PeopleSoft 8.4 Mobile Time and Expense for Palm PeopleBook Preface

This book provides the information you need for implementing and using PeopleSoft Mobile Time and Expense for Palm.

The PeopleSoft Mobile Time and Expense for Palm PeopleBook provides overview information about application implementation and detailed information about functionality. Additional, essential information discussing the setup and design of your system resides in these companion documents:

- PeopleSoft Travel and Expenses PeopleBook.
- Supplemental Installation Instructions for PeopleSoft 8.4 Financial & ESA Applications.

About This PeopleBook

This book provides you with the information that you need for implementing and using a *Financials and Supply Chain Management 8.4* application.

This section contains information that you should know before you begin working with PeopleSoft products and documentation, including PeopleSoft-specific documentation conventions, information specific to each PeopleSoft product line, and information on ordering additional copies of our documentation.

Before You Begin

To benefit fully from the information covered in this book, you should have a basic understanding of how to use PeopleSoft applications. We recommend that you complete at least one PeopleSoft introductory training course.

You should be familiar with navigating the system and adding, updating, and deleting information by using PeopleSoft windows, menus, and pages. You should also be comfortable using the World Wide Web and the Microsoft® Windows or Windows NT graphical user interface.

Because we assume that you already know how to navigate the PeopleSoft system, much of the information in these books is not procedural. That is, these books do not typically provide step-by-step instructions on using tables, pages, and menus. Instead, we provide you with the information that you need to use the system most effectively and to implement your PeopleSoft application according to your organizational or departmental needs. PeopleBooks expand on the material covered in PeopleSoft training classes.

PeopleSoft Application Fundamentals

Each PeopleSoft application PeopleBook provides implementation and processing information for your PeopleSoft database. However, there is additional, essential information describing the setup and design of your database contained in a companion volume of documentation called *PeopleSoft Application Fundamentals*.

PeopleSoft Application Fundamentals contains important topics that apply to many or all PeopleSoft applications across each product line. Whether you are implementing only one PeopleSoft application, some combination of products within a product line, or an entire PeopleSoft system, you should be familiar with the contents of this central PeopleBook. It contains fundamental information such as setting up control tables and administering security.

The PeopleSoft Applications Fundamentals PeopleBook contains common information pertinent to all applications in each product line, such as defining general options. If you're upgrading from a previous PeopleSoft release, you may notice that we've removed some topics or topic headings from the individual application PeopleBooks and consolidated them in this single reference book. You'll now find only application-specific information in your individual application PeopleBooks. This makes the documentation as a whole less redundant. Throughout each PeopleBook, we provide cross-references to *PeopleSoft Application Fundamentals* and other PeopleBooks.

Related Documentation

You can order printed, bound versions of the complete PeopleSoft documentation delivered on your PeopleBooks CD-ROM and additional copies of the PeopleBooks CDs through the Documentation section of the PeopleSoft Customer Connection website:
<http://www.peoplesoft.com/corp/en/login.asp>.

You can find updates and additional documentation for this release, as well as previous releases, on PeopleSoft Customer Connection (<http://www.peoplesoft.com/corp/en/login.asp>). Through the Documentation section of Customer Connection, you can download files to add to your PeopleBook library. You'll find a variety of useful and timely materials, including updates to the full PeopleSoft documentation delivered on your PeopleBooks CD.

Important! Before you upgrade, it is *imperative* that you check PeopleSoft Customer Connection for updates to the upgrade instructions. We continually post updates as we refine the upgrade process.

Hard-copy Documentation

To order printed, bound volumes of the complete PeopleSoft documentation delivered on your PeopleBooks CD-ROM, visit the PeopleSoft Press website from the Documentation section of PeopleSoft Customer Connection. The PeopleSoft Press website is a joint venture between PeopleSoft and Consolidated Publications Incorporated (CPI), our book print vendor.

We make printed documentation available for each major release shortly after the software is shipped. Customers and partners can order printed PeopleSoft documentation by using any of the following methods:

Internet	From the main PeopleSoft Internet site, go to the Documentation section of Customer Connection. You can find order information under the Ordering PeopleBooks topic. Use a Customer Connection ID, credit card, or purchase order to place your order. PeopleSoft Internet site: http://www.peoplesoft.com/ .
Telephone	Contact Consolidated Publishing Incorporated (CPI) at 800 888 3559 .
Email	Send email to CPI at callcenter@conpub.com .

PeopleBooks Standard Field Definitions

Throughout our product documentation, you will encounter fields and buttons that are used on many application pages or panels. This section lists the most common fields and buttons and provides standard definitions.

Field	Definition
As of Date	The last date for which a report or process includes data.
Business Unit	An identification code that represents a high-level organization of business information. You can use a business unit to define regional or departmental units within a larger organization.
Description	Freeflow text up to 30 characters.
Effective Date	Date on which a table row becomes effective; the date that an action begins. For example, if you want to close out a ledger on June 30, the effective date for the ledger closing would be July 1. This date also determines when you can view and change the information. Pages or panels and batch processes that use the information use the current row. See Understanding Effective Dates in Using PeopleSoft Applications.
EmplID (employee ID)	Unique identification code for an individual associated with your organization.
Language or Language Code	The language in which you want the field labels and report headings of your reports to print. The field values appear as you enter them. Language also refers to the language spoken by an employee, applicant, or non-employee.

Field	Definition
Process Frequency group box	Designates the appropriate frequency in the Process Frequency group box: Once executes the request the next time the batch process runs. After the batch process runs, the process frequency is automatically set to Don't Run . Always executes the request every time the batch process runs. Don't Run ignores the request when the batch process runs.
Report ID	The report identifier.
Report Manager	This button takes you to the Report List page, where you can view report content, check the status of a report, and see content detail messages (which show you a description of the report and the distribution list).
Process Monitor	This button takes you to the Process List page, where you can view the status of submitted process requests.
Run	This button takes you to the Process Scheduler request page, where you can specify the location where a process or job runs and the process output format. See Process Scheduler Basics in the PeopleTools documentatoin.
Request ID	A request identification that represents a set of selection criteria for a report or process.
User ID	The system identifier for the individual who generates a transaction.
SetID	An identification code that represents a set of control table information or TableSets. A TableSet is a group of tables (records) necessary to define your company's structure and processing options.
Short Description	Freeflow text up to 15 characters.

Typographical Conventions and Visual Cues

We use a number of standard conventions and visual cues in our online documentation.

The following list contains our typographical conventions and visual cues:

(monospace font)

Indicates a PeopleCode program or other program example.

Bold

Indicates field names and other page elements, such as buttons and group box labels, when these elements are documented below the page on which they appear. When we refer to these elements elsewhere in the documentation, we set them in Normal style (not in bold).

	We also use boldface when we refer to navigational paths, menu names, or process actions (such as Save and Run).
<i>Italics</i>	Indicates a PeopleSoft or other book-length publication. We also use italics for <i>emphasis</i> and to indicate specific field values. When we cite a field value under the page on which it appears, we use this style: <i>field value</i> . We also use italics when we refer to words as words or letters as letters, as in the following: Enter the number <i>0</i> , not the letter <i>O</i> .
KEY+KEY	Indicates a key combination action. For example, a plus sign (+) between keys means that you must hold down the first key while you press the second key. For ALT+W, hold down the ALT key while you press W.
See Also	PeopleBooks provide cross-references under the heading “See Also.” References below this heading point to other documentation that is pertinent to the immediately preceding documentation. Capitalized titles in italics indicate the title of a PeopleBook; titles in quotes indicate the title of a chapter; titles in normal font refer to sections within the PeopleBook. Here's an example: See Also <i>PeopleSoft 8.4 Enterprise Portal PeopleBook</i> , “Handling Portal Administration Data,” Maintaining Viewer Roles

Note. Text in this bar indicates information that you should pay particular attention to as you work with your PeopleSoft system. If the note is preceded by **Important!**, the note is crucial and includes information that concerns what you need to do for the system to function properly.

Warning! Text within this bar indicates a crucial configuration consideration. Pay very close attention to these warning messages.

