Oracle Financials for Germany User Guide, Release 11/
Part No. A81231-02

Oracle Corporation welcomes your comments and suggestions on the quality and usefulness of this user guide. Your input is an important part of the information used for revision.

- Did you find any errors?
- Is the information clearly presented?
- Do you need more information? If so, where?
- Are the examples correct? Do you need more examples?
- What features did you like most?

If you find any errors or have any other suggestions for improvement, please indicate the document title and part number, and the chapter, section, and page number (if available). You can send comments to us in the following ways:

- Electronic mail: globedoc@us.oracle.com
- FAX: (801) 659-7164 Attention: Oracle Applications Global Financials Documentation
- Postal service:
  Oracle Corporation
  Oracle Applications Global Financials Documentation
  500 Oracle Parkway
  Redwood Shores, CA 94065
  USA

If you would like a reply, please give your name, address, telephone number, and (optionally) electronic mail address.

If you have problems with the software, please contact your local Oracle Support Services.
Welcome to Release 11i of the Oracle® Financials for Germany User Guide.

This user guide includes information to help you effectively work with Oracle Financials for Germany and contains detailed information about the following:

- Overview and reference information
- Specific tasks that you can accomplish with Oracle Financials for Germany
- How to use Oracle Financials for Germany windows
- Oracle Financials for Germany programs, reports, and listings
- Oracle Financials for Germany functions and features

This preface explains how this user guide is organized and introduces other sources of information that can help you use Oracle Financials for Germany.
About this Country-Specific User Guide

This user guide documents country-specific functionality developed for use within your country and supplements our core Financials user guides. This user guide also includes tips about using core functionality to meet your country’s legal and business requirements, as well as task and reference information. The following chapters are included:

- Chapter 1 describes Oracle Payables for Germany, including reports prerequisites, the German Payables VAT Reconciliation Detail Report, the German Domestic EFT Payment Format, the German Domestic EFT Letter Report, the German International EFT Payment Format, the German International EFT Letter Report, the German Payables Separate Payment Letter Report, the German Payables Check Print Report, and the German Payables Wire Print Report.

- Chapter 2 describes Oracle Receivables for Germany, including reports prerequisites, VAT for on-account receipts, the German VAT for On-Account Receipts Report, the German Receivables Direct Debit, the German Receivables Direct Debit Letter Report, and the German Receivables Separate Payment Letter Report.

- Appendix A describes how to use globalization flexfields.

- Appendix B describes how to navigate to character mode forms and GUI windows.

- Appendix C describes the profile options you must set for Oracle Financials for Germany.

- Glossary provides definitions of terms specific to Oracle Financials for Germany that are used in this guide.
Audience for this Guide

This guide assumes you have a working knowledge of the following:

- The principles and customary practices of your business area.
- Oracle Financials for Germany.
  
  If you have never used Oracle Financials for Germany, we suggest you attend
one or more of the Oracle training classes available through Oracle University.

- The Oracle Applications graphical user interface.

To learn more about the Oracle Applications graphical user interface, read the
Oracle Applications User Guide.

See Other Information Sources for more information about Oracle Applications
product information.
Other Information Sources

You can choose from other sources of information, including online documentation, training, and support services, to increase your knowledge and understanding of Oracle Financials for Germany.

If this user guide refers you to other Oracle Applications documentation, use only the Release 11i versions of those guides unless we specify otherwise.

Online Documentation

All Oracle Applications documentation is available online (HTML and PDF). The technical reference guides are available in paper format only. Note that the HTML documentation is translated into over twenty languages.

The HTML version of this guide is optimized for onscreen reading, and you can use it to follow hypertext links for easy access to other HTML guides in the library. When you have an HTML window open, you can use the features on the left side of the window to navigate freely throughout all Oracle Applications documentation.

- You can use the Search feature to search by words or phrases.
- You can use the expandable menu to search for topics in the menu structure we provide. The Library option on the menu expands to show all Oracle Applications HTML documentation.

You can view HTML help in the following ways:

- From an application window, use the help icon or the help menu to open a new Web browser and display help about that window.
- Use the documentation CD.
- Use a URL provided by your system administrator.

Your HTML help may contain information that was not available when this guide was printed.

Related User Guides

This user guide documents country-specific functionality developed in addition to our Oracle Financials core products. Because our country-specific functionality is used in association with our core Financials products and shares functional and setup information with other Oracle Applications, you should consult other related user guides when you set up and use Oracle Financials for Germany.

You can read the guides online by choosing Library from the expandable menu on your HTML help window, by reading from the Oracle Applications Document
Library CD included in your media pack, or by using a Web browser with a URL that your system administrator provides.

If you require printed guides, you can purchase them from the Oracle store at http://oraclestore.oracle.com.

**Oracle Applications User Guide**
This guide explains how to navigate the system, enter data, and query information, and introduces other basic features of the GUI available with this release of Oracle Financials for Germany (and any other Oracle Applications product).

You can also access this user guide online by choosing “Getting Started and Using Oracle Applications” from the Oracle Applications help system.

**Oracle Financials Common Country Features User Guide**
This manual describes functionality developed to meet specific legal and business requirements that are common to several countries in a given region. Consult this user guide along with your country-specific user guide and your financial product’s manual to effectively use Oracle Financials in your country.

