Overview

Taleo Scheduling Center

The Taleo Scheduling Center is a product used with Taleo Recruiting to handle automated and high volume scheduling of candidates.

This add-on scheduling functionality allows users to schedule any number of screening functions for candidates, including but not limited to:

- job fair or campus appointments
- mass recruitment events
- interviews

The Taleo Scheduling Center facilitates the scheduling of these functions through the creation and management of calendars, which are populated with timeslots, into which candidates can schedule appointments. The Taleo Scheduling Center sends follow-up invitations (triggered through the candidate selection workflow) and reminder emails and records status messages in the candidate file each time a candidate performs a scheduling activity. The Taleo Scheduling Center displays a calendar view for users showing the resulting timetables of which invites are scheduled for each time slot on each day. The Taleo Scheduling Center sends email messages to candidates requesting them to schedule an appointment. It also sends emails confirming appointments and reminding candidates about their scheduled appointments.

The Taleo Scheduling Center screening service is available in two types of integration:

- Self-service: This integration type is supplied with all applications. In this type, an initial invitation email is sent to the candidate. Emails sent at the different phases of the workflow are controlled through candidate permissions set at the calendar level. The employer (recruiter) is able to manage the appointments of a candidate only if the candidate has logged in to the Taleo Scheduling Center at least once.
- Proctored: This integration type is optional and must be activated by Oracle Support. In this type, no initial invitation email is sent to the candidate. Emails sent at the different phases of the workflow are controlled through candidate permissions set at the calendar level. The employer (recruiter) can manage the appointments of a candidate even if the candidate has not logged into the Taleo Scheduling Center.

Although two types of integrations exist for the Taleo Scheduling Center, both types are configured, activated and used the same way.
Login

Login and Product Access
When users open the Taleo Enterprise solution, the User Sign In page is displayed.
Users must select the language in which they want to use the application. If users change the default language on
the Sign In page, the page is displayed in the new language and subsequent Taleo product pages are presented in
that language. After selecting a language, users can also instruct the system to "remember" their selection so that
the next time they sign in, the User Sign In page will be presented in the language they selected.
If single sign-on (SSO) is not enabled within an organization, users must enter a user name and password on the
User Sign In page before being able to see the list of Taleo products to which they have access. The user name
and password are provided by system administrators. Users can modify their password.
Once a user's credentials have been entered and accepted, the Welcome Center or table of contents page is
displayed. The Taleo products available for use are dependent on which products were purchased by the
organization and on the user's user type and permissions.

Accessing a Taleo Application

Prerequisite
You must have received a user name and password from your system administrator.

Steps
1. Select the language in which you want to use the application.
2. Enter your user name and password.
3. Click Sign In.

Using the Forgot Password Link

Prerequisite
You must have a valid username and email address in your user profile.

Steps
1. Click Forgot Your Password?.
2. Enter your username and email address.
3. Click OK.

Result
If the request comes from an authorized user, an email is sent to the supplied address with a code to access the
application.

Next Step
You must click the link provided in the email, enter your username and access code, and provide a new
password.
Welcome Center

The Welcome Center is a home page that is displayed to users immediately after they log in and provides "one-click" access to Taleo products.

The Welcome Center contains an auxiliary navigation bar, a core navigation bar, a Quick Access panel, and a Communications panel.

• The auxiliary navigation bar contains links to additional resources such as the online help and the Sign Out link.
• The core navigation bar is a set of tabs that provide direct links to Taleo products. A user might have a tab for any or all of the following products: Performance, Recruiting, Compensation, Analytics, Learn, and Configuration.
• The Quick Access panel provides an alternative "one-click" access to the same products available in the core navigation bar and also provides a selection of modules within products for example, Onboarding, Transitions.
• Finally, Taleo customers can create information of interest to all Taleo product users in the organization for display in the central communications panel. Alternatively, they can create distinct sets of information and associate an information set with a configuration profile.

If the Welcome Center is enabled, it replaces the table of contents page.
Navigation Bars

Auxiliary Navigation Bar
The auxiliary navigation bar, located at the top right of pages, provides users access to Home, About, and Sign Out links.

<table>
<thead>
<tr>
<th>Auxiliary Navigation Bar Options</th>

</tr>
<tr>
<td></td>
<td>• Display Time Zones</td>
</tr>
<tr>
<td></td>
<td>• Display Languages</td>
</tr>
</tbody>
</table>
Language Menu

Languages

The Taleo Scheduling Center is available in many languages.

The Language drop-down menu located in the right-hand side of pages allows users to select the language in which they want to use the product. Languages must be activated by the system administrator before they can be used in the Taleo Scheduling Center.

When a language has been enabled by a Scheduling Center administrator and then assigned to a calendar by a recruiter, it cannot be disabled while the calendar is active. The language will appear grayed out on the Display Languages page. If the calendar is no longer active, and the language is not used in any other active calendar, the language can be disabled. The Display Language page displays a message that states "Languages that are not editable are in use."
Scheduling Center Permissions

- Permissions for Performing Actions in Taleo Scheduling Center

10
Permissions for Performing Actions in Taleo Scheduling Center

Actions that users can perform in Taleo Scheduling Center are determined by a combination of user type permission and their calendar role on each calendar. This includes:

- *SmartOrg user type permissions assigned to the user.*
- *Calendar Role assigned to the user for each calendar.*

Additionally, candidates may be granted permissions for actions on specific calendars based on the Candidate Self-service Level set for that calendar.

Scheduling Center Permissions Overview

<table>
<thead>
<tr>
<th>User</th>
<th>SmartOrg User Type Permission</th>
<th>TSC Privileges</th>
<th>Calendar Role Grant</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scheduling Center User</td>
<td>Access Scheduling Center</td>
<td>Access to Scheduling Center Only</td>
<td>Must be granted a Calendar Role to perform actions on calendars.</td>
</tr>
<tr>
<td>Scheduling Center User</td>
<td>Create Calendars and access Scheduling Center</td>
<td>• Access to Scheduling Center</td>
<td>Automatically is granted the Calendar Owner Calendar Role for self-created calendars. Must be granted a Calendar Role to perform actions on other calendars.</td>
</tr>
<tr>
<td>Candidate User</td>
<td>None</td>
<td>None</td>
<td>Candidate Self-Service Level</td>
</tr>
</tbody>
</table>

Scheduling Center User

The Scheduling Center user has access to the Taleo Scheduling Center.

Users can be granted one of the following two SmartOrg user type permissions:

<table>
<thead>
<tr>
<th>User Type Permission</th>
<th>Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>Create calendars and access Scheduling Center</td>
<td>Configuration &gt; [SmartOrg] Administration &gt; [Users] User Types &gt; Recruiting &gt; Scheduling</td>
</tr>
<tr>
<td>Access Scheduling Center</td>
<td>Configuration &gt; [SmartOrg] Administration &gt; [Users] User Types &gt; Recruiting &gt; Scheduling</td>
</tr>
</tbody>
</table>

The Access Scheduling Center user type permission gives users access to the Taleo Scheduling Center. The functions users will be allowed to perform in the Taleo Scheduling Center will depend on the Calendar Role.