Pages Used to <process name>

In the documentation, each page or panel description in the application includes an introductory table with pertinent information about the page. Not all of the information will be available for all pages or panels.

Page Name	Object Name	Navigation	Usage
Name of Page	The system name of the panel or process as specified in the PeopleTools Application Designer. For example, the Object Name of the Detail Calendar panel is DETAIL_CALENDAR1.	The path for accessing the page or process.	Describes how you would use the page or process.

Comments and Suggestions

Your comments are important to us. We encourage you to tell us what you like, or what you would like to see changed about our documentation, PeopleBooks, and other PeopleSoft reference and training materials. Please send your suggestions to:

PeopleSoft Product Documentation Manager
PeopleSoft, Inc.
4460 Hacienda Drive
Pleasanton, CA 94588

Or send comments by email to the authors of the PeopleSoft documentation at:

DOC@PEOPLESOFT.COM

While we cannot guarantee to answer every email message, we will pay careful attention to your comments and suggestions. We are always improving our product communications for you.

CHAPTER 1

Getting Started With PeopleSoft Mobile Time and Expense for Palm

PeopleSoft Mobile Time and Expense for Palm provides the flexibility of recording and tracking time and expenses on handheld computing devices that use the Palm OS. Business professionals can record both their hours worked and expenses incurred anywhere without the inconvenience of stopping to enter time or expense information at a later time.

This chapter provides an overview of PeopleSoft Mobile Time and Expense for Palm and discusses:

- PeopleSoft Mobile Time and Expense for Palm business processes.
- PeopleSoft Mobile Time and Expense for Palm integration touch points.
- PeopleSoft Mobile Time and Expense for Palm implementation tasks and requirements.

Understanding PeopleSoft Mobile Time and Expense for Palm

PeopleSoft Mobile Time and Expense for Palm is a detached client that operates independently of a customer's network. Because the Palm application is designed to store multiple time and expense reports, you can determine when it's convenient to transfer your time and expense reports to PeopleSoft Expenses. PeopleSoft Time and Expense for Palm uses HotSync functionality to synchronize data between itself and PeopleSoft Expenses.

Through a standard desktop workstation, you determine what type of control data you need on your Palm device to best meet your business needs. As needs change, you can log in and change this control data.

Note. This PeopleBook assumes you are familiar with the basic operation of the Palm. If not, consult your Palm manual or other Palm sources for help.

PeopleSoft Mobile Time and Expense for Palm Business Processes

PeopleSoft Mobile Time and Expense for Palm provides these business processes:

We cover these business processes in the business process chapters of this PeopleBook.

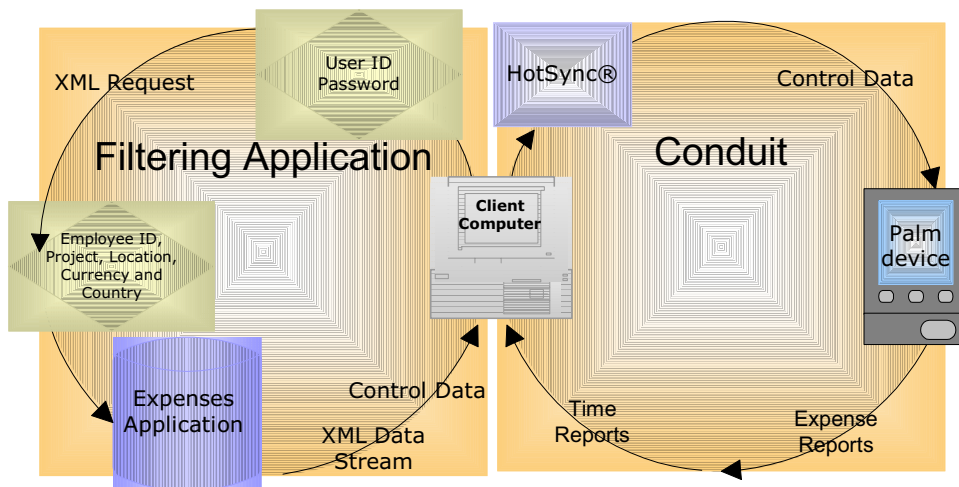

PeopleSoft Mobile Time and Expense for Palm Integration

PeopleSoft Mobile Time and Expense for Palm integrates with PeopleSoft Expenses. This section provides an overview of:

- Data synchronization between PeopleSoft Mobile Time and Expense for Palm and Peoplesoft Expenses.
- Report submission to PeopleSoft Expenses.

Understanding Data Synchronization

The following diagram illustrates how data synchronizes between PeopleSoft Expenses, the laptop or desktop PC containing the Palm database, and the Palm. The Mobile Time and Expense Filtering Application and the Mobile Time and Expense Conduit are the two primary data moving applications in PeopleSoft Mobile Time and Expense for Palm.

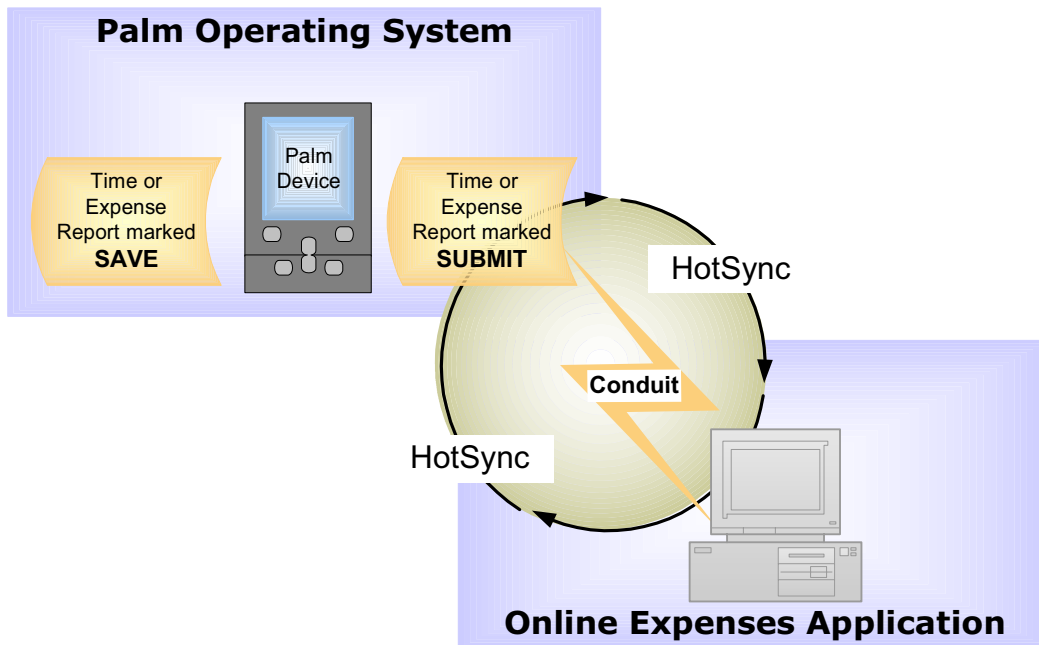

Movement of data between the PeopleSoft Expenses and the Palm device

This table provides a high-level summary of the data synchronization flow.

<p>Filtering Control Data</p> <p>Users sign in with their user ID and password to initialize the filtering application. They filter the data by selecting an employee ID, project, location, currency and country information.</p> <p>This control data downloads to their laptop or desktop PC where it is stored until the next time the HotSync synchronization process runs.</p> <p>Once HotSync initializes, this data is transferred to the Palm device to validate data entry for time and expense reports.</p>	<p>Synchronizing the Palm device and the filtering database</p> <p>Using the PeopleSoft Mobile Time and Expense Conduit, users initiate the HotSync synchronization function.</p> <p>The conduit synchronizes data between the Palm device and the laptop or desktop PC, transferring data marked for submission from the Palm device to the laptop or desktop PC and returning data from the laptop or desktop PC to the Palm OS.</p> <p>Reports that have submitted to the laptop or desktop PC are marked Sent to indicate their successful submission.</p>
---	---

Understanding Report Submission

The diagrams in this section illustrate the submission of time and expense reports from the Palm device to PeopleSoft Expenses using HotSync synchronization and the PeopleSoft Mobile Time and Expense Conduit.