**Oracle Financials Country-Specific User Guides**
These manuals document functionality developed to meet legal and business requirements in countries that you do business in. Look for a user guide that is appropriate to your country; for example, see the Oracle Financials for the Czech Republic User Guide for more information about using this software in the Czech Republic.

**Oracle Financials RXi Reports Administration Tool User Guide**
Use the RXi reports administration tool to design the content and layout of RXi reports. RXi reports let you order, edit, and present report information to better meet your company’s reporting needs.

**Oracle General Ledger User Guide**
Use this manual when you plan and define your chart of accounts, accounting period types and accounting calendar, functional currency, and set of books. It also describes how to define journal entry sources and categories so that you can create journal entries for your general ledger. If you use multiple currencies, use this manual when you define additional rate types and enter daily rates. This manual also includes complete information on implementing budgetary control.
Oracle Purchasing User Guide
Use this manual to read about entering and managing the purchase orders that you match to invoices.

Oracle Payables User Guide
This manual describes how accounts payable transactions are created and entered into Oracle Payables. This manual also contains detailed setup information for Oracle Payables. Use this manual to learn how to implement flexible address formats for different countries. You can use flexible address formats in the suppliers, customers, banks, invoices, and payments windows in both Oracle Payables and Oracle Receivables.

Oracle Receivables User Guide
Use this manual to learn how to implement flexible address formats for different countries. You can use flexible address formats in the suppliers, customers, banks, invoices, and payments windows in both Oracle Payables and Oracle Receivables. This manual also explains how to set up your system, create transactions, and run reports in Oracle Receivables.

Oracle Assets User Guide
Use this manual to add assets and cost adjustments directly into Oracle Assets from invoice information.

Oracle Projects User Guide
Use this manual to learn how to enter expense reports in Projects that you import into Payables to create invoices. You can also use this manual to see how to create Project information in Projects which you can then record for an invoice or invoice distribution.

Oracle Cash Management User Guide
This manual explains how you can reconcile your payments with your bank statements.

Using Oracle HRMS - The Fundamentals
This user guide explains how to setup and use enterprise modeling, organization management, and cost analysis. It also includes information about defining payrolls.
Oracle Workflow Guide
This manual explains how to define new workflow business processes as well as customize existing Oracle Applications-embedded workflow processes. You also use this guide to complete the setup steps necessary for any Oracle Applications product that includes workflow-enabled processes.

Oracle Financials Open Interfaces Guide
This guide contains a brief summary of each Oracle Financial Applications open interface.

Oracle Applications Character Mode to GUI Menu Path Changes
This is a quick reference guide for experienced Oracle Applications end users migrating from character mode to a graphical user interface (GUI). This guide lists each character mode form and describes which GUI windows or functions replace it.

Multiple Reporting Currencies in Oracle Applications
If you use Multiple Reporting Currencies feature to report and maintain accounting records in more than one currency, use this manual before implementing Oracle Financials for Germany. The manual details additional steps and setup considerations for implementing Oracle Financials for Germany with this feature.

Multiple Organizations in Oracle Applications
If you use the Oracle Applications Multiple Organization Support feature to use multiple sets of books for one Oracle Financials installation, use this guide to learn about setting up and using Oracle Financials with this feature.

There are special considerations for using Multiple Organizations in Europe with document sequences, legal entity reporting, and drill-down from General Ledger. Consult the Multiple Organizations in Oracle Applications guide for more information about using Multiple Organizations in Europe.

Oracle Applications Flexfields Guide
This guide provides flexfields planning, setup, and reference information for your implementation team, as well as for users responsible for the ongoing maintenance of Oracle Applications product data. This guide also provides information on creating custom reports on flexfields data.
**Oracle Alert User Guide**
Use this guide to define periodic and event alerts that monitor the status of your Oracle Applications data.

**Oracle Applications Implementation Wizard User Guide**
If you are implementing more than one Oracle product, you can use the Oracle Applications Implementation Wizard to coordinate your setup activities. This guide describes how to use the wizard.

**Oracle Applications Developer's Guide**
This guide contains the coding standards followed by Oracle Applications development. It describes the Oracle Application Object Library components needed to implement the Oracle Applications user interface described in the *Oracle Applications User Interface Standards*. It also provides information to help you build your custom Oracle Developer forms so that they integrate with Oracle Applications.

**Oracle Applications User Interface Standards**
This guide contains the user interface (UI) standards followed by Oracle Applications development. It describes the UI for the Oracle Applications products and how to apply this UI to the design of an application built by using Oracle Forms.
Installation and System Administration

Installing Oracle Applications
This guide provides instructions for managing the installation of Oracle Applications products. In Release 11i, much of the installation process is handled using Oracle One–Hour Install, which minimizes the time it takes to install Oracle Applications and the Oracle 8i Server technology stack by automating many of the required steps. This guide contains instructions for using Oracle One–Hour Install and lists the tasks you need to perform to finish your installation. You should use this guide in conjunction with individual product user guides and implementation guides.

Oracle Financials Country-Specific Installation Supplement
Use this manual to learn about general country information, such as responsibilities and report security groups, as well as any post-install steps required by some countries or the Global Accounting Engine.

Upgrading Oracle Applications
Refer to this guide if you are upgrading your Oracle Applications Release 10.7 or Release 11.0 products to Release 11i. This guide describes the upgrade process in general and lists database upgrade and product–specific upgrade tasks. You must be at either Release 10.7 (NCA, SmartClient, or character mode) or Release 11.0 to upgrade to Release 11i. You cannot upgrade to Release 11i directly from releases prior to 10.7.

