Accounting entries posted for the payment amount:

Dr/Cr	Description	Amount
Dr	Cash Account	Final Section Amount of the corresponding tab which has been entered.
Cr	Account maintained in ARC of the associated product	Final Section Amount of the corresponding tab which has been entered.

Accounting entries posted for the charge amount:

Dr/Cr	Description	Amount
Dr	Cash Account	Charges amount computed as per ARC maintenance
Cr	Income Account	Charges amount computed as per ARC maintenance

### 2.6.13.7 Validations

The system validates only the data format of the fields specified. If any of such validations fail, the system displays an appropriate error message. If you maintain more than the specified number of rows in any of the below blocks then the system displays an appropriate error message. The following list shows the number of rows, which can be maintained for each Form Type:

- In **F24 Standard** tab, the system allows you to maintain only the following number of records:
  - up to a maximum of 6 rows in the **ERARIO** multi record block.
  - up to a maximum of 4 rows in the **INPS** multi record block.
  - up to a maximum of 4 rows in the **REGIONI** multi record block.
  - up to a maximum of 4 rows in the **IMU E ALTRI ENTI LOCALI** multi record block.
  - up to a maximum of 4 rows in the **INAIL** multi record block.

- up to a maximum of 3 rows in the **ALTRI ENTI** multi record block.
- up to a maximum of 7 rows in the **ACCISE** multi record block.
- In **F24 Simplified** tab up to a maximum of 10 rows in the **Tax Details** multi record block.
- In **F24 Elide** tab up to a maximum of 28 rows in the **Tax Details** multi record block.
- In **F24 Predefined** tab up to a maximum of 1 row in the **Tax Details** multi record block.

If the computed value for **Payment Amount** field value is less than or equal to 0, the system displays an appropriate error message. If the **Principal Fiscal Code** and **Secondary Fiscal Code** fields have, a value of 16, character that is for non-individual customers the system validates the last character in the value as per the checksum algorithm for **Fiscal Code**. If the validation fails, then the system displays an appropriate error message. In case of individual customers, where the **Principal Fiscal Code** and **Secondary Fiscal Code** field has a value of 11 character, the system validates the last character in the value as per the checksum algorithm for VAT number. If the validation fails, then the system displays an appropriate error message.

Once Pickup is completed, do the following step:

1. Click **Submit** to complete the transaction.
  - A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the deposit of tax amount is completed successfully.

## 2.6.14 F23 Tax Payment By Account

This screen is used to capture data related to F23 tax document for a customer and collect the corresponding tax by cash from the customer. To process this screen, type **F23 Tax Payment By Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, navigate to left menu and click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **F23 Tax Payment By Account**.

→ The **F23 Tax Payment By Account** screen is displayed.

**Figure 85: F23A Tax Payment By Account**

The screenshot shows the 'F23 Tax Payment By Account' screen. At the top, there's a title bar with a close button and the text 'F23 Tax Payment By Account'. Below this, the form is organized into several sections. The first section, 'Reference Number Type', has a dropdown menu currently set to 'Reference Number Available'. Below this is the 'Reference Number Available' section, which includes 'Reference Number' and 'Office or Institute Sub Code' text boxes. To the right of these are 'Office or Institute Code' and 'Litigation' text boxes. The next section is 'Additional Details', which contains 'Total Tax Amount', 'Total Charge', and 'Narrative' text boxes. To the right of these are 'Exchange Rate' (with up/down arrows) and 'Payment Amount' text boxes. Below the main form area are three expandable sections: 'Account Details', 'Payment Data Details', and 'Charge Details', each with a right-pointing arrow. At the bottom right of the screen are three buttons: 'Submit', 'Clear', and 'Cancel'.

### 2.6.14.1 Main Transaction Details

Specify the details in the **F23 Tax Payment By Account** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: F23 Tax Payment By Account](#).

**Field Description: F23 Tax Payment By Account**

<b>Field</b>	<b>Description</b>
<b>Reference Number Type</b>	<p>Select the reference number types from the drop-down list. The drop-down list shows following values:</p> <ul style="list-style-type: none"> <li>• <b>Reference Number Available</b></li> <li>• <b>Reference Number Not Available</b></li> </ul>
<b>Reference Number</b>	Specify the Reference Number of the payment provided by the Public Authority.
<b>Office or Institute Code</b>	Specify the office or institute code that receives the payment.
<b>Office or Institute Sub code</b>	Specify the office or institute sub code that receives the payment.
<b>Litigation</b>	Specify the kind of litigation.
<b>For a Total Amount</b>	Displays the total tax amount.
<b>Total Charge</b>	Displays the total charge amount, which is computed by the system in local currency of the branch.
<b>Exchange Rate</b>	Displays the exchange rate based on the Account Currency and Offset Account Currency.
<b>Payment Amount</b>	<p>Displays the amount paid by the customer.</p> <p><b>NOTE:</b> The currency of the amount paid is defaulted from received currency.</p>
<b>Narrative</b>	Displays the default narrative <b>F23 Tax by Account</b> and it can be modified.

## 2.6.14.2 Account Details

**Figure 86: Account Details**

The screenshot shows a software window titled "Account Details". Inside the window, there are five input fields arranged in two columns. The first column contains "Account Number" (with a red asterisk), "Account Description", and "Net Amount". The second column contains "Branch" and "Account Amount". The "Account Amount" and "Net Amount" fields are currently disabled, indicated by a light gray background.

Specify the details in the **Account Details** segment. For more information on fields, refer to table [Field Description: Account Details](#).

### Field Description: Account Details

Field	Description
<b>Account Number</b>	Specify the customer account number from which the tax is being paid.
<b>Branch</b>	Displays the branch code.
<b>Account Description</b>	Displays the description of the account number specified.
<b>Account Amount</b>	Displays the amount available in the account.
<b>Net Amount</b>	Displays the amount, which is the net of total amount levied to the customer.

### 2.6.14.3 Payment Data Details

**Figure 87: Payment Data Details**

Specify the details in the **Payment Data Details** segment. For more information on fields, refer to table [Field Description: Payment Data Details](#).

**Field Description: Payment Data Details**

Field	Description
<b>Tax Code</b>	Specify the Tax Code.
<b>Amount</b>	Specify the tax amount.
<b>Beneficiary Code</b>	Specify the beneficiary institute code.

### 2.6.14.4 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.6.14.5 Transaction Submission

After you specify the **Reference Number**, corresponding fields are displayed for user to input the details. Once you specify the Payment Details and click **Refresh**, the system computes the total amount, which can be with or without charges.

If the **Reference Number** is not specified, the relevant fields are displayed for input in the section **Reference Number Not Available**. Once you specify the Payment Details and click **Refresh**, the system posts the following accounting entries on save and authorization of the record:

Accounting entries posted for the payment amount:

Dr/Cr	Description	Amount
Dr	Cash Account	For a Total Amount
Cr	Account maintained in ARC of the associated product	For a Total Amount

Accounting entries posted for the charge amount:

Dr/Cr	Description	Amount
Dr	Cash Account	Charges amount computed as per ARC maintenance
Cr	Account maintained in ARC of the associated product	Charges amount computed as per ARC maintenance

### 2.6.14.6 Validations

The following validations are performed by the system:

- The system allows you to maintain a minimum of one row and a maximum of eight rows in the **Payment Data Details** multi entry block. If you do not maintain the minimum row or exceed the maximum row, then the system displays an appropriate error message.

- If the **Principal Fiscal Code** and **Secondary Fiscal Code** fields have a value of 16 character that is for non-individual customers the system validates the last character in the value as per the checksum algorithm for Fiscal Code. If the validation fails, then the system displays an appropriate error message. In case of individual customers, where the **Principal Fiscal Code** and **Secondary Fiscal Code** field has a value of 11 character, the system validates the last character in the value as per the checksum algorithm for VAT number. If the validation fails, then the system displays an appropriate error message.
- The system validates only the data format of the fields specified.
- If the computed value for **Payment Amount** field value is less than or equal to 0, on pickup, the system displays an appropriate error message.

Once Pickup is completed, do the following step:

1. Click **Submit** to complete the transaction.
  - A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the deposit of tax amount is completed successfully.

### 2.6.15 F24 Tax Payment By Account

This screen is used to capture data related to F24 tax document for a customer and collect the corresponding tax by account from the customer. To process this screen, type **F24 Tax Payment By Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

- 1. From **Home screen**, navigate to left menu and click **Teller**. On Mega Menu, under **Customer Transaction**, click **F24 Tax Payment By Account**.

→ The **F24 Tax Payment By Account** screen is displayed.

Field	Description
<b>Final Section Amount</b>	Displays the final section amount.

### 2.6.15.6 F24 Tax - By Account (Predefined)

Specify the details in the **F24 Tax – By Account** segment. Based on the Form Type selection, the input fields will be displayed on this segment.

**Figure 100: F24 Predefined Details**

The screenshot shows the 'F24 Tax By Account' form. At the top, there's a 'Form Type' dropdown menu set to 'Predefined'. Below this, the 'F24 Predefined' section contains several input fields: 'Elaboration Date' (with a calendar icon showing 'Mar 26, 2020'), 'Secondary Fiscal Code', 'Principal Fiscal Code' (marked with an asterisk), 'Identity code secondary fiscal code', 'Total Final Payment', 'Final Payment Fields', 'Erario Institution', and 'Tax Details'. The 'Tax Details' section includes a table with columns 'Payment ID' and 'Amount to Pay', and a 'No data to display.' message. At the bottom, there are fields for 'Total Debit Amount' and 'Final Section Amount' (marked with an asterisk). A footer note says 'Please click on the Refresh button next to Tax amount before Submit'.

Specify the details in this segment. The fields, which are marked with asterisk, are mandatory.

For more information on fields, refer to table [Field Description: F24 Predefined](#).

**Field Description: F24 Predefined**

Field	Description
<b>Form Type</b>	Select the Predefined tax category from the adjoining drop-down list.
<b>F24 Predefined</b>	Specify the fields.

Field	Description
<b>Elaboration Date</b>	Displays the elaboration date
<b>Principal Fiscal Code</b>	Specify the debtor fiscal code.  <b>NOTE:</b> For Individual customers, the allowed principal fiscal code is 16 characters and for non-individual customers, this will be 11-character VAT number.
<b>Secondary Fiscal Code</b>	Specify the secondary fiscal code.  <b>NOTE:</b> For Individual customers, the allowed secondary fiscal code is 16 characters and for non-individual customers, this will be 11-character VAT number.
<b>Identity Code Secondary Fiscal Code</b>	Specify the Identity code secondary fiscal code.
<b>Erario Institution</b>	Displays the Erario Institution.
<b>Payment ID</b>	Specify the payment ID.
<b>Amount to Pay</b>	Specify the amount to be paid.
<b>Total Debit Amount</b>	Displays the Total Amount to Pay.
<b>Final Section Amount</b>	Displays the Final Section Amount.

### 2.6.15.7 Transaction Submission

On selection of an appropriate value from the **Form Type**, only corresponding fields of the form will be displayed for input. For example, if you select **F24 Standard** as the Form Type then only the fields of **F24 Standard** will be available. The **Principal Fiscal Code** needs to be specified. After entering all the form details, user need to click on Refresh button in the **F24 Payment**

**Details** block .It then adds up the Amounts and defaults the sum in the **Payment Amount** field. The system posts the following accounting entries on save and authorization of the record.

Accounting entries posted for the payment amount:

Dr/Cr	Description	Amount
Dr	Cash Account	Final Section Amount of the corresponding tab which has been entered.
Cr	Account maintained in ARC of the associated product	Final Section Amount of the corresponding tab which has been entered.

Accounting entries posted for the charge amount:

Dr/Cr	Description	Amount
Dr	Cash Account	Charges amount computed as per ARC maintenance
Cr	Income Account	Charges amount computed as per ARC maintenance

### 2.6.15.8 Validations

The system validates only the data format of the fields specified. If any of such validations fail, the system displays an appropriate error message. If you maintain more than the specified number of rows in any of the below blocks then the system displays an appropriate error message. The following list shows the number of rows, which can be maintained for each Form Type:

- In **F24 Standard** tab, the system allows you to maintain only the following number of records:
  - up to a maximum of 6 rows in the **ERARIO** multi record block.
  - up to a maximum of 4 rows in the **INPS** multi record block.
  - up to a maximum of 4 rows in the **REGIONI** multi record block.

- up to a maximum of 4 rows in the **IMU E ALTRI ENTI LOCALI** multi record block.
- up to a maximum of 4 rows in the **INAIL** multi record block.
- up to a maximum of 3 rows in the **ALTRI ENTI** multi record block.
- up to a maximum of 7 rows in the **ACCISE** multi record block.
- In **F24 Simplified** tab up to a maximum of 10 rows in the **Tax Details** multi record block.
- In **F24 Elide** tab up to a maximum of 28 rows in the **Tax Details** multi record block.
- In **F24 Predefined** tab up to a maximum of 1 row in the **Tax Details** multi record block.

If the computed value for **Payment Amount** field value is less than or equal to 0, the system displays an appropriate error message. If the **Principal Fiscal Code** and **Secondary Fiscal Code** fields have, a value of 16, character that is for non-individual customers the system validates the last character in the value as per the checksum algorithm for **Fiscal Code**. If the validation fails, then the system displays an appropriate error message. In case of individual customers, where the **Principal Fiscal Code** and **Secondary Fiscal Code** field has a value of 11 character, the system validates the last character in the value as per the checksum algorithm for VAT number. If the validation fails, then the system displays an appropriate error message.

Once Pickup is completed, do the following step:

1. Click **Submit** to complete the transaction.
  - A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the deposit of tax amount is completed successfully.

## 2.7 Miscellaneous Transactions

This section describes the various screens used to perform the miscellaneous transactions. The screens are described in the following sub-sections:

- [2.7.1 Miscellaneous Customer Debit](#)
- [2.7.2 Miscellaneous Customer Credit](#)
- [2.7.3 Miscellaneous GL Debit](#)
- [2.7.4 Miscellaneous GL Credit](#)
- [2.7.5 Miscellaneous GL Transfer](#)
- [2.7.6 Miscellaneous Transfer](#)

### 2.7.1 Miscellaneous Customer Debit

This screen is used to transfer funds from the customer account to General Ledger (GL). The customer account can be debited for various reasons, with corresponding credit to a GL belonging to the transaction branch.

To process this screen, type **Misc Customer Debit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Miscellaneous**, click **Misc Customer Debit**.

→ The **Miscellaneous Customer Debit** screen is displayed.

**Figure 101: Miscellaneous Customer Debit**

The screenshot displays the 'Miscellaneous Customer Debit' form. It features a header bar with a back arrow and the title 'Miscellaneous Customer Debit'. The form is organized into two columns of input fields. The left column includes 'Account Number \*', 'GL Account \*' (with a search icon), 'GL Description', 'Exchange Rate' (with up/down arrows), 'Negotiated Reference Number', and 'Reference Number'. The right column includes 'Account Amount \*' (with a dropdown arrow), 'GL Branch' (with a search icon), 'GL Currency' (with a search icon), 'Negotiated Exchange Rate' (with up/down arrows), 'GL Amount', and 'Narrative \*' (containing the text 'Miscellaneous Customer Debit'). Below these fields is a section titled 'Charge Details' with a right-pointing triangle icon. At the bottom right, there are three buttons: 'Submit', 'Clear', and 'Cancel'.

### 2.7.1.1 Main Transaction Details

Specify the details in the **Miscellaneous Customer Debit** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Miscellaneous Customer Debit](#).

**Field Description: Miscellaneous Customer Debit**

Field	Description
<b>Account Number</b>	Specify the account number from which the funds need to be debited.
<b>Account Amount</b>	Displays the account currency based on the account number specified. Specify the amount that needs to be debited from the account currency.
<b>GL Account</b>	Specify the GL account to which the funds need to be credited. You can select the appropriate GL account from the adjoining option list that displays all the valid GL accounts.
<b>GL Branch</b>	Populates the branch code of the transaction branch and allows to modify.
<b>GL Description</b>	Displays the description of the selected GL account number.
<b>GL Currency</b>	By default, the account currency is displayed and it can be modified.
<b>GL Amount</b>	Displays the amount in terms of GL currency.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Negotiated Exchange Rate</b>	Specify the negotiated exchange rate, if it is needed to perform the transaction using negotiated value.

Field	Description
	<b>NOTE:</b> This field is applicable only if the transaction involves cross currency. If this option is selected, the <b>Negotiated Reference Number</b> field will become mandatory.
<b>Negotiated Reference Number</b>	Specify the reference number for the negotiated cost rate.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency.
<b>Narrative</b>	Displays the default narrative <b>Miscellaneous Customer Debit</b> and it can be modified.
<b>Reference Number</b>	Specify the reference number for the transaction, which is the original transaction reference or any invoice number.
<b>Exchange Rate</b>	Displays the exchange rate used to convert the transaction currency into GL currency and it can be modified.  <b>NOTE:</b> If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .

### 2.7.1.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.7.1.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves.

## 2.7.2 Miscellaneous Customer Credit

This screen is used to transfer funds from GL to the customer account. The customer account can be credited for various reasons, with corresponding debit to a GL belonging to the transaction branch.

To process this screen, type **Misc Customer Credit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Miscellaneous**, click **Misc Customer Credit**.

→ The **Miscellaneous Customer Credit** screen is displayed.

**Figure 102: Miscellaneous Customer Credit**

The screenshot displays the 'Miscellaneous Customer Credit' screen with the following fields and controls:

- Account Number \***: Text input field.
- Account Amount \***: Input field with a dropdown arrow and a text box.
- GL Account \***: Text input field with a search icon.
- GL Branch**: Text input field with a search icon.
- GL Description**: Text input field.
- GL Currency**: Text input field with a search icon.
- Exchange Rate**: Input field with up and down arrows.
- Negotiated Exchange Rate**: Input field with up and down arrows.
- Negotiated Reference Number**: Text input field.
- GL Amount**: Text input field.
- Reference Number**: Text input field.
- Narrative \***: Text area containing the text 'Miscellaneous Customer Credit'.

At the bottom of the screen, there is a section titled 'Charge Details' and three buttons: **Submit**, **Clear**, and **Cancel**.

### 2.7.2.1 Main Transaction Details

Specify the details in the **Miscellaneous Customer Credit** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Miscellaneous Customer Credit](#).

*Field Description: Miscellaneous Customer Credit*

#### Field Description: Miscellaneous Customer Credit

Field	Description
<b>Account Number</b>	Specify the account number from which the funds need to be credited.  <b>NOTE:</b> In addition, you can use Oracle Banking Virtual Accounts. These Virtual Accounts are used as a routing account to credit the underlying physical account.
<b>Account Amount</b>	Displays the account currency based on the account number specified. Specify the amount to be credited from the account currency.
<b>GL Account</b>	Specify the GL account from which the funds need to be debited. You can select the appropriate GL account from the adjoining option list that displays all the valid GL accounts.
<b>GL Branch</b>	Populates the branch code of the transaction branch and allows to modify.
<b>GL Currency</b>	By default, the account currency is displayed and it can be modified.
<b>GL Amount</b>	Displays the amount in terms of GL currency.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>GL Description</b>	Displays the description of the selected GL account number.

Field	Description
<b>Negotiated Exchange Rate</b>	Specify the negotiated exchange rate, if it is needed to perform the transaction using negotiated value.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency. If this option is selected, the <b>Negotiated Reference Number</b> field will become mandatory.
<b>Negotiated Reference Number</b>	Specify the reference number for the negotiated cost rate.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency.
<b>Narrative</b>	Displays the default narrative <b>Miscellaneous Customer Credit</b> and it can be modified.
<b>Reference Number</b>	Specify the reference number for the transaction, which is the original transaction reference or any invoice number.
<b>Exchange Rate</b>	Displays the exchange rate used to convert the transaction currency into GL currency and it can be modified.  <b>NOTE:</b> If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .

### 2.7.2.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.7.2.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the GL account is debited and Customer account is credited to the extent of **Account Amount**.

### 2.7.3 Miscellaneous GL Debit

This screen is used to debit funds from a GL account of the transaction branch and pass the corresponding credit to the Cash GL account in the same branch.

To process this screen, type **Misc GL Debit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Miscellaneous**, click **Misc GL Debit**.

→ The **Miscellaneous GL Debit** screen is displayed.

**Figure 103: Miscellaneous GL Debit**

The screenshot displays the 'Miscellaneous GL Debit' screen. It features a header bar with the title 'Miscellaneous GL Debit'. Below the header, there are two columns of input fields. The left column includes 'GL Account' (with a search icon), 'Transaction Amount' (with a dropdown arrow), 'Exchange Rate' (with up/down arrows), 'Negotiated Reference Number', and 'Narrative' (with a dropdown arrow). The right column includes 'GL Description', 'GL Amount' (with a dropdown arrow), 'Negotiated Exchange Rate' (with up/down arrows), and 'Reference Number'. At the bottom of the screen, there are three buttons: 'Submit', 'Clear', and 'Cancel'. Below the input fields, there are two expandable sections: 'Charge Details' and 'Denomination Details', both with expand/collapse arrows.

### 2.7.3.1 Main Transaction Details

Specify the details in the **Miscellaneous GL Debit** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Miscellaneous GL Debit](#).

**Field Description: Miscellaneous GL Debit**

Field	Description
<b>GL Account</b>	Specify the GL account from which the funds need to be debited. You can select the appropriate GL account from the adjoining option list that displays all the valid GL accounts.
<b>GL Currency</b>	Displays the branch account currency and allows to modify if required.
<b>GL Amount</b>	Displays the amount which is credited to GL account.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>GL Description</b>	Displays the description of the selected GL account number.
<b>Transaction Amount</b>	Specify the appropriate currency and the amount that has to be credited to the cash account in the specified currency.  <b>NOTE:</b> By default, the local currency of the branch is displayed, select another currency if required.
<b>Negotiated Exchange Rate</b>	Specify the negotiated exchange rate, if it is needed to perform the transaction using negotiated value.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency. If this option is selected, the <b>Negotiated Reference Number</b> field will become mandatory.

Field	Description
<b>Negotiated Reference Number</b>	Specify the reference number for the negotiated cost rate.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency.
<b>Narrative</b>	Displays the default narrative <b>Miscellaneous GL Debit</b> and it can be modified.
<b>Reference Number</b>	Specify the reference number for the transaction.
<b>Exchange Rate</b>	Displays the exchange rate used to convert the transaction currency into GL currency and it can be modified.  <b>NOTE:</b> If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .

### 2.7.3.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.7.3.3 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.7.3.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of the Teller is updated successfully.

### 2.7.4 Miscellaneous GL Credit

This screen is used to credit funds to a GL account of the transaction branch and pass the corresponding debit to the Cash GL account in the same branch.

To process this screen, type **Misc GL Credit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Miscellaneous**, click **Misc GL Credit**.

→ The **Miscellaneous GL Credit** screen is displayed.

**Figure 104: Miscellaneous GL Credit**

### 2.7.4.1 Main Transaction Details

Specify the details in the **Miscellaneous GL Credit** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Miscellaneous GL Credit](#).

**Field Description: Miscellaneous GL Credit**

Field	Description
<b>GL Account</b>	Specify the GL account to which the funds need to be credited. Select the appropriate GL account from the adjoining option list that displays all the valid GL accounts.
<b>GL Amount</b>	Displays the branch account currency and allows to modify if required, and shows the amount which is credited to GL account.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as Y.
<b>GL Description</b>	Displays the description of the selected GL account number.
<b>Transaction Amount</b>	Specify the appropriate currency and the amount that has to be debited from the cash account in the specified currency.  <b>NOTE:</b> By default, the local currency of the branch is displayed, select another currency if required.
<b>Negotiated Exchange Rate</b>	Specify the negotiated exchange rate, if it is needed to perform the transaction using negotiated value.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency. If this option is selected, the <b>Negotiated Reference Number</b> field will become mandatory.

Field	Description
<b>Negotiated Reference Number</b>	Specify the reference number for the negotiated cost rate.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency.
<b>Narrative</b>	Displays the default narrative <b>Miscellaneous GL Credit</b> and it can be modified.
<b>Reference Number</b>	Specify the reference number for the transaction.
<b>Exchange Rate</b>	Displays the exchange rate used to convert the transaction currency into GL currency and it can be modified.  <b>NOTE:</b> If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .

#### 2.7.4.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

#### 2.7.4.3 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

#### 2.7.4.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of the Teller gets updated successfully.

## 2.7.5 Miscellaneous GL Transfer

This screen is used to transfer funds from a GL account to another GL account. To process this screen, type **Misc GL Transfer** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Miscellaneous**, click **Misc GL Transfer**.

→ The **Miscellaneous GL Transfer** screen is displayed.

### 2.7.5.1 Main Transaction Details

Specify the details in the **Miscellaneous GL Transfer** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Miscellaneous GL Transfer](#).

**Field Description: Miscellaneous GL Transfer**

<b>Field</b>	<b>Description</b>
<b>From GL Account</b>	Specify the GL account to which the funds need to be debited. Select the appropriate GL account from the adjoining option list that displays all the valid GL accounts.
<b>From GL Amount</b>	Displays the branch account currency and allows to modify if required, and shows the amount which is debited from GL account.
<b>From GL Description</b>	Displays the description of the selected GL account number.
<b>GL Currency</b>	Displays the branch currency and allows to modify if required.
<b>From GL Branch</b>	Click search icon, and select the <b>From GL Branch</b> from the list of values.
<b>To GL Account</b>	Specify the GL account to which the funds need to be credited. Select the appropriate GL account from the adjoining option list that displays all the valid GL accounts.
<b>To GL Amount</b>	Displays the branch account currency and allows to modify if required, and shows the amount which is credited to GL account.
<b>To GL Description</b>	Displays the description of the selected GL account number.
<b>GL Currency</b>	Displays the branch currency and allows to modify if required.
<b>To GL Branch</b>	Click search icon, and select the <b>To GL Branch</b> from the list of values.

Field	Description
<b>Narrative</b>	Displays the default narrative <b>Miscellaneous GL Transfer</b> and it can be modified.
<b>Reference Number</b>	Specify the reference number for the transaction.
<b>Exchange Rate</b>	<p>Displays the exchange rate used to convert the transaction currency into GL currency and it can be modified.</p> <p><b>NOTE:</b> If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>

### 2.7.5.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.7.5.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves.

## 2.7.6 Miscellaneous Transfer

This screen is used to facilitate transfer between the two different GLs or Customer account. To process this screen, type **Miscellaneous Transfer** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Transfers**, click **Miscellaneous Transfer**.

→ The **Miscellaneous Transfer** screen is displayed.

**Figure 106: Miscellaneous Transfer**

### 2.7.6.1 Main Transaction Details

Specify the details in the **Miscellaneous Transfer** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Miscellaneous Transfer](#).

**Field Description: Miscellaneous Transfer**

Field	Description
<b>Function Code</b>	Click search icon, and select the function code from the list of values, which contains only non-cash transactions.

Field	Description
<b>Currency</b>	Click search icon, and select the currency from the list of values.  <b>NOTE:</b> By default, the currency field will default to local branch currency and it can be modified.
<b>Query</b>	Click this icon to fetch the details.  <b>NOTE:</b> Based on the specified <b>Function Code</b> and <b>Currency</b> , the system populates <b>Debit Account</b> and <b>Credit Account</b> details and it can be modified.
<b>Debit Account Details</b>	Specify the fields.
<b>Debit Account</b>	Click search icon, and select the debit account number from the list of values.
<b>Debit Account Name</b>	Displays the name of the specified debit account.
<b>Debit Account Branch</b>	Click search icon, and select the debit account branch from the list of values.
<b>Debit Currency</b>	Click search icon, and select the debit currency from the list of values.
<b>Debit Amount</b>	Specify the amount that needs to be debited.
<b>Credit Account Details</b>	Specify the fields.
<b>Credit Account</b>	Click search icon, and select the credit account number from the list of values.
<b>Credit Account Name</b>	Displays the name of the specified credit account.

Field	Description
<b>Credit Account Branch</b>	Click search icon, and select the credit account branch from the list of values.
<b>Credit Currency</b>	Click search icon, and select the credit currency from the list of values.
<b>Credit Amount</b>	<p>System display the credit amount based on the exchange rate pickup.</p> <p><b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Exchange Rate</b>	<p>Displays the exchange rate used to convert the transfer currency into transaction currency and it can be modified.</p> <p><b>NOTE:</b> If the transfer currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Total Charges</b>	<p>Displays the total charge amount, which is computed by the system.</p> <p><b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Additional Details</b>	Specify the fields.
<b>Reference Number</b>	Specify the reference number of the transaction.
<b>Narrative</b>	Displays the default narrative <b>Miscellaneous Transfer</b> and it can be modified.

### 2.7.6.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.7.6.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves.

## 2.8 Transfers

This section describes the various screens used to perform the transfers. The screens are described in the following sub-sections:

- [2.8.1 Account Transfer](#)
- [2.8.2 In House Cheque Deposit](#)
- [2.8.3 Domestic Transfer Against Account](#)
- [2.8.4 Domestic Transfer Against Walk-in](#)
- [2.8.5 International Transfer Against Account](#)
- [2.8.6 International Transfer Against Walk-in](#)

### 2.8.1 Account Transfer

This screen is used to transfer funds from one account to another account within the bank. The funding account and beneficiary account can be in different currencies and belong to different branches.

To process this screen, type **Account Transfer** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Transfers**, click **Account Transfer**.

→ The **Account Transfer** screen is displayed.

**Figure 107: Account Transfer**

The screenshot displays the 'Account Transfer' screen with the following fields and controls:

- Debit Account \***: Text input field.
- Debit Amount \***: Text input field with a dropdown arrow.
- Cheque Number**: Text input field.
- Cheque Date**: Date picker showing 'Mar 27 2021'.
- Credit Account \***: Text input field.
- Credit Account Name**: Text input field.
- Credit Account Branch**: Text input field.
- Credit Amount**: Text input field.
- Exchange Rate**: Text input field with up/down arrows.
- Negotiated Exchange Rate**: Text input field with up/down arrows.
- Negotiated Reference Number**: Text input field.
- Total Charges(LCY)**: Text input field.
- Narrative \***: Text input field containing 'Account Transfer'.

At the bottom, there is a 'Charge Details' section header and three buttons: **Submit**, **Clear**, and **Cancel**.

### 2.8.1.1 Main Transaction Details

Specify the details in the **Account Transfer** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Account Transfer](#).

**Field Description: Account Transfer**

<b>Field</b>	<b>Description</b>
<b>Debit Account</b>	Specify the customer account from which the funds needs to be debited.
<b>Debit Amount</b>	Displays the transaction account currency. Specify the transaction amount that needs to be debited from customer account.
<b>Cheque Number</b>	Specify the cheque number of the customer account as provided by the Customer. If cheque number of the customer account is specified, the cheque status update will be done as part of handoff to FLEXCUBE Universal Banking.
<b>Cheque Date</b>	Select the date on which cheque has been issued from the adjoining calendar.
<b>Credit Account</b>	Specify the account to which the funds needs to be credited.  <b>NOTE:</b> In addition, you can use Oracle Banking Virtual Accounts. These Virtual Accounts are used as a routing account to credit the underlying physical account.
<b>Credit Account Name</b>	Displays the description of the account number specified.
<b>Credit Account Branch</b>	Displays the branch code of the account number specified.
<b>Credit Amount</b>	Displays the amount in terms of credit account currency.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .

Field	Description
<b>Negotiated Exchange Rate</b>	Specify the negotiated exchange rate, if it is needed to perform the transaction using negotiated value.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency. If this option is selected, the <b>Negotiated Reference Number</b> field will become mandatory.
<b>Negotiated Reference Number</b>	Specify the reference number for the negotiated cost rate.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency.
<b>Exchange Rate</b>	Displays the exchange rate used to convert the transaction account currency into credit account currency and it can be modified.  <b>NOTE:</b> If the transaction currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as Y.
<b>Total Charge (LCY)</b>	Displays the total charge amount, which is computed by the system.  <b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as Y.
<b>Narrative</b>	Displays the default narrative <b>Account Transfer</b> and it can be modified.

### 2.8.1.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.8.1.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Oracle Banking Payments system for outgoing payment creation and processing with external system status as **Pending**. After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

Note: System shall automate the completion of payment transactions from Journal log, once the 'Success' notification is received from Oracle Banking Payments based on the flag Auto Processing as Y in TRANSACTION.SRV\_TM\_BC\_PARAM\_DTLS. (When Auto Processing is 'N', then Maker-Checker-Maker-Maker and when Auto Processing is Y then Maker-Checker-Maker).

## 2.8.2 In-House Cheque Deposit

This screen is used to capture in-house cheque deposit transactions for the customers. To process this screen, type **In House Cheque Deposit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Transfers**, click **In House Cheque Deposit**.

→ The **In House Cheque Deposit** screen is displayed.

### 2.8.2.1 Main Transaction Details

Specify the details in the **In House Cheque Deposit** screen. For more information on fields, refer to table [Field Description: In House Cheque Deposit](#).

**Field Description: In House Cheque Deposit**

<b>Field</b>	<b>Description</b>
<b>Debit Account</b>	Specify the account number of the drawer.
<b>Debit Account Name</b>	Displays the name of the account.
<b>Debit Account Branch</b>	Displays the branch code of the account number specified.
<b>Cheque Amount</b>	Specify the currency and amount as mentioned in the cheque.
<b>Cheque Number</b>	Specify the cheque number.
<b>Cheque Date</b>	Specify the date of issue as mentioned in the cheque.
<b>Credit Account</b>	Specify the account number that needs to be credited with the cheque amount.
<b>Credit Amount</b>	<p>Displays the transaction amount based on the exchange rate.</p> <p><b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Exchange Rate</b>	<p>Displays the exchange rate used to convert the transaction currency into account currency and it can be modified.</p> <p><b>NOTE:</b> If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>

Field	Description
<b>Total Charges (LCY)</b>	Displays the total charge amount, which is computed by the system.  <b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Reject Code</b>	Select the reject code from the list of values, which are maintained in <b>Reject Code Maintenance</b> screen.  <b>NOTE:</b> If the cheque withdrawal transaction needs to be rejected, you can reject by specifying the appropriate reject code in this field. The transaction can be rejected for any of the following reasons: <ul style="list-style-type: none"> <li>• Insufficient funds</li> <li>• Signature mismatch</li> <li>• Stale cheque</li> </ul>
<b>Reject Code Description</b>	Displays the description of the specified reject code.
<b>Narrative</b>	Displays the default narrative <b>In-House Cheque Deposit</b> and it can be modified.

### 2.8.2.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.8.2.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Oracle Banking Payments

system for outgoing payment creation and processing with external system status as **Pending**. After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

Note: System shall automate the completion of payment transactions from Journal log, once the 'Success' notification is received from Oracle Banking Payments based on the flag Auto Processing as Y in TRANSACTION.SRV\_TM\_BC\_PARAM\_DTLS. (When Auto Processing is 'N', then Maker-Checker-Maker-Maker and when Auto Processing is Y then Maker-Checker-Maker).

### 2.8.3 Domestic Transfer Against Account

This screen is used to transfer funds from an account held with the bank to an account held with another bank, within the same country. Based on the payment type selected, the transaction is routed to corresponding transaction network.

To process this screen, type **Domestic Trf - Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under Transfers, click **Domestic Trf - Account**.

→ The **Domestic Transfer Against Account** screen is displayed.

**Figure 109: Domestic Transfer Against Account**

### 2.8.3.1 Main Transaction Details

Specify the details in the **Domestic Transfer Against Account** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Domestic Transfer Against Account](#).

**Field Description: Domestic Transfer Against Account**

<b>Field</b>	<b>Description</b>
<b>Remitter Account</b>	Specify the customer account from which the funds needs to be debited.
<b>Transaction Amount</b>	Displays the transaction account currency and it allows to select from drop-down values. Specify the transaction amount that needs to be debited from customer account.
<b>Cheque Number</b>	Specify the cheque number of the customer account as provided by the Customer.
<b>Cheque Date</b>	Select the date on which cheque has been issued from the adjoining calendar.
<b>Account Amount</b>	<p>Displays the amount in terms of remitter account currency.</p> <p><b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Exchange Rate</b>	<p>Displays the exchange rate used to convert the transaction account currency into credit account currency and it can be modified.</p> <p><b>NOTE:</b> If the transaction currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Total Charges</b>	Displays the total charge amount, which is computed by the system.

Field	Description
	<b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Narrative</b>	Displays the default narrative <b>Domestic Transfer Against Account</b> and it can be modified.

### 2.8.3.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.8.3.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Oracle Banking Payments system for outgoing payment creation and processing with external system status as **Pending**. After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

Note: System shall automate the completion of payment transactions from Journal log, once the 'Success' notification is received from Oracle Banking Payments based on the flag Auto Processing as Y in TRANSACTION.SRV\_TM\_BC\_PARAM\_DTLS. (When Auto Processing is

'N', then Maker-Checker-Maker-Maker and when Auto Processing is Y then Maker-Checker-Maker).

## 2.8.4 Domestic Transfer Against Walk-in

This screen is used to accept cash from walk-in customer and transfer funds to the account held with another bank within the same country. Based on the payment type selected, the transaction is routed to corresponding transaction network.

To process this screen, type **Domestic Trf - Walkin** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Transfers**, click **Domestic Trf - Walkin**.

→ The **Domestic Transfer Against Walkin** screen is displayed.

**Figure 111: Domestic Transfer Against Walkin**

### 2.8.4.1 Main Transaction Details

Specify the details in the **Domestic Transfer Against Walkin** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Domestic Transfer Against Walkin](#).

**Field Description: Domestic Transfer Against Walkin**

Field	Description
<b>Transaction Amount</b>	Select the transaction currency from the drop-down list. Specify the transaction amount that needs to be transferred.

Field	Description
<b>Total Charges</b>	Displays the total charge amount, which is computed by the system.  <b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Narrative</b>	Displays the default narrative <b>Domestic Transfer Against Walkin</b> and it can be modified.

### 2.8.4.2 Payment Details

The **Payment Details** segment is used to specify the details of remitter, beneficiary, and remittance information. For more information on this segment, refer to the topic [2.8.3.2 Payment Details](#) in this guide.

### 2.8.4.3 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.8.4.4 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.8.4.5 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Oracle Banking Payments system for outgoing payment creation and processing with external system status as **Pending**. After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

Note: System shall automate the completion of payment transactions from Journal log, once the 'Success' notification is received from Oracle Banking Payments based on the flag Auto Processing as Y in TRANSACTION.SRV\_TM\_BC\_PARAM\_DTLS. (When Auto Processing is 'N', then Maker-Checker-Maker-Maker and when Auto Processing is Y then Maker-Checker-Maker).

## 2.8.5 International Transfer Against Account

This screen is used to facilitate international transfer by debiting the account holder of the bank. You can remit in currency of the customer account and transfer in another currency based on the request from the customer. If the transaction currency differs from the transfer currency, the exchange rate is populated to calculate the equivalent amount.

To process this screen, type **International - Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Transfers**, click **International - Account**.

→ The **International Transfer Against Account** screen is displayed.

	<ul style="list-style-type: none"> <li>• <b>SDVA</b> – Same Day Value, Payment must be executed with same day value to the beneficiary.</li> <li>• <b>CORT</b> – Corporate Trade, Payment is made in settlement of a trade, for example, foreign exchange deal, securities transaction.</li> </ul> <p><b>NOTE:</b> The field for additional information is disabled for the following codes:</p> <ul style="list-style-type: none"> <li>• <b>CHQB</b></li> <li>• <b>INTC</b></li> <li>• <b>SDVA</b></li> <li>• <b>CORT</b></li> </ul>

### 2.8.5.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.8.5.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Oracle Banking Payments system for outgoing payment creation and processing with external system status as **Pending**. After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

Note: System shall automate the completion of payment transactions from Journal log, once the 'Success' notification is received from Oracle Banking Payments based on the flag Auto Processing as Y in TRANSACTION.SRV\_TM\_BC\_PARAM\_DTLS. (When Auto Processing is 'N', then Maker-Checker-Maker-Maker and when Auto Processing is Y then Maker-Checker-Maker).

## 2.8.6 International Transfer Against Walk-in

This screen is used to facilitate international transfer by accepting cash from the walk-in customer. You can remit funds in transaction currency and transfer in another currency based on the customer's request. If the transaction currency differs from the transfer currency, the exchange rate is populated to calculate the equivalent amount.

To process this screen, type **International - Walk-in** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Transfers**, click **International - Walk-in**.

→ The **International Transfer Against Walk-in** screen is displayed.

**Figure 114: International Transfer Against Walk-in**

The screenshot shows the 'International Transfer Against Walk-in' screen. It features a form with the following fields and sections:

- Transaction Amount \***: A text input field with a dropdown arrow.
- Transfer Currency**: A text input field with a search icon.
- Exchange Rate**: A text input field with up and down arrows.
- Negotiated Reference Number**: A text input field.
- Narrative \***: A text input field containing 'International Transfer Against Walk-in'.
- Transfer Amount**: A text input field.
- Negotiated Exchange Rate**: A text input field with up and down arrows.
- Total Charge Amount \***: A text input field.
- Payment Details**: An expandable section with a right-pointing arrow.
- Denomination**: An expandable section with a right-pointing arrow.
- Buttons**: 'Submit', 'Clear', and 'Cancel' buttons at the bottom right.

### 2.8.6.1 Main Transaction Details

Specify the details in the **Domestic Transfer Against Walk-in** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: International Transfer Against Walk-in](#).

**Field Description: International Transfer Against Walk-in**

<b>Field</b>	<b>Description</b>
<b>Transaction Amount</b>	Specify the currency in which the cash is accepted from walk-in customer and the transaction amount as requested by the customer.
<b>Transfer Currency</b>	Specify the currency in which the funds to be transferred.
<b>Negotiated Exchange Rate</b>	Specify the negotiated exchange rate, if it is needed to perform the transaction using negotiated value.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency. If this option is selected, the <b>Negotiated Reference Number</b> field will become mandatory.
<b>Negotiated Reference Number</b>	Specify the reference number for the negotiated cost rate.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency.
<b>Transfer Amount</b>	System display the transfer amount based on the exchange rate pickup.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Exchange Rate</b>	Displays the exchange rate used to convert the transfer currency into transaction currency and it can be modified.  <b>NOTE:</b> If the transfer currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .

Field	Description
<b>Total Charges</b>	Displays the total charge amount, which is computed by the system.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Narrative</b>	Displays the default narrative <b>International Transfer Against Walk-in</b> and it can be modified.

### 2.8.6.2 Payment Details

The **Payment Details** segment is used to specify the details of remitter, beneficiary, and remittance information. For more information on this segment, refer to the topic [2.8.5.2 Payment Details](#) in this guide.

### 2.8.6.3 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.8.6.4 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.8.6.5 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Oracle Banking Payments system for outgoing payment creation and processing with external system status as **Pending**. After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

Note: System shall automate the completion of payment transactions from Journal log, once the 'Success' notification is received from Oracle Banking Payments based on the flag Auto Processing as Y in TRANSACTION.SRV\_TM\_BC\_PARAM\_DTLS. (When Auto Processing is 'N', then Maker-Checker-Maker-Maker and when Auto Processing is Y then Maker-Checker-Maker).

## 2.9 Clearing

This section describes the screen used to perform the clearing. The **Cheque Deposit** screen is described in the following sub-section:

- [2.9.1 Cheque Deposit](#)
- [2.9.2 Cheque Return](#)
- [2.9.3 Inward Clearing Data Entry](#)
- [2.9.4 Outward Clearing Data Entry](#)

## 2.9.1 Cheque Deposit

The Teller can use this screen to capture the cheque deposit request submitted by the customer. To process this screen, type **Cheque Deposit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Clearing**, click **Cheque Deposit**.

→ The **Cheque Deposit** screen is displayed.

### 2.9.1.1 Main Transaction Details (Account Mode)

Specify the details in the **Cheque Deposit** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Cheque Deposit \(Account Mode\)](#).

**Field Description: Cheque Deposit (Account Mode)**

<b>Field</b>	<b>Description</b>
<b>Cheque Amount</b>	Specify the currency and amount mentioned in the cheque that needs to be deposited in the account.
<b>Cheque Date</b>	Specify the cheque issued date.
<b>Deposit Mode</b>	Select the deposit mode as <b>Account</b> from the drop-down values.
<b>Payee Account</b>	<p>Specify the customer account number in which the cheque needs to be deposited. When you press <b>Tab</b> key, the following details are displayed:</p> <ul style="list-style-type: none"> <li>• Customer ID</li> <li>• Image</li> <li>• Signature</li> <li>• KYC Status</li> <li>• Account Balance</li> <li>• Address</li> </ul> <p><b>NOTE:</b> If the specified account number is a joint account holder, the joint holder details of the account can be viewed in the Customer Information Widget along with mode of operation.</p>
<b>Cheque Number</b>	Specify the MICR number displayed on the cheque.
<b>Drawer Account</b>	Specify the account number on which the cheque is drawn.
<b>Drawer Name</b>	Specify the name of the drawer account.
<b>Network Code</b>	Specify the network code. You can also select from the list of maintained clearing codes.

Field	Description
<b>Routing Number</b>	Specify the routing number for cheque clearance. The list of values will call Oracle Banking Payments service to fetch the list of routing numbers based on <b>Clearing Network Code</b> selected.
<b>Cheque Deposit Date</b>	Displays the current posting date as the cheque deposit date.
<b>Negotiated Exchange Rate</b>	Specify the negotiated exchange rate, if it is needed to perform the transaction using negotiated value.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency. If this option is selected, the <b>Negotiated Reference Number</b> field will become mandatory.
<b>Negotiated Reference Number</b>	Specify the reference number for the negotiated cost rate.  <b>NOTE:</b> This field is applicable only if the transaction involves cross currency.
<b>Account Amount</b>	Displays the account amount.
<b>Exchange Rate</b>	Displays the exchange rate used to convert the cheque currency into transaction currency and it can be modified.  <b>NOTE:</b> If the transfer currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as Y.
<b>Total Charges (LCY)</b>	Displays the total charge amount, which is computed by the system.

Field	Description
	<b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Narrative</b>	Displays the default narrative <b>Cheque Deposit</b> and it can be modified.

<b>Narrative</b>	Displays the default narrative <b>Cheque Deposit</b> and it can be modified.

### 2.9.1.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.9.1.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Oracle Banking Payments system for Outward Clearing transaction processing with external system status as **Pending**.

After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

OBARN will only do data capture and populate the request to OBPM for main leg accounting. Charge accounting will be posted to UBS from OBARN.

Note: System shall automate the completion of payment transactions from Journal log, once the 'Success' notification is received from Oracle Banking Payments based on the flag Auto Processing as Y in TRANSACTION.SRV\_TM\_BC\_PARAM\_DTLS.

## 2.9.2 Cheque Return

The Teller can use this screen to initiate manual return of inward or outward clearing cheques. An inward cheque transaction may not be processed successfully for funds needed in the drawer account or due to stop payment of cheque. In addition, an outward cheque transaction may get returned if the same has returned from the clearing house. To process this screen, type **Cheque Return** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Clearing**, click **Cheque Return**.

→ The **Cheque Return** screen is displayed.

Figure 117: Cheque Return

The screenshot displays the 'Cheque Return' application window. At the top left, there is a title bar with a back arrow and the text 'Cheque Return'. Below this, the form is organized into two columns. The left column contains fields for 'Drawer Account \*', 'Cheque Number \*', 'Drawer Account', 'Cheque Number', 'Cheque Date', 'Payee Name', 'Return Type', and 'Reject Reason'. The right column contains fields for 'Cheque Number \*', 'Drawer Routing No', 'Cheque Amount', 'Payee Account', 'Payee Routing No', 'Reject Code \*', and 'Narrative \*'. Each field is accompanied by a text input box. Below the 'Drawer Account' field, there are two buttons: 'Query' and 'Clear'. At the bottom of the form, there is a section titled 'Charge Details' with a right-pointing arrow. At the very bottom of the window, there are three buttons: 'Submit', 'Clear', and 'Cancel'.

### 2.9.2.1 Main Transaction Details

Specify the details in the **Cheque Return** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Cheque Return](#).

**Field Description: Cheque Return**

<b>Field</b>	<b>Description</b>
<b>Drawer Account</b>	Specify the drawer account number.
<b>Cheque Number</b>	Specify the cheque number.
<b>Query</b>	Click this icon to fetch cheque details.
<b>Clear</b>	Click this icon to clear the cheque details.
<b>Drawer Account</b>	Displays the drawer account number.
<b>Drawer Routing No</b>	Displays the routing number of the specified drawer account.
<b>Cheque Number</b>	Displays the cheque number.
<b>Cheque Amount</b>	Displays the cheque amount.
<b>Cheque Date</b>	Displays the cheque date.
<b>Payee Account</b>	Displays the payee account number.
<b>Payee Name</b>	Displays the payee name.
<b>Payee Routing No.</b>	Displays the payee routing number.
<b>Return Type</b>	Displays the return type ( <b>Inward</b> and <b>Outward</b> ).
<b>Reject Code</b>	Select the reject code from the list of values.
<b>Reject Reason</b>	Displays the reject reason
<b>Total Charges</b>	Displays the total charge amount, which is computed by the system.

Field	Description
Narrative	Displays the default narrative <b>Cheque Return</b> and it can be modified.

### 2.9.2.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.9.2.3 Transaction Submission

Perform the following steps:

1. Click **Query** to fetch the original cheque details.
2. Select the appropriate **Reject Code** and **Reject Reason** for the Cheque return.
3. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves.

## 2.9.3 Inward Clearing Data Entry

The Teller can use this screen to initiate the inward processing of bulk instruments. This screen supports to capture bulk input of inward clearing transactions for multiple instrument types – Cheque, Bankers Cheque, and Demand Draft. It also supports bulk data entry of inward clearing transactions for single and multiple customer accounts.

To process this screen, type **Inward Clearing Data Entry** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Clearing**, click **Inward Clearing Data Entry**.

→ The **Inward Clearing Data Entry** screen is displayed.

**NOTE:** Charges are not supported for this screen.

2.9.3.1 Main Transaction Details

Specify the details in the **Inward Clearing Data Entry** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Inward Clearing Data Entry](#).

Field Description: Inward Clearing Data Entry

Field	Description
New	Click this button to create a new clearing transaction and generate the batch reference number.
Fetch	Click this button to enable the field <b>Batch Reference Number</b> and input or select from the list of values. The list of values fetches only the batches that are saved and not submitted.
Hold	Click this button to save the data entry made as part of the specified batch number.

Field	Description
<b>Batch Reference Number</b>	Displays the unique batch number, which is system generated.
<b>Instrument Currency</b>	Displays the current logged branch currency. You can also select the instrument currency from the drop-down values.
<b>Total Amount</b>	Displays the total batch amount in instrument currency.
<b>Entry Details</b>	Specify the fields.
<b>Instrument Type</b>	Select the instrument type from the drop-down values.
<b>Drawer Account</b>	Specify the drawer account number.
<b>Account Name</b>	Displays the name of the account number specified.
<b>Account Branch</b>	Displays the branch code of the account number specified.
<b>Account Currency</b>	Displays the currency of the account number specified.
<b>Payee Account</b>	Specify the payee account number. You can also select from the list of values.
<b>Instrument No</b>	Specify the instrument number.
<b>Instrument Date</b>	Specify the date of the instrument.
<b>Instrument Amount</b>	Specify the amount of the instrument.
<b>Clearing Type</b>	Specify the clearing type. You can also select from the list of values.

Field	Description
<b>Drawer Routing No</b>	Specify the routing number. You can also select from the list of values.
<b>Payee Routing Number</b>	Specify the routing number of the cheque. You can also select from the list of values.
<b>Narrative</b>	Displays the default narrative <b>Inward Clearing Data Entry</b> and it can be modified.
<b>Add Entry</b>	Click this icon to add multiple records in table and allows modifying or deleting if required.
<b>Reset</b>	Click this icon to clear the inputted entry details before you add the entries.

### 2.9.3.2 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On submission of data entry, the individual instrument details will be handed off to Oracle Banking Payments using Inward Clearing Service.

In case of reject notification of any transaction from Oracle Banking Payments, teller can either modify the data and resubmit the transaction or discard the data entry.

### 2.9.4 Outward Clearing Data Entry

The Teller can use this screen to initiate the bulk deposit of instruments. This screen supports to capture bulk input of outward clearing transactions for multiple instrument types – Cheque, Bankers Cheque, and Demand Draft. It also supports bulk data entry of outward clearing transactions for single and multiple customer accounts.

To process this screen, type **Outward Clearing Data Entry** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Clearing**, click **Outward Clearing Data Entry**.

→ The **Outward Clearing Data Entry** screen is displayed.

**NOTE:** Charges are not supported for this screen.

**Figure 119: Outward Clearing Data Entry**

### 2.9.4.1 Main Transaction Details

Specify the details in the **Outward Clearing Data Entry** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Outward Clearing Data Entry](#).

**Field Description: Outward Clearing Data Entry**

Field	Description
New	Click this button to create a new clearing transaction and generate the batch reference number.

Field	Description
<b>Fetch</b>	Click this button to enable the field <b>Batch Reference Number</b> and input or select from the list of values. The list of values fetches only the batches that are saved and not submitted.
<b>Hold</b>	Click this button to save the data entry made as part of the specified batch number.
<b>Batch Reference Number</b>	Displays the unique batch number, which is system generated.
<b>Instrument Currency</b>	Displays the current logged branch currency. You can also select the instrument currency from the drop-down values.
<b>Total Amount</b>	Displays the total batch amount in instrument currency.
<b>Entry Details</b>	Specify the fields.
<b>Payee Account</b>	Specify the payee account number.
<b>Account Name</b>	Displays the name of the payee account number specified.
<b>Account Currency</b>	Displays the currency of the payee account number specified.
<b>Account Branch</b>	Displays the branch code of the payee account number specified.
<b>Instrument Type</b>	Select the instrument type from the drop-down values.
<b>Drawer Account</b>	Specify the drawer account number.
<b>Drawer Name</b>	Specify the name of drawer account.