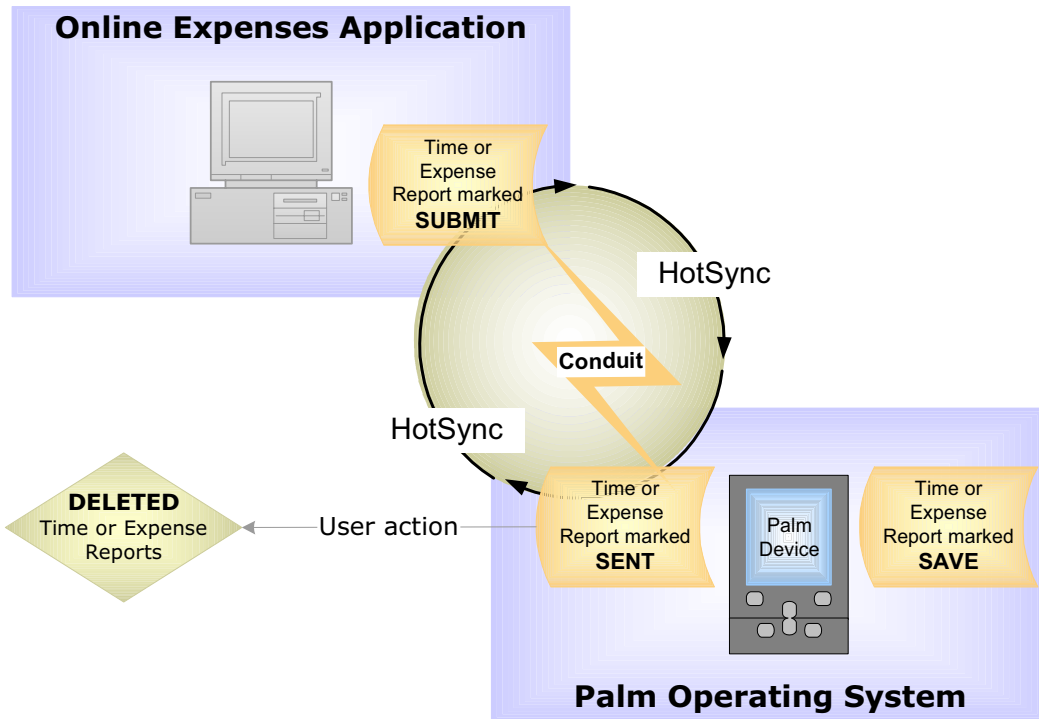

Saved and submitted data

These steps provide a high-level summary of the report submission data flow.

1. The user identifies time and expense reports with either a *Save* or *Submit* status.

2. Time or expense reports identified as *Save* remain on the Palm device until their status is changed to *Submit*. Time and expense reports marked *Submit* reside on the Palm device until the HotSync synchronization function runs.
3. HotSync initiates the PeopleSoft Mobile Time and Expense Conduit. This dedicated conduit finds all the time or expense reports identified as *Submit* and transfers them to the laptop or desktop PC and from there to PeopleSoft Expenses.
4. Simultaneously data transfers from PeopleSoft Expenses to the Palm application via the same dedicated conduit.
5. Once a time or expense report successfully submits to the PeopleSoft Expenses, the report status is changed to *Sent*.

Submitted data transferred back to the Palm application

Reports with a status of *Sent* remain on the Palm application until you delete them through the delete report option on either the Mobile Time for Palm or Mobile Expense for Palm main menu.

Note. Regularly delete reports to ensure optimum speed and performance of PeopleSoft Mobile Time and Expense for Palm.

PeopleSoft Mobile Time and Expense for Palm Implementation

This section provides an overview of the implementation process for PeopleSoft Mobile Time and Expense for Palm and discusses:

- Palm requirements.
- Desktop PC or laptop requirements.
- Software requirement.

Understanding Installation and Implementation

PeopleSoft Mobile Time and Expense for Palm is a mobile application designed for maximum convenience and portability. There is very little installation or implementation required of the user; however, your organization must install and implement PeopleSoft Expenses before you can use the mobile application.

Required data is obtained from PeopleSoft Expenses and configured for the mobile application when PeopleSoft Mobile Time and Expense for Palm is set up on your network. When you load the application to your Palm device, the installation process automatically loads the required files. These files refresh when you refresh the control data.

This table provides an overview of installing and implementing PeopleSoft Mobile Time and Expense for Palm.

Step	Reference
Install and implement PeopleSoft Expenses.	<i>PeopleSoft 8.4 Travel and Expenses PeopleBook, "Getting Started with PeopleSoft Expenses," Implementing PeopleSoft Expenses</i>
Install PeopleSoft Mobile Time and Expense for Palm on the network.	<i>Supplemental Installation Instructions for PeopleSoft 8.4 Financial & ESA Applications, "Installing PeopleSoft 8.4 Mobile Time and Expense and Application Clients"</i>
Install PeopleSoft Mobile Time and Expense for Palm to a laptop or desktop PC.	<i>Supplemental Installation Instructions for PeopleSoft 8.4 Financial & ESA Applications, "Installing PeopleSoft 8.4 Mobile Time and Expense and Application Clients"</i>
Hot Sync PeopleSoft Mobile Time and Expense for Palm to your Palm device.	<i>PeopleSoft 8.4 Mobile Time and Expense for Palm PeopleBook, "Logging On and Configuring Control Data"</i>

For more information about installing PeopleSoft Mobile Time and Expense for Palm see the *Supplemental Installation Instructions for PeopleSoft 8.4 Financial & ESA Applications* available on Customer Connection.

Palm Requirements

PeopleSoft Mobile Time and Expense for Palm requirements for the Palm are:

- Palm OS, version 3.1 or higher.
- Minimum of 8 MB of RAM.

Desktop PC or Laptop Requirements

PeopleSoft Mobile Time and Expense for Palm requirements for the desktop are:

- Desktop PC or laptop with:
 - 32 bit version of Windows—Windows 95, Windows NT 4.0 or higher.
 - 32 MB RAM (minimum), Pentium 133 MHz (minimum) or comparable chip, and 12 MB hard drive space.
- Palm HotSync Manager, version 3.1 or higher.
- ODBC (open database connectivity) version 3.5 with a Microsoft Access ODBC driver.
- Access to your organization's PeopleSoft web server through a URL.

Software Requirement

PeopleSoft Mobile Time and Expense for Palm application requirement is:

- Installed and configured implementation of PeopleSoft 8.4 Expenses.

CHAPTER 2

Understanding Key Terms and Navigation

This chapter demonstrates how to:

- Understand key terms.
- Understand navigation buttons.

Understanding Key Terms

The following is a list of terms used in PeopleSoft Mobile Time and Expense for Palm.

A

Activity ID	A unique alphanumeric identifier given to each PeopleSoft Project activity within a project. Activity IDs need only be unique within a single project.
Amount	Monetary value for an expense shown in the currency used to make the transaction.
Attendees	Persons that attend meals or business entertainment.

B

Base Currency	Employee's local currency.
Billable	Billing action that charges an expense item to a project and bills the client.
Billing Action	Method of charging expenses— <i>internal</i> , <i>billable</i> , or <i>nonbillable</i> .
Business Unit	A corporation or its subset that is independent with regard to one or more operational or accounting functions. The business unit is used to determine an employee's cash advance limit and base currency.

C

Client computer	A laptop or desktop PC equipped with a conduit used to transfer data between the Palm device and PeopleSoft Expenses.
Comment	Required explanations in PeopleSoft Mobile Time and Expense for Palm. Necessary if you fail to use a preferred merchant or check <i>No Receipt</i> for a reimbursable expense item requiring a receipt.
Company Paid Expense	Expense paid by directly reimbursing a merchant at the time the report is paid such as a corporate credit card payment.
Conduit/PeopleSoft Mobile Time and Expense Conduit	Code that resides on the laptop or desktop PC and performs the data synchronization between the Palm device and the laptop or desktop PC.
Converted Amount	The expense transaction amount converted to your base currency.
Control Data	Validation data used during report entry to ensure consistent and compliant reporting. The data includes employee profiles, expense types, currency codes, and locations.
Created	Date a user began working on a report.
Currency Code	An identifier for any monetary type.

