

Oracle[®] Financials Country-Specific Installation Supplement

RELEASE 11i

January, 2000

ORACLE[®]

Enabling the Information Age[™]

The part number for this volume is A81233

Copyright © 1998, 2000, Oracle Corporation. All rights reserved.

Contributors: Ana Bebbler, Craig Borchardt, Satyadeep Chandrashekar, Adam Cockburn, Desh Deepak, Alex Fiteni, Joe Gum, Andrew Hardie, Joanne Hay, Clara Jaeckel, Deepak Khanna, Pascal Labrevois, Jason Liu, Ahmed Mohiuddin, Essan Ni, Kristin Penaskovic, Zoë Read, Roberto Silva, Paul Snelling, Harshavardhan Takle, Santosh Vaze

The Programs (which include both the software and documentation) contain proprietary information of Oracle Corporation; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent and other intellectual property law. Reverse engineering of the Programs is prohibited.

Program Documentation is licensed for use solely to support the deployment of the Programs and not for any other purpose.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. Oracle Corporation does not warrant that this document is error free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose, without the express written permission of Oracle Corporation.

If the Programs are delivered to the US Government or anyone licensing or using the Programs on behalf of the US Government, the following notice is applicable:

RESTRICTED RIGHTS LEGEND

Programs delivered subject to the DOD FAR Supplement are 'commercial computer software' and use, duplication and disclosure of the Programs including documentation, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement. Otherwise, Programs delivered subject to the Federal Acquisition Regulations are 'restricted computer software' and use, duplication and disclosure of the Programs shall be subject to the restrictions in FAR 52.227-19, Commercial Computer Software - Restricted Rights (June, 1987). Oracle Corporation, 500 Oracle Parkway, Redwood City, CA 94065.

The Programs are not intended for use in any nuclear, aviation, mass transit, medical, or other inherently dangerous applications. It shall be licensee's responsibility to take all appropriate fail-safe, back up, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and Oracle disclaims liability for any damages caused by such use of the Programs.

We Appreciate Your Comments

Reader's Comment Form - A81233

Oracle Corporation welcomes your comments about this manual's quality and usefulness. Your feedback is an important part of our revision process.

- Did you find any errors?
- Is the information presented clearly?
- Are the examples correct? Do you need more examples?
- What features did you like?

If you found any errors or have any other suggestions for improvement, please write the topic, chapter, and page number below:

Please send your comments to:

Oracle Applications Documentation Manager
Oracle Corporation
500 Oracle Parkway
Redwood Shores, CA 94065
U.S.A.

Or send comments by e-mail to: globedoc@us.oracle.com

Please include your name, address, and telephone number for a reply:

Thank you for your help.

Preface

Welcome to Release 11*i* of the *Oracle® Financials Country-Specific Installation Supplement*.

This user guide includes information to help you effectively work with Oracle Global Financials and contains detailed information about the following:

- Overview and reference information
- General country information, such as responsibilities and report security groups, as well as any post-install steps required by countries or the Global Accounting Engine.

This preface explains how this user guide is organized and introduces other sources of information that can help you use Oracle Global Financials.

About this Country-Specific User Guide

This user guide documents country-specific functionality developed for use within your country and supplements our core Financials user guides. This user guide also includes tips about using core functionality to meet your country's legal and business requirements, as well as task and reference information. The following chapters are included:

- Chapter 1 describes the steps that you must follow when you create custom responsibilities and menus that provide access to globalization flexfield functionality.
- Chapter 2 describes the steps that you must follow to install Oracle Financials for Asia/Pacific.
- Chapter 3 describes the steps that you must follow to install Oracle Financials for Australia.
- Chapter 4 describes the steps that you must follow to install Oracle Financials for Latin America.
- Chapter 5 describes the steps that you must follow to install Oracle Financials for Europe.
- Chapter 6 describes the steps that you must follow to install Oracle Financials for Belgium.
- Chapter 7 describes the steps that you must follow to install Oracle Financials for Finland.
- Chapter 8 describes the steps that you must follow to install Oracle Financials for France.
- Chapter 9 describes the steps that you must follow to install Oracle Financials for Germany.
- Chapter 10 describes the steps that you must follow to install Oracle Financials for Italy.
- Chapter 11 describes the steps that you must follow to install Oracle Financials for Norway.
- Chapter 12 describes the steps that you must follow to install Oracle Financials Common Country Features.
- Chapter 13 describes the steps that you must follow to install the Oracle Applications Global Accounting Engine.
- Appendix A describes the request groups for Oracle Financials for Asia/Pacific.

- Appendix B describes the request groups for Oracle Financials for Latin America.
- Appendix C describes the request groups for Oracle Financials for Europe.
- Appendix D describes the request groups for Oracle Financials Common Country Features.
- Appendix E describes the request groups for Oracle Financials users in Japan.
- Appendix F describes which Global Financials products each country belongs to.

Audience for this Guide

This guide assumes you have a working knowledge of the following:

- The principles and customary practices of your business area.
- The Oracle Applications graphical user interface.

To learn more about the Oracle Applications graphical user interface, read the *Oracle Applications User Guide*.

See Other Information Sources for more information about Oracle Applications product information.

Other Information Sources

You can choose from other sources of information, including online documentation, training, and support services, to increase your knowledge and understanding of Oracle Global Financials.

If this user guide refers you to other Oracle Applications documentation, use only the Release 11*i* versions of those guides unless we specify otherwise.

Online Documentation

All Oracle Applications documentation is available online (HTML and PDF). The technical reference guides are available in paper format only. Note that the HTML documentation is translated into over twenty languages.

The HTML version of this guide is optimized for onscreen reading, and you can use it to follow hypertext links for easy access to other HTML guides in the library. When you have an HTML window open, you can use the features on the left side of the window to navigate freely throughout all Oracle Applications documentation.

- You can use the Search feature to search by words or phrases.
- You can use the expandable menu to search for topics in the menu structure we provide. The Library option on the menu expands to show all Oracle Applications HTML documentation.

You can view HTML help in the following ways:

- From an application window, use the help icon or the help menu to open a new Web browser and display help about that window.
- Use the documentation CD.
- Use a URL provided by your system administrator.

Your HTML help may contain information that was not available when this guide was printed.

Related User Guides

This user guide documents country-specific functionality developed in addition to our Oracle Financials core products. Because our country-specific functionality is used in association with our core Financials products and shares functional and setup information with other Oracle Applications, you should consult other related user guides when you set up and use Oracle Global Financials.

You can read the guides online by choosing Library from the expandable menu on your HTML help window, by reading from the Oracle Applications Document Library CD included in your media pack, or by using a Web browser with a URL that your system administrator provides.

If you require printed guides, you can purchase them from the Oracle store at <http://oraclestore.oracle.com>.

Oracle Applications User Guide

This guide explains how to navigate the system, enter data, and query information, and introduces other basic features of the GUI available with this release of Oracle Global Financials (and any other Oracle Applications product).

You can also access this user guide online by choosing "Getting Started and Using Oracle Applications" from the Oracle Applications help system.

Oracle Financials Common Country Features User Guide

This manual describes functionality developed to meet specific legal and business requirements that are common to several countries in a given region. Consult this user guide along with your country-specific user guide and your financial product's manual to effectively use Oracle Financials in your country.

Oracle Financials Country-Specific User Guides

These manuals document functionality developed to meet legal and business requirements in countries that you do business in. Look for a user guide that is appropriate to your country; for example, see the Oracle Financials for the Czech Republic User Guide for more information about using this software in the Czech Republic.