The Create calendars and access Scheduling Center user type permission gives users the ability to create calendars via the Add New Calendar button in the Taleo Scheduling Center. Users granted this permission will automatically be assigned the Calendar Owner role, although the creator does not have to be the owner. Users with this user type permission will still need to be assigned calendar roles for other calendars they do not own or create.
Users granted the Create calendars and access Scheduling Center user type permission can choose another Calendar Owner or remain the Calendar Owner. However, these users will always keep the Calendar Owner role allowing them to go back to the calendar after creation.

The Create calendars and access Scheduling Center user type permission should be used to grant users the ability to create calendars without granting full Scheduling Center configuration rights.

**Calendar Role**

A calendar role is the right of a user to perform a task in the Taleo Scheduling Center.

Calendar roles are granted to users by a Taleo Scheduling Center Administrator or by a user granted the Create calendars and access Scheduling Center user type permission when the calendar is created or by the Calendar Owner or an Administer Calendars user. The role a user is granted is for a specific calendar. Before a role can be granted to a user, the user must first be granted access to the Taleo Scheduling Center by a Recruiting Center system administrator. The users must try (but will not succeed) at least once to connect to the Scheduling Center for the administrator to be able to grant them a role. A user will only be able to successfully connect to the Scheduling Center once he/she has been granted a Calendar Role.

A Calendar Owner, an Administer Calendars, and an Administrator can grant the following types of Calendar Roles:

<table>
<thead>
<tr>
<th>Calendar Role Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Read-Only</td>
<td>A Read-Only user can only view information in the Taleo Scheduling Center. Information available is:</td>

</tr>
<tr>
<td>--------------------</td>
<td>-------------</td>
</tr>
<tr>
<td>Administer Calendars</td>
<td>A user is granted the Administer Calendars role by an Administrator or a Calendar Owner in the Taleo Scheduling Center.</td>
</tr>
</tbody>
</table>

Ownership of a calendar can only be granted and revoked by a Taleo Scheduling Center Administrator.

Roles are granted for a specific calendar.

Example:

A user may have a Read-Only calendar role for one calendar and an Administer Calendars role for another calendar.

**Granting Users a Calendar Role**

**Prerequisite**

The user being granted a Calendar role must have tried at least once to connect to the Scheduling Center, otherwise the name of the user will not appear in the user drop-down list.

A user type of Access Scheduling Center or Create Calendars and access Scheduling Center and a Calendar role grant users access to this feature.

**Steps**

1. Click *Scheduling Center*.
2. In the Calendars page, click *Modify* next to a calendar.
3. Click *Add/Modify Calendar Permissions*.
4. Click *Select User* to select the desired user.
5. Select a permission for the calendar, that is Read-Only, Mark Arrived/No Show, Schedule Appointments, Manage Timeslots, Administer Calendars.
6. Click *Create Permission*.

**Result**

The page displays the assigned Calendar roles, with the role newly created included in the listing.

**Editing the Permission of a Calendar Role**

**Prerequisite**

A user type permission and a Calendar role grant users access to this feature.

**Steps**

1. Click *Scheduling Center*.
2. In the Calendars page, click *Modify* next to a calendar.
3. Click *Add/Modify Calendar Permissions*.
4. Click *Select User* to select the desired user.
5. Select a new permission for the calendar, that is Read-Only, Mark Arrived/No Show, Schedule Appointments, Manage Timeslots, Administer Calendars.
6. Click *Create Permission*.

**Result**

The newly assigned permission appears in the page.
Removing a Calendar Role

Prerequisite
A user type permission and a Calendar role grant users access to this feature.

Steps
1. Click Scheduling Center.
2. In the Calendars page, click Modify next to a calendar.
3. Click Add/Modify Calendar Permissions.
4. Click Remove next to the user you wish to remove.
5. Click Yes to confirm that you want to remove the calendar role.

Result
The page refreshes and the deleted user is removed from the listing.

Candidate Self-Service Level

The candidate permission set for the calendar determines what candidates will be able to perform when signing in to the Taleo Scheduling Center.

During a requisition process, a candidate can receive an invitation to book an appointment. Candidates can access the Taleo Scheduling Center only if they have received an email with an invitation to book an appointment. Depending on the permission set for the calendar, candidates can perform several functions such as book an appointment, schedule later or decide they are no longer interested.

A Taleo Scheduling Center Administrator can set for a calendar the access level candidates will have when accessing the Taleo Scheduling Center. Permissions are linked to the calendar, not to the candidate. When a candidate signs in to the Taleo Scheduling Center, the candidate is granted the permission level set for the calendar being used to manage appointments.

There are three levels of candidate permission an Administrator can set for a calendar:

- Full: When signing into the Taleo Scheduling Center, the candidate will be able to fully manage his/her appointments that is, cancel, reschedule, book, decline.
- None: For the self-service integration type, the candidate will only receive an initial invitation. When signing into the Taleo Scheduling Center, the candidate will only be able to view his/her pending invitations. Users will be unable to manage appointments. For the proctored integration type, no invitation email is sent to the candidate. The user with a Schedule Appointments, Administer Calendars, Calendar Owner or Administrator role will need to manage candidate appointments. The candidate will receive a reminder email confirming the appointment booked by the user.
- Only Cancel Appointments: When signing into the Taleo Scheduling Center, the candidate will only be able to cancel his/her appointments. The user with a Schedule Appointments, Administer Calendars, Calendar Owner or Administrator role will need to manage candidate appointments.

Setting Candidate Permissions

To determine if candidates are allowed to manage or not their appointments, the candidate permission must be set for the calendar.

Prerequisite
If creating the calendar, the user must be an Administrator or a Create Calendar user type.
If the calendar is already created, the user must have an Administer Calendar role or be the Calendar Owner.

**Steps**

1. In the Calendars page, click *Modify* next to the name of a Calendar.
2. In the Update Calendar page, from the drop down list located next to the Candidate Self Service Level field, select the access level permission for candidates.
3. Click *Update*.

**Result**

Depending on the type of permission set for the calendar, reminder e-mails sent to candidates will include or not an active link to access the Taleo Scheduling Center.
Calendars

- Configuring Calendars ................................................................. 17
- Timeslots ............................................................................. 24
Configuring Calendars

Calendar

A calendar is the graphical representation of time from which candidates can choose a date to book an appointment for an interview that will be carried out either in person or by phone.

Only an Administrator or a user with the Create calendars and access Scheduling Center user type permission can create a calendar.