D

Default	The value the system automatically assigns. For example, when entering a created date in PeopleSoft Mobile Time and Expense for Palm, the default value is the current date.
----------------	--

E

Employee ID	Unique identifier assigned to each employee.
End Day of Period	Last day of the week of the time reporting period.
Exchange Rate	Price of a currency in terms of another at a given moment. For Mobile Time and Expense for Palm this specifically refers to the factor used to convert the transaction currency into the base currency of the business unit to which the employee is assigned.
Expense Line Item	Row of an expense report.

Expense Report Document used to input business expenses for the purposes of reimbursement, accounting, and tracking.

F

Filtering Application (PeopleSoft Mobile Time and Expense Filtering Application) Application used to select and download control data for offline validation. The filtering application is delivered with PeopleSoft Mobile Time and Expense for Palm to install on the user's laptop or desktop PC.

G

H

HotSync Technology enabling users to connect and synchronize data between a Palm device and laptop or desktop PC. The HotSync function activates conduits registered with it to perform the data synchronization between the Palm device and the laptop or desktop PC.

Hours Per Day Employee's regular work hours per day (such as eight or ten hours).

Https HyperText Transfer Protocol using a SSL (secure socket layer). SSL is a commonly used protocol for managing the security of a message transmission on the internet. Web addresses that require secure URLs will often start with Https.

I

Internal Billing action that charges expenses such as vacation or illness to your organization.

J

K

L

List box Element of a page that enables you to select from a list of valid options for a field.

Location City, state, or country where you incurred the expense. Expense type authorized spending limits can be determined by location.

M

Merchant Name of a merchant used for an expense such as lodging, airfare, or meals.

Method Expenditure or payment means such as credit card, cash, debit card, or traveler's check.

N

Nonbillable Billing action that charges an expense to a project but does not bill the client.

Nonpayable Amount Expense item with a source that does not cause the system to generate a payment.

O

P

Palm A personal data assistant or handheld computing device utilizing the Palm OS.

PDA Any number of personal data assistants. Palm is one brand of PDA.

PeopleSoft Expenses The online application database used for capturing time and expense reports.

Period Ending/Period End Date Last calendar date in your time reporting period.

Personal Expense An expense that is not reimbursable because it is not incurred for a business purpose.

Personal Time Time such as sick or vacation time that cannot be charged to a project.

Preferred Merchant Merchants with whom your organization may have established agreements that entitle employees to discounts, such as reduced rate air travel or car rental.

Preferred Merchant Comment The explanation required by PeopleSoft Mobile Time and Expense for Palm when you fail to use a preferred merchant.

Pre-paid Expense/ Expenditure	A non-reimbursable expense that was prepaid by the organization.
Project	The highest level of hierarchical organization within PeopleSoft Projects. Projects provide the structure to which activities and resources are associated.
Project Time	Time charged to a specific project.
Project Info Business Unit	Project costing business unit. Business units specifically for PeopleSoft Projects.

Q
R

Rate	See Exchange Rate.
Receipt Comment	Required explanation in PeopleSoft Mobile Time and Expense for Palm if you check <i>No Receipt</i> for a reimbursable expense item requiring a receipt.
Report Header	The top portion of a report containing information common to the entire report.

S

Save	Time or expense report status used to retain reports in the Palm device. Designed to use for time and expense reports that need additional information before they are complete.
Sent	Time or expense report status indicating successful synchronization by the conduit. Users manually delete reports with this status from the Palm device at their convenience.
Status	Processing stage of your report such as <i>Save</i> , <i>Submit</i> , and <i>Sent</i> .
Submit	Time or expense report status indicating the report is complete and identified for transfer to the company network with the next HotSync session.

T

Time Report	Time entry page that captures hours for project-based time and personal time.
--------------------	---

Time Report Period	Employee's time card period such as weekly or semimonthly.
Total Hours	All hours an employee records on a time card including regular hours and overtime hours.
Type	Means of itemizing various kinds of business expenses. Examples are hotel, dinner, or ground transportation. Also known as Expense Type.

U

User ID	Identification assigned to an individual and used in conjunction with a password to grant access to the PeopleSoft system.
User Profile	Group of default values associated with an employee ID including your employee department, cash advance limit, base currency, and time reporting details.

V

VAT (value added tax)	Method of taxing the supply of foreign goods and services.
------------------------------	--

W
X

XML Data Stream	Data returned to the database in response to the XML request.
XML Request	Data request sent by the conduit application to the database containing PeopleSoft Expenses.

Y
Z

Understanding Navigation Buttons

PeopleSoft Mobile Time and Expense for Palm uses several buttons to navigate. You will find these buttons in the application.

Buttons on the Palm Main Menu

Tap the **HotSync** button to begin the HotSync process.

PSTime

Tap the **PSTime** button to access PeopleSoft Time for Palm.

PSExpenses

Tap the **PSExpenses** button to access PeopleSoft Expenses for Palm.

Buttons within PeopleSoft Mobile Time and Expense for Palm

Tap the **Attendees** button to access the Attendees page, where you can add the names of those who attended the event with you.

Tap the **Calendar** button to access the Calendar page, where you can select a date for your expense type.

Tap the **Comment** button to access the Comment page, where you can add information to support expense types not meeting standard criteria (no receipt, non-preferred merchant, and so forth).

Tap the **Description** button to access the Description page, where you can either enter or view your description. This symbol is also used as the **Comments** button on the Mobile Expense for Palm New Report page.

Tap the **Project** button to access the Project Info page, where you can add project information.

Tap the arrows at the top or bottom of the **scroll bar** to navigate to additional data. Scroll bars appear only when data exceeds the size of a specific cell.

Tap the **VAT** button to access the Value Added Tax page, where you can add GST, PST and VAT information.

CHAPTER 3

Logging On and Configuring Control Data

This chapter provides an overview of the initialization process and discusses how to:

- Log into PeopleSoft Mobile Time and Expense for Palm from a workstation.
- Build control data files.
- Manually synchronize data.

Understanding the Initialization Process

The PeopleSoft Mobile Time and Expense Filtering Application provides an intuitive tool to download control data from PeopleSoft Expenses to PeopleSoft Mobile Time and Expense for Palm. The filter application is delivered with Mobile Time and Expense for Palm and is installed on your laptop or desktop PC as part of the installation process.

Based on user ID and password, the application returns a list of values equal to all employees for whom you have entry authority. Once you select an employee ID, information appears and you choose individual values for each control data element.

Each time you log into PeopleSoft Mobile Time and Expense for Palm, you configure control data and create new control data files to download. In this way, control data is frequently refreshed based on your needs. If the business expenses are restricted to the United States, you select U.S. control data. If the business expenses change to Europe or Asia, you select validation data for these regions instead.

Note. When you log in for the first time, PeopleSoft Mobile Time and Expense for Palm database files are created. The application automatically loads these files onto the Palm device the next time you initiate HotSync.

Logging Into the Application from a Desktop PC

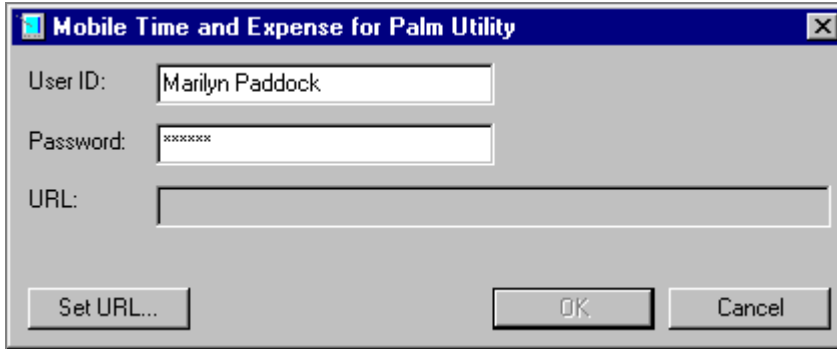

The log in process documented in this section is applicable to the laptop or desktop PC. For accessing the application on the Palm device, tap either the PSExpense or PSTime buttons on the Palm Main Menu.