Oracle Applications Product Update Notes
Use this guide as a reference if you are responsible for upgrading an installation of Oracle Applications. It provides a history of the changes to individual Oracle Applications products between Release 11.0 and Release 11i. It includes new features and enhancements and changes made to database objects, profile options, and seed data for this interval.

Oracle Applications System Administrator’s Guide
This guide provides planning and reference information for the Oracle Applications System Administrator. It contains information on how to define security, customize menus and online help, and manage processing.

The Oracle Global Financial Applications Technical Reference Manual contains database diagrams and a detailed description of regional and related applications database tables, forms, reports, and programs. This information helps you convert data from your existing applications, integrate Oracle Financials with non-Oracle applications, and write custom reports for Oracle Financials.

You can order a technical reference manual for any product you have licensed. Technical reference manuals are available in paper format only.
Training and Support

Training
We offer a complete set of training courses to help you and your staff master Oracle Applications. We can help you develop a training plan that provides thorough training for both your project team and your end users. We will work with you to organize courses appropriate to your job or area of responsibility.

Training professionals can show you how to plan your training throughout the implementation process so that the right amount of information is delivered to key people when they need it the most. You can attend courses at any one of our many Educational Centers, or you can arrange for our trainers to teach at your facility. We also offer Net classes, where training is delivered over the Internet, and many multimedia–based courses on CD. In addition, we can tailor standard courses or develop custom courses to meet your needs.

Support
From on-site support to central support, our team of experienced professionals provides the help and information you need to keep Oracle Financials for Germany working for you. This team includes your Technical Representative, Account Manager, and Oracle’s large staff of consultants and support specialists with expertise in your business area, managing an Oracle server, and your hardware and software environment.
Do Not Use Database Tools to Modify Oracle Applications Data

We STRONGLY RECOMMEND that you never use SQL*Plus, Oracle Data Browser, database triggers, or any other tool to modify Oracle Applications tables, unless we tell you to do so in our guides.

Oracle provides powerful tools you can use to create, store, change, retrieve, and maintain information in an Oracle database. But if you use Oracle tools such as SQL*Plus to modify Oracle Applications data, you risk destroying the integrity of your data and you lose the ability to audit changes to your data.

Because Oracle Applications tables are interrelated, any change you make using an Oracle Applications form can update many tables at once. But when you modify Oracle Applications data using anything other than Oracle Applications forms, you might change a row in one table without making corresponding changes in related tables. If your tables get out of synchronization with each other, you risk retrieving erroneous information and you risk unpredictable results throughout Oracle Applications.

When you use Oracle Applications forms to modify your data, Oracle Applications automatically checks that your changes are valid. Oracle Applications also keeps track of who changes information. But, if you enter information into database tables using database tools, you may store invalid information. You also lose the ability to track who has changed your information because SQL*Plus and other database tools do not keep a record of changes.
About Oracle

Oracle Corporation develops and markets an integrated line of software products for database management, applications development, decision support and office automation, as well as Oracle Applications. Oracle Applications provides the E-business Suite, a fully integrated suite of more than 70 software modules for financial management, Internet procurement, business intelligence, supply chain management, manufacturing, project systems, human resources and sales and service management.

Oracle products are available for mainframes, minicomputers, personal computers, network computers, and personal digital assistants, enabling organizations to integrate different computers, different operating systems, different networks, and even different database management systems, into a single, unified computing and information resource.

Oracle is the world’s leading supplier of software for information management, and the world’s second largest software company. Oracle offers its database, tools, and application products, along with related consulting, education and support services, in over 145 countries around the world.
Thank you for using Oracle Financials for Germany and this user guide.

We value your comments and feedback. Please use the Reader’s Comment Form to explain what you like or dislike about Oracle Financials or this user guide. Mail your comments to the following address or call us directly at (650) 506-7000.

This chapter overviews Oracle Payables for Germany, including:

- Reports Prerequisites
- German Payables VAT Reconciliation Detail Report
- German Domestic EFT Payment Format
- German Domestic EFT Letter Report
- German International EFT Payment Format
- German International EFT Letter Report
- German Payables Separate Payment Letter Report
- German Payables Check Print Report
- German Payables Wire Print Report
Reports Prerequisites

Because reports obtain the company address from the location that is assigned to the reporting entity, you should complete these tasks before you use the reports in this chapter:

- Define a location
- Define a reporting entity and assign the location to the entity
Use the German Payables VAT Reconciliation Detail report to obtain information about VAT that you can recover on inputs.

The German Payables VAT Reconciliation Detail report helps you produce monthly, quarterly, and annual German VAT declarations. The report provides a detail listing of all transactions posted to each VAT account in General Ledger during the General Ledger period range that you specify. The transactions are grouped by VAT code and supplier and selected by General Ledger date.

The report includes details such as the transaction amount and VAT entered on the original invoice, as well as any discount taken upon payment of the invoice.

The report pro-rates the discount on the transaction amount and the VAT in the same proportion as the non-tax to tax lines on the invoice. The accounting distribution of the discount taken depends on the value that you selected for the Payables option *Discount Distribution Method*.