When creating a calendar, the user:

• Provides a calendar name that is displayed to candidates when they are scheduling their appointment.
• Specifies a scheduling horizon to indicate how long in advance the candidate may book an appointment on a calendar.
• Selects a calendar owner.
• Chooses if the calendar will be *single location or multiple location*.
• Specifies if the interview will be held in person (default) or on the phone.
• Selects locales for the calendar and enters location details.

Once the calendar is created, the user:

• *Adds a timeslot* for candidates to be able to book appointments.
• *Activates the calendar*. An active calendar can be used in a requisition for candidates to book appointments.
• Adds the calendar to a requisition in the Taleo Recruiting Center. The calendar must also be assigned to a phase of the requisition for a candidate to be able to book an appointment. When candidates are invited to schedule an appointment, in the Taleo Scheduling Center Candidate Portal, candidates click *Schedule Appointment*.

The Taleo Scheduling Center displays all appointments for a calendar regardless of the integration type used. Although the same calendar can be associated to both integration types on a single requisition, this is not recommended.

Creating a Calendar

Prerequisite

An Administrator or a user with the Create calendars and access Scheduling Center user type permission can create a calendar.

Steps

1. Click *Scheduling Center*
2. In the Calendars page, click *Create Calendar*.
3. In the Calendar Properties section, complete the fields as required.
4. In the Calendar Location Details section, indicates if the calendar is single location or multiple location.
   a) If selecting Single Location, type the location of the appointment.
   b) If selecting Multiple Location, select the desired locations (maximum is five locations).
5. In the Additional Locales section, select locales for the calendar and enter location details for each selected language.
6. Complete each set of field boxes for each selected language.
7. Choose which language will be the primary locale.
8. Click Save.

Result
The new calendar appears in the Calendars page.

Next Step
Activating the calendar.

Modifying a Calendar

Prerequisite
A user type permission and a Calendar role grant users access to this feature.

Scheduling Center > Scheduling Center

Steps
1. In the Calendars page, click Modify next to a calendar.
2. Modify fields as necessary.
3. Click Save.

Modifying Calendar Languages

Prerequisite
A user type permission and a Calendar role grant users access to this feature.

Steps
1. Click Scheduling Center.
2. In the Calendar page, click Modify next to a calendar.
3. In the Additional Locales section, select the languages in which you wish to display the calendar.
4. Complete each set of field boxes for each selected language.
5. Click Save.

Modifying the Scheduling Horizon

Prerequisite
A user type permission and a Calendar role grant users access to this feature.

Steps
1. Click Scheduling Center.
2. In the Calendars page, select Modify next to the desired calendar.
3. In the Update Calendar page, select a value in the Scheduling Horizon drop-down list.
4. Click Save.

Navigating Between Calendars

Prerequisite
A user type permission and a Calendar role grant users access to this feature.
Steps
1. Click *Scheduling Center*.
2. In the Calendars page, use the navigation arrows.

Notification to Reschedule Appointments

This feature provides Scheduling Center users the ability to send email notifications to candidates to invite them to reschedule their appointment.

If a candidate's appointment needs to be rescheduled by a Scheduling Center user, the user can send an email notification to the candidate. The candidate can use a link in the email notification to access Scheduling Center and reschedule his or her appointment. Appointments can only be rescheduled for a day or time in the future. Past appointments cannot be rescheduled.

On the calendar appointment page, users will need Calendar Creator, Calendar Owner, Schedule Appointments, Manage Timeslots, or Administer privileges to have access to two reschedule options:

- **Reschedule**: The appointment is removed from the calendar schedule and other candidates may schedule during that time. The candidate who was originally scheduled for that appointment will receive a configurable email that can include a link to reschedule the appointment.
- **Reschedule and Lock**: The appointment is removed from the calendar schedule and the timeslot is locked so that no other candidates can schedule during that time. The candidate who was originally scheduled for that appointment will receive a configurable email that can include a link to reschedule the appointment.

Reschedule Locking Feature

Users can prevent candidates from rescheduling a confirmed appointment.

The Appointment Change (lock down) is only relative to the time of the actual appointment. If a user sets a lock down of 4 hours then candidates will be able to reschedule their appointment up until 4 hours before the start of their appointment, this is intended to prevent candidates from rescheduling their appointment right before it's about to occur. It is not relative to when their appointment is scheduled in the future. If the user activates this option for a calendar, the user will be requested to create a message that will be displayed to candidates trying to reschedule a confirmed appointment during the locked down period.

The Reschedule Locking feature can be set when the calendar is created or it can be edited later. The reschedule locking feature will be applied to all appointments, even for appointments booked and confirmed before the activation of the feature for a specific calendar.

If the candidate accesses Taleo Scheduling Center during the appointment lock down period, the Reschedule message created by the user will be displayed and the candidate will not be allowed to reschedule.

A calendar permission or user type permissions grant users access to this feature.

Setting the Appointment Change Period

**Prerequisite**

A user type permission and a Calendar role grant users access to this feature.

*Scheduling Center > Scheduling Center*

Steps
1. In the Calendars page, click the name of a calendar.
2. Select the option Appointment Change (lock down).
3. Click Save.

**Result**
Candidate will not be allowed to reschedule a confirmed appointment during the period set for the calendar.

**Limit to Reschedule Appointments**

Allows Calendar Owners and Scheduling Center administrators to limit the maximum number of times a candidate is allowed to reschedule an appointment.

If the Reschedule Limit is activated for a calendar and a candidate exceeds the limit, a message configured by the calendar creator is displayed to the candidate.

A calendar creator can activate and define a Reschedule Limit when creating or modifying a calendar. A Reschedule Limit is activated by checking the corresponding check box on the Create Calendar page. The creator can select a limit, from one to ten, from a drop-down list.

When a Reschedule Limit is activated, the Reschedule Limit Reach text field becomes available at the bottom of the Create Calendar page. This field is only visible when the Reschedule Limit is activated and is used to enter a configurable message that displays to the candidate when he or she reaches the configured limit.

**Single Location and Multi-Location Calendar**

Users have the ability to create calendars with one location or multiple locations.

If selecting Single Location, the user must type the location of the appointment.

If selecting Multiple Location, the user can select up to five locations. The user can search for locations by Location Type (In Person or By Phone), Location Name, or City. Once locations have been selected, they appear in the calendar. Once the calendar is saved, the user can add new locations (up to 5) but cannot remove added locations.

Once the calendar is created, the user must add a timeslot for candidates to be able to book appointments. The user must define timeslots for all locations. On a multi-location calendar, the user must first select the location he wants to add timeslots on (locations are displayed across the top of the calendar. A location is selected by clicking on it. A selected location appears with a green highlighted background. When the appropriate location is selected, the user clicks Add Timeslot.

**Active Calendar**

An active calendar can be used in a requisition for candidates to book appointments.

A calendar must be Active before any appointments can be entered into the calendar by a candidate. Only an Administrator, an Administer Calendars, or the owner of the calendar can change the status of a calendar.

