XML Tag Name	Included Mapping	Cardinality of included mapping	Table Name	Column Name	Data Type	Length	Permissible values and descriptions	Keys (pk)	Required? (yes/no)
unit_cost			ITEM_SUPP_COUNTRY	UNIT_COST	NUMBER	20,4	This field contains the current corporate unit cost for the ITEM from the supplier/origin country. This field is stored in the supplier's currency. This value will match the cost field for the primary location on item_supp_country_loc. This field may be edited while the item is in worksheet status. If edited, the user will have the choice of changing the cost of all locations, or only the primary location. This cost is the cost that will be written to item_supp_country_loc when new locations are added to an item.		Yes