Field	Description
<b>Instrument No</b>	Specify the instrument number.
<b>Instrument Date</b>	Specify the date of the instrument.
<b>Instrument Amount</b>	Specify the amount of the instrument.
<b>Clearing Type</b>	Select the clearing type for the deposited instrument.
<b>Drawer Routing No</b>	Specify the routing number of the cheque. You can also select from the list of values.
<b>Narrative</b>	Displays the default narrative <b>Outward Clearing Data Entry</b> and it can be modified.
<b>Add Entry</b>	Click this icon to add multiple records in table and allows modifying or deleting if required.
<b>Reset</b>	Click this icon to clear the inputted entry details before you add the entries.

### 2.9.4.2 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On submission of data entry, the individual instrument details will be handed off to Oracle Banking Payments using Outward Clearing Service.

In case of reject acknowledgment of any transaction from Oracle Banking Payments, the teller can retry the individual record from the EJ screen until the batch is in Pending status.

## 2.10 Remittances

This section describes the various types of remittances performed. The remittances are categorized into following sub-sections:

- [2.10.1 Bankers Cheque](#)
- [2.10.2 Demand Drafts](#)
- [2.10.3 Cash Remittance](#)
- [2.10.4 Travellers Cheque](#)
- [2.10.5 Instrument Status Update](#)

### 2.10.1 Bankers Cheque

This sub-section describes the various screens used to perform the remittances related to Bankers Cheque (BC). The screens are described in the following topics:

- [2.10.1.1 BC Issue Against Customer Account](#)
- [2.10.1.2 BC Issue Against Walk-in](#)
- [2.10.1.3 BC Issue Against GL](#)
- [2.10.1.4 BC Print/Re-print](#)
- [2.10.1.5 BC Operations](#)
- [2.10.1.6 Multi BC Issuance](#)

### 2.10.1.1 BC Issue Against Customer Account

The Teller can use this screen to issue a BC against the savings account of a customer. To process this screen, type **BC Issue - Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **BC Issue - Account**.

→ The **BC Issue Against Account** screen is displayed.

**Figure 120: BC Issue Against Account**

The screenshot shows the 'BC Issue Against Account' screen. The top bar includes the title 'Servicing Transaction - BC Issue Against Account', a 'Customer Search' button, and a search icon. The right side of the top bar displays 'TRN-HEL240890009019, Branch Date - Mar 30, 2018'. The main form area is divided into several sections:

- Issuing Bank Information:** Issuing Bank Code (000), Issuing Branch Code (HEL), Issuing Bank Name (Flexcube Test), Branch Name (HEL).
- Payable Bank Information:** Payable Bank Code (000), Payable Branch Code, Payable Bank Name (Flexcube Test), Payable Branch Name.
- BC Details:** BC Amount (GBP), BC Date (Mar 30, 2018), MICR No, BC No.
- Payee Details:** Payee Name, Address Line 1, Address Line 2, Address Line 3, Address Line 4, Identification Type, Payee Identification Number.
- Narrative:** BC Issuance Against Account.
- Funding Details:** A section at the bottom left.
- Alerts:** A section on the right with a 'No Data to Display' message.

The bottom right corner features three buttons: 'Submit', 'Clear', and 'Cancel'.

### 2.10.1.1.1 Main Transaction Details

Specify the details in the **BC Issue Against Account** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: BC Issue Against Account](#).

#### Field Description: BC Issue Against Account

Field	Description
<b>Issuing Bank Code</b>	Click <b>Search</b> icon and select the issuing bank code of the inventory from the list of values.
<b>Issuing Bank Name</b>	Displays the description based on the issuing bank code selection.
<b>Issuing Branch Code</b>	Displays the code of the logged-in branch.
<b>Branch Name</b>	Displays the description of issuing branch.
<b>Payable Bank Code</b>	<p>Select the payable bank code. The list of values contain the bank codes maintained using <b>External Bank Code Maintenance</b> screen.</p> <p><b>NOTE:</b> To remit funds within the same bank, select the logged-in bank code as payable bank code. To remit funds across banks, select the necessary bank code as payable bank code. The fields <b>Payable Branch Code</b> and <b>Payable Branch Name</b> will be enabled after you specify the <b>Payable Bank Code</b>.</p>
<b>Payable Bank Name</b>	Displays the name of the selected bank code.
<b>Payable Branch Code</b>	Select the branch code of the payable bank. The list of values contain the corresponding branch codes maintained using <b>Bank Code Maintenance</b> screen.

Field	Description
<b>Payable Branch Name</b>	Displays the branch name of the selected branch code.
<b>BC Amount</b>	Select the BC currency from the drop-down list and specify the BC amount.
<b>BC Date</b>	Select the date that needs to be mentioned in the BC. The current posting date is displayed by default.
<b>MICR No</b>	Specify the MICR number and validate. If not specified, the system generates the MICR number based on the maintenance setup.
<b>BC No</b>	Displays the BC number.
<b>Mode of Charge</b>	Select the mode of charge from the drop-down values ( <b>Account</b> or <b>Other Account</b> ).
<b>Charge Account</b>	<p>Specify the charge account number. The following conditions applies based on the value selected for <b>Mode of Charge</b>:</p> <ul style="list-style-type: none"> <li>If the <b>Mode of Charge</b> is selected as <b>Account</b>, user needs to capture the account from which the charges to be deducted.</li> </ul> <p><b>NOTE:</b> If the <b>Mode of Charge</b> is selected as <b>Account</b>, the system displays the Drawer Account by default. Else, this field is kept blank and user can input the valid account number.</p> <ul style="list-style-type: none"> <li>If <b>Mode of Charge</b> is selected as <b>Other Account</b>, user needs to capture other account number.</li> </ul>
<b>Payee Details</b>	Specify the fields.

Field	Description
<b>Payee Name</b>	Specify the payee name on which the BC is drawn.
<b>Address Line 1 to Address Line 4</b>	Specify the address of the payee.
<b>Identification Type</b>	Select the identification type of the payee from the drop-down list.
<b>Payee Identification Number</b>	Specify the identification number of the payee.
<b>Narrative</b>	Displays the default narrative <b>BC Issuance Account</b> and it can be modified.

<b>Identification Type</b>	Select the identification type of the payee from the drop-down list.
<b>Identification Number</b>	Specify the identification number of the payee.
<b>Exchange Rate</b>	Displays the exchange rate.

Field	Description
	<b>NOTE:</b> If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Total Charges</b>	Displays the total charges applicable for the BC issuance.  <b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b> .

### 2.10.1.2.3 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.10.1.2.4 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.10.1.2.5 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

For more information on transaction submission and validations, refer to the topic [2.10.1.1.4 Transaction Submission](#) in this guide.

### 2.10.1.3 BC Issue Against GL

The Teller can use this screen to issue a BC against a GL account for the customer. To process this screen, type **BC Issue - GL** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **BC Issue - GL**.

→ The **BC Issue Against GL** screen is displayed.

### 2.10.1.3.1 Main Transaction Details

Specify the details in the **BC Issue Against GL** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: BC Issue Against GL](#).

**Field Description: BC Issue Against GL**

Field	Description
<b>Issuing Bank Code</b>	Click <b>Search</b> icon and select the issuing bank code of the inventory from the list of values.
<b>Issuing Bank Name</b>	Displays the description based on the issuing bank code selection.
<b>Issuing Branch Code</b>	Displays the logged-in branch code.
<b>Branch Name</b>	Displays the description of issuing branch.
<b>Payable Bank Code</b>	<p>Select the payable bank code. The list of values contain the bank codes maintained using <b>External Bank Code Maintenance</b> screen.</p> <p><b>NOTE:</b> To remit funds within the same bank, select the logged-in bank code as payable bank code. To remit funds across banks, select the necessary bank code as payable bank code. The fields <b>Payable Branch Code</b> and <b>Payable Branch Name</b> will be enabled after you specify the <b>Payable Bank Code</b>.</p>
<b>Payable Bank Name</b>	Displays the name of the selected bank code.
<b>Payable Branch Code</b>	Select the branch code of the payable bank. The list of values contain the corresponding branch codes maintained using <b>Bank Code Maintenance</b> screen.

Field	Description
<b>Payable Branch Name</b>	Displays the branch name of the selected branch code.
<b>BC Amount</b>	Select the BC currency from the drop-down list and the BC amount.
<b>BC Date</b>	Select the date that needs to be mentioned in the BC. The current posting date is displayed by default.
<b>BC No</b>	Specify the instrument number and validate.  <b>NOTE:</b> If not specified, the system generates the BC number based on the maintenance setup.
<b>MICR Number</b>	Displays the MICR number.
<b>Payee Details</b>	Specify the fields.
<b>Payee Name</b>	Specify the payee name on which the BC is drawn.
<b>Address Line 1 to Address Line 4</b>	Specify the address of the payee.
<b>Identification Type</b>	Select the identification type of the payee from the drop-down list.
<b>Payee Identification Number</b>	Specify the identification number of the payee.
<b>Narrative</b>	Displays the default narrative <b>BC Issuance Against GL</b> and it can be modified.

### 2.10.1.3.2 Funding Details

**Figure 125: Funding Details**

Specify the details in the **Funding Details** segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Funding Details](#).

**Field Description: Funding Details**

Field	Description
<b>GL Account</b>	Select the account number of the GL against which the BC is issued from the LOV.
<b>GL Description</b>	Displays a brief description on the general ledger.
<b>Drawer Name</b>	Specify the name of the drawer.
<b>Identification Type</b>	Select the identification type of the payee from the drop-down list.
<b>Identification Number</b>	Specify the identification number of the payee.

### 2.10.1.3.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.10.1.3.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

For more information on transaction submission and validations, refer to the topic [2.10.1.1.4 Transaction Submission](#) in this guide.

### 2.10.1.4 BC Print/Re-print

The Teller can use this screen to print a BC. It also used to re-print the BC, if it is not properly printed or to issue duplicate instruments. The system keeps a track of such reprints so that the bank officials or auditors can determine the reasons and validity of multiple instrument printing.

To process this screen, type **BC Print-Reprint** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **BC Print-Reprint**.

→ The **BC Print-Reprint** screen is displayed.

**Figure 126: BC Print-Reprint**

The screenshot displays the 'BC Print-Reprint' application window. It features a two-column layout of input fields. The left column includes fields for 'Bankers Cheque No \*', 'Print Type \*' (a dropdown menu), 'Issuing Branch Code', 'BC Date' (with a calendar icon), 'Drawer Name', 'Beneficiary Details:-' (a section header), 'Beneficiary Name', 'Address Line 1', 'Address Line 3', 'Reprint Count', and 'Narrative \*'. The right column includes 'Issue Branch Code \*' (with a search icon), 'Query' and 'Clear' buttons, 'BC Amount', 'BC Status', 'Identification Details' (a section header), 'Address Line 2', and 'Address Line 4'. At the bottom right, there are 'Submit', 'Clear', and 'Cancel' buttons.

#### 2.10.1.4.1 BC Transaction Details

Specify the details in the **BC Print-Reprint** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: BC Print-Reprint](#).

**Field Description: BC Print-Reprint**

<b>Field</b>	<b>Description</b>
<b>Bankers Cheque No</b>	Specify the BC number of the instrument that you need to print or re-print.
<b>Issue Branch Code</b>	Select the branch code where the instrument is issued from the LOV.
<b>Print Type</b>	Select the type <b>Print</b> or <b>Reprint</b> from the drop-down list.
<b>Query</b>	Click this icon to fetch details of BC transaction.
<b>Issuing Branch Code</b>	Displays the logged-in branch code.
<b>BC Date</b>	Displays the date mentioned in the BC.
<b>BC Amount</b>	Displays the BC currency and the BC amount.
<b>Drawer Name</b>	Displays the name of the drawer.
<b>BC Status</b>	Displays the status of the BC.
<b>Beneficiary Details</b>	Specify the fields.
<b>Beneficiary Name</b>	Displays the beneficiary name.
<b>Identification Details</b>	Displays the identification details of the beneficiary.
<b>Address Line 1 to Address Line 4</b>	Specify the address of the beneficiary.
<b>Reprint Count</b>	Specify the count of the current reprint operation. This is applicable for reprint option only.

Field	Description
Narrative	Displays the default narrative as <b>Print/Reprint</b> and it can be modified.

#### 2.10.1.4.2 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves.

#### 2.10.1.5 BC Operations

The Teller can use this screen to handle the life cycle processing of Bankers Cheque that is already issued. The operations, which are allowed in this screen are:

- Inquiry – Teller can use this option to inquire the details of BC.
- Revalidate – When a customer requests for revalidation of instrument that is in expired status, Teller can validate the instrument details and initiate revalidation of BC. The system will allow for revalidation only if:
  - Revalidation is allowed at Instrument type level
  - Instrument is not liquidated, cancelled, or refunded
  - Instrument is issued, revalidated, or duplicate issued but not liquidated/refunded/cancelled
  - Rule based authorization is not supported for revalidation
- Duplicate Issue – If Customer or banker lost the instrument or if the instrument is damaged, Teller can issue it again. In case of request raised by the customer, additional charges will be deducted while issuing again. The system will allow for Duplicate Issue only if:
  - Duplicate issue is allowed at Instrument type level
  - Instrument is not liquidated, cancelled, or refunded
  - Instrument is issued or revalidated but not liquidated/refunded/cancelled
  - Rule based authorization is not supported for duplicate issue

- Payment Reversal – Reversal of BC Payment is supported through Electronic Journal/Service Journal.
- Payment – Teller can use this option to make payment against a BC.
- Refund – Teller can use this option to refund the amount against a BC.
- Cancel – Teller can use this option to cancel a BC.

To process this screen, type **BC Operations** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **BC Operations**.

→ The **BC Operations** screen is displayed.

#### Inquiry Mode:

**Figure 127: BC Operations (Inquiry)**

The screenshot shows the 'Teller Transaction - BC Operations' screen. The title bar indicates 'TRN-HEL240890009067, Branch Date - Mar 30, 2018'. The main area is divided into several sections:

- BC Operations**: Contains fields for BC No, Issuing Bank Code, Issue Branch, BC Currency, Operation Type (set to Enquiry), and a Query button.
- BC Details**: Includes Issuing Bank Code, Payable Branch, BC Amount, Issue Date, BC Status, Revalidation Date, and Liquidation Date.
- Beneficiary Details**: Includes Beneficiary Name, Exchange Rate, Beneficiary Address 1, Identification Type, Beneficiary Account, Credit Amount, Beneficiary Address 2, and Identification Number.
- Summary/Status**: Shows Current Till Position (GBP), Filters (Min: 0, Max: 5,000,000), and a large green button displaying £0.01M.
- Memo Alerts**: A green button indicating 'No Data to Display'.
- Frequent Customer Operations**: A section for customer operations.
- Alerts**: A section indicating 'No record to display'.

At the bottom right, there are buttons for Submit, Clear, and Cancel.

### 2.10.1.5.1 Main Transaction Details (Inquiry Mode)

Specify the details in the **BC Operations** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: BC Operations \(Inquiry\)](#).

**Field Description: BC Operations (Inquiry)**

Field	Description
<b>BC No</b>	Specify the BC number of the instrument.
<b>Issuing Bank Code</b>	Click <b>Search</b> icon and select the issuing bank code of the inventory from the list of values.
<b>Issue Branch</b>	Select the branch code where the instrument is issued from the LOV. After you specify the <b>Issue Branch Code</b> and <b>Bankers Cheque No</b> , press <b>Tab</b> key. The system will make a service call to Oracle Banking Payments and fetch the bankers cheque details.
<b>BC Currency</b>	Specify BC Currency to query instrument details.
<b>Operation Type</b>	Select the type <b>Inquiry</b> from the drop-down list.
<b>Query</b>	Click this icon to fetch instrument details.
<b>BC Details</b>	Displays the details of BC under this segment.
<b>Issuing Bank Code</b>	Click <b>Search</b> icon and select the issuing bank code of the inventory from the list of values.
<b>Issue Branch</b>	Displays the logged-in branch code.
<b>Payable Bank Code</b>	Displays the payable bank code.
<b>Payable Branch</b>	Displays the payable branch for the BC.

Field	Description
<b>BC Amount</b>	Displays the BC currency and the BC amount.
<b>MICR No</b>	Displays the MICR number.
<b>Issue Date</b>	Displays the issue date mentioned in the BC.
<b>Issue Mode</b>	Displays the issue mode of the BC.
<b>Bankers Cheque Status</b>	Displays the status of the BC.
<b>Narrative</b>	Displays the default narrative as <b>BC Inquiry</b> and it can be modified.
<b>Revalidation Date</b>	Displays the date of BC revalidation.
<b>Duplicate Issue Date</b>	Displays the duplicate issue date of BC.
<b>Liquidation Date</b>	Displays the liquidation date of BC.
<b>Liquidation Mode</b>	Displays the liquidation mode of BC.
<b>Beneficiary Details</b>	Specify the fields.
<b>Beneficiary Name</b>	Displays the beneficiary name.
<b>Beneficiary Account</b>	Displays the beneficiary account number.
<b>Customer ID</b>	Displays the Customer ID.
<b>Exchange Rate</b>	<p>Displays the exchange rate and it can be modified.</p> <p><b>NOTE:</b> If the transaction currency is the same as the account currency, the system will display the exchange rate as 1.</p>

Field	Description
<b>Credit Amount</b>	Displays the credit amount.
<b>Beneficiary Address 1 and Beneficiary Address 2</b>	Displays the address of the beneficiary.
<b>Identification Type</b>	Displays the identification type of the beneficiary.
<b>Identification Number</b>	Displays the identification number of the beneficiary.
<b>Funding Details</b>	Funding details are displayed under this segment.
<b>Drawer Name</b>	Displays the drawer name.
<b>Drawer Account</b>	Displays the account number of the drawer.
<b>Customer ID</b>	Displays the customer ID of the drawer.
<b>Exchange Rate</b>	Displays the exchange rate.
<b>Debit Amount</b>	Displays the amount that needs to be debited from the drawer account.
<b>Cheque Number</b>	Displays the cheque number.
<b>Cheque Date</b>	Displays the date mentioned in the cheque.
<b>Drawer Address 1 and Drawer Address 2</b>	Displays the address of the drawer.
<b>Identification Type</b>	Displays the identification type of the drawer.
<b>Identification Number</b>	Displays the identification number of the drawer.

The screenshot displays the 'Teller Transaction - BC Operations' interface. The top header shows the transaction ID 'TRN-HEL2408900009041' and the branch date 'Mar 30, 2018'. The main form is divided into several sections:

- BC Operations:** Contains fields for 'BC No' (9009002), 'Issuing Bank Code' (ZENB), 'Issue Branch' (HEL), 'BC Currency' (GBP), 'Operation Type' (Refund), and 'Operation Mode' (Account). A 'Query' button is present.
- Refund Details:** Includes 'Beneficiary Account', 'Identification Type', 'Exchange Rate' (1), and 'Narrative' (BC Refund by Account).
- Beneficiary Information:** Fields for 'Beneficiary Name', 'Identification Number', and 'Account Amount' (GBP 200.00).
- Charge Details:** A section with a 'View BC Details' link.
- Alerts:** A section with a 'No Data to Display' message.
- Frequent Customer Operations:** A section with a 'No record to display' message.

At the bottom right, there are 'Submit', 'Clear', and 'Cancel' buttons.

**2.10.1.5.7 Main Transaction Details (Refund – Account)**

Specify the details in the **BC Operations** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: BC Operations \(Refund – Account\)](#).

**Field Description: BC Operations (Refund – Account)**

Field	Description
<b>BC No</b>	Specify the BC number of the instrument.
<b>Issuing Bank Code</b>	Click <b>Search</b> icon and select the issuing bank code of the inventory from the list of values.
<b>Issue Branch</b>	Select the branch code where the instrument is issued from the LOV.
<b>BC Currency</b>	Specify BC Currency to query instrument details.

Field	Description
Operation Type	Select the type <b>Refund by Account</b> from the drop-down list.
Operation Type	Select the type <b>Refund</b> from the drop-down list.
Operation Mode	Select the operation mode as <b>Account</b> from the drop-down values.
Query	Click this icon to fetch instrument details.
Refund Details	Specify the details under this segment.
Beneficiary Account	Displays the beneficiary account number.
Beneficiary Name	Displays the beneficiary name.
Identification Type	Select the identification type of the beneficiary from the drop-down values.
Identification Number	Specify the identification number of the beneficiary.
Exchange Rate	<p>Displays the exchange rate and it can be modified.</p> <p><b>NOTE:</b> If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
Account Amount	<p>Displays the account amount.</p> <p><b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>

Field	Description
<b>Total Charge Amount</b>	Displays the total charge amount.  <b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Narrative</b>	Displays the default narrative as <b>BC Refund by Account</b> and it can be modified.

**Refund – Cash:****Figure 134: BC Operations (Refund – Cash)**

The screenshot displays the 'Teller Transaction - BC Operations' interface. The main form includes the following sections:

- BC Operations:**
  - BC No \* (1011)
  - Issue Branch \* (HEL)
  - Operation Type \* (Refund)
  - Issuing Bank Code \* (ZENB)
  - BC Currency \* (GBP)
  - Operation Mode \* (Cash)
- Refund Details:**
  - Transaction Amount (GBP £44.00)
  - Identification Type
  - Exchange Rate (1)
- Beneficiary Information:**
  - Beneficiary Name
  - Identification Number
  - Narrative \* (BC Refund by Cash)
- Summary/Details:**
  - Charge Details
  - Denomination
  - View BC Details

On the right side, there is a 'Current Till Position' gauge showing £0.01M, 'Memo Alerts' (No Data to Display), and 'Frequent Customer Operations'. At the bottom right, there are 'Alerts' (No record to display) and navigation buttons: Submit, Clear, and Cancel.

**2.10.1.5.8 Main Transaction Details (Refund – Cash)**

Specify the details in the **BC Operations** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: BC Operations \(Refund – Cash\)](#).

**Field Description: BC Operations (Refund – Cash)**

<b>Field</b>	<b>Description</b>
<b>BC No</b>	Specify the BC number of the instrument.

<b>GL Account</b>	Specify the GL account number.
<b>GL Currency</b>	Displays the currency of the specified GL account.
<b>GL Branch</b>	Displays the branch code of the specified GL account.
<b>Exchange Rate</b>	<p>Displays the exchange rate and it can be modified.</p> <p><b>NOTE:</b> If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>

Field	Description
Account Amount	Displays the account amount.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
Total Charge Amount	Displays the total charge amount.  <b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
Narrative	Displays the default narrative as <b>BC Cancel by GL</b> and it can be modified.

#### 2.10.1.5.13 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. This segment is not applicable for the **Inquiry** and **Cancel** modes. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

#### 2.10.1.5.14 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. This segment is applicable to the **Cash** modes. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

#### 2.10.1.5.15 View Bankers Cheque Details

This segment is used to view the additional details of the BC. This will be a non-editable data segment and it is not applicable for the **Inquiry** mode.

### 2.10.1.5.16 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction submission, the system will handoff the details to payments product processor (Oracle Banking Payments) for processing. When you get success notification from Oracle Banking Payments, the system will update the transaction status as **Success** and mark for charges accounting handoff. The transaction accounting is not applicable for the transaction. In case of reject notification from Oracle Banking Payments, the system will discard the transaction. In addition, the transaction accounting is not applicable for the **Duplicate Issue** mode and the transaction submission is not required for **Inquiry** mode.

### 2.10.1.6 Multi BC Issuance

The Teller can use this screen to issue bankers cheques against multiple beneficiaries for a single remitter account. In addition, it is used to issue bankers cheque against Cash GL for walk-in customers.

To process this screen, type **Multi BC Issuance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **Multi BC Issuance**.  
→ The **Multi BC Issuance** screen is displayed.

<b>Payable Bank Name</b>	Displays the bank name of the specified payable bank code.
<b>Payable Branch Code</b>	Select the payable branch code from the list of values.
<b>Payable Branch Name</b>	Displays the bank name of the specified payable branch code.
<b>BC Amount</b>	Specify the BC amount and currency.
<b>MICR Number</b>	Specify the MICR number.
<b>BC Number</b>	Specify the BC number.
<b>Address Line 1 to Address Line 4</b>	Specify the address of the payee.
<b>Narrative</b>	Displays the default narrative <b>Multi BC Issuance</b> and it can be modified.

Field	Description
<b>Add Entry</b>	After filling the necessary fields, click this icon to add a new entry.
<b>Reset</b>	Click this icon to reset the added entries.

### 2.10.1.6.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. This segment is applicable only to the **Cash** mode. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.10.1.6.4 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. This segment is applicable to the **Cash** mode. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.10.1.6.5 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction submission, the system creates an individual BC transaction, and hand-off individual BC issue request to Oracle Banking Payments system. Once the individual BC transaction is created in Oracle Banking Payments, the system will hand-off the consolidated accounting to FLEXCUBE Universal Banking by debiting Customer Account/Cash GL for the total consolidated amount, and crediting the intermediary bridge GL. In case of any rejection from Oracle Banking Payments, the system will not consider the transaction for accounting to FLEXCUBE Universal Banking during console entry.

## 2.10.2 Demand Drafts

This sub-section describes the various screens used to perform the remittances related to Demand Draft (DD). The screens are described in the following topics:

- [\*2.10.2.1 DD Issue Against Account\*](#)
- [\*2.10.2.2 DD Issue Against Walk-in\*](#)
- [\*2.10.2.3 DD Issue against GL\*](#)
- [\*2.10.2.4 DD Print/Re-print\*](#)
- [\*2.10.2.5 DD Operations\*](#)

### 2.10.2.1 DD Issue Against Account

The Teller can use this screen to issue a Demand Draft (DD) against the savings account of the customer. To process this screen, type **DD Issue - Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **DD Issue - Account**.

→ The **DD Issue Against Account** screen is displayed.

**Figure 141: DD Issue Against Account**

#### 2.10.2.1.1 Main Transaction DD Details

Specify the details in the **DD Issue Against Account** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: DD Issue Against Account](#).

**Field Description: DD Issue Against Account**

<b>Field</b>	<b>Description</b>
<b>Issuing Bank Code</b>	Click <b>Search</b> icon and select the issuing bank code of the inventory from the list of values.
<b>Issuing Bank Name</b>	Displays the description based on the issuing bank code selection.
<b>Issuing Branch Code</b>	Displays the logged-in branch code.
<b>Branch Name</b>	Displays the branch description of issuing branch.
<b>Payable Bank Code</b>	<p>Select the payable bank code. The list of values contain the bank codes maintained using <b>External Bank Code Maintenance</b> screen.</p> <p><b>NOTE:</b> To remit funds within the same bank, select the logged-in bank code as payable bank code. To remit funds across banks, select the necessary bank code as payable bank code. The fields <b>Payable Branch Code</b> and <b>Payable Branch Name</b> will be enabled after you specify the <b>Payable Bank Code</b>.</p>
<b>Payable Bank Name</b>	Displays the name of the selected bank code.
<b>Payable Branch Code</b>	Select the branch code of the payable bank. The list of values contain the corresponding branch codes maintained using <b>Bank Code Maintenance</b> screen.
<b>Payable Branch Name</b>	Displays the branch name of the selected branch code.
<b>DD Amount</b>	Specify the DD currency and DD amount.
<b>DD Date</b>	Specify the date that needs to be mentioned in the DD.

Field	Description
<b>MICR No</b>	Displays the MICR number.
<b>DD No</b>	Specify the instrument number and validate. If not specified, system generates the DD number based on the maintenance setup.
<b>Narrative</b>	Displays the narrative as <b>DD Issuance Account</b> and it can be modified.
<b>Payee Details</b>	Specify the fields.
<b>Payee Name</b>	Specify the payee name on which the DD is drawn.
<b>Address Line 1 to Address Line 4</b>	Specify the address of the payee.

### 2.10.2.1.2 Funding Details

Figure 142: Funding Details

**Funding Details**

**Field Description: Funding Details**

<b>Field</b>	<b>Description</b>
<b>Drawer Account</b>	Specify the account number of the customer who has requested the DD.
<b>Drawer Name</b>	Displays the name of the specified drawer account number.
<b>Cheque Number</b>	Specify the cheque number of the drawer account.
<b>Cheque Date</b>	Specify the date as mentioned in the cheque.
<b>Exchange Rate</b>	<p>Displays the exchange rate.</p> <p><b>NOTE:</b> If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Account Amount</b>	<p>Displays the account amount in account currency.</p> <p><b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>
<b>Mode of Charge</b>	Select the mode of charge from the following drop-down values ( <b>Account</b> or <b>Other Account</b> ).
<b>Charge Account</b>	<p>This field is populated based on the following criteria:</p> <ul style="list-style-type: none"> <li>• If <b>Account</b> is selected as <b>Mode of Charge</b>, the drawer account number will be selected as charge account.</li> <li>• If <b>Other Account</b> is selected as <b>Mode of Charge</b>, specify the other account number in this field.</li> </ul>

Field	Description
<b>Total Charges</b>	<p>Displays the total charges applicable for the DD issuance.</p> <p><b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>

### 2.10.2.1.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.10.2.1.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

For more information on transaction submission and validations, refer to the topic [2.10.1.1.4 Transaction Submission](#) in this guide.

### 2.10.2.2 DD Issue Against Walk-in

The Teller can use this screen to issue a DD to a walk-in customer. To process this screen, type **DD Issue - Walk-in** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **DD Issue - Walk-in**.

→ The **DD Issue Against Walk-in** screen is displayed.

**Figure 143: DD Issue Against Walk-in**

The screenshot shows the 'Teller Transaction - DD Issue against Walk-in' window. The main area contains several sections:
 

- Issuing Bank Details:** Issuing Bank Code (000), Issuing Branch Code (HEL), Payable Bank Code (000), and Payable Branch Code.
- DD Details:** DD Amount (GBP), MICR No, DD Date (Mar 30, 2018), and DD No.
- Payee Details:** Payee Name, Address Line 1, Address Line 2, Address Line 3, and Address Line 4.
- Narrative:** DD Issuance Against Walk-in.
- Funding Details** and **Denomination Details** are shown as expandable sections at the bottom.

 The right sidebar displays:
 

- Current Till Position:** A gauge showing £0.01M with filters for GBP and a range from 0 to 5,000,000.
- Memo Alerts:** A green button indicating 'No Data to Display'.
- Frequent Customer Operations:** A section for customer history.
- Alerts:** A section indicating 'No record to display'.

 At the bottom right, there are 'Submit', 'Clear', and 'Cancel' buttons.

#### 2.10.2.2.1 Main Transaction DD Details

Specify the details in the **DD Issue Against Walk-in** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: DD Issue Against Walk-in](#).

**Field Description: DD Issue Against Walk-in**

Field	Description
<b>Issuing Bank Code</b>	Click <b>Search</b> icon and select the issuing bank code of the inventory from the list of values.

Field	Description
<b>Issuing Bank Name</b>	Displays the description based on the issuing bank code selection.
<b>Issuing Branch Code</b>	Displays the logged-in branch code.
<b>Branch Name</b>	Displays the branch description of issuing branch
<b>Payable Bank Code</b>	<p>Select the payable bank code. The list of values contain the bank codes maintained using <b>External Bank Code Maintenance</b> screen.</p> <p><b>NOTE:</b> To remit funds within the same bank, select the logged-in bank code as payable bank code. To remit funds across banks, select the necessary bank code as payable bank code. The fields <b>Payable Branch Code</b> and <b>Payable Branch Name</b> will be enabled after you specify the <b>Payable Bank Code</b>.</p>
<b>Payable Bank Name</b>	Displays the name of the selected bank code.
<b>Payable Branch Code</b>	Select the branch code of the payable bank. The list of values contain the corresponding branch codes maintained using <b>Bank Code Maintenance</b> screen.
<b>Payable Branch Name</b>	Displays the branch name of the selected branch code.
<b>DD Amount</b>	Specify the DD currency and DD amount.
<b>DD Date</b>	Specify the date that needs to be mentioned in the DD.
<b>MICR No</b>	Displays the serial number.
<b>DD No</b>	Specify the instrument number and validate.

Field	Description
	<b>NOTE:</b> If not specified, system generates the DD number based on the maintenance setup.
<b>Narrative</b>	Displays the narrative as <b>DD Issuance against Walk-in</b> and it can be modified.
<b>Payee Details</b>	Specify the fields.
<b>Payee Name</b>	Specify the payee name on which the DD is drawn.
<b>Address Line 1 to Address Line 4</b>	Specify the address of the payee.

## 2.10.2.2.2 Funding Details

**Figure 144: Funding Details**

Specify the details in the **Funding Details** segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Funding Details](#).

**Field Description: Funding Details**

Field	Description
<b>Transaction Amount</b>	Specify the transaction currency, the currency in which the walk-in customer deposit the cash.
<b>Drawer Name</b>	Specify the name of the drawer.

Field	Description
<b>Address Line 1 to Address Line 4</b>	Specify the address of the payee.
<b>Identification Type</b>	Select the identification type of the payee from the drop-down list.
<b>Identification Number</b>	Specify the identification details of the payee.
<b>Exchange Rate</b>	Displays the exchange rate.  <b>NOTE:</b> If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Total Charges</b>	Displays the total charges applicable for the DD issuance.  <b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b> .

### 2.10.2.2.3 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.10.2.2.4 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.10.2.2.5 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

For more information on transaction submission and validations, refer to the topic

[2.10.1.1.4 Transaction Submission](#) in this guide.

### 2.10.2.3 DD Issue against GL

The Teller can use this screen to issue a DD against a GL account for the customer. To process this screen, type **DD Issue - GL** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **DD Issue - GL**.

→ The **DD Issue Against GL** screen is displayed.

### 2.10.2.3.1 Main Transaction DD Details

Specify the details in the **DD Issue Against GL** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: DD Issue Against GL](#).

**Field Description: DD Issue Against GL**

Field	Description
<b>Issuing Bank Code</b>	Click <b>Search</b> icon and select the issuing bank code of the inventory from the list of values.
<b>Issuing Bank Name</b>	Displays the description based on the issuing bank code selection.
<b>Issuing Branch Code</b>	Displays the logged-in branch code.
<b>Branch Name</b>	Displays the branch description of issuing branch
<b>Payable Bank Code</b>	<p>Select the payable bank code. The list of values contain the bank codes maintained using <b>External Bank Code Maintenance</b> screen.</p> <p><b>NOTE:</b> To remit funds within the same bank, select the logged-in bank code as payable bank code. To remit funds across banks, select the necessary bank code as payable bank code. The fields <b>Payable Branch Code</b> and <b>Payable Branch Name</b> will be enabled after you specify the <b>Payable Bank Code</b>.</p>
<b>Payable Bank Name</b>	Displays the name of the selected bank code.
<b>Payable Branch Code</b>	Select the branch code of the payable bank. The list of values contain the corresponding branch codes maintained using <b>Bank Code Maintenance</b> screen.

Field	Description
<b>Payable Branch Name</b>	Displays the branch name of the selected branch code.
<b>DD Amount</b>	Specify the DD currency and DD amount.
<b>DD Date</b>	Specify the date that needs to be mentioned in the DD.
<b>MICR No</b>	Displays the serial number.
<b>DD No</b>	Specify the instrument number and validate.  <b>NOTE:</b> If not specified, system generates the DD number based on the maintenance setup.
<b>Narrative</b>	Displays the narrative as <b>DD Issuance Against GL</b> and it can be modified.
<b>Payee Details</b>	Specify the fields.
<b>Payee Name</b>	Specify the payee name on which the DD is drawn.
<b>Address Line 1 to Address Line 4</b>	Specify the address of the payee.

### 2.10.2.3.2 Funding Details

Figure 146: Funding Details

The screenshot shows a form titled "Funding Details". It contains the following fields:

- GL Account \***: A text input field with a magnifying glass icon.
- GL Description**: A text input field.
- Drawer Name**: A text input field.
- Identification Type**: A dropdown menu with "Select" as the current value.
- Identification Number**: A text input field.

Specify the details in the **Funding Details** segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Funding Details](#).

**Field Description: Funding Details**

<b>Field</b>	<b>Description</b>
<b>GL Account</b>	Select the account number of the GL against which the BC is issued from the LOV.
<b>GL Description</b>	Displays a brief description on the general ledger.
<b>Drawer Name</b>	Specify the name of the drawer.
<b>Identification Type</b>	Select the identification type of the payee from the drop-down list.
<b>Identification Number</b>	Specify the identification number of the payee.

**2.10.2.3.3 Charge Details**

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

**2.10.2.3.4 Transaction Submission**

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

For more information on transaction submission and validations, refer to the topic [2.10.1.1.4 Transaction Submission](#) in this guide.

### 2.10.2.4 DD Print/Re-print

The Teller can use this screen to print a DD. It also used to re-print the DD, if it is not properly printed or to issue duplicate instruments. The system keeps a track of such re-prints so that the bank officials or auditors can determine the reasons and validity of multiple instrument printing.

To process this screen, type **DD Print-Reprint** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **DD Print-Reprint**.

→ The **DD Print-Reprint** screen is displayed.

**Figure 147: DD Print-Reprint**

The screenshot displays the 'DD Print-Reprint' application window. It features a left sidebar with a search bar and a main content area with two columns of input fields. The left column includes fields for 'Demand Draft No \*', 'Print Type \*', 'Issuing Branch Code', 'DD Date', 'Drawer Name', 'Beneficiary Details' (with sub-fields for 'Beneficiary Name', 'Address Line 1', 'Address Line 3', 'Reprint Count', and 'Narrative \*'), and 'DD Print-Reprint'. The right column includes 'Issue Branch Code \*' with a search icon, 'Query' and 'Clear' buttons, 'DD Amount', 'DD Status', 'Identification Details', and 'Address Line 2' through 'Address Line 4'. At the bottom right, there are 'Submit', 'Clear', and 'Cancel' buttons.

#### 2.10.2.4.1 DD Transaction Details

Specify the details in the **DD Print-Reprint** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: DD Print-Reprint](#).

**Field Description: DD Print-Reprint**

<b>Field</b>	<b>Description</b>
<b>Demand Draft No</b>	Specify the DD number of the instrument that you need to print or re-print.
<b>Issue Branch Code</b>	Select the branch code where the instrument is issued from the LOV.
<b>Print Type</b>	Select the type <b>Print</b> or <b>Reprint</b> from the drop-down list.
<b>Query</b>	Click this icon to fetch details of DD print or re-print.
<b>Issuing Branch Code</b>	Displays the logged-in branch code.
<b>DD Date</b>	Displays the date mentioned in the DD.
<b>DD Amount</b>	Displays the DD currency and the DD amount.
<b>Drawer Name</b>	Displays the name of the drawer.
<b>DD Status</b>	Displays the status of the DD.
<b>Beneficiary Details</b>	Specify the fields.
<b>Beneficiary Name</b>	Displays the beneficiary name.
<b>Identification Details</b>	Displays the identification details of the beneficiary.
<b>Address Line 1 to Address Line 4</b>	Specify the address of the beneficiary.
<b>Reprint Count</b>	Specify the count of the current reprint operation. This is applicable for reprint option only.

Field	Description
Narrative	Displays the default narrative as <b>Print/Reprint</b> and it can be modified.

#### 2.10.2.4.2 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves.

#### 2.10.2.5 DD Operations

The Teller can use this screen to handle the life cycle processing of Demand Draft that is already issued. The operations, which are allowed in this screen are:

- Inquiry – Teller can use this option to inquire the details of DD.
- Revalidate – When a customer requests for revalidation of instrument that is in expired status, Teller can validate the instrument details and initiate revalidation of DD. The system will allow for revalidation only if:
  - Revalidation is allowed at Instrument type level
  - Instrument is not liquidated, cancelled, or refunded
  - Instrument is issued, revalidated, or duplicate issued but not liquidated/refunded/cancelled
  - Rule based authorization is not supported for revalidation
- Duplicate Issue – If Customer or banker lost the instrument or if the instrument is damaged, Teller can issue it again. In case of request raised by the customer, additional charges will be deducted while issuing again. The system will allow for Duplicate Issue only if:
  - Duplicate issue is allowed at Instrument type level
  - Instrument is not liquidated, cancelled, or refunded
  - Instrument is issued or revalidated but not liquidated/refunded/cancelled
  - Rule based authorization is not supported for duplicate issue

- Payment Reversal – Reversal of DD Payment is supported through Electronic Journal/Service Journal.
- Payment – Teller can use this option to make payment against a DD.
- Refund – Teller can use this option to refund the amount against a DD.
- Cancel – Teller can use this option to cancel a DD.

To process this screen, type **DD Operations** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **DD Operations**.

→ The **DD Operations** screen is displayed.

<b>Narrative</b>	Displays the default narrative as <b>DD Operations</b> and it can be modified.

**Payment – Cash:****Figure 152: DD Operations (Payment – Cash)**

The screenshot displays the 'Teller Transaction - DD Operations' interface. The top header shows the title and a reference string 'TRN-HEL2408900009177, Branch Date - Mar 30, 2018'. The main form is divided into several sections:

- DD Operations:** Contains fields for 'Demand Draft No' (9009002), 'Issuing Bank Code' (ZENB), 'Issue Branch' (HEL), 'DD Currency' (GBP), 'Operation Type' (Payment), and 'Operation Mode' (Cash). There is a 'Query' button.
- Payment Details:** Includes 'Transaction Amount', 'Identification Type', and 'Exchange Rate' (1).
- Beneficiary Information:** Fields for 'Beneficiary Name', 'Identification Number', and 'Narrative' (Demand Draft Payment by Cash).
- Charge Details:** A section with expandable options: 'Charge Details', 'Denomination', and 'View DD Details'.
- Alerts:** A section on the right with 'Memo Alerts' (No Data to Display) and 'Frequent Customer Operations'.

At the bottom right, there are 'Submit', 'Clear', and 'Cancel' buttons.

**2.10.2.5.5 Main Transaction Details (Payment – Cash)**

Specify the details in the **DD Operations** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: DD Operations \(Payment – Cash\)](#).

**Field Description: DD Operations (Payment – Cash)**

<b>Field</b>	<b>Description</b>
<b>Demand Draft No</b>	Specify the DD number of the instrument.
<b>Issuing Bank Code</b>	Click <b>Search</b> icon and select the issuing bank code of the inventory from the list of values.
<b>Issue Branch</b>	Select the branch code where the instrument is issued from the LOV.
<b>DD Currency</b>	Specify DD Currency to query instrument details.
<b>Operation Type</b>	Select the type <b>Payment</b> from the drop-down list.
<b>Operation Mode</b>	Select the operation mode as <b>Cash</b> from the drop-down values.
<b>Query</b>	Click this icon to fetch instrument details.
<b>Payment Details</b>	Specify the details under this segment.
<b>Transaction Amount</b>	Specify the transaction currency and transaction amount.
<b>Beneficiary Name</b>	Specify the beneficiary name.
<b>Identification Type</b>	Select the identification type of the beneficiary from the drop-down values.
<b>Identification Number</b>	Specify the identification number of the beneficiary.
<b>Exchange Rate</b>	Displays the exchange rate and it can be modified.

Field	Description
	<p><b>NOTE:</b> If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>

Total Charge Amount	Displays the total charge amount.  <b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
Narrative	Displays the default narrative as <b>DD Cancel by GL</b> and it can be modified.

### 2.10.2.5.13 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. This segment is not applicable for the **Inquiry** mode. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.10.2.5.14 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. This segment is applicable to the **Cash** modes. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.10.2.5.15 View Demand Draft Details

This segment is used to view the additional details of the DD. This will be a non-editable data segment and it is not applicable for the **Inquiry** mode.

### 2.10.2.5.16 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction submission, the system will handoff the details to payments product processor (Oracle Banking Payments) for processing. When you get success notification from Oracle Banking Payments, the system will update the transaction status as **Success** and mark for charges accounting handoff. The transaction accounting is not applicable for the transaction. In case of reject notification from Oracle Banking Payments, the system will discard the transaction. In addition, the transaction accounting is not applicable for the **Duplicate Issue** mode and the transaction submission is not required for **Inquiry** mode.

## 2.10.3 Cash Remittance

This sub-section describes the various screens used to perform the cash remittances related to cash remittance. The screens are described in the following topics:

- [2.10.3.1 Cash Remittance Issue](#)
- [2.10.3.2 Cash Remittance Operations](#)
- [2.10.3.3 Inward Remittance Registration](#)

### 2.10.3.1 Cash Remittance Issue

This screen is used to remit funds across branches of the same bank and across banks. To process this screen, type **Cash Remittance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **Cash Remittance Issue**.

→ The **Cash Remittance Issue Against Account** screen is displayed.

<b>Mode of Charge</b>	Select the mode of charge from the drop-down values.

### 2.10.3.1.7 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.10.3.1.8 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. This segment is applicable only to issue mode **Cash**. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.10.3.1.9 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves.

## 2.10.3.2 Cash Remittance Operations

The Teller can use this screen to handle the life cycle processing of cash remittance that is already completed. The operations, which are allowed in this screen are:

- Inquiry – Teller can use this option to inquire the details of issued cash remittance.
- Payment – Teller can use this option to make payment against a cash remittance.
- Refund – Teller can use this option to refund the amount against a cash remittance.
- Cancel – Teller can use this option to cancel a cash remittance.

To process this screen, type **Cash Remittance Operations** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **Cash Remittance Operations**.

→ The **Cash Remittance Operations** screen is displayed.

### 2.10.3.2.1 Main Transaction Details (Inquiry Mode)

Specify the details in the **Cash Remittance Operations** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Cash Remittance Operations \(Inquiry\)](#).

#### Field Description: Cash Remittance Operations (Inquiry)

Field	Description
<b>Issue Branch Code</b>	Select the branch code where the cash remittance is issued from the LOV.
<b>Operation Mode</b>	Select the type <b>Inquiry</b> from the drop-down list.
<b>Remittance No</b>	Specify the cash remittance number.
<b>Test Key No</b>	Specify the test key number.
<b>Query</b>	Click this icon to fetch the cash remittance details.  <b>NOTE:</b> When you click this icon, after you specify the <b>Issue Branch Code</b> and <b>Cash Remittance No</b> , the system will make a service call to Oracle Banking Payments and fetch the cash remittance details.
<b>Remittance Details</b>	Displays the details of cash remittance under this segment.
<b>Issue Branch</b>	Displays the logged-in branch code.
<b>Payable Bank Code</b>	Displays the payable bank code for the cash remittance.
<b>Payable Branch Code</b>	Displays the payable branch code for the cash remittance.

Field	Description
<b>Remittance Amount</b>	Displays the currency and the amount of the cash remittance.
<b>Issue Date</b>	Displays the issue date mentioned in the cash remittance.
<b>Remittance Status</b>	Displays the status of the cash remittance.
<b>Remittance No</b>	Displays the cash remittance number.
<b>Test Key No</b>	Displays the test key number.
<b>Narrative</b>	Displays the default narrative as <b>Cash Remittance Inquiry</b> and it can be modified.
<b>Issue Mode</b>	Displays the issue mode of the Cash Remittance.
<b>Liquidation Date</b>	Displays the liquidation date of Cash Remittance.
<b>Liquidation Mode</b>	Displays the liquidation mode of Cash Remittance.
<b>Beneficiary Details</b>	Specify the fields.
<b>Beneficiary Name</b>	Displays the beneficiary name.
<b>Beneficiary Account</b>	Displays the beneficiary account number.
<b>Address Line 1 to Address Line 4</b>	Displays the address of the beneficiary.
<b>Identification Type</b>	Displays the identification type of the beneficiary.
<b>Identification Number</b>	Displays the identification number of the beneficiary.

<b>Field</b>	<b>Description</b>
<b>Funding Details</b>	Funding details are displayed under this segment.
<b>Remitter Account</b>	Displays the account number of the remitter.
<b>Remitter Name</b>	Displays the remitter name.
<b>Address Line 1 to Address Line 4</b>	Displays the address of the beneficiary.
<b>Cheque Number</b>	Displays the cheque number.
<b>Cheque Date</b>	Displays the date mentioned in the cheque.
<b>Exchange Rate</b>	Displays the exchange rate.
<b>Account Amount</b>	Displays the amount that needs to be debited from the remitter account.
<b>Identification Type</b>	Displays the identification type of the remitter.
<b>Identification Number</b>	Displays the identification number of the remitter.

#### 2.10.3.2.11 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. This segment is not applicable for the **Inquiry** mode. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

#### 2.10.3.2.12 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. This segment is applicable only to operation mode **Cash**. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

#### 2.10.3.2.13 Remittance Details

This segment is used to view the additional details of the remittance. This will be a non-editable data segment and it is not applicable for the **Inquiry** mode.

#### 2.10.3.2.14 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction submission, the system will handoff the request to Oracle Banking Payments using Instrument Pay Service. If the remittance is issued by another bank, the Oracle Banking Branch has to provide the test key number during handoff for validation. On transaction completion, the Oracle Banking Branch will handoff accounting to FLEXCUBE Universal Banking for main leg. In addition, the transaction submission is not required for **Inquiry** mode.

#### 2.10.3.3 Inward Remittance Registration

This screen is used to register an inward remittance and create a remittance instrument. During inward registration, the specified test key will be validated internally to proceed with registration. To process this screen, type **Inward Remittance Registration** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **Inward Remittance Registration**.

→ The **Inward Remittance Registration** screen is displayed.

**2.10.3.3.1 Main Transaction DD Details**

Specify the details in the **Inward Remittance Registration** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Inward Remittance Registration](#).

**Field Description: Inward Remittance Registration**

Field	Description
<b>Inward Remittance Reference</b>	Specify the inward remittance reference issued by the external bank during registration of the remittance.
<b>Remittance Amount</b>	Specify the remittance currency and amount.

Field	Description
	<b>NOTE:</b> By default, the logged-in branch local currency is displayed as remittance currency and it can be modified.
<b>Issuing Bank Code</b>	Specify the code of the external issuing bank.
<b>Issuing Bank Name</b>	Displays the name of the specified external issuing bank.
<b>Issue Branch Code</b>	Specify the branch code of the external issuing bank.
<b>Issue Branch Name</b>	Displays the name of the specified external issuing branch.
<b>Payable Bank Code</b>	Specify the payable bank code.
<b>Payable Bank Name</b>	Displays the payable bank name.
<b>Payable Branch Code</b>	Specify the payable branch code.
<b>Payable Branch Name</b>	Displays the payable branch name.
<b>Remittance Date</b>	Select the issue date of the TT.
<b>Remittance No</b>	Specify the remittance number of the TT.
<b>Test Key No</b>	Specify the test key number.
<b>Narrative</b>	Displays the default narrative as <b>Inward Remittance Registration</b> and it can be modified.
<b>Beneficiary Details</b>	Specify the details under this segment.
<b>Beneficiary Account</b>	Displays the beneficiary account number.

Field	Description
<b>Beneficiary Name</b>	Displays the beneficiary name.
<b>Address Line 1 to Address Line 4</b>	Specify the address of the beneficiary.
<b>Identification Type</b>	Select the identification type of the beneficiary from the drop-down values.
<b>Identification No</b>	Specify the identification number of the beneficiary.
<b>Beneficiary Phone No</b>	Specify the phone number of the beneficiary.
<b>Funding Details</b>	Specify the fields.
<b>Remitter Account</b>	Specify the account number of the remitter.
<b>Remitter Name</b>	Displays the name of the specified remitter account.
<b>Address Line 1 to Address Line 4</b>	Displays the address of the specified remitter account.
<b>Identification Type</b>	Select the identification type of the beneficiary from the drop-down values.
<b>Identification Number</b>	Specify the identification number of the beneficiary.
<b>Identification Type</b>	Select the identification type.
<b>Identification Number</b>	Specify the identification number.
<b>Remitter Phone No</b>	Specify the phone number of the remitter.

### 2.10.3.3.2 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves.

## 2.10.4 Travellers Cheque

This sub-section describes the various screens used to perform the remittances related to Travellers Cheque. The screens are described in the following topics:

- [2.10.4.1 TC Sale by Other Modes](#)
- [2.10.4.2 TC Sale Against Walk-in](#)
- [2.10.4.3 TC Purchase Against Account](#)
- [2.10.4.4 TC Purchase Against Walk-in](#)

### 2.10.4.1 TC Sale by Other Modes

This screen is used to issue TC against the Customer savings account or GL account, and only a Teller can access it. To process this screen, type **TC Sale by Other Modes** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **TC Sale by Other Modes**.

→ The **TC Sale Initiate** screen is displayed.

**Figure 177: TC Sale Initiate**

The screenshot shows the 'TC Sale Initiate' form. It is divided into several sections. The top section contains fields for Issuing Bank Code, Issuing Bank Name, Issuing Branch Code, Branch Name, Issuer Code, TC Amount, Account Name, TC Date, Account Amount, Exchange Rate, Cheque Number, Cheque Date, Narrative, and Total Charge Amount. The middle section contains Beneficiary Details, Address Line 1, Address Line 2, Address Line 3, and Address Line 4. The bottom section contains TC Denominations and Charges. Fields marked with an asterisk (\*) are mandatory.

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: TC Sale by Other Modes](#).

#### Field Description: TC Sale by Other Modes

Field	Description
<b>Issuing Bank Code</b>	Displays the code of the issuing bank.
<b>Issuing Bank Name</b>	Displays the name of the issuing bank.
<b>Issuing Branch Code</b>	Displays the code of the issuing branch.
<b>Branch Name</b>	Displays the name of the issuing branch.
<b>Issuer Code</b>	<p>Click the search icon and select the issuer code from the list of values.</p> <p><b>NOTE:</b> The list of values provides the HO code of the logged-in branch and the issuer codes maintained in the <b>Issuer Code Maintenance</b> screen.</p>

Field	Description
<b>Issuer Code Description</b>	Displays the description of the specified Issuer Code.
<b>Issue Mode</b>	Select the mode of issue from the drop-down values ( <b>By Account</b> or <b>By GL</b> ).
<b>TC Amount</b>	Select the TC currency from the drop-down values, and specify the TC Amount.
<b>TC Date</b>	Select the date of the TC.  <b>NOTE:</b> By default, the current posting date is displayed.
<b>Account Number</b>	Specify the account number of the Customer. When you press Tab key, the system defaults the Account Name.  <b>NOTE:</b> This field is applicable only if the <b>Issue Mode</b> is selected as <b>By Account</b> .  The system displays an override or error message on the tab out of <b>Account Number</b> based on the account dormancy parameters.
<b>Account Name</b>	Displays the name of the account.  <b>NOTE:</b> This field is applicable only if the <b>Issue Mode</b> is selected as <b>By Account</b> .
<b>Account Amount</b>	Displays the account amount based on the Exchange Rate, TC Amount, and Account Number selected.  <b>NOTE:</b> This field is applicable only if the <b>Issue Mode</b> is selected as <b>By Account</b> .
<b>GL Number</b>	Click the search icon, and select the GL number from the list of values.