Oracle Financials Global Accounting Engine User Guide

Use the Global Accounting Engine to replace the transfer to General Ledger and create subledger accounting entries that meet additional statutory standards in some countries. The Accounting Engine provides subledger balances, legal reports, and bi-directional drilldown from General Ledger to the subledger transaction.

Oracle Financials RXi Reports Administration Tool User Guide

Use the RXi reports administration tool to design the content and layout of RXi reports. RXi reports let you order, edit, and present report information to better meet your company's reporting needs.

Oracle General Ledger User Guide

Use this manual when you plan and define your chart of accounts, accounting period types and accounting calendar, functional currency, and set of books. It also describes how to define journal entry sources and categories so that you can create journal entries for your general ledger. If you use multiple currencies, use this manual when you define additional rate types and enter daily rates. This manual also includes complete information on implementing budgetary control.

Oracle Purchasing User Guide

Use this manual to read about entering and managing the purchase orders that you match to invoices.

Oracle Payables User Guide

This manual describes how accounts payable transactions are created and entered into Oracle Payables. This manual also contains detailed setup information for Oracle Payables. Use this manual to learn how to implement flexible address formats for different countries. You can use flexible address formats in the suppliers, customers, banks, invoices, and payments windows in both Oracle Payables and Oracle Receivables.

Oracle Receivables User Guide

Use this manual to learn how to implement flexible address formats for different countries. You can use flexible address formats in the suppliers, customers, banks, invoices, and payments windows in both Oracle Payables and Oracle Receivables. This manual also explains how to set up your system, create transactions, and run reports in Oracle Receivables.

Oracle Assets User Guide

Use this manual to add assets and cost adjustments directly into Oracle Assets from invoice information.

Oracle Projects User Guide

Use this manual to learn how to enter expense reports in Projects that you import into Payables to create invoices. You can also use this manual to see how to create Project information in Projects which you can then record for an invoice or invoice distribution.

Oracle Cash Management User Guide

This manual explains how you can reconcile your payments with your bank statements.

Using Oracle HRMS - The Fundamentals

This user guide explains how to setup and use enterprise modeling, organization management, and cost analysis. It also includes information about defining payrolls.

Oracle Workflow Guide

This manual explains how to define new workflow business processes as well as customize existing Oracle Applications-embedded workflow processes. You also use this guide to complete the setup steps necessary for any Oracle Applications product that includes workflow-enabled processes.

Oracle Financials Open Interfaces Guide

This guide contains a brief summary of each Oracle Financial Applications open interface.

Oracle Applications Character Mode to GUI Menu Path Changes

This is a quick reference guide for experienced Oracle Applications end users migrating from character mode to a graphical user interface (GUI). This guide lists each character mode form and describes which GUI windows or functions replace it.

Multiple Reporting Currencies in Oracle Applications

If you use Multiple Reporting Currencies feature to report and maintain accounting records in more than one currency, use this manual before implementing Oracle Global Financials. The manual details additional steps and setup considerations for implementing Oracle Global Financials with this feature.

Multiple Organizations in Oracle Applications

If you use the Oracle Applications Multiple Organization Support feature to use multiple sets of books for one Oracle Financials installation, use this guide to learn about setting up and using Oracle Financials with this feature.

There are special considerations for using Multiple Organizations in Europe with document sequences, legal entity reporting, and drill-down from General Ledger. Consult the Multiple Organizations in Oracle Applications guide for more information about using Multiple Organizations in Europe.

Oracle Applications Flexfields Guide

This guide provides flexfields planning, setup, and reference information for your implementation team, as well as for users responsible for the ongoing maintenance of Oracle Applications product data. This guide also provides information on creating custom reports on flexfields data.

Oracle Alert User Guide

Use this guide to define periodic and event alerts that monitor the status of your Oracle Applications data.

Oracle Applications Implementation Wizard User Guide

If you are implementing more than one Oracle product, you can use the Oracle Applications Implementation Wizard to coordinate your setup activities. This guide describes how to use the wizard.

Oracle Applications Developer's Guide

This guide contains the coding standards followed by the Oracle Applications development staff. It describes the Oracle Application Object Library components needed to implement the Oracle Applications user interface described in the *Oracle Applications User Interface Standards*. It also provides information to help you build your custom Oracle Developer forms so that they integrate with Oracle Applications.

Oracle Applications User Interface Standards

This guide contains the user interface (UI) standards followed by the Oracle Applications development staff. It describes the UI for the Oracle Applications products and how to apply this UI to the design of an application built by using Oracle Forms.

Installation and System Administration

Installing Oracle Applications

This guide provides instructions for managing the installation of Oracle Applications products. In Release 11*i*, much of the installation process is handled using Oracle One-Hour Install, which minimizes the time it takes to install Oracle Applications and the Oracle 8*i* Server technology stack by automating many of the required steps. This guide contains instructions for using Oracle One-Hour Install and lists the tasks you need to perform to finish your installation. You should use this guide in conjunction with individual product user guides and implementation guides.

Upgrading Oracle Applications

Refer to this guide if you are upgrading your Oracle Applications Release 10.7 or Release 11.0 products to Release 11*i*. This guide describes the upgrade process in general and lists database upgrade and product-specific upgrade tasks. You must be at either Release 10.7 (NCA, SmartClient, or character mode) or Release 11.0 to upgrade to Release 11*i*. You cannot upgrade to Release 11*i* directly from releases prior to 10.7.

Oracle Applications Product Update Notes

Use this guide as a reference if you are responsible for upgrading an installation of Oracle Applications. It provides a history of the changes to individual Oracle Applications products between Release 11.0 and Release 11*i*. It includes new features and enhancements and changes made to database objects, profile options, and seed data for this interval.

Oracle Applications System Administrator's Guide

This guide provides planning and reference information for the Oracle Applications System Administrator. It contains information on how to define security, customize menus and online help, and manage processing.

Oracle Global Financial Applications Technical Reference Manual

The *Oracle Global Financial Applications Technical Reference Manual* contains database diagrams and a detailed description of regional and related applications database tables, forms, reports, and programs. This information helps you convert data from your existing applications, integrate Oracle Financials with non-Oracle applications, and write custom reports for Oracle Financials.

You can order a technical reference manual for any product you have licensed. Technical reference manuals are available in paper format only.

Training and Support

Training

We offer a complete set of training courses to help you and your staff master Oracle Applications. We can help you develop a training plan that provides thorough training for both your project team and your end users. We will work with you to organize courses appropriate to your job or area of responsibility.

Training professionals can show you how to plan your training throughout the implementation process so that the right amount of information is delivered to key people when they need it the most. You can attend courses at any one of our many Educational Centers, or you can arrange for our trainers to teach at your facility. We also offer Net classes, where training is delivered over the Internet, and many multimedia-based courses on CD. In addition, we can tailor standard courses or develop custom courses to meet your needs.

Support

From on-site support to central support, our team of experienced professionals provides the help and information you need to keep Oracle Global Financials working for you. This team includes your Technical Representative, Account Manager, and Oracle's large staff of consultants and support specialists with expertise in your business area, managing an Oracle server, and your hardware and software environment.

Do Not Use Database Tools to Modify Oracle Applications Data

We STRONGLY RECOMMEND that you never use SQL*Plus, Oracle Data Browser, database triggers, or any other tool to modify Oracle Applications tables, unless we tell you to do so in our guides.

Oracle provides powerful tools you can use to create, store, change, retrieve, and maintain information in an Oracle database. But if you use Oracle tools such as SQL*Plus to modify Oracle Applications data, you risk destroying the integrity of your data and you lose the ability to audit changes to your data.