An inactive calendar cannot be chosen in a requisition process. A calendar in the Inactive status will not be displayed to candidates. However, a recruiter can add or manage timeslots in an inactive calendar.

**Activating a Calendar**

**Prerequisite**
Only an Administrator, an Administer Calendars, or a the owner of the calendar can change the status of a calendar.
A user type permission grants users access to this feature.

Scheduling Center > Scheduling Center

Steps

1. In the Calendars page, click Modify next to the desired calendar.
2. In the Update Calendar page, select the Active Calendar check box.
3. Click Save.

Result

The calendar can be used in a requisition for candidates to book appointments.

Inactivating a Calendar

Prerequisite

Only an Administrator, an Administer Calendars, or a the owner of the calendar can change the status of a calendar.

A user type permission grants users access to this feature.

Scheduling Center > Scheduling Center

Steps

1. In the Calendars page, click Modify next to the desired calendar.
2. In the Update Calendar page, clear the Active Calendar check box.
3. Click Save.

Result

The Calendar is inactive, therefore unavailable to be used in a requisition.

Calendar List Filtering and Sorting

The list of calendars can be filtered to reduce the number of calendars displayed in the list and to display calendars relevant to a user. The calendar list can also be sorted alphabetically.

The Quick Filters panel allows users to filter and search calendars according to the following criteria:

- Status: Used to display active or inactive calendars.
- ID: When a calendar is created, an ID number is given to the calendar. You must enter the exact ID number. The Calendar ID search field is case sensitive.
- Calendar Name: You can enter the complete calendar name or part of it. The Calendar Name search field is not case sensitive.
- Location: You can enter the complete location name or part of it. The Location search field is not case sensitive.
- Calendar Owner: You can enter the complete calendar owner name or part of it. The Calendar Owner search field is not case sensitive.

Search criteria can be used individually, or several criteria can be used together.

Sorting can also be performed on the calendar list by clicking on the column header. The list is sorted alphabetically.
Displaying Active or Inactive Calendars

**Prerequisite**
A user type permission and a Calendar role grant users access to this feature.

*Scheduling Center > Scheduling Center*

**Steps**
1. In the Quick Filters panel, select Active or Inactive in the Status drop-down list.
2. Click Search.

Searching for Calendars

**Prerequisite**
A user type permission and a Calendar role grant users access to this feature.

*Scheduling Center > Scheduling Center*

**Steps**
1. In the Quick Filters panel, enter the ID, calendar name, location, and/or calendar owner.
2. Click Search.

Multiple Calendars per Requisition

Multiple calendars can be assigned to a requisition.

When a user adds invitation phases in a requisition and assigns a calendar to the phase, it is possible to choose from more than one calendar. Therefore, several invitations can be sent during the requisition process each with a different calendar. Although it is not recommended, calendars can be associated to both integration types on a single requisition.

**Benefits**
- Provides the ability for Recruiting Center users with the appropriate user type permissions to assign different calendars to different invitation phases.

Calendar Duplication

Calendars can be duplicated using a button that will duplicate details and permissions into a new calendar. The name of the calendar is also copied and prefaced with the words Copy of.

A Scheduling Center administrator, or a user with Create Calendar permission, will see a Duplicate link on the calendar list page. When the Duplicate link is clicked, all the Calendar Properties, Calendar Location Details, and Additional Locales information from the original calendar is duplicated into the Update Calendar page for the new calendar. The original calendar name is also copied to the new calendar after the words, Copy of. For example, if the calendar named Interview Calendar was duplicated, the new name of the calendar would be Copy of - Interview Calendar. The user may then change the name of the calendar as appropriate.

When the new calendar is saved, the user is taken to the Assign Users and Permissions to a Calendar page. The information from this page is also prefilled with the existing information from the original calendar. The user can make changes, as necessary and then has two options:
• **Return**: returns user to the Update Calendar page.
• **Done**: returns user to the Calendars list page.

**Duplicating a Calendar**

**Prerequisite**

An Administrator or a user with the *Create calendars and access Scheduling Center* user type permission can create a calendar.

*Scheduling Center > Scheduling Center*

**Steps**

1. Click *Duplicate*.
2. Edit *Calendar Name* to a name distinctly different to the original calendar name.
3. Edit field values as appropriate.
4. Click *Save*.
5. *Assign users a calendar role*.
6. Click *Done*.

**Calendar History Tracking**

Calendar History Tracking provides Scheduling Center users the ability to track changes made to the calendar.

Users with Calendar Creator, Calendar Owner, or Administer Calendar privileges can see *View Audit History* on the Update Calendar and the Assign Users and Permissions to a Calendar pages. When clicked, *View Audit History* launches the Audit History page which lists the User Name, Action, and Date of every change made to that calendar.

**Email History**

Users have the ability to view a copy of emails sent to candidates.

When users are on the Taleo Scheduling Center Scheduled Appointment page, they can see a listing of scheduled appointments and the name of candidates. Candidate names are displayed as hyperlinks.

Users can click a candidate name to see invitation details for that candidate. Users can also click the View Email link to see the content of the email that was sent.
Timeslots

Timeslot

A timeslot is a period of the day when candidates are able to book appointments.

A timeslot can be locked meaning that candidates are unable to book appointments in that timeslot. Existing appointments already scheduled remain unchanged. Candidates may cancel or reschedule out of them, but no one can schedule an appointment into a locked timeslot. Locked timeslots are identified by a padlock icon.

The owner of a calendar, the Administrator, or a user with a Manage Timeslots role has the ability to lock a timeslot.

Timeslots cannot be modified once they have been created. To modify a timeslot, remove the timeslot and add a new one.

Timeslot actions are not available for timeslots that occurred in the past. The check boxes used for timeslot selection are disabled on past days and the Timeslot Action menu is removed. To perform Timeslot Actions, the user must have a calendar role of Manage Timeslots or Administer Calendars.

Adding a Timeslot

Prerequisite

A user type permission and a Calendar role grant users access to this feature.

Steps

1. In the Calendars page, click the name of a calendar.
2. Click Add Timeslot.
3. Complete the fields as required.
4. Click Add Timeslot.

Result

A new timeslot is added in the calendar for the chosen date.

Deleting a Timeslot

Prerequisite

The timeslots must be free of any scheduled appointments.

A user type permission and a Calendar role grant users access to this feature.

Steps

1. In the Calendars page, click the name of a calendar.
2. Select a timeslot.
3. In the Timeslot Actions menu, select Delete.

**Result**
The timeslot is removed from the calendar and is no longer available to candidates to book appointments.

### Deleting All Timeslots

**Prerequisite**
The timeslots must be free of any scheduled appointments.

A user type permission and a Calendar role grant users access to this feature.

**Steps**
1. In the Calendars page, click the name of a calendar.
2. In the Timeslot Actions menu, select Delete All Timeslots.

**Result**
All timeslots are removed from the calendar. Timeslots will no longer be available to candidates to book appointments.