Field	Description
	<b>NOTE:</b> This field is applicable only if the <b>Issue Mode</b> is selected as <b>By GL</b> .
<b>GL Description</b>	Displays the description of the specified GL account.  <b>NOTE:</b> This field is applicable only if the <b>Issue Mode</b> is selected as <b>By GL</b> .
<b>GL Amount</b>	Displays the account amount based on the Exchange Rate, TC Amount, and Account Number selected.  <b>NOTE:</b> This field is applicable only if the <b>Issue Mode</b> is selected as <b>By GL</b> .
<b>Cheque Number</b>	Specify the cheque number.  <b>NOTE:</b> The system validates the status of the cheque and prompts an error message if incase of a Used or Stopped or Invalid cheque.
<b>Cheque Date</b>	Specify the date of the cheque.
<b>Exchange Rate</b>	Displays the exchange rate.  <b>NOTE:</b> If the TC currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b> .

Field	Description
<b>Total Charge Amount</b>	Displays the total charges in branch local currency.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b> .
<b>Narrative</b>	Displays the narrative as <b>TC Sale Against Account</b> and it can be modified.
<b>Beneficiary Details</b>	Specify the fields under this section.
<b>Beneficiary Name</b>	Specify the name of the beneficiary.
<b>Address Line 1 to Address Line 4</b>	Specify the address of the beneficiary.

#### 2.10.4.1.1 TC Denomination Details

Figure 178: TC Denomination

The screenshot shows a web form titled "TC Denominations". It contains a table with the following columns: Denom Code, Currency, Series, Count, Start Number, End Number, and TC Amount. The first row of the table has the following values: 1, [blank], [blank], [blank], [blank], [blank], and 0. Below the table, there are two input fields: "Total TC Amount" and "Denomination Amount".

Specify the details in this data segment. For more information on fields, refer to table [Field Description: TC Denomination Details](#).

## Field Description: TC Denomination Details

Field	Description
 icon	Click this icon to add a new row.
<b>Denom Code</b>	Specify the TC denomination code from the list of values.
<b>Currency</b>	Displays the default TC Currency.
<b>Series</b>	<p>Specify the series of the TC Denom Code that needs to be sold from Teller's Till.</p> <p><b>NOTE:</b> The list of values contains the valid TC series that are available with Teller TC position. On click of LOV, the search criterion field will have <b>Series</b> and result criterion will display the <b>Series</b> and <b>Start Number</b>.</p>
<b>Count</b>	Specify the count of the TC.
<b>Start Number</b>	<p>Display the starting number of the series.</p> <p><b>NOTE:</b> Based on the series selected, the system will populate the <b>Start Number</b> available for the combination of <b>Currency</b>, <b>TC Denom Code</b>, and <b>Series</b>.</p>
<b>End Number</b>	Displays the end number, which is the sum of start number and the count.
<b>TC Amount</b>	Displays the TC Amount, which is the product of the denomination and the count.
<b>Total TC Amount</b>	Displays the total TC amount along with the currency.

Field	Description
<b>Denomination Amount</b>	Displays the denomination amount along with the currency.
 icon	Click this icon to delete a row.

### 2.10.4.1.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.10.4.1.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the TC position (TC outflow) is updated to the teller position for the combination of Issuer Code, TC Currency, TC Denom code, and Series to the extent of TC denomination units being purchased.

In addition, during transaction completion, the system updates the TC Status as **Used** for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number. Following main transaction accounting entries is triggered for Account mode at Oracle Banking Branch:

- Dr Customer Account for TC Amount
- Cr Int. Susp GL for TC Amount

Following main transaction accounting entries is triggered for Account mode at Oracle Banking Branch:

- Dr Cash GL for TC Amount
- Cr Int. Susp GL for TC Amount

Oracle Banking Payments will pass the credit leg accounting (Debit - Int. Susp GL and Credit - TC GL) for TC Issuance. During handoff, Oracle Banking Branch need to pass the intermediary bridge GL as Debit account in the request.

## 2.10.4.2 TC Sale Against Walk-in

This screen is used to sell TC to a walk-in Customer, and only a Teller can access it. To process this screen, type **TC Sale Against Walk-in** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **TC Sale Against Walk-in**.

→ The **TC Sale Against Walk-in** screen is displayed.

**Figure 179: TC Sale Against Walk-in**

The screenshot displays the 'TC Sale Against Walk-in' form. It is organized into two main columns. The left column contains fields for 'Issuing Bank Code', 'Issuing Branch Code', 'Issuer Code' (with a search icon), 'TC Amount' (with a currency dropdown), 'Transaction Amount' (with a currency dropdown), 'Total Charge Amount', and a 'Beneficiary Details' section with fields for 'Beneficiary Name', 'Identification Number', and four 'Address Line' fields. The right column contains fields for 'Issuing Bank Name', 'Issuing Branch Name', 'Issuer Code Description', 'TC Date' (with a calendar icon), 'Exchange Rate' (with up/down arrows), 'Narrative' (pre-filled with 'TC Sale Against Walk-in'), and 'Identification Type' (with a dropdown). Below these columns are three expandable sections: 'Denomination', 'TC Denomination', and 'Charge Details'. At the bottom right, there are three buttons: 'Submit', 'Clear', and 'Cancel'.

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: TC Sale Against Walk-in](#).

**Field Description: TC Sale Against Walk-in**

<b>Field</b>	<b>Description</b>
<b>Issuing Bank Code</b>	Displays the code of the issuing bank.
<b>Issuing Bank Name</b>	Displays the name of the issuing bank.
<b>Issuing Branch Code</b>	Displays the code of the issuing branch.
<b>Issuing Branch Name</b>	Displays the name of the issuing branch.
<b>Issuer Code</b>	<p>Click the search icon, and select the issuer code from the list of values.</p> <p><b>NOTE:</b> The list of values provides the HO code of the logged-in branch and the issuer codes maintained in the <b>Issuer Code Maintenance</b> screen.</p>
<b>Issuer Code Description</b>	Displays the description of the specified Issuer Code.
<b>TC Amount</b>	Select the TC currency from the drop-down values, and specify the TC Amount.
<b>TC Date</b>	<p>Select the date of the TC.</p> <p><b>NOTE:</b> By default, the current posting date is displayed.</p>
<b>Transaction Amount</b>	Select the transaction currency from the drop-down values. When you press <b>Tab</b> key, the system displays the transaction amount based on the Exchange Rate, TC Amount, and Account Number selected.

Field	Description
<b>Exchange Rate</b>	Displays the exchange rate.  <b>NOTE:</b> If the TC currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b> .
<b>Total Charge Amount</b>	Displays the total charges in branch local currency.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b> .
<b>Narrative</b>	Displays the narrative as <b>TC Sale Against Walk-in</b> and it can be modified.
<b>Beneficiary Details</b>	Specify the fields.
<b>Beneficiary Name</b>	Specify the name of the beneficiary.
<b>Identification Type</b>	Select the identification type from the drop-down values.
<b>Identification Number</b>	Specify the identification number.
<b>Address Line 1 to Address Line 4</b>	Specify the address of the beneficiary.

#### 2.10.4.2.1 Denomination details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.10.4.2.2 TC Denomination Details

The **TC Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.10.4.1.1TC Denomination Details](#) in this guide.

### 2.10.4.2.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.10.4.2.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the TC position (TC outflow) is updated to the teller position for the combination of Issuer Code, TC Currency, TC denom Code, and Series to the extent of TC denomination units being purchased.

In addition, during transaction completion, the system updates the TC status as **Used** for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number. Following main transaction accounting entries is triggered for this transaction at Oracle Banking Branch.

- Dr Cash GL for TC Amount
- Cr Int. Susp GL for TC Amount

Oracle Banking Payments will pass the credit leg accounting (Debit - Int. Susp GL and Credit - TC GL) for TC Issuance. During handoff, Oracle Banking Branch need to pass the intermediary bridge GL as Debit account in the request.

### 2.10.4.3 TC Purchase Against Account

This screen is used to purchase TC from a Customer, and only a Teller can access it. To process this screen, type **TC Purchase Against Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **TC Purchase Against Account**.

→ The **TC Purchase Against Account** screen is displayed.

**Figure 180: TC Purchase Against Account**

The screenshot shows the 'TC Purchase Against Account' screen. It contains the following fields and sections:

- Issuing Bank Code** (Mandatory)
- Issuing Bank Name**
- Issuing Branch Code** (Mandatory)
- Branch Name**
- TC Amount** (Mandatory)
- Account Name**
- Total Charge Amount**
- Beneficiary Details**
  - Beneficiary Name** (Mandatory)
  - Address Line 1**
  - Address Line 2**
  - Address Line 3**
  - Address Line 4**

- Charges**
- Issued Code** (Mandatory)
- Purchase Date** (Mandatory)
- Account Amount**
- Narrative** (Mandatory)
- TC Purchase By Account**
- Account Number** (Mandatory)
- Exchange Rate**

At the bottom right, there are **Submit** and **Cancel** buttons.

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: TC Purchase Against Account](#).

**Field Description: TC Purchase Against Account**

Field	Description
<b>Issuing Bank Code</b>	Specify the code of the issuing bank.  <b>NOTE:</b> By default, the logged-in bank code is displayed.
<b>Issuing Bank Name</b>	Displays the name of the issuing bank specified.
<b>Issuing Branch Code</b>	Specify the code of the issuing branch.  <b>NOTE:</b> By default, the logged-in branch code is displayed.
<b>Branch Name</b>	Displays the name of the issuing branch specified.

Field	Description
<b>Issuer Code</b>	<p>Click the search icon and select the issuer code from the list of values.</p> <p><b>NOTE:</b> The list of values provides the HO code of the logged-in branch and the issuer codes maintained in the <b>Issuer Code Maintenance</b> screen.</p>
<b>Issuer Code Description</b>	Displays the description of the specified Issuer Code.
<b>TC Amount</b>	Select the TC currency from the drop-down values, and specify the TC Amount.
<b>Purchase Date</b>	<p>Select the purchase date of the TC.</p> <p><b>NOTE:</b> By default, the current posting date is displayed.</p>
<b>Account Number</b>	<p>Specify the account number of the Customer. When you press Tab key, the system defaults the Account Name.</p> <p><b>NOTE:</b> The system displays an override or error message on the tab out of <b>Account Number</b> based on the account dormancy parameters.</p>
<b>Account Name</b>	Displays the name of the account.
<b>Account Amount</b>	Displays the account amount based on the Exchange Rate, TC Amount, and Account Number selected.

Field	Description
<b>Exchange Rate</b>	Displays the exchange rate.  <b>NOTE:</b> If the TC currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b> .
<b>Total Charge Amount</b>	Displays the total charges in branch local currency.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b> .
<b>Narrative</b>	Displays the narrative as <b>TC Sale Against Account</b> and it can be modified.
<b>Beneficiary Details</b>	Specify the fields under this section.
<b>Beneficiary Name</b>	Specify the name of the beneficiary.
<b>Address Line 1 to Address Line 4</b>	Specify the address of the beneficiary.

### 2.10.4.3.1 TC Denomination Details

Figure 181: TC Denomination

+	Denom Code	Currency	Series	Count	Start Number	End Number	TC Amount	
1	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	0	<input type="button" value="Add"/>

Total TC Amount      Denomination Amount

Specify the details in this data segment. For more information on fields, refer to table [Field Description: TC Denomination Details](#).

**Field Description: TC Denomination Details**

<b>Field</b>	<b>Description</b>
 icon	Click this icon to add a new row.
<b>Denom Code</b>	Specify the TC denomination code from the list of values.
<b>Currency</b>	Displays the default TC Currency.
<b>Series</b>	Specify the series of the TC Denom Code that is being purchased from Agent. You can also select from list of values if the bank is purchasing the TC which is already sold.
<b>Count</b>	Specify the count of the TC.
<b>Start Number</b>	Specify the starting number of the series for a new purchase of TC. You can also select from list of values if the bank is purchasing the TC which is already sold.
<b>End Number</b>	Displays the end number, which is the sum of start number and the count.
<b>TC Amount</b>	Displays the TC Amount, which is the product of the denomination and the count.
<b>Total TC Amount</b>	Displays the total TC amount along with the currency.
<b>Denomination Amount</b>	Displays the denomination amount along with the currency.
 icon	Click this icon to delete a row.

### 2.10.4.3.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.10.4.3.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. The following conditions apply for the TC status:

- If the system finds the TC for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number, the TC status will be updated to **Purchased**.
- If the record is not found for the above-mentioned combination, during transaction completion, the system creates individual TC records for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number with TC status as **Purchased**.

Following main transaction accounting entries is triggered for this transaction at Oracle Banking Branch:

- Dr Int. Bridge GL for TC Amount
- Cr Customer Account for Customer Account Amount

Oracle Banking Payments will pass the debit leg accounting (Debit – TC GL and Credit – Int. Bridge GL) for TC Purchase. During handoff, Oracle Banking Branch need to pass the intermediary bridge GL as Credit account in the request.

### 2.10.4.4 TC Purchase Against Walk-in

This screen is used to purchase TC from a walk-in Customer, and only a Teller can access it. To process this screen, type **TC Purchase Against Walk-in** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **TC Purchase Against Walk-in**.

→ The **TC Purchase Against Walk-in** screen is displayed.

**Field Description: TC Purchase Against Walk-in**

Field	Description
<b>Issuing Bank Code</b>	Specify the code of the issuing bank.  <b>NOTE:</b> By default, the logged-in bank code is displayed.
<b>Issuing Bank Name</b>	Displays the name of the issuing bank specified.
<b>Issuing Branch Code</b>	Specify the code of the issuing branch.

Field	Description
	<b>NOTE:</b> By default, the logged-in branch code is displayed.
<b>Issuing Branch Name</b>	Displays the name of the issuing branch specified.
<b>Issuer Code</b>	<p>Click the search icon and select the issuer code from the list of values.</p> <p><b>NOTE:</b> The list of values provides the HO code of the logged-in branch and the issuer codes maintained in the <b>Issuer Code Maintenance</b> screen.</p>
<b>Issuer Code Description</b>	Displays the description of the specified Issuer Code.
<b>TC Amount</b>	Select the TC currency from the drop-down values, and specify the TC Amount.
<b>Purchase Date</b>	<p>Select the purchase date of the TC.</p> <p><b>NOTE:</b> By default, the current posting date is displayed.</p>
<b>Account Amount</b>	Displays the account amount based on the Exchange Rate, TC Amount, and Account Number selected.
<b>Exchange Rate</b>	<p>Displays the exchange rate.</p> <p><b>NOTE:</b> If the TC currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b>.</p>
<b>Total Charge Amount</b>	Displays the total charges in branch local currency.

Field	Description
	<b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b> .
<b>Narrative</b>	Displays the narrative as <b>TC Sale Against Account</b> and it can be modified.
<b>Beneficiary Details</b>	Specify the fields.
<b>Beneficiary Name</b>	Specify the name of the beneficiary.
<b>Identification Type</b>	Select the identification type from the drop-down values.
<b>Identification Number</b>	Specify the identification number.
<b>Address Line 1 to Address Line 4</b>	Specify the address of the beneficiary.

#### 2.10.4.4.1 Denomination details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

#### 2.10.4.4.2 TC Denomination Details

The **TC Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.10.4.3.1 TC Denomination Details](#) in this guide.

#### 2.10.4.4.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

#### 2.10.4.4.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. The following conditions apply for the TC status:

- If the system finds the TC for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number, the TC status will be updated to **Purchased**.
- If the record is not found for the above-mentioned combination, during transaction completion, the system creates individual TC records for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number with TC status as **Purchased**.

Following main transaction accounting entries is triggered for this transaction at Oracle Banking Branch:

- Dr Int. Bridge GL for TC Amount
- Cr Cash GL for Transaction Amount

Oracle Banking Payments will pass the debit leg accounting (Debit – TC GL & Credit – Int. Bridge GL) for TC Purchase. During handoff, Oracle Banking Branch need to pass the intermediary bridge GL as Credit account in the request.

## 2.10.5 Instrument Status Update

This screen is used to change the status of used instrument numbers from 'Used' to 'Unused'. This screen is used only when an unused instrument is marked as 'Used' by the application. To process this screen, type **Instrument Status Update** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On **Teller Mega Menu**, under **Remittances**, click **Instrument Status Update**.

→ The **Instrument Status Update** screen is displayed.

**NOTE:** Make sure that authorization is enabled for this screen.

**Figure 183: Instrument Status Update**

- Specify the details in the **Instrument Status Update** screen. The fields, which are present with required, are mandatory. For more information on fields, refer to table [Field Description: Instrument Status Update](#).

**Field Description: Instrument Status Update**

Field	Description
<b>Instrument Type</b>	Select the instrument type from the drop-down list. The drop-down list shows the following values: <ul style="list-style-type: none"> <li>Banker's Cheque</li> <li>Demand Draft</li> </ul>
<b>Branch</b>	Click search icon and select the branch code from the list of values.
<b>Instrument Number</b>	Specify the instrument number.

- Click **Submit**.

The screen displays the information message based on the conditions below:

- If the instrument number is used, it will change the status from 'Used' to 'Unused' and displays message as **Status is updated to Unused**.

- If the instrument number is unused, it displays message as **Status is already Unused.**
- If the entered instrument number is incorrect, it displays message as an **Invalid Instrument!.**

## 2.11 Term Deposit Transactions

A deposit with a fixed tenure or term is called as time deposit or Term Deposits (TD). This section deals with open, redeem, and top-up a term deposit. Each of these is explained in the following sub-sections:

- [2.11.1 Term Deposit Account Opening](#)
- [2.11.2 Term Deposit Redemption Against Cash](#)
- [2.11.3 Term Deposit Redemption Against Account](#)
- [2.11.4 Term Deposit Top-up against Account](#)
- [2.11.5 Term Deposit Top-up against Cash](#)

### 2.11.1 Term Deposit Account Opening

The Teller can use this screen to open a term deposit account. The following details are necessary to open a term deposit account:

- Deposit details
- Funding details
- Joint Holder details
- Payout details
- Rollover details

To process this screen, type **TD Account Opening** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Term Deposit**, click **TD Account Opening**.

→ The **TD Account Opening** screen is displayed.

**Figure 184: TD Account Opening**

### 2.11.1.1 Main Transaction Details

Specify the basic details for opening the term deposit account. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: TD Account Opening](#).

**Field Description: TD Account Opening**

Field	Description
<b>Customer ID</b>	Select the Customer ID from the list of values.
<b>Customer Name</b>	Displays the name of the specified Customer ID.
<b>Mode of Operation</b>	Select the mode of operations from the drop-down list. The drop-down list shows the following values:

Field	Description
	<ul style="list-style-type: none"> <li>• <b>Single</b></li> <li>• <b>Jointly</b></li> <li>• <b>Either Anyone or Survivor</b></li> <li>• <b>Former or Survivor</b></li> <li>• <b>Mandate Holder</b></li> </ul>
<b>Account Type</b>	Select the account type ( <b>Single</b> or <b>Joint</b> ).
<b>Deposit Product</b>	Select the deposit product (FCUBS Account Class) from the list of values fetched from FLEXCUBE Universal Banking System
<b>Deposit Product Description</b>	Displays the description of the specified deposit product.
<b>Deposit Account Description</b>	Specify the description of the deposit account.
<b>Deposit Account Opening Date</b>	Specify the account opening date of the deposit account.
<b>Deposit Amount</b>	Specify the currency and amount for term deposit.
<b>Deposit Tenor</b>	Specify the tenor of deposit in days/months/years.
<b>Maturity Amount</b>	Displays the maturity amount along with the currency.
<b>Simulate</b>	Click this button to fetch the interest data for the given account class.
<b>Auto Renewal</b>	Select if auto renewal required for the deposit account after maturity.

## 2.11.1.2 Interest Details

#### Field Description: Rollover Details

Field	Description
<b>Renewal Option</b>	Specify the renewal option from the drop down values ( <b>Account Class Tenor</b> , <b>Account Tenor</b> , or <b>Independent</b> ).  <b>NOTE:</b> This field is mandatory to input if auto renewal is selected.
<b>Renewal Type</b>	Specify the renewal type from the drop down values ( <b>Principal</b> , <b>Interest</b> , <b>Principal + Interest</b> , or <b>Special Amount</b> ).  <b>NOTE:</b> This field is mandatory to input if auto renewal is selected.
<b>Renewal Amount</b>	Specify the renewal amount and renewal currency.  <b>NOTE:</b> The renewal currency is displayed as deposit currency.
<b>Renewal Tenor</b>	Specify the renewal tenor in days/months/year.

#### 2.11.1.7 Denomination details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

#### 2.11.1.8 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Term Deposit module in FLEXCUBE Universal Banking for TD account opening process.

**NOTE:** Both TD account opening by cash and TD account opening by account can be viewed from the electronic journal log after submission.

## 2.11.2 Term Deposit Redemption Against Cash

The Teller can use this screen to initiate to manually redeem the cash from a term deposit account. It is accomplished by the pre-mature redemption in either full or in part, ahead of maturity date or after the maturity date when TD is in grace days without maturing.

To process this screen, type **Term Deposit Redemption Against Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Term Deposit**, click **Term Deposit Redemption Against Cash**.

→ The **Term Deposit Redemption Against Cash** screen is displayed.

### 2.11.2.1 Main Transaction Details

Specify the deposit account number to fetch the deposit details. For more information on fields, refer to table [Field Description: Term Deposit Redemption Against Cash](#).

**Field Description: Term Deposit Redemption Against Cash**

Field	Description
<b>Deposit Account</b>	Specify the deposit account number.
<b>Query</b>	Click this icon to fetch the deposit details.
<b>Deposit Details</b>	Specify the fields.
<b>Customer ID</b>	Displays the Customer ID of the deposit account number.
<b>Account Name</b>	Displays the account description of the deposit account.
<b>Principal Amount</b>	Click <b>Compute</b> to get the amount paid at the time of term deposit booking.
<b>Interest Amount</b>	Displays the default rate of interest at which the interest amount is calculated.
<b>Tax Amount</b>	Displays the amount to be deducted towards tax.
<b>Interest Rate</b>	Click <b>Compute</b> to get the current interest rate applicable after partial or full redemption.
<b>Maturity Amount</b>	Displays the current maturity amount after partial or full redemption.
<b>Total Payout Amount</b>	Displays the total payout amount.
<b>Redemption Details</b>	Specify the fields.

Field	Description
<b>Redemption Mode</b>	Select the redemption mode from the drop-down list ( <b>Partial Redemption</b> or <b>Full Redemption</b> ).
<b>Redemption Amount</b>	<p>Specify as mentioned below:</p> <ul style="list-style-type: none"> <li>• If the <b>Redemption Mode</b> is selected as <b>Partial Redemption</b>, specify the redemption amount.</li> <li>• If the <b>Redemption Mode</b> is selected as <b>Full Redemption</b>, it displays the principal amount as redemption amount.</li> </ul>
<b>Waive Penalty</b>	<p>Check this box to waive the penalty for redeeming the term deposit.</p> <p><b>NOTE:</b> This is applicable only if the <b>Redemption Mode</b> is selected as <b>Full Redemption</b>.</p>
<b>Waive Interest</b>	<p>Check this box to waive the interest for redeeming the term deposit.</p> <p><b>NOTE:</b> This is applicable only if the <b>Redemption Mode</b> is selected as <b>Full Redemption</b>.</p>
<b>Transaction Currency</b>	Specify the currency in which the cash is handed over to the customer during redemption.
<b>Transaction Amount</b>	<p>Displays the transaction amount based on the <b>Redemption Amount</b> and <b>Transaction Currency</b>.</p> <p><b>NOTE:</b> If deposit currency is different from transaction currency, the system calculates the transaction amount based on the exchange rate. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>

Field	Description
<b>Exchange Rate</b>	Displays the exchange rate applicable for the transaction based on the deposit currency and transaction currency.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as Y.
<b>Narrative</b>	Displays the default narrative as <b>Term Deposit Redemption Against Cash</b> and it can be modified.

### 2.11.2.2 Denomination details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.11.2.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.11.2.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Term Deposit module in FLEXCUBE Universal Banking for TD redemption process.

## 2.11.3 Term Deposit Redemption Against Account

The Teller can use this screen to initiate to manually redeem the cash from a term deposit account. It is accomplished by the pre-mature redemption either in full or in part, ahead of maturity date or after the maturity date when TD is in grace days without maturing.

To process this screen, type **Term Deposit Redemption Against Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Term Deposit**, click **Term Deposit Redemption Against Account**.

→ The **Term Deposit Redemption Against Account** screen is displayed.

**Figure 192: Term Deposit Redemption Against Account**

### 2.11.3.1 Main Transaction Details

Specify the deposit account number to fetch the deposit details. For more information on fields, refer to table [Field Description: Term Deposit Redemption Against Account](#).

**Field Description: Term Deposit Redemption Against Account**

Field	Description
<b>Deposit Account</b>	Specify the deposit account number.
<b>Account Branch</b>	Displays the branch of the deposit account.

Field	Description
<b>Query</b>	Click this icon to fetch the deposit details.
<b>Deposit Details</b>	Specify the fields.
<b>Customer ID</b>	Displays the Customer ID of the deposit account number.
<b>Account Name</b>	Displays the account description of the deposit account.
<b>Principal Amount</b>	Click <b>Compute</b> to get the amount paid at the time of term deposit booking.

#### 2.11.5.1 Main Transaction Details

Specify the details in the **TD Top-up Against Cash** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: TD Top-up Against Cash](#).

**Field Description: TD Top-up Against Cash**

<b>Field</b>	<b>Description</b>
<b>Deposit Account</b>	Specify the deposit account number for which the top-up amount needs to be added.
<b>Query</b>	Click this icon, to fetch the deposit details.
<b>Deposit Details</b>	Specify the fields.
<b>Original Deposit Amount</b>	Displays the principal amount at the time of TD account opening.
<b>Principal Balance</b>	Displays the principal balance of the deposit account.
<b>Customer ID</b>	Displays the customer ID of the deposit account number.
<b>Account Name</b>	Displays the account description of the deposit account number.
<b>Interest Amount</b>	Displays the calculated interest amount of the deposit account.
<b>Interest Rate</b>	Displays the interest rate of the deposit account.
<b>Deposit Tenor</b>	Displays the tenor of the deposit account.
<b>Interest Amount</b>	Displays the calculated interest amount of the deposit account.
<b>Maturity Amount</b>	Displays the amount available on the maturity of the deposit account.
<b>Top-Up Details</b>	Specify the fields.

Field	Description
<b>Top-Up Amount</b>	Specify the top-up amount that is added to the deposit amount. The top-up currency is defaulted to deposit account currency.
<b>Value Date</b>	Specify the date on which the TD top-up needs to be effective.
<b>Narrative</b>	Displays the default narrative as <b>Term Deposit Top-Up</b> and it can be modified.

### 2.11.5.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units based on the redemption amount in transaction currency. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.11.5.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** screen is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Term Deposit module in FLEXCUBE Universal Banking for TD top-up processing.

## 2.12 Credit Card Transactions

This section describes the various screens used to perform the credit card transactions. The screens are described in the following sub-sections:

- [\*2.12.1 Credit Card Advance by Cash\*](#)
- [\*2.12.2 Credit Card Advance by Transfer\*](#)
- [\*2.12.3 Credit Card Payment by Cash\*](#)
- [\*2.12.4 Credit Card Payment \(by non-cash modes\)\*](#)
- [\*2.12.5 Stop Card Request\*](#)

## 2.12.1 Credit Card Advance by Cash

The Teller can use this screen to disburse cash advance to a walk-in customer against the credit card. To process this screen, type **Advance By Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Credit Card**, click **Advance by Cash**.

→ The **Advance by Cash** screen is displayed.

### 2.12.1.1 Main Transaction Details

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Credit Card Advance by Cash](#).

**Field Description: Credit Card Advance by Cash**

Field	Description
<b>Credit Card</b>	Specify the credit card number against which the cash advance to be made. When you press <b>Tab</b> key, the customer details and card details will be displayed in the <b>Customer Information</b> widget.
<b>Advance Amount</b>	Select the transaction currency from the drop-down values and specify the advance amount.
<b>Advance Tenor</b>	Specify the tenor in Days/Months/Years.
<b>Document Type</b>	Select from the drop-down list. The values in the drop-down list are mentioned below: <ul style="list-style-type: none"> <li>• <b>Address Document</b></li> <li>• <b>Identity Document</b></li> <li>• <b>Financial Document</b></li> <li>• <b>General Document</b></li> </ul>
<b>Document Number</b>	Specify the document number.  <b>NOTE:</b> This field is mandatory only if document type is selected.
<b>Approval Reference Number</b>	Specify the approval reference if already approved.

Field	Description
<b>Exchange Rate</b>	Displays the exchange rate.  <b>NOTE:</b> If the transaction currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as Y.
<b>Account Amount</b>	Display the account amount along with currency.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as Y.
<b>Total Charges (LCY)</b>	Displays the total charges applicable for the cash advance.  <b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code indicator level is set as Y.
<b>Narrative</b>	Displays the narrative as <b>Advance by Cash</b> and it can be modified.

### 2.12.1.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.12.1.3 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

#### 2.12.1.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the cash is disbursed successfully to the walk-in customer against the credit card.

## 2.12.2 Credit Card Advance by Transfer

The Teller can use this screen to transfer the advance amount to a walk-in customer's account. To process this screen, type **Advance By Transfer** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Credit Card**, click **Advance by Transfer**.

→ The **Advance by Transfer** screen is displayed.

**Figure 196: Advance By Transfer**

The screenshot shows the 'Advance by Transfer' screen with the following fields and controls:

- Credit Card \***: Text input field.
- Advance Amount \***: Text input field with a dropdown arrow.
- Advance Tenor \***: Text input field with a dropdown arrow.
- Beneficiary Account \***: Text input field.
- Beneficiary Name**: Text input field.
- Account Branch**: Text input field.
- Exchange Rate**: Text input field with a dropdown arrow and up/down arrows.
- Account Amount \***: Text input field.
- Total Charges**: Text input field.
- Document Type**: Text input field with a dropdown arrow.
- Document Number**: Text input field.
- Approval Reference Number \***: Text input field.
- Narrative \***: Text input field with the value 'Advance By Transfer'.
- Charges**: Section header with a right-pointing triangle.
- Buttons**: 'Submit', 'Clear', and 'Cancel' buttons at the bottom right.

### 2.12.2.1 Main Transaction Details

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Credit Card Advance by Transfer](#).

**Field Description: Credit Card Advance by Transfer**

Field	Description
<b>Credit Card</b>	Specify the credit card number against which the cash advance to be made. When you press <b>Tab</b> key, the customer details and card details will be displayed in the <b>Customer Information</b> widget.
<b>Advance Amount</b>	Select the transaction currency from the drop-down values and specify the advance amount.
<b>Advance Tenor</b>	Specify the tenor in Days/Months/Years.
<b>Beneficiary Account</b>	Specify the beneficiary account number to which the amount needs to be transferred.
<b>Beneficiary Name</b>	Displays the name based on the specified beneficiary account number.
<b>Account Branch</b>	Displays the branch based on the specified beneficiary account number.
<b>Document Type</b>	Select from the drop-down list. The values in the drop-down list are mentioned below: <ul style="list-style-type: none"> <li>• <b>Address Document</b></li> <li>• <b>Identity Document</b></li> <li>• <b>Financial Document</b></li> <li>• <b>General Document</b></li> </ul>
<b>Document Number</b>	Specify the document number.

Field	Description
	<b>NOTE:</b> This field is mandatory only if document type is selected.
<b>Approval Reference Number</b>	Specify the approval reference if already approved.
<b>Exchange Rate</b>	Displays the exchange rate.  <b>NOTE:</b> If the transaction currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as Y.
<b>Account Amount</b>	Display the account amount along with currency.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as Y.
<b>Total Charges</b>	Displays the total charges applicable for the cash advance.  <b>NOTE:</b> This field is displayed only if <b>Total Charges Configuration</b> at Function Code indicator level is set as Y.
<b>Narrative</b>	Displays the narrative as <b>Advance by Transfer</b> and it can be modified.

### 2.12.2.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.12.2.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the advance against credit card is transferred successfully to the account of the walk-in customer.

### 2.12.3 Credit Card Payment by Cash

The Teller can use this screen to accept cash from a walk-in customer and make credit card payment. To process this screen, type **Payment By Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Credit Card**, click **Payment By Cash**.  
  
→ The **Credit Card Payment By Cash** screen is displayed.

<b>Narrative</b>	Displays the narrative as <b>Credit Card Payment by Clearing Cheque</b> and it can be modified.

#### 2.12.4.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

#### 2.12.4.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the credit card payment is done successfully.

## 2.12.5 Stop Card Request

The Teller can use this screen to block the credit card of a Customer. To process this screen, type **Stop Card** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Credit Card**, click **Stop Card**.  
→ The **Stop Card Request** screen is displayed.

**Figure 200: Stop Card Request**

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Stop Card Request](#).

**Field Description: Stop Card Request**

Field	Description
<b>Card Number</b>	Specify the credit card number, which needs to be blocked. When you press <b>Tab</b> key, the system will fetch and display the following details: <ul style="list-style-type: none"> <li>• <b>Customer ID</b></li> <li>• <b>Account Number</b></li> <li>• <b>Branch</b></li> <li>• <b>Reference Number</b></li> </ul>
<b>Customer ID</b>	Displays the Customer ID for the credit card number specified.

Field	Description
<b>Account Number</b>	Displays the account number for the credit card number specified.
<b>Branch</b>	Displays the branch for the credit card number specified.
<b>Reference Number</b>	Displays the reference number for the credit card number specified.
<b>Card Status</b>	Select the card status ( <b>Active</b> or <b>Inactive</b> ) from the drop-down list.

### 2.12.5.1 Transaction Submission

1. Click **Submit** to complete the request.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the credit card will be blocked successfully.

## 2.13 Loan Transactions

This section describes the various screens used to perform the loan transactions. The screens are described in the following sub-sections:

- [2.13.1 Loan Disbursement by Cash](#)
- [2.13.2 Loan Repayment by Cash](#)

### 2.13.1 Loan Disbursement by Cash

The Teller can use this screen to disburse cash to a walk-in customer against a loan account. To process this screen, type **Loan Disbursement By Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Loan Transactions**, click **Loan Disbursement By Cash**.

→ The **Loan Disbursement By Cash** screen is displayed.

### 2.14.3.1 Main Transaction Details

Specify the basic details for opening the term deposit account. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: TD Account Opening](#).

**Field Description: TD Account Opening**

Field	Description
<b>Customer ID</b>	Select the Customer ID from the list of values.
<b>Customer Name</b>	Displays the name of the specified Customer ID.
<b>Mode of Operation</b>	Select the mode of operations from the drop-down list. The drop-down list shows the following values: <ul style="list-style-type: none"> <li>• <b>Single</b></li> <li>• <b>Jointly</b></li> <li>• <b>Either Anyone or Survivor</b></li> <li>• <b>Former or Survivor</b></li> <li>• <b>Mandate Holder</b></li> </ul>
<b>Account Type</b>	Select the account type ( <b>Single</b> or <b>Joint</b> ).
<b>Deposit Product</b>	Specify the deposit product. Click <b>Fetch</b> to select the appropriate product type.
<b>Deposit Product Description</b>	Displays the description of the specified deposit product.
<b>Deposit Account Description</b>	Specify the description of the deposit account.
<b>Deposit Account Opening Date</b>	Specify the account opening date of the deposit account.
<b>Deposit Amount</b>	Specify the deposit amount along with the currency.

Field	Description
Deposit Tenor	Specify the deposit tenor in Days/Months/Years.
Profit Rate	Specify the profit rate.

### 2.14.3.2 Funding Details

**Figure 206: Funding Details (Cash)**

**Figure 207: Funding Details (Account)**

Specify the details in the **Funding Details** segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Funding Details](#).

**Field Description: Funding Details**

Field	Description
Pay By	Select <b>Account</b> or <b>Cash</b> for the pay-in option.

Field	Description
<b>Account Number</b>	Specify the account number from which the deposit account need to be funded.  <b>NOTE:</b> This field is applicable only if the <b>Pay By</b> is selected as <b>Account</b> .
<b>Account Branch</b>	Displays the branch of the selected account number.  <b>NOTE:</b> This field is applicable only if the <b>Pay By</b> is selected as <b>Account</b> .
<b>Account Amount</b>	Displays the currency of the selected account number and the calculated account amount based on the exchange rate.  <b>NOTE:</b> This field is applicable only if the <b>Pay By</b> is selected as <b>Account</b> .
<b>Cheque Number</b>	Specify the cheque number of the account.  <b>NOTE:</b> This field is applicable only if the <b>Pay By</b> is selected as <b>Account</b> .
<b>Cheque Date</b>	Specify the date as mentioned in the cheque.  <b>NOTE:</b> This field is applicable only if the <b>Pay By</b> is selected as <b>Account</b> .
<b>Transaction Amount</b>	Specify the transaction currency if the <b>Pay By</b> is selected as <b>Cash</b> .  <b>NOTE:</b> By default, branch currency will be shown and allows for editing. In addition, the system defaults the transaction amount based on the transaction currency selected.

Field	Description
<b>Exchange Rate</b>	<p>Displays the exchange rate used to convert the deposit currency into account or transaction currency and it can be modified.</p> <p><b>NOTE:</b> If deposit currency is same as the account or transaction currency, the system will display the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b>.</p>

### 2.14.3.3 Joint Holders Details

Figure 208: Joint Holders Details

Joint Holders

	Joint Holder ID	Joint Holder Name	Relationship	Joint Holder's Type
No data to display.				

Page 1 (0 of 0 items) < 1 >

Specify the details of the joint holders for the deposit account, if the account type is maintained as **Joint**. For more information on fields, refer to table [Field Description: Joint Holders](#).

#### Field Description: Joint Holders

Field	Description
<b>Joint Holder ID</b>	Select the customer ID which is considered as joint account holder for the deposit account.
<b>Joint Holder Name</b>	Displays the customer name as joint holder name.
<b>Relationship</b>	Select the relationship of the joint account holder from the drop-down list.

Field	Description
<b>Joint Holder's Type</b>	Select the joint holder's type from the drop-down list.

### 2.14.3.4 Maturity Payment Details

**Figure 209: Payout Details**

The screenshot shows a form titled "Payout Details". It contains the following fields:

- Component Type \***: A drop-down menu.
- Repayment By \***: A drop-down menu.
- Payment Account**: A text input field with a magnifying glass icon.
- Account Branch**: A greyed-out text input field.
- Beneficiary Name**: A text input field.
- Beneficiary Address 1**: A text input field.
- Beneficiary Address 2**: A text input field.
- Beneficiary Address 3**: A text input field.
- Beneficiary Address 4**: A text input field.

Specify the parameters for automatic payout through either account transfer, bankers cheque, or demand draft. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Payout Details](#).

**Field Description: Payout Details**

Field	Description
<b>Component Type</b>	Select the component type from the drop-down list. <b>(Principal or Profit)</b>
<b>Repayment By</b>	Select the repayment option from the drop-down list <b>(Account, Bankers Cheque, or Demand Draft).</b>
<b>Payment Account</b>	Specify the account to which the repayment to be made. This field allows you to input only if repayment is by account.

Field	Description
<b>Account Branch</b>	Displays the account branch based on the payment account selected.
<b>Beneficiary Name</b>	Specify the name of the beneficiary for the payout of BC or DD drawn.  <b>NOTE:</b> This field allows you to input only if the repayment is by BC or DD.
<b>Beneficiary Address 1 to Beneficiary Address 4</b>	Specify the address of beneficiary for the payout.

### 2.14.3.5 Maturity Instruction Details

Figure 210: Rollover Details

Specify the parameters for auto renewal of deposit account. For more information on fields, refer to table [Field Description: Rollover Details](#).

Field Description: Rollover Details

Field	Description
<b>Auto Renewal</b>	Select if auto renewal required for the deposit account.
<b>Renewal Type</b>	Specify the renewal type from the drop down values ( <b>Principal</b> , <b>Principal + Profit</b> , <b>Special Amount</b> or <b>Profit</b> ).

Field	Description
	<b>NOTE:</b> This field is mandatory to input if auto renewal is selected.
<b>Renewal Amount</b>	Specify the renewal amount and renewal currency.  <b>NOTE:</b> The renewal currency is displayed as deposit currency.
<b>Renewal Tenor</b>	Specify the renewal tenor in days/months/year.

### 2.14.3.6 Denomination details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.14.3.7 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the loan repayment details are handed off to Islamic Financing TD module for account creation.

## 2.15 Bill Payments

This section describes the various screens used to perform the Bill Payments. Bill Payments can be done for various utility bills. The screens are described in the following sub-sections:

- [2.15.1 Bill Payment By Cash](#)
- [2.15.2 Bill Payment Against Account](#)

### 2.15.1 Bill Payment By Cash

The Teller can use this screen to make utility bill payment by cash. Utility bill payment can be performed for the Institutions, which are already maintained in product processors. To process this screen, type **Bill Payment By Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Bill Payments**, click **Bill Payment By Cash**.

→ The **Bill Payment By Cash** screen is displayed.

**Figure 211: Bill Payment By Cash**

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Bill Payment By Cash](#).

**Field Description: Bill Payment By Cash**

<b>Field</b>	<b>Description</b>
<b>Utility Provider ID</b>	Click the search icon, and select the utility provider ID from the list of values.
<b>Utility Provider Name</b>	Displays the name of the specified utility provider ID.
<b>Consumer Number</b>	Specify the consumer number.
<b>Bill Number</b>	Specify the bill number.
<b>Bill Date</b>	Specify the bill date.
<b>Bill Amount</b>	Select the currency from the drop-down values, and specify the bill amount that needs to be paid.
<b>Transaction Amount</b>	Select the transaction currency from the drop-down values. The transaction amount is displayed based on the exchange rate.
<b>Exchange Rate</b>	<p>Displays the exchange rate.</p> <p><b>NOTE:</b> If the Bill currency is same as the Transaction currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b>.</p>

Field	Description
<b>Total Charge Amount</b>	Displays the total charges in branch local currency.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b> .
<b>Narrative</b>	Displays the narrative as <b>Bill Payment By Cash</b> and it can be modified.

### 2.15.1.1 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.15.1.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

### 2.15.1.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the main leg accounting (Dr Cash GL and Cr Institution ID account GL) and charge accounting details are handed off to the Accounting System.

## 2.15.2 Bill Payment by Other Modes

The Teller can use **Bill Payment** screen to make utility bill payment against. Utility bill payment can be performed for the Institutions, which are already maintained in product processors. The bill payment can be made by account and clearing cheque.

#### Topics:

- Bill Payment by Account

- Bill Payment by Clearing Cheque

### 2.15.2.1 Bill Payment by Account

The Teller can use the **Bill Payment** screen to make utility bill payment by account. To process this screen, type **Bill Payment by Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Bill Payments**, click **Bill Payment by Account**.

→ The **Bill Payment by Account** screen is displayed.

**Figure 212: Bill Payment by Account**

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory.

For more information on fields, refer to table [Field Description: Bill Payment by Account](#).

**Field Description: Bill Payment by Account**

<b>Field</b>	<b>Description</b>
<b>Utility Provider ID</b>	Click the search icon, and select the utility provider ID from the list of values.
<b>Utility Provider Name</b>	Displays the name of the specified utility provider ID.
<b>Consumer Number</b>	Specify the consumer number.
<b>Bill Number</b>	Specify the bill number.
<b>Bill Date</b>	Specify the bill date.
<b>Bill Amount</b>	Select the currency from the drop-down values, and specify the bill amount that needs to be paid.
<b>Account Number</b>	Specify the account number against which the bill payment needs to be done.
<b>Account Name</b>	Displays the name of the specified account number.
<b>Cheque Number</b>	Specify the cheque number, if the amount needs to be debited through the cheque.
<b>Cheque Date</b>	Specify the cheque date, if the amount needs to be debited through the cheque.
<b>Account Amount</b>	Displays the amount that needs to be debited based on the exchange rate.

Field	Description
<b>Exchange Rate</b>	Displays the exchange rate.  <b>NOTE:</b> If the Bill currency is same as the Transaction currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b> .
<b>Total Charge Amount</b>	Displays the total charges in branch local currency.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b> .
<b>Narrative</b>	Displays the narrative as <b>Bill Payment Against Account</b> and it can be modified.

### 2.15.2.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.15.2.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the main leg accounting (Dr Cash GL and Cr Institution ID account GL) and charge accounting details are handed off to the Accounting System.

## 2.16 Session Teller Transactions

This section describes the various screens used to perform the Session Teller transactions. The cash transactions can be performed only when the Teller Session is started, refer to the topic [2.4.13.1 Start Teller Session](#) in this guide. The Teller can enter the denomination details for a Teller Session in the **Stop Teller Session**. Denomination tracking must be enabled for this functionality. For more information, refer to the topic [2.4.13.2.3 Teller Session Denomination Details](#) in this guide. The screens are described in the following sub-sections:

- [2.16.1 Cash Deposit](#)
- [2.16.2 Cash Withdrawal](#)
- [2.16.3 FX Sale Against Walk-in](#)
- [2.16.4 FX Purchase Against Walk-in](#)

### 2.16.1 Cash Deposit

This screen is used to deposit the cash in a CASA. Cash can be deposited in either account currency or any foreign currency that is allowed. Whenever any transaction in foreign currency is posted to the account, it is converted to the account currency based on the maintained exchange rate for the transaction.

To process this screen, type **Cash Deposit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Session Teller Transactions**, click **Cash Deposit**.

→ The **Cash Deposit** screen is displayed.

**Figure 213: Cash Deposit**

The screenshot displays the 'Cash Deposit' screen. At the top left, there is a header 'Cash Deposit' with a back arrow. The main area contains several input fields: 'Account Number' with an asterisk, 'Transaction Amount' with an asterisk and a dropdown menu showing 'GBP', 'Exchange Rate' with a dropdown and up/down arrows, 'Account Amount', 'Total Charge Amount', and 'Narrative' with an asterisk. Below these fields is a 'Charge Details' section with a right-pointing arrow. At the bottom right, there are three buttons: 'Submit', 'Clear', and 'Cancel'.

### 2.16.1.1 Main Transaction Details

Specify the details in the **Cash Deposit** screen. For more information on this segment, refer to the topic [2.6.1.1 Main Transaction Details](#) in this guide.

### 2.16.1.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.16.1.3 Transaction Submission

Click **Submit** to complete the transaction. For more information, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

→ The **Transaction Completed Successfully** information message is displayed.

### 2.16.2 Cash Withdrawal

This screen is used to withdraw funds from CASA account of the customer. The withdrawal is subject to the availability of sufficient balance or available credit limit. When the transaction is performed, it updates the available balance in the CASA account immediately.

To process this screen, type **Cash Withdrawal** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Session Teller Transactions**, click **Cash Withdrawal**.

→ The **Cash Withdrawal** screen is displayed.

#### 2.16.4.1 Main Transaction Details

Specify the details in the **Cash Deposit** screen. For more information on this segment, refer to the topic [2.6.7.1 Main Transaction Details](#) in this guide.

### 2.16.4.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.16.4.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the teller cash position is updated based on the currency of the **Amount Bought** and the **Amount Paid** fields. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

## 2.16.5 Loan Repayment by Cash

The Teller can use this screen to accept cash from a walk-in customer to repay the loan amount. To process this screen, type **Loan Repayment By Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, navigate to left menu and click **Teller**. On Teller Mega Menu, under **Session Teller Transactions**, click **Loan Repayment by cash**.

→ The **Loan Repayment By Cash** screen is displayed.

**Figure 216: Loan Repayment By Cash (without Multi Currency and Total Charges)**

The screenshot shows the 'Loan Repayment By Cash' screen. The form contains the following fields:

- Loan Account**: A text input field.
- Exchange Rate**: A numeric input field with up and down arrows.
- Total Charges (LCY)**: A numeric input field.
- Repayment Amount**: A numeric input field.
- Account Amount**: A numeric input field.
- Narrative**: A text input field with the value 'Loan Repayment By Cash'.

At the bottom right of the screen, there are three buttons: **Submit**, **Clear**, and **Cancel**.

### 2.16.5.1 Main Transaction Details

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Loan Repayment By Cash Screen](#).

**Field Description: Loan Repayment By Cash Screen**

Field	Description
<b>Loan Account</b>	Specify the loan account number. When you press <b>Tab</b> key, the customer details and loan account details will be displayed in the <b>Customer Information</b> widget.
<b>Repayment Amount</b>	Select the repayment currency and specify the repayment amount.  <b>NOTE:</b> By default, the loan account currency is displayed as repayment currency.
<b>Exchange Rate</b>	Displays the exchange rate.  <b>NOTE:</b> If the transaction currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b> .
<b>Total Charges (LCY)</b>	Displays the total charges in branch local currency.  <b>NOTE:</b> This field is displayed only if <b>Total Charge Configuration</b> at Function Code indicator level is set as <b>Y</b> .
<b>Account Amount</b>	Displays the repayment amount in loan account currency.

Field	Description
	<b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code indicator level is set as <b>Y</b> . If the loan account currency is different from repayment currency, then the system will derive the account amount based on the exchange rate.
<b>Narrative</b>	Displays the narrative as <b>Loan Repayment By Cash</b> and it can be modified.

### 2.16.5.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.16.5.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the loan amount is repaid successfully.

## 2.17 Journal Log

This section describes the various screens used to check the status of the transactions. The screens are described in the following sub-sections:

- [2.17.1 Electronic Journal](#)
- [2.17.2 Servicing Journal](#)
- [2.17.3 Reassign Transactions](#)

### 2.17.1 Electronic Journal

Tellers and Supervisors can use this screen to view the status of the cash transactions performed by them on the posting date. Tellers can view the status of the transactions performed only by them and Supervisors can view the status of the transactions performed by them and other Tellers. This screen is used to perform the following operations:

- View the status of all transactions performed by the logged-in Teller ID.
- Reverse the completed transaction posted by Teller during the day.
- Re-submit the incomplete transactions performed by the logged-in Teller ID, that are either:
  - Approved by the supervisor and moved to Teller EJ log for re-submission.
  - Transactions processed by external system (say Oracle Banking Payments) and responded to Teller with the status as **Success**.
- Reject the incomplete transactions that are either:
  - Rejected by external system (say Oracle Banking Payments) with the status as **Reject**.
  - Prompted with error due to processing validations.
- View the approval history to see the list of all transactions that are either approved or rejected by the logged-in approver ID.
- Approve or Reject the transactions that are assigned to the logged-in Approver ID during the day.

In the tile and grid views, the transactions are displayed for all statuses by default. The status can be changed using the filters option. If the user closes the screen with a status other than All, the selected status will be defaulted until the browser tab is closed. The following conditions apply for the default status:

- The browser tab is not closed – the transactions will be displayed for the previously selected status if this screen is launched again.
- The browser tab is closed and the user logs in to the application in a new tab or window – the transactions will be displayed for all statuses if this screen is launched.

User can perform any of the following actions in this screen:

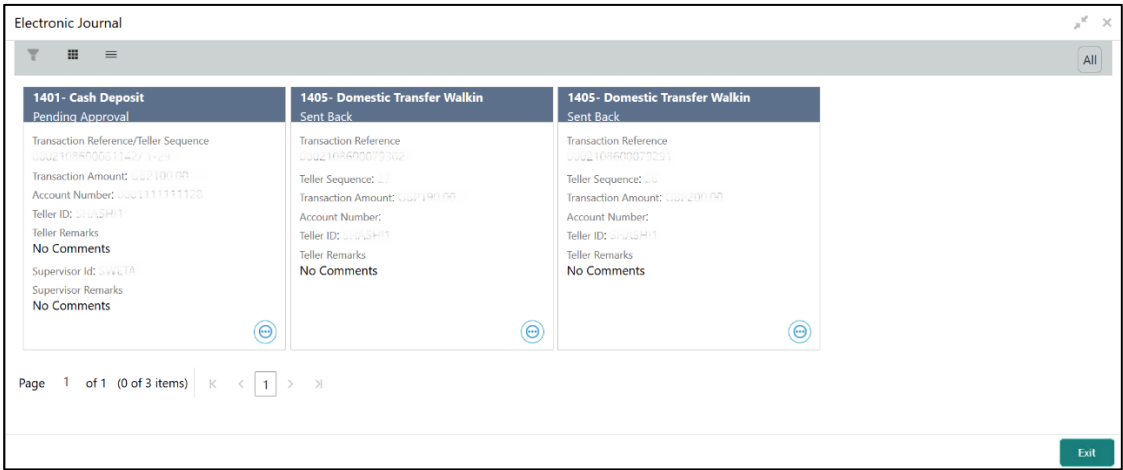

- Click  icon to display the details in the tile view.
- Click  icon to display the details in the grid view.
- On the grid view, click  icon to download the journal log as Microsoft Excel Worksheet.
- On the grid view, click  icon to view and select the necessary operation.

To process this screen, type **Electronic Journal** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Journal Log**, click **Electronic Journal**.

→ The **Electronic Journal** screen is displayed.