If the value is set to Prorate Expense, the discount is pro-rated across all invoice distribution lines. If the value is set to Prorate Tax, a proportion of the discount is
pro-rated across the tax distribution lines and the remaining discount is credited to the Discount Taken accounting flexfield.

See also: Payables Options, Oracle Payables User Guide

The German Payables VAT Reconciliation Detail report calculates the expected VAT based on the VAT rate and the original invoice cost, and displays the difference between this calculated value and the actual VAT entered on the invoice. The report prints a supplier-level total for transactions that relate to the specified VAT code, as well as a total for all VAT codes that you select.

For each VAT code, the report shows the balance of the VAT account in General Ledger, and identifies any difference between the amount posted to General Ledger and the VAT in the AP transactions. The difference is split into a calculation difference and other differences. The other category would be used, for example, where a manual journal entry was made to the General Ledger VAT account, or where a non-tax line on an invoice was posted to the VAT account.

The report is produced only in the functional currency for your set of books. Foreign currency invoices use the exchange rate applied to the invoice when the invoice was entered into Oracle Payables.

The German Payables VAT Reconciliation Detail report includes a separate Exception Listing. AP invoice distribution lines that affect a VAT account in General Ledger print on the listing when either of these is true:

- The invoice line type is not tax or the VAT code is blank, and the General Ledger accounting flexfield assigned to the line is a tax account combination.

  or

- The VAT code is blank and no other tax line is on the invoice.

Warning: If you run the report after you perform a General Ledger revaluation for the selected accounting flexfields, the reported General Ledger Balance might be changed by the revaluation. Before you make a correcting journal for any differences, the revaluation content of the General Ledger Balance should be established and not included in the correcting journal. General Ledger revaluation journals are created as reversing journals in the following period.
Prerequisites

Before you run the German Payables VAT Reconciliation Detail report, you must:

- Set the Payables options to these values:
  - Set Discount Distribution Method to either Prorate Tax or Prorate Expense.
  - Set Exclude Tax for Discount to No.
  - Set Automatic Tax Calculation to Yes.
  - Set Require Tax Entry to Yes.

- Set up VAT codes for each type of VAT, such as Domestic Rates, Intra EU, and Outside EU.

- Set up a separate General Ledger Account for each VAT code.

- Complete all transfers from Oracle Payables to Oracle General Ledger and post the resulting journals.

**Note:** If a transaction is not transferred to General Ledger, the transaction does not appear in the report. Invoices with the status Never Approved will not appear in the report because the invoices did not get transferred to General Ledger. Invoices on hold, however, with an Allow Post set to Yes on the invoice approval code are transferred to General Ledger during the AP to GL transfer, and appear in the report once the transfer is complete.

If the resulting journals are not posted in General Ledger, the General Ledger Balance for the VAT Account will not correspond with the sum of VAT on the transactions for that VAT code and will appear in the Other Difference to VAT GL Balance column on the report.
Report Parameters

GL Period From
Enter the starting General Ledger period for the range that you want to report from. The report shows all transactions that have a General Ledger date within the selected accounting period range. The General Ledger Period Name must be valid.

GL Period To
Enter the ending General Ledger period for the range that you want to report to.

VAT Code From
Enter the starting VAT code for the range that you want to report from.

VAT Code To
Enter the ending VAT code for the range that you want to report to.

Note: If you leave the VAT Code From/To fields blank, the report will print data for all VAT codes that fall within the specified accounting flexfield range.

Accounting Flexfield From
Enter the lowest accounting flexfield combination for the range that you want to report on. The accounting flexfield range should apply to the VAT codes selected.

Accounting Flexfield To
Enter the upper accounting flexfield combination for the range that you want to report on.

Note: If you leave the accounting flexfield range fields blank, the fields default to All. If you leave both the VAT code range fields and the accounting flexfield range fields blank, the report selects all VAT codes as well as the accounting flexfields assigned to the codes.

***** End Of Report *****
German Domestic EFT Payment Format

Use the German Domestic EFT Payment Format to make domestic (German Inland) payments from a German bank using a diskette. You can also print an accompanying letter for each EFT payment batch in Oracle Payables.

Prerequisites

Before using the German Domestic EFT Payment Format, you must:

- Create a payment format with the Electronic Payments payment method, using the German AP Domestic EFT Format Payment Program.
- Set up only one tax reporting entity.
- Create a payment bank account that has a payment document assigned to it and a payment format that uses the German AP Domestic EFT Format Payment Program.
- Enter bank account information for your supplier.
- Ensure that any deutsche mark or euro invoices that you want to pay with the German Domestic EFT Payment Format have a payment method of Electronic Payments.

Note: You can use the German Domestic EFT Payment Format for payments either in deutsche marks or in euros, but you cannot make payments in both deutsche marks and euros in the same payment file using this payment format.

- Use the Payments AutoSelect window to select a bank account that contains the German EFT payment document and the Electronic Payments payment method.
Use the German Domestic EFT Letter report to produce a letter that accompanies your German EFT-formatted diskette to the bank. The letter contains details about the EFT information on the diskette. The bank uses the letter as a reconciliation report against the data on the diskette.

Use the Standard Request Submission windows to submit the German Domestic EFT Letter report.

**See also**: Using Standard Request Submission, *Oracle Applications User Guide*
Prerequisites

Before printing this Accompanying Letter, you must run the German Domestic EFT Format Payment Program for the required payment batch.

Report Parameters

Payment Batch
Enter the payment batch name.