### Locking a Timeslot

**Prerequisite**
A user type permission and a Calendar role grant users access to this feature.

The timeslot must be created and unlocked.

**Steps**
1. In the Calendars page, click the name of a calendar.
2. Select a timeslot.
3. In the Timeslot Actions menu, select Lock.

**Result**
A small padlock is displayed beside the locked timeslot. Candidates are no longer able to book appointments for that timeslot. However, any appointments that have been previously scheduled for that timeslot will remain.

### Unlocking a Timeslot

**Prerequisite**
A user type permission and a Calendar role grant users access to this feature.

The timeslot must be created and locked.

**Steps**
1. In the Calendars page, click the name of a calendar.
2. Select a timeslot.
3. In the Timeslot Actions menu, select Unlock.

**Result**
The padlock icon is no longer displayed. Candidates are able to book appointments in that timeslot.

**Selecting a Timeslot Owner**

**Prerequisite**
The calendar must have a timeslot.

Calendar permissions apply; users must have the appropriate permission to the calendar and the ability to manage times to have access to this feature.

*Scheduling Center > Scheduling Center*

**Steps**
1. In the Calendars page, click the name of a calendar.
2. Select the checkbox next to the desired timeslot.
3. In the Timeslot Actions menu, click Select Owner.
4. Click **Select User** next to the desired timeslot owner.

**Result**
The name of the timeslot owner appears next to the desired appointment timeslot.

**Removing a Timeslot Owner**

**Prerequisite**
The calendar must have a timeslot.

Calendar permissions apply; users must have the appropriate permission to the calendar and the ability to manage times to have access to this feature.

*Scheduling Center > Scheduling Center*

**Steps**
1. In the Calendars page, click the name of a calendar.
2. Select the checkbox next to the desired timeslot.
3. In the Timeslot Actions menu, click Remove Owner.

**Result**
The name of the timeslot owner no longer appears next to the desired appointment timeslot.

**Modifying a Timeslot Owner**

**Prerequisite**
The calendar must have a timeslot.

Calendar permissions apply; users must have the appropriate permission to the calendar and the ability to manage times to have access to this feature.

*Scheduling Center > Scheduling Center*
Steps
1. In the Calendars page, click the name of a calendar.
2. Select the checkbox next to the desired timeslot.
3. In the Timeslot Actions menu, click Select Owner.
4. Click Select User next to the desired timeslot owner.

Result
The name of the timeslot owner appears next to the desired appointment timeslot.

Selecting the Allowed Number of Appointments per Timeslot

Prerequisite
A user type permission and a Calendar role grant users access to this feature.

Scheduling Center > Scheduling Center

Steps
1. In the Calendars page, click the name of a calendar.
2. Select a timeslot.
3. In the Timeslot Actions menu, select Update Appointments.
4. Indicate the number of appointments that may be scheduled within this timeslot.
5. Click Save.

Result
The selected number of appointments available for the timeslot is displayed.

Displaying Date Information and Booked Appointments

Prerequisite
A user type permission and a Calendar role grant users access to this feature.

Scheduling Center > Scheduling Center

Steps
1. In the Calendars page, click on a calendar.
2. In the Quick Filters panel, click on a date in the calendar.

Moving Between Months in a Calendar

Prerequisite
A user type permission and a Calendar role grant users access to this feature.

Scheduling Center > Scheduling Center

Steps
1. In the Calendars page, click on a calendar.
2. In the Quick Filters panel, click to display the next month. Click to display the previous month.
Tracking Candidate Appointment Attendance

Prerequisite
A user type permission and a Calendar role grant users access to this feature.

Scheduling Center > Scheduling Center

Steps
1. Click on the calendar name.
2. Click on a timeslot where a candidate has booked an appointment.
3. In the Candidate Actions menu, select Mark Arrived, Mark No Show, Clear Arrival Status accordingly.
   You can also use the quick action icons ✔️ ☑️ ✗.

Result
The attendance of a candidate is marked in the calendar. The user can view if a candidate has arrived or not for an appointment.

The attendance of the candidate is indicated in the Candidate list in the Taleo Recruiting Center, provided the Appointment Status column is configured. The appointment status is also indicated in the candidates profile.

Locked Day
A locked day is a day during which candidates cannot book appointments.

When opening a calendar, the words Day is Locked are displayed in red. Also, the day is strike through in the calendar. This means that the system will not allow candidates to make appointments. Existing appointments already scheduled remain unchanged. Candidates may cancel or reschedule out of them, but no one can schedule an appointment into a locked day.

The Owner of a calendar, an Administrator or a user with a Manage Timeslots role has the option to lock an entire day, inclusive of all the timeslots within a specific day.

Locking a Day

Prerequisite
A user type permission and a Calendar role grant users access to this feature.

Scheduling Center > Scheduling Center

Steps
1. In the Calendars page, select a calendar name.
2. Click a day in the calendar.
3. In the Timeslot Actions menu, select Lock Day.

Result
The words Day is Locked are displayed in red. Also, the day is strike through in the calendar. Candidates are no longer able to book appointments on that day. However, any appointments that have been scheduled on that day will remain.
Unlocking a Day

**Prerequisite**
A user type permission and a Calendar role grant users access to this feature.

*Scheduling Center > Scheduling Center*

**Steps**
1. In the Calendars page, select a calendar name.
2. Click a day in the calendar that is locked.
3. In the Timeslot Actions menu, select Unlock Day.

**Result**
The day is no longer strike through in the calendar. Candidates are able to book appointments on that day.
Candidate Invitations

Appointment Management on Behalf of a Candidate

An appointment can be scheduled, canceled, or rescheduled by a user on behalf of the candidate. An invitation to book an appointment can also be declined on behalf of the candidate.

Schedule Appointments, Administer Calendars users, Owners or Taleo Scheduling Center Administrators can book, reschedule or cancel appointments on behalf of a candidate through the candidate user interface of the Taleo Scheduling Center.

If using the self-service integration type of the Taleo Scheduling Service, the candidate must have logged in to the Careers Section at least once and created a Profile before a user granted with the appropriate role can manage the appointments of the candidate. Once a candidate has been canceled from an appointment, they cannot be rescheduled.

If using the proctored integration type of the Taleo Scheduling Service, appointments can be scheduled for candidates that did not log in to the Career site.

User must manage the appointments of candidates granted with the None or Only Cancel Appointments permission.

Users can also manage the appointments of candidates granted the Full permission.

Benefits

- Provides the ability for employers and recruiters to manage appointments for candidates at their convenience.

Accessing the Taleo Scheduling Center on Behalf of a Candidate

A user must first access the Taleo Scheduling Center on behalf of a candidate to be able to manage the appointments of a candidate.

Prerequisite

A user must first access the Taleo Scheduling Center on behalf of a candidate to be able to manage the appointments of a candidate.