**Field Description: Electronic Journal - Filters**

<b>Field</b>	<b>Description</b>
<b>Teller ID</b>	Specify the Teller ID. You can also click search icon and select the Teller ID from the list of values.
<b>Function Code</b>	Specify the function code for which the inquiry is to be made. You can also click search icon and select the Teller ID from the list of values.
<b>Branch Posting Date</b>	Specify the branch posting date for which the inquiry is to be made.  <b>NOTE:</b> By default, the current posting date is displayed.
<b>Account Number</b>	Specify the account number. You can also click search icon and select the Teller ID from the list of account numbers maintained.
<b>Teller Sequence Prefix</b>	Click search icon and select from the list of values.
<b>Transaction Status</b>	Select the transaction status from the drop-down values.  <b>NOTE:</b> By default, <b>All</b> status is selected.
<b>Transaction Reference</b>	Specify the transaction reference number.
<b>From Sequence Number</b>	Specify the start number of the sequence range.
<b>To Sequence Number</b>	Specify the end number of the sequence range.
<b>From Transaction Time</b>	Specify the transaction start time.
<b>To Transaction Time</b>	Specify the transaction end time.

Field	Description
<b>From Amount Range</b>	Specify the “from” amount of the amount range.
<b>To Amount Range</b>	Specify the “to” amount of the amount range.
<b>Transaction Currency</b>	Click search icon and select the transaction currency from the list of values.

After filling the necessary fields, you can do any of the following steps:

- Click **Fetch** to get the list of transactions based on the query criteria specified. When you click **Fetch**, the following details are displayed for each transaction:
  - Function Code and Screen Name
  - Transaction Reference Number
  - Teller Sequence Number
  - Transaction Amount
  - Account Number
  - Teller ID
  - Teller Remarks
- Click **Clear** to clear the specified values.

You can also navigate to necessary transaction; perform the operations using the shortcut keys as follows:

- Press Tab key, and navigate to the list of transactions in grid view.
- Use Up/Down arrow keys to select the necessary transaction.
- Use Left/Right arrow keys to select the  icon.
- Press Spacebar to view the operations applicable to the selected transaction.
- Use Up/Down arrow keys to select the necessary operation.

### 2.17.2 Servicing Journal

Tellers and Supervisors can use this screen to view the status of the non-cash transactions performed by them on the posting date. For more details, refer to the description in topic [2.17.1 Electronic Journal](#).

To process this screen, type **Servicing Journal** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

- 1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Journal Log**, click **Servicing Journal**.

→ The **Servicing Transaction** screen is displayed.

Figure 220: Servicing Journal – Tile View

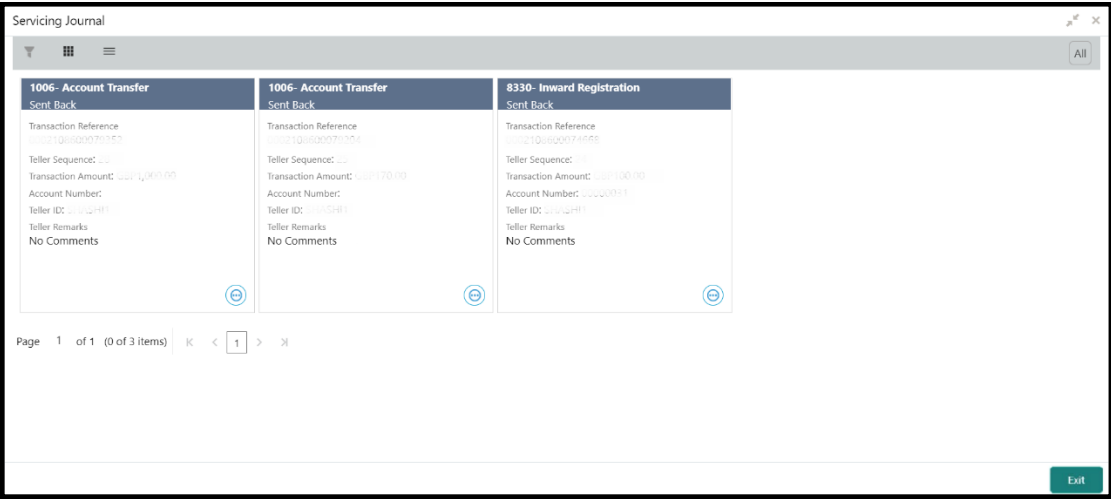

Figure 221: Servicing Journal – Grid View

By default, the transactions are displayed for **All** statuses. If the user change the transaction status using the filters option and close the screen, the previously selected status will be defaulted. When the browser or the tab is closed and the screen is launched again, the transaction status will be defaulted with **All**. You can perform any of the following actions in this screen:

- Click  icon to display the details in the tile view.
  - Click  icon to display the details in the grid view.
  - On the grid view, click  icon to download the journal log as Microsoft Excel Worksheet.
  - On the grid view, click  icon to view and select the necessary operation.
2. Click  icon to filter the results on tile/grid view based on the search criteria.

→ The **Filters** pop-up screen is displayed.

**Figure 222: Servicing Journal – Filter**

The screenshot shows a 'Filters' pop-up window with the following fields and controls:

- Teller ID:** Text input with a search icon.
- Function Code:** Text input with a search icon.
- Branch Posting Date \*:** Date picker showing 'Mar 27, 2021'.
- Account Number:** Text input with a search icon.
- Teller Sequence Prefix:** Text input with a search icon.
- Transaction Status:** Dropdown menu showing 'Sent Back'.
- Transaction Reference:** Text input.
- From Sequence Number:** Range selector with 'From Sequence Number' and 'To Sequence Number' fields, each with up/down arrows.
- From Transaction Time:** Range selector with 'From Transaction' and 'To Transaction Time' fields, each with a clock icon.
- From Amount Range:** Range selector with 'From Amount Range' and 'To Amount Range' fields.
- Transaction Currency:** Text input with a search icon.
- Buttons:** 'Fetch' and 'Clear' buttons at the bottom right.

3. On the **Filters** pop-up screen, specify the details fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to the field description table.

**Field Description: Servicing Journal - Filters**

Field	Description
<b>Teller ID</b>	Specify the Teller ID. You can also click search icon and select the Teller ID from the list of values.
<b>Function Code</b>	Specify the function code for which the inquiry is to be made. You can also click search icon and select the Teller ID from the list of values.
<b>Branch Posting Date</b>	Specify the branch posting date for which the inquiry is to be made.  <b>NOTE:</b> By default, the current posting date is displayed.
<b>Account Number</b>	Specify the account number. You can also click search icon and select the Teller ID from the list of account numbers maintained.
<b>Teller Sequence Prefix</b>	Click search icon and select from the list of values.
<b>Transaction Status</b>	Select the transaction status from the drop-down values.  <b>NOTE:</b> By default, <b>All</b> status is selected.
<b>Transaction Reference</b>	Specify the transaction reference number.
<b>From Sequence Number</b>	Specify the start number of the sequence range.
<b>To Sequence Number</b>	Specify the end number of the sequence range.
<b>From Transaction Time</b>	Specify the transaction start time.

Field	Description
<b>To Transaction Time</b>	Specify the transaction end time.
<b>From Amount Range</b>	Specify the “from” amount of the amount range.
<b>To Amount Range</b>	Specify the “to” amount of the amount range.
<b>Transaction Currency</b>	Click search icon and select the transaction currency from the list of values.

After filling the necessary fields, you can do any of the following steps:

- Click **Fetch** to get the list of transactions based on the query criteria specified. When you click **Fetch**, the following details are displayed for each transaction:
  - Function Code and Screen Name
  - Transaction Reference Number
  - Teller Sequence Number
  - Transaction Amount
  - Account Number
  - Teller ID
  - Teller Remarks
- Click **Clear** to clear the specified values.

You can also navigate to necessary transaction; perform the operations using the shortcut keys as follows:

1. Press Tab key, and navigate to the list of transactions in grid view.
2. Use Up/Down arrow keys to select the necessary transaction.
3. Use Left/Right arrow keys to select the  icon.
4. Press Spacebar to view the operations applicable to the selected transaction.
5. Use Up/Down arrow keys to select the necessary operation.

### 2.17.3 Reassign Transactions

Tellers and Supervisors can use this screen to re-assign the Supervisor ID for the cash/non-cash transactions, which are pending for approval or to unlock a locked transaction. To process this screen, type **Reassign Transactions** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Journal Log**, click **Reassign Transactions**.

→ The **Reassign Transactions** screen is displayed.

**Figure 223: Reassign Transactions**

Specify the details to fetch the records. For more information on fields, refer to table [Field Description: Reassign Transactions](#).

#### Field Description: Reassign Transactions

Field	Description
<b>Branch Posting Date</b>	Specify the branch posting date for which the inquiry is to be made.  <b>NOTE:</b> By default, the current posting date is displayed.
<b>Teller ID</b>	Select the Teller ID from the list of values.

Field	Description
<b>Function Code</b>	Specify the Function code for which the inquiry is to be made.  <b>NOTE:</b> The adjoining option provides the list of all function codes maintained.
<b>Account Number</b>	Specify the account number. The LOV fetch list all account numbers maintained.
<b>Teller Sequence Prefix</b>	Select from the list of values.
<b>From Sequence Number</b>	Specify the start number of the sequence range.
<b>To Sequence Number</b>	Specify the end number of the sequence range.
<b>From Transaction Time</b>	Specify the transaction start time.
<b>To Transaction Time</b>	Specify the transaction end time.
<b>From Amount Range</b>	Specify the “from” amount of the amount range.
<b>To Amount Range</b>	Specify the “to” amount of the amount range.
<b>Journal Log Type</b>	Select the type from the drop-down values ( <b>Electronic Journal</b> or <b>Servicing Journal</b> ).

After filling the necessary fields, you can do the following steps:

- Click **Fetch** to get the list of transactions based on the query criteria specified. When you click **Fetch**, the following details are displayed for each transaction:
  - Function Code and Screen Name
  - Transaction Reference Number
  - Teller Sequence Number
  - Transaction Amount

- Account Number
- Teller ID
- Supervisor ID
- Teller Remarks
- Supervisor Remarks
- Click **Clear** to clear the transaction list.

### 2.17.3.1 List of Transactions

The transactions fetched based on the search criteria are displayed in Tile View. In the Tile View, you can click necessary icons to perform the operations.

### Figure 224: List of Transactions

1013- chequeWithdrawal	1013- chequeWithdrawal	1401- cashDeposit

In the transaction record, you can perform any of the following operations:

- Click  icon to unlock the transaction.
- Click  icon to re-assign the Supervisor ID for the transaction.

## 2.18 Prediction

This section describes the Teller Service Counters Prediction screen used to predict the number of service counters. It is described in the following sub-section:

- [2.18.1 Teller Service Counters Prediction](#)

### 2.18.1 Teller Service Counters Prediction

This screen is used to predict the number of Teller service counters required for the specified days. To process this screen, type **Teller Service Counters Prediction** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, navigate to left menu and click **Teller**. On Teller Mega Menu, under **Prediction**, click **Teller Service Counters Prediction**.

→ The **Teller Service Counters Prediction** screen is displayed.

**Figure 225: Teller Service Counters Prediction**

Specify the details to fetch the records. All the fields in this screen are mandatory. For more information on fields, refer to table [Field Description: Teller Service Counters Prediction](#).

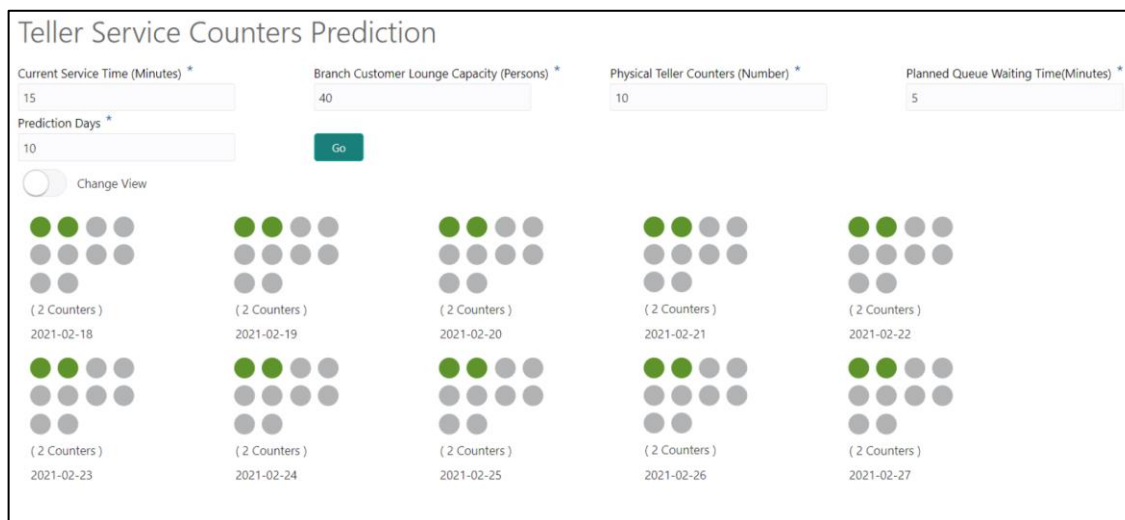

**Field Description: Teller Service Counters Prediction**

Field	Description
<b>Current Service Time (Minutes)</b>	Specify the time to service business transaction at the Teller counter.
<b>Branch Customer Lounge Capacity (Persons)</b>	Specify the number of persons can be accommodated at one time in the physical service area of the Branch.
<b>Physical Teller Counters (Number)</b>	Specify the physical teller counters available at the branch.

Field	Description
<b>Planned Queue Waiting Time (Minutes)</b>	Specify the waiting time to be achieved at the queue.
<b>Prediction Days</b>	Number of Days in future where the Teller counters are required to be predicted.

Click Go to get the predicted value of Teller Service Counters. A sample prediction of Teller service counters based on certain values is shown below.

**Figure 226: Sample Prediction of Teller Service Counters**

## 2.19 Cache

This section describes the Clear Cache screen, which is used to get the maintenance reflected while performing the transactions. It is described in the following sub-section:

- [2.19.1 Clear Cache](#)

### 2.19.1 Clear Cache

This screen is used to clear cache in order to get the maintenance reflected while performing the transactions. To process this screen, type **Clear Cache** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, navigate to left menu and click **Teller**. On Teller Mega Menu, under **Cache**, click **Clear Cache**.

→ The **Clear Cache** screen is displayed.

**Figure 227: Clear Cache**

The screenshot shows the 'Clear Cache' application window. It contains a table with the following data:

Cache Name	
Charge Maintenance Screen	<input checked="" type="checkbox"/>
Sms user role change	<input checked="" type="checkbox"/>
Function Code Preferences Screen	<input checked="" type="checkbox"/>
Function Code Definition Screen	<input checked="" type="checkbox"/>
Branch Related Screens	<input checked="" type="checkbox"/>

Below the table, there is a pagination bar showing 'Page 1 of 4 (1-5 of 16 items)' and navigation buttons. At the bottom left, there is a green 'Submit' button.

2. Click the checkboxes to select the desired **Cache Name**.
3. Click **Submit** to clear the selected cache.
4. Click **OK** to close the screen.

## 2.20 Customer Service

This section describes the various screens used customer services and inquiries. The screens are described in the following sub-sections:

- [\*2.20.1 Cheque Status Enquiry\*](#)
- [\*2.20.2 Stop Cheque Request\*](#)
- [\*2.20.3 Cheque Book Request\*](#)
- [\*2.20.4 Passbook Issue\*](#)
- [\*2.20.5 Passbook Update\*](#)
- [\*2.20.6 Passbook Status Change\*](#)
- [\*2.20.7 Passbook Reprint\*](#)
- [\*2.20.8 Account Balance Inquiry\*](#)
- [\*2.20.9 Account Statement Request\*](#)
- [\*2.20.10 Customer Address Update\*](#)
- [\*2.20.11 Account Address Update\*](#)
- [\*2.20.12 Customer Contact Details Update\*](#)
- [\*2.20.13 Cheque Book Status Change\*](#)

### 2.20.1 Cheque Status Inquiry

The Teller can use this screen to query the details of a cheque by specifying the account number of the customer and cheque number.

To process this screen, type **Cheque Status Inquiry** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Service**, click **Cheque Status Inquiry**.

→ The **Cheque Status Enquiry** screen is displayed.

**Figure 228: Cheque Status Enquiry**

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Cheque Status Enquiry](#).

**Field Description: Cheque Status Enquiry**

Field	Description
<b>Account Number</b>	Specify the account number for which the cheque status needs to be enquired.

Field	Description
<b>Cheque Number</b>	Specify the cheque number.
<b>Query</b>	Click this icon to fetch the details of the cheque.
<b>Clear</b>	Click this icon to clear the details.
<b>Account Name</b>	Displays the name of the account holder.
<b>Account Branch</b>	Displays the account branch code.
<b>Customer ID</b>	Displays the customer ID of the account.
<b>Cheque Status</b>	Displays the status of the cheque ( <b>Used</b> , <b>Unused</b> , or <b>Stopped</b> ).
<b>Value Date</b>	Displays the date specified on the cheque.
<b>Cheque Amount</b>	Displays the cheque amount.
<b>Beneficiary</b>	Displays the name of the beneficiary.

## 2.20.2 Stop Cheque Request

The Teller can use this screen to initiate stop payment of cheque as requested by the customer. A stop payment request is an instruction given by a customer to the bank directing it to stop payment against a Cheque. This instruction can be based on single cheque or a range of cheque numbers.

To process this screen, type **Stop Cheque Request** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Service**, click **Stop Cheque Request**.

→ The **Stop Cheque Request** screen is displayed.

**Figure 229: Stop Cheque Request**

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Stop Cheque Request](#).

**Field Description: Stop Cheque Request**

Field	Description
<b>Account Number</b>	Specify the account number for which you need to enforce a stop payment.
<b>Cheque Number</b>	Specify the cheque number on which the stop payment to be enforced.

Field	Description
<b>Select Multiple Cheques</b>	Select this option to enforce stop payment on multiple cheques of the customer account.
<b>Effective Date</b>	Specify the date on which the cheque is drawn.
<b>Expiry Date</b>	Specify the expiry date of the cheque.
<b>Reason Type</b>	Specify the type of stop payment ( <b>Stop</b> or <b>Lost</b> ).
<b>Total Charge Amount</b>	Displays the total charge amount, which is computed by the system in local currency of the branch.  <b>NOTE:</b> This field is displayed only if <b>Multi Currency Configuration</b> at Function Code Indicator level is set as <b>Y</b> .
<b>Narrative</b>	The system displays the default narrative <b>Stop Cheque Request</b> and it can be modified. You can specify the reason/purpose for which the stop payment is issued

### 2.20.2.1 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

### 2.20.2.2 Transaction Submission

When you click **Submit**, the request is handed off to the core FLEXCUBE Universal Banking system to update the stop payment status in Customer Accounts Maintenance to indicate the presence of a stop payment instruction for the customer account.

### 2.20.3 Cheque Book Request

This screen is used to initiate the cheque book request for a customer account. To process this screen, type **Cheque Book Request** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Service**, click **Cheque Book Request**.

→ The **Cheque Book Request** screen is displayed.

## 2.20.9 Account Statement Request

The Teller can use this screen to initiate account statement request for a customer account. To process this screen, type **Account Statement Req** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Service**, click **Account Statement Req**.

→ The **Account Statement Request** screen is displayed.

**Figure 238: Account Statement Request**

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory.  
For more information on fields, refer to table [Field Description: Account Statement Request](#).

#### Field Description: Account Statement Request

Field	Description
<b>Customer Account</b>	Specify the account number for which the account statement needs to be requested.
<b>Account Name</b>	Displays the name of the specified account number.
<b>Request Date</b>	Displays the current posting date as request date.
<b>Statement Type</b>	Specify the type of the statement requested ( <b>Detailed</b> or <b>Summary</b> ).
<b>From Date</b>	Specify the start date for the date range.
<b>To Date</b>	Specify the end date for the date range.
<b>Balance Type</b>	Specify if the account statement needs to be generated based on Book Date or Value Date.
<b>Narrative</b>	Displays the default narrative as <b>Account Statement</b> and it can be modified.

#### 2.20.9.1 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

#### 2.20.9.2 Transaction Submission

When you click **Submit**, the request is handed off to the FLEXCUBE Universal Banking system to initiate an account statement request.

## 2.20.10 Customer Address Update

The Teller can use this screen to initiate a service request to update the customer address details. To process this screen, type **Cust Address Update** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Service**, click **Cust Address Update**.  
→ The **Customer Address Update** screen is displayed.

**Figure 239: Customer Address Update**

Specify the details to in the **Customer Address Update** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Customer Address Update](#).

**Field Description: Customer Address Update**

Field	Description
<b>Customer Number</b>	Specify the customer number for which the address details needs to be updated.
<b>Customer Name</b>	Displays the customer name for the customer number specified.

Field	Description
<b>Correspondence Address</b>	Specify the fields.
<b>Address Line 1 to Address Line 4</b>	Displays the maintained address details and it can be modified.
<b>Country Code</b>	Displays the maintained address details and it can be modified.
<b>Permanent Address</b>	Specify the fields.
<b>Same as Correspondence Address</b>	Select this checkbox to populate the Correspondence Address to <b>Permanent Address</b> .
<b>Address Line 1 to Address Line 4</b>	Displays the maintained address details and it can be modified.
<b>Country Code</b>	Displays the maintained Country code and it can be modified.
<b>Residential Address</b>	Specify the fields.
<b>Same as Permanent Address</b>	Select this checkbox to populate the Permanent Address details to <b>Residential Address</b> .
<b>Address Line 1 to Address Line 4</b>	Displays the maintained address details and it can be modified.
<b>Country Code</b>	Displays the maintained Country code and it can be modified.
<b>Narrative</b>	Displays the default narrative <b>Customer Address Update</b> and it can be modified.

Field	Description
<b>Review and Submit</b>	This icon is located to the left of this screen. Click this icon to review the request details and submit.

When you **Submit**, the request details will be handed off to FLEXCUBE Universal Banking system for Customer Address update.

## 2.20.11 Account Address Update

The Teller can use this screen to can initiate a service request to update the address details of the customer account. To process this screen, type **Account Address Update** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Service**, click **Account Address Update**.

→ The **Account Address Update** screen is displayed.

**Figure 240: Account Address Update**

The screenshot displays the 'Account Address Update' screen. The top bar shows 'Initiate - SRVAPP154406929/29' and a 'Documents' icon. The sidebar on the left has 'Account Address Update' (selected) and 'Review and Submit'. The main content area is titled 'Account Address Update' and 'Screen (1 / 2)'. It contains the following fields:

- Account Number \*
- Account Branch
- Correspondence Address
- Address Line 1 \*
- Address Line 2
- Address Line 3
- Address Line 4
- Country Code \*
- Narrative \* (labeled 'Account Address Update')

At the bottom right, there are four buttons: 'Back', 'Next', 'Save & Close', and 'Cancel'.

Specify the details to in the **Account Address Update** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Account Address Update](#).

**Field Description: Account Address Update**

<b>Field</b>	<b>Description</b>
<b>Account Number</b>	Specify the customer account number for which the address details needs to be updated.
<b>Account Branch</b>	Displays the customer name for the customer number specified.
<b>Correspondence Address</b>	Specify the fields.
<b>Address Line 1 to Address Line 4</b>	Displays the maintained address details and it can be modified.
<b>Country Code</b>	Displays the maintained address details and it can be modified.
<b>Narrative</b>	Displays the default narrative <b>Account Address Update</b> and it can be modified.
<b>Review and Submit</b>	This icon is located to the left of this screen. Click this icon to review the request details and submit.

When you **Submit**, the request details will be handed off to FLEXCUBE Universal Banking system for Account Address update.

## 2.20.12 Customer Contact Details Update

This screen is used to initiate a service request to update the customer contact details. To process this screen, type **Customer Contact No Update** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Service**, click **Customer Contact No Update**.

→ The **Customer Contact No Update** screen is displayed.

**Figure 241: Customer Contact No Update**

The screenshot shows the 'Customer Contact Update' application entry screen. The form is divided into several sections. On the left, there's a sidebar with 'Customer Contact Update' and 'Review and Submit'. The main area contains the following fields: 'Customer Number' (mandatory, marked with an asterisk), 'Customer Name', 'Contact Details' section with 'Mobile Phone', 'Work Phone', 'Residential Phone', and 'Fax Phone'. Below these are 'Preferred Contact Time' (with 'From' and 'To' fields) and 'Preferred Communication Mode' (with radio buttons for 'Mobile' and 'Email'). There are also fields for 'Email Address', 'Alternate Email Address', 'Narrative' (mandatory, marked with an asterisk), and 'Contact Details Update'. At the bottom right, there are buttons for 'Back', 'Next', 'Save & Close', and 'Cancel'.

Specify the details to in the **Customer Contact No Update** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Customer Contact No Update](#).

**Field Description: Customer Contact No Update**

Field	Description
<b>Customer Number</b>	Specify the customer number for which the contact details needs to be updated.
<b>Customer Name</b>	Displays the customer name for the customer number specified.

Field	Description
<b>Customer Details</b>	Specify the fields.
<b>Mobile Phone</b>	Displays the mobile number and it can be modified.
<b>Work Phone</b>	Displays the work phone number and it can be modified.
<b>Residential Phone</b>	Displays the residential phone number and it can be modified.
<b>Fax Phone</b>	Displays the fax phone number and it can be modified.
<b>Preferred Contact Time</b>	Displays the preferred contact time and it can be modified.
<b>Preferred Communication Mode</b>	Displays the communication mode and it can be modified.
<b>Email Address</b>	Displays the email id of the customer and it can be modified.
<b>Alternate Email Address</b>	Displays the alternate email id of the customer and it can be modified.
<b>Narrative</b>	Displays the default narrative <b>Contact Details Update</b> and it can be modified.
<b>Review and Submit</b>	This icon is located to the left of this screen. Click this icon to review the request details and submit.

When you **Submit**, the request details will be handed off to FLEXCUBE Universal Banking system for Customer Contact Details update.

## 2.20.13 Cheque Book Status Change

This screen is used to change the status of a Cheque Book. To process this screen, type **Cheque Book Status Change** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Service**, click **Cheque Book Status Change**.

→ The **Cheque Book Status Change** screen is displayed.

**Figure 242: Cheque Book Status Change**

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Cheque Book Status Change](#).

**Field Description: Cheque Book Status Change**

Field	Description
<b>Account Number</b>	Specify the account number for which the cheque book status needs to be changed.
<b>First Cheque Number</b>	Specify the number of first cheque.
<b>Request Status</b>	<p>Select the status that needs to be updated for the chequebook. The drop-down values are as follows:</p> <ul style="list-style-type: none"> <li>• <b>Delivered</b></li> <li>• <b>Requested</b></li> <li>• <b>Destroyed</b></li> </ul>

Field	Description
Narrative	Displays the default narrative as <b>Cheque Book Status Change</b> and it can be modified.

When you click **Submit**, the request is handed off to the core FLEXCUBE Universal Banking system to change the status of the cheque book.

## 2.21 Branch Dashboard

This section describes the Branch Dashboard and various widgets used on it. The Branch Dashboard facilitates the integration of data from multiple screens and displays it as a Dashboard on the landing page of the application. It provides a comprehensive and consolidated snapshot in tiny windows to access information quickly. Thus helping the bank staff to analyze, monitor, and make better decisions, which in turn helps to save time and cost.

To process this screen, type **Dashboard** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Dashboard**.

→ The Branch Dashboard screen is displayed.

**Figure 243: Branch Dashboard**

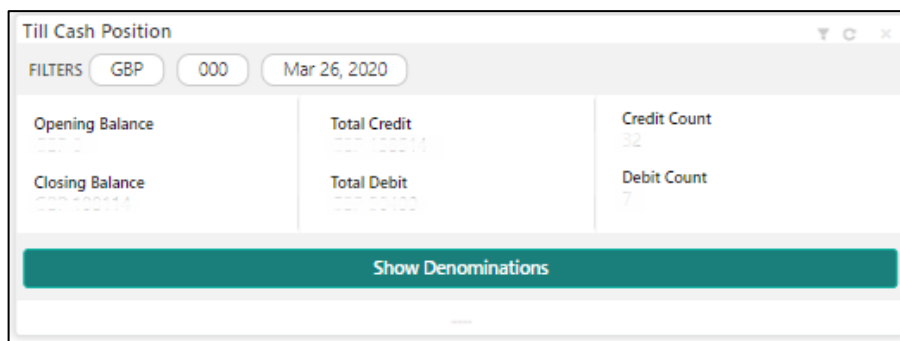

The Teller Dashboard is designed to display the widgets distributed in rows without the vertical scroll bar. The widgets are described in the following sub-sections:

- [2.21.1 Till Cash Position](#)
- [2.21.2 Inventory in Hand](#)
- [2.21.3 My Transaction Status](#)
- [2.21.4 Customer Search](#)
- [2.21.5 Current Till Position](#)
- [2.21.6 Frequent Customer Operations](#)
- [2.21.7 Frequent Branch Operations](#)
- [2.21.8 Customer Service Request](#)
- [2.21.9 Notifications](#)
- [2.21.10 Alerts](#)
- [2.21.11 Frequent Links](#)

## 2.21.1 Till Cash Position

This widget displays the currency wise cash position of the Teller Id, which includes **Opening Balance**, **Total Debit**, and **Total Credit**, which happened for the day, and the **Closing Balance**. In addition, the system displays the denomination wise count for the closing balance amount. The **FILTERS** option can be used to display Till cash position based on the currency, branch code, and date.

**Figure 244: Till Cash Position**

## 2.21.2 Inventory in Hand

This widget displays the list of inventory count available with the branch for the logged-in Teller Id.

**Figure 245: Inventory In Hand**

## 2.21.3 My Transaction Status

This widget displays the total transaction count performed by the logged-in Teller. Each slice represents the status-wise count of the transactions performed by the Teller. The **FILTERS** option can be used to display transaction status based on the branch code, branch date, and transaction type (Cash/Non-Cash).

**Figure 246: My Transaction Status**

## 2.21.4 Customer Search

The Teller can use this widget to query and find a specific customer account. For more information on this segment, refer to the topic [2.3.2.2 Customer Search](#) in this guide.

**Figure 247: Customer Search**

## 2.21.5 Current Till Position

This widget displays the Till amount available for the logged-in Teller ID. The **FILTERS** option can be used to display the current Till amount based on the currency, branch code, and date. The minimum and maximum values are fetched from the user preferences.

**Figure 248: Current Till Position**

## 2.21.6 Frequent Customer Operations

The Teller can use this widget to launch any of the frequently used **Customer Transactions** screens from the landing page. This option is easy to access instead of using **Menu Item Search** or navigating through Menu to process transactions.

**Figure 249: Frequent Customer Operations**

## 2.21.7 Frequent Branch Operations

The Teller can use this widget to launch any of the frequently used **Branch Operations** screens from the landing page. This option is easy to access instead of using **Menu Item Search** or navigating through Menu to process transactions.

**Figure 250: Frequent Branch Operations**

## 2.21.8 Customer Service Request

The Teller can use this widget to launch any of the frequently used **Customer Service** screens from the landing page. This option is easy to access instead of using **Menu Item Search** or navigating through Menu to process transactions.

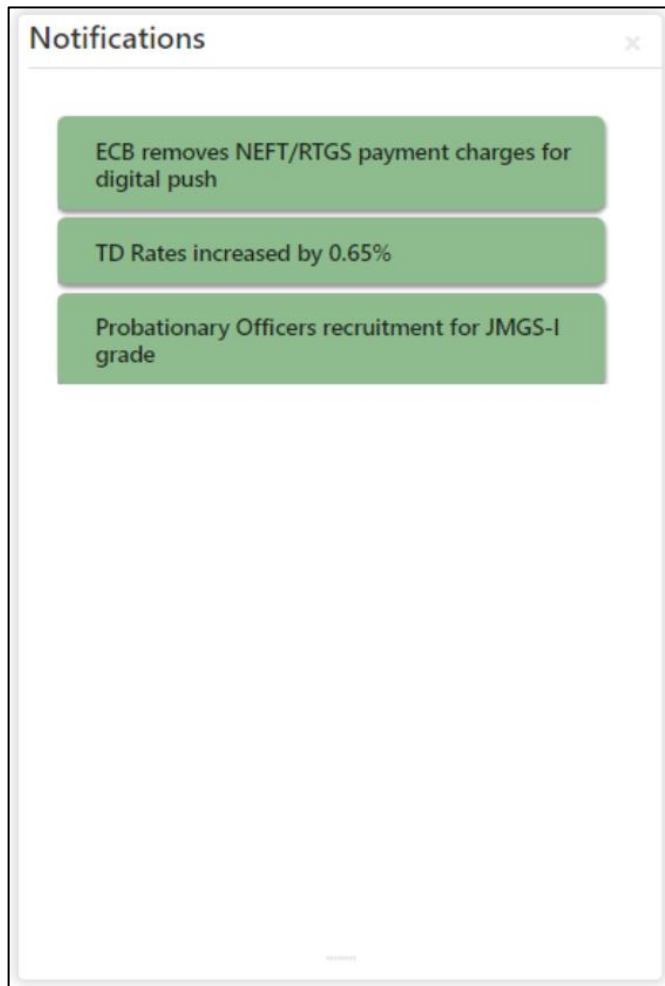

**Figure 251: Customer Service Request**

## 2.21.9 Notifications

The Teller can use this widget to view the bank specific notifications or instructions provided for the bank staffs. Generation of the notifications to be configured at the back-end.

**Figure 252: Notifications**

## 2.21.10 Alerts

The Teller is alerted through this widget on the user specific information based on which the Teller has to act accordingly. Generation of the alerts to be configured at the back-end.

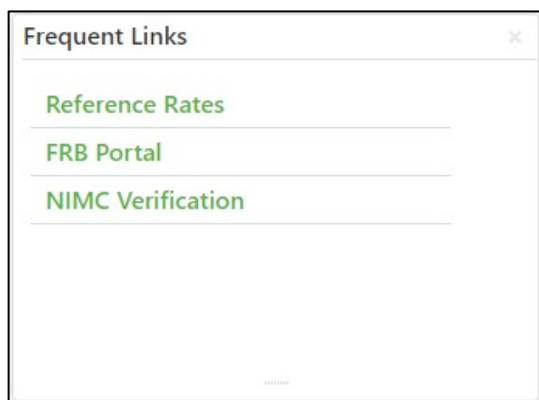

**Figure 253: Alerts**

## 2.21.11 Frequent Links

The Teller can use this widget to access the frequently used links to refer for transaction submission and for other operational activities during the day.

**Figure 254: Frequent Links**

## 2.22 Branch Maintenance

This section details the list of branch maintenances in a sequential order that is required to maintain for processing the branch transactions. The following standard operations are possible for the branch maintenances:

- Add
- Modify
- Delete
- Authorize
- Close
- Re-open

The various options under branch maintenances are described in the following sub-sections:

- [\*2.22.1 Teller Branch Parameters\*](#)
- [\*2.22.2 Branch Role Limits\*](#)
- [\*2.22.3 Branch User Preferences\*](#)
- [\*2.22.4 Denomination Maintenance\*](#)
- [\*2.22.5 Function Code Definition\*](#)
- [\*2.22.6 Function Code Preferences\*](#)
- [\*2.22.7 Default Authorizer Maintenance\*](#)
- [\*2.22.8 Accounting and Settlements\*](#)
- [\*2.22.9 Instrument No Maintenance\*](#)
- [\*2.22.10 Inter Bank Transit Account Maintenance\*](#)
- [\*2.22.11 External System Maintenance\*](#)
- [\*2.22.12 Channel Limits Maintenance\*](#)
- [\*2.22.13 Account Group Maintenance\*](#)
- [\*2.22.14 Branch Group Maintenance\*](#)
- [\*2.22.15 Customer Group Maintenance\*](#)

- [2.22.16 Charge Definition Maintenance](#)
- [2.22.17 Create Charge Pricing Maintenance](#)
- [2.22.18 View Charge Pricing Maintenance](#)
- [2.22.19 Charge Condition Group Maintenance](#)
- [2.22.20 Charge Decision Maintenance](#)
- [2.22.21 Charge Decision Enquiry](#)
- [2.22.22 Reject Code Maintenance](#)
- [2.22.23 Clearing Network Maintenance](#)
- [2.22.24 Denomination Variation Maintenance](#)
- [2.22.25 External Bank Code Maintenance](#)
- [2.22.26 Issuer Code Maintenance](#)
- [2.22.27 Utility Provider Maintenance](#)

## 2.22.1 Teller Branch Parameters

This screen is used to set preferences for the teller branch. To process this screen, type **Teller Branch Parameter Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Teller Branch Parameters Maintenance**.

→ The **Teller Branch Parameters Maintenance (Summary)** screen is displayed.

**Figure 255: Teller Branch Parameter Maintenance (Summary)**

2. On **Teller Branch Parameters Maintenance** (Summary) screen, click  icon.

→ The **Teller Branch Parameters Maintenance** screen is displayed.

**Figure 256: Teller Branch Parameter Maintenance**

Specify the details in the **Teller Branch Parameter Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Teller Branch Parameter Maintenance](#).

**Field Description: Teller Branch Parameter Maintenance**

Field	Description
<b>Branch Code</b>	Select the branch code from the available option list.
<b>Description</b>	Displays the description of the branch.
<b>Denomination Tracking Required</b>	Specify the denomination that needs to be tracked for the <b>Vault, Till and Vault</b> , or <b>None</b> . The descriptions of the drop-down values are given below: <ul style="list-style-type: none"> <li>• <b>Till and Vault</b> - To track denomination for Tills and Vault. By default, this option is selected.</li> <li>• <b>Vault</b> - To track denomination only for Vault, if a Vault is involved in the transaction.</li> </ul>

Field	Description
	<ul style="list-style-type: none"> <li>• <b>None</b> - To indicate that denomination tracking is not required for any transaction.</li> </ul>
<b>Currency Code</b>	Displays the currency for which the <b>Minimum Cash Holding Limit</b> or <b>Maximum Cash Holding Limit</b> to be maintained for the branch.
<b>Minimum Cash Holding Limit</b>	Displays the minimum cash holding limit for the branch.
<b>Maximum Cash Holding Limit</b>	Displays the maximum cash holding limit for the branch.  <b>NOTE:</b> The maximum cash holding amount must not be less than minimum cash holding amount.
<b>Action</b>	Click the icon as necessary to edit, save, or delete a row.

Click **Save** to get the summary view of configured Teller Branch Parameters. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the Teller Branch Parameters based on the specified search criteria.  
You can search the records based on the following criteria:
  - **Branch Code**
  - **Authorization Status**
  - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to refresh all records configured in the summary view.

## 2.22.2 Branch Role Limits

This screen is used to set the input and authorization limits for a specific role. Four static roles are factory-shipped and mapped with the functional activity codes. The functional activity codes maintained for each service/menu item are mapped to the respective roles. The details of each static role is provided in the table below:

### Static Roles

Static Role	Description
OBBRN_BASE	<p>This role is mapped with all functional activity codes related to service side. A user ID has to be mapped to OBBRN_BASE and one or more of the following roles based on the requirement:</p> <ul style="list-style-type: none"> <li>• OBBRN_MANAGER</li> <li>• OBBRN_TELLER</li> <li>• OBBRN_VAULT</li> </ul>
OBBRN_MANAGER	<p>This role is mapped with all menu related functional activity codes, and the user can access all screens.</p>
OBBRN_TELLER	<p>This role is mapped with functional activity codes related to menu that can be accessed by a Teller user. User can access the screens except the following:</p> <ul style="list-style-type: none"> <li>• All screens under Branch Maintenance</li> <li>• Open Branch Batch</li> <li>• Close Branch Batch</li> <li>• Open Vault Batch</li> <li>• Close Vault Batch</li> <li>• Buy Cash from Currency Chest</li> <li>• Sell Cash to Currency Chest</li> <li>• Interbranch Transaction Request</li> </ul>

Static Role	Description
	<ul style="list-style-type: none"> <li>Interbranch Transaction Input</li> <li>Interbranch Transaction Liquidation</li> </ul>
OBBRN_VAULT	<p>This role is mapped with functional activity codes related to menu that can be accessed by a Vault user. User can access only the following screens:</p> <ul style="list-style-type: none"> <li>Open Vault Batch</li> <li>Close Vault Batch</li> <li>Buy Cash from Currency Chest</li> <li>Sell Cash to Currency Chest</li> <li>Interbranch Transaction Request</li> <li>Interbranch Transaction Input</li> <li>Interbranch Transaction Liquidation</li> </ul>

To process this screen, type **Branch Role Limits** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

- From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Branch Role Limits**.

→ The **Branch Role Limits** (Summary) screen is displayed.

**Figure 257: Branch Role Limits (Summary)**

2. On **Branch Role Limits** (Summary) screen, click  icon.

→ The **Branch Role Limits Maintenance** screen is displayed.

**Figure 258: Branch Role Limits Maintenance**

Specify the details in the **Branch Role Limits Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Branch Role Limits Maintenance](#).

**Field Description: Branch Role Limits Maintenance**

Field	Description
<b>Role ID</b>	Select the role ID for which the limit preferences are to be set.
<b>Role Description</b>	Displays the role description for the selected <b>Role ID</b> .
<b>Supervisor Role</b>	Select if the defined role is a designated supervisor of the branch who has the authorization rights.
<b>Limit Currency</b>	Select the currency code in which the limits to be specified.
<b>Input Limit</b>	Specify the transaction input limit for a single transaction.

Field	Description
<b>Authorization Limit</b>	Specify the maximum amount that the role is allowed to process while authorizing a transaction.
<b>Action</b>	Click the icon as necessary to edit, save, or delete a row.

Click **Save** to get the summary view of configured Branch Role Limits. In the summary screen, you can also perform any of the following actions:

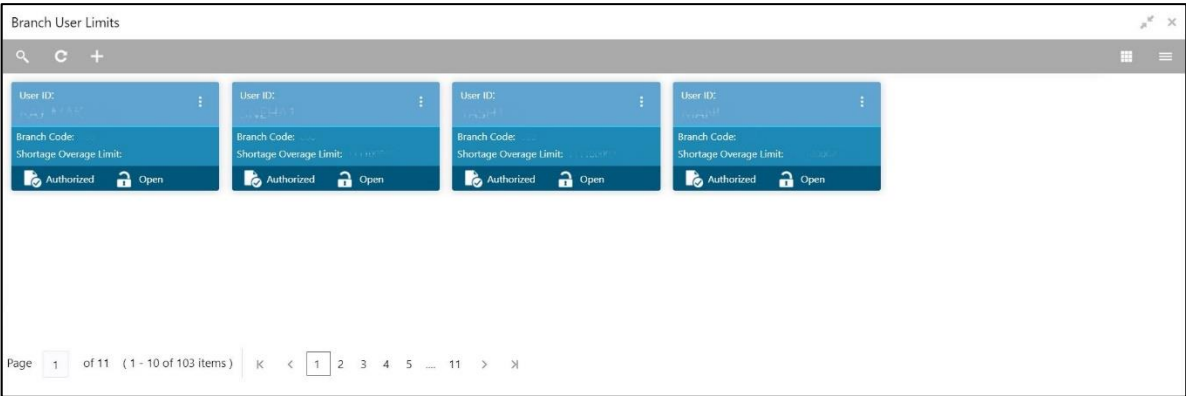

- Click  icon to search the Branch Role Limits based on the specified search criteria. You can search the records based on the following criteria:
  - Role Id**
  - Supervisor Role**
  - Authorization Status**
  - Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - New** – Click this button to create a new record.
  - Unlock** – Click this button to modify the details and save.
  - Delete** – Click this button to delete an unauthorized record.
  - Authorise** – Click this button to authorise the record.
  - Close** – Click this button to close the record.
  - Reopen** – Click this button to re-open a closed record.
  - Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

### 2.22.3 Branch User Preferences

This screen is used to set preferences for the branch user who either process cash transactions or process help desk activities. To process this screen, type **Branch User Limits** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Branch User Limits**.  
  
→ The **Branch User Limits** (Summary) screen is displayed.

**Figure 259:Branch User Limits (Summary)**

2. On **Branch User Limits** (Summary) screen, click **+** icon.  
  
→ The **User Preference** screen is displayed.

**Figure 260: User Preference**

Specify the details in the **User Preference** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: User Preference](#).

**Field Description: User Preference**

Field	Description
<b>Branch Code</b>	Click search icon, and select the branch code from the list of values.

Field	Description
<b>User ID</b>	Click search icon, and select the user ID for which the branch preferences to be maintained.
<b>Till/Vault Indicator</b>	Select from the drop down values ( <b>Till</b> , <b>Vault</b> , <b>Both</b> or <b>None</b> ).
<b>Shortage/Overage GL</b>	Note: Currently not used, meant for future use.
<b>Carry Forward Allowed</b>	Select if the funds are allowed to carry forward for the next day.
<b>Inter Branch Transactions Allowed</b>	Select if the transfer between the branches is allowed.
<b>Receive Email</b>	Select if the Teller needs to receive emails for approval of transactions.
<b>Receive Notification</b>	Select if the Teller needs to receive notifications in Dashboard.
<b>Currency Holding Preferences</b>	Specify the fields.
<b>Currency Code</b>	Click search icon, and select the currency code to specify the cash holding preferences.
<b>Minimum Balance</b>	Specify the minimum balance to be maintained for the Till or Vault.
<b>Maximum Balance</b>	Specify the maximum balance to be maintained for the Till or Vault.

Field	Description
<b>Currency Limit Preferences</b>	Specify the fields.
<b>Currency Code</b>	Click search icon, and select the currency in which the limits (transactions amounts) will be expressed.
<b>Max Transaction Amount</b>	Specify the maximum transaction amount allowed that the user can enter in a single transaction.
<b>Authorization Limit</b>	Specify the maximum amount that the user (to which the limits role is associated) is allowed to process while authorizing a transaction.

Click **Save** to get the summary view of configured User Preferences. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the User Preferences based on the specified search criteria. You can search the records based on the following criteria:
  - User Id**
  - Authorization Status**
  - Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - New** – Click this button to create a new record.
  - Unlock** – Click this button to modify the details and save.
  - Delete** – Click this button to delete an unauthorized record.
  - Authorise** – Click this button to authorise the record.
  - Close** – Click this button to close the record.
  - Reopen** – Click this button to re-open a closed record.
  - Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

## 2.22.4 Denominations Maintenance

This screen is used to maintain the standard currency denominations for each currency that the bank deals with. For example, the denominations for the currency USD can be maintained as shown in the table [Denominations Maintenance: USD Currency](#).

**Denominations Maintenance: USD Currency**

CCY CODE	DENM CODE	DESCRIPTION	VALUE	NOTE / COIN
USD	D100	100 dollars	100	NOTE
USD	D50	50 dollars	50	NOTE
USD	D20	20 dollars	20	NOTE
USD	D10	10 dollars	10	NOTE
USD	D5	5 dollars	5	NOTE
USD	D1N	1 dollar Note	1	NOTE
USD	D1C	1 dollar Coin	1	COIN
USD	C25	25 cents	0.25	COIN
USD	C10	10 cents	0.1	COIN
USD	C5	5 cents	0.05	COIN
USD	C1	1 cent	0.01	COIN

To process this screen, type **Denominations Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Denominations Maintenance**.

→ The **Denominations Maintenance (Summary)** screen is displayed.

**Figure 261: Denomination Maintenance (Summary)**

2. On **Denominations Maintenance (Summary)** screen, click **+** icon.

→ The **Denominations Maintenance** screen is displayed.

**Figure 262: Denomination Maintenance**

Specify the details in the **Denomination Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Denomination Maintenance](#).

**Field Description: Denomination Maintenance**

<b>Field</b>	<b>Description</b>
<b>Currency Code</b>	Specify the currency for which the currency denomination to be maintained.
<b>Currency Description</b>	Specify the description of the currency code.
<b>Denomination Type</b>	Select the denomination type.
<b>Denomination Details</b>	Specify the fields.
<b>Denomination ID</b>	Specify the denomination code.
<b>Description</b>	Specify the description of the denomination code.
<b>Value</b>	Specify the numeric value of the denomination code.
<b>Sequence Number</b>	Specify the number, such that the denom codes will be displayed in the same sequence maintained.
<b>Type</b>	Specify the type as <b>Coin</b> or <b>Note</b> .
<b>Large Denomination</b>	Select if a particular denomination is to be maintained as a large denomination.

After filling the necessary fields, click **Add** to add the specified denomination details as an entry to the table.

Click **Save** to get the summary view of configured Denomination. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the configured Denominations based on the specified search criteria. You can search the records based on the following criteria:
  - **Currency Code**
  - **Currency Description**

- **Authorization Status**
- **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

## 2.22.5 Function Code Definition

This screen is used to specify the preferences for the function code. For the list of function codes and the respective screen names, refer to chapter [Annexure 3 – List of Function Codes](#) in this guide.

To process this screen, type **Function Code Definition** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Function Code Definition**.

→ The **Function Code Definition (Summary)** screen is displayed.

**Figure 263: Function Code Definition (Summary)**

2. On **Function Code Definition** (Summary) screen, click  icon.

→ The **Function Code Definition** screen is displayed.

**Figure 264: Function Code Definition**

In **Function Code Definition** screen, reversal allowed flag will not be enabled for BC Payment Reversal, DD Payment Reversal, and Cash Remittance Reversal. The system displays an error message stating that the Reversal is not supported, making reversal allowed as N.

Specify the details in the **Function Code Definition** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Function Code Definition](#).

#### Field Description: Function Code Definition

Field	Description
<b>Function Code</b>	Pick from the list function codes that are factory shipped. For the list of function codes and the respective screen names, refer to chapter <a href="#">Annexure 3 – List of Function Codes</a> .

Field	Description
<b>Function Code Description</b>	Displays the description of the function code.
<b>Transaction Limit</b>	Specify the maximum transaction amount allowed for this function code in branch currency.
<b>Support Child Function Code</b>	Select if the specified function code need to act as the parent function code.
<b>Parent Function Code</b>	Specify the applicable parent function code.  <b>NOTE:</b> This field is enabled only if <b>Support Child Function Code</b> is not selected.
<b>Next Date Transaction Allowed</b>	Select if the next day transaction posting needs to be allowed for the specified function code.
<b>Charge Details</b>	Specify the fields.
<b>Apply Charges</b>	Specify if charges are applicable for this transaction.
<b>Exchange Rate Details</b>	Specify the fields.
<b>Rate Type</b>	Select the rate type for the transaction code.
<b>Rate Code</b>	Select the rate code for the transaction code.
<b>Override Limit</b>	Specify the override limit. The system displays the default override limit currency as GBP.
<b>Stop Limit</b>	Specify the stop limit. The system displays the default stop limit currency as GBP.
<b>Additional Preferences</b>	Specify the fields.

Field	Description
<b>Reversal Allowed</b>	Specify if the reversal is allowed for the transaction.  <b>NOTE:</b> Reversal allowed will be disabled for remittances and clearing transactions. Hence, reversal will not be enabled in the journal log.
<b>Reversal Requires Authorization</b>	Specify if the authorization is required for a reversal transaction.
<b>Reversal includes charges</b>	Specify if the charges is to be reversed along with transaction reversal.
<b>Reversal Advice Name</b>	Select the reversal advice name from the list of values.
<b>Input Slip Name</b>	Specify the input slip name.

Field	Description
<b>Input Slip Confirmation</b>	<p>Select if the input slip confirmation is required for the transaction. If this option is selected for a transaction screen, the <b>Input-Slip</b> button will be displayed on the screen.</p> <p>On the specified transaction screens, you can click <b>Input-Slip</b> to view the input slip before transaction submission. Once you click <b>Input-Slip</b>, the system validates mandatory fields. In addition, you can perform any of the following actions:</p> <ul style="list-style-type: none"> <li>• <b>Confirm &amp; Print</b> – This button is enabled only if Input Slip Confirmation is selected in Function Code Definition screen. In addition, the transaction can be submitted only if the receipt is confirmed. Click this button to confirm and print the receipt.</li> <li>• <b>Print</b> – Click this button to print the generated slip and provide to the customer.</li> <li>• <b>Close</b> – Click this button to close the generated receipt.</li> </ul> <p><b>NOTE:</b> If the mandatory fields are not filled, the system shows an error message <b>Value is required</b>, wherever applicable.</p>
<b>Transaction Alert Preference</b>	<p>Select the alert notification preference from the drop-down list. The values are mentioned below:</p> <ul style="list-style-type: none"> <li>• <b>SMS</b> – the system sends an SMS notification of the transactions to the registered mobile number of the Customer.</li> <li>• <b>Email</b> – the system sends an email notification of the transactions to the registered email ID of the Customer.</li> </ul>

Field	Description
	<ul style="list-style-type: none"> <li><b>Both</b> – the system sends SMS and email notifications of the transactions to the registered mobile number and email ID of the Customer.</li> <li><b>None</b> – the system will not send any notifications to the Customer.</li> </ul> <p><b>NOTE:</b> The setup for Plato alerts needs to be completed and Kafka topics needs to be created to enable e-mail alerts. For more information on setup, refer to Oracle Banking Branch Installation Guide.</p>
<b>Advices</b>	This section allows selecting advices for multiple Function Codes.
+ icon	Click this icon to add a new row.
- icon	Click this icon to delete a selected row.
<b>Advice Name</b>	Displays the advice name.

Click **Save** to get the summary view of configured Function Code Definition. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the Function Code Definition based on the specified search criteria. You can search the records based on the following criteria:
  - Function Code**
  - Authorization Status**
  - Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - New** – Click this button to create a new record.
  - Unlock** – Click this button to modify the details and save.
  - Delete** – Click this button to delete an unauthorized record.

- **Authorise** – Click this button to authorise the record.
- **Close** – Click this button to close the record.
- **Reopen** – Click this button to re-open a closed record.
- **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

## 2.22.6 Function Code Preferences

This screen is used to define the workflow preferences (validation preferences and authorization preferences) for a function code. For the list of function codes and the respective screen names, refer to the table [Annexure 3: List of Function Codes](#). The Rule Based Authorization option in this screen is used to configure multi-level authorization with AND or OR condition. The multi-level authorization feature is described with the following example.