German International EFT Payment Format

Use the German International EFT Payment Format to make German International Payments from a German bank using a diskette.

Prerequisites

Before using the German International EFT Payment Format, you must:

- Create a payment format with the Electronic Payments payment method, using the German International EFT Format Payment Program.
- Create a payment bank account that has a payment document assigned to it and a payment format that uses the German International EFT Payment Program.
- Set up only one tax reporting entity.
- Ensure that all country numeric codes and short names that are used in the Supplier Site EFT Details flexfield and in the Scheduled Payment EFT Details flexfield window are entered. For more information, see Adding Country Numeric Codes and Short Names on page 1-15.
- Define your VAT registration. For more information, see Defining Your VAT Registration on page 1-17.
- Enter system format EFT information. For more information, see Entering System Format EFT Information on page 1-18.
- Enter supplier site EFT information for each supplier site that will be paid using EFT. For more information, see Entering Supplier Site EFT Information on page 1-20.
- Enter bank account information for your supplier.
- Ensure that invoices have a payment method of Electronic Payments.
- Enter any invoice declaration modifications to the payment schedule EFT information. You cannot make declaration modifications after the payment format is completed. For more information, see Entering Payment Schedule EFT Information on page 1-22.
- Use the Payments AutoSelect window to select a bank account that contains the German International EFT Format payment document with the EFT payment method.
Adding Country Numeric Codes and Short Names

Country codes and short names are used to generate the EFT payment file. Enter a numeric code and a short name for each new country that you want to send EFT payments to. Enter country numeric codes for the JEDE_COUNTRY_NUMERIC_CODE lookup type and short names for the JEDE_COUNTRY_SHORT_NAME lookup type in the Lookups window.

To enter numeric codes for the JEDE_COUNTRY_NUMERIC_CODE lookup type:

1. Navigate to the Lookups window.
2. Query the lookup type JEDE_COUNTRY_NUMERIC_CODE in the Type field. Oracle Applications only allows you to enter this lookup type in uppercase letters.
3. Enter a country, such as IRELAND, in the Code field. Oracle Applications only allows you to enter a country in uppercase letters.
4. Enter the same country in the meaning field. If you do not enter the same country that you entered in the Code field, the EFT file cannot extract the correct values for the numeric codes.
5. Enter the country’s three digit numeric code, such as 007, in the Description field.
6. Save your work.
To enter short names for the JEDE_COUNTRY_SHORT_NAME lookup type:

1. Navigate to the Lookups window.

2. Query the lookup type JEDE_COUNTRY_SHORT_NAME in the Type field. Oracle Applications only allows you to enter this lookup type in uppercase letters.

3. Enter the same country that you entered for the JEDE_COUNTRY_NUMERIC_CODE lookup type in the Code field. Oracle Applications only allows you to enter a country in uppercase letters.

4. Enter the same country in the meaning field. If you do not enter the same country that you entered in the Code field, the EFT file cannot extract the correct values for the short names.

5. Enter the country’s short name, such as IRLAND, in uppercase letters in the Description field.

6. Save your work.
Defining Your VAT Registration

Before you can enter EFT information, you must define your VAT member state as Germany in the Financials Options window. Use the Member State field in the Tax alternative region to enter your VAT member state. The EFT requirements that appear in the EFT descriptive flexfields are based on the country code that you enter here. You must also enter your company’s VAT registration number in the VAT Registration Number field.

See also: Financials Options, Oracle Payables User Guide
Entering System Format EFT Information

Use the System Format descriptive flexfield in the EFT System Information window to enter additional EFT information at system format level.

**To enter system format EFT information:**

1. Navigate to the EFT System Information window.

2. In the Country Code field, query the country code DE for Germany.

3. Select the *German International* EFT type in the EFT Type field.
4. Click in the descriptive flexfield.
   The System Format flexfield appears.

5. Enter the Landeszentralbank area number in the LZB Area Number field. The
   LZB area number indicates the purpose of the funds transfer, such as payment
   of a supplier invoice or a dividend payment.

6. Enter the company number in the Company Number field.

7. Enter Yes in the Declaration Flag field if you want to declare this payment to the
   government. Enter No if you do not want to declare this payment.

8. Enter the declaration limit in the Declaration Limit field.

9. Save your work.
Entering Supplier Site EFT Information

Use the Supplier Site EFT Details descriptive flexfield in the Supplier Sites window to enter additional EFT information at supplier site level.

To enter supplier site EFT information:

1. Navigate to the Suppliers window.
2. Enter or query a supplier.
3. Navigate to the Sites alternative region.
4. Select a site and press the Open button to open an existing site, or press the New button to open a new site.
   The Supplier Sites window opens for that site.
5. Choose View EFT Details from the Tools menu.
   The Supplier Site EFT Information flexfield appears.

6. The Country Code field defaults to a two-character country code according to the value that you entered as your VAT Member State.

7. Click in the descriptive flexfield to navigate to the Supplier Site EFT Details flexfield.
8. Enter the declaration type in the Declaration Type field. Valid values are:
   - U - Imported Goods
   - V - Transit Goods
   - W - Services, Capital and Other

9. Enter the reasons for the payment in the Reasons field.

10. Enter the bank instruction in the Bank Instruction field according to your supplier’s requirements, and the details in the Bank Instruction Details field.

