

Documentation for Device Makers

This documentation pertains to Oracle Java Wireless Client and CLDC Hotspot Implementation, which are optimized implementations based on the Connected Limited Device Configuration (CLDC) and the Mobile Information Device Profile (MIDP).

All documentation for device makers and Java ME Value Added Providers (VAPs) is now located on the Java Partner website,
<https://java-partner.sun.com/support/login.action>.

If you wish to view the documentation for these products, use your current license and partner website credentials, or contact an Oracle Sales Expert to discuss the purchase of a new license.