A user type permission and a Calendar role grant users access to this feature.

A user must first access the Taleo Scheduling Center on behalf of a candidate to be able to manage the appointments of a candidate.

For the self-service integration type, the candidate must first log in to the Taleo Scheduling Center via the initial invitation e-mail to activate communication between the Taleo Scheduling Center and the Taleo Recruiting Center. The candidate must have a profile in a career section.

Recruiting > Candidates

Steps

1. In the Candidate list, select the name of a candidate.
2. In the Job Submission tab, click Edit.
3. In the Screening Section of the candidate file, click Details next to the Taleo Scheduling Center.
4. In the Results section, click More Details.
Result
The Invite History page is displayed.

Scheduling an Appointment on Behalf of a Candidate

Prerequisite
User must first access the Taleo Scheduling Center on behalf of the candidate.
A user type permission grants users access to this feature.

Steps
1. In the Invite History page of the candidate, click Schedule or Decline Invitation.
2. In the Open Invitations page of the Taleo Scheduling Center, click Schedule Appointment next to the appointment to book.
   The name of the candidate and the name of the user logging in on behalf of the candidate is displayed in the Open Invitations page.
3. In the Schedule your appointment page, select an appointment.
4. Click Schedule Selected Time.
5. In the Appointment Confirmed page, click continue.
6. Click Done.

Result
An appointment is scheduled and the candidate will receive a reminder e-mail confirming the appointment only if the candidate permission for the calendar is Full.

The Link under the Actions list in the Invite History page in the Recruiting Center will change to Reschedule or Cancel Invitation.

Rescheduling an Appointment on Behalf of a Candidate

A user can reschedule an invitation to book an appointment on behalf of a candidate.

Prerequisite
The user must first access the Taleo Scheduling Center on behalf of the candidate.
A user type permission grants users access to this feature.

Steps
1. In the Invite History page of the candidate, click Schedule or Decline Invitation.
   The name of the candidate and the name of the user logging in on behalf of the candidate is displayed in the Open Invitations page.
2. In the Open Invitations page of the Taleo Scheduling Center, click No longer Interested next to the appointment to book.
3. In the Cancel Appointment confirmation page, click Yes.
4. Click Done.

Result
The appointment is scheduled and the candidate will receive a reminder e-mail confirming the appointment only if the candidate permission for the calendar is Full.
Declined is indicated in the Actions list of the Invite History page of the candidate file in the Recruiting Center.

Cancelling a Scheduled Appointment on Behalf of a Candidate

A user can cancel, on behalf of a candidate, an appointment scheduled by the candidate or on behalf of the candidate.

**Prerequisite**
The user must first access the Taleo Scheduling Center on behalf of the candidate.

A user type permission grants users access to this feature.

**Steps**
1. In the Invite History page of the candidate, click Reschedule or Cancel Invitation.

   The name of the candidate and the name of the user logging in on behalf of the candidate is displayed in the Open Invitations page.

2. In the Open Invitations page of the Taleo Scheduling Center, click Cancel Appointment next to the appointment to cancel.

3. In the Cancel Appointment confirmation page, click Yes.

4. Click Done.

**Result**
The Link under the Actions list in the Invite History page in Recruiting Center will change to Reschedule or Cancel Invitation.

Declining an Invitation on Behalf of a Candidate

A user can decline an invitation to book an appointment on behalf of a candidate.

**Prerequisite**
A user type permission grants users access to this feature.

Candidate must first log in to the Taleo Scheduling via the initial invitation e-mail to activate communication between the Taleo Scheduling Center and Taleo 10.

Candidate must have a profile in the Careers section of Taleo 10.

User must first access the Taleo Scheduling Center on behalf of the candidate.

**Steps**
1. In the Invite History page of the candidate, click Schedule or Decline Invitation.

   The name of the candidate and the name of the user logging in on behalf of the candidate is displayed in the Open Invitations page.

2. In the Open Invitations page of the Taleo Scheduling Center, click No longer Interested next to the appointment to book.

3. In the Decline Invitation confirmation page, click Yes.

4. Click Done.

**Result**
The scheduling process for this candidate is ended.
Declined is indicated in the Actions list of the Invite History page of the candidate file in the Recruiting Center.
Configuring Invitations

Invitation Email
An invitation email is an email sent to a candidate during a hiring process.

An administrator can add invitation phases to the candidate selection workflow in the Taleo Recruiting Administration. When a candidate reaches these invitation phases during the hiring process, an email is sent to the candidate with an invitation to book an appointment. The initial interview must be scheduled before any follow-up appointments can be scheduled. An Administrator or a user logged to the Recruiting Center can also send invitation emails manually provided they have been granted the proper user type permissions.

Benefits
• Provides the ability for an administrator or a recruiter logged in Recruiting Center to send automatically an invitation to a candidate during the requisition process. The administrator must configure the candidate selection workflow in the Recruiting Administration and then an invitation is automatically distributed when a recruiter (or employer) selects the appropriate step/status.
• Provides the ability for users logged in to the Recruiting Center to manually send, at any time, an invitation to book an appointment to a candidate.

Reminder Email
A reminder email is sent to a candidate when an appointment is scheduled or rescheduled.

Reminder emails are sent to candidates a few days prior to an appointment booked either by the candidate or on behalf of the candidate. Reminder emails are sent automatically by the system.

Depending on the access level granted to the candidate for the calendar being used for the appointment management, the reminder email will not display the same information.

• Full: reminder email will include information on scheduled appointments and will contain a link to access the Taleo Scheduling Center and allow candidates to manage their appointments.
• None: reminder email will only include information on scheduled appointments, but no link to the Taleo Scheduling Center will be displayed as the candidate is not allowed to manage his or her appointments.
• Only Cancel Appointments: reminder email will include information on scheduled appointment and a link to the Taleo Scheduling Center will be displayed allowing the candidate to cancel scheduled appointments.

Phase
A phase is a configured parameter for an action performed during the candidate selection workflow.

Phases are available in a candidate selection workflow only if phases are integrated to a service. Therefore, not all services have phases that can be configured in a candidate selection workflow.

If phases are available for a service, the system administrator will be able to create phases and configure them.

Example:

The phase allows the system administrator to associate the workflow, step and status that will trigger a follow-up appointment and further configure which appointment invitation will be distributed. A requisition can include up to ten phases. However, to avoid confusion, it is recommended to use only two or three phases per requisition.
The appropriate invitation will be automatically sent based on the calendar ID association selected by the user in the requisition file Screening section.

**Sending an Invitation Manually**

A user can send an invitation to a candidate by requesting the Taleo Scheduling Center screening service for this candidate.

**Prerequisite**

The candidate must be matched to a requisition.  
A user type permission grants users access to this feature.  
A screening service must be requested for this candidate.  
The Taleo Scheduling Center Screening Service integration type must be enabled for the requisition.  
The candidate calendar permission must be Full.