Because Oracle Applications tables are interrelated, any change you make using an Oracle Applications form can update many tables at once. But when you modify Oracle Applications data using anything other than Oracle Applications forms, you might change a row in one table without making corresponding changes in related tables. If your tables get out of synchronization with each other, you risk retrieving erroneous information and you risk unpredictable results throughout Oracle Applications.

When you use Oracle Applications forms to modify your data, Oracle Applications automatically checks that your changes are valid. Oracle Applications also keeps track of who changes information. But, if you enter information into database tables using database tools, you may store invalid information. You also lose the ability to track who has changed your information because SQL*Plus and other database tools do not keep a record of changes.

About Oracle

Oracle Corporation develops and markets an integrated line of software products for database management, applications development, decision support and office automation, as well as Oracle Applications. Oracle Applications provides the E-business Suite, a fully integrated suite of more than 70 software modules for financial management, Internet procurement, business intelligence, supply chain management, manufacturing, project systems, human resources and sales and service management.

Oracle products are available for mainframes, minicomputers, personal computers, network computers, and personal digital assistants, enabling organizations to integrate different computers, different operating systems, different networks, and even different database management systems, into a single, unified computing and information resource.

Oracle is the world's leading supplier of software for information management, and the world's second largest software company. Oracle offers its database, tools, and application products, along with related consulting, education and support services, in over 145 countries around the world.

Thank You

Thank you for using this user guide.

We value your comments and feedback. Please use the Reader's Comment Form to explain what you like or dislike about Oracle Financials or this user guide. Mail your comments to the following address or call us directly at (650) 506-7000.

Setting Up Globalization Flexfields for Custom Responsibilities

This chapter overviews the steps that you must follow when you create custom responsibilities and menus that provide access to globalization flexfield functionality.

Setting up Globalization Flexfields

In Release 10.7 10SC Production 16, globalization flexfields were added into the setup and transaction windows of many Oracle Applications products. These new flexfields are used to enable country-specific and regional features that were built as a part of Oracle Applications' continuing effort to increase worldwide functional depth.

Adopt these examples as your standard when you create custom responsibilities and menus that provide access to globalization flexfield functionality.

This chapter shows examples of how to create custom menus and responsibilities when you use regional or country-specific features. The examples show the setup for a new Greek Receivables responsibility. They demonstrate how to define the top of the menu hierarchy, how to define a responsibility, and how to set the profile variables at responsibility level.

Creating New Menus

You must include the *JG Global Flexfield enabled flag* form function in your Oracle Financials for Europe menu hierarchy to enable globalization flexfield features.

This screenshot shows the top menu for a new Greek Receivables responsibility. You can add the *JG Global Flexfield enabled flag* form function, however, to any menu where you require globalization flexfields to be enabled.

Seq	Navigator Prompt	Submenu	Function	Description
1	Receivables Loc	JG_AR_NAVIGATE_GUI		Shared Receivables Localizations Me
2	Customer Turno		Customer Turnover Exc	Customer Turnover Data Exclusion R
4	Other	FND_OTHER 4.0		Other
10			JG Global Flexfield ena	
11	Standard	AR_NAVIGATE_GUI		

Note: You do not have to include the *JG Global Flexfield enabled flag* form function in the top menus for Oracle Financials for Latin America and Oracle Financials for Asia/Pacific, as the form function is already defined for those menus.

Creating New Responsibilities

For each custom responsibility that uses windows with country-specific or regional features, ensure that:

- The application is set to your regional application.
- The menu is created according to the example in the *Creating New Menus* section.

The screenshot shows the 'Responsibilities' configuration window in Oracle. The window is titled 'Responsibilities' and contains several sections for configuring a new responsibility.

Responsibility Name: GREEK AR Localizations

Application: European Localizations

Responsibility Key: GREEK_AR_LOCALIZATIO-700221662

Description: GREEK AR Localizations

Effective Dates: From 01/JAN/1901 To

Available From: ☒ Oracle Applications ☐ Oracle Self Service Web Applications

Data Group: Name Standard Application European Localizations

Menu: JE_GR_AR_NAVIGATE_GUI

Web Host Name:

Web Agent Name:

Request Group: Name GREEK AR Reports Application European Localizations

Menu Exclusions: Excluded Items Securing Attributes

Type	Name	Description
Function		

Setting Profile Options

For each custom responsibility that uses windows with country-specific or regional features, you must set three profile variables.

Profile	Site	Application	Responsibility	User
JG: Application			Greek AR Localiza	
JG: Product			Oracle Receivab...	
JG: Territory			European Localiza	
			Greece	

1. JG: Application

JG: Application is used to determine which Oracle Applications product the responsibility is associated with. The list of values for this profile consists of a complete list of Oracle Applications products.

In this example, the Greek AR Localization responsibility is associated with Oracle Receivables.

2. JG: Territory

JG: Territory is used to determine which country the responsibility is associated with. The list of values for this profile consists of a list of countries.

In this example, the Greek AR Localization responsibility is associated with Greece.

(continued)

3. JG: Product

JG: Product is used to determine which Global Financials product the responsibility is associated with. The list of values for this profile consists of a list of Global Financials products.

If you are not sure which product your country belongs to, refer to *Appendix F, Global Financials Products* on page 179.

In this example, the Greek AR Localization responsibility is associated with European Localizations.

Using Globalization Flexfields

Oracle Global Financials use globalization flexfields to enter country-specific information into core windows.

To display globalization flexfields:

1. Select Show Field in the Folders menu.
2. Select “()” from the list of fields.

Oracle Financials displays the globalization flexfield window and adds the globalization flexfield column, labeled with “()”, to the core window.

Once the globalization flexfield column is added to the core window, you can access the globalization flexfield window at any time by clicking in the column.

Windows that Use Globalization Flexfields

This section lists the Oracle Applications windows that use globalization flexfields and the corresponding menus for which globalization flexfields must be enabled.

Oracle Financials for Asia/Pacific Post-Install Steps

This chapter explains the steps that you must follow to install Oracle Financials for Asia/Pacific. You must complete these steps after AutoInstall has installed your localization.

Asia/Pacific Post-Install Steps

You must complete these post-install steps for all Oracle Financials for Asia/Pacific installations. The sections that follow elaborate on each general post-install step.

1. Attach core Financials menus to localization menus
2. Attach new responsibilities to users

1. Attach Core Financials Menus to Localization Menus

A responsibility and menu hierarchy were created for each country that has localization features; however, the menus for these responsibilities do not include any core Financials product menus. You must add core Financials product menus to the Oracle Financials for Asia/Pacific localization menus to use core functionality.

Use the Menus window to add core Financials product menus to the base menus for these responsibilities:

Localization Responsibility	Localization Base Menu
Australian Assets	JA_AU_FA_NAVIGATE_GUI
Australian Inventory	JA_AU_INV_NAVIGATE_GUI
Australian Payables	JA_ZZ_AP_NAVIGATE_GUI
Australian Purchasing	JA_AU_PO_NAVIGATE_GUI
Canadian Payables	JA_CA_AP_NAVIGATE_GUI
Canadian Purchasing	JA_CA_PO_NAVIGATE_GUI
Korean Assets	JA_KR_FA_NAVIGATE_GUI
Korean Payables	JA_ZZ_AP_NAVIGATE_GUI
Korean Receivables	JA_KR_AR_NAVIGATE_GUI
Singaporean General Ledger	JA_SG_GL_NAVIGATE_GUI
Singaporean Payables	JA_SG_AP_NAVIGATE_GUI
Singaporean Receivables	JA_SG_AR_NAVIGATE_GUI
Taiwanese Payables	JA_TW_AP_NAVIGATE_GUI
Taiwanese Receivables	JA_TW_AR_NAVIGATE_GUI
Thai Inventory	JA_TH_INV_NAVIGATE_GUI
Thai Payables	JA_TH_AP_NAVIGATE_GUI
Thai Receivables	JA_TH_AR_NAVIGATE_GUI

Use this table to determine which core Financials menu to add to the localization base menu for each of the responsibility types:

For this responsibility type...	Add this menu...
Oracle Assets	FA_MAIN
Oracle General Ledger	GL_SUPERUSER
Oracle Inventory	INV_NAVIGATE
Oracle Payables	AP_NAVIGATE_GUI12
Oracle Purchasing	Purchasing SuperUser GUI
Oracle Receivables	AR_NAVIGATE_GUI

Example: Add Oracle Payables base menu to Thai Payables base menu

This example shows how to add a core Financials product menu to a localization base menu.