The sample user roles considered as follows:

- JUNIOR TELLER (Supervisor enabled)
- SENIOR TELLER1
- SENIOR TELLER2
- OFFICER LEVEL1
- OFFICER LEVEL2
- BRANCH MANAGER

The sample values for limits and roles maintained are as below:

### Sample Values for Multi-level Authorization

Transaction Limit	Primary Authorization	Alternate Authorization
50,000 to 9,99,999	SENIOR TELLER2 AND OFFICER LEVEL1 AND OFFICER LEVEL2	OFFICER LEVEL2 AND BRANCH MANAGER
10,00,000 to 99,99,99,99,999	SENIOR TELLER1 AND OFFICER LEVEL1	OFFICER LEVEL2 OR BRANCH MANAGER

The approval needs to be provided by the roles configured with AND or OR condition defined either in the primary authorization path or in the alternate authorization path. Based on the sample values provided, the following are some possible scenarios for multi-level authorization:

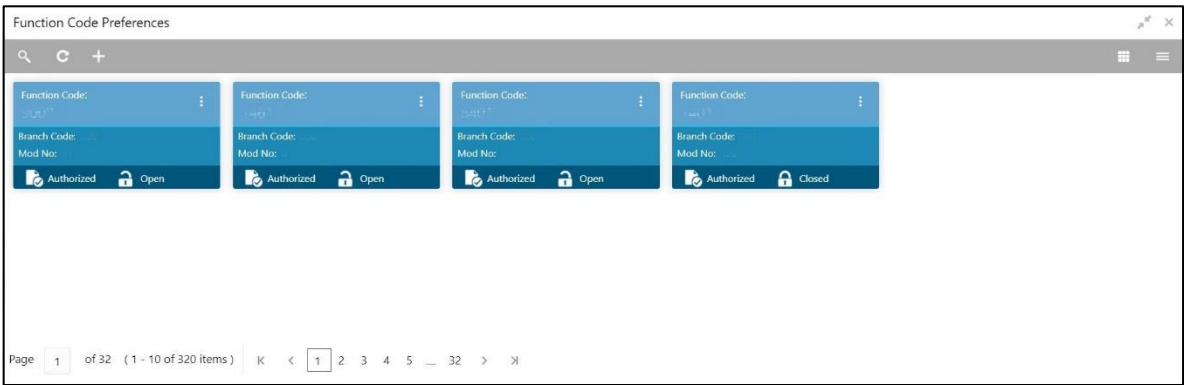

- If a Teller with JUNIORTELLER role inputs a cash deposit transaction of amount 10,000 the transaction gets completed automatically without authorization.
- If a Teller with JUNIOR TELLER role input a cash deposit of 60,000, the transaction gets assigned to all the roles mentioned in Primary and Alternate Authorization paths. For example, when a user with OFFICER LEVEL2 role picks the transaction and authorizes it, the transaction gets assigned to the other three roles in the Primary and Alternate paths. Further, based on the user who picks for approval, the corresponding path will be chosen by the system. If a user with BRANCH MANAGER Role picks the transaction for approval, the system identifies the Alternate Path for approval and ends the authorization process. If a user with SENIOR TELLER2 role picks the transaction and authorizes, then the corresponding Primary Path will be chosen by the system for OFFICER LEVEL1 to authorize the transaction.
- If a Teller inputs an account transfer of 20,00,000, the transaction gets assigned to all the roles mentioned in Primary and Alternate Authorization paths. When a user with BRANCH MANAGER role or OFFICER LEVEL2 picks the transaction and authorizes it, the system identifies the path as Alternate and ends the authorization process. Else if a user with OFFICER LEVEL1 picks the transaction and authorizes it, the system identifies the path as Primary for SENIOR TELLER1 to authorize the transaction.

To process this screen, type **Function Code Preferences** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Function Code Preferences**.

→ The **Function Code Preferences** (Summary) screen is displayed.

Figure 265: Function Code Preferences (Summary)

2. On **Function Code Preferences** (Summary) screen, click  icon.

→ The **Function Code Preferences** screen is displayed.

Figure 266: Function Code Preferences

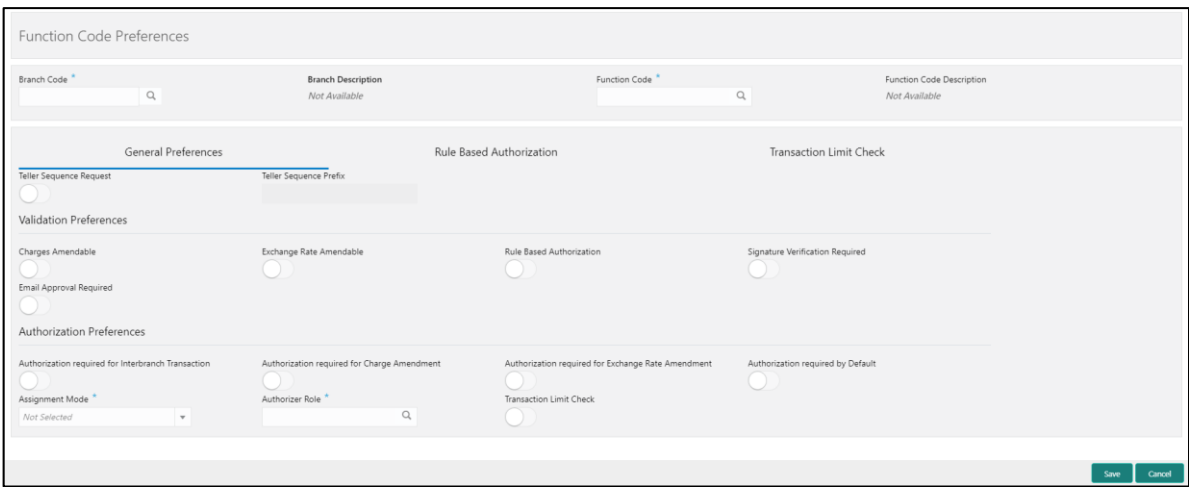

Figure 267: Rule Based Authorization

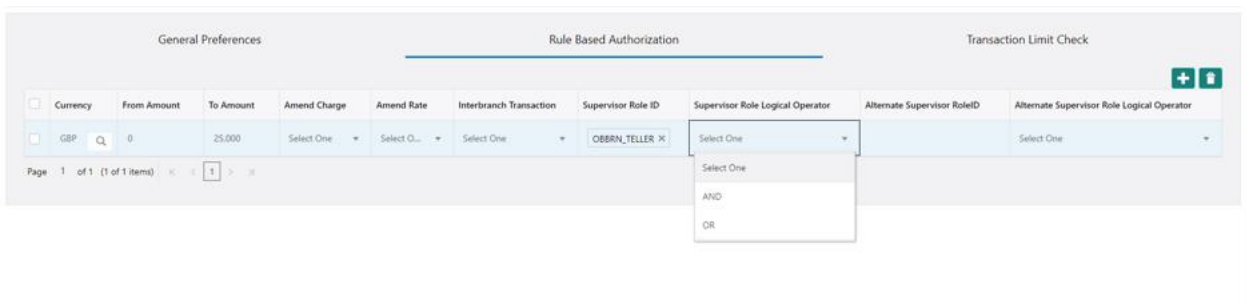

Figure 268: Transaction Limit Check

General Preferences   Rule Based Authorization   **Transaction Limit Check**

Transaction Currency	Transaction Amount	Action

Page 1 (1 of 1 items)   < 1 >

Specify the details in the **Function Code Preferences** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Function Code Preferences](#).

#### Field Description: Function Code Preferences

Field	Description
<b>Branch Code</b>	Select the branch code from the list of values. The list of values should have *.* for ALL option.
<b>Branch Description</b>	Displays the description of the branch code.
<b>Function Code</b>	Specify the function code. The list of values display the valid function codes.
<b>Function Code Description</b>	Displays the description of the function code.
<b>General Preferences</b>	Specify the fields. This segment can be used to configure single-level authorization of the preferences with the use of <b>Authorizer Role</b> field.
<b>Teller Sequence Request</b>	Select this option to generate the Teller sequence number.

Field	Description
<b>Teller Sequence Prefix</b>	Specify the prefix for the generation of teller sequence number.  <b>NOTE:</b> This is mandatory only if <b>Teller Sequence Request</b> is selected.
<b>Validation Preferences</b>	Specify the fields.
<b>Charges Amendable</b>	Select if the charges are allowed to modify for the transaction.
<b>Exchange Rate Amendable</b>	Select if exchange rate is allowed to modify for the transaction.
<b>Rule Based Authorization</b>	Select if the rule based authorization is required for the transaction.  <b>NOTE:</b> Assignment mode to be defined as 'Auto' if Rule based auth flag is selected.
<b>Email Approval Required</b>	Select if the authorization through email is required for a transaction.

Field	Description
	<p><b>NOTE:</b> If this option is selected in override confirmation, then an email will be sent as per assignment mode maintained. This email will be sent to the selected approver or to a list of approvers associated to the role maintained. The approvers will get email for authorization only if receive email flag is selected in the <b>User Preferences</b> screen. Once email is received, Approver can either approve or reject the transaction. When you click the <b>Approve</b> or <b>Reject</b>, an email will be automatically opened in the system where the approver can type their comments. The setup for Plato alerts needs to be completed and Kafka topics needs to be created to enable e-mail alerts. For more information on setup, refer to Oracle Banking Branch Installation Guide.</p>
<b>Signature Verification Required</b>	Select if the Teller needs to verify the Customer's signature while submitting the transaction.
<b>Authorization Preferences</b>	Specify the fields.
<b>Authorization required for Interbranch Transaction</b>	Select if the authorization is required for inter-branch transaction.
<b>Authorization required for Charge Amendment</b>	Select if the authorization is required in case you have amended the charge defaulted by the system.
<b>Authorization required for Exchange Rate Amendment</b>	Select if the authorization is required in case you have amended the exchange rate defaulted by the system.

Field	Description
<b>Authorization required by Default</b>	<p>Select if the authorization is required by default for the transaction.</p> <p><b>NOTE:</b></p> <ul style="list-style-type: none"> <li>To enable a two-step authorization process, maintain the value as Y in the FINISHTXN_ON_APP parameter in the SRV_TM_BC_PARAM_DTLS table.</li> <li>If notification is also required on approval in the two step process, then both the parameters FINISHTXN_ON_APP and TWO_STEP_SYNC need to be enabled.</li> </ul>
<b>Assignment Mode</b>	<p>Select to indicate whether remote authorization assignment is automatic or manual operation for the transaction.</p>
<b>Authorizer Role</b>	<p>Select the role of the authorizers. The users belonging to this role are the valid authorizers for this workflow.</p> <p><b>NOTE:</b> This field is applicable, if assignment mode is <b>Manual</b> or if assignment mode is <b>Auto</b> and no default authorizer is maintained for the user.</p>
<b>Rule Based Authorization</b>	<p>Specify the fields. This segment can be used to configure multi-level authorization of the preferences with the use of <b>Supervisor Role ID</b> and <b>Alternate Supervisor Role ID</b> fields.</p> <p><b>NOTE:</b> Rule Based Authorization cannot be applied for customer servicing transactions.</p>
<b>+ icon</b>	<p>Click this icon to add a row for a transaction.</p> <p><b>NOTE:</b> Double-click on the newly added row to enable the fields.</p>

Field	Description
- icon	Click this icon to delete a selected row.
<b>Currency</b>	Select the currency of the transaction from the LOV.
<b>From Amount</b>	Specify the From cap amount.
<b>To Amount</b>	Specify the To cap amount.
<b>Amend Charge</b>	Select Yes or No.
<b>Amend Rate</b>	Select Yes or No.
<b>Interbranch Transaction</b>	Select Yes or No.
<b>Supervisor Role ID</b>	<p>Select the supervisor role ID from the list of values. The following conditions apply to this field:</p> <ul style="list-style-type: none"> <li>• More than one role can be added for authorization.</li> <li>• If multiple roles are added, it is not mandatory to authorize in sequential order of the roles added.</li> <li>• The roles added in this field are considered for primary level of authorization.</li> </ul>
<b>Supervisor Role Logical Operator</b>	Select the logical operator AND or OR. If AND is chosen, all the Supervisor role specified in primary path has to authorize the transaction. If OR is chosen, either of the Supervisor role has to authorize the transaction.
<b>Alternate Supervisor Role ID</b>	<p>Select the alternate role ID from the list of values. The following conditions apply to this field:</p> <ul style="list-style-type: none"> <li>• More than one role can be added for authorization.</li> <li>• If multiple roles are added, it is not mandatory to authorize in sequential order of the roles added.</li> </ul>

Field	Description
	<ul style="list-style-type: none"> <li>The roles added in this field are considered for secondary level of authorization.</li> </ul>
<b>Alternate Supervisor Role Logical Operator</b>	Select the logical operator AND or OR. If AND is chosen, all the Supervisor role specified in primary path has to authorize the transaction. If OR is chosen, either of the Supervisor role has to authorize the transaction.
<b>Transaction Limit Check</b>	Specify the details under this section. Double-click on a row to enable the fields.
<b>Transaction Currency</b>	Click search icon, and select the transaction currency from the list of values.
<b>Transaction Amount</b>	Specify the transaction amount.
<b>Action</b>	Click the icons as necessary to save, edit, or delete values of a row.

Click **Save** to get the summary view of configured Function Code Preferences. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the Function Code Preferences based on the specified search criteria. You can search the records based on the following criteria:
  - Branch Code**
  - Function Code**
  - Authorization Status**
  - Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - New** – Click this button to create a new record.
  - Unlock** – Click this button to modify the details and save.
  - Delete** – Click this button to delete an unauthorized record.

- **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

## 2.22.7 Default Authorizer Maintenance

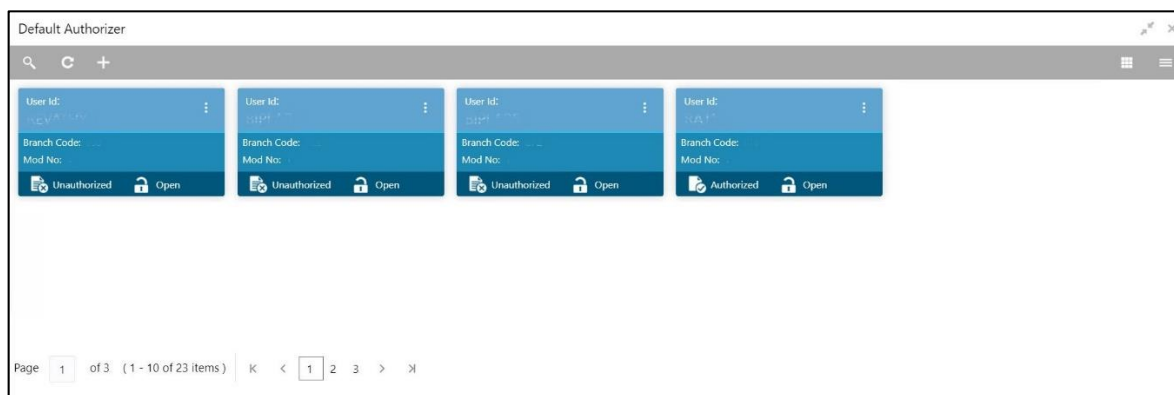

This screen is used to define the default authorizer who can authorize a specific function code for a branch user. Once it is defined, the system automatically routes the transactions of this function code to the default authorizer defined for the branch user.

To process this screen, type **Default Authorizer** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Default Authorizer**.

→ The **Default Authorizer (Summary)** screen is displayed.

**Figure 269: Default Authorizer (Summary)**

2. On **Default Authorizer** (Summary) screen, click  icon.

→ The **Default Authorizer** screen is displayed.

**Figure 270: Default Authorizer Definition**

Specify the details in the **Default Authorizer Definition** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Default Authorizer Definition](#).

**Field Description: Default Authorizer Definition**

Field	Description
<b>User ID</b>	Select the user ID from the LOV. The option list consists of user IDs for which a default authorizer needs to be maintained.
<b>User Name</b>	Displays the name of the user, when you select the user ID.
<b>Branch Code</b>	<p>Select the branch code from the LOV. This field is enabled if the <b>All</b> option is chosen in the <b>User ID</b> field.</p> <p><b>NOTE:</b> If specific authorizer is selected, then the system will default the home branch as branch code.</p>

Field	Description
<b>Branch Name</b>	Displays the branch name, when you select the <b>Branch Code</b> .
<b>Default Authorizer</b>	<p>Select the default authorizer from the LOV, if it is already set while assigning the transaction. If the mode assigned is <b>Manual</b>, it allows to change the default authorizer.</p> <p>Select the authorizer ID from the adjoining option list. The option list consists of authorizers who are mapped to a role with <b>Savings Authorizer</b> flag value as <b>Y</b> or <b>All</b> option.</p>
<b>Description</b>	Displays the description.

Click **Save** to get the summary view of configured Default Authorizer. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the Default Authorizer Maintenance based on the specified search criteria. You can search the records based on the following criteria:
  - **User Id**
  - **Branch Code**
  - **Authorization Status**
  - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.

- **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

### 2.22.8 Accounting and Settlements

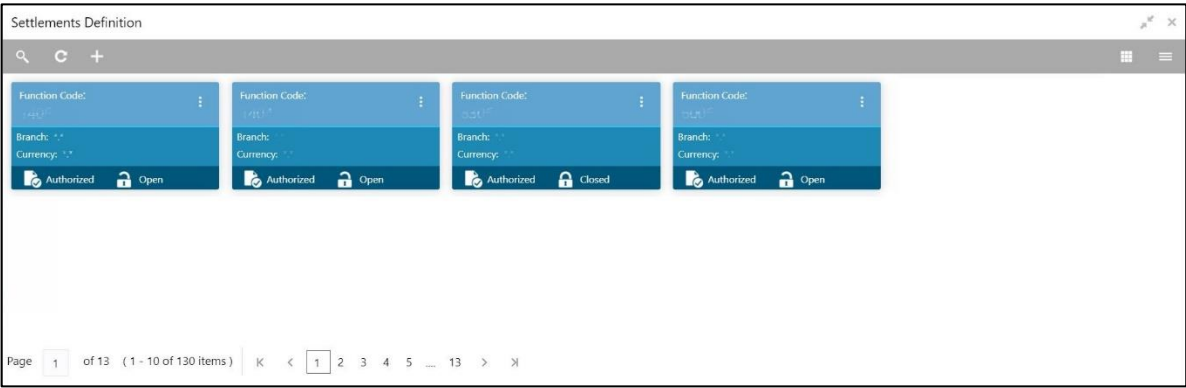

This screen is used to define the settlement and accounting parameters that is applicable for processing the branch transactions involving a function code.

To process this screen, type **Settlements Definition** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Settlements Definition**.

→ The **Settlements Definition** (Summary) screen is displayed.

**Figure 271: Settlements Definition (Summary)**

2. On **Settlements Definition** (Summary) screen, click  icon.
- The **Accounting Settlement** screen is displayed.

**Figure 272: Accounting Settlement**

Specify the details in the **Transaction Accounting Details** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Transaction Accounting Details](#).

**Field Description: Transaction Accounting Details**

Field	Description
<b>Branch</b>	Select the branch for which the accounting details need to be defined from the LOV.  <b>NOTE:</b> The value *.* indicates ALL option.
<b>Currency</b>	Select the currency for which the accounting details need to be defined from the LOV.  <b>NOTE:</b> The value *.* indicates ALL option.
<b>Function Code</b>	Select the function code for which the accounting details need to be defined from the LOV.
<b>Function Code Description</b>	Displays the description of the selected function code.

Field	Description
<b>Transaction Account</b>	Select the transaction account or GL from the LOV. The LOV displays all valid GLs maintained. This field is kept blank if the transaction account needs to be selected from transaction screen.
<b>Offset Account/GL No</b>	Select the offset account or GL from the LOV. The LOV displays all valid GLs maintained.
<b>Transaction code for Debit</b>	Select the transaction code used for debit accounting from the LOV.
<b>Transaction code for Credit</b>	Select the transaction code used for credit accounting from the LOV.
<b>Main leg accounting required</b>	Select to pass the main accounting entries along with the charges defined in the transaction code.
<b>Netting charge required</b>	<b>NOTE:</b> This field is meant for future use.
<b>Profit Reval GL</b>	Specify the profit revaluation GL details.  <b>NOTE:</b> This field is used during accounting only when the transaction involves negotiated exchange rate.
<b>Loss Reval GL</b>	Specify the loss revaluation GL details.  <b>NOTE:</b> This field is used during accounting only when the transaction involves negotiated exchange rate.

Click **Save** to get the summary view of configured accounting details. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the Accounting and Settlements based on the specified search criteria. You can search the records based on the following criteria:

- **Branch**
- **Currency**
- **Function Code**
- **Authorization Status**
- **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

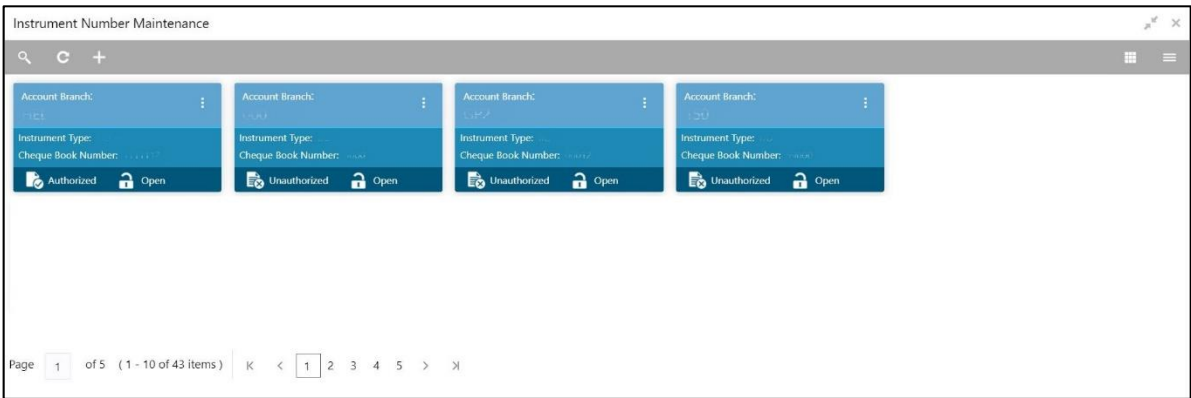

### 2.22.9 Instrument Number Maintenance

This screen is used to maintain instrument type for each branch. To process this screen, type **Instrument Number Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Instrument Number Maintenance**.

→ The **Instrument Number Maintenance** (Summary) screen is displayed.

Figure 273: Instrument Number Maintenance (Summary)

2. On **Instrument Number Maintenance (Summary)** screen, click **+** icon.

→ The **Instrument Number Maintenance** screen is displayed.

Figure 274: Instrument Number Maintenance

The screenshot shows the "Instrument Number Maintenance" form. It has a light gray background. Fields include: "Instrument Type" (dropdown menu with "Bankers Cheque" selected), "Branch" (text input with "008" and a search icon), "Instrument Currency" (text input with a search icon), "Issuing Bank Code" (text input with a search icon), "Number Of Leaves" (text input with "20"), "Instrument Number" (text input with "008"), and a "Generate Instrument Number" toggle switch. At the bottom, there are three buttons: "Audit", "Save", and "Cancel".

Specify the details in the **Instrument Number Maintenance** Screen. For more information on fields, refer to table [Field Description: Instrument Number Maintenance](#).

Field Description: Instrument Number Maintenance

Field	Description
Instrument Type	Specify the instrument type for which the instrument maintenance needs to be done.

Field	Description
<b>Branch</b>	Select the branch code from the LOV.
<b>Instrument Currency</b>	
<b>Issuing Bank Code</b>	
<b>Generate Instrument Number</b>	Specify Generate Instrument Number as Yes/No by selecting the radio-button  1. If Yes, then Instrument number will be generated by OBBRN  2. If No, then Instrument number will be generated by OBPM.
<b>Instrument Number</b>	Specify the instrument number for which the instrument maintenance needs to be done.
<b>Number of Leaves</b>	Specify the number of leaves.

Click **Save** to get the summary view of the configured instrument number. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the Instrument Number Maintenance based on the specified search criteria. You can search the records based on the following criteria:
  - **Account Branch**
  - **Instrument Type**
  - **Cheque Book Number**
  - **Authorization Status**
  - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.

- **Unlock** – Click this button to modify the details and save.
- **Delete** – Click this button to delete an unauthorized record.
- **Authorise** – Click this button to authorise the record.
- **Close** – Click this button to close the record.
- **Reopen** – Click this button to re-open a closed record.
- **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

## 2.22.10 Inter Branch Transit Account Maintenance

This screen is used to maintain inter-branch transit account for each branch using the receiving branch, vault, and currency combination.

To process this screen, type **Inter Branch Transit Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Inter Branch Transit Account**.

→ The **Inter Branch Transit Account (Summary)** screen is displayed.

**Figure 275: Inter Branch Transit Account (Summary)**

2. On **Inter Branch Transit Account (Summary)** screen, click **+** icon.

→ The **Inter Branch Transit Account** screen is displayed.

**Figure 276: Inter Branch Transit Account**

Specify the details in the **Inter Branch Transit Account Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Inter Branch Transit Account Maintenance](#).

**Field Description: Inter Branch Transit Account Maintenance**

Field	Description
<b>Branch Code</b>	Select the branch code from the adjoining option list, which provides all the branch codes maintained in the system.
<b>Branch Name</b>	Display the description of the selected branch code.
<b>Receiving Branch</b>	Specify the destination branch to which the cash is transferred.
<b>Receiving Branch Name</b>	Display the description of the selected Receiving Branch code.
<b>Currency</b>	Specify the currency of the cash.
<b>Transit Account</b>	Specify the transit account that is used to track the movement of cash.

Field	Description
Action	Click the icon as necessary to edit, save, or delete a row.

Click **Save** to get the summary view of the configured inter-branch transit account. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the Inter Branch Transit Account Maintenance based on the specified search criteria. You can search the records based on the following criteria:
  - **Branch Code**
  - **Authorization Status**
  - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

### 2.22.11 External System Maintenance

This screen is used to define the parameters for the external system. The parameters are defined whenever there is an external system call to the Oracle Banking Branch external API. Only the registered users can make the external system call to process the transaction.

To process this screen, type **External System Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **External System Maintenance**.

→ The **External System Maintenance** (Summary) screen is displayed.

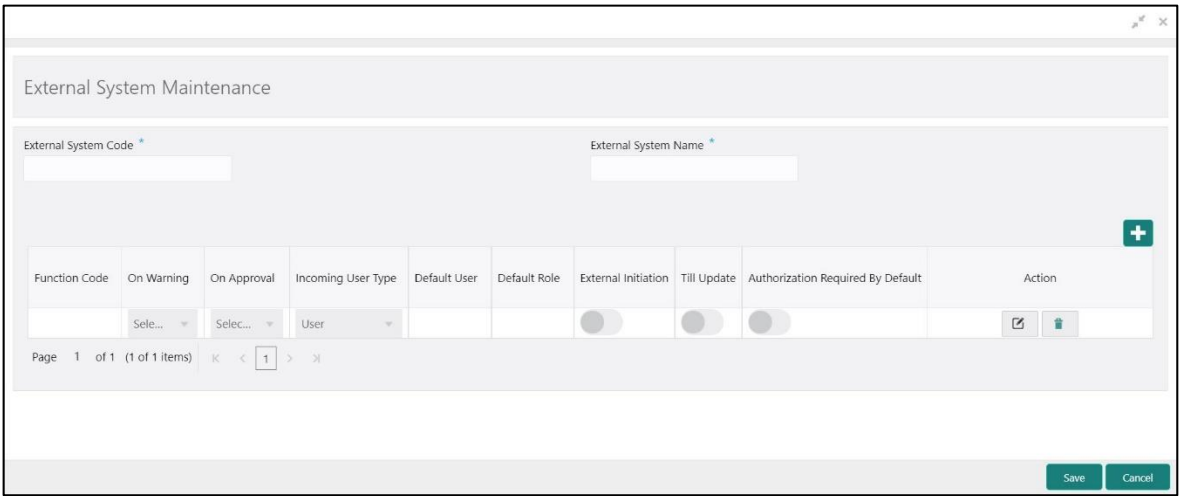

**Figure 277: External System Maintenance (Summary)**

2. On **External System Maintenance** (Summary) screen, click **+** icon.

→ The **External System Maintenance** screen is displayed.

**Figure 278: External System Maintenance**

Specify the details in the **External System Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: External System Maintenance](#).

**Field Description: External System Maintenance**

<b>Field</b>	<b>Description</b>
<b>External System Code</b>	Specify the system code of the registered external system.
<b>External System Name</b>	Specify the name of the registered external system.
<b>+ icon</b>	Click this icon to add a row for a transaction.
<b>- icon</b>	Click this icon to delete a row, which is already added.
<b>Function Code</b>	Specify the function code of the transaction, which needs to be performed through the external system. You can also select from the list of values.
<b>On Warning</b>	<p>Select from the drop-down list. The values in the drop-down list are mentioned below:</p> <ul style="list-style-type: none"> <li>• <b>Ignore</b> – Select if you need to ignore the override raised and process the transaction until completion.</li> <li>• <b>Error</b> – Select if you need to show the error message and stop the transaction.</li> </ul>
<b>On Approval</b>	<p>Select from the drop-down list. The values in the drop-down list are mentioned below:</p> <ul style="list-style-type: none"> <li>• <b>Ignore</b> – Select if you need to ignore the override raised and process the transaction until completion.</li> <li>• <b>Error</b> – Select if you need to show the error message and stop the transaction.</li> </ul>
<b>Incoming User Type</b>	<p>Select the incoming user type from the drop-down values. The values in the drop-down list are mentioned below:</p> <ul style="list-style-type: none"> <li>• <b>User</b> – User appearing in the payload to process the transaction.</li> </ul>

Field	Description
	<ul style="list-style-type: none"> <li>• <b>Default User</b> – Default user maintained to process the transaction.</li> <li>• <b>Role</b> – Role appearing in the payload to process the transaction.</li> <li>• <b>Default Role</b> – Default role maintained to process the transaction.</li> </ul>
<b>Default User</b>	Specify the default user maintained.  <b>NOTE:</b> This field is applicable only if the Incoming User Type is selected as Default User.
<b>Default Role</b>	Specify the default role maintained.  <b>NOTE:</b> This field is applicable only if the Incoming User Type is selected as Default Role.
<b>External Initiation</b>	Select if you need to log the transaction into Journal Log with the status Initiated.
<b>Till Update</b>	Select if you need to update the Till.
<b>Authorization required by Default</b>	Select if you need to raise an override even if it is <b>N</b> in function preference.
<b>Action</b>	Click the icon as necessary to edit, save, or delete a row.

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of External System Maintenance in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary screen, you can also perform any of the following actions:

- Click  icon to search the External System Maintenance based on the specified search criteria. You can search the records based on the following criteria:

- **External System Code**

- **External System Name**
- **Authorization Status**
- **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

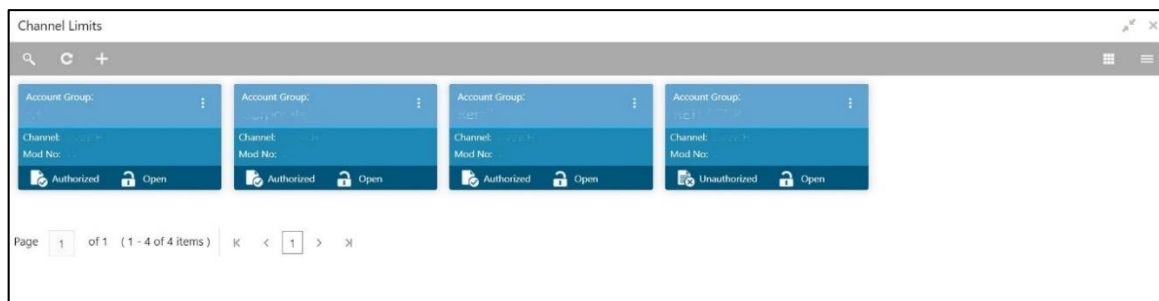

## 2.22.12 Channel Limits Maintenance

This screen is used to maintain the channel limits for a particular customer group. To process this screen, type **Channel Limits** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Channel Limits**.

→ The **Channel Limits (Summary)** screen is displayed.

**Figure 279: Channel Limits (Summary)**

2. On **Channel Limits** (Summary) screen, click **+** icon.

→ The **Channel Limits Maintenance** screen is displayed.

**Figure 280: Channel Limits Maintenance**

Specify the details in the **Channel Limits Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Channel Limits Maintenance](#).

**Field Description: Channel Limits Maintenance**

Field	Description
<b>Account Group</b>	Click search icon, and select account group from the list of values.  <b>NOTE:</b> The list of values provides the account groups that are maintained in the <b>Account Group Maintenance</b> screen.
<b>Channel</b>	Select value from the drop-down list.  <b>NOTE:</b> By default, the value is selected as <b>Branch</b> .
<b>+</b> icon	Click this icon to add a row for channel limits.
<b>-</b> icon	Click this icon to delete a row, which is already added.

Field	Description
<b>Currency</b>	Select the currency from the list of values.
<b>Max Withdrawal Limit Per Day</b>	Specify the maximum amount for the cash withdrawal transactions per day.
<b>No. of Transactions Per Day</b>	Specify the maximum limit for the number of cash withdrawal transactions per day.

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Channel Limits Maintenance in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary view, you can also perform any of the following actions:

- Click  icon to search the Channel Limits based on the specified search criteria. You can search the records based on the following criteria:
  - **Account Class Group**
  - **Channel**
  - **Authorization Status**
  - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

### 2.22.13 Account Group Maintenance

This screen is used to create groups of the account codes, and these groups can be used for charge calculation. To process this screen, type **Account Group Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Account Group Maintenance**.

→ The **Account Group Maintenance** (Summary) screen is displayed.

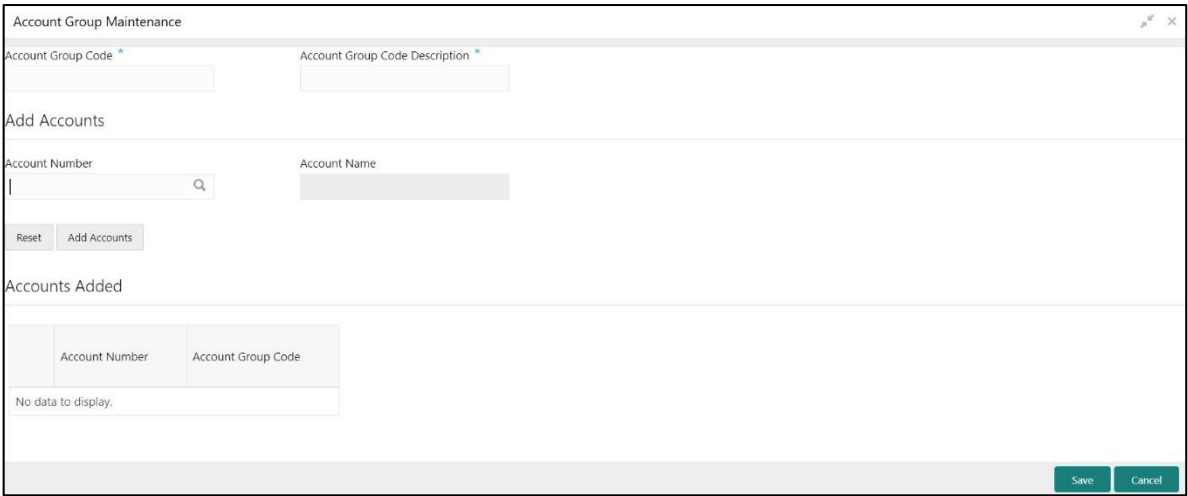

**Figure 281: Account Group Maintenance (Summary)**

2. On **Account Group Maintenance** (Summary) screen, click **+** icon.

→ The **Account Group Maintenance** screen is displayed.

**Figure 282: Account Group Maintenance**

Specify the details in the **Account Group Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Account Group Maintenance](#).

**Field Description: Account Group Maintenance**

Field	Description
<b>Account Group Code</b>	Specify the account group code.
<b>Account Group Code Description</b>	Specify the description of the account group code.
<b>Add Accounts</b>	Specify the fields.
<b>Account Number</b>	Specify the account number. You can also select from list of values.
<b>Account Name</b>	Displays the description for specified account number.
<b>Reset</b>	Click this button to reset the accounts added.
<b>Add Accounts</b>	Click this button to add the account specified.
<b>Accounts Added</b>	<p>Displays the details of accounts added in the table. Once you add an account in the table, you can perform any of the following actions:</p> <ul style="list-style-type: none"> <li>Edit – Click  icon to edit the added entry.</li> <li>Delete – Click  icon to delete the entry.</li> </ul>

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Account Groups in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary view, you can also perform any of the following actions:

- Click  icon to search the Account Groups based on the specified search criteria. You can search the records based on the following criteria:
  - **Account Group Code**
  - **Account Group Code Description**
  - **Authorization Status**
  - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

### 2.22.14 Branch Group Maintenance

This screen is used to create groups of the branch codes, and these groups can be used for charge calculation. To process this screen, type **Branch Group Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Branch Group Maintenance**.

→ The **Branch Group Maintenance** (Summary) screen is displayed.

**Figure 283: Branch Group Maintenance (Summary)**

2. On **Branch Group Maintenance** (Summary) screen, click **+** icon.

→ The **Branch Group Maintenance** screen is displayed.

**Figure 284: Branch Group Maintenance**

Specify the details in the **Branch Group Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Branch Group Maintenance](#).

**Field Description: Branch Group Maintenance**

<b>Field</b>	<b>Description</b>
<b>Branch Group Code</b>	Specify the branch group code.
<b>Branch Group Code Description</b>	Specify the description of the branch group code.
<b>Add Accounts</b>	Specify the fields.
<b>Branch Number</b>	Specify the branch number. You can also select from list of values.
<b>Branch Name</b>	Displays the description for specified branch number.
<b>Reset</b>	Click this button to reset the branches added.
<b>Add Branch</b>	Click this button to add the branch specified.
<b>Branches Added</b>	<p>Displays the details of branches added in the table. Once you add a branch in the table, you can perform any of the following actions:</p> <ul style="list-style-type: none"> <li>• Edit – Click  icon to edit the added entry.</li> <li>• Delete – Click  icon to delete the entry.</li> </ul>

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Branch Groups in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary view, you can also perform any of the following actions:

- Click  icon to search the Branch Groups based on the specified search criteria. You can search the records based on the following criteria:
  - **Account Group Code**
  - **Account Group Code Description**

- **Authorization Status**
- **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** - Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

## 2.22.15 Customer Group Maintenance

This screen is used to create groups of the customer codes, and these groups can be used for charge calculation. To process this screen, type **Customer Group Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Customer Group Maintenance**.

→ The **Customer Group Maintenance** (Summary) screen is displayed.

**Figure 285: Customer Group Maintenance (Summary)**

2. On **Customer Group Maintenance** (Summary) screen, click  icon.

→ The **Customer Group Maintenance** screen is displayed.

**Figure 286: Customer Group Maintenance**

Specify the details in the **Customer Group Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Customer Group Maintenance](#).

**Field Description: Customer Group Maintenance**

Field	Description
<b>Customer Group Code</b>	Specify the customer group code.
<b>Customer Group Code Description</b>	Specify the description of the customer group code.
<b>Customer Number</b>	Specify the customer number. You can also select from list of values.  <b>NOTE:</b> You cannot add the same customer number in two different groups.
<b>Customer Name</b>	Displays the description for specified customer number.
<b>Reset</b>	Click this button to reset the customer numbers added.

Field	Description
<b>Add Customer</b>	Click this button to add the customer numbers specified.
<b>Customers Added</b>	<p>Displays the details of customer numbers added in the table. Once you add a customer number in the table, you can perform any of the following actions:</p> <ul style="list-style-type: none"> <li>• Edit – Click  icon to edit the added entry.</li> <li>• Delete – Click  icon to delete the entry.</li> </ul>

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Customer Groups in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary view, you can also perform any of the following actions:

- Click  icon to search the Customer Groups based on the specified search criteria. You can search the records based on the following criteria:
  - **Customer Group Code**
  - **Customer Group Code Description**
  - **Authorization Status**
  - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.

- Click  icon to reset the search results to default summary view.

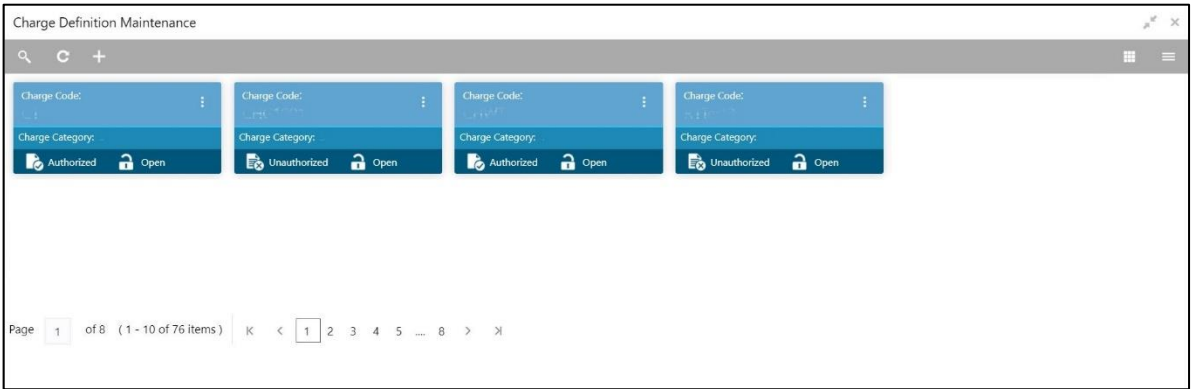

### 2.22.16 Charge Definition Maintenance

This screen is used to maintain the charge definitions. To process this screen, type **Charge Definition Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Charge Definition Maintenance**.

→ The **Charge Definition Maintenance** (Summary) screen is displayed.

**Figure 287: Charge Definition Maintenance (Summary)**

2. On **Charge Definition Maintenance** (Summary) screen, click  icon.

→ The **Charge Definition Maintenance** screen is displayed.

**Figure 288: Charge Definition Maintenance**

Specify the details in the **Charge Definition Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Charge Definition Maintenance](#).

**Field Description: Charge Definition Maintenance**

Field	Description
<b>Charge Code</b>	Specify the charge code.
<b>Charge Description</b>	Specify the description of the charge code.
<b>Charge Category</b>	Select the charge category ( <b>Standard</b> or <b>Tax</b> ).
<b>Charge Credit Account</b>	<p>Specify the charge credit account for the transaction. You can also select the GL from the list of values or from the DR_LEG/CR_LEG.</p> <p><b>NOTE:</b> If DR_LEG/CR_LEG is selected, the corresponding debit/credit account of the transaction will be considered for the charge processing. For example, if the charge code is defined with <b>Charge Debit Account</b> as DR_LEG for a Cash deposit function code, the charge will be collected from Cash GL. Hence, Customer is expected to deposit Cash including the charge amount. For such charge code, <b>Charge by Cash</b> field will be displayed as <b>Yes</b> in transaction screen Charges data segment.</p>
<b>Charge Debit Account</b>	Specify the charge debit account for the transaction. You can also select the GL from the list of values or from the DR_LEG/CR_LEG.

Field	Description
	<p><b>NOTE:</b> If DR_LEG/CR_LEG is selected, the corresponding debit/credit account of the transaction will be considered for the charge processing. For example, if the charge code is defined with <b>Charge Debit Account</b> as DR_LEG for a Cash deposit function code, the charge will be collected from Cash GL. Hence, Customer is expected to deposit Cash including the charge amount. For such charge code, <b>Charge by Cash</b> field will be displayed as <b>Yes</b> in transaction screen Charges data segment.</p>
<b>Credit Txn Code</b>	Click search icon and select the credit transaction code from the list of values.
<b>Debit Txn Code</b>	Click search icon and select the debit transaction code from the list of values.
<b>Pricing Source System</b>	Specify the pricing source system. You can also select from list of values.
<b>Pricing Source Description</b>	Displays the description of the pricing source.
<b>EDE Code</b>	<p>Displays the details of charge codes added in the table. Once you add a customer number in the table, you can perform any of the following actions:</p> <ul style="list-style-type: none"> <li>Edit – Click  icon to edit the added entry.</li> <li>Delete – Click  icon to delete the entry.</li> </ul>

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Customer Groups in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary view, you can also perform any of the following actions:

- Click  icon to search the Charge Definitions based on the specified search criteria. You can search the records based on the following criteria:
  - **Function Code**
  - **Branch Code**
  - **Authorization Status**
  - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

## 2.22.17 Create Charge Pricing Maintenance

This screen is used to maintain the charge pricing. To process this screen, type **Create Charge Pricing Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Create Charge Pricing Maintenance**.

→ The **Create Charge Pricing Maintenance** screen is displayed.

**Figure 289: Create Charge Pricing Maintenance**

Specify the details in the **Create Charge Pricing Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Create Charge Pricing Maintenance](#).

**Field Description: Create Charge Pricing Maintenance**

Field	Description
<b>Application Code</b>	Specify the application code.
<b>Charge Pricing Description</b>	Specify the description of the charge pricing.

Field	Description
<b>Pricing Category</b>	<p>Select the pricing category. The drop-down list has the following values:</p> <ul style="list-style-type: none"> <li>• <b>Fixed Amount</b></li> <li>• <b>Fixed Percent</b></li> <li>• <b>Tier Based Amount</b></li> <li>• <b>Tier Based Percent</b></li> </ul>
<b>Pricing Method</b>	Select the pricing method. The drop-down values will vary based on the <b>Pricing Category</b> .
<b>Pricing Currency</b>	Select the pricing currency.
<b>Rate Code</b>	Click search icon and select rate code from the list of values.
<b>Rate Type</b>	Select the rate type from the drop-down values.
<b>Charge in Transaction Currency</b>	Select if the charges needed in transaction currency.
<b>Min/Max Validation Criteria</b>	Select the criteria ( <b>Amount</b> or <b>Percentage</b> ) for minimum or maximum validation.
<b>Min Charge Amount/Percent</b>	<p>Specify the minimum charge amount or percent.</p> <p><b>NOTE:</b> Based on the value selected in the <b>Min/Max Validation Criteria</b>, this field gets enabled.</p>
<b>Max Charge Amount/Percent</b>	<p>Specify the minimum charge amount or percent.</p> <p><b>NOTE:</b> Based on the value selected in the <b>Min/Max Validation Criteria</b>, this field gets enabled.</p>

Field	Description
<b>Fixed Amount/Percent</b>	Specify the fixed amount or percent. This field is enabled only if <b>Pricing Category</b> is selected as <b>Fixed Amount</b> or <b>Fixed Percent</b>

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Charge Pricing in the Summary view.
- Click **Cancel** to terminate the operation.

## 2.22.18 View Charge Pricing Maintenance

This screen is used to view the summary and details of charge pricing IDs. To process this screen, type **View Charge Pricing Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **View Charge Pricing Maintenance**.

→ The **View Charge Pricing Maintenance** (Summary) screen is displayed.

**Figure 290: View Charge Pricing Maintenance (Summary)**

In the summary view, you can perform any of the following actions:

- Click  icon to search the Charge Pricing based on the specified search criteria. You can search the records based on the following criteria:
  - **Charge Pricing Id**
  - **Charge Description**

- **Authorization Status**
- **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

## 2.22.19 Charge Condition Group Maintenance

This screen is used to create groups of the charge condition codes. To process this screen, type **Charge Condition Group Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Charge Condition Group Maintenance**.

→ The **Charge Condition Group Maintenance (Summary)** screen is displayed.

**Figure 291: Charge Condition Group Maintenance (Summary)**

2. On **Charge Condition Group Maintenance** (Summary) screen, click  icon.

→ The **Charge Condition Group Maintenance** screen is displayed.

**Figure 292: Charge Condition Group Maintenance**

Specify the details in the **Charge Condition Group Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Charge Condition Group Maintenance](#).

**Field Description: Charge Condition Group Maintenance**

Field	Description
<b>Charge Condition Group Code</b>	Specify the charge group code.
<b>Charge Condition Group Code Description</b>	Specify the description of the charge group code.

Field	Description
<b>Parameter 1 to Parameter 5</b>	Select the parameters 1 to 5. For more information on Parameters, refer to <a href="#">Additional Information on Parameters</a> .
<b>Charge Details</b>	Specify the fields.
<b>Value 1 to Value 5</b>	Specify the values 1 to 5. You can also select from list of values.
<b>Charge Pricing Rule ID</b>	Specify the charge pricing rule ID. You can also select from list of values.
<b>Charge Pricing Rule Description</b>	Displays the description for specified charge pricing rule ID.
<b>Reset</b>	Click this button to reset the charge group details added.
<b>Add Charge Group</b>	Click this button to add the charge group details specified.
<b>Charge Groups Added</b>	<p>Displays the details of charge groups added in the table. Once you add a customer number in the table, you can perform any of the following actions:</p> <ul style="list-style-type: none"> <li>• Edit – Click  icon to edit the added entry.</li> <li>• Delete – Click  icon to delete the entry.</li> </ul>

### 2.22.19.1 Additional Information on Parameters

There will be a few parameters like Customer Group, Account Group, or Branch group will be pre-shipped. Customers need to choose the parameters, group them, and name them with the group codes. A rule will be attached to the group code so that based on the group used corresponding rule will be applied for calculation.

If the Charge Condition Group Maintenance is made with a specific parameter, the CHG\_PARAM\_TAGS column in the SRV\_TB\_TX\_STATIC\_TAGS table of transaction schema needs to be updated. For example, if Parameter 1 is selected as a utility provider, it needs to be updated as below:

```
{
  "UtilityProvider": "$.institutionID",
  "P2": "",
  "P3": "",
  "P4": "",
  "P5": ""
}
```

For the other options in **Parameter** field, the JSON needs to be updated as follows:

#### Field Description: Options for Parameter Fields

Option	Value
Account Group	"AccountGroup": ""
Customer Group	"CustomerGroup": ""
Transaction Branch Group	"TransactionBranchGroup": ""
To Account Branch Group	"ToAccountBranchGroup": ""
To Account Branch	"ToAccountBranch": "\$.toAccountBranch" <\$.toAccountBranch has to be replaced with the field id as per the FID that captures To Account Branch>

Option	Value
<b>Account Currency</b>	<pre>"AccCcy": "\$.AccCcy" &lt;\$.AccCcy has to be replaced with the field id as per the FID that captures Account Currency&gt;</pre>
<b>Utility Provider</b>	<pre>"UtilityProvider": "\$.institutionID" &lt;\$.institutionID has to be replaced with the field id as per the FID that captures Utility Provider&gt;</pre>

## 2.22.19.2 Actions

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Charge Groups in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary view, you can also perform any of the following actions:

- Click  icon to search the Charge Groups based on the specified search criteria.

You can search the records based on the following criteria:

- **Charge Condition Group**
- **Authorization Status**
- **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.

- **Reopen** – Click this button to re-open a closed record.
- **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

### 2.22.20 Charge Decision Maintenance

This screen is used to maintain the charge decisions. To process this screen, type **Charge Decision Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Charge Decision Maintenance**.

→ The **Charge Decision Maintenance (Summary)** screen is displayed.

**Figure 293: Charge Decision Maintenance (Summary)**

2. On **Charge Decision Maintenance** (Summary) screen, click  icon.

→ The **Charge Decision Maintenance** screen is displayed.

**Figure 294: Charge Decision Maintenance**

Specify the details in the **Charge Decision Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Charge Decision Maintenance](#).

**Field Description: Charge Decision Maintenance**

Field	Description
<b>Function Code</b>	Specify the function code. You can also select from the list of values.
<b>Branch</b>	Specify the branch code. You can also select from the list of values.
<b>Currency</b>	Specify the currency code. You can also select from the list of values.
<b>Inter Branch</b>	Select the Inter Branch requirement ( <b>Yes</b> , <b>No</b> , or <b>Both</b> ).
<b>Charge Details</b>	Specify the fields.

Field	Description
<b>Charge Code</b>	Specify the charge code. You can also select from the list of values.
<b>Charge Description</b>	Displays the description of charge code specified.
<b>Charge Pricing Rule ID</b>	<p>Specify the charge-pricing rule ID. You can also select from the list of values.</p> <p><b>NOTE:</b> You can choose the pricing rule ID to apply charge or choose a group code from which the pricing rule will be picked for calculation. You can only define the rule or group. Either rule can be used or a group can be used.</p>
<b>Charge Pricing Rule Description</b>	Displays the description of charge-pricing rule ID specified.
<b>Charge Basis</b>	Specify the charge basis. You can also select from the list of values.
<b>Charge Condition Group</b>	Specify the charge condition group.
<b>Reset</b>	Click this button to reset the charges added.
<b>Add Charges</b>	Click this button to add the charge decisions specified.
<b>Charges Added</b>	<p>Displays the details of charge decisions added in the table. Once you add an account in the table, you can perform any of the following actions:</p> <ul style="list-style-type: none"> <li>• Edit – Click  icon to edit the added entry.</li> <li>• Delete – Click  icon to delete the entry.</li> </ul>

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Charge Decisions in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary view, you can also perform any of the following actions:

- Click  icon to search the Charge Decisions based on the specified search criteria. You can search the records based on the following criteria:
  - **Function Code**
  - **Branch Code**
  - **Authorization Status**
  - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

### 2.22.21 Charge Decision Enquiry

This screen is used to inquire the details of charge definition and charge pricing for the specified search criteria. To process this screen, type **Charge Decision Enquiry** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Charge Decision Enquiry**.

→ The **Charge Decision Enquiry** screen is displayed.

### 2.22.22 Reject Code Maintenance

This screen is used to maintain the reject codes. To process this screen, type **Reject Code Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Reject Code Maintenance**.  
→ The **Reject Code Maintenance (Summary)** screen is displayed.

Figure 298: Reject Code Maintenance (Summary)

2. On **Reject Code Maintenance (Summary)** screen, click **+** icon.  
→ The **Reject Code Maintenance** screen is displayed.