**Recruiting > Candidates**

**Steps**

1. In the Candidates list, select a candidate (or use Search to find the desired candidate).
2. In the More Actions drop down list, select Request a Screening Service.
3. In the Request Screening Service dialog box, select from the Available Services drop down list the integration type of the Taleo Scheduling Center screening service you wish to trigger.
   - Only the integration types used in the requisition will be displayed.
4. Add a comment, if necessary.
5. Click Done.

**Result**

The candidate will receive an email with an invitation to book an appointment.

**Sending an Invitation by Changing the Status of a Candidate**

A user can send an invitation to a candidate by changing the status of the candidate in a requisition. When changing manually the status of the candidate to a different phase of the requisition, the candidate will receive an invitation to book an appointment.

**Prerequisite**

A user type permission grants users access to this feature.  
Step in which the candidate is must include the Change Status/step action.  
Candidate must not be in a RSOffer step.  
Phases must be created for this requisition in the Taleo Recruiting Administration.

**Recruiting > Candidates**

**Steps**

1. Select a candidate file.
2. In the More Actions list, select Change status/step.
3. In the New Status list, select a new status.
4. Add a comment.
5. Click Save and Close.

Result
An invitation to book an appointment is sent when the candidate will reach for the chosen phase of the requisition.

Sending an Invitation Automatically during the Workflow
System administrators can automatically trigger Passport screening services such as Scheduling Center when a candidate reaches a certain step or status within a candidate selection workflow. Triggering automatically an invitation during the workflow process can be used to send an invitation to several candidates at a time, by changing the status of the candidate to a determined step or status triggering the invitation.

Prerequisite
The Taleo Scheduling Center screening service must be configured.

The Access Administration and Access Screening Services configuration user type permissions are required.

Configuration > [Recruiting] Administration > Screening Services

Steps
1. In the Screening Services List, select the required integration type of Taleo Scheduling Center.
2. Click Create next to CSW Action.
3. In the New Candidate Selection Workflow Action page, select the workflow, step and status combination that will automatically trigger the screening service. The workflows, steps and statuses available are the ones configured in the Taleo zone.
4. In the Action drop-down list, select Send Scheduling Center Invitation or Trigger a follow-up appointment. The Scheduling Center invitation will automatically send the correspondence identified in the Message Template section of the Screening Service settings.
   - Selecting Send Scheduling Center Invitation will automatically send the correspondence identified in the Message Template section of the Screening Service settings. The message originates from the Correspondence Manager in Taleo Recruiting.
   - Selecting Trigger a follow-up appointment will automatically notify Scheduling Center to send out the email request. The email sent is controlled by the email configuration located in Taleo Scheduling Center.
5. Click Save.
6. Click Done.

Result
An invitation is automatically sent to the candidate at the selected step of the requisition.

Cancelling an Invitation
A user can cancel the invitation to book an appointment sent to a candidate.

Prerequisite
A user type permission grants users access to this feature.

The candidate must not have scheduled an appointment.
**Recruiting Center > Candidates**

**Steps**
1. Open a candidate submission.
2. Click the Screening block.
3. In the Scheduling Center section, click Details.
4. In the Results section, click More Details.
5. Click Schedule or Decline Invitation.
6. In the candidate portal, click the No Longer Interested button.
7. Click the Yes button to cancel this invitation.

**Result**
The candidate will no longer see the option to schedule this appointment when logged into the candidate portal.

**Blocking an Invitation**

**Prerequisite**
A user type permission grants users access to this feature.
The candidate must not have scheduled an appointment for the invitation.

**Recruiting > Candidates**

**Steps**
1. Click the name of a candidate.
2. In the Job Submission tab, click Edit.
3. In the Screening section, click Details.
4. In the Results section, click More Details.
5. Click Block.

**Result**
All invitation phases of the requisition are blocked and will no longer be sent to candidates.

**Assigning a Calendar to a Requisition**

A requisition can use different calendars when sending invitations to candidates. Although the same calendar can be associated to both integration types on a single requisition, this is not recommended.

**Prerequisite**
Calendars must be created in Taleo Scheduling Center.

**Recruiting > Requisition**

**Steps**
1. Click Create Requisition.
2. Follow the Wizard instructions.
3. In the Screening section, select a Taleo Scheduling Center Integration type.
4. For each Calendar ID, select a calendar from the drop-down list.
5. Select the calendar to assign to the requisition.
6. Repeat steps 5 and 6 for each required calendar ID.
7. Click Save.

**Result**

The pop-up window closes and the Calendar ID field displays the name of the calendar previously selected.
Scheduling Statuses

Taleo Scheduling Center Candidate History Log

The Candidate History Log is the Taleo Scheduling Center page where it is possible to view the scheduling status of a candidate.

The Candidate History Log displays a list of the scheduling activities of a candidate.

Viewing the Scheduling Status of a Candidate in the Candidate File

Prerequisite
To view the status of a candidate, the candidate must already be in a candidate selection process.

Steps
1. Click the name of a candidate.
2. In the job submission tab, click Edit.
3. In the Screening section, click Details under the integration type used to manage the appointments of the candidate.
4. In the Results section, click More Details.
5. Click View History.

Result
The Activity Log of the candidate is displayed.

Viewing the Scheduling Status of a Candidate in the Candidates List

Prerequisite
The Scheduling Status column in the candidate list must have been added to the list format.

Steps
1. In the Candidates list, click

Adding a Candidate List Column to view Taleo Scheduling Statuses

To view the scheduling status of a candidate in the candidates list, the Scheduling Status column must be added to the candidates list.

Prerequisite
The Scheduling Status column must have been added to a list format context by a Recruiting Administrator.

Steps
1. In the Candidates list, click .
2. In the List Format Selector page, choose from the List Format drop-down list, a list format including an Appointment Status column.
3. Click Done.

**Result**
A column displaying the Taleo Scheduling Center scheduling status will be displayed in the candidates list.

---

**Viewing the Scheduling Status of a Candidate in the Tracking History**

**Prerequisite**
User must be signed in to the Taleo Scheduling Center.
A user type permission grants users access to this feature.
A calendar role grants users access to this feature.

*Scheduling Center > Scheduling Center*

**Steps**
1. Click the name of a calendar.
2. Click the name of a scheduled candidate.

**Result**
The Activity Log of the candidate is displayed. The information under the What column is the scheduling status.
Finding Candidate Information

- Candidate Search
- Access to the Candidate File in the Recruiting Center

Page numbers: 44, 46
Candidate Search

Candidate Search provides access to a candidate's appointments that occur up to one week in the future and up to one week in the past.

The Candidate Search function provides two different types of searches, a quick search and a specific search. A quick search for candidate appointments can be done by selecting any one of the options for search from the drop-down menu and entering the criteria into the text field. The search options are:

- Last Name (Default)
- First Name
- Full Name
- Email Address
- Candidate ID from the Recruiting Center

A Specific Candidate search can be performed by selecting Specific Candidate Search from the drop-down menu and entering all of the quick search option items for search into the Specific Candidate Search window.