The screenshot shows the 'Menus' window in Oracle. The 'Menu' field is set to 'JA_TH_AP_NAVIGATE_GUI'. The 'User Menu Name' is 'JA_TH_AP_NAVIGATE_GUI' and the 'Description' is 'Thai Payables Main Menu'. Below this is a table with columns: Seq, Navigator Prompt, Submenu, Function, and Description.

Seq	Navigator Prompt	Submenu	Function	Description
10	Thai Localizatio	JA_TH_AP_TOP		Thai Localizations
20			JG Global Flexfield ena	
30	Accounts Payab	AP_NAVIGATE_GUI12		

1. Navigate to the Menus window from the System Administrator responsibility.
2. Query the localization menu. In this example, query the JA_TH_AP_NAVIGATE_GUI Thai Payables menu.

3. Enter the appropriate core Financials menu in the Submenu field. Use the table above to find the appropriate core Financials menu. In this example, enter *AP_NAVIGATE_GUI12* for Oracle Payables.
4. Enter appropriate values in the Navigator Prompt and Description fields. In this example, enter *Accounts Payable*.
5. Save your work.

2. Attach New Responsibilities to Users

You can access new responsibilities once you have installed localizations. The localized responsibilities for each country are organized by product.

Each localized responsibility has a localized menu and request group that provide access to country-specific functionality. Menus in country-specific responsibilities provide access to the country's windows; request groups provide access to the country's reports.

You must attach relevant responsibilities to the applications users to access localization functionality. If you create custom menus, use the country-specific menus attached to the localization responsibilities listed in *Step 1. Attach Core Financials Menus to Localization Menus* on page 37 as a guide for granting users access to localization functionality.

To create new applications users, or to add or modify responsibilities for existing applications users:

1. Log on to the System Administrator responsibility.
2. Navigate to the Users window.
3. Enter information for your users.

See also

Users Window,

Oracle Applications System Administrator's Guide

You should use country-specific responsibilities only when the relevant countries are fully installed. All functionality is designed and built for a specific country. Oracle supports country-specific functionality only for intended countries; functionality built for one country but used for another is not supported.

If you are using other base product responsibilities, or you have customized your own, refer to *Appendix A, Oracle Financials for Asia/Pacific Request Groups* on page 95 as a guide for implementing your report security groups.

CHAPTER

Australian 3 Post-Install Steps

This chapter explains the steps that you must follow to install Oracle Financials for Australia. You must complete these steps after AutoInstall has installed your localization.

Australian Post-Install Steps

There are five post-install steps for Australia:

1. Create lookups for Automatic Withholding Tax Certificate Types
2. Create Lookup Values for Retirement Type.
3. Create a Price Index for Capital Gains Tax.
4. Create Lookup Values for Property Type.
5. Enable Balancing Charges.

1. Create Lookups for Automatic Withholding Tax Certificate Types

To create lookups for Automatic Withholding Tax Certificate types:

1. Log in to your Financials system and select the Australian Payables responsibility.
2. Navigate to the Oracle Payables Lookups window.
3. In the Type field, query the AWT CERTIFICATE TYPES lookup type.
4. In the Code field, enter *Variation*.
5. In the Meaning field, enter *Variation*.
6. In the Description field, enter *Variation Certificate*.
7. Check the Enabled check box.
8. Select the next line.
9. In the Code field, enter *Exemption*.
10. In the Meaning field, enter *Exemption*.
11. In the Description field, enter *Exemption Certificate*.
12. Check the Enabled check box.
13. Select the next line.
14. In the Code field, enter *Reporting*.
15. In the Meaning field, enter *Reporting*.
16. In the Description field, enter *Reporting Exemption Certificate*.

17. Check the Enabled check box.
18. Save your work.

2. Create Lookup Values for Retirement Type

To create a new retirements type for scrapped or demolished assets:

1. Log in to your Financials system and select the Australian Assets responsibility.
2. Navigate to the QuickCodes window.
3. In the Type field, query the RETIREMENT lookup type.
4. In the Value field, enter *SCRAP/DEMOL*.
5. In the Description field, enter *Scrapped or Demolished Asset*.
6. Save your work.

3. Create a Price Index for Capital Gains Tax

Value %	From Date	To Date	

To define Capital Gains Tax (CGT) index values for the Capital Gains Tax report:

1. Log in to your financial system and select the Australian Assets responsibility.
2. Enter *CGT* in the Index field to create an index.
3. Add new CGT indices using the table on pages 45-46 as a guide. Refer to this table for values to enter in the *Value %* and *To Date* fields. The *From Date* field defaults to an appropriate value.
4. Save your changes.

Capital Gains Tax Index Values

Use this table to create a price index for the Capital Gains Tax report. The table shows the values that you should enter in the *Value %* and *To Date* fields in the Price Indexes window.

December 1985 - June 1997		
Date	Year	Value %
December	1985	72.7
March	1986	74.4
June	1986	75.6
September	1986	77.6
December	1986	79.8
March	1987	81.4
June	1987	82.6
September	1987	84.0
December	1987	85.5
March	1988	87.0
June	1988	88.5
September	1988	90.2
December	1988	92.0
March	1989	92.9
June	1989	95.2
September	1989	97.4
December	1989	99.2
March	1990	100.9
June	1990	102.5
September	1990	103.3
December	1990	106.0
March	1991	105.8

(continued)

Date	Year	Value %
June	1991	106.0
September	1991	106.6
December	1991	107.6
March	1992	107.6
June	1992	107.3
September	1992	107.4
December	1992	107.9
March	1993	108.9
June	1993	109.3
September	1993	109.8
December	1993	110.0
March	1994	110.4
June	1994	111.2
September	1994	111.9
December	1994	112.8
March	1995	114.7
June	1995	116.2
September	1995	117.6
December	1995	118.5
March	1996	119.0
June	1996	119.8
September	1996	120.1
December	1996	120.3
March	1997	120.5
June	1997	120.2

4. Create Lookup Values for Property Type

To create a new property type for DIV 10D assets:

1. Log in to your financial system and select the Australian Assets responsibility.
2. Query the PROPERTY TYPE lookup type.
3. In the Value field, enter *DIV 10D*.
4. In the Description field, enter *Division 10D Property*.
5. Save your work.

5. Enable Balancing Charges

To enable Balancing Charges:

1. Select the Enable Balancing Charges Menu option.
2. Query the set of books that you want to enable balancing charges for.
3. Check the Enable Balancing Charges check box to enable balancing charges. If you want to disable balancing charges, click on the Enable Balancing Charges check box again.
4. Select OK to save this change.

Oracle Financials for Latin America Post-Install Steps

This chapter explains the steps that you must follow to install Oracle Financials for Latin America. You must complete these steps after AutoInstall has installed your localization.