See Also

Understanding Navigation Buttons

To log on to the application from a desktop PC:

1. Open the application from the Start menu or icon.

Mobile Time and Expense for Palm Utility dialog box

2. Enter a **User ID** and **Password**.
3. If no URL appears, click **Set URL**.

Enter URL dialog box

4. Enter the appropriate URL as supplied by your network administrator and click **OK**.

The URL will populate the Mobile Time and Expense for Palm Utility dialog box.

5. Click **OK**.

The Mobile Time and Expense for Palm Utility appears. Use this application to configure and filter control data.

Building Control Data Files

This section discusses how to:

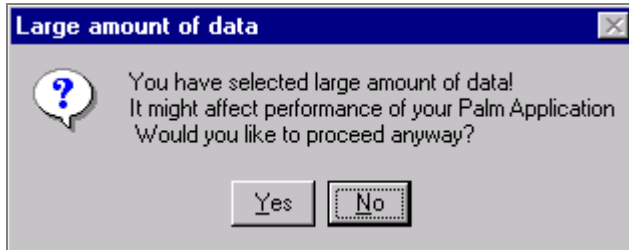

- Filter control data.
- Create control data files.

Filtering Control Data

Filtering Control Data is required during the log on process.

Palm devices have limited storage capabilities. To maximize the performance of the application on the Palm device, download only those validation values that you use most frequently. If business needs change, select validation values that accommodate these new needs.

The system displays a verification message if you attempt to transfer a large amount of data.

The system also displays a warning message in the expense and time applications if the Palm begins to exceed its memory limitations. If you receive the message do the following:

- Run the HotSync synchronization function.
- Submit any completed reports.
- Log into the system and re-configure a smaller set of control data.
- Delete previously submitted reports.

To select employee data and download profile:

1. Access the Mobile Time and Expense for Palm Utility page.

Mobile Time and Expense for Palm Utility page

The Mobile Time and Expense for Palm Utility page appears when you complete the log-in process.

2. Select an **Employee ID/Name** from the available options.

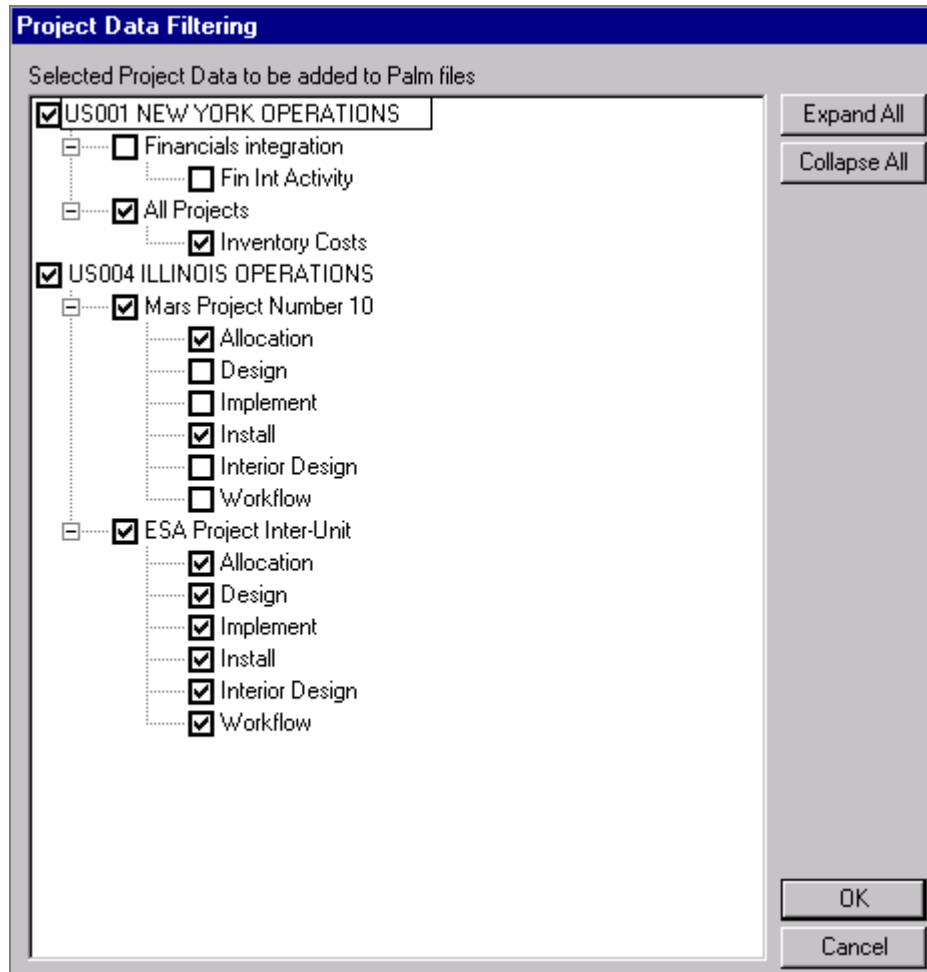

The Employee IDs available to you depend on the user ID you entered when you logged in. Selecting an Employee ID determines whose data you are filtering.

3. Select a **Palm Profile for Download** from the available options.

If you have multiple Palm user accounts on your workstation, use this option to identify the user for whom you are filtering data.

To configure projects control data:

1. Click **Projects**.

Project Data Filtering page

A project data tree lists all activities belonging to a project and all projects belonging to a project business unit associated with the employee ID you selected.

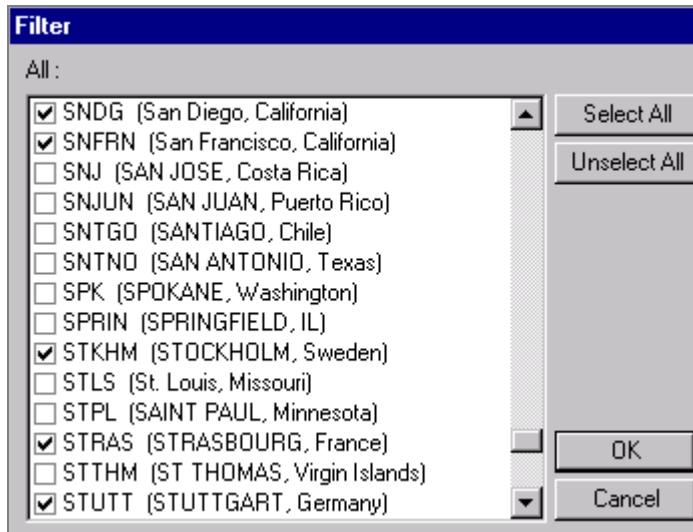

2. Select the project business units, projects, and activities to include in the Palm database files.

Select activities individually or select the project or project business unit to which they belong. When you select a project, all activities in that project are automatically selected. When you select a project business unit, all projects in that project business unit are automatically selected.

3. Click **OK** to save the selections and return to the Mobile Time and Expense for Palm Utility page.

To configure locations, currency codes, and countries control data:

1. Click **Location**, **Currency Codes**, or **Countries** to access the filter pages.

Filter page for Locations

Note. The process for selecting Location, Currency Codes, and Countries is identical. The only difference is in the nature of the items on the Filter page.

2. Select the values to include in the Palm control data files.
Click **Select All** or **Unselect All** to select or clear all available data.
3. Click **OK** to save the selections and return to the Mobile Time and Expense for Palm Utility page.
4. (Optional) Click **Cancel** to return to the Mobile Time and Expense for Palm Utility page without saving your work.

Creating Control Data Files

After you determine the data to send to the Palm device, create the control data files.