Figure 299: Reject Code Maintenance

The screenshot shows a web application window titled "Reject Code Maintenance". It contains a form with two input fields: "Reject Code" and "Reject Code Description". Below these fields, there is a section labeled "Applicable For" with four radio button options: "Inward Return", "Outward Return", "Both Inward & Outward Return", and "In-house Cheques". At the bottom right of the form, there are two buttons: "Save" and "Cancel".

Specify the details in the **Reject Code Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Reject Code Maintenance](#).

**Field Description: Reject Code Maintenance**

Field	Description
<b>Reject Code</b>	Specify the reject code. This code indicates the reason for rejecting a clearing transaction.
<b>Reject Code Description</b>	Specify the description of the reject code.
<b>Applicable For</b>	<p>Select from the radio list from the following drop-down values:</p> <ul style="list-style-type: none"> <li>• <b>Inward Return</b></li> <li>• <b>Outward Return</b></li> <li>• <b>Both Inward &amp; Outward Return</b></li> <li>• <b>Inhouse Cheques</b></li> </ul>

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Network Codes in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary view, you can also perform any of the following actions:

- Click  icon to search the Reject Codes based on the specified search criteria. You can search the records based on the following criteria:
  - **Reject Code**
  - **Authorization Status**
  - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.

- **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

### 2.22.23 Clearing Network Maintenance

This screen is used to maintain the clearing network codes. To process this screen, type **Clearing Network Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Clearing Network Maintenance**.

→ The **Clearing Network Maintenance** (Summary) screen is displayed.

**Figure 300: Clearing Network Maintenance (Summary)**

2. On **Clearing Network Maintenance** (Summary) screen, click  icon.

→ The **Clearing Network Maintenance** screen is displayed.

**Figure 301: Clearing Network Maintenance**

Specify the details in the **Clearing Network Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Clearing Network Maintenance](#).

**Field Description: Clearing Network Maintenance**

Field	Description
<b>Clearing Network Code</b>	Specify the Clearing Network code.
<b>Clearing Network Description</b>	Specify the description of the Clearing Network code.

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Network Codes in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary view, you can also perform any of the following actions:

- Click  icon to search the Network Codes based on the specified search criteria. You can search the records based on the following criteria:
  - **Network Code**
  - **Authorization Status**
  - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

## 2.22.24 Denomination Variation Maintenance

This screen is used to maintain the denomination-wise variations. The local banking practice in some countries is to buy various FX currency denominations with different rates and lower denominations, which becomes lower rate. This screen helps to apply rates for different denominations. To process this screen, type **Denomination Variation Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Denomination Variation Maintenance**.

→ The **Denomination Variation Maintenance (Summary)** screen is displayed.

**Figure 302: Denomination Variation Maintenance (Summary)**

2. On **Denomination Variation Maintenance (Summary)** screen, click **+** icon.

→ The **Denomination Variation Maintenance** screen is displayed.

**Figure 303: Denomination Variation Maintenance**

Specify the details in the **Denomination Variation Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Denomination Variation Maintenance](#).

**Field Description: Denomination Variation Maintenance**

Field	Description
<b>Currency 1</b>	Select the currency from the list of values.
<b>Currency 2</b>	Displays the currency 2.
<b>Maintenance Country</b>	Displays the maintenance country.
+ icon	Click this icon to add a new row.
- icon	Click this icon to delete a row, which is already added.
<b>Rate Type</b>	Select the rate type from the list of values.
<b>Denomination ID</b>	Select the denomination ID from the list of values.
<b>Buy Variance</b>	Specify the buy variance.
<b>Sell Variance</b>	Specify the sell variance.

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Network Codes in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary view, you can also perform any of the following actions:

- Click  icon to search the Network Codes based on the specified search criteria. You can search the records based on the following criteria:
  - **Network Code**
  - **Authorization Status**
  - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

### 2.22.25 External Bank Code Maintenance

This screen is used to maintain the bank codes and branch codes. To process this screen, type **External Bank Code** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **External Bank Code**.  
→ The **External Bank Code (Summary)** screen is displayed.

**Figure 304: External Bank Code (Summary)**

2. On **External Bank Code (Summary)** screen, click **+** icon.  
→ The **External Bank Code Maintenance** screen is displayed.

**Figure 305: External Bank Code Maintenance**

Specify the details in the **External Bank Code Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: External Bank Code Maintenance](#).

**Field Description: External Bank Code Maintenance**

Field	Description
<b>Bank Code</b>	Specify the bank code.
<b>Bank Name</b>	Specify the bank name.
+ icon	Click this icon to add a new row.
- icon	Click this icon to delete a row, which is already added.
<b>Branch Code</b>	Specify the branch code.
<b>Branch Name</b>	Specify the branch name.
<b>Branch Address 1 to Branch Address 4</b>	Specify the address of the branch.

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Network Codes in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary view, you can also perform any of the following actions:

- Click  icon to search the Network Codes based on the specified search criteria. You can search the records based on the following criteria:
  - **Currency 1**
  - **Authorization Status**
  - **Record Status**

- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

## 2.22.26 Issuer Code Maintenance

This screen is used to maintain the issuer codes for TC transactions. To process this screen, type **Issuer Code Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Issuer Code Maintenance**.

→ The **Issuer Code Maintenance (Summary)** screen is displayed.

**Figure 306: Issuer Code Maintenance (Summary)**

2. On **Issuer Code Maintenance** (Summary) screen, click  icon.

→ The **Issuer Code Maintenance** screen is displayed.

**Figure 307: Issuer Code Maintenance**

Specify the details in the **Issuer Code Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Issuer Code Maintenance](#).

**Field Description: Issuer Code Maintenance**

Field	Description
<b>Issuer Code</b>	Specify the issuer code.
<b>Issuer Code Description</b>	Specify the description of the issuer code.

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Issuer Codes in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary view, you can also perform any of the following actions:

- Click  icon to search the Issuer Codes based on the specified search criteria. You can search the records based on the following criteria:
  - **Issuer Code**
  - **Authorization Status**
  - **Record Status**

- Click on the desired record to view the details and perform any of the following actions:
  - New** – Click this button to create a new record.
  - Unlock** – Click this button to modify the details and save.
  - Delete** – Click this button to delete an unauthorized record.
  - Authorise** – Click this button to authorise the record.
  - Close** – Click this button to close the record.
  - Reopen** – Click this button to re-open a closed record.
  - Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

## 2.22.27 Utility Provider Maintenance

This screen is used to link the utility provider (like electricity, gas, water, etc.) with a settlement account. To process this screen, type **Utility Provider Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

- From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Utility Provider Maintenance**.

→ The **Utility Provider Maintenance** (Summary) screen is displayed.

**Figure 308: Utility Provider Maintenance (Summary)**

2. On **Utility Provider Maintenance** (Summary) screen, click  icon.

→ The **Utility Provider Maintenance** screen is displayed.

**Figure 309: Utility Provider Maintenance**

Specify the details in the **Utility Provider Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Utility Provider Maintenance](#).

**Field Description: Utility Provider Maintenance**

Field	Description
<b>Provider ID</b>	Click search icon, and select the provider ID from the list of values.
<b>Provider Description</b>	Specify the description of the utility provider.
<b>Provider Settlement Account</b>	Click search icon, and select the provider settlement account from the list of values.

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Provider IDs in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary view, you can also perform any of the following actions:

- Click  icon to search the Provider IDs based on the specified search criteria. You can search the records based on the following criteria:
  - **Provider Id**
  - **Authorization Status**
  - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

## 2.22.28 Account Entitlement Group Maintenance

This screen is used to maintain the Account Entitlement Group by grouping the set of Customer accounts. To process this screen, type **Account Entitlement Group Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Common Core**. Under **Common Core Maintenance**, click **Account Entitlement Group Maintenance**.

→ The **Account Entitlement Group Maintenance** (Summary) screen is displayed.

Figure 310: Account Entitlement Group Maintenance (Summary)

2. On **Account Entitlement Group Maintenance (Summary)** screen, click **+** icon.

→ The **Account Entitlement Group Maintenance** screen is displayed.

Figure 311: Account Entitlement Group Maintenance

3. Specify the details in the **Account Entitlement Group Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Charge Condition Group Maintenance](#).

Field Description: Account Entitlement Group Maintenance

Field	Description
Domain Code	Select the domain code from the drop down list. The values are <ul style="list-style-type: none"><li>Payment</li><li>Branch</li></ul>

Field	Description
Entitlement Group	Specify the group code.
Entitlement Group Description	Specify the description of the Entitlement group code.

After filling the necessary fields, you can perform any of the following actions:

- Click **Save** to view the configured details of Customer Groups in the Summary view.
- Click **Cancel** to terminate the operation.

In the summary view, you can also perform any of the following actions:

- Click  icon to search the Account Entitlement Group code based on the specified search criteria. You can search the records based on the following criteria:
  - **Account Entitlement Group Code**
  - **Authorization Status**
  - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
  - **New** – Click this button to create a new record.
  - **Unlock** – Click this button to modify the details and save.
  - **Delete** – Click this button to delete an unauthorized record.
  - **Authorise** – Click this button to authorise the record.
  - **Close** – Click this button to close the record.
  - **Reopen** – Click this button to re-open a closed record.
  - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

### **3 Annexure 1 – List of Functional Activity Codes**

This topic provides the list of functional activity codes available in Oracle Banking Branch.

Screen Name/API Name	Functional Activity Code	Action	Description
Accounting API	REMO_FA_ADAPTER_AC COUNTINGCREATE	NEW	This is to create a transaction for the accounting adapter.
Eca API	REMO_FA_ADAPTER_EC ACREATE	NEW	This is to create a transaction for the external credit approval adapter.
Adapter API	REMO_FA_ADAPTER_FC UBSACCFETCH	NEW	This is to fetch account details for the FLEXCUBE Universal Banking adapter.
Adapter API	REMO_FA_ADAPTER_FC UBSRTCREATE	NEW	This is to create a transaction for the FLEXCUBE Universal Banking adapter.
OBPay API	REMO_FA_ADAPTER_O BPAYCREATE	NEW	This is to create a transaction for the Oracle Banking Payments adapter.
OBPay API	REMO_FA_ADAPTER_O BPAYGETSTATUS	NEW	This is to get a transaction status for the Oracle Banking Payments adapter.
OBPay API	REMO_FA_ADAPTER_O BPAYUPDATE	NEW	This is to update OBPAY adapter transaction.
Term Deposit API	REMO_FA_ADAPTER_R D_PAYMENT	NEW	This is for recurring deposit payments.
Term Deposit API	REMO_FA_ADAPTER_TD _CREATE	NEW	This is to create a transaction for the term deposits adapter.
Term Deposit API	REMO_FA_ADAPTER_TD _GetAccClsDtls	NEW	This is to get account class details for term deposits.
Term Deposit API	REMO_FA_ADAPTER_TD _GETINFO	NEW	This is for term deposits query.

Term Deposit API	REMO_FA_ADAPTER_TD_REDEEM	NEW	This is for term deposits redemption.
Term Deposit API	REMO_FA_ADAPTER_TD_SIMULATETDINFO	NEW	This is for term deposits simulation.
Term Deposit API	REMO_FA_ADAPTER_TD_TDREDEMPTIONSIM	NEW	This is for term deposits redemption simulation.
Term Deposit API	REMO_FA_ADAPTER_TD_TOPUP	NEW	This is to create a top-up for term deposits.
Term Deposit API	REMO_FA_ADAPTER_TD_ValidateAccCls	NEW	This is to validate an accounting class for term deposits.
Dashboard Api	REMO_FA_ALERTS	NEW	This is for Teller alerts.
Transaction API	REMO_FA_ASSIGN_AUTORIZER	NEW	This is to assign an authorizer.
Transaction API	REMO_FA_ASSIGN_TASK	NEW	This is to assign a task.
Dashboard Api	REMO_FA_BULLETIN_BOARD	NEW	This is for a bulletin board.
Transaction API	REMO_FA_CASH_IN_HAND	NEW	This is for cash in hand.
Transaction API	REMO_FA_CC_PAY_BY_CASH	NEW	This is for payment by cash.
Get Core Accounts Web API	REMO_FA_COREACC_STAFF_RESTRICTIONS	NEW	This is to validate core accounts with staff restrictions.

Adapter API	REMO_FA_CREATE_CASHWITHDRAWL_TRANSACTION	NEW	This is to create a cash withdrawal transaction.
Adapter API	REMO_FA_CREATEEXTERNALPRICING	NEW	This is to create external pricing.
Transaction API	REMO_FA_CREDIT_CARD	NEW	This is for the credit card details.
Transaction API	REMO_FA_CREDIT_CARD_PAYMENT	NEW	This is for the credit card payment.
Transaction API	REMO_FA_CURRENT_TILL_POSITION	NEW	This is for the current till position.
Customer API	REMO_FA_CUSTOMER_SEARCH	NEW	This is for the customer panel search.
Transaction API	REMO_FA_CUSTOMER_SERVICE_REQUESTS	NEW	This is for the customer service requests.
Transaction API	REMO_FA_DELETE_TASK	NEW	This is to delete a task.
Customer API	REMO_FA_FCUBS_CUSTOMER_CONTACT_UPDATE	NEW	This is to update customer contact.
Transaction API	REMO_FA_FREQUENT_BRANCH_OPERATIONS	NEW	This is for the frequent branch operations.
Customer API	REMO_FA_FREQUENT_CUSTOMER_OPS	NEW	This is for frequent customer operations.

Transaction API	REMO_FA_FREQUENT_LINKS	NEW	This is for the frequent links.
Transaction API	REMO_FA_GET_BRANCH_BALANCE	NEW	This is get a branch total.
Adapter API	REMO_FA_GET_CENTRAL_TXNLOG	NEW	This is to fetch a central transaction log.
Customer API	REMO_FA_GET_CUSTOMER_INFORMATION	NEW	This is to get customer information.
Signature API	REMO_FA_GET_SIGNATURE_INFORMATION	NEW	This is to get signature information.
Transaction API	REMO_FA_GET_USER_ROLE	NEW	This is to get a user role.
Maintenance API	REMO_FA_GET_ACCOUNT_GRP	NEW	This is to get an account group.
Transaction API	REMO_FA_INVENTORY_IN_HAND	NEW	This is for inventory in hand.
Dashboard Api	REMO_FA_MY_TRANSACTION	NEW	This is for my transaction.
Transaction API	REMO_FA_NOTIFICATIONS	NEW	This is for notifications.
Transaction API	REMO_FA_ONPBREPRINT	NEW	This is for reprint.
Transaction API	REMO_FA_ONPENDING_ISLAMICTD_OPENSUBMIT	NEW	This is for on pending Islamic term deposit open submission.

Transaction API	REMO_FA_ONPENDING_TD_OPENSUBMIT	NEW	This is for on pending term deposit open submission.

Reject Code Maintenance	REMO_FA_REJECTCODE_AUTHORIZE	AUTHORIZE	This is to check the status of the reject code authorization.
Reject Code Maintenance	REMO_FA_REJECTCODE_AUTHQUERY	INQUIRY	This is to query a reject code authorization.

Reject Code Maintennace	REMO_FA_REJECTCODE_CLOSERECORD	CLOSE	This is to close a record for a reject code.
Reject Code Maintennace	REMO_FA_REJECTCODE_DELETE	DELETE	This is to delete a reject code.
Reject Code Maintennace	REMO_FA_REJECTCODE_GETALL_MENU	GET	This is for the reject code get-all menu.
Reject Code Maintennace	REMO_FA_REJECTCODE_GETALL	GET	This is for reject code get all.
Reject Code Maintennace	REMO_FA_REJECTCODE_GETBYID	GET	This is for the reject code get by ID.
Reject Code Maintennace	REMO_FA_REJECTCODE_GETHISTORY	GET	This is to get a history of the reject code.
Reject Code Maintennace	REMO_FA_REJECTCODE_MODIFYRECORD	UNLOCK	This is to get a modified record for the reject code.
Reject Code Maintennace	REMO_FA_REJECTCODE_REOPENRECORD	REOPEN	This is to reopen the record for the reject code.
Reject Code Maintennace	REMO_FA_REJECTCODE_SAVERECORD	SAVE	This is to get a saved record for the reject code.
Transaction API	REMO_FA_RELEASE_TASK	NEW	This is for the release task.
Passbook Req API	REMO_FA_SAVEPBPRINT	NEW	This is for the save print.
Customer TD API	REMO_FA_SAVETDINTEREST	NEW	This is to save interest.

Customer Service Request API	REMO_FA_SER_REQ_CREATE	NEW	This is to create service requests.
Customer Service Request API	REMO_FA_SER_REQ_GET	NEW	This is to get service requests.
Customer Service Request API	REMO_FA_SER_REQ_REPORT	NEW	This is to get service requests report.
Customer Service Request API	REMO_FA_SER_REQ_UPDATE	NEW	This is to update service requests.
Stop Payment API	REMO_FA_SRV_TXN_ADAPTOR_STOP_CHEQUE	NEW	This is for stop cheque.
Dashboard Api	REMO_FA_SUBMENU_1_MY_PENDING_TASKS	NEW	This is for task status.
Dashboard Api	REMO_FA_SUBMENU_1_MY_PENDING_TASKS	NEW	This is for my pending tasks.
Passbook Request API	REMO_FA_SUBMITPBREPRINT	NEW	This is to submit a reprint.
Term Deposit API	REMO_FA_TDSIMULATE	NEW	This is for term deposit simulation.
oracle.fsgbu.sms.web.Dashboard API	REMO_FA_TELLER_DASHBOARD_PREFERENCE	NEW	This is for dashboard preference.
oracle.fsgbu.sms.web.Dashboard API	REMO_FA_TELLER_DASHBOARD_VIEW	NEW	This is for the dashboard view.
Transaction API	REMO_FA_TILL_CASH_POSITION	NEW	This is for till cash position.

Transaction API	REMO_FA_TRANSACTION_STATUS	NEW	This is for transaction status.
Customer TD API	REMO_FA_UPDATE_TD_TAB	NEW	This is to update the term deposit tablet.
Customer API	REMO_SA_COREACC_STAFF_RESTR	NEW	This is for core account staff restriction.
Transaction API	SRV__FA_TC_RETURN_TO_VAULT	NEW	This application programming interface is used to update the account address data.
Transaction API	SRV_AAURQ_APP_STAGE	NEW	This is to update the workflow function ID for the account address.
Transaction API	SRV_AAURQ_APP_SUBMIT_UBS	NEW	This is to update the second-stage submission for the account address.
External Provider API	SRV_ADP_FA_GET_EXTLOV_DATA	NEW	This is to get an external list of values data.
Transaction API	SRV_CAURQ_APP_STAGE	NEW	This is to update the workflow function ID for the customer address.
Transaction API	SRV_CAURQ_APP_SUBMIT_UBS	NEW	This is to update the second stage submission for the customer address.
Transaction API	SRV_CCURQ_APP_STAGE	NEW	This is to update the workflow function ID for customer contact.
Transaction API	SRV_CCURQ_APP_SUBMIT_UBS	NEW	This is to update the second stage submission for customer contact.
Account Address API	SRV_FA_[SUBMITO	NEW	This application programming interface is used to update the account address data.

Account Group Maintenance	SRV_FA_AAU_HANDOFF	GET	This is for account address handoff.
Remo TM Branch Accounting Master Web API	SRV_FA_ACC_AUTHORIZ	NEW	This is for account authorization.
Remo TM Branch Accounting Master Web API	SRV_FA_ACC_AUTHQUERY	NEW	This is to authorize a query.
Remo TM Branch Charge Master Web API	SRV_FA_ACC_CLASS_GRP_GETALL	NEW	This is for the list of values of the service account class group.
Transaction API	SRV_FA_ACC_CLOSE_CASH_SUBMIT	NEW	This is for on-submit account closure cash.
Transaction API	SRV_FA_ACC_CLOSE_SUBMIT	NEW	This is for on-account closure account submission.
Remo Tm Branch Accounting Master Web API	SRV_FA_ACC_CLOSERECORD	NEW	This is for account close record.
Transaction API	SRV_FA_ACC_CLS_SUBMIT	NEW	This is for on-account closure submission.
Remo TM Branch Accounting Master Web API	SRV_FA_ACC_DELETE	NEW	This is for account deletion.
Srv Tm Bc Account Entitlement Restriction Master Web API	SRV_FA_ACC_ENT_RESTRICTION_AUTHORIZE	NEW	This is for account restriction authorization.

Srv Tm Bc Account Entitlement Restriction Master Web API	SRV_FA_ACC_ENT_RES TRITION_AUTHQUERY	NEW	This is for an account restriction authorization query.
Srv Tm Bc Account Entitlement Restriction Master Web API	SRV_FA_ACC_ENT_RES TRITION_CLOSE	NEW	This is to close a record for account restriction.
Account Entitlement Restriction	SRV_FA_ACC_ENT_RES TRITION_DELETE	REOP EN	This is to delete a record for account restriction.
Account Entitlement Restriction	SRV_FA_ACC_ENT_RES TRITION_GET	AUTH ORIZ E	This is to get all records for account restriction.
Account Entitlement Restriction	SRV_FA_ACC_ENT_RES TRITION_GETBY_ID	INQUI RY	This is to get all by ID for account restriction.
Account Entitlement Restriction	SRV_FA_ACC_ENT_RES TRITION_HISTORY	CLOS E	This is for account restriction history.
Account Entitlement Restriction	SRV_FA_ACC_ENT_RES TRITION_MENU	DELE TE	This is for the account restriction menu.
Account Entitlement Restriction	SRV_FA_ACC_ENT_RES TRITION_MODIFY	GET	This is for the account restriction modification record.
Account Entitlement Restriction	SRV_FA_ACC_ENT_RES TRITION_REJECT	GET	This is for account restriction rejection.
Account Entitlement Restriction	SRV_FA_ACC_ENT_RES TRITION_SAVE	QUER Y	This is for account restriction save.
Account Entitlement Restriction	SRV_FA_ACC_ENT_RES TRITIONN_REOPEN	GET	This is for account restriction reopen.

Account Entitlement Restriction	SRV_FA_ACC_GETAL_M ENU	UNLO CK	This is for the account get-all menu.
Account Entitlement Restriction	SRV_FA_ACC_GETALL	REJE CT	This is for an account get-all.
Account Entitlement Restriction	SRV_FA_ACC_GETBYID	NEW	This is for an account get by ID.
Remo Tm Branch Accounting Master Web API	SRV_FA_ACC_GETHIST ORY	NEW	This is for an account get history.
Settlements Definition	SRV_FA_ACC_GRP_AUT H_QUERY	GET	This is for the account group authorization query.
Srv Tm BC Account Group Master API	SRV_FA_ACC_GRP_AUT HORIZE	NEW	This is for account group authorization.
Srv Tm BC Account Group Master API	SRV_FA_ACC_GRP_CLO SE_RECORD	NEW	This is for the account group close record.

Cash Transaction DS API	SRV_FA_CH_BILL_PAY_SAVE	GET	This is to save the application programming interface for bill payment transactions.
Maintenance API	SRV_FA_CH_GETCHARGE BASIS	GET	This is to get a charge basis.
Maintenance API	SRV_FA_CH_GETFUNCTION CODE	GET	This is to get by function code.
Maintenance API	SRV_FA_CH_GETSCREEN CLASS CODE	GET	This is to get by screen class code.
Srv Tm Bc Function Code Web API	SRV_FA_CH_PARENT_FID	UNLOCK	This is for parent fid.
Charge Definition Maintenance	SRV_FA_CH_SAVE_ADDL_CASH_DS_TXN	REOPEN	This is to save additional cash data segment transactions.
Charge Definition Maintenance	SRV_FA_CH_SAVE_ADDL_F24_DS_TXN	SAVE	This is to save additional f24 data segment transactions.

Charge Definition Maintenance	SRV_FA_CH_SAVE_ADD L_F24_DS_TXN_ACC	NEW	This is to save an additional f24 data segment transaction account.
Charge Definition Maintenance	SRV_FA_CH_SAVE_ADD L_PAYMENT_DS_TXN	GET	This is to save additional payment data segment transactions.
Charge Definition Maintenance	SRV_FA_CH_SAVE_F24_ MAIN_DS_TXN	GET	This is to save the f24 maintenance data segment transaction.
Charge Definition Maintenance	SRV_FA_CH_SAVE_F24_ PMNT_DS_TXN	GET	This is to save the f24 payment data segment transaction.
Charge Definition Maintenance	SRV_FA_CH_SAVE_F24_ PMNT_DS_TXN_ACC	NEW	This is to save the f24 payment data segment transaction.
Charge Definition Maintenance	SRV_FA_CH_SAVE_F24_ STD_DS_TXN	NEW	This is to save the f24 standard data segment transaction.
Charge Definition Maintenance	SRV_FA_CH_SAVE_F24_ STD_DS_TXN_ACC	NEW	This is to save the f24 standard data segment transaction.
Charge Definition Maintenance	SRV_FA_CH_SAVE_TELL ER_SESSION_DS	NEW	This is to save the teller session data segment.
Charge Definition Maintenance	SRV_FA_CH_SUBMIT_TE LLER_SESSION	NEW	This is to save the teller session.
Transaction API	SRV_FA_CH_TXN_CASH WITHDRAWAL	AUTH ORIZ E	This is for cash transaction withdrawal.
Transaction API	SRV_FA_CH_TXN_GETC ASHWITHDRAWAL	INQUI RY	This is to get the cash transaction withdrawal.

Transaction API	SRV_FA_CH_TXN_GETT ELLERTOT_PREV_DAY	CLOS E	This is to get the teller transaction total previous day.
Charge Condition Group Maintenance	SRV_FA_CH_TXN_GETT ELLERVAULTPOSITION	DELE TE	This is to getTellerVaultPositionQuery.
Charge Condition Group Maintenance	SRV_FA_CH_USERSPOS ITIONS	QUER Y	This gives results for users' positions.
Charge Condition Group Maintenance	SRV_FA_CH_VAL_FISCO DE_REQ	GET	This is to validate the FIS code request.
Charge Condition Group Maintenance	SRV_FA_CH_VALIDATER OLES	GET	This is to validate by role ID.
Charge Condition Group Maintenance	SRV_FA_CHANNEL_LIMI T_AUTHORIZE	UNLO CK	This is for the channel limit authorize save.
Charge Condition Group Maintenance	SRV_FA_CHANNEL_LIMI T_AUTHQUERY	REOP EN	This is for channel limit authorize query.
Charge Condition Group Maintenance	SRV_FA_CHANNEL_LIMI T_CLOSERECORD	NEW	This is to close a record for channel limit.
Charge Condition Group Maintenance	SRV_FA_CHANNEL_LIMI T_DELETE	REJE CT	This is to delete the channel limit.
Charge Condition Group Maintenance	SRV_FA_CHANNEL_LIMI T_FETCHDATA	NEW	This is to fetch data for channel limit.
Charge Condition Group Maintenance	SRV_FA_CHANNEL_LIMI T_GETALL	NEW	This is to get all the details for the channel limit.
Srv Tm Bc Channel Limits API	SRV_FA_CHANNEL_LIMI T_GETBYID	NEW	This is for channel limit details by ID.

Srv Tm Bc Channel Limits API	SRV_FA_CHANNEL_LIMIT_GETHISTORY	AUTHORIZE	This is for channel limit details by history.
Charge Decision Maintenance	SRV_FA_CHANNEL_LIMIT_MODIFYRECORD	INQUIRY	This is for channel limit details to modify a record.
Charge Decision Maintenance	SRV_FA_CHANNEL_LIMIT_REOPENRECORD	CLOSE	This is for channel limit details to reopen the record.
Charge Decision Maintenance	SRV_FA_CHANNEL_LIMIT_SAVERECORD	DELETE	This is for channel limit save.
Charge Decision Maintenance	SRV_FA_CHANNEL_REJECT	GET	This is for channel rejection.
Charge Decision Maintenance	SRV_FA_CHANNEL_LIMIT_GETAL_MENU	GET	This is to save the channel limit.
Charge Decision Maintenance	SRV_FA_CHARGE_AUTHORIZER	QUERY	This is for charge maintenance authorization.
Charge Decision Maintenance	SRV_FA_CHARGE_AUTHQ	UNLOCK	This is the charge maintenance authentication.
Charge Decision Maintenance	SRV_FA_CHARGE_CLOSE	REOPEN	This is to close charge maintenance.
Charge Decision Maintenance	SRV_FA_CHARGE_DECISION_ENQUIRY	SAVE	This is to inquire charge decision.
Charge Decision Maintenance	SRV_FA_CHARGE_DEFINITION_MAINTENANCE_AUTHORIZE	NEW	This is for charge definition maintenance authorization.

Srv Tm Bc Function Code Web API	SRV_FA_CHARGE_DEF_ MAINTENANCE_AUTHQ	NEW	This is for charge definition maintenance authentication.
Srv Tm Bc Function Code Web API	SRV_FA_CHARGE_DEF_ MAINTENANCE_CLOSE	AUTH ORIZ E	This is to close charge definition maintenance.
Srv Tm Bc Function Code Web API	SRV_FA_CHARGE_DEF_ MAINTENANCE_DELETE	INQUI RY	This is to delete charge definition maintenance.
Srv Tm Bc Function Code Web API	SRV_FA_CHARGE_DEF_ MAINTENANCE_GETALL	CLOS E	This is for charge definition maintenance to get all entries.
Srv Tm Bc Function Code Web API	SRV_FA_CHARGE_DEF_ MAINTENANCE_GETBYI D	DELE TE	This is a charge definition maintenance obtained by ID.
Srv Tm Bc Function Code Web API	SRV_FA_CHARGE_DEF_ MAINTENANCE_HISTOR Y	GET	This is for charge definition maintenance history.
Srv Tm Bc Function Code Web API	SRV_FA_CHARGE_DEF_ MAINTENANCE_MODIFY	GET	This is for charge definition maintenance modification.
Srv Tm Bc Function Code Web API	SRV_FA_CHARGE_DEF_ MAINTENANCE_REOPEN	QUER Y	This is to reopen charge definition maintenance.
Srv Tm Bc Function Code Web API	SRV_FA_CHARGE_DEF_ MAINTENANCE_SAVE	UNLO CK	This is to save a charge for definition maintenance.
Srv Tm Bc Function Code Web API	SRV_FA_CHARGE_DEF_ REJECT	REOP EN	This is to reject charge definition maintenance.
Remo Tm Branch Charge Master Web API	SRV_FA_CHARGE_DELE TE	SAVE	This is to delete charge definition maintenance.

Remo Tm Branch Charge Master Web API	SRV_FA_CHARGE_GETALL	NEW	This is to get all charge maintenance.
Remo Tm Branch Charge Master Web API	SRV_FA_CHARGE_GETBYID	NEW	This is for charge maintenance get by ID.
Srv Tm Bc Charge Group Master Web API	SRV_FA_CHARGE_GROUP_AUTHORIZE	NEW	This is for charge group authorization.
Srv Tm Bc Charge Group Master Web API	SRV_FA_CHARGE_GROUP_AUTHQ	NEW	This is for charge group authentication.
Srv Tm Bc Charge Group Master Web API	SRV_FA_CHARGE_GROUP_CLOSE	NEW	This is to close the charge group.
Srv Tm Bc Charge Group Master Web API	SRV_FA_CHARGE_GROUP_DELETE	NEW	This is to delete a charge group.
Srv Tm Bc Charge Group Master Web API	SRV_FA_CHARGE_GROUP_GETALL	NEW	This is to get all entries for the charge group.
Srv Tm Bc Charge Group Master Web API	SRV_FA_CHARGE_GROUP_GETBYID	NEW	This is for the charge group get by ID.
Srv Tm Bc Charge Group Master Web API	SRV_FA_CHARGE_GROUP_HISTORY	NEW	This is for charge group history.
Srv Tm Bc Charge Group Master Web API	SRV_FA_CHARGE_GROUP_MODIFY	NEW	This is to modify the charge group.
Srv Tm Bc Charge Group Master Web API	SRV_FA_CHARGE_GROUP_REOPEN	NEW	This is to reopen the charge group.
Srv Tm Bc Charge Group Master Web API	SRV_FA_CHARGE_GROUP_SAVE	NEW	This is to save a charge group.

Remo Tm Branch Charge Master Web API	SRV_FA_CHARGE_HIST ORY	NEW	This is for the charge history.
Remo Tm Branch Charge Master Web API	SRV_FA_CHARGE_MODI FY	NEW	This is for a modified charge.
Remo Tm Branch Charge Master Pick Up Web API	SRV_FA_CHARGE_PICK _AUTHORIZE	NEW	This is for charge pick-up authorization.
Remo Tm Branch Charge Master Pick Up Web API	SRV_FA_CHARGE_PICK _AUTHQ	NEW	This is for charge pick-up authentication.
Remo Tm Branch Charge Master Pick Up Web API	SRV_FA_CHARGE_PICK _CLOSE	NEW	This is to close a charge pick-up.
Remo Tm Branch Charge Master Pick Up Web API	SRV_FA_CHARGE_PICK _DELETE	NEW	This is to delete charge pick-up.
Remo Tm Branch Charge Master Pick Up Web API	SRV_FA_CHARGE_PICK _GETALL	NEW	This is for charge pick-up up get all entries.
Remo Tm Branch Charge Master Pick Up Web API	SRV_FA_CHARGE_PICK _GETBYID	NEW	This is for charge pick up get by ID.
Remo Tm Branch Charge Master Pick Up Web API	SRV_FA_CHARGE_PICK _HISTORY	NEW	This is for charge pick-up history.
Remo Tm Branch Charge Master Pick Up Web API	SRV_FA_CHARGE_PICK _MODIFY	NEW	This is to modify charge pick up.
Remo Tm Branch Charge Master Pick Up Web API	SRV_FA_CHARGE_PICK _REOPEN	NEW	This is to reopen charge pick up.
Remo Tm Branch Charge Master Pick Up Web API	SRV_FA_CHARGE_PICK _SAVE	NEW	This is to save a charge for pick up.

Remo Tm Branch Charge Master Web API	SRV_FA_CHARGE_REOPEN	NEW	This is for charge reopen.
Remo Tm Branch Charge Master Web API	SRV_FA_CHARGE_SAVE	NEW	This is for charge save.
Srv Tm Bc Function Code Web API	SRV_FA_CHARGEDEF_MAINT_GETAL_MENU	NEW	This is for charge definition maintenance to get all menu items.
Srv Tm Bc Charge Group Master Web API	SRV_FA_CHARGEGRP_GETAL_MENU	NEW	This is for charge group maintenance to get all menu items.
Remo Tm Branch Charge Master Pick Up Web API	SRV_FA_CHARGE_PICK_GETAL_MENU	NEW	This is for charge pickup maintenance to get all menu items.
Transaction API	SRV_FA_CHARGES_SUBMIT	NEW	This application programming interface is used to save the transaction details to domain tables.
ProcessDriver API	SRV_FA_CHEQUE_BOOK_REQUEST	NEW	This is for a cheque book request.
OBPay API	SRV_FA_CHEQUE_BOOK_STATUS_CHANGE	NEW	This is for cheque book status change.
OBPay API	SRV_FA_CHEQUE_DEPOSIT	NEW	This is for the cheque deposit.
OBPay API	SRV_FA_CHEQUE_RETURN	NEW	This is for cheque return.
OBPay API	SRV_FA_CHEQUE_STATUS_INQUIRY	NEW	This is for a cheque status inquiry.

Transaction API	SRV_FA_CHEQUE_SUBMIT	NEW	This is to submit a cheque deposit.
Transaction API	SRV_FA_CHEQUE_TD_ACCOUNT_OPEN_WALKIN	NEW	This is for term deposit account opening against walkin.
Transaction API	SRV_FA_CHEQUEBOOK_REQUEST	NEW	This is for a cheque book request.
Transaction API	SRV_FA_CHEQUEBOOK_REQUEST_PENDINGSUBMIT	NEW	This is to submit a pending request for cheque book request.
Transaction API	SRV_FA_CHQ_BOOK_ISSUE	NEW	This is for cheque book issue.
Srv Tm Bc Function Code Web API	SRV_FA_CHRG_DEF	NEW	This is for charge definition.
Transaction API	SRV_FA_CLEAR_ALL_CACHE	NEW	This is to clear the cache.
Maintenance API	SRV_FA_CLEAR_BRANCH_CACHE	NEW	This is to clear the branch cache.
Maintenance API	SRV_FA_CLEAR_BRANCH_CACHE_ALL	NEW	This is to clear all branch common cache.
Maintenance API	SRV_FA_CLEAR_CACHE	NEW	This is for clearing the cache.
Transaction API	SRV_FA_CLEAR_TRANSACTION_CACHE	NEW	This is to clear transaction cache.
Inward Clearing Transaction API	SRV_FA_CLG_BATCHNO	NEW	This is to generate a batch number for clearing.

Clearing Transaction DS API	SRV_FA_CLGTTRANSACTION	NEW	This is to save CLG transactions.
Transaction API	SRV_FA_CLOSE_BATCH_REVERSAL	NEW	This is to close batch reversal.
Operation API	SRV_FA_CLOSE_BRANCH_BATCH	NEW	This is to close the branch batch.
Srv Tm Cs Limits Web API	SRV_FA_CLOSE_CUSTOMER	NEW	This is to close the customer.
Ob Tm Charge Price Template Service API	SRV_FA_CLOSE_PRC_RULE	NEW	This is to close the price rule.
Operation API	SRV_FA_CLOSE_TELLER_BATCH	NEW	This is for the close teller batch.
Operation API	SRV_FA_CLOSE_VAULT_BATCH	NEW	This is for the close vault batch.
Operation API	SRV_FA_CLOSOUT_NEW_MENU	NEW	This is to close out the new menu.
Transaction API	SRV_FA_CLS_OUT_WITHDRAWAL_BC	NEW	This application programming interface is used to close out a withdrawal by a banker's cheque.
Transaction API	SRV_FA_CLSBRANCH_OPENCHECK	NEW	This is to open check, and close the branch.
Account Closure API	SRV_FA_CLSOUTWITHDRAWAL_MULTIMODE_GET	NEW	This application programming interface is to fetch multi-mode records.

Account Closure API	SRV_FA_CLSOUTWITHD RAWAL_MULTIMODE_SA VE	NEW	This application programming interface is used for close-out withdrawal by MultiMode.
Customer Group Maintenance	SRV_FA_CLSOUTWITHD RAWAL_MULTIMODE_SU BMIT	NEW	This application programming interface is used to submit multi-mode records.
Transaction API	SRV_FA_CMN_ON_EN_T LR_SUBMIT	NEW	This is to end teller submit.
Transaction API	SRV_FA_CMN_ON_FIN_ SUBMIT	NEW	This is for credit card screen submission.
Transaction API	SRV_FA_CMN_OPEN_C HK_BATCH	NEW	This is for the open check batch.
Transaction API	SRV_FA_COPY_PRC_RU LE	NEW	This is for the price rule copy.
Maintenance API	SRV_FA_CORE_GL_ACC S	NEW	This is to get GL core accounts.
Logging API	SRV_FA_CREATE_EJ_L OG	NEW	This is to create an electronic journal log.
Ob Tm Charge Price Template Service API	SRV_FA_CREATE_PRC_ RULE	NEW	This is to create a price rule.
Ob Tm Charge Price Template Service API	SRV_FA_CREATE_PRCR ULE_MENU	NEW	This is to create a price rule.
Cash Transaction DS API	SRV_FA_CREDITCARD_ ONSUBMIT	NEW	This is for credit card submission.

Transaction API	SRV_FA_CREDITCARD_PENDING_APPROVAL	NEW	This is for a credit card pending approval.
Transaction API	SRV_FA_CREDITCARD_REVERSAL	GET	This is for credit card reversal.
Passbook Update API	SRV_FA_CSUBMITH	NEW	This is for credit card submission.
Transaction API	SRV_FA_CURRENT_OPEN_TILLS	NEW	This is for current open tills.
Customer Address API	SRV_FA_CUS_ADDRESS_SUBMIT	NEW	This is for customer address submission.
Customer Address API	SRV_FA_CUS_ADRESS	NEW	This is to save the customer's address.
Query Customer Information API	SRV_FA_CUS_CUSTOMER_INFO	NEW	This is to fetch customer details by customer number.
Customer Address API	SRV_FA_CUSOTMER_PROFILE	NEW	This is for the customer profile.
Customer Address API	SRV_FA_CUST_ACC_ADDRESS_UPDATE	NEW	This is to update the customer account address.
Customer Address API	SRV_FA_CUST_ADDR_UPDATE	NEW	This is to update the customer's address.
Customer Address API	SRV_FA_CUST_CONTACT_DETAILS_UPDATE	NEW	This is to update customer contact details.
Srv Tm Bc Customer Group Master API	SRV_FA_CUST_GRP_AUTH_QUERY	NEW	This is to query customer group authorization.

Srv Tm Bc Customer Group Master API	SRV_FA_CUST_GRP_AUTHORIZE	NEW	This is to authorize the customer group.
Srv Tm Bc Customer Group Master API	SRV_FA_CUST_GRP_CLOSE_RECORD	NEW	This is for the customer group close record.
Srv Tm Bc Customer Group Master API	SRV_FA_CUST_GRP_DELETE	NEW	This is for customer group deletion.
Srv Tm Bc Customer Group Master API	SRV_FA_CUST_GRP_GET_HISTORY	NEW	This is for the customer group to get history.
Srv Tm Bc Customer Group Master API	SRV_FA_CUST_GRP_GETALL	NEW	This is to get all customers for the customer group.
Srv Tm Bc Customer Group Master API	SRV_FA_CUST_GRP_GETBYID	NEW	This is for the customer group get by ID.
Srv Tm Bc Customer Group Master API	SRV_FA_CUST_GRP_MODIFY_RECORD	NEW	This is to modify a record for the customer group.
Srv Tm Bc Customer Group Master API	SRV_FA_CUST_GRP_REOPEN_RECORD	NEW	This is to reopen the record for the customer group.
Srv Tm Bc Customer Group Master API	SRV_FA_CUST_GRP_SAVE_RECORD	NEW	This is to save a record for the customer group.
AccountBalance API	SRV_FA_CUST_QUERY_ACCOUNT_BALANCE	NEW	This is for the customer group query account balance.
Srv Tm Bc Customer Group Master API	SRV_FA_CUSTGRP_GET_MENU	NEW	This is for getting to menu items.

Customer Cheque Book Request API	SRV_FA_CUSTOMER_QUERYCHEQUEBOOKREQ	NEW	This application programming interface to query a cheque book status.
Srv Tm Cs Limits Web API	SRV_FA_CUSTOMER_REJECT	NEW	This is for customer rejection.
External System API	SRV_FA_CUSTOMER_SERVICE_SAVE	NEW	This is to save customer service.
Resource Orchestrator Service API	SRV_FA_CUSTOMER_VALIDATE	NEW	This is to validate a customer.
Remo Tm Branch Charge Master Web API	SRV_FA_CUSTOMERGROUP_GETALL	NEW	This is for a list of values for customer group search.
Transaction API	SRV_FA_DD_BC_ISSUE_REVERSAL	NEW	This is for demand draft and bankers' cheque issue reversal.
Transaction API	SRV_FA_DD_BC_PAYMENT_REVERSAL	NEW	This is for demand draft and bankers' cheque issue reversal.
Transaction API	SRV_FA_DD_CANCEL	NEW	This is for demand draft cancellation.
Transaction API	SRV_FA_DD_DUPLICATE_SAVE	NEW	This application programming interface is used for duplicate demand draft issues.
OBPay API	SRV_FA_DD_INQUIRY	NEW	This is for the demand draft issue inquiry.
OBPay API	SRV_FA_DD_ISSUANCE_ACC	NEW	This is for demand draft issuance against account/GL.
OBPay API	SRV_FA_DD_ISSUANCE_GL	NEW	This is for demand draft issuance GL.

OBPAY API	SRV_FA_DD_ISSUANCE_WALKIN	NEW	This is for demand draft issuance against walk-in.
OBPAY API	SRV_FA_DD_OPERATIONS	NEW	This is for demand draft operations.
Transaction API	SRV_FA_DD_PAYMENT_REVERSAL	NEW	This is for demand draft payment reversal.
OBPAY API	SRV_FA_DD_PRINT_REPRINT	NEW	This is for demand draft print reprint.
Transaction API	SRV_FA_DD_REFUND	NEW	This is for a demand draft refund.
Transaction API	SRV_FA_DD_REVALIDATION	NEW	This is for demand draft revalidation.
DD/BC Operations API	SRV_FA_DDBC_OPERATIONS_SAVE	NEW	This is for revalidation save.
DD/BC Operations API	SRV_FA_DDBC_OPERATIONS_SUBMIT	NEW	This is for revalidation submission.
Default Authorizer Web API	SRV_FA_DEF_AUTH_REJECT	NEW	This is for default auth reject.
Srv Tm Cs Limits Web API	SRV_FA_DELETE_CUSTOMER	NEW	This is to delete.
Denomination Variance Maintenance	SRV_FA_DELETE_PRC_RULE	NEW	This is for price rule deletion.
Denomination Variance Maintenance	SRV_FA_DELETETASK	NEW	This application programming interface is used when the approver has rejected the transaction.

Denomination Variance Maintenance	SRV_FA_DENOM_CAL_DENOMINATIONS	NEW	This is for calculation denomination.
Denomination Variance Maintenance	SRV_FA_DENOM_GET_DENOMINATIONS	NEW	This is for denomination get by currency and type.
Denomination Variance Maintenance	SRV_FA_DENOM_GETALL_MENU	NEW	This is to get all menu items.
Denomination Variance Maintenance	SRV_FA_DENOMINATION_CURRENCYDENOM	NEW	This application programming interface is for denomination details.
Denomination Variance Maintenance	SRV_FA_DENOMINATION_EXCHANGE	NEW	This is for denomination exchange.
Denomination Variance Maintenance	SRV_FA_DENOMINATION_SUBMIT	NEW	This application programming interface saves the denomination transaction details to domain tables.
Denomination Variance Maintenance	SRV_FA_DENOMINATION_AUTH_QUERY	NEW	This is for denominations to authorize queries.
Denomination Variance Maintenance	SRV_FA_DENOMINATION_AUTHORIZE	NEW	This is to authorize denominations.
Denomination Variance Maintenance	SRV_FA_DENOMINATION_CLOSE_RECORD	NEW	This is to close the denomination record.
Denomination Variance Maintenance	SRV_FA_DENOMINATION_DELETE	AUTHORIZE	This is to delete the denomination record.
Denominations API	SRV_FA_DENOMINATION_GETALL	INQUIRY	This is to get all denominations.

Denominations Maintenance	SRV_FA_DENOMINATIONS_GETBYID	CLOSE	This is to get denominations by ID.
Denominations API	SRV_FA_DENOMINATIONS_GETHISTORY	DELETE	This is to get denominations by history.
Denominations API	SRV_FA_DENOMINATIONS_MODIFY_RECORD	Modify	This is to modify the denomination record.
Denominations API	SRV_FA_DENOMINATIONS_REOPEN_RECORD	GET	This is to modify denominations and reopen the record.
Denominations API	SRV_FA_DENOMINATIONS_SAVERECORD	GET	This is to modify denominations and save records.
Srv Tm Bc Denomination Variance Web API	SRV_FA_DENOMWISEVARI_FEAT_AUTH_QUERY	GET	This application programming interface is for the denomination-wise variance feature.
Srv Tm Bc Denomination Variance Web API	SRV_FA_DENOMWISEVARI_FEAT_AUTHORIZE	UNLOCK	This application programming interface is for the denomination-wise variance feature.
Srv Tm Bc Denomination Variance Web API	SRV_FA_DENOMWISEVARI_FEAT_CLOSE_RECORD	REOPEN	This application programming interface is for the denomination-wise variance feature.
Srv Tm Bc Denomination Variance Web API	SRV_FA_DENOMWISEVARI_FEAT_DELETE	SAVE	This application programming interface is for the denomination-wise variance feature.
Srv Tm Bc Denomination Variance Web API	SRV_FA_DENOMWISEVARI_FEAT_DENOMVARDETAILS	GET	This application programming interface is for the denomination-wise variance feature.
Srv Tm Bc Denomination Variance Web API	SRV_FA_DENOMWISEVARI_FEAT_GET_HISTORY	NEW	This application programming interface is for the denomination-wise variance feature.

Srv Tm Bc Denomination Variance Web API	SRV_FA_DENOMWISEVA R_FEAT_GETALL	GET	This application programming interface is for the denomination-wise variance feature.
Srv Tm Bc Denomination Variance Web API	SRV_FA_DENOMWISEVA R_FEAT_GETBYID	NEW	This application programming interface is for the denomination-wise variance feature.
Srv Tm Bc Denomination Variance Web API	SRV_FA_DENOMWISEVA R_FEAT_MODIFY_RECO RD	NEW	This application programming interface is for the denomination-wise variance feature.
Srv Tm Bc Denomination Variance Web API	SRV_FA_DENOMWISEVA R_FEAT_REOPEN_RECO RD	NEW	This application programming interface is for the denomination-wise variance feature.
Srv Tm Bc Denomination Variance Web API	SRV_FA_DENOMWISEVA R_FEAT_SAVERECORD	NEW	This application programming interface is for the denomination-wise variance feature.
Srv Tm Bc Denomination Variance Web API	SRV_FA_DENOMWISEVA R_GETAL_MENU	NEW	This application programming interface is for the denomination-wise variance feature.
Transaction Api	SRV_FA_DEPOSIT_REN TAL_CASH	NEW	This is for safe deposit rental by cash.
Customer Account Statement API	SRV_FA_DGETWORKDE TAILSS	NEW	This is to get work details.
Account Address API	SRV_FA_DGETWORKDE TAILSZ	NEW	This is to get all the work details.
Account Address API	SRV_FA_DUPDATEQ	NEW	This is to duplicate the date update.
Customer Contact Update API	SRV_FA_DUPDATET	NEW	This is to duplicate the date update.
Eca API	SRV_FA_EAC_CHECK	NEW	This is for the adapter EAC check.

Customer Account Statement API	SRV_FA_EACCSTMTSUBMITQ	NEW	This is for the external credit approval account statement.
Eca API	SRV_FA_ECAUNDO	NEW	This is for external credit approval undo by transaction reference number.
Customer Chequebook Request API	SRV_FA_EGETBYIDL	NEW	This is to get an electronic journal by ID.
External System Maintenance	SRV_FA_EJREASSIGN	NEW	This is to reassign transactions.
Transaction API	SRV_FA_ELECTRONIC_JOURNAL_APPROVAL	NEW	This is for electronic journal approval.
Transaction API	SRV_FA_ELECTRONIC_JOURNAL_LOG	NEW	This is for the electronic journal log.
Transaction API	SRV_FA_ELECTRONIC_JOURNAL_LOG_CASH	NEW	This is for electronic journal log cash.
Transaction API	SRV_FA_ELECTRONIC_JOURNAL_LOG_NON_CASH	NEW	This is for electronic journal log non-cash.
Logging API	SRV_FA_EOD	NEW	This is for EOD.
Transaction API	SRV_FA_EOD_VALIDATE_OPENBRANCH	NEW	This is to validate the open branch batch.
Account Address API	SRV_FA_ESAVEI	NEW	This is to save the open branch batch.
Passbook Status Request API	SRV_FA_EUPDATEPASSBOOKD	NEW	This is to update the passbook.

Cash Transaction DS API	SRV_FA_EXT_BUYCASH CCYCHEST	NEW	This is to buy cash from the chest.
Cash Transaction DS API	SRV_FA_EXT_CASHDEP OSIT	NEW	This is for the external application programming interface cash deposit.
Cash Transaction DS API	SRV_FA_EXT_CASHWIT HDRAWAL	GET	This is for external application programming interface cash withdrawal.
Cash Transaction DS API	SRV_FA_EXT_CHEQUE WITH	NEW	This is for external application programming interface cheque withdrawal.
Cash Transaction DS API	SRV_FA_EXT_MISCCUS TOMERCREDIT	NEW	This is for external application programming interface MIS customer credit.
Cash Transaction DS API	SRV_FA_EXT_MISCCUS TOMERDEBIT	NEW	This is for the external application programming interface MIS customer debit.
Cash Transaction DS API	SRV_FA_EXT_MISCGLD EBIT	NEW	This is for Misc GL debit.
Cash Transaction DS Service API	SRV_FA_EXT_MISCGLR EQUEST	NEW	This is for the Misc GL request.
Cash Transaction DS API	SRV_FA_EXT_MISCGLR EQUEST_WEB	NEW	This is for the Misc GL request.
Cash Transaction DS API	SRV_FA_EXT_SELLCAS HTOCURRENCYCHEST	NEW	This is to sell cash to the currency chest.
External System API	SRV_FA_EXT_SYSTEM_ SAVE	NEW	This is to validate by role ID.
Cash Transaction DS API	SRV_FA_EXT_TCASHFV ALTOTILL	NEW	This is to sell cash from the vault to the till.

Account Balance Service API	SRV_FA_EXTERNAL_ACCOUNT_BALANCE_EXECUTE	NEW	This is to submit the account balance.
External Payment Transaction Service API	SRV_FA_EXTERNAL_ACCOUNT_TRANSFER_EXECUTE	NEW	This is to submit an account transfer.
Cash Transaction DS Service API	SRV_FA_EXTERNAL_CASH_DEPOSIT_EXECUTE	NEW	This is to submit a cash deposit.
Cash Transaction DS Service API	SRV_FA_EXTERNAL_CASH_WITHDRAWAL_EXECUTE	NEW	This is to submit a cash withdrawal.
Cash Transaction DS Service API	SRV_FA_EXTERNAL_CASH_WITHDRAWAL_SAVE	NEW	This is to save cash withdrawal.
Stop Card Request API	SRV_FA_EXTERNAL_STOP_CARD	NEW	This is for an external stop card.
Srv Tm Bc External System Web API	SRV_FA_EXTRNLSYS_GET_MENU	NEW	This is to get external system menu items.
Cash Additional Transaction API	SRV_FA_F23A_TAX	NEW	This is for Cash Data Segment
Transaction API	SRV_FA_F23C_TAX	NEW	This is for F23 tax payment by cash.
Cash Additional Transaction API	SRV_FA_F24_CASH_SUBMIT	NEW	This is for F24C cash submission.
Cash Additional Transaction API	SRV_FA_F24A_TAX	NEW	This is for the F24C account submission.