Latin American Post-Install Steps

You must complete these post-install steps for all Oracle Financials for Latin America installations. The sections that follow elaborate on each general post-install step.

1. Attach core Financials menus to localization menus
2. Attach new responsibilities to users

1. Attach Core Financials Menus to Localization Menus

A responsibility and menu hierarchy were created for each country that has localization features; however, the menus for these responsibilities do not include any core Financials product menus. You must add core Financials product menus to the Oracle Financials for Latin America localization menus to use core functionality.

Use the Menus window to add core Financials product menus to the base menus for these responsibilities:

Country	Localization Responsibility	Localization Base Menu
Argentina	Argentine Payables	JL_AR_AP_NAVIGATE_GUI12
Argentina	Argentine Receivables	JL_AR_AR_NAVIGATE_GUI
Argentina	Argentine Fixed Assets	JL_AR_FA_MAIN
Argentina	Argentine General Ledger	JL_AR_GL_SUPERUSER
Brazil	Brazilian Payables	JL_BR_AP_NAVIGATE_GUI12
Brazil	Brazilian Receivables	JL_BR_AR_NAVIGATE_GUI
Brazil	Brazilian General Ledger	JL_BR_GL_SUPERUSER
Brazil	Brazilian Inventory	INV_NAVIGATE
Brazil	Brazilian Purchasing	JL_BR_PO_NAVIGATE_GUI
Chile	Chilean Payables	JL_CL_AP_NAVIGATE_GUI12
Chile	Chilean Receivables	JL_CL_AR_NAVIGATE_GUI
Chile	Chilean Fixed Assets	JL_CL_FA_NAVIGATE_GUI
Chile	Chilean General Ledger	JL_CL_GL_SUPERUSER
Colombia	Colombian Payables	JL_CO_AP_NAVIGATE_GUI12
Colombia	Colombian Receivables	JL_CO_AR_NAVIGATE
Colombia	Colombian Fixed Assets	JL_CO_FA_MAIN
Colombia	Colombian General Ledger	JL_CO_GL_SUPERUSER
Mexico	Mexican Fixed Assets	JL_MX_FA_MAIN

Note: The Brazilian Inventory responsibility already accesses the standard product menu.

Use this table to determine which core Financials menu to add to the localization base menu for each of the responsibility types:

For this responsibility type...	Add this menu...
Oracle Assets	FA_MAIN
Oracle General Ledger	GL_SUPERUSER
Oracle Inventory	INV_NAVIGATE
Oracle Payables	AP_NAVIGATE_GUI12
Oracle Purchasing	Purchasing SuperUser GUI
Oracle Receivables	AR_NAVIGATE_GUI

Example: Add Oracle Payables base menu to Argentine Payables base menu

This example shows how to add a core Financials product menu to a localization base menu.

The screenshot shows the 'Menus' window in Oracle. The 'Menu' field is set to 'JL_AR_AP_NAVIGATE_GUI12'. The 'User Menu Name' is 'JL_AR_AP_NAVIGATE_GUI12' and the 'Description' is 'Argentine Payable Manager'. Below this is a table with the following data:

Seq	Navigator Prompt	Submenu	Function	Description
1	Argentine Local	JL_AR_AP_LOCALIZATI		Argentine Localization of Oracle Pay
2			JG Global Flexfield ena	
3			Define Invoice Distribut	
4	Oracle Payables	AP_NAVIGATE_GUI12		

1. Navigate to the Menus window from the System Administrator responsibility.
2. Query the localization menu. In this example, query the JL_AR_AP_NAVIGATE_GUI12 Argentine Payables menu.

3. Enter the appropriate core Financials menu in the Submenu field. Use the table above to find the appropriate core Financials menu. In this example, enter *AP_NAVIGATE_GUI12* for Oracle Payables.
4. Enter appropriate values in the Navigator Prompt and Description fields. In this example, enter *Oracle Payables*.
5. Save your work.

2. Attach New Responsibilities to Users

You can access new responsibilities once you have installed localizations. The localized responsibilities for each country are organized by product.

With the exception of the Brazilian Inventory responsibility, which accesses the standard product menu, each localized responsibility has a localized menu and request group that provide access to country-specific functionality. Menus in country-specific responsibilities provide access to the country's windows; request groups provide access to the country's reports.

You must attach relevant responsibilities to the applications users to access localization functionality. If you create custom menus, use the country-specific menus attached to the localization responsibilities listed in *Step 1. Attach Core Financials Menus to Localization Menus* on page 51 as a guide for granting users access to localization functionality.

To create new applications users, or to add or modify responsibilities for existing applications users:

1. Log on to the System Administrator responsibility.
2. Navigate to the Users window.
3. Enter information for your users.

See also

Users Window,

Oracle Applications System Administrator's Guide

You should use country-specific responsibilities only when the relevant countries are fully installed. All functionality is designed and built for a specific country. Oracle supports country-specific functionality only for intended countries; functionality built for one country but used for another is not supported.

If you are using other base product responsibilities, or you have customized your own, refer to *Appendix B, Oracle Financials for Latin America Request Groups* on page 103 as a guide for implementing your report security groups.

Oracle Financials for Europe Post-Install Steps

This chapter explains the steps that you must follow to install Oracle Financials for Europe. You must complete these steps after AutoInstall has installed your localization.

European Post-Install Steps

You must complete these post-install steps for all Oracle Financials for Europe installations. The sections that follow elaborate on each general post-install step.

1. Attach core Financials menus to localization menus.
2. Attach new responsibilities to users
3. Add the Contra Charging menu and request group to your responsibility
4. Add the RECONCILIATION FLAG segment qualifier to the accounting flexfield
5. Create historical subledger balances
6. Add a new context to the Oracle Receivables Invoice and Line Transaction flexfields
7. Create a new index for Interest Invoice functionality
8. Enable the SWIFT Code field in the Enter Banks window

1. Attach Core Financials Menus to Localization Menus

A responsibility and menu hierarchy were created for each country that has localization features; however, the menus for these responsibilities do not include any core Financials product menus. You must add core Financials product menus to the Oracle Financials for Europe localization menus to use core functionality.

Use the Menus window to add core Financials product menus to the base menus for these responsibilities:

Country	Localization Responsibility	Localization Base Menu
Austria	Austrian Payables	JE_AT_AP_NAVIGATE_GUI
	Austrian General Ledger	JE_AT_GL_NAVIGATE_GUI
Belgium	Belgian Payables	JE_BE_AP_NAVIGATE_GUI
	Belgian Receivables	JE_BE_AR_NAVIGATE_GUI
	Belgian General Ledger	JE_BE_GL_NAVIGATE_GUI
Czech Republic	Czech Payables	JE_CZ_AP_NAVIGATE_GUI
	Czech Receivables	JE_CZ_AR_NAVIGATE_GUI
	Czech General Ledger	JE_CZ_GL_NAVIGATE_GUI
Denmark	Danish Payables	JE_DK_AP_NAVIGATE_GUI
	Danish Receivables	JE_DK_AR_NAVIGATE_GUI
	Danish General Ledger	JE_DK_GL_NAVIGATE_GUI
Finland	Finnish Payables	JE_FI_AP_NAVIGATE_GUI
	Finnish Receivables	JE_FI_AR_NAVIGATE_GUI
	Finnish General Ledger	JE_FI_GL_NAVIGATE_GUI
France	French Payables	JE_FR_AP_NAVIGATE_GUI
	French General Ledger	JE_FR_GL_NAVIGATE_GUI

(continued)