11. Enter the charge code in the Charge Code field. Valid values are:
    - 00 - Transfer Charges to Sender, Foreign Charges to Receiver
    - 01 - All Charges to Sender
    - 02 - All Charges to Receiver

12. Enter the payment method in the Payment Method field and an explanation for the payment method in the Explanation field.

13. Enter Yes in the Declaration Flag field if you want to declare this payment to the government. Enter No if you do not want to declare this payment.

14. In the Country field, select the country where your supplier’s site is located from the list of values.

15. Save your work.
Entering Payment Schedule EFT Information

Use the Scheduled Payment EFT Details descriptive flexfield in the Scheduled Payments window to enter additional EFT information at payment schedule level for the U, V, and W declaration types.

To enter payment schedule EFT information:

1. Navigate to the Invoices window.
2. Enter or query an invoice.
3. Press the Scheduled Payments button.
   The Scheduled Payments window appears.
4. Choose View EFT Details from the Tools menu.
   The Scheduled Payment EFT Information flexfield appears.

5. Choose the payment preference that you want from the Payment Preference pull-down list. There are three payment preference options:
   - U - Imported Goods
   - V - Transit Goods
   - W - Services, Capital and Other

6. Click in the descriptive flexfield to navigate to the Scheduled Payment EFT Details flexfield.
7. Enter the German EFT information for your payment preference. For more information, see:
   - Entering Payment Schedule EFT Information for the U Declaration Type on page 1-24.
   - Entering Payment Schedule EFT Information for the V Declaration Type on page 1-25.
   - Entering Payment Schedule EFT Information for the W Declaration Type on page 1-27.

8. Save your work.
Entering Payment Schedule EFT Information for the U Declaration Type

Use this Scheduled Payment EFT Details flexfield to enter additional payment schedule EFT information when you choose the U payment preference for imported goods.

To enter payment schedule EFT information for the U declaration type:

1. Navigate to the Scheduled Payment EFT Details flexfield for the U payment preference. For instructions, see Entering Payment Schedule EFT Information on page 1-22.

2. Enter Yes in the Declaration Flag field if you want to declare this payment to the government. Enter No if you do not want to declare this payment.

3. In the Country field, select the country where your supplier’s site is located from the list of values.

4. Save your work.
German International EFT Payment Format

Entering Payment Schedule EFT Information for the V Declaration Type

Use this Scheduled Payment EFT Details flexfield to enter additional payment schedule EFT information when you choose the V payment preference for transit goods.

To enter payment schedule EFT information for the V declaration type:

1. Navigate to the Scheduled Payment EFT Details flexfield for the V payment preference. For instructions, see Entering Payment Schedule EFT Information on page 1-22.

2. Enter Yes in the Declaration Flag field if you want to declare this payment to the government. Enter No if you do not want to declare this payment.

3. Enter the name of the transit goods in the Transit Goods field and the goods number in the Goods No. field.

4. Enter the export country in the Export Country field.

(continued)
5. Enter the purchase cost in the Purchase Cost field.

6. Enter Yes in the Passing Trade field if you are selling transit goods to foreigners. Enter No if you are not selling transit goods to foreigners.

7. Enter Yes in the Goods Separated field if you are selling transit goods to residents. Enter No if you are not selling transit goods to residents.

8. Enter Yes in the Stored Inland field if the supplier stores the goods in your country. Enter No if the supplier does not store the goods in your country.

9. Enter Yes in the Stored Abroad field if the supplier stores the goods abroad. Enter No if the supplier does not store the goods abroad.

10. Enter the name of the export goods in the Export Goods field and the export number in the Export No field.

11. In the Money Due Date field, enter the due date of the sales proceeds from direct transit trade. You should only enter a money due date if you entered Yes in the Stored Inland field.

12. In the Import Country field, select the import country where your supplier’s site is located from the list of values.

13. In the Selling Cost field, enter the selling price for direct transit trade. You should only enter a selling cost if you entered Yes in the Stored Inland field.

14. Enter the buyer’s address in the Buyers Address field.

15. Save your work.
Entering Payment Schedule EFT Information for the W Declaration Type

Use this Scheduled Payment EFT Details flexfield to enter additional payment schedule EFT information when you choose the W payment preference for services, capital, and other transactions.

To enter payment schedule EFT information for the W declaration type:

1. Navigate to the Scheduled Payment EFT Details flexfield for the W payment preference. For instructions, see Entering Payment Schedule EFT Information on page 1-22.

2. Enter Yes in the Declaration Flag field if you want to declare this payment to the government. Enter No if you do not want to declare this payment.

3. In the Country Name field, select the import country where your supplier’s site is located from the list of values.

4. Enter the record type in the Record Type field.

5. Enter the reason code for the payment in the Reason field. Valid values are:
   - 020 - Travel Expenses
   - 900 - Other Payments

6. Enter an explanation for the payment in the Explanation field.

7. Save your work.
The German International EFT Letter report produces a letter to accompany the international EFT-formatted diskette to the bank. The letter contains details about the EFT information on the diskette. The bank uses the letter as a reconciliation report against the data retrieved from the diskette.

Use the Standard Request Submission windows to submit the German International EFT Letter report.

See also: Using Standard Request Submission, Oracle Applications User Guide
Prerequisites

Before using this Accompanying Letter, you must run the German International EFT Format program for the required payment batch.

Report Parameters

Payment Batch
Enter the payment batch name.