Transaction API	SRV_FA_F24C_TAX	NEW	This is for F24 tax payment by cash.
Function Code Definition	SRV_FA_FETCH_CHARGES	NEW	This application programming interface is used to fetch the charges from domain tables.
Function Code Definition	SRV_FA_FETCH_CHILD_FUNC_CODE	NEW	This is to fetch the child function code.
Function Code Definition	SRV_FA_FETCH_DENOMINATIONS	NEW	This application programming interface is used to fetch the denomination from domain tables.
Function Code Definition	SRV_FA_FETCH_FUNCODE_BRN_CCY	NEW	This is to get settlement details based on function code, branch, and currency.
Function Code Definition	SRV_FA_FETCH_MAIN_CHARGES	NEW	This application programming interface is used to fetch charges from the main table.
Function Code Definition	SRV_FA_FETCH_PARAM	NEW	This is to fetch transaction parameters.
Function Code Definition	SRV_FA_FETCH_STORE	NEW	This is to fetch store details.
Function Code Definition	SRV_FA_FETCHINSTDETAILS	NEW	This is to fetch instrument details.
Function Code Definition	SRV_FA_FSAVERECORDO	NEW	This is to save store details.
Function Code Definition	SRV_FA_FT_GENERATEXREF	NEW	This is to generate an XRef number.
Function Code Definition	SRV_FA_FT_GETCONVERTEDAMT	NEW	This is to get the converted amount.
Function Code Definition	SRV_FA_FT_GETXRATE	GET	This is to get the exchange rate.

Transaction API	SRV_FA_FT_TRANSFER_ACCOUNT	AUTHORIZE	This is for domestic transfers.
Transaction API	SRV_FA_FT_TRANSFER_WALKIN	INQUIRY	This is for domestic transfers.
Srv Tm Bc Function Code Web API	SRV_FA_FUNC_CODE_DEFIN_AUTHORIZE	CLOSE	This is to authorize function code definition.
Srv Tm Bc Function Code Web API	SRV_FA_FUNC_CODE_DEFIN_AUTHQUERY	DELETE	This is to authorize function code definition to authorize query.
Srv Tm Bc Function Code Web API	SRV_FA_FUNC_CODE_DEFIN_CLOSE	GET	This is to close the function code definition.
Srv Tm Bc Function Code Web API	SRV_FA_FUNC_CODE_DEFIN_DELETE	GET	This is to delete the function code definition.
Srv Tm Bc Function Code Web API	SRV_FA_FUNC_CODE_DEFIN_GET	QUERY	This is for function code definition get all.
Srv Tm Bc Function Code Web API	SRV_FA_FUNC_CODE_DEFIN_GETBY_ID	Query	This is for function code definition get by ID.
Srv Tm Bc Function Code Web API	SRV_FA_FUNC_CODE_DEFIN_HISTORY	Query	This is for function code definition history.
Srv Tm Bc Function Code Web API	SRV_FA_FUNC_CODE_DEFIN_POST	REOPEN	This is to save a record for function code definition.
Srv Tm Bc Function Code Web API	SRV_FA_FUNC_CODE_DEFIN_PUT	REJECT	This is to modify a record for function code definition.

Srv Tm Bc Function Code Web API	SRV_FA_FUNC_CODE_D EFIN_REOPEN	NEW	This is to reopen a record for function code definition.
Srv Tm Bc Function Code Web API	SRV_FA_FUNC_CODE_R EJECT	NEW	This is to reject a record for function code definition.
Srv Tm Bc Function Code Web API	SRV_FA_FUNC_CODE_DE FIN_GET_MENU	NEW	This is for function code definition get menu.
Srv Tm Bc Function Code Web API	SRV_FA_FUNC_CODE_DE FIN_GETBYFUNCTIONC ODE	NEW	This is to get by function code details based on function code
Customer Chequebook Request API	SRV_FA_FUPDATEU	NEW	This is to update a record for the function code definition.
Transaction API	SRV_FA_FX_IN_DENOMI ATIONS	NEW	This is to save FX in denominations.
Transaction API	SRV_FA_FX_OUT_DENO MIATIONS	NEW	This is to save FX from denominations.
Transaction API	SRV_FA_FX_PENDING_T ILLACC	NEW	This is for the pending FX till and account.
Transaction API	SRV_FA_FX_PURCHASE _AGAINST_ACC	NEW	This is for the FX purchase against the account.
Transaction API	SRV_FA_FX_PURCHASE _WALKIN	NEW	This is for the FX Purchase - Walk-in.
Transaction API	SRV_FA_FX_PURCHASE _WALKIN_TELLER	NEW	This is for the FX Purchase - Walk-in.

Transaction API	SRV_FA_FX_SALE_AGAINST_ACC	NEW	This is for the Fx Sale Against Account.
Transaction API	SRV_FA_FX_SALE_WALKIN	NEW	This is for the FX Purchase - Walk-in.
Transaction API	SRV_FA_FX_SALE_WALKIN_TELLER	NEW	This is for the FX Purchase - Walk-in.
Transaction API	SRV_FA_FX_TILL_ACCOUNT_SUBMIT	NEW	This is to submit FX till and account.
Transaction API	SRV_FA_GENERATE_SLIP	NEW	This is to generate input slip.
Srv Tm Bc Account Group Master API	SRV_FA_GET_ACCOUNT_GROUP_REJECT	NEW	This is to get the account group reject details.
Transaction API	SRV_FA_GET_ALL_CACHE	NEW	This is to get all the cache.
System Parameter Web API	SRV_FA_GET_ALL_CONFIGURATIONINFO	NEW	This is to get all configuration information.
Operation API	SRV_FA_GET_APPROVAL	NEW	This is to get auth approval.
Logging API	SRV_FA_GET_APPROVAL_CASH_NON_CASH_TRANSACTION	NEW	This is to get electronic journal approval records for the cash and noncash.
Get Available Balance API	SRV_FA_GET_AVAILABLE_BALANCE	NEW	This is to get an available balance.

Remo Tm Branch Accounting Master Web API	SRV_FA_GET_BRANCH_ ACCOUNT_FUNC	NEW	This is to get the branch by function code.
Srv Tm Bc Branch Group Master API	SRV_FA_GET_BRANCH_ GROUP_REJECT	NEW	This is to get the branch group rejected.
Operation API	SRV_FA_GET_BRANCH_ INFO	NEW	This is to get branch info.
Logging API	SRV_FA_GET_BY_SOUR CEREFNO	NEW	This is to get an electronic journal log by source reference number.
Logging API	SRV_FA_GET_CASH_NO N_CASH_TXN	NEW	This is to get electronic journal approval records for the cash and noncash.
Transaction API	SRV_FA_GET_CCY	NEW	This is to get currency details application programming interface.
Adapter API	SRV_FA_GET_CENTRAL TXNLOG	NEW	DD/BC on pending duplicate application programming interface.
Adapter API	SRV_FA_GET_CENTRAL TXNLOG_INFO	NEW	This is to central transaction inquiry.
Srv Tm Bc Charge Group Master Web API	SRV_FA_GET_CHARGE_ GROUP_REJECT	NEW	This is to get the charge group reject.
Remo Tm Branch Charge Master Pick Up Web API	SRV_FA_GET_CHARGE_ PICK_REJECT	NEW	This is to get the charge pickup reject.
Remo Tm Branch Charge Master Web API	SRV_FA_GET_CHARGE_ REJECT	NEW	This is to get the charge reject.

System Parameter Web API	SRV_FA_GET_CONFIGURATIONINFO	NEW	This is to get configuration information.
Srv Tm Bc Customer Group Master API	SRV_FA_GET_CUST_GROUP_REJECT	NEW	This is to get the customer group reject.
Srv Tm Bc Denomination Variance Web API	SRV_FA_GET_DENOM_VAR_REJECT	NEW	This is to get denomination var reject.
Denominations API	SRV_FA_GET_DENOMINATIONS_REJECT	NEW	This is to get the denomination reject.
Logging API	SRV_FA_GET_EJLOGINFORMATIONBYID	NEW	This is to get EJ Log Information by ID.
Logging API	SRV_FA_GET_EJLOGINFORMATIONBYTRN	NEW	This is to get an electronic journal log by source reference number.
Logging API	SRV_FA_GET_EJRECORDS_SUPERVISOR	NEW	This is to get the EJ records supervisor.
Logging API	SRV_FA_GET_EJRECORDSINFO	NEW	This is to get EJ records information.
Ob Tm Charge Price Template Service API	SRV_FA_GET_ID_PRC_RULE	NEW	This is to create a price rule.
API	SRV_FA_GET_LATEST_DATA	NEW	This is to get all the latest consolidated data for all the data segments.
Loan API	SRV_FA_GET_LOANACCOUNT_QUERY	NEW	This is to loan query account.
Adapter API	SRV_FA_GET_MEMO	NEW	This is to get customer memo instructions.

Adapter API	SRV_FA_GET_MUL_OB_STTS	NEW	This is to get_ob_stts.
OBPay API	SRV_FA_GET_OB_STTS	NEW	This is to get_ob_stts.
CommonLov API	SRV_FA_GET_PB_DTLS_LOV_DATA	NEW	This is to Pass electronic journal approval records for the passbook book details.
Ob Tm Charge Price Template Service API	SRV_FA_GET_PRC_RULE	NEW	This is to create a price rule.
Ob Tm Charge Price Template Service API	SRV_FA_GET_PRCRULE_MENU	NEW	This is to create a price rule menu.
Pricing API	SRV_FA_GET_PRICING	NEW	This is to get pricing.
Transaction API	SRV_FA_GET_STATIC_TAGS	NEW	This is to fetch static tags.
Term Deposit API	SRV_FA_GET_TDLOV_DATA	NEW	This is to td product list of values.
Transaction API	SRV_FA_GET_TLR_BATCH_INFO	NEW	This application programming interface is used to fetch the teller batch information.
Denominations API	SRV_FA_GET_TRANSACTIONINFO	NEW	This is for transaction info.
Logging API	SRV_FA_GET_TXNLOG_BYTRN	NEW	This is to fetch the transaction log by transaction.
Operation API	SRV_FA_GET_URL	NEW	This is to get the URL by function code and action.

UserPreferences API	SRV_FA_GET_USER_PREF_REJECT	NEW	This is to get user preference reject.
Transaction API	SRV_FA_GET_VAULT_BATCH_INFO	NEW	This application programming interface is to get vault batch information.
Charge Pricing Maintenance	SRV_FA_GETALL_CUSTOMER	NEW	This is to get all customer records.
Maintenance API	SRV_FA_GETALLGroup	NEW	This is for the list of value services for all group.
ExternalAPIWeb API	SRV_FA_GETAPISYSTEM	NEW	This is for the external application programming system.
Payment Transaction DS API	SRV_FA_GETBANKBICCODE	NEW	This is to get the bank BIC code.
Payment Transaction DS API	SRV_FA_GETBENFBANKCODE	NEW	This is to get beneficiary bank code.
Srv Tm Cs Limits Web API	SRV_FA_GETBYID_CUSTOMER	NEW	This is to get by ID.
Cash Transaction DS API	SRV_FA_GETCASHRECORDINFO	NEW	This is to get cash record information.
Eca API	SRV_FA_GETECAREFNO	NEW	This is to get ECA reference number by transaction reference number.
Transaction API	SRV_FA_GETELLERTOTAL	NEW	This is to get the total teller balance.
TDRedeemption API	SRV_FA_GETERMDEPOSITACC	NEW	This is to get term deposit account.

Srv Tm Cs Limits Web API	SRV_FA_GETHISTORY_CUSTOMER	NEW	This is to get a customer history.
Instrument Transaction API	SRV_FA_GETINSTRUMENT	GET	This is to get the instrument.
Instrument Transaction API	SRV_FA_GETINSTUDETAILS	NEW	This is to get the instrument details.
Instrument Transaction API	SRV_FA_GETINVENTORYPOSITION	NEW	This is to get the inventory position.
Payment Transaction DS API	SRV_FA_GETPAYMENTRECORDINFO	NEW	This is to get payment record information.
Travelers Cheque Transaction API	SRV_FA_GETTCDENOM	NEW	This is to get TC denomination details.
Travelers Cheque Transaction API	SRV_FA_GETTCDENOMBYID	NEW	This is to get a TC denomination by ID.
Inter Branch Transit Account	SRV_FA_GETTELLRTXNTOTAL	NEW	This is to get a teller transaction total.
Customer TD API	SRV_FA_GETTERMDEPOSITACCOUNT	NEW	This is to get a term deposit account.
Customer TD API	SRV_FA_GETTERMDEPOSITACCOUNTLINKEDENTITIES	NEW	This is to get a term deposit account linked entities.
Customer TD API	SRV_FA_GETTERMDEPOSITACCOUNTROLLOVER	NEW	This is to get a term deposit account rollover.

Customer TD API	SRV_FA_GETTERMDEP OSITDENOMINATION	NEW	This is to get the term deposit denomination.
TD Topup API	SRV_FA_GETTERMDEP OSITINFO	NEW	This is to get term deposit information.
Customer TD API	SRV_FA_GETTERMDEP OSITPAYINDTLS	NEW	This is to get term deposit payin details.
Customer TD API	SRV_FA_GETTERMDEP OSITPAYOUT	NEW	This is to get a term deposit payout.
Transaction API	SRV_FA_GETTXNSTATU S	NEW	This is to get transaction status.
Transaction API	SRV_FA_GL_TRANSFER	NEW	This is to GL transfer.
Passbook Update API	SRV_FA_HGETBYIDK	NEW	This is to get by id.
Transaction API	SRV_FA_HGETTELLERT RANSATIONO	GET	This is to get the teller transaction number.
Passbook Update API	SRV_FA_HGETWORKDE TAILS[	NEW	This is to get work details.
Ob Tm Charge Price Template Service API	SRV_FA_HISTORY_PRC _RULE	NEW	This is to price rule history.
Passbook Req API	SRV_FA_HSAVED	NEW	This is to save.
SrvTmChlbTransitAccWeb API	SRV_FA_IBTRANSITACC _GETAL_MENU	NEW	This is the transit account to get all the menu.
Passbook Status Req API	SRV_FA_IGETALLRECO RDSJ	NEW	This is to get all servicing journal records.

Transaction API	SRV_FA_INHOUSE_CHK_DEP_DIR	NEW	This is for the in-house cheque deposit directory.
API	SRV_FA_INITIATE	NEW	This is to orchestrator service initiates actions.
API	SRV_FA_INITIATE_EXISTING	NEW	This is for the initiation of the task that happens by this endpoint.
Transaction API	SRV_FA_INPUT_LIQD_SUBMIT	NEW	This is for the electronic journal log by source reference number.
API	SRV_FA_INPUT_SLIP	NEW	This is to input slip call.
OBPay API	SRV_FA_INSTR_UP_MENU	NEW	This is to instrument update menu.
Transaction API	SRV_FA_INSTRPAY_SUBMIT_ACC	NEW	on Instrument Payment Submit Account.
Transaction API	SRV_FA_INSTRPAY_SUBMIT_ACC_TILL	NEW	on Instrument Payment Submit Account Till.
Instrument Transaction API	SRV_FA_INSTRUMENT_BC_ENQUIRY	NEW	This is for the BC instrument inquiry.
Instrument Transaction API	SRV_FA_INSTRUMENT_ENQUIRY	NEW	This is to instrument inquiry.
Transaction API	SRV_FA_INT_BRANCH_TXN_REQ	NEW	This is to the interbranch transaction request.
Transaction API	SRV_FA_INT_TRANSFER_ACC	NEW	This is to international transfer against the account.

Transaction API	SRV_FA_INT_TRANSFER_WALKIN	NEW	This is to international transfer against walk-in.
Cash Transaction DS API	SRV_FA_INTERBRANCH_GET_TXNREF	NEW	This is to get an inter-branch transaction reference number.
Cash Transaction DS API	SRV_FA_INTERBRANCH_LOV	NEW	This is to inter-branch list of values.
Cash Transaction DS API	SRV_FA_INTERBRANCH_ONSUBMIT	NEW	This is to inter-branch submit.
Cash Transaction DS API	SRV_FA_INTERBRANCH_ONSUBMIT_TM	NEW	This is to submit the inter-branch transaction.
Cash Transaction DS API	SRV_FA_INTERBRANCH_SAVE	NEW	This is to inter-branch transaction save.
Transaction API	SRV_FA_INTERBRN_INP_LIQ_PENDING_APP	NEW	This is to On electronic journal approval records for the input liquidation submission.
Issuer Code Maintenance	SRV_FA_INTERBRN_REQ_PENDING_APP	NEW	This is to submit the pending inter-branch request.
Issuer Code Maintenance	SRV_FA_INTERBRN_REQ_SUBMIT	NEW	This is to submit the inter-branch request.
Issuer Code Maintenance	SRV_FA_INTRBRANCH_LIQ_	NEW	This is to inter-branch transaction liquidation.
Issuer Code Maintenance	SRV_FA_INTRBRANCH_SAVE_	NEW	This is to inter-branch transaction input.
Issuer Code Maintenance	SRV_FA_INVOKEECA	NEW	This is to invoke external credit approval by action.

Issuer Code Maintenance	SRV_FA_INWARD_CLEARING	NEW	This is to inward clearing.
Issuer Code Maintenance	SRV_FA_INWARD_REMITTANCE	NEW	This is to inward registration.

Clearing Network	SRV_FA_MISC_CUST_D EBIT	NEW	This is for the miscellaneous customer debit screen.
Clearing Network	SRV_FA_MISC_GL_CRE DIT	NEW	This is for the miscellaneous GL credit screen.
Clearing Network	SRV_FA_MISC_GL_DEBI T	NEW	This is for the miscellaneous GL debit screen.
Clearing Network	SRV_FA_MISC_TRANSF ER	NEW	This is for the miscellaneous transfer.
Clearing Network	SRV_FA_ML_ENRICHED _PROCESSING	NEW	This is to enriched ml processing.
Clearing Network	SRV_FA_ML_GETBY_DO CID	NEW	This is to get by document ID.

Clearing Network	SRV_FA_ML_ML_PROCE SSING	NEW	This is to ml processing.
Clearing Network	SRV_FA_MMACCL_APPR OVE	NEW	This is to mm account approval.
Clearing Network	SRV_FA_MMACCL_INITI ATION_TASK	NEW	This is to account initiation task.
Clearing Network	SRV_FA_MODIFY_CUST OMER	NEW	This is to modify the customer.
Clearing Network	SRV_FA_MODIFY_PRC_ RULE	NEW	This is for the price rule modify.
FCUBS ST Service API	SRV_FA_MODIFY_SUMM ARY_CARD	AUTH ORIZ E	This is to modify the card master.
Cheque Book Req API	SRV_FA_MODIFYCHEQU EBOOKREQ	INQUI RY	This is to modify cheque book request.
Operation API	SRV_FA_MODIFYDATE	CLOS E	This is to modify dates.
Clearing Network	SRV_FA_MULTI_BC_ISS UANCE	DELE TE	This is to multi-BC issuance.
Transaction API	SRV_FA_MURABAHA_PA YMENT_BY_CASH	GET	This is to Murabaha payment by cash.
Srv Tm Bc Network Code Web API	SRV_FA_NETWORKCOD E_AUTHORIZE	GET	This is to reject network code authorization.

Srv Tm Bc Network Code Web API	SRV_FA_NETWORKCODE_AUTHQUERY	GET	This is for the rejected network code to authorize a query.
Srv Tm Bc Network Code Web API	SRV_FA_NETWORKCODE_CLOSERECORD	UNLOCK	This is for the rejected network code to close a record.
Srv Tm Bc Network Code Web API	SRV_FA_NETWORKCODE_DELETE	REJECT	This is to reject network code deletion.
Srv Tm Bc Network Code Web API	SRV_FA_NETWORKCODE_GETALL	REOPEN	This is for the rejected network code to get all.
Srv Tm Bc Network Code Web API	SRV_FA_NETWORKCODE_GETBYID	SAVE	This is for the rejected network code get by ID.
Srv Tm Bc Network Code Web API	SRV_FA_NETWORKCODE_GETHISTORY	NEW	This is to get the history of the rejected network code.
Srv Tm Bc Network Code Web API	SRV_FA_NETWORKCODE_MODIFYRECORD	NEW	This is to modify a record for the rejected network code.
Srv Tm Bc Network Code Web API	SRV_FA_NETWORKCODE_REJECT	NEW	This is to reject the network code.
Srv Tm Bc Network Code Web API	SRV_FA_NETWORKCODE_REOPENRECORD	GET	This is to reopen a record for the rejected network code.
Srv Tm Bc Network Code Web API	SRV_FA_NETWORKCODE_SAVERECORD	NEW	This is to save a record of the rejected network code.
Transaction API	SRV_FA_NGETTELLERVAULTPOSITIONQUERYI	NEW	This is to query a teller vault position.
Customer Address API	SRV_FA_NGETWORKDETAILED	NEW	This is to get network details.

Passbook Update API	SRV_FA_NSAVEV	NEW	This is to save.
Srv Tm Bc Network Code Web API	SRV_FA_NTWRKCOD_G ETAL_MENU	NEW	This is to REJECT the electronic journal log by source reference number.
Obca Accounting API	SRV_FA_OBCA_ACCOU NTING	NEW	This is to create an OBCA accounting transaction.
Transaction API	SRV_FA_OBPAY_SUBMI T_ACC	NEW	This is to on OBPAY submit account.
Transaction API	SRV_FA_OBPAY_SUBMI T_ACC_TILL	NEW	This is for the OBPAY submission for the account till.
Account Address API	SRV_FA_OGETBYTXNRE FNOU	NEW	This is to get by transaction reference number.
Transaction API	SRV_FA_ON_CASH_SUB _TILL_VALUT_ACC	NEW	This is to On electronic journal approval records for the sub vault acc.
Transaction API	SRV_FA_ON_PASSBOOK _ISSUE	NEW	This is to submit the passbook issue.
Transaction API	SRV_FA_ON_PASSBOOK _UPDATE	NEW	This is to submit a passbook update.
Transaction API	SRV_FA_ON_PENDING_ LIQD_ACC_TILL	NEW	This is to On electronic journal approval records for the pending account till.
Transaction API	SRV_FA_ONPEN_DD_DU PLICATE	NEW	This is for the DD on pending duplicate application programming interface.
Transaction Api	SRV_FA_ONPEN_DD_RE VALIDATE	NEW	This is for the DD on pending revalidate application programming interface.

Transaction API	SRV_FA_ONPENDING_C HEQUE_SUBMIT	NEW	This is to on pending cheque deposit.
Transaction API	SRV_FA_ONPENDING_D UPLICATE	NEW	This is for the DD/BC on pending duplicate application programming interface.
Transaction API	SRV_FA_ONPENDING_P AYMENT_REVERSAL	NEW	This is for the DD/BC on the pending payment reversal application programming interface.
Transaction API	SRV_FA_ONPENDING_R EVALIDATE	NEW	This is for the DD/BC on pending revalidate application programming interface.
Instrument Number Maintenance	SRV_FA_OPEN_BRANCH _BATCH	NEW	This is to open the check branch batch.
Transaction API	SRV_FA_OPEN_BRANCH _BATCHES	NEW	This is to open check branch batches.
Transaction API	SRV_FA_OPEN_INTERB RANCH_CHECK	NEW	This is to open the check interbranch.
Operation API	SRV_FA_OPEN_TELLER _BATCH	NEW	This is to open the teller batch.
Transaction API	SRV_FA_OPEN_TELLER _BATCHES	NEW	This is to open teller batches.
Operation API	SRV_FA_OPEN_VAULT_ BATCH	NEW	This is to open the vault batch.
Transaction API	SRV_FA_OPEN_VAULT_ BATCHES	NEW	This is to open-check vault batches.
Transaction API	SRV_FA_OPEN_VAULT_ CCYCHEST	NEW	This is for an open check vault for currency chest screens.

API	SRV_FA_OPENCHECK	NEW	This is to open check and default.
Transaction API	SRV_FA_OPERATIONS	NEW	This is to operations.
OBPay API	SRV_FA_OUTCLG_RETU RN	NEW	This is to inward clearing return.
OBPay API	SRV_FA_OUTWARD_CL EARING	GET	This is to outward clearing.
Transaction API	SRV_FA_OVERRIDE_CO NFIRMATION	NEW	This is to override confirmation.
Passbook API	SRV_FA_PASSBOOK_IS SUE	NEW	This is to passbook issue.
Passbook API	SRV_FA_PASSBOOK_ST ATUS_CHANGE	NEW	This is to passbook status change.
Passbook API	SRV_FA_PASSBOOK_UP DATE	NEW	This is to passbook update.
Outward Clearing Transaction API	SRV_FA_PAY_GET_CLE ARING_BATCHNUMBER_ DETAILS	NEW	This is to application programming interface electronic journal approval records for the data entries.
Outward Clearing Transaction API	SRV_FA_PAY_GET_CLE ARING_SAVEDTXN_BAT CH_NUMBERS	NEW	This is to application programming interface electronic journal approval records for the clearing batch numbers.
Cheque Retrun Transaction API	SRV_FA_PAY_GET_INST RUMENT	NEW	This application programming interface is to query a clearing transaction.
Instrument Web API	SRV_FA_PAY_INSTR_AU THORIZE	NEW	This is for payment instrument authorization.

Instrument Web API	SRV_FA_PAY_INSTR_AUTHQUERY	NEW	This is to payment instrument auth query.
Instrument Web API	SRV_FA_PAY_INSTR_CLOSE	NEW	This is to pay the instrument close record.
Instrument Web API	SRV_FA_PAY_INSTR_DELETE	NEW	This is to payment instrument.
Instrument Web API	SRV_FA_PAY_INSTR_GETALL	NEW	This is to payment instrument get all.
Instrument Web API	SRV_FA_PAY_INSTR_GETBYID	NEW	This is for the payment instrument get by ID.
Instrument Web API	SRV_FA_PAY_INSTR_GETHISTORY	NEW	This is to payment instrument get history.
Instrument Web API	SRV_FA_PAY_INSTR_MODIFYRECORD	NEW	This is for payment instruments to modify records.
Instrument Web API	SRV_FA_PAY_INSTR_REJECT	NEW	This is for the payment instrument rejection.
Instrument Web API	SRV_FA_PAY_INSTR_REOPEN	NEW	This is for payment instruments to reopen the record.
Instrument Web API	SRV_FA_PAY_INSTR_SAVEVERECORD	NEW	This is to payment instrument to save the record.
Transaction API	SRV_FA_PAY_MULTIBC_ISSUE_RETRY	NEW	Transaction retries for the multi-BC issue.
DD/BC Operations API	SRV_FA_PAY_MULTIBC_ISSUE_SAVE	NEW	Payment saves for the multi-BC issue.

DD/BC Operations API	SRV_FA_PAY_MULTIBC_ISSUE_SUBMIT	NEW	This is to submit a payment for the multi-BC issue.
Cash Remittance Transaction API	SRV_FA_PAY_QUERY_CASH_REMITTANCE	NEW	This application programming interface is to query a cash remittance transaction.
Cash Remittance Transaction API	SRV_FA_PAY_SAVE_CASH_REMITTANCE	NEW	This application programming interface is to save a cash remittance transaction.
Cash Remittance Transaction API	SRV_FA_PAY_SAVE_CASH_REMITTANCE_DTLS	NEW	This is to application programming interface electronic journal approval records for the save remittance transaction.
Cheque Return Transaction API	SRV_FA_PAY_SAVE_CHEQUE_RETURN	NEW	This application programming interface is to save a cheque return transaction.
Outward Clearing Transaction API	SRV_FA_PAY_SAVE_OUTWARD_CLEARING	NEW	This is to application programming interface electronic journal log by source reference number.
Travelers Cheque Transaction API	SRV_FA_PAY_SAVE_TC_SALE	NEW	This application programming interface is to save a traveller's cheque transaction.
Cash Remittance Transaction API	SRV_FA_PAY_SUBMIT_CASH_REMITTANCE	NEW	This application programming interface is to submit a cash remittance transaction.
Cheque Return Transaction API	SRV_FA_PAY_SUBMIT_CHEQUE_RETURN	NEW	This application programming interface is to save a cheque return transaction.
Travelers Cheque Transaction API	SRV_FA_PAY_SUBMIT_TRAVELERS_CHEQUE	NEW	This application programming interface is to submit a traveller's cheque transaction.
Cash Remittance Transaction API	SRV_FA_PAY_UPDATE_CASH_REMITTANCE	NEW	This is to update cash remittance.

Cheque Retrun Transaction API	SRV_FA_PAY_UPDATE_CLG_RETURN_STATUS	NEW	This is to application programming interface electronic journal approval records for the update return status.
Instrument Transaction API	SRV_FA_PAY_UPDATE_INSTR_EXPIRY	NEW	This application programming interface is to update the cheque return status.
Instrument Transaction API	SRV_FA_PAY_UPDATE_INSTRUMENT_TXN	NEW	This is for the DD/BC on pending duplicate application programming interface.
Outward Clearing Transaction API	SRV_FA_PAY_UPDATE_STATUS_OUTWARD_CLEARING	NEW	This is to update ClgTxnMaster table.
Instrument Web API	SRV_FA_PAYINSTR_GETAL_MENU	NEW	This is to get all the menu.
Transaction API	SRV_FA_PAYMENT_SUBMIT	NEW	This is to payment submit.
Resource Orchestrator Service API	SRV_FA_PAYMENT_VALIDATE	NEW	This is to validate and create a payment.
Transaction API	SRV_FA_PB_REPRINT	NEW	This is to passbook reprint.
Transaction API	SRV_FA_PENDING_ACCOUNT_SUBMIT	NEW	This is to submit the pending application account.
Transaction API	SRV_FA_PENDING_CUST_APP_SUBMIT	NEW	This is to submit the pending customer application.
Transaction API	SRV_FA_PENDING_DISCARD	NEW	This is to on pending discard.

Transaction API	SRV_FA_PENDING_DISC ARD_MBC	NEW	Pending discard MBC.
Transaction API	SRV_FA_PENDING_INST R_ACC_TILL	NEW	This is to on the electronic journal log by source reference number.
Transaction API	SRV_FA_PENDING_INST R_PAY_ACC	NEW	This is to submit an account for the pending payment instrument.
Transaction API	SRV_FA_PENDING_INST R_PAY_TILL_ACC	NEW	This is for the electronic journal approval records for the instr till update.
Transaction API	SRV_FA_PENDING_LIQ_I NSTR_ACC	NEW	This is to submit an account for the pending liquidation instrument.
Transaction API	SRV_FA_PENDING_OBP AY_ACC	NEW	This is to submit an account for the pending OBPAY.
Transaction API	SRV_FA_PENDING_OBP AY_ACC_TILL	NEW	Pending OBPAY account till.
Transaction API	SRV_FA_PENDING_SAF EDEPOSIT	NEW	This is to on pending safe deposit.
Transaction API	SRV_FA_PENDING_STO P_CHQ_APP_SUBMIT	NEW	This is to PENDING electronic journal approval records for the stop approval submission.
Transaction API	SRV_FA_PENDING_TILL _ACC	NEW	This is for the pending application till account.
Transaction API	SRV_FA_PENDING_TILL _ACC_R	NEW	Pending till account.
Transaction API	SRV_FA_PENDING_TILL _SUBMIT	NEW	This is for the pending application till submission.

Transaction API	SRV_FA_PGETTELLERT RANSACTIONTOTALPRE VDAY[	NEW	This is to get the teller transaction total previous day.
Poller Detail API	SRV_FA_POLLER_DETAI LS	NEW	This is to set the poller flag.
Liquidate Web API	SRV_FA_POST_ACC_LIQ UIDATION	NEW	This is to post an acc liquidation request.
Loan API	SRV_FA_POST_LOANDI SB_ADAPTER	NEW	This is to create loan repayment disbursement.
Maintenance API	SRV_FA_PRC_CHRG_PC KUP_MBC	NEW	This is for the passbook details of the charge pick-up.
Maintenance API	SRV_FA_PRICE_CHARG E_DEFAULT	NEW	This is to charge pickup by ID.
Maintenance API	SRV_FA_PRICE_CHARG E_PICKUP	NEW	This is to charge pickup.
Maintenance API	SRV_FA_PRINT_PRC_R ULE	NEW	This is to price rule print.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_PROVIDERMAI NT_AUTHORIZE	NEW	This is to provide maintenance authorization.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_PROVIDERMAI NT_AUTHQUERY	NEW	This is to provide maintenance auth query.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_PROVIDERMAI NT_CLOSERECORD	NEW	This is to provide a maintenance close record.

Srv Tm Bc Provider Maintenance Web API	SRV_FA_PROVIDERMAINT_DELETE	NEW	This is to provide maintenance delete.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_PROVIDERMAINT_GETALL	NEW	This is to provide maintenance get all.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_PROVIDERMAINT_GETBYID	NEW	This is for the provider maintenance by ID.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_PROVIDERMAINT_GETHISTORY	NEW	This is to provide maintenance get history.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_PROVIDERMAINT_MODIFYRECORD	NEW	This is to provide maintenance and modify the record.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_PROVIDERMAINT_REJECT	NEW	This is to maintenance reject.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_PROVIDERMAINT_REOPENRECORD	NEW	This is to provide maintenance records.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_PROVIDERMAINT_SAVERECORD	NEW	This is to provide maintenance save records.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_PRVDRMAIN_GETAL_MENU	NEW	This is to provide maintenance to get all the menu.
Plato Alert Message API	SRV_FA_PUBLISH_EVENT	NEW	This is to publish the event.
Customer Chequebook Request API	SRV_FA_QFETCHCHEQUESTATUSU	NEW	This is to fetch the cheque status.
Customer Contact Update API	SRV_FA_QGETWORKDETAILED	NEW	This is to get work details.

Customer Account Statement API	SRV_FA_QSAVEACCOU NTSTATEMENTV	NEW	This is to save the account statement.
Passbook Req API	SRV_FA_QSUBMITO	NEW	This is to submit.
Customer Chequebook Request API	SRV_FA_QSUBMITT	NEW	This is to submit.
ChequeBook Request API	SRV_FA_QUERYCHEQU EBOOKREQ	NEW	This is to query cheque book request.
ChequeBook Request API	SRV_FA_RD_PAYMENT_ CASH	NEW	This is for the recurring deposit payment by cash.
Obaa Tm Record Detail API	SRV_FA_RECORD_DET AIL_GETTEXTBYID	NEW	This is to get text by ID.
Srv Tm Bc Reject Code Web API	SRV_FA_REJECT_CODE _REJECT	NEW	This is to reject code reject.
API	SRV_FA_REMO_SUBMIT	NEW	This adds a new orchestrator. Add additional information here for this endpoint.
Srv Tm Cs Limits Web API	SRV_FA_REOPEN_CUST OMER	NEW	This is to reopen customers.
Ob Tm Charge Price Template Service API	SRV_FA_REOPEN_PRC_ RULE	NEW	This is to price rule reopen.
Instrument Transaction API	SRV_FA_RESPONSMOD EL	NEW	This is to get the response model and response entity.
API	SRV_FA_REV_OVERRID E	NEW	This is to reverse override.

Transaction API	SRV_FA_REVERSAL	NEW	This is to on reversal.
Transaction API	SRV_FA_REVERSAL_ISS UE_INSTR_ACC	NEW	This is for the reversal issuance instrument account.
Transaction API	SRV_FA_REVERSAL_ISS UE_INSTR_TILL_ACC	NEW	This is for the electronic journal approval records for the issue and account.
Transaction API	SRV_FA_REVERSAL_LIQ D_INSTR_TILL_ACC	NEW	This is to on electronic journal approval records for the liqd and account.
Transaction API	SRV_FA_REVERSAL_LIQ D_INSTRPAY_ACC	NEW	This is for the reversal liquidation instrument payment account.
Transaction API	SRV_FA_REVERSAL_OB PAY_ACC_SUB	NEW	This is for the reversal of the OBPAY account submission.
Transaction API	SRV_FA_REVERSAL_OB PAY_ACC_TILL_SUB	NEW	This is for the electronic journal approval records for the OBPAY account till.
Transaction API	SRV_FA_REVERSAL_OV ERRIDE	NEW	This is for the reversal override confirmation.
Transaction API	SRV_FA_REVERSAL_RD	NEW	This is to on reversal recurring deposit.
PassbookReq API	SRV_FA_RGETALLRECO RDSQ	NEW	This is to get all records.
Branch Role Limits Maintenance	SRV_FA_RGETBYIDE	NEW	This is to get by id.
Customer Account Statement API	SRV_FA_RGETBYIDL	NEW	This is to get by id.

Customer Cheque Book Stop API	SRV_FA_RGETWORKDE TAILSO	NEW	This is to get work details.
Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLE_REOPEN _RECORDS	NEW	This is to reopen - role records.
Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLEBASEDLI MIT_APPROVE	NEW	This is to role-based limit authorization.
Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLEBASEDLI MIT_AUTHQ	NEW	This is role based limit auth query.
Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLEBASEDLI MIT_CLOSE	NEW	This is to close a role-based limit record.
Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLEBASEDLI MIT_DELETE	NEW	This is to delete a role-based limit record.
Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLEBASEDLI MIT_GETALL	NEW	This is to Get an electronic journal log by source reference number.
Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLEBASEDLI MIT_GETBYID	NEW	This is to get a record by ID for the Role-based limit record.
Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLEBASEDLI MIT_GETBYROLEID	NEW	This is to get a record by Role ID for the Role-based limit record.
Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLEBASEDLI MIT_HISTORY	GET	This is to Get an electronic journal log by source reference number.
Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLEBASEDLI MIT_REJECT	NEW	This is to reject a role-based limit record.
Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLEBASEDLI MIT_REOPEN	NEW	This is to reopen a role-based limit record.

Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLEBASEDLI MIT_SAVE	NEW	This is to save a role-based limit record.
Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLEBASEDLI MIT_UPDATE	NEW	This is to modify a role-based limit record.
Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLEBASEDLI MIT_VALIDATE	NEW	This is to validate a role-based limit record.
Srv Tm Bc Role Limit Master Web API	SRV_FA_ROLELMT_GET ALL_MENU	NEW	This is to get all records for the role limit.
Passbook Req API	SRV_FA_RUPDATEPASS BOOKP	NEW	This is to update the passbook.
Safe Deposit API	SRV_FA_SAFE_DEPOSIT _RENTAL	NEW	This is to safe deposit rental.
Transaction API	SRV_FA_SAFE_DEPOSIT _SUBMIT	NEW	This is to safe deposit submit.
Transaction API	SRV_FA_SAFEDEPOSIT_ REVERSAL	NEW	This is to safe deposit reversal.
Logging API	SRV_FA_SAVE_AUTH_L OG	NEW	This is to save the authorizer log.
Transaction API	SRV_FA_SAVE_BRANCH _BATCHES	NEW	This is to save branch batch data.
Operation API	SRV_FA_SAVE_BRANXH _INFO	NEW	This is to validate and update branch date Information for the close teller batch.
Transaction API	SRV_FA_SAVE_CHARGE S	NEW	This application programming interface is used to save the charges to domain tables.

Srv Tm Cs Limits Web API	SRV_FA_SAVE_CUSTOM ER	NEW	This application programming interface is used to save the customer limit details.
Transaction API	SRV_FA_SAVE_DENOMI NATIONS	NEW	This application programming interface is used to save the denomination transaction details to domain tables.
Transaction API	SRV_FA_SAVE_MAIN_C HARGES	NEW	This application programming interface is used to save the charges to the main table.
Transaction API	SRV_FA_SAVE_MAIN_D ENOMINATIONS	NEW	This application programming interface is used to save the denomination transaction details to the main table.
Recurring Deposit Operation API	SRV_FA_SAVE_RECURREN G_DEPOSIT	NEW	This application programming interface is used to save the recurring deposit details.
Transaction API	SRV_FA_SAVE_TELLER_ BATCHES	NEW	This application programming interface is used to save the teller batch details.
Transaction API	SRV_FA_SAVE_VAULT_ BATCHES	NEW	This application programming interface is used to save the vault batch details.
Cash Transaction DS API	SRV_FA_SAVECHARGES DS	NEW	This is to save charges.
Clearing Transaction DS API	SRV_FA_SAVECLGCHAR GES	NEW	This is to save clearing charges.
Transaction API	SRV_FA_SAVECLOSEAC COUNT	NEW	This is for on-account closure account submission.
Cash Transaction DS API	SRV_FA_SAVEDENOMD S	NEW	This is to save denominations.

Instrument Transaction API	SRV_FA_SAVEFINALRECORDS	NEW	This is to save final records.
Payment Transaction DS API	SRV_FA_SAVEFTCHARGES	NEW	This is to save fund transfer transaction charges.
Payment Transaction DS API	SRV_FA_SAVEFTDENOMINATION	NEW	This is to save a fund transfer transaction denomination.
Payment Transaction DS API	SRV_FA_SAVEFTTRANSACTION	NEW	This is to save fund transfer transactions.
Instrument Transaction API	SRV_FA_SAVEINSTUDETAILS	NEW	This is to save additional instrument details.
Payment Transaction DS API	SRV_FA_SAVEPC	NEW	This is to save the payment transaction details.
Instrument Transaction API	SRV_FA_SAVERECORDS	NEW	This is to save instrument details.
Travelers Cheque Transaction API	SRV_FA_SAVETCDENOM	NEW	This is to save tc denominations.
TD Redemption API	SRV_FA_SAVETDREDEMPTION	NEW	This is to save term deposit redemption data.
TD Topup API	SRV_FA_SAVETDTOPUPDENOMINATION	NEW	This is to save a term deposit redemption top-up denomination.
Customer TD API	SRV_FA_SAVETERMDEPOSITACC	NEW	This is to create a term deposit.
Customer TD API	SRV_FA_SAVETERMDEPOSITACCLINK	NEW	This is to Save the electronic journal log by source reference number.

Customer TD API	SRV_FA_SAVETERMDEP OSITACCOUNTROLLOVE R	NEW	This is to save a term deposit account rollover data.
Customer TD API	SRV_FA_SAVETERMDEP OSITDENOMINATION	NEW	This is to save term deposit denomination.
Customer TD API	SRV_FA_SAVETERMDEP OSITPAYINDTLS	NEW	This is to save term deposit pay-in details.
Customer TD API	SRV_FA_SAVETERMDEP OSITPAYOUT	NEW	This is to save term deposit pay-out details.
TDTopup API	SRV_FA_SAVETOPUPIN FO	NEW	This is to save term deposit top-up information.
Transaction API	SRV_FA_SELLCASH_TO _CURRENCYCHEST	NEW	Screen mapping of sell cash to currency chest.
Account Closure API	SRV_FA_SGETBYIDD	NEW	Retrieves the account data by account number.
Customer Address Update API	SRV_FA_SMODIFYCUST OMERK	NEW	This application programming interface is used to update the customer address details.
Stop Card Request API	SRV_FA_STOP_CARD_S AVE	NEW	This application programming interface is used to save a stop credit card request data.
Stop Card Request API	SRV_FA_STOP_CARD_S UBMIT	NEW	This application programming interface is used to create a stop credit card request data.
Transaction API	SRV_FA_STOP_CHECK	NEW	This is to stop the cheque request.
Transaction Api	SRV_FA_STOP_CHEQUE _BOOK	NEW	This is to stop cheque book requests.

Transaction API	SRV_FA_STOPCARD_REQUEST	NEW	This application programming interface is used to create a stop credit card request.
API	SRV_FA_SUBMIT	NEW	Adds a new orchestrator. Add additional information here for this endpoint.
Transaction API	SRV_FA_SUBMIT_PASSBOOK_STATUS_CHANGE	NEW	This application programming interface is to submit a passbook status change.
Transaction API	SRV_FA_SUBMIT_RD	NEW	This application programming interface is to submit a recurring deposit.
Recurring Deposit Operation API	SRV_FA_SUBMIT_RECURRING_DEPOSIT	NEW	This is to submit the recurring deposit.
TD Redemption API	SRV_FA_SUBMITTDREDEMPTION	NEW	This is to This electronic journal log by source reference number.
Customer TD API	SRV_FA_SUBMITTERMD EPOSIT	NEW	This application programming interface submits a new term deposit.
Srv Tm Bc Role Limit Master Web API	SRV_FA_SUPERVISOR_ROLE	NEW	This application programming interface is used to get the supervisor's role.
Travelers Cheque Transaction API	SRV_FA_TC_BUY_FROM_AGENT	NEW	This is to buy TC from the agent.
Travelers Cheque Transaction API	SRV_FA_TC_BUY_FROM_HO	NEW	This is to buy TC from Ho.
Travelers Cheque Transaction API	SRV_FA_TC_BUY_FROM_VAULT	NEW	This is to buy TC from Vault.

Travelers Cheque Transaction API	SRV_FA_TC_DENOM_BY_SERIES	NEW	This is to application programming interface electronic journal log by source reference number.
Travelers Cheque Transaction API	SRV_FA_TC_DENOM_ENQ	NEW	This application programming interface is to get the TC denomination inquiry details.
Travelers Cheque Transaction API	SRV_FA_TC_DENOM_ENQUIRY	NEW	This is to TC denomination inquiry.
Travelers Cheque Transaction API	SRV_FA_TC_DTLS	NEW	This is to get TC details to close the teller batch or vault batch.
Travelers Cheque Transaction API	SRV_FA_TC_FETCH	NEW	This application programming interface is to fetch traveller's cheque transaction details.
Travelers Cheque Transaction API	SRV_FA_TC_HOST_HANDOFF	NEW	Traveller's cheque transaction host handoff application programming interface.
webTravelers Cheque Transaction API	SRV_FA_TC_PAYMENT_SUBMIT	NEW	Travelers Cheque Transaction save application programming interface.
Travelers Cheque Transaction API	SRV_FA_TC_PUR_ACC	NEW	This is to TC purchase by account.
Travelers Cheque Transaction API	SRV_FA_TC_PURCHASE_WALKIN	NEW	This is to tc purchase a walk-in.
Travelers Cheque Transaction API	SRV_FA_TC_SAL_ACCGL	NEW	This is for the TC sale by other modes.
Travelers Cheque Transaction API	SRV_FA_TC_SALE_TO_HO	NEW	This is to sell TC to Ho.

Travelers Cheque Transaction API	SRV_FA_TC_SALE_WALKIN	NEW	This is to tc sale walkin.
Travelers Cheque Transaction API	SRV_FA_TC_SAVE	NEW	This application programming interface is to save a traveller's cheque transaction.
Cheque Status Inquiry API	SRV_FA_TCHEQUESTAT USINQUIRYV	NEW	This application programming interface is to enquire about details about cheque status.
Travelers Cheque Transaction API	SRV_FA_TCPURC_APPROVE	NEW	This is for the TC purchase approval task.
Travelers Cheque Transaction API	SRV_FA_TCPURC_INITIATION_TASK	NEW	This is for the TC purchase initiation task.
Travelers Cheque Transaction API	SRV_FA_TCSALE_APPROVE	NEW	This is for the TC sale approval task.
Teller Branch Parameter Maintenance	SRV_FA_TD_ACCOPEN_AGAINST_CASH	NEW	This is for the TD account opening against cash.
Term Deposit API	SRV_FA_TD_ADP_BOOK_ISLAMIC_TDCONTRACT	NEW	This is to book electronic journal approval records for the adp td contract.
Term Deposit API	SRV_FA_TD_ADP_ISLAMIC_GETACC_CLS	NEW	This is to get electronic journal approval records for the adp class details.
Transaction API	SRV_FA_TD_CMN_ISLAMIC_TDSUBMIT	NEW	This is to Islamic td submit application programming interface.
Transaction API	SRV_FA_TD_OPEN_SUBMIT	NEW	This is to open and submit application programming interface.
Transaction API	SRV_FA_TD_REDEEM_SUBMIT	NEW	This is to redeem the submit application programming interface.

Transaction API	SRV_FA_TD_REDEMPTION_AGAINST_ACCOUNT	NEW	This is to td redemption against the account.
Transaction API	SRV_FA_TD_REDEMPTION_AGAINST_CASH	NEW	This is to td redemption against cash.
External System API	SRV_FA_TD_SAVE	NEW	This is to save the TD service.
Transaction API	SRV_FA_TD_TOPUP_AGAINST_ACCOUNT	NEW	This is for the TD top-up against the account.
Transaction API	SRV_FA_TD_TOPUP_AGAINST_CASH	NEW	This is for the TD top-up against cash.
Transaction API	SRV_FA_TD_TOPUP_SUBMIT	NEW	This application programming interface is to submit the TD top-up.
Resource Orchestrator Service API	SRV_FA_TD_VALIDATE	NEW	This application programming interface is to validate a TD top-up.
Branch Param API	SRV_FA_TELLER_AUTH_QUERY	NEW	Retrieves the teller branch maintenance record by given ID.
Branch Param API	SRV_FA_TELLER_AUTH_ORIZE	NEW	Authorize the teller branch maintenance record by given ID.
Branch Param API	SRV_FA_TELLER_BRANCH_PARAM_REJECT	NEW	This is to reject the teller branch maintenance record by the given ID.
Branch Param API	SRV_FA_TELLER_CLOSE_RECORD	NEW	This is to close the teller branch maintenance record by given ID.
Branch Param API	SRV_FA_TELLER_DELETE	GET	This is to delete the teller branch maintenance record by the given ID.

Branch Param API	SRV_FA_TELLER_GET_HISTORY	NEW	Retrieves the teller branch maintenance record by the ID.
Branch Param API	SRV_FA_TELLER_GETALL	NEW	This is to get all valid teller branch maintenance.
Branch Param API	SRV_FA_TELLER_GETALL_MENU	NEW	This is to get all valid teller branch maintenance.
Branch Param API	SRV_FA_TELLER_GETBYID	NEW	Retrieves the teller branch maintenance record by the ID.
Branch Param API	SRV_FA_TELLER_MODIFY_RECORD	NEW	This is to Update the electronic journal log by source reference number.
Transaction Api	SRV_FA_TELLER_PREDICTION	NEW	This is to teller prediction.
Branch Param API	SRV_FA_TELLER_REOPEN_RECORD	NEW	Reopen the teller branch maintenance record by the ID.
Branch Param API	SRV_FA_TELLER_SAVE_RECORD	NEW	This is to Add an electronic journal log by source reference number.
Maintenance API	SRV_FA_TELLER_SEQ_PREFIX	NEW	This application programming interface gets the system parameter maintained.
Branch Param API	SRV_FA_TELLER_TOTALS_POSITION	NEW	This application programming interface is used to get the teller totals position.
Clearing Transaction DS API	SRV_FA_TELLERCLGTRANSACTIONSUBMIT	NEW	This application programming interface is to submit a teller clearing transaction.
Payment Transaction DS API	SRV_FA_TELLERFTTRANSACTION	NEW	This application programming interface is for the teller fund transfer transaction.

Cash Transaction DS API	SRV_FA_TELLERSUBMIT TRSO	NEW	This application programming interface is used to save the transaction details to domain tables.
Transaction API	SRV_FA_TERM_DEPOSIT T_SUBMIT	NEW	This is to term deposit submit.
Customer Chequebook Request API	SRV_FA_TGETWORKDE TAILSU	NEW	This is to Get an electronic journal log by source reference number.
Transaction API	SRV_FA_TILL_GET_Curr entOpenTill	NEW	This is to get the current open till results.
Transaction API	SRV_FA_TILL_VAULT_P OSITION	NEW	This application programming interface is used to get the till vault position.
Transaction API	SRV_FA_TILLBALANCE	NEW	This is to Get an electronic journal log by source reference number.
Account Statement Request API	SRV_FA_TINTIATEACCS TMTFUBSREQP	NEW	This application programming interface is used to fetch the Account statement from FCUBS.
Transaction API	SRV_FA_TLR_TXN_GET	NEW	This is to Get an electronic journal log by source reference number.
TDTopup API	SRV_FA_TOPUPSUBMIT	NEW	This application programming interface is used to save the TD top-up details to the domain tables.
Transaction API	SRV_FA_TRANSACTION _ACQUIRELOCK	NEW	This application programming interface is used to lock transactions using transaction reference numbers.
Transaction API	SRV_FA_TRANSACTION _AUTHORISE	NEW	This application programming interface is used to authorize the transaction.

Transaction API	SRV_FA_TRANSACTION _AUTHORISE_ISSUEINS TRACC	NEW	This application programming interface is used to authorize the OBPAY transaction.
Transaction API	SRV_FA_TRANSACTION _AUTHORISE_ISSUEINS TRTILLACC	NEW	This application programming interface is used to authorize the OBPAY transaction.
Transaction API	SRV_FA_TRANSACTION _AUTHORISE_LIQDINST RACC	NEW	This application programming interface is used to authorize the OBPAY transaction.
Transaction API	SRV_FA_TRANSACTION _AUTHORISE_LIQDINST RTILLACC	NEW	This application programming interface is used to authorize the OBPAY transaction.
Transaction API	SRV_FA_TRANSACTION _AUTHORISE_OBPAYAC C	NEW	This application programming interface is used to authorize the OBPAY transaction.
Transaction API	SRV_FA_TRANSACTION _AUTHORISE_OBPAYAC CTILL	NEW	This application programming interface is used to authorize the OBPAY transaction.
Transaction API	SRV_FA_TRANSACTION _CASHDEPOSIT	NEW	This is to This electronic journal log by source reference number.
Transaction API	SRV_FA_TRANSACTION _OPENCHECK	NEW	This application programming interface is used for the open check and defaulting.
API	SRV_FA_TRANSACTION _PENDING_APPROVAL	NEW	This is to This electronic journal log by source reference number.
Transaction API	SRV_FA_TRANSACTION _PENDINGAPPROVAL	NEW	This is to This electronic journal log by source reference number.