Country	Localization Responsibility	Localization Base Menu
Germany	Germany Payables	JE_DE_AP_NAVIGATE_GUI
	German Receivables	JE_DE_AR_NAVIGATE_GUI
	German General Ledger	JE_DE_GL_NAVIGATE_GUI
Greece	Greek Payables	JE_GR_AP_NAVIGATE_GUI
	Greek Receivables	JE_GR_AR_NAVIGATE_GUI
	Greek General Ledger	JE_GR_GL_NAVIGATE_GUI
Hungary	Hungarian Payables	JE_HU_AP_NAVIGATE_GUI
	Hungarian Receivables	JE_HU_AR_NAVIGATE_GUI
	Hungarian General Ledger	JE_HU_GL_NAVIGATE_GUI
Italy	Italian Payables	JE_IT_AP_NAVIGATE_GUI
	Italian Receivables	JE_IT_AR_NAVIGATE_GUI
	Italian General Ledger	JE_IT_GL_NAVIGATE_GUI
Netherlands	Netherlands Payables	JE_NL_AP_NAVIGATE_GUI
	Netherlands General Ledger	JE_NL_GL_NAVIGATE_GUI
Norway	Norwegian Payables	JE_NO_AP_NAVIGATE_GUI
	Norwegian Receivables	JE_NO_AR_NAVIGATE_GUI
	Norwegian General Ledger	JE_NO_GL_NAVIGATE_GUI
Poland	Polish Payables	JE_PL_AP_NAVIGATE_GUI
	Polish Receivables	JE_PL_AR_NAVIGATE_GUI
	Polish General Ledger	JE_PL_GL_NAVIGATE_GUI
Portugal	Portuguese Payables	JE_PT_AP_NAVIGATE_GUI
	Portuguese General Ledger	JE_PT_GL_NAVIGATE_GUI

Country	Localization Responsibility	Localization Base Menu
Spain	Spanish Payables	JE_ES_AP_NAVIGATE_GUI
	Spanish General Ledger	JE_ES_GL_NAVIGATE_GUI
Sweden	Swedish Payables	JE_SE_AP_NAVIGATE_GUI
	Swedish Receivables	JE_SE_AR_NAVIGATE_GUI
	Swedish General Ledger	JE_SE_GL_NAVIGATE_GUI
Switzerland	Swiss Payables	JE_CH_AP_NAVIGATE_GUI
	Swiss General Ledger	JE_CH_GL_NAVIGATE_GUI
Turkey	Turkish Payables	JE_TR_AP_NAVIGATE_GUI
	Turkish Receivables	JE_TR_AR_NAVIGATE_GUI
	Turkish General Ledger	JE_TR_GL_NAVIGATE_GUI

These menus are sub-menus of the JE menus listed in the previous table:

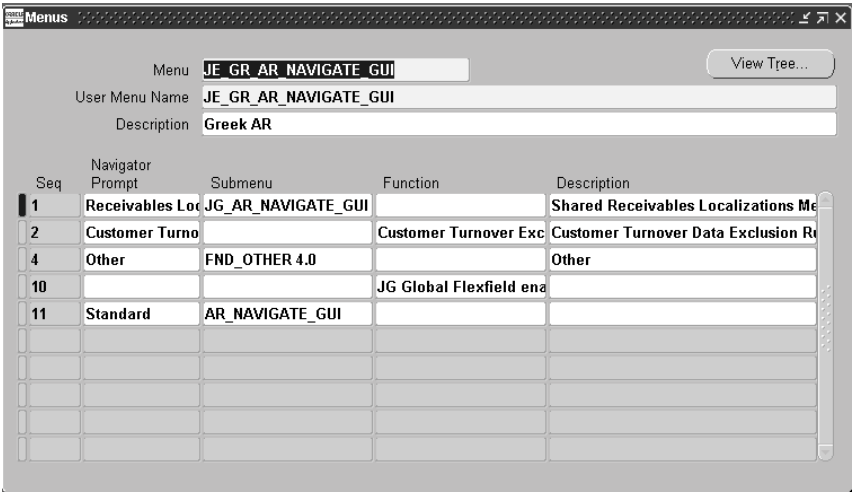

- JG_AP_NAVIGATE_GUI
- JG_AR_NAVIGATE_GUI
- JG_FA_NAVIGATE_GUI
- JG_GL_NAVIGATE_GUI
- JG_CONTRA CHARGE_GUI
- JG_INT_INV_GUI

Use this table to determine which core Financials menu to add to the localization base menu for each of the responsibility types:

For this responsibility type...	Add this menu...
Oracle Assets	FA_MAIN
Oracle General Ledger	GL_SUPERUSER
Oracle Inventory	INV_NAVIGATE
Oracle Payables	AP_NAVIGATE_GUI12
Oracle Purchasing	Purchasing SuperUser GUI
Oracle Receivables	AR_NAVIGATE_GUI

Example: Add Oracle Payables base menu to Greek Receivables base menu

This example shows how to add a core Financials product menu to a localization base menu.

1. Navigate to the Menus window from the System Administrator responsibility.
2. Query the localization menu. In this example, query the JE_GR_AR_NAVIGATE_GUI Greek Receivables menu.

3. Enter the appropriate core Financials menu in the Submenu field. Use the table above to find the appropriate core Financials menu. In this example, enter *AR_NAVIGATE_GUI* for Oracle Receivables.
4. Enter appropriate values in the Navigator Prompt and Description fields. In this example, enter *Standard*.
5. Save your work.

2. Attach New Responsibilities to Users

You can access new responsibilities once you have installed localizations. The localized responsibilities for each country are organized by product.

Each country has localized responsibilities that provide access to all windows and reports relevant to that country, as well as to regional localization functionality which is included with all European responsibilities. Menus in country-specific responsibilities provide access to the country's windows; request groups provide access to the country's reports.

You must attach the relevant responsibilities to the applications users to access localization functionality. If you create custom menus, use the country-specific menus attached to the localization responsibilities listed in *Step 1. Attach Core Financials Menus to Localization Menus* on page 57 as a guide for granting users access to localization functionality.

To create new applications users, or to add or modify responsibilities for existing applications users:

1. Log on to the System Administrator responsibility.
2. Navigate to the Users window.
3. Enter information for your users.

See also

Users Window,

Oracle Applications System Administrator's Guide

You should use country-specific responsibilities only when the relevant countries are fully installed. All functionality is designed and built for a specific country. Oracle supports country-specific functionality only for intended countries; functionality built for one country but used for another is not supported.

If you are using other base product responsibilities, or you have customized your own, refer to *Appendix C, Oracle Financials for Europe Request Groups* on page 119 as a guide for implementing your report security groups.

3. Add the Contra Charging Menu and Request Group to Your Responsibility

If you plan to use the regional Contra Charging functionality, your system administrator should add the menu JG_CONTRA_CHARGE_GUI to the relevant menu hierarchy for your responsibility. The system administrator should also assign the Regional Contra Charging request group to that responsibility.

4. Add the RECONCILIATION FLAG Segment Qualifier to the Accounting Flexfield

To use the General Ledger Entry Reconciliation regional functionality, you must first modify the Accounting Flexfield structure by adding the RECONCILIATION FLAG Segment Qualifier to the accounting segment. Run this script to add the RECONCILIATION FLAG Segment Qualifier to the GL_ACCOUNT qualifier of the Accounting Flexfield:

```
$ cd $JG_TOP/admin/sql
$ sqlplus <APPS username>/<APPS password> @jgzzersq.sql
```

5. Create Historical Subledger Balances

If you plan to use subledger reports in your implementation, you may need to retroactively create the summary balances for accounting periods that are already closed. This process is normally manually run after the accounting periods are closed. If you are installing localizations on an installation that already has closed accounting periods in Oracle Receivables or Oracle Payables, you may want to retroactively create the balances.

