

Known Issues for Oracle Cloud Infrastructure Object Storage Classic

Learn about the issues you may encounter when using Oracle Cloud Infrastructure Object Storage Classic and how to work around them.

Objects names with multiple sequential forward slashes can't be created

When you try to create an object with multiple sequential forward slashes in the object name, the resulting object has just one forward slash in the name.

Workaround: Use a different delimiting character instead of forward slash.

Static large objects with spaces in the name can't be deleted

If a static large object (SLO) has one or more spaces in its name, you can't delete it. A `DELETE` call with the `multipart-manifest=delete` query parameter will return 500 Internal Error as the status in the response body.

Workaround: Delete the SLO segment objects.

Paid accounts can't be created with the same identity domain name as an expired trial account

Workaround: If you want a paid subscription with the same identity domain name as that of an expired trial account, then wait seven days for the expired trial account to be fully purged before subscribing for the new paid account.

This document describes known issues for Oracle Cloud Infrastructure Object Storage Classic.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software" or "commercial computer software documentation" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.