Use the German Payables Separate Payment Letter report to create a separate payment letter for suppliers who have more than a specified number of invoices that are paid in a given payment batch.

The report notifies the supplier of the currency that the payment was made in, the number of invoices paid in this particular payment batch, and the bank account and bank branch number that the payment was made to.

This report is ordered by supplier site and then by invoice date within supplier site.

Use the Standard Request Submission windows to submit the German Payables Separate Payment Letter report.

---

**See also:** Using Standard Request Submission, Oracle Applications User Guide
Prerequisites

Before you run the German Payables Separate Payment Letter report, you must:

- Set up the Invoices Per Remittance Advice field in the Define Payment Methods window to limit the number of invoices per supplier site after which a separate payment letter will be produced. The German Payables Separate Payment Letter report uses this number to determine after how many invoices to produce a payment letter for a supplier site.
- Confirm the payment batch.

Report Parameters

Payment Batch Name
Enter the name of the payment batch that you want to create separate payment letters for.

Report Headings

<table>
<thead>

This chapter overviews Oracle Receivables for Germany, including:

- Reports Prerequisites
- VAT for On-Account Receipts
- German VAT for On-Account Receipts Report
- German Receivables Direct Debit
- German Receivables Direct Debit Letter Report
- German Receivables Separate Payment Letter Report
Reports Prerequisites

Because reports obtain the company address from the location that is assigned to the reporting entity, you should complete these tasks before you use the reports in this chapter:

- Define a location
- Define a reporting entity and assign the location to the entity
VAT for On-Account Receipts

Use the VAT for On-Account Receipts functionality to assign tax codes to on-account receipts. You can enter this data in the Tax Code field in the Receipts window. Use the German VAT for On-Account Receipts report to review receipts and their assigned tax codes. You can query receipts using receipt date, amount, currency, and customer country.

Use this field to associate tax codes with on-account receipts. There are three general types of on-account receipts:

- Amount not applied to an existing invoice, for example, unposted QuickCash batches or receipt not yet applied to an invoice
- Deposits for future invoices with zero-rate VAT, for example, non-domestic
- Deposits for domestic invoices in future periods

To calculate VAT at period end, identify on-account receipts for invoices in future periods and assign a tax code to them. The German VAT for On-Account Receipts report calculates the VAT amount.

See German VAT for On-Account Receipts Report on page 2-4 for more information.

Prerequisites

Before using the VAT for On-Account Receipts functionality, you must:

- Enable the function that allows the Tax Code field to appear in the Receipts window.
- Define VAT Codes.
- Post all QuickCash batches (unposted QuickCash batches are not included in selected receipts).
Use the German VAT for On-Account Receipts report to print details of all on-account receipt transactions that are assigned a tax code for the period range that you select.

The German VAT for On-Account Receipts report also shows the customer name and bill to site with details of applied and unapplied on-account receipts.

You should use the report as a source document for creating a manual journal in Oracle General Ledger to update the VAT clearing and liability accounts for on-account receipts.

End Of Report
Prerequisites

Before running the German VAT for On-Account Receipts report, you must:
Enable the VAT for On-Account Receipts function in the Receipts menu to make the Tax Code field available in the Receipts window.

See also: Enabling Tax Code in the Receipts Window, Oracle Financials Country-Specific Installation Supplement

Assign tax codes to your on-account receipts.

Report Parameters

GL Start Date
Enter the General Ledger start date.

GL End Date
Enter the General Ledger end date.

Tax Code
Enter the tax code. Leave this field blank to report on all tax codes.

German Receivables Direct Debit

Use the German Receivables Direct Debit to create remittances from Oracle Receivables. Oracle Receivables can print an accompanying letter for each remittance batch.

Prerequisites

Before you use this format to create remittances, you must:

- Add the German Receivables Direct Debit Letter to a German Oracle Receivables Report set.
- Set up Direct Debit receipt classes and payment methods. For more information, see Setting Up Direct Debit Receipt Classes and Payment Methods on page 2-9.
- Set up a remittance bank.
- Set up a customer bank that you will remit your receipts to. For more information, see Defining Banks and Bank Accounts on page 2-10.
- Convert Oracle Receivables deutsche mark or euro invoices to receipts, using the payment method set up for German Receivables Direct Debit. You do not have to confirm the receipts.
- Convert the Oracle Receivables receipts to remittances, using the payment method set up for German Receivables Direct Debit.
Setting Up Direct Debit Receipt Classes and Payment Methods

You must set up a receipt class and a payment method for German Direct Debit. Use the Receipt Classes window to set up the Direct Debit Receipt class and payment method.

To set up Direct Debit receipt classes and payment methods:
1. Navigate to the Receipt Classes window.
2. Enter Direct Debit in the Name field.
3. Select Automatic from the pull-down list in the Creation Method field.
4. Select Standard and Factoring from the pull-down list in the Remittance Method field.
5. Select By Matching from the pull-down list in the Clearance Method field.
6. Leave the Notes Receivable check box and the Require Confirmation check box unchecked.
7. Navigate to the Payment Method region.
8. Enter Direct Debit in the Name field.
9. Enter Direct Debit in the Printed Name field.
10. Enter One Per Customer in the Number of Receipts Rule field.
11. Enter 10 in the Lead Days field.
12. Enter Earliest in the Receipt Maturity Date Rule field.
13. Enter Print Receipts Program in the Automatic Print Program field.
14. Enter the beginning and ending effective dates for this payment method in the Effective Dates field.