To retroactively create balances, use these concurrent programs created for opening and closing accounting periods in the Oracle Payables and Oracle Receivables subledgers:

- Subledger Balance Maintenance for Receivables Accounting Periods
- Subledger Balance Maintenance for Payables Accounting Periods

You can access these programs from all localization responsibilities that were created as part of the Release 11*i* installation or upgrade. Run each program once for each set of books. Use these programs to close all subledger periods that correspond to previously opened Oracle Payables and Oracle Receivables accounting periods that are now closed. You do not have to re-open the subledger balance periods first.

For example, in Oracle Payables:

Period	Status
Nov-96	Never Opened
Dec-96	Closed
Jan-97	Closed
Feb-97	Open
Mar-97	Never Opened

Run the concurrent program Subledger Balance Maintenance for Payables Accounting Periods:

Period From: Dec-96

Period To: Jan-97

Open/Close: Close

Attention: Running these balance-creation programs effectively mimics the subledger to General Ledger posting programs. These programs may take a considerable amount of time to complete on some large systems as a result. If you wish to create historical balances on an implementation with especially large transaction numbers, you might need assistance from Oracle Consulting Services.

6. Add New Context to the Oracle Receivables Invoice and Line Transaction Flexfields

If you plan to use Interest Invoice functionality, you should add a new context to the Oracle Receivables Invoice and Line Transaction Flexfields. Interest Invoice functionality is used in these four Scandinavian countries:

- Denmark
- Finland
- Norway
- Sweden

Run this script to add the new context to each of the Oracle Receivables Invoice and Line Transaction Flexfields:

```
$ cd $JG_TOP/admin/sql
$ sqlplus <APPS username>/<APPS password> @jgzzartf.sql
```

7. Create New Index for Interest Invoice Functionality

If you plan to use Interest Invoice functionality, you should create a new index on the RA_CUSTOMER_TRX_ALL table. Interest Invoice functionality is used in these four Scandinavian countries:

- Denmark
- Finland
- Norway
- Sweden

Run this script to add the index:

```
$ cd $JG_TOP/admin/sql
$ sqlplus <APPS username>/<APPS password> @jgzziicx.sql
  <AR username> <AR password>
```

8. Enable SWIFT Code Field on Enter Banks Window

If you plan to use Oracle Financials for Denmark, Finland, Norway, or Switzerland, you should enable the SWIFT Code field on the Enter Banks window. Run this script to enable the SWIFT Code field:

```
$ cd $JG_TOP/admin/sql
$ sqlplus <APPS username>/<APPS password> @jgzzswift.sql
```

Belgian Post-Install Steps

6

This chapter explains the steps that you must follow to install Oracle Financials for Belgium. You must complete these steps after AutoInstall has installed your localization.

Belgian Post-Install Steps

There is one post-install step for Belgium: Create Belgian reporting calendars.

Creating Belgian reporting calendars

If you plan to use Oracle Financials for Belgium, install Belgian reporting calendars. Run these scripts to install the calendars:

```
$ cd $JE_TOP/admin/sql
$ sqlplus <APPS username>/<APPS password> @jebecal1.sql
$ sqlplus <APPS username>/<APPS password> @jebeper1.sql
```

CHAPTER

7

Finnish Post-Install Steps

This chapter explains the steps that you must follow to install Oracle Financials for Finland. You must complete these steps after AutoInstall has installed your localization.

Finnish Post-Install Steps

There are three post-install steps for Finland:

1. Create a new Build Payments concurrent program.
2. Modify the Finnish Payment Build Set.
3. Create values for Finnish Value Sets.

1. Create a New Build Payments Concurrent Program

To create the Finnish Build Payments program definition for use in the report set:

1. Navigate to the Concurrent Programs window.

The screenshot shows the 'Concurrent Programs' window. It has several sections: 'Program' with fields for Program, Short Name, Application, and Description, and an 'Enabled' checkbox. 'Executable' section includes Name, Method, Options, and Priority. 'Request' section includes Type, Incrementor, and MLS Function, with checkboxes for 'Use In SRS', 'Run Alone', 'Enable Trace', 'Allow Disabled Values', 'Restart on System Failure', and 'NLS Compliant'. 'Output' section includes Format (set to 'Text'), 'Save (S)' and 'Print' checkboxes, Columns, Rows, Style, 'Style Required' checkbox, and Printer. At the bottom are buttons for 'Copy to...', 'Session Control', 'Incompatibilities', and 'Parameters'.

2. Query the concurrent program with the short name *APXPBBLD*.

- Press the Copy to button. The Copy to window appears.

- Enter *Finnish Build Payments* in the Program field.
- Enter a new program short name in the Short Name field.
- Enter *European Localizations* in the Application field.
- Press the OK button. The Concurrent Programs window appears for *Finnish Build Payments*.
- Check the Use in SRS check box.
- Add two new parameters with these steps:

To add the first parameter:

- In the Concurrent Programs window, press the Parameters button. The Concurrent Program Parameters window appears.

(continued)

2. Enter these values for the first parameter:

In this field...	Enter this value...
Seq	1
Parameter	Batch Name

3. Enter these values in the Validation region:

In this field...	Enter this value...
Value Set	AP_SRS_PRELIM_PAYBATCH
Required	Yes
Enable Security	No
Display	Yes
Display Size	30
Description Size	50
Concatenated Description Size	25
Prompt	Batch Name
Token	P_PAYMENT_BATCH

4. Leave the remaining fields blank.
5. Save your work.

To add the second parameter:

1. Navigate back to the Concurrent Program Parameters window.
2. Enter these values for the second parameter.

In this field...	Enter this value...
Seq	2
Parameter	Confirm Now

3. Enter these values in the Validation region:

In this field...	Enter this value...
Value Set	Generic
Required	Yes
Enable Security	No
Display	No
Default Type	Constant
Default Value	No
Display Size	10
Description Size	50
Concatenated Description Size	25
Prompt	Confirm Now
Token	P_CONFIRM_NOW

4. Leave the remaining fields blank.
5. Save your work.

2. Modify the Finnish Payment Build Set

To modify the Finnish Payment Build Set:

1. Navigate to the Request Set window.

The Request Set window is a dialog box with a title bar. It contains several input fields and checkboxes. The fields are: Set, Set Code, Application, Description, and Owner. The Active Dates section has a From field with the value 14/MAR/2001 and a To field. The Run Options section has two checkboxes: Print Together and Allow Incompatibility. At the bottom, there are three buttons: Request Set Wizard, Define Stages, and Link Stages.

2. Query the *Finnish Payment Build Set* report set with the *European Localizations* application.
3. Press the Define Stages button. The Stages window appears.

The Stages window is a dialog box with a title bar. It contains several input fields and checkboxes. The fields are: Set, Set Application, Stage Code, Function, and Application. The Display Sequence section has a table with columns Stage and Description. The Stage Details section has a Function field and a Parameters button. At the bottom, there are two checkboxes: The Return Value of This Stage Affects the Set Outcome and Allow Incompatibility. A Requests button is located at the bottom right.

- Enter this information in the Stages window:

In this field...	Enter this value...
Display Sequence	15
Stage	Finnish Build Payments
Description	Finnish build selected payments
Stage Code	STAGE15

- Press the Requests button. The Stage Requests window appears.