Conducting either a quick Candidate Search or a Specific Candidate Search will display a list of results on the Candidate Search Results Page. The results includes appointments for that candidate dated up to one week prior of the current day and one week after the current day. Each line represents a scheduled appointment.

</tr>
</tbody>
</table>

**Performing a Candidate Quick Search**

**Prerequisite**

*Scheduling Center > Scheduling Center*

**Steps**

1. Select search criteria type from inline menu.
2. Enter the search value in the text field.
3. Click magnifying glass icon.

**Performing a Specific Candidate Search**

**Prerequisite**

*Scheduling Center > Scheduling Center*

**Steps**

1. Select *Specific Candidate Search* from inline menu.
2. Enter the search value in desired field.
3. Click *Search*. 
Access to the Candidate File in the Recruiting Center

The Recruiting Center can be accessed from the Scheduling Center to view the Candidate File.

When a candidate has scheduled an appointment his or her name displays on the Calendar Scheduled Appointment page for that date and time. An inline menu is available next to the name. Clicking the inline menu arrow exposes a hover window displaying:

- Candidate ID
- Candidate Name link
- Candidate Email Address

Clicking the Candidate Name link will launch the Recruiting Center or the Staffing WebTop in a new tab or window. After signing in, the user will land on the General Profile of the Candidate Profile. Recruiters and Hiring Managers who use the Scheduling Center must have appropriate permissions to the Recruiting Center or the Staffing WebTop to view the Candidate Profile. The Candidate Profile cannot be accessed through the Manager WebTop using this link.

Accessing the Candidate File in Recruiting

**Prerequisite**

Users must have the *General Security level for internal candidates (in view mode)* or the *General Security level for external candidates (in view mode)* permission to access the candidate file in the Recruiting Center.

Users must have access to the Recruiting Center or the Staffing WebTop.

The Candidate Profile cannot be accessed through the Manager WebTop.

**Scheduling Center > Scheduling Center**

**Steps**

1. In the Calendars page, click the inline menu next to the candidate name.
2. Click candidate name link.
3. Log in to the Recruiting Center.

**Result**

The Recruiting Center is launched in a new tab or window displaying the candidate file.
Reports

- Calendar Data Report ................................................................. 48
Calendar Data Report

Taleo Scheduling Center users can run a report on a specific calendar.

Four reports are available. The report contains a listing of upcoming appointments and can be used to track Arrive/No Show metrics.

- Roster Schedule
- Scheduled Appointments
- Appointment Summary Report
- Arrival Status Report

Users can run reports on any calendar for which they have been granted a calendar role.

When the report is created and displayed, the user can choose to print or to export the report to Excel.

Users can create reports for active or inactive calendars.

Benefits

- Report can be used to track Arrive/no Show metrics.
- Report contains the list of upcoming appointments
- The auto suggest feature is available to identify the name of the calendar for which to run a report.

Running a Report

Prerequisite

A calendar role grants users access to this feature.

Scheduling Center > Reports

Steps

1. Select a report.
2. Select a date range.
3. Click submit.

Next Step

Printing or exporting the report to Excel.

<table>
<thead>
<tr>
<th><strong>Fields</strong></th>
<th><strong>Description</strong></th>
<th><strong>Location</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Calendar Name</td>
<td>The name of the calendar name that is displayed to candidates when they are scheduling their appointment.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Active Calendar</td>
<td>Allows the calendar to be used in a requisition for candidates to book appointments.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Candidate Self-Service Level</td>
<td>Sets the permission level for candidates to control their appointments. A candidate may be granted full scheduling capabilities (that is, scheduling, rescheduling, canceling - this is the highest level of permissions), or may be restricted to only canceling an appointment or have no permissions at all.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Allow Same Day Scheduling</td>
<td>Allows candidates to schedule an appointment for the same day on which they make the appointment.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Scheduling Cushion (in minutes)</td>
<td>Applies to same day scheduling. Represents the amount of time prior to an appointment that a candidate can self-schedule. For example, if set to 60 minutes and the candidate is self-scheduling 30 minutes prior to the appointment, that appointment will be unavailable.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Scheduling Horizon (in days)</td>
<td>Represents how long in advance a candidate may book an appointment on a calendar. The default value is 14 days in advance. The scheduling horizon can be set to 60, 90 or to a maximum interval of 180 days. The scheduling horizon can be edited once appointments have been made on the calendar.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Appointment Change (lock-down)</td>
<td>Determines for a calendar how close to the time of a confirmed appointment a candidate will be allowed to reschedule.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Calendar Owner</td>
<td>The person responsible for maintaining the calendar.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Calendar Display Name</td>
<td>The name of the calendar as the user wants it to display to the candidates. The calendar name that displays internally to users is often different than what is shown to candidates.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Fields</td>
<td>Description</td>
<td>Location</td>
</tr>
<tr>
<td>--------------------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>-----------------------------------------------</td>
</tr>
<tr>
<td>Select As Primary Locale</td>
<td>Displays the language in which the calendar will be displayed to the administrator and recruiters. Note: If only one language is offered, it will default to the current language and the button will automatically be checked.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Multiple Location</td>
<td>Indicates that a calendar is created for several locations (maximum of 5 locations).</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Single Location</td>
<td>Indicates that a calendar is created for one location.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Location Type</td>
<td>Indicates if the interview will be held in person (default) or on the phone.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Calendar Location Name</td>
<td>The name of the location created by the Administrator as visible within Taleo Scheduling Center.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Location Display Name</td>
<td>The name of the location as it is displayed to candidates.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Pre-schedule Information</td>
<td>Instructions such as asking the candidate to bring two types of ID, to dress business casual, etc.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Interview Directions</td>
<td>The user creating a calendar can input directions to the appointment location.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Interview Instructions</td>
<td>The user creating a calendar can input instructions for the appointment, for example to tell the candidates to check in at the front desk.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Timeslot Owner</td>
<td>When a timeslot owner is assigned to a timeslot, the timeslot owner receives an email each time a candidate schedules an appointment for the assigned timeslot. If no timeslot owner is selected, the calendar owner receives the email.</td>
<td>Scheduling Center &gt; Calendars</td>
</tr>
<tr>
<td>Schedule up to a maximum</td>
<td>Maximum number of timeslots available for the time selected. A maximum of 999 timeslots can be set.</td>
<td>Scheduling Center &gt; Timeslots</td>
</tr>
<tr>
<td>Interval in minutes</td>
<td>How long the appointment will last. The system will automatically create appointments based on start time/end time and interval. For example, a start time of 9:00 am and an end time of 11:00 am for interval of 30 minutes will result in time slots being automatically generated for 9:00; 9:30; 10:00 and 10:30.</td>