To build control data files:

1. Access the Mobile Time and Expense for Palm Utility page.

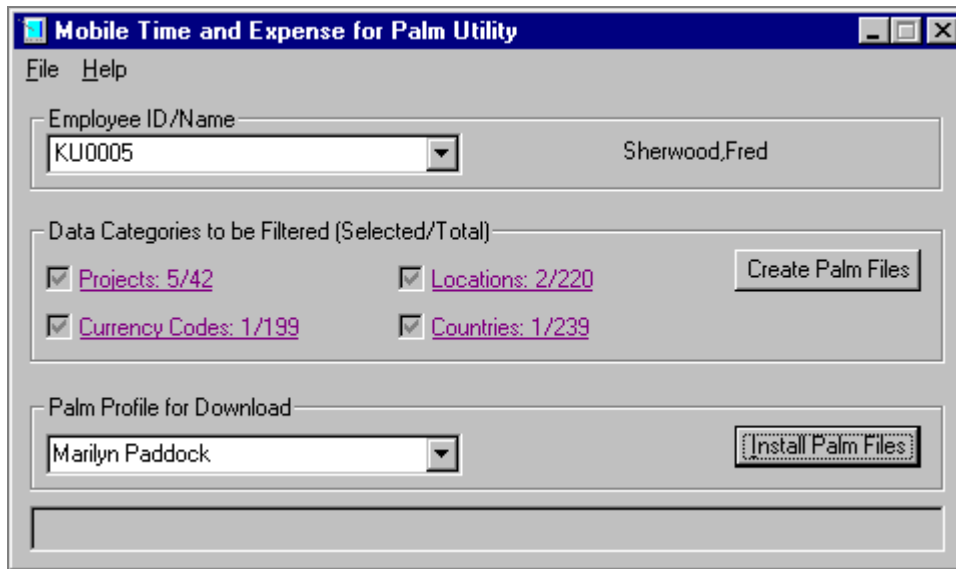

The numbers contained in the Projects, Location, Currency Codes, and Countries links represent the number of values selected, and total number of values possible, to send to PeopleSoft Mobile Time and Expense for Palm.

2. Click Create Palm Files.

A confirmation message appears when the process is successfully completed.

3. Click **OK**.

Mobile Time and Expense for Palm Utility page with Install Palm Files button

The Install Palm Files button is now available.

4. Click **Install Palm Files**.

5. Click **OK**.

The files are stored on the desktop PC and identified for transfer to the Palm device the next time you initialize HotSync.

6. Press the HotSync button on the Palm cradle device to initiate the synchronization process and transfer all files to the Palm device.

Note. If you haven't previously installed PeopleSoft Mobile Time and Expense for Palm it will also transfer to the Palm device when you initiate HotSync.

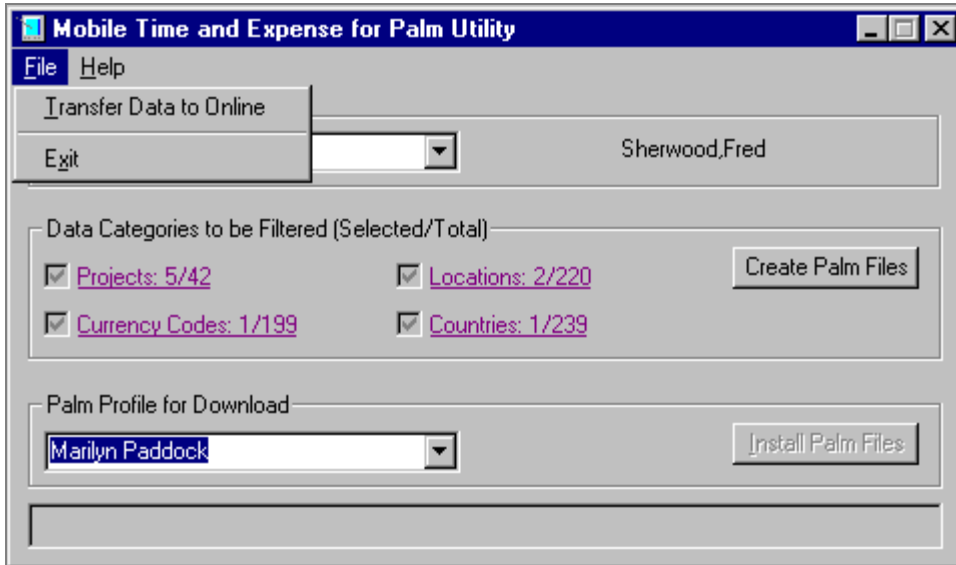

7. Select **File, Exit** from the menu bar to exit the Mobile Time and Expense Filtering Application.

Manually Synchronizing Data

In the rare occasions when the data does not automatically reach PeopleSoft Expenses, such as with the loss of network connectivity, you can manually synchronize data using an option on the Mobile Time and Expense for Palm Utility page.

To manually synchronize data from the laptop or desktop PC:

1. Access the Mobile Time and Expense for Palm Utility page.

Mobile Time and Expense for Palm Utility page

2. Select File, Transfer Data to Online.

Any data from the Palm device that is currently stored on the laptop or desktop PC transfers to PeopleSoft Expenses.

CHAPTER 4

Managing Time Reports

This chapter provides an overview of time reports and discusses how to:

- Access the time report functionality on the Palm device.
- Establish time report default values.
- Manage time reports.
- View time summaries.

Understanding Time Reports

With PeopleSoft 8.4 Mobile Time and Expense for Palm you can:

- Establish default values to reduce the amount of data entry required to complete a time report.
- Enter hours as you work to avoid the need to remember the daily hours worked on a project.
- Store time reports on the Palm device and mark them for submission the next time that you initiate HotSync.
- Summarize time reports currently stored on the Palm device, viewing total time by project or policy.
- Track project and personal time.

Accessing Time Report Functionality

To access time report functionality on the Palm:

1. Tap **PsTime** on the Palm main menu.

PeopleSoft Time for Palm splash page

The PeopleSoft 8.4 Mobile Time for Palm splash page loads and the PeopleSoft Time Main Menu appears.

2. Tap the desired option.

PeopleSoft Time Main Menu

You can now begin managing time data and reports.

Establishing Time Report Default Values

This section discusses how to set default values for time reports.

To create time report default values:

1. Access the PeopleSoft Time Main Menu.

PeopleSoft Time Main Menu

2. Tap **Set Default Values**.

Set Defaults page

Note. The valid values for time report defaults are based on the downloaded control data.

3. Select values for each of these fields from the available options:

- Business Unit.
- Project ID.
- Activity ID.
- Country.
- State.

4. Select the **Billing** method:

Billable

Time that is chargeable to a client.

Internal

Time charged to accounts within your organization.

Nonbillable

Time identified with a project, but not billable to a client.

Note. *Billable, Internal, and Nonbillable* are options that are delivered with the software, but the billing options can be customized to meet specific organization or customer needs.

5. Select one of these options:

Use Last Saved

Use the project values from the time entries on the last saved time report as default values.

Use Project Defaults

Use the project values identified on this page as default values.

6. Tap **Done** to save the default values and return to the PeopleSoft Time Main Menu.

Managing Time Reports

This section discusses how to:

- Create new time report entries.
- View new time report entries.
- Modify existing time reports.
- Delete time reports.

Creating New Time Report Entries

To create a new time report:

1. Access the PeopleSoft Time Main Menu.

PeopleSoft Time Main Menu

2. Tap **Create a New Report**.

New Report page

3. Tap either **Project Time** or **Personal Time** to categorize the time entry.

Project Time

Time charged to a specific project or activity.

Personal Time

Time that cannot be charged to a project or activity. Examples are vacation, floating holiday, contract holiday, paid illness, personal time, and jury duty.

4. Tap the **Calendar** button to access the Select a date page to select a date for the time entry.

Select a date page

Tap a month and a day or tap **Today** as the entry date. Tap **Cancel** if you do not wish to choose a new date. After you make a selection you will return to the New Report page.

5. Tap **Add** to access the Project Time or Personal Time page, where you can enter daily project or personal time. The page that appears depends on the selection on the New Report page.
6. (Optional) Tap **Cancel** to return to the PeopleSoft Time Main Menu without saving your work.