The screenshot shows the 'Stage Requests' window. It has a title bar with standard window controls. The main area contains several input fields: 'Set', 'Stage', 'Set Application', and 'Allow Stage Function to Use This Program's Results'. Below these is a table with columns 'Seq', 'Program', 'Application', and 'Description'. The first row is selected. At the bottom, there are 'Print Options' including 'Copies' (set to 0), 'Style', 'Printer', and a 'Save' checkbox. A 'Parameters' button is at the bottom right.

- Enter this information to add the new report to the report set:

In this field...	Enter this value...
Seq	1
Program	Finnish Build Payments

(continued)

- Press the Parameters button. The Request Parameters window appears.

[illegible]

8. Enter this information for the Batch name parameter:

In this field...	Enter this value...
Display	No
Shared Parameter	CHECKRUN

9. Save your work.

10. Navigate back to the Request Set window.
11. Press the Link Stages button. The Link Stages window appears.

12. Enter this information for the Finnish Validation Sql stage:

In this field...	Enter this value...
Stage To Proceed To On Success	Finnish Build Payments
Stage To Proceed To On Warning	Finnish Build Payments

Note: Leave the Stage To Proceed To On Error field blank.

13. Enter this information for the Finnish Build Payments stage:

In this field...	Enter this value...
Stage To Proceed To On Success	Preliminary Payment Register
Stage To Proceed To On Warning	Preliminary Payment Register

Note: Leave the Stage To Proceed To On Error field blank.

(continued)

14. Press the Done button to save your work.

The completed Finnish Payment Build report set should look like this:

Sequence	Stage
10	Finnish Validation Sql
15	Finnish Build Payments
20	Preliminary Payment Register

3. Create Values for Finnish Value Sets

To create values for Finnish Value Sets:

1. Navigate to the Segment Values window.

2. Set up your values according to the instructions from the Bank of Finland. Use this information as an example:

In this field...	Enter this value...
Value Set	Yes
Name	JEFI_AP_REASON_CODE_A
Value	931
Description	Import: Salaries and Benefits

In this field...	Enter this value...
Value Set	Yes
Name	JEFI_AP_REASON_CODE_B
Value	911
Description	Import: Goods Trade

3. Save your changes.

French 8

Post-Install Steps

This chapter explains the steps that you must follow to install Oracle Financials for France. You must complete these steps after AutoInstall has installed your localization.

French Post-Install Steps

There is one post-install step for France: Create the French income tax types.

Creating the French income tax types

If you plan to use Oracle Financials for France, install the French income tax types. Run this script to install the French income tax types:

```
$ cd $JE_TOP/admin/sql  
$ sqlplus <APPS username>/<APPS password> @jefrtxtp.sql
```

German 9

Post-Install

Steps

This chapter explains the steps that you must follow to install Oracle Financials for Germany. You must complete these steps after AutoInstall has installed your localization.

German Post-Install Steps

There is one post-install step for Germany: Enable the Tax Code field in the Receipts window.

Enabling the Tax Code Field in the Receipts Window

If you plan to use Oracle Financials for Germany, enable the Tax Code field in the Receipts window. Run this script to enable the Tax Code field:

```
$ cd $JE_TOP/admin/sql
$ sqlplus <APPS username> /<APPS password> @jedetcfe.sql
```

CHAPTER

Italian 10 Post-Install Steps

This chapter explains the steps that you must follow to install Oracle Financials for Italy. You must complete these steps after AutoInstall has installed your localization.

Italian Post-Install Steps

There is one post-install step for Italy: Create Inventory Tax Types for Oracle Financials for Italy.

Creating Inventory Tax Types for Oracle Financials for Italy

If you plan to use Oracle Financials for Italy, create additional Tax Types for Oracle Inventory. Run this script to create these new Tax Types:

```
$ cd $JE_TOP/admin/sql  
$ sqlplus <APPS username>/<APPS password> @jeitmtlt.sql
```

CHAPTER

Norwegian 11 Post-Install Steps

This chapter explains the steps that you must follow to install Oracle Financials for Norway. You must complete these steps after AutoInstall has installed your localization.

Norwegian Post-Install Steps

There is one post-install step for Norway: Define your Tax Segment Value Lookups for Investment Tax.

Defining your Tax Segment Value Lookups for Investment Tax

If you plan to use Norwegian Investment Tax, define the values for the JENO_TAX_SEGMENTS lookup type so that the values correspond to those that you defined for the Tax segment of the Accounting Flexfield.

The JENO_TAX_SEGMENTS lookup type is seeded with these values:

Code	Meaning	Description
00	00	No Tax
01	01	Inbound Tax
02	02	Inbound Tax with Investment Tax
03	03	Outbound Tax
04	04	Inbound Tax without Investment Tax

The values for Code correspond to internal values used by Investment Tax functionality. You must not change the values for Code.

The values for Meaning, however, must correspond to the values that you defined for the Tax segment of the Accounting Flexfield. You must change the Meaning values if the seeded values are not correct for your Tax segment.

Application Object Library Lookups

Type
 User Name
 Application
 Description

Access Level
☒ User
☐ Extensible
☐ System

— Effective Dates — Enabled

Code	Meaning	Description	Tag	From	To	Enabled
				14/MAR/2001		<input checked="" type="checkbox"/>
						<input type="checkbox"/>
						<input type="checkbox"/>
						<input type="checkbox"/>
						<input type="checkbox"/>
						<input type="checkbox"/>
						<input type="checkbox"/>
						<input type="checkbox"/>
						<input type="checkbox"/>
						<input type="checkbox"/>

To change the Meaning values for the JENO_TAX_SEGMENTS lookup type:

1. Navigate to the Application Object Library Lookups window.
2. Query the JENO_TAX_SEGMENTS lookup type with the European Localizations application.
3. Check that the values in the Meaning fields correspond to the values that you defined for the Tax segment of the Accounting Flexfield. If they do not, enter the correct values. Do not change the values in the Code fields.

Oracle Financials Common Country Features Post-Install Steps

This chapter explains the steps that you must follow to install Oracle Financials Common Country Features. You must complete these steps after AutoInstall has installed your localization.

Oracle Financials Common Country Features Post-Install Steps

There is one post-install step for Oracle Financials Common Country Features: Insert record into RA_SITE_USES table.

Insert Record into RA_SITE_USES Table

If you plan to use the subledger reports listed below, you must insert a record into the RA_SITE_USES table. Run this script to insert this record into the RA_SITE_USES table:

```
$ cd $JG_TOP/admin/sql
$ sqlplus <APPS username>/<APPS password> @jgzzisui.sql
```

Global Accounting Engine Post-Install Steps

13

This chapter explains the steps that you must follow to install the Oracle Applications Global Accounting Engine. You must complete these steps after AutoInstall has installed the Global Accounting Engine.

Global Accounting Engine Post-Install Steps

The Global Accounting Engine provides an accounting system for Oracle subledger applications, including Oracle Payables, Oracle Receivables, and Oracle Inventory, that satisfies legal and fiscal requirements in some countries.

The Global Accounting Engine is mandatory for these countries for Release 11i:

- Austria
- France
- Greece
- Italy
- Portugal
- Spain

If the Global Accounting Engine is required for your country, you must set up your Oracle Applications installation to use Global Accounting Engine responsibilities and request groups. For more information, refer to the *Oracle Applications Global Accounting Engine User's Guide*.

Oracle D Financials Common Country Features Request Groups

This appendix overviews the request groups for Oracle Financials Common Country Features.

Request Groups

You should use these tables as a reference to include reports in your new request groups if you create additional responsibilities. The tables show all modifications and additions to the base product for each country. Define any new report security groups with the Request Groups window, which is accessed through the System Administrator responsibility.