Note: Do not use Credit Card as the payment type when you set up your Direct Debit payment method. You cannot use the German Direct Debit EFT program as the transmission program for credit card remittances because the EFT file is not designed to correctly format credit card account details.
Defining Banks and Bank Accounts

You must define customer banks and bank accounts that you will remit your receipts to. When you define banks for your customers, use the globalization flexfield in the Bank Accounts window to enter the direct debit authorization code.

To define banks and bank accounts:

1. Navigate to the Banks window.
2. Enter information for your customer’s bank that you will remit your receipts to.

   See also: Defining Banks, Oracle Receivables User Guide

3. Press the Bank Accounts button. The Bank Accounts window appears.
4. Enter bank account information for the customer’s bank account.

   See also: Defining Bank Accounts, Oracle Receivables User Guide

Note: You can navigate to the globalization flexfield only if you enter Customer in the Account Use field in the Bank Accounts window.
6. Select the direct debit authorization code from the list of values in the Direct Debit Authorization Code field. Valid values include:
   - 04 - Direct Debiting Procedure
   - 05 - Bank Collection Procedure

7. Press the OK button.

8. Assign this bank account to your customer.

   See also: Assigning Customer Banks, *Oracle Receivables User Guide*
The German Receivables Direct Debit Letter report produces a letter to accompany the German EFT-formatted diskette to the bank. The letter contains details about the EFT information on the diskette. The bank uses the letter as a reconciliation report against the data retrieved from the diskette.
Report Parameters

**Remittance Batch Name**
Enter the name of the remittance batch that you want to produce a letter for.

Use the German Receivables Separate Payment Letter report to create a separate payment letter for customers who have more than a specified number of invoices that are being collected in a given remittance batch.

The report notifies the customer of the currency of the remittance, the number of invoices paid in this particular remittance batch, and the bank account and bank branch number that the remittance was collected from.

This report is ordered by customer and then by invoice date within customer site.

Use the Standard Request Submission windows to submit the German Receivables Separate Payment Letter report.

**See also:** Using Standard Request Submission, *Oracle Applications User Guide*
Prerequisites

Before you run the German Receivables Separate Payment Letter report, you must:

- Set up the JEDE: Max invoices for separate letter profile option at Application level under Oracle Receivables. Due to space limitations, the maximum number of invoices that you should print on the EFT should be 6. This profile option lets you stipulate that a separate payment letter is produced for all payments that have more than 6 invoices.

- Format the remittance batch.

Report Parameters

**Remittance Batch Name**
Enter the name of the remittance batch that you want to create a separate payment letter for.

This appendix describes how to use globalization flexfields.
Using Globalization Flexfields

Oracle Financials for Germany uses a globalization flexfield that lets you enter country-specific information in Oracle Receivables. Your system administrator should complete setup steps to enable globalization flexfields for your country-specific responsibilities.

See also: Setting Up Globalization Flexfields, Oracle Financials Country-Specific Installation Supplement

There is a globalization flexfield on this window:

Oracle Receivables

- Bank Accounts

The globalization flexfield appears in the window after you complete all setup steps to enable globalization flexfields. The globalization flexfield is enclosed in round brackets like this. Click in the globalization flexfield to display the flexfield window.
Character Mode to GUI Navigation Paths

This appendix describes how to navigate to character mode forms and GUI windows.
Character Mode to GUI Navigation Paths

This appendix maps Oracle Financials for Germany character mode menu paths and form names to GUI menu paths and windows or processes.

<table>

</tr>
</tbody>
</table>
This appendix lists the profile options that affect the operation of Oracle Financials for Germany. This appendix includes a brief description of each profile option that you or your system administrator can set at the site, application, responsibility, or user levels.
Profile Options

During implementation, your system administrator sets a value for each user profile option to specify how Oracle Financials for Germany controls access to and processes data.

**Note:** To enable globalization flexfields within Oracle Financials for Germany, you must set the JG: Application, JG: Territory, and JG: Product profile options.

**See also:** Setting Up Globalization Flexfields, Oracle Financials Country-Specific Installation Supplement

**See also:** Setting User Profiles Options, Oracle Applications System Administrator’s Guide

Profile Options Summary

The table below indicates whether you can view or update the profile option and at which System Administrator levels the profile options can be updated: the user, responsibility, application, or site levels.

A *Required* profile option requires you to provide a value. An *Optional* profile option already provides a default value, which you can change.

<table>

Country-Specific Profile Options

This section lists the profile options in Oracle Financials for Germany that are referenced in this user’s guide.

JEDE: Max invoices for separate letter

Before you run the Separate Receipt Letter report, you must set up the JEDE: Max invoices for separate letter profile option at the Application level under Oracle Receivables. Due to space limitations, the maximum number of invoices that you should print on the EFT should be 6. This profile option lets you stipulate that a separate payment letter is produced for all payments that have more than 6 invoices.
Declaration Type
A declaration type is an attribute of an international EFT payment that informs the German government what the payment is for. German international EFT payments use these declaration types:
- U - Imported Goods
- V - Transit Goods
- W - Services, Capital and Other

LZB
The Landeszentralbank (LZB) is the central state bank. This bank is a sub-unit of the Deutsche Bundesbank.