To create daily project time report entries:

1. On the Project Time page, select the **Hours** and **Min** (minutes) you worked on this project.

Project Time page

2. Change or accept the default values for each field:

- **BU PC** (project business unit).
- Project ID.
- Activity ID.
- Country.
- State.
- **Billing Action.**

3. Tap an option for the time entry.

Add Next	Saves the time entry and moves the date displayed at the top of the page forward by one day.
Save	Saves the time entry and displays the Time Report View Page.
Delete	Deletes the time entry. When the confirmation window appears select Yes to proceed with the deletion.
Cancel	Cancels the time entry and returns you to the New Report page.

To create daily personal time report entries:

1. Access the PeopleSoft Time Main Menu.
2. Tap Create a New Report.

New Report page

3. Tap the **Personal Time** option.
4. Tap **Add Report** to create a new personal time entry.

Personal Time page

5. Select the **Hours** and **Min** (minutes) of the personal time you are reporting.
6. Select a **Personal Time** type.
7. Tap in a **Comment** to support the time entry.

The Comment area is a free flow text box capable of storing up to 254 characters.

8. (Optional) Select **Repeat Entry for Multiple Days** if you want a personal entry to span a range of dates.

Personal Time page displaying multiple days option

When you select this option the date at the top of the page disappears. **From** and **To** fields appear with left and right arrows to enable you to set the date range within the specified time period.

9. Tap an option for the time entry.

Save Saves the time entry and displays the Time Report View Page.

Cancel Cancels the time entry and returns you to the Main Menu.

Note. Options may remain unavailable until data is entered in all required fields.

Creating New Time Report Entries

After you save a new project or personal time report, the Time Report View page appears.

Time Report View			
From: 6/30/01		To: 7/6/01	
Project Related Hours			Thu
PC BU	Project	Activity	7/5
US004	Mars	Design	2
US001	Financials	Fin Int	2
Personal Hours			
Personal - Paid			4
Total Hours			8
Done			

Time Report View page

The Time Report View page displays time entries for each day of the time period. Use the left and right arrows at the bottom of the page to navigate to different days within the time period shown in the **From** and **To** fields.

Project related hours appear by project business unit, project ID, and activity ID for each day. Personal hours appears by category and time logged.

Enter project related hours or personal hours for the date shown by tapping the space below the entry.

Tap **Done** to return to the PeopleSoft Time Main Menu.

Modifying Existing Time Reports

To open or change an existing time report:

1. Access the PeopleSoft Time Main Menu.

1. Tap **Modify an Existing Report**.

Modify Reports		
Select the report you want to modify:		
Status	Period End Date	Hours
Save	7/27/01	40
Save	7/6/01	38.5
Save	7/13/01	40
Save	7/20/01	51.75
Done		

Modify Reports page

2. Select a time report by **Status**, **Period End Date**, and **Hours** entered.

Tap on the column heading to sort by **Status**, **Period End Date**, or **Hours**.

3. Edit the report as needed.

Total Personal:	12 Hrs
Grand Total:	38.5 Hrs
<input type="button" value="Done"/>	

Time Report View page displaying hours by category

The system displays data by **Project**, **Personal Time**, and **Hrs** (hours). These values are added to the **Total Project Related** hours, **Total Personal** hours, and **Grand Total**.

If necessary, use the scroll bar to navigate to the top or bottom of the list.

4. Tap **Done** to return to the PeopleSoft Time Main Menu.

CHAPTER 5

Managing Expense Reports

This chapter provides an overview of expense reports and discusses how to:

- Access expense report functionality.
- Establish expense report default values.
- Manage expense reports.
- View expense summaries.

Understanding Expense Reports

With PeopleSoft Mobile Time and Expense for Palm you can:

- Establish default values to reduce the amount of data entry required to complete an expense report.
- Enter expenses as they occur to avoid the need to remember details such as what customers you took to lunch or the taxi service you used.
- Store expense reports on the Palm device and mark them for submission the next time that you initiate HotSync.
- Summarize expense reports currently stored on the Palm device, viewing total expenses by reimbursable, non-reimbursable, and personal expenses.

Accessing Expense Report Functionality

To access expense report functionality on the Palm:

1. Tap PSExpenses button on the Palm main menu.

PeopleSoft Expenses for Palm splash page

The PeopleSoft Mobile Expense for Palm splash page loads and then the PeopleSoft Expenses Main Menu appears.

2. Tap the desired option.

PeopleSoft Expenses Main Menu

You now can begin managing expense data and reports.

Establishing Expense Report Default Values

This section discusses how to:

- Establish general expense report default values.
- Establish project default values.

Establishing General Expense Report Default Values

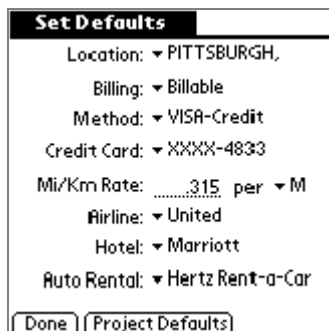

To create general expense report default values:

1. Access the PeopleSoft Expenses Main Menu.

PeopleSoft Expenses Main Menu

2. Tap **Set Default Values**.

Set Defaults page

Note. The default options may vary based on the use of preferred merchants within PeopleSoft Expenses.

3. Select a **Location** from the available options.
4. Select a **Billing** method:

Billable	Expense that is chargeable to a client.
Internal	Expense charged to accounts within your organization.
Nonbillable	Expense identified with a project, but not billable to a client.

Note. *Billable*, *Internal*, and *Nonbillable* are options that are delivered with the software, but the billing options can be customized to meet specific organization or customer needs.

5. Select a payment **Method** from the available options.

Valid values are based on the control data downloaded for the selected employee ID. Examples are check, cash, prepaid air, prepaid expenses, Visa, and American Express.

Note. Based on the method you select the **Credit Card** number field will activate. If you use corporate credit cards to pay for your expenses and your organization has loaded these into PeopleSoft Expense, you may select a card matching the payment method. When you submit the report, your organization can match the card to the appropriate vendor and send the authorized reimbursements directly to the vendor.

6. Select the **Mi/Km Rate**.

The distance rate per unit is based on either **Mi** (miles) or **Km** (kilometers).

7. Tap the default amount your organization reimburses for distance traveled.

8. Select values for the remaining fields:

- Airline.
- Hotel.
- Auto Rental.

9. Select one of these options:

Done	Save your work and return to the PeopleSoft Expenses Main Menu.
Project Defaults	Access the Project Info (information) page to select the Projects ChartFields. Use this option only if you use PeopleSoft Projects.

Establishing Project Default Values

The option to designate project default values is available if your organization uses PeopleSoft Projects.

To create project default values:

1. Access the PeopleSoft Expenses Main Menu.
2. Tap Set Default Values.
3. Enter the required information on the Set Defaults page and tap the **Project Defaults** button.

Project Info

Business Unit: ▼ U5001

Project: ▼ Financials

Activity: ▼ Fin Int

Project Info (information) page

Note. Project default options are based on the employee ID selected when downloading valid values.

4. Select values for each of these fields:

- Business Unit.
- Project ID.
- Activity ID.

Note. These are the project components associated with the overall expenses generated by the employee. Individual expense reports and expense report line items maybe associated with different projects.

Managing Expense Reports

This section discusses how to:

- Create new expense report entries.
- Add project information, descriptions, comments, and attendees to expense reports.
- Add VAT to expense reports.
- Modify existing expense reports.
- Delete expense reports.

Creating New Expense Report Entries

To create a new expense report:

1. Access the PeopleSoft Expenses Main Menu.
2. Tap **Create a New Report**.

New Report page

3. Tap in a **Report Name** to identify the report.

This name will be visible when you view reports.

4. Select the expense report **Purpose**.

5. Tap in a **Comment** for the report.

The Report Comment page is a free flow text box capable of storing up to 254 characters. If necessary, use the scroll bar to navigate to the right.

Use the **Comment** button to access the Report Comment page where you can view or tap in report comments.

6. Select one of these options:

Add Expense

Add expense line detail. The page that appears depends on the expense type selection.