Transaction API	SRV_FA_TRANSACTION_RELEASELOCK	NEW	This application programming interface is used to release transaction lock.
API	SRV_FA_TRANSACTION_REVERSAL	NEW	This is to This electronic journal log by source reference number.
Transaction API	SRV_FA_TRANSFERCASH_FROM_TILL	NEW	This is to transfer cash from the till.
Transaction API	SRV_FA_TRANSFERCASH_FROM_VAULT	NEW	This is to transfer cash from the vault.
Transaction API	SRV_FA_TRANSFERCASH_TO_TILL	NEW	This is to transfer cash to the till.
Transaction API	SRV_FA_TRANSFERCASH_TO_VAULT	NEW	This is to transfer cash to the vault.
CustomerAddress API	SRV_FA_TUPDATEM	NEW	This application programming interface is used to update the customer address.
Passbook Update API	SRV_FA_TUPDATEPASSBOOKY	NEW	This is to This electronic journal log by source reference number.
OBPay API	SRV_FA_TUPDATER	NEW	This application programming interface is used to update the OBPAY transaction details.
Transaction Api	SRV_FA_TX_END_TELLER_SESSION_TXN	NEW	This is to Screen electronic journal approval records for the end teller session.
Transaction API	SRV_FA_TX_GET_END_TELLER	NEW	This is to get the records for the end teller.
Transaction API	SRV_FA_TX_GET_SAVE_TLR_SES_CCY_MAS	NEW	This is to This electronic journal approval records for the tlr currency denominations..

Transaction API	SRV_FA_TX_SAVE_LARGE_DENOM_TXN	NEW	This is to This electronic journal approval records for the save large denominations.
Transaction API	SRV_FA_TX_SAVE_TELLER_SESSION_BENCIF_TXN	NEW	This is to This electronic journal approval records for the teller domain tables.
Transaction API	SRV_FA_TX_SAVE_TELLER_SESSION_EXECCIF_TXN	NEW	This is to This electronic journal approval records for the teller domain tables.
Transaction API	SRV_FA_TX_SAVE_TELLER_SESSION_MAIN_TXN	NEW	This is to This electronic journal approval records for the teller domain tables.
Transaction API	SRV_FA_TX_SAVE_TELLER_SESSION_MULTI_TXN	NEW	This is to This electronic journal approval records for the teller domain tables.
Transaction API	SRV_FA_TX_SAVE_TELLER_SESSION_TXN	NEW	This is to Save electronic journal approval records for the save session transaction.
Transaction API	SRV_FA_TX_SUBMIT_TELLER_SESSION_TXN	NEW	This is to Final electronic journal approval records for the submit session transaction.
Transaction API	SRV_FA_TX_TELLER_SESSION_GETSSNID	NEW	This application programming interface is used to fetch the teller session information.
Transaction API	SRV_FA_TXN_CASH_PENDING_APP	NEW	This application programming interface is used for the account closure by cash approval submission.
Transaction API	SRV_FA_TXN_CMN_CC_INWARD	NEW	This is for credit card inward clearing.

Transaction API	SRV_FA_TXN_CMN_PENDING_APP	NEW	This application programming interface is to submit the account closure common pending requests.
Transaction API	SRV_FA_TXN_MULTIBC_ISSUE_PENDING	NEW	This is the Multi BC issuance pending submission application programming interface.
Transaction API	SRV_FA_TXN_MULTIBC_ISSUE_SUBMIT	NEW	This is for multi-issue transactions.
Transaction API	SRV_FA_TXN_PENDING_CASH_REMITTANCE_ISSUE	NEW	application programming interface electronic journal approval records for the pending host.
Transaction API	SRV_FA_TXN_PENDING_CASH_REMITTANCE_OPERATION	NEW	This is to application programming interface electronic journal approval records for the pending host.
Transaction API	SRV_FA_TXN_PENDING_CHEQUE_RETURN	NEW	This application programming interface is to submit a cheque return transaction on the authorization and handoff data to the host.
Branch User Limits Maintenance	SRV_FA_TXN_PENDING_OUTWARD_CLEARING	NEW	This application programming interface is to submit outward clearing transactions on the authorization and handoff data to the host.
Transaction API	SRV_FA_TXN_RETRY_OUTWARD_CLEARING	NEW	This is to application programming interface electronic journal log by source reference number.
Transaction API	SRV_FA_TXN_SUBMIT_BILL_PAY	NEW	This application programming interface is to submit the bill payment by cash transaction.

Transaction API	SRV_FA_TXN_SUBMIT_C ASH_REMITTANCE_ISSU E	NEW	application programming interface electronic journal approval records for the submission to the host.
Transaction API	SRV_FA_TXN_SUBMIT_C ASH_REMITTANCE_OPE RATION	NEW	This is to application programming interface electronic journal approval records for the submission to the host.
Transaction API	SRV_FA_TXN_SUBMIT_C HEQUE_RETURN	NEW	This application programming interface is to submit a cheque return transaction to the Oracle Banking Payments Management host system.
Transaction API	SRV_FA_TXN_SUBMIT_ MODIFYCHEQUEBOOKR EQ	NEW	This application programming interface is to modify the cheque book status.
Utility Provider Maintenance	SRV_FA_TXN_SUBMIT_ OUTWARD_CLEARING	NEW	This is to application programming interface electronic journal log by source reference number.
Utility Provider Maintenance	SRV_FA_TXN_SUBMIT_T ravelers_Cheque	NEW	This application programming interface is to submit a traveller's cheque transaction to the Oracle Banking Payments Management host system.
Utility Provider Maintenance	SRV_FA_UNAUTHORIZE _CUSTOMER	NEW	Retrieves the customer service maintenance record by given ID.
Utility Provider Maintenance	SRV_FA_UPDATE_AUTH ORISER	NEW	This application programming interface is to update the authorizer for a record in the EJ log.
Utility Provider Maintenance	SRV_FA_UPDATE_CHEQ _STATUS	NEW	This application programming interface is to update the cheque status.

Utility Provider Maintenance	SRV_FA_UPDATE_EJ_O B_STTS	NEW	This application programming interface updates the records from the EJ log table for the inputted EJ ID.
Utility Provider Maintenance	SRV_FA_UPTXNCONTR OL	NEW	This application programming interface is to update the transaction controller status as completed.
Utility Provider Maintenance	SRV_FA_USER_AUTHOR IZE	NEW	This is to Authorize the user-maintenance by given ID.
Utility Provider Maintenance	SRV_FA_USER_AUTHQU ERY	NEW	Retrieves the user maintenance by given ID.
Utility Provider Maintenance	SRV_FA_USER_CLOSE	NEW	Close the user maintenance by given ID.
Utility Provider Maintenance	SRV_FA_USER_DELETE	GET	This is to delete the electronic journal log by source reference number.
Utility Provider Maintenance	SRV_FA_USER_HISTOR Y	NEW	Retrieves the user preferences for user IDs open for the current branch date.
User Preferences API	SRV_FA_USER_PREF_B YID	NEW	Get user preferences by ID.
User Preferences API	SRV_FA_USER_PREF_G ET	NEW	This is to get all valid user maintenance.
User Preferences API	SRV_FA_USER_PREF_G ET_MENU	NEW	This is to get all valid user maintenance.
User Preferences API	SRV_FA_USER_PREF_G ETBY_ID	NEW	Retrieves the user maintenance by ID.

User Preferences API	SRV_FA_USER_PREF_POST	NEW	Adds a new user maintenance.
User Preferences API	SRV_FA_USER_PREF_PUT	AUTHORIZE	This is to modify user preferences.
User Preferences API	SRV_FA_USER_PREF_ROLE	INQUIRY	Get user preferences by till/vault indicator.
User Preferences API	SRV_FA_USER_REOPEN	CLOSE	This is to open the user.
User Preferences API	SRV_FA_USER_VALIDATE_LOV	DELETE	This is to validate the user.
User Preferences API	SRV_FA_USER_VIEWCHANGES	GET	This is to Screen the electronic journal log by source reference number.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_UTILITYPROV_GETAL_MENU	GET	Get all valid provider maintenance.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_UTILITYPROVIDER_AUTHORIZE	GET	This is to Authorize electronic journal log by source reference number.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_UTILITYPROVIDER_AUTHQUERY	UNLOCK	This is to retrieve the electronic journal log by source reference number.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_UTILITYPROVIDER_CLOSERECORD	REJECT	This is to close the electronic journal log by source reference number.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_UTILITYPROVIDER_DELETE	REOPEN	This is to delete the electronic journal log by source reference number.

Srv Tm Bc Provider Maintenance Web API	SRV_FA_UTILITYPROVIDER_GETALL	SAVE	Get all valid provider maintenance.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_UTILITYPROVIDER_GETBYID	GET	Retrieves the provided maintenance by ID.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_UTILITYPROVIDER_GETHISTORY	NEW	Retrieves the provided maintenance by ID.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_UTILITYPROVIDER_MODIFYRECORD	NEW	This is to Reject the electronic journal log by source reference number.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_UTILITYPROVIDER_REJECT	NEW	This is to reject.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_UTILITYPROVIDER_REOPENRECORD	NEW	Reopens the provider maintenance by given ID.
Srv Tm Bc Provider Maintenance Web API	SRV_FA_UTILITYPROVIDER_SAVERECORD	NEW	Adds a new provider maintenance.
Poller Detail API	SRV_FA_UTILS_POLLER_FLAG	NEW	This is to set the polar flag.
Cheque Status Inquiry API	SRV_FA_VALIDATE_CHEQUE	NEW	This is to validate the FCUBS cheque status.
Customer Limits Validation API	SRV_FA_VALIDATE_CUS_LIMITS	NEW	This application programming interface is used to validate the customer limits.
Maintenance API	SRV_FA_VALIDATE_FUNCTION	NEW	This application programming interface is used to set default values and perform common validations.

Operation API	SRV_FA_VALIDATE_PND_TXN	NEW	This is to validate pending txn.
Operation API	SRV_FA_VALIDATE_TELLER_ROLE	NEW	This is to validate the teller role.
Operation API	SRV_FA_VALIDATE_VAULT_ROLE	NEW	This is to validate the vault.
Customer Address API	SRV_FA_VGETBYTXNREFNOS	NEW	This application programming interface is used to get the transaction-by-transaction reference number.
Account Balance API	SRV_FA_WGETRESPONSEMODELRESPONSEENTITYT	NEW	This is to get a response from the response model.
Passbook Update API	SRV_FA_WGETSTATUSH	NEW	This is to retrieve the electronic journal log by source reference number.
Transaction Api	SRV_FA_WITHDRAWAL_BY_ACCOUNT	NEW	This is for the closeout withdrawal by account.
Transaction Api	SRV_FA_WITHDRAWAL_BY_CASH	NEW	This is for the closeout withdrawal by cash.
Passbook Status Req API	SRV_FA_WSAVEW	NEW	This application programming interface is used to save a passbook status request.
Customer Cheque Book Stop API	SRV_FA_WSUBMITS	NEW	This application programming interface is used to submit the request for a stop the cheque book.
Transaction API	SRV_FA_WVALIDATEACCOUNTNUMBERC	NEW	This application programming interface is used to validate the account number.

VAM API	SRV_FA_WVAMCALLSAV EI	NEW	This application programming interface is used to save the VAM data.
Cheque Book Req API	SRV_FA_XCREATECHEQ UEBOOKREQE	NEW	This application programming interface is used to submit the create cheque book request.
TdTopUp API	SRV_FA_XCREATETDTO PUPV	NEW	This adapter services application programming interface is to create a TD top-up request.
Customer Contact Update API	SRV_FA_XGETBYTXNRE FNON	NEW	This application programming interface is used to get the transaction data by transaction reference number.
Customer Cheque Book Stop API	SRV_FA_XSAVER	NEW	This application programming interface is used to stop the cheque book request.
Passbook Status Req API	SRV_FA_YGETOLDPASS BOOKS	NEW	Retrieves the old passbook request data by account number.
Passbook Req API	SRV_FA_ZGETSTATUSB	NEW	Retrieves the passbook request data by ID.
Passbook Status Req API	SRV_FA_ZGETWORKDE TAILSC	NEW	Gets the worktable details of a passbook status request.
Passbook Req API	SRV_FA_ZGETWORKDE TAILSU	NEW	Gets the worktable details of a passbook request.
Transaction API	SRV_FA_ZSAVECHARGE SY	NEW	This application programming interface is used to save the charge details of the transaction to the domain tables.
Passbook Status Req API	SRV_FA_ZSUBMITX	NEW	This is to Update the electronic journal log by source reference number.

Customer Cheque Book Stop API	SRV_FA_ZUPDATEI	NEW	This is to update.
Transaction API	SRV_FD_CH_USERSPOS ITIONS	New	This is to save a function code definition for user positions.
Transaction API	SRV_SA_GET_BRANCH_ ACCOUNT_FUNC_TXN_ CCY	Query	This is to get electronic journal approval records for the account transaction currency.
Transaction API	SRV_SA_TXN_CMN_PEN DING_APP	New	This is to submit a transaction from the pending approval queue.

## 4 Annexure 2 – Error Codes and Messages

This Annexure describes the error codes and messages that are available for the Branch Teller application. The error codes with prefix GCS are applicable only to the maintenance screens, and the remaining error codes are applicable to all the transaction screens. The details are as follows:

### Annexure 2: Error Codes and Messages

Error Code	Message
CLMO-AC-003	Source stage value should be either Y/N not valid
CLMO-AC-017	DatasegmentCode not valid
CLMO-AC-018	DocumentType Code not valid
CLMO-AC-020	Life cycle not valid
CLMO-AC-023	Unable to \$1 Business Process as \$2 data segment has the following dependencies \$3 in lifecycle \$4
CLMO-AC-024	Unable to \$1 Business Process as the mandatory data segments \$2 for the \$3 lifecycle have not been mapped!
CLMO-AC-026	In \$1 stage of \$2 Business Process
CLMO-AC-027	Record already exist with same Lifecycle and Business Product
CLMO-AC-028	At \$1 in \$2 stage of \$3 Business Process
CLMO-AC-029	At \$1 in \$2 stage of \$3 Business Process
CLMO-AC-030	Business Product Code is Invalid
GCS-AUTH-01	Record Successfully Authorized
GCS-AUTH-02	Valid modifications for approval were not sent. Failed to match

Error Code	Message
GCS-AUTH-03	Maker cannot authorize
GCS-AUTH-04	No valid unauthorized modifications found for approval.
GCS-CLOS-002	Record Successfully Closed
GCS-CLOS-01	Record Already Closed
GCS-CLOS-02	Record Successfully Closed
GCS-CLOS-03	Unauthorized record cannot be closed
GCS-COM-001	Record does not exist
GCS-COM-002	Invalid version sent
GCS-COM-003	Please Send Proper ModNo
GCS-COM-004	Please send makerId in the request
GCS-COM-005	Request is Null. Please Resend with Proper Values
GCS-COM-006	Unable to parse JSON
GCS-COM-007	Request Successfully Processed
GCS-COM-008	Modifications should be consecutive.
GCS-COM-009	Resource ID cannot be blank or "null".
GCS-COM-010	You have successfully cancelled \$1.
GCS-COM-011	Argghhh, \$1 failed to update.

Error Code	Message
GCS-DEL-001	Record deleted successfully
GCS-DEL-002	Record(s) deleted successfully
GCS-DEL-003	Modifications didnt match valid unauthorized modifications that can be deleted for this record
GCS-DEL-004	Send all unauthorized modifications to be deleted for record that is not authorized even once.
GCS-DEL-005	Only Maker of first version of record can delete modifications of record that is not once authorized.
GCS-DEL-006	No valid unauthorized modifications found for deleting
GCS-DEL-007	Failed to delete. Only maker of the modification(s) can delete.
GCS-MOD-001	Closed Record cannot be modified
GCS-MOD-002	Record Successfully Modified
GCS-MOD-003	Record marked for close
GCS-MOD-004	Only maker of the record can modify before once auth
GCS-MOD-005	Not amendable field
GCS-MOD-006	Natural Key cannot be modified
GCS-MOD-007	Psssttt, only the maker can modify the pending records.
GCS-OPEN-01	Teller Batch Record Already Opened

Error Code	Message
GCS-REOP-003	Successfully Reopened
GCS-REOP-004	Unauthorized record cannot be reopened
GCS-REOP-01	Unauthorized Record cannot be Reopened
GCS-REOP-02	Failed to Reopen the Record
GCS-REOP-03	Successfully Reopened
GCS-SAV-001	Record already exists
GCS-SAV-002	Record Saved Successfully.
GCS-SAV-003	Congratulations!! The record is saved and validated successfully.
GCS-SAV-004	Currency Code should be unique
GCS-SAV-005	Min cash holding should be lesser than Max cash holding
GCS-VAL-001	Congratulations!! Your record is successfully validated.
RM_BC_CV_01	Amount Limit Exceeded for Account Number
RM_BC_CV_02	Amount Limit Exceeded for Customer Type
RM_BC_CV_03	Amount Limit Exceeded for Product Class
RM_BC_MA_01	Netting Charges Required Should be (Y/N).
RM_BC_MA_02	Main Leg Accounting Required Should be (Y/N).
RM_BC_MN_01	Invalid function code for till/vault indicator

Error Code	Message
RM_BC_MN_02	Invalid transaction type for till/vault indicator
RM_BC_OB_08	Please close the previous day batch
RM_BC_OB_09	User is not allowed to open the Teller batch
RM_BC_OB_10	Teller batches should be closed before closing the branch/vault batch
RM_BC_OB_11	Vault batch should be closed before closing the branch batch
RM_BC_TB_10	Teller batch is already opened
RM_BC_TB_11	Teller batch is already closed
RM_BC_VA_01	Supervisor Id is not present for manual assignment.
RM_CS_BC_01	Invalid Instrument No
RM_CS_BC_02	Instrument is already in Used status
RM_CS_BC_03	Instrument is not in INIT status to Print/Reprint
RM_CS_BC_04	Instrument Number Already Liquidate
RM_CS_DD_04	Incorrect DD details
RM_CT_AC_03	Account Type mismatch.... Exception Occured
RM_CT_AC_04	Invalid Account Number
RM_CT_AC_06	Both Account cannot be Customer Accounts
RM-IN-TX-01	Payments Service is not Reachable

Error Code	Message
RM_TR_EX_01	Unhandled Exception Occured
RM_TX_CX_01	Authorization required for Charge Amendment.
RM_TX_EX_01	Authorization required for inter branch Transaction.
RM-AD-EC-01	Failed in ECA
RM-AD-HH-01	Failed in Host Handoff
RM-AD-PM-03	Failed in payment
RM-AD-UB-01	Failed in DDA system
RM-AD-VM-01	Invalid Account Number
RM-AD-VM-02	VAM Service is down
RM-BC-AC-01	Failed in Accounting
RM-BC-BP-01	Please Enter the entire Branch Parameter Detail values
RM-BC-CH-01	Minimum Charge Greeater Than Maximum Charge
RM-BC-CH-02	Please Enter the proper charge code
RM-BC-CH-03	Charge Fields Cannot be empty
RM-BC-CH-04	Please Enter Mininum and Maximum Charges
RM-BC-CP-03	Function code should not be empty
RM-BC-EJ-01	Record Not Found

Error Code	Message
RM-BC-EJ-02	Record Updation Failed..
RM-BC-EX-01	Unhandled Exception Occured
RM-BC-EX-02	Transaction Timed Out
RM-BC-EX-03	Unhandled Exception Occured
RM-BC-ML-01	Email Account not Valid
RM-BC-OB-01	Branch batch is already open for the current date
RM-BC-OB-02	Branch batch can be opened only by supervisor
RM-BC-OB-03	Vault batch is open for the current or previous date
RM-BC-OB-04	User does not have rights to access this screen
RM-BC-OB-05	Teller batch is open for the current or previous date
RM-BC-OB-06	Please complete the pending transactions in the Electronic Journal log
RM-BC-OB-07	Branch batch is not opened
RM-BC-OB-08	Please close the previous day batch
RM-BC-OB-10	Teller batches should be closed before closing the branch/vault batch
RM-BC-OB-11	Vault batch should be closed before closing the branch batch
RM-BC-OB-16	Teller batch is closed
RM-BC-OB-17	Teller batch is not opened for the user

Error Code	Message
RM-BC-OB-18	Teller batch is already open
RM-BC-OB-19	Teller batch is closed
RM-BC-OB-20	Invalid Currency Code
RM-BC-OB-21	Authlimit Breached
RM-BC-OB-22	Transaction limit breached at role level
RM-BC-OB-23	Wrong token
RM-BC-OB-24	Branch batch is already closed
RM-BC-OB-25	Vault batch is already closed
RM-BC-OB-26	User is not allowed to open/close the teller batch
RM-BC-OB-27	Vault batch is not opened
RM-BC-OB-29	Please maintain denomination tracking in Branch Parameter
RM-BC-OB-30	Denomination Amount is not equal to transaction amount
RM-BC-OB-31	Insufficient Amount available in Till/Vault
RM-BC-OB-32	Logged in user ID and Teller Id cannot be same
RM-BC-OB-33	Invalid Input TellerId
RM-BC-OB-34	Current Denomination balance is less than zero for \$1
RM-BC-PM-01	Record Successfully Updated

Error Code	Message
RM-BC-RT-01	Failed in getting the exchange rate
RM-BC-RT-02	Failed to fetch Branch Accounting Tags
RM-BC-TF-01	User not Verified Signature
RM-BC-TF-02	Transaction involves Inter Bank Accounts
RM-BC-TF-03	Default Charge Amount was modified
RM-BC-TF-04	Default Exchange Rate was modified
RM-BC-TF-05	Amount exceeds limit for this transaction
RM-BC-TF-06	Authorisation required. Amount exceeds limit for the transaction
RM-BC-TF-07	Transaction & Electronic Journal ID needs to be Enter..
RM-BC-TF-08	Invalid Txn_Ref_Number found for given EJId
RM-BC-TR-07	Invalid Input!!
RM-BC-UL-01	User Limit Transaction Amount breached
RM-BC-UL-02	Authorizer Limit Transaction Amount breached
RM-BC-UL-03	User Limit Holding Minimum Amount breached
RM-BC-UL-04	User Limit Holding Maximum Amount breached
RM-BC-UP-01	Amount exceeds limit for this transaction
RM-BC-UP-02	Minimum charge amount should be applied

Error Code	Message
RM-BC-UP-03	Amount exceeds limit for this transaction
RM-BC-UP-04	Authorisation amount breached.
RM-BC-UP-05	Till maximum balance breached
RM-BC-UP-06	Till minimum balance breached
RM-BC-UP-07	Authoriser role limit breached
RM-BC-UP-08	Teller role limit breached
RM-BC-UP-09	Transaction requires approval.
RM-BC-UR-01	Submit URL not maintained
RM-BC-VA-01	Till open
RM-BC-VA-02	Vault open
RM-BC-VA-03	Pending txn
RM-BC-VA-10	Invalid Status
RM-BC-XR-01	Exchange not Maintained
RM-BC-XT-01	Failed in getting the exchange rate
RM-CH-LM-01	Channel limit not found for Account class group
RM-CH-LM-02	Channel limit details not found
RM-CH-LM-03	Channel limit details found for transaction currency

Error Code	Message
RM-CH-LM-04	Number of Withdrawal breached
RM-CH-LM-05	Withdrawal Limit breached
RM-CM-OR-001	Failed to initiate.
RM-CM-OR-002	Transaction is successfully initiated.
RM-CM-OR-003	Invalid action
RM-CM-OR-004	\$1 is not submitted
RM-CM-OR-005	Cannot proceed with submit as the action is not initiated.
RM-CM-OR-006	Cannot proceed with submit as the information is incomplete.
RM-CM-OR-007	Failed to submit.
RM-CM-OR-008	Record successfully submitted.
RM-CM-OR-009	\$1 is in-progress
RM-CM-OR-010	Aw, snap! An unexpected exception occurred, try again.
RM-CM-OR-011	Invalid request.
RM-CM-OR-012	Cannot proceed with submit as the action is not initiated.
RM-CM-OR-013	Cannot find the provided information.
RM-CM-OR-014	Record is not yet submitted by \$1
RM-CM-OR-015	Record already unlocked by \$1.

Error Code	Message
RM-CS-OB-01	Invalid denomination found
RM-CS-OB-02	Invalid denomination found for given currency or denomination type
RM-CS-OB-03	Transaction Number Already Exist
RM-CS-OB-04	Data Not Found
RM-CS-OB-05	Amount mismatch
RM-CS-OB-50	SanctionRefNo is already Present.
RM-CS-TF-07	MinCash exceeds the MaxCash Value
RM-CT-AC-01	Charges are not maintained
RM-CT-AC-02	Charges should not be maintained
RM-CT-AC-04	Failed to get the account
RM-EX-CS-01	User is an Invalid User.
RM-EX-CS-02	Account number is invalid.
RM-EX-CS-03	Source Reference Number Already Present
RM-EX-CS-05	NegotiatedExchangeRate is not provided
RM-EX-CS-06	NegotiationReferenceNumber is not provided
RM-EX-PY-05	NegotiatedExchangeRate is not provided
RM-EX-PY-06	NegotiationReferenceNumber is not provided

Error Code	Message
RM-PA-EQ-01	Record not Found.
RM-PY-AC-01	From account and to account are same
RM-PY-AC-02	Account number not entered for field \$1
RM-PY-BC-01	Bank code or bank BIC code not entered
RM-PY-BC-02	Please enter either bank code or bank BIC code
RM-PY-CL-01	Payee account and drawer account are same
RM-PY-CL-02	Drawer account number and instrument number combination are same
RM-PY-CL-03	Invalid Batch Number
RM-PY-CR-01	Remittance number not found
RM-PY-CR-02	Remittance number is already issued/used
RM-PY-CR-03	Please provide Remittance number/Test Key number
RM-PY-CR-04	Invalid Remittance number/Test Key number
RM-PY-CR-05	Remittance numbers are not maintained
RM-PY-CR-06	Maintained remittance numbers are all USED ones
RM-PY-IN-01	Instrument details not found
RM-TD-SL-01	No Maintanance found for Term Deposit opening
RM-TD-SL-02	Offset GL account not found

Error Code	Message
RM-TN-RV-02	The transaction Status should be pending
RM-TR-EX-01	Unhandled Exception Occured
RM-TS-TB-10	Teller batch not opened yet
RM-TX-BE-01	Unhandled Exception Occured
RM-TX-CA-01	Charge amount limit Breached from Min Max Amount
RM-TX-CA-02	Charge amount limit Breached from Min Max Percentage
RM-TX-CC-01	Add provided Currency to the Till
RM-TX-ET-01	Session should be Opened before closing.
RM-TX-ET-02	Amount \$1 \$2 has to be given by the customer.
RM-TX-ET-03	Amount \$1 \$2 has to be given to the customer.
RM-TX-ET-04	The incoming cash amount in the session is exceeding by \$1 \$2.Do you want to proceed.
RM-TX-ET-05	Open Teller Sessions are present. Cannot proceed with the operation.
RM-TX-ET-06	Teller Session Transactions not completed.Cannot proceed with the operation.
RM-TX-EX-01	Unhandled Exception Occured
RM-TX-HH-01	Failed in Host Handoff
RM-TX-LC-01	Transaction is locked

Error Code	Message
RM-TX-LI-00	Amount exceeds the limit of transaction.
RM-TX-NL-01	Unhandled Exception Occured
RM-TX-OC-01	Branch Info not available
RM-TX-OC-02	Function Code definition not maintained
RM-TX-OC-03	Function Code preferences not maintained
RM-TX-OC-04	Branch Parameter maintenance not found
RM-TX-OC-05	User preferences not maintained
RM-TX-OC-06	Default authorizer not maintained for the user
RM-TX-OC-07	Function Indicator entry not found
RM-TX-OC-08	Record status is null in Function Code Definition Screen
RM-TX-OC-09	Record status is closed in Function Code Definition Screen
RM-TX-OC-10	Record status is null in User Preferences Screen
RM-TX-OC-11	Record status is closed in User Preferences Screen
RM-TX-OC-12	Record status is null in Function Code Preferences Screen
RM-TX-OC-13	Record status is closed in Function Code Preferences Screen
RM-TX-PM-01	Transaction status is pending, waiting for the notification from payment system
RM-TX-PM-03	Failed in payment system

Error Code	Message
RM-TX-RV-01	The transaction Status should be completed
RM-TX-RV-02	Only maker can reverse the transaction
RM-TX-RV-03	Authorization required for reversal
RM-TX-RV-04	Minimum teller branch ccy holding limit breached
RM-TX-RV-05	Maximum teller branch ccy holding limit breached
RM-TX-SL-01	Unhandled Exception Occured
RM-TX-ST-01	The incoming cash amount in the session is exceeding by \$1.Do you want to proceed.
RM-TX-ST-02	Total inflow cash amount remaining after this transaction is \$1.
RM-TX-ST-03	Another open session in progress for the entered Customer No
RM-TX-ST-04	Another open session in progress for the Teller
RM-TX-ST-05	Teller session needs to be opened to perform this transaction.
RM-TX-ST-06	This transaction is not allowed inside the teller session
RM-TX-TO-01	Unhandled Exception Occured
RPM-AC-003	Source stage value should be either Y/N not valid
RPM-AC-017	DatasegmentCode not valid
RPM-AC-018	DocumentType Code not valid

Error Code	Message
RPM-AC-020	Life cycle not valid
RPM-AC-023	Unable to \$1 Business Process as \$2 data segment has the following dependencies \$3 in lifecycle \$4
RPM-AC-024	Unable to \$1 Business Process as the mandatory data segments \$2 for the \$3 lifecycle have not been mapped!
RPM-AC-026	In \$1 stage of \$2 Business Process
RPM-AC-027	Record already exist with same Lifecycle and Business Product
RPM-AC-028	At \$1 in \$2 stage of \$3 Business Process
RPM-AC-029	At \$1 in \$2 stage of \$3 Business Process
RPM-AC-030	Business Product Code is Invalid
RT-F23-001	Error. Enter at least one row in Payment Data Details
RT-F23-002	Error. Cannot enter more than eight records in Payment Data Details
RT-F23-006	Error. Mandatory Field Payment Type Cannot be Null.
RT-F23-007	Error. Fiscal Code has to be 11 or 16 character long.
RT-F23-008	Error. Fiscal code does not meet checksum algorithm validations
RT-F23-017	Error. Enter at least one field in either Reference Number Available or Reference Number Not Available.
RT-F23-019	Error. Both Reference Number and Primary fiscal code cannot be null.

Error Code	Message
RT-F23-020	Invalid character entered for Tax Code
RT-F24-099	Payment Amount Cannot be Zero/Negative
RT-F24-101	Payment amount should not Be Blank
RT-F24-114	Principal fiscal code is mandatory
UBS-BC-UB-01	No More Payments
UBS-BC-UB-02	Invalid Settlement Account for the Contract

## 5 Annexure 3 – List of Function Codes

This Annexure lists function codes of all the transaction screens and its respective names for the Oracle Banking Branch application. An exhaustive list of these function codes and their names are given below.

### Annexure 3: List of Function Codes

Function Code	Screen Name
1000	Miscellaneous Transfer
1001	Cash Withdrawal
1002	Cash Withdrawal (Teller Session)
1005	Miscellaneous GL Tranfser
1006	Account Transfer
1007	In-House Cheque Deposit
1008	Miscellaneous Customer Debit
1009	TC Sale Against Account
1010	BC Issue Against Account
1013	Cheque Withdrawal
1014	DD Issue Against Account
1025	Bill Payment by Cash
1060	Miscellaneous GL Debit
1075	Bill Payment by Account

<b>Function Code</b>	<b>Screen Name</b>
1320	Close-out Withdrawal by Account
1321	Close-out Withdrawal by Cash
1401	Cash Deposit
1403	Cash Deposit (Teller Session)
1404	Domestic Transfer Against Account
1405	Domestic Transfer Against Walk-in
1406	International Transfer Against Account
1407	International Transfer Against Walk-in
1408	Miscellaneous Customer Credit
1409	Interbranch Transaction Request
1410	Interbranch Transaction Input
1411	Interbranch Liquidation Input
1412	TC Purchase Against Account
1421	RD Payment by Cash
1460	Miscellaneous GL Credit
1461	Credit Card Advance by Cash
1462	Credit Card Advance by Transfer

Function Code	Screen Name
1471	Credit Card Payment by Cash
1472	Credit Card Payment
1472CA	Credit Card Payment by Account
1472CG	Credit Card Payment by Clearing Cheque
3401	Safe Deposit Rental by Cash
5001	Loan Disbursement by Cash
5401	Loan Repayment by Cash
5402	Murabaha Payment by Cash
5403	Islamic Down Payment by Cash
5404	Loan Repayment by Cash (Teller Session)
5555	Inward Clearing Data Entry
6001	Open Branch Batch
6002	Close Branch Batch
6005	Electronic Journal
6501	Cheque Deposit (Account)
6514	Outward Clearing Data Entry
6520	Cheque Deposit (GL)

Function Code	Screen Name
6560	Cheque Return
7001	Open Vault Batch
7002	Close Vault Batch
7005	Servicing Journal
7010	Passbook Update
7011	Passbook Reprint
7030	Passbook Issue
7031	Passbook Status Change
7040	Teller Total Position
7551	Book Shortage
7552	Book Overage
7787	Multi BC Issuance (Account)
7788	Multi BC Issuance (Cash)
8003	TC Purchase Against Walk-in
8004	FX Purchase Against Walk-in
8008	FX Purchase Against Walk-in (Teller Session)
8203	FX Sale Against Walk-in

Function Code	Screen Name
8204	FX Sale Against Walk-in (Teller Session)
8205	TC Sale Against GL
8206	FX Sale Against Account
8207	FX Purchase against Account
8222	TC Sale Against Walk-in
8301	BC Issue Against Walk-in
8302	BC Issue Against GL
8305	DD Issue Against Walk-in
8306	DD Issue Against GL
8316	Cash Remittance Issue (Cash)
8317	Cash Remittance Issue (GL)
8318	Cash Remittance Issue (Account)
8319	Cash Remittance Operations (Inquiry)
8320	Cash Remittance Operations (Payment – Account)
8321	Cash Remittance Operations (Payment – Cash)
8322	Cash Remittance Operations (Payment – GL)
8324	Cash Remittance Operations (Refund – Account)

Function Code	Screen Name
8325	Cash Remittance Operations (Refund – Cash)
8326	Cash Remittance Operations (Refund – GL)
8327	Cash Remittance Operations (Cancel – Account)
8328	Cash Remittance Operations (Cancel – Cash)
8329	Cash Remittance Operations (Cancel – GL)
8330	Inward Cash Remittance
8450	DD Operations
8550	BC Operations
9001	Open Teller Batch
9002	Close Teller Batch
9005	Buy Cash from Till
9006	Sell Cash to Till
9007	Buy Cash from Vault
9008	Sell Cash to Vault
9009	Buy Cash from Currency Chest
9010	Sell Cash to Currency Chest
9011	Buy TC From Agent

Function Code	Screen Name
9012	Current Open Tills
9015	Buy TC From HO
9016	Return TC to HO
9017	Buy TC From Vault
9018	Return TC to Vault
9020	View Available TC with Vault
9401	Start Teller Session
9402	Stop Teller Session
AADU	Account Address Update
ACBL	Account Balance Inquiry
ACST	Account Statement Request
BCRP	BC Print-Reprint
CADU	Customer Address Update
CCTU	Customer Contact Details Update
CDBK	Stop Card
CQIN	Cheque Status Inquiry
CQRQ	Cheque Book Request

Function Code	Screen Name
CQSC	Cheque Book Status Change
CQST	Stop Cheque Request
DDRP	DD Print-Reprint
DNEX	Denomination Exchange
F23A	F23 Tax Payment by Account
F23C	F23C Tax Payment by Cash
F24A	F24 Tax Payment by Account
F24C	F24C Tax Payment by Cash
REAN	Reassign Transactions
TDI1	Islamic TD Account Opening
TDO1	TD Account Opening
TDR1	TD Redemption Against Cash
TDR2	TD Redemption Against Account
TDT1	TD Top-Up Against Cash
TDT2	TD Top-Up Against Account
TVQB	Branch Breaching Limits
TVQR	Till Vault Position

## 6 Annexure 4 – Advices

This Annexure describes the advices that are available for the Branch Teller application. The formats of the advices are given in the following sections:

- [6.1 Account Transfer](#)
- [6.2 Cash Deposit](#)
- [6.3 Cash Withdrawal](#)
- [6.4 Cheque Deposit](#)
- [6.5 Cheque Withdrawal](#)
- [6.6 DD Issue Against Account](#)
- [6.7 Domestic Transfer Against Account](#)

### 6.1 Account Transfer

The advice format for Account Transfer transaction is given below:

#### **TRANSACTION RECEIPT**

txnDate            txnBranchCode, Clinton Branch

Receipt # txnRefNumber

-----

Transaction            : functionCodeDesc

Sequence Number      : tellerSeqNumber

From Account Number: fromAccountNumber

To Account Number    : toAccountNumber

Amount                : toAccountAmt toAccountCcy

Commission Charges : totalCharges toAccountCcy

Narrative              : narrative

Teller ID              : userId

-----

(This slip do not require signature)

## 6.2 Cash Deposit

The advice format for Cash Deposit transaction is given below:

## TRANSACTION RECEIPT

txnDate            txnBranchCode, Clinton Branch

Receipt # txnRefNumber

---

Transaction : functionCodeDesc

Sequence Number : tellerSeqNumber

Account Number : toAccountNumber

Amount : toAccountAmt toAccountCcy

Narrative : narrative

Teller ID : userId

Total Charges : totalCharges toAccountCcy

chargeCode	chargeCcy	chargeAmt
F chargeCode	chargeCcy	chargeAmt E

---

Teller

Officer/Manager

### 6.3 Cash Withdrawal

The advice format for Cash Withdrawal transaction is given below:

## TRANSACTION RECEIPT

txnDate            txnBranchCode, Clinton Branch

Receipt # txnRefNumber

Transaction : functionCodeDesc

Sequence Number : tellerSeqNumber

Account Number : fromAccountNumber

Amount : fromAccountAmt fromAccountCcy

Commission Charges : totalCharges fromAccountCcy

Narrative : narrative

Teller ID : userId

chargeAmt	chargeCcy	chargeCode
F chargeAmt	chargeCcy	chargeCode E

Teller

Officer/Manager

## 6.4 Cheque Deposit

The advice format for Cheque Deposit transaction is given below:

## TRANSACTION RECEIPT

Receipt #txnRefNumber

txnDate            txnBranchCode, Clinton Branch

Transaction : functionCodeDesc

Sequence Number : tellerSeqNumber

Account Number : toAccountNumber

Cheque Number : chequeNumber

Routing Number : routingNo

Amount : toAccountAmt toAccountCcy

Commission Charges : totalCharge toAccountCcy

Narrative : narrative

Teller ID : userId

Teller

Officer/Manager

## 6.5 Cheque Withdrawal

The advice format for Cheque Withdrawal transaction is given below:

## TRANSACTION RECEIPT

txnDate	txnBranchCode, Clinton Branch
---------	-------------------------------

Receipt # txnRefNumber

Transaction : functionCodeDesc

Sequence Number : tellerSeqNumber

Account Number : fromAccountNumber

Amount : fromAccountAmt fromAccountCcy

Commission Charges : totalCharges fromAccountCcy

Narrative : narrative

Teller ID : tellerId

Teller \_\_\_\_\_ Officer/Manager \_\_\_\_\_

### 6.6 DD Issue Against Account

The advice format for DD Issue Against Account transaction is given below:

**TRANSACTION RECEIPT**

txnDate            txnBrnCode, Clinton Branch

Receipt # txnRefNo

-----

Transaction            : functionCodeDesc

Sequence Number       : tellerSeqNumber

Account Number        : fromAccNo

In favour of           : payeeName

Amount                : fromAccAmt fromAccCcy

Commission Charges   : totalCharges fromAccountCcy

Narrative             : narrative

Teller ID              : userId

-----

(This slip do not require signature)

### 6.7 Domestic Transfer Against Account

The advice format for Domestic Transfer Against Account transaction is given below:

**TRANSACTION RECEIPT**

txnDate            txnBranchCode, Clinton Branch

Receipt # txnRefNumber

-----

Transaction	: functionCodeDesc
Sequence Number	: txnSeqNumber
Account Number	: fromAccountNumber
Beneficiary Bank	: bankDesc
Beneficiary Name	: txnCustomer
Clearing Type	: FEDWIRE
Transfer mount	: fromAccountAmt fromAccountCcy
Commission Charges	: totalCharges fromAccountCcy
Narrative	: narrative
Teller ID	: userId

-----

(This slip do not require signature)

## 7 Annexure 5 – Order of Replacement of Parameters with Wild Card Entries

This Annexure provides the order of replacement of parameters with wild card entries for the Accounting and Settlements Definition and Charge Decision Maintenance. The details are given below.

### Annexure 5: Order of Replacement of Parameters with Wild Card Entries (Accounting and Settlements Definition)

Function Code	Branch	Currency
Function Code	Txn Branch	Txn Currency
Function Code	*.*	Txn Currency
Function Code	Txn Branch	*.*
Function Code	*.*	*.*

### Annexure 5: Order of Replacement of Parameters with Wild Card Entries (Charge Pickup)

Function Code	Txn Branch	Txn Currency	Inter Branch
Function Code	Txn Branch	Txn Currency	Y
Function Code	Txn Branch	Txn Currency	N
Function Code	*.*	Txn Currency	Y
Function Code	*.*	Txn Currency	N
Function Code	Txn Branch	*.*	Y
Function Code	Txn Branch	*.*	N

**Annexure 5: Order of Replacement of Parameters with Wild Card Entries (Charge Group)**

<b>Parameter1</b>	<b>Parameter2</b>	<b>Parameter3</b>	<b>Parameter4</b>	<b>Parameter5</b>
Parameter1	Parameter2	Parameter3	Parameter4	Parameter5
Parameter1	Parameter2	Parameter3	Parameter4	*.*
Parameter1	Parameter2	Parameter3	*.*	Parameter5
Parameter1	Parameter2	*.*	Parameter4	Parameter5
Parameter1	*.*	Parameter3	Parameter4	Parameter5
*.*	Parameter2	Parameter3	Parameter4	Parameter5
*.*	*.*	Parameter3	Parameter4	Parameter5
Parameter1	*.*	*.*	Parameter4	Parameter5
Parameter1	Parameter2	*.*	*.*	Parameter5
Parameter1	Parameter2	Parameter3	*.*	*.*
Parameter1	Parameter2	*.*	*.*	*.*
Parameter1	*.*	*.*	*.*	Parameter5
*.*	*.*	*.*	Parameter4	Parameter5
*.*	*.*	*.*	*.*	Parameter5
Parameter1	*.*	*.*	*.*	*.*
*.*	*.*	*.*	*.*	*.*

## 8 Annexure 6 – Static Maintenance Parameters

This Annexure provides the column names and descriptions of the significant parameters in the static maintenance tables. If required, the user needs to modify these parameters in the respective static maintenance tables. The details are given below.

**Annexure 6: SRV\_TM\_BC\_FUNCTION\_INDICATOR Table**

Column Name	Description
CROSS_CCY_ENABLED	<p>Indicates whether the cross currency is allowed for a transaction or not. The user can modify this flag to enable/disable the cross currency configuration. Possible values are as follows:</p> <ul style="list-style-type: none"> <li>• <b>Y</b> – Yes</li> <li>• <b>N</b> – No</li> </ul> <p><b>NOTE:</b> When the value is set to <b>N</b>, the Exchange Rate fields will be hidden.</p>
DENOM_VARIANCE	<p>Indicates the applicability of denomination variance. The user can modify this flag to enable/disable the denomination variance. Possible values are as follows:</p> <ul style="list-style-type: none"> <li>• <b>Y</b> – Yes</li> <li>• <b>N</b> – No</li> </ul> <p><b>NOTE:</b> This flag is applicable only to the function codes – 8004, 8203, 8206, and 8207.</p>
IS_NEGOTIATED_RATE_ENABLED	<p>Indicates whether the Negotiated Exchange Rate field is required in the screen or not. The user can modify this flag to enable/disable the Negotiated Exchange Rate for a specified screen. Possible values are as follows:</p> <ul style="list-style-type: none"> <li>• <b>Y</b> – Yes</li> <li>• <b>N</b> – No</li> </ul>

Column Name	Description
IS_REVERSAL_SUPP	<p>Indicates whether the transaction reversal is supported or not. The user can modify this flag to enable/disable the reversal for a particular transaction. Possible values are as follows:</p> <ul style="list-style-type: none"> <li>• <b>Y</b> – Yes</li> <li>• <b>N</b> – No</li> </ul>
IS_TELLER_SEQ_REQ	<p>Indicates whether the Teller Sequence Number generation is required or not. The user can modify this flag to enable/disable the Teller Sequence Number generation for a particular transaction. Possible values are as follows:</p> <ul style="list-style-type: none"> <li>• <b>Y</b> – Yes</li> <li>• <b>N</b> – No</li> </ul>
IS_TOT_CHARGES_REQ	<p>Indicates whether the Total Charges field is required in the screen or not. The user can modify this flag to enable/disable the Total Charges for a particular transaction. Possible values are as follows:</p> <ul style="list-style-type: none"> <li>• <b>Y</b> – Yes</li> <li>• <b>N</b> – No</li> </ul>

**Annexure 6: SRV\_TB\_BC\_ARCHIVAL Table**

Column Name	Description
ARCHIVAL_DAYS	Indicates the number of days required for the archival. The user can modify this flag to update the number of days.
BRANCH_CODE	Indicates the Branch Code, based on which the lookup of Archival details will happen. It refers to the branch in which the archival will happen. The user can modify this flag to update the Branch Code.

## 9 List Of Menus

1. Account Address Update - [Account Address Update](#) (pg. 560)
2. Account Balance Inquiry - [Account Balance Inquiry](#) (pg. 551)
3. Account Group Maintenance – [Account Group Maintenance](#) (pg. 621)
4. Account Statement Request - [Account Statement Request](#) (pg. 556)
5. Account Transfer - [Account Transfer](#) (pg. 251)
6. Accounting and Settlements - [Accounting and Settlements](#) (pg. 606)
7. Alerts - [Alerts](#) (pg. 572)
8. BC Issue Against Customer Account - [BC Issue Against Customer Account](#) (pg. 296)
9. BC Issue Against GL - [BC Issue Against GL](#) (pg. 307)
10. BC Issue Against Walk-in - [BC Issue Against Walk-in](#) (pg. 302)
11. BC Operations - [BC Operations](#) (pg. 313)
12. BC Print/Re-print - [BC Print/Re-print](#) (pg. 310)
13. Bill Payment Against Account - [Bill Payment by Account](#) (pg. 506)
14. Bill Payment by Cash - [Bill Payment By Cash](#) (pg. 503)
15. Book Overage - [Book Overage](#) (pg. 60)
16. Book Shortage - [Book Shortage](#) (pg. 57)
17. Branch Breaching Limits - [Branch Breaching Limits](#) (pg. 41)
18. Branch Group Maintenance - [Branch Group Maintenance](#) (pg. 624)
19. Branch Role Limits - [Branch Role Limits](#) (pg. 579)
20. Branch User Preferences - [Branch User Preferences](#) (pg. 582)
21. Buy Cash from Currency Chest – [Buy Cash from Currency Chest](#) (pg. 69)
22. Buy Cash from Till - [Buy Cash from Till](#) (pg. 77)
23. Buy Cash from Vault - [Buy Cash from Vault](#) (pg. 73)
24. Buy TC From Agent - [Buy TC From Agent](#) (pg. 140)
25. Buy TC From HO - [Buy TC From Head Office \(HO\)](#) (pg. 143)

- 26. Buy TC From Vault - [Buy TC From Vault](#) (pg. 144)
- 27. Cash Deposit – [Cash Deposit](#) (pg. 93)
- 28. Cash Deposit (Teller Session) - [Cash Deposit](#) (pg. 509)
- 29. Cash Remittance Issue - [Cash Remittance Issue](#) (pg. 395)
- 30. Cash Remittance Operations - [Cash Remittance Operations](#) (pg. 404)
- 31. Cash Withdrawal - [Cash Withdrawal](#) (pg. 98)
- 32. Cash Withdrawal (Teller Session) - [Cash Withdrawal](#) (pg. 511)
- 33. Channel Limits Maintenance - [Channel Limits Maintenance](#) (pg. 618)
- 34. Charge Condition Group Maintenance - [Charge Condition Group Maintenance](#) (pg. 636)
- 35. Charge Decision Enquiry - [Charge Decision Enquiry](#) (pg. 645)
- 36. Charge Decision Maintenance - [Charge Decision Maintenance](#) (pg. 641)
- 37. Charge Definition Maintenance - [Charge Definition Maintenance](#) (pg. 629)
- 38. Cheque Book Request - [Cheque Book Request](#) (pg. 539)
- 39. Cheque Book Status Change - [Cheque Book Status Change](#) (pg. 564)
- 40. Cheque Deposit - [Cheque Deposit](#) (pg. 278)
- 41. Cheque Return - [Cheque Return](#) (pg. 285)
- 42. Cheque Status Inquiry - [Cheque Status Inquiry](#) (pg. 535)
- 43. Cheque Withdrawal - [Cheque Withdrawal](#) (pg. 101)
- 44. Clear Cache - [Clear Cache](#) (pg. 533)
- 45. Clearing Network Maintenance - [Clearing Network Maintenance](#) (pg. 649)
- 46. Close Branch Batch - [Close Branch Batch](#) (pg. 55)
- 47. Close Out Withdrawal – [Close Out Withdrawal](#) (pg. 125)
- 48. Close Out Withdrawal by Cash - [Close Out Withdrawal by Cash](#) (pg. 122)
- 49. Close Out Withdrawal by Multi-mode - [Close Out Withdrawal by Multi-mode](#) (pg. 130)
- 50. Close Teller Batch - [Close Teller Batch](#) (pg. 47)
- 51. Close Vault Batch - [Close Vault Batch](#) (pg. 52)

- 52. Create Charge Pricing Maintenance - [Create Charge Pricing Maintenance](#) (pg. 633)
- 53. Credit Card Advance by Cash - [Credit Card Advance by Cash](#) (pg. 464)
- 54. Credit Card Advance by Transfer - [Credit Card Advance by Transfer](#) (pg. 468)
- 55. Credit Card Payment by Cash - [Credit Card Payment by Cash](#) (pg. 472)
- 56. Credit Card Payment (by non-cash modes) - [Credit Card Payment \(by non-cash modes\)](#) (pg. 475)
- 57. Current Open Tills - [Current Open Tills](#) (pg. 40)
- 58. Customer Address Update - [Customer Address Update](#) (pg. 558)
- 59. Customer Contact Update - [Customer Contact Details Update](#) (pg. 562)
- 60. Customer Group Maintenance - [Customer Group Maintenance](#) (pg. 626)
- 61. Customer Search - [Customer Search](#) (pg. 568)
- 62. Customer Service Request - [Customer Service Request](#) (pg. 570)
- 63. DD Issue Against Account - [DD Issue Against Account](#) (pg. 351)
- 64. DD Issue against GL - [DD Issue against GL](#) (pg. 360)
- 65. DD Issue Against Walk-in - [DD Issue Against Walk-in](#) (pg. 356)
- 66. DD Operations - [DD Operations](#) (pg. 366)
- 67. DD Print/Re-print - [DD Print/Re-print](#) (pg. 364)
- 68. Default Authorizer Maintenance - [Default Authorizer Maintenance](#) (pg. 603)
- 69. Denomination Exchange - [Denomination Exchange](#) (pg. 80)
- 70. Denominations Maintenance - [Denominations Maintenance](#) (pg. 586)
- 71. Denomination Variation Maintenance - [Denomination Variation Maintenance](#) (pg. 652)
- 72. Domestic Transfer Against Account - [Domestic Transfer Against Account](#) (pg. 259)
- 73. Domestic Transfer Against Walk-in - [Domestic Transfer Against Walk-in](#) (pg. 264)
- 74. Servicing Journal - [Servicing Journal](#) (pg. 524)
- 75. Electronic Journal - [Electronic Journal](#) (pg. 519)
- 76. External Bank Code Maintenance - [External Bank Code Maintenance](#) (pg. 655)
- 77. External System Maintenance - [External System Maintenance](#) (pg. 614)

- 78. F23 Tax Payment by Account - [F23 Tax Payment By Account](#) (pg. 201)
- 79. F23C Tax Payment by Cash - [F23C Tax Payment By Cash](#) (pg. 175)
- 80. F24 Tax Payment By Account - [F24 Tax Payment By Account](#) (pg. 207)
- 81. F24C Tax Payment by Cash - [F24C Tax Payment By Cash](#) (pg. 180)
- 82. Frequent Branch Operations - [Frequent Branch Operations](#) (pg. 569)
- 83. Frequent Customer Operations - [Frequent Customer Operations](#) (pg. 569)
- 84. Frequent Links - [Frequent Links](#) (pg. 573)
- 85. Function Code Definition - [Function Code Definition](#) (pg. 589)
- 86. Function Code Preferences - [Function Code Preferences](#) (pg. 595)
- 87. FX Purchase Against Account - [FX Purchase Against Account](#) (pg. 114)
- 88. FX Purchase Against Walk-in - [FX Purchase Against Walk-in](#) (pg. 118)
- 89. FX Purchase Against Walk-in (Teller Session) - [FX Purchase Against Walk-in](#) (pg. 515)
- 90. FX Sale Against Account - [Foreign Exchange \(FX\) Sale Against Account](#) (pg. 105)
- 91. FX Sale Against Walk-in - [FX Sale Against Walk-in](#) (pg. 110)
- 92. FX Sale Against Walk-in (Teller Session) - [FX Sale Against Walk-in](#) (pg. 512)
- 93. In House Cheque Deposit - [In-House Cheque Deposit](#) (pg. 256)
- 94. Instrument Number Maintenance - [Instrument Number Maintenance](#) (pg. 621)
- 95. Instrument Status Update - [Instrument Status Update](#) (pg. 447)
- 96. Inter Branch Transaction Input - [Interbranch Transaction Input](#) (pg. 85)
- 97. Inter Branch Transaction Liquidation - [Interbranch Transaction Liquidation](#) (pg. 88)