Save Report

Save the report and return to the PeopleSoft Expenses Main Menu. You can add expense detail later by tapping the **Change an Existing Report** option on the PeopleSoft Expenses Main Menu.

Cancel

Return to the PeopleSoft Expenses Main Menu without saving your work.

To create detailed report lines:

1. On the New Report page, select an expense type from the **Add Expense** drop-down list.

Hotel/Lodging

Expense Date: 7/19/01

Description: lodging in

Billing: Billable

Payment: American Express

Credit Card:

Location: OAKLAND/BERKELI

Merch. Type: Preferred

Merchant: Hilton Hotels

Save Cancel Next>

Expense Detail page for Hotel/Lodging expense type (1 of 2)

Fields on this page may automatically populate based on the default values.

Note. The fields displayed on the Expense Detail page are based on the expense type. Valid values for these fields are based on control data downloaded.

2. Tap the **Calendar** button to access the Select a Date page where you can change the **Expense Date**.

The current date is the default value.

3. Tap in the **Description** of the expense.

This is a free flow text box capable of storing up to 254 characters.

Use the **Description** button to access the Description page where you can view or tap in expense item comments.

4. Select values for each of these fields:

- **Billing** method.
- **Payment** method.
- Location.

5. Select a **Merch. Type** (merchant type) from the available options.

The options for merchant type are *Preferred* or *Non-preferred*. If you choose a non-preferred merchant the **Comments** button appears.

Tap the **Comments** button to access the Comments page to explain why you used a non-preferred merchant. You must add a comment before you can save your work.

6. Select a **Merchant** from the available options.

If you selected the *Preferred* merchant option the merchant list displays preferred merchants for the expense type. If *Preferred* merchant is not selected the **Merchant** field becomes an open field for you to tap in the merchant name.

7. Tap **Next>** to access the additional fields for the Expense Detail page.

Hotel/Lodging

8. (Optional) Tap **Cancel** if you do not want to complete the expense detail.

Note. The **Save** button is unavailable until all required fields on the Expense Detail pages are completed.

9. Tap in the **Amount** of the Expense.
10. (Optional) Select a currency type from the available options.

The currency code defaults to the base currency for the business unit.

11. (Optional) Select an **Exchange Rate**.

Note. The exchange rate defaults to 1.0000, assuming your transaction currency and your base currency are the same. If the expense was generated in a currency different from your base currency, change this rate. The **Reimb Amt** (reimbursement amount) converts foreign currency expenses to your base currency using the exchange rate specified.

12. Specify if this was a **Personal Expense** by selecting *Yes* or *No*.

The default value is *No*.

13. Specify if you have a **Receipt Available** by selecting *Yes* or *No*.

The default value is *Yes*.

If you select *No*, the **Comments** button appears. Tap the button to access the Comments page to explain why you do not have a receipt. You must add a comment before you can save your work.

14. Tap an option for the expense detail.

Save	Save the expense line detail and return to the Change Report page.
Cancel	Cancel the expense line detail and return to the Change Report page.

5. Select one of these options:

- Save Report** Save the report and return to the PeopleSoft Expenses Main Menu.
- Cancel** Return to the PeopleSoft Expenses Main Menu without saving your work.

Deleting Expense Reports

To delete an expense report:

1. Access the Expense Report Main Menu.
2. Tap **Delete a Report**.

Expense Reports search page

Tap the column heading to sort the list by **Date** or **Report Name**.

3. Select an expense report.

Delete Report page

4. Tap Delete Report.

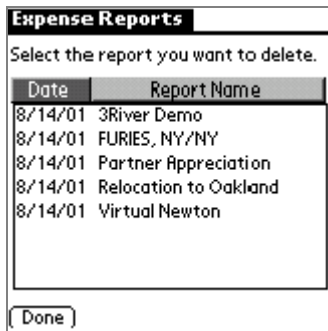

Select **No** to prevent the deletion and return to the PeopleSoft Expenses Main Menu.

5. Tap Yes.

6. Tap OK.

Expense Reports delete page

The report you selected no longer appears on the page.

7. Tap **Done** to return to the Mobile Expense Main Menu.

Viewing Expense Summaries

To view summarized expense reports:

1. Access the Expense Report Main Menu.
2. Tap **View Expense Summary**.

Expense Summary		
Show: ▾ All		
Date	Report Name	Amount
8/7/01	Users	3746.19
8/7/01	All Hands	265.01
8/8/01	3River Demo	75.96
8/8/01	Relocation to	5469.00
Number of Reports:		5
Total Expenses:		11108.41 USD
Total Personal:		685.00 USD
Total Credits:		-465.00 USD
Done		

Expense Summary page

3. Select a **Show** summary level.

All

Display expense reports with either the *Save* or *Submit* status. Expense reports with the *Sent* status are not included in these totals.

Save

Display only expense reports with the *Save* status.

Submit

Display only expense reports with the *Submit* status.

Tap the column heading to sort the list by **Date**, **Report Name**, or **Amount**.

If necessary, use the scroll bar to navigate to the top or bottom of the list.

Note. Select a report to access the Change Report page where you can edit the report.

4. Tap **Done** to return to the PeopleSoft Expenses Main Menu.

CHAPTER 6

Submitting Time or Expense Reports

This chapter discusses how to:

- Change the report status to submit.
- Submit reports through data synchronization.

Changing the Report Status to Submit

To change a report status from save to submit:

1. Access the PeopleSoft Time or PeopleSoft Expenses Main Menu.
2. Tap **Manage Report Submission**.
3. Tap the reports for which you want to change a status.

When you tap a report, the status toggles between *Save* and *Submit*. Reports that are changed to a *Submit* status submit to PeopleSoft Time or PeopleSoft Expenses for approval the next time that you initiate the HotSync function.

4. Tap **Done**.

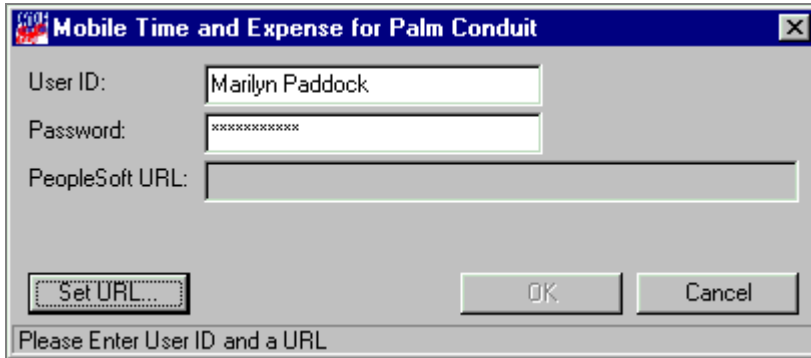

5. Tap **OK** to return to the PeopleSoft Time or PeopleSoft Expenses Main Menu.

Submitting Reports Through Data Synchronization

This section discusses how to submit reports using data synchronization and the conduit.

To synchronize report data between the Palm device and the PeopleSoft Expenses online application:

1. Connect the Palm device to the HotSync cable or cradle.
2. Press the HotSync button located on the Palm device cradle or connection hardware.

Mobile Time and Expense for Palm Conduit dialog box

The dialog box appears on the laptop or desktop PC when the conduit completes syncing the data from the Palm.

3. Enter a User ID and a Password.
4. If no URL appears, click the **Set URL** button.

Enter URL dialog page

5. Enter the appropriate URL as supplied by your network administrator.
6. Click **OK**.

An application message transfers the data from the Palm device to the PeopleSoft Expenses online application.

7. Wait for a confirmation of successful completion.

Note. If you do not receive confirmation that the data synchronization was successful check the status of your reports. If they still bear the *Submit* status and are not listed as *Sent*, rerun HotSync to resubmit them.

Glossary

The terms in this glossary are used among multiple Financials, Supply Chain Management, and Enterprise Portal applications.

Numbers

401(a)(17) Limits

The limitations on the earnings that may be included in the calculation of benefits under qualified U.S. pension plans.

1st Year Amount

In PeopleSoft Workforce Analytics, 1st Year Amount is an employee-level compensation amount, totaling the calculations for the first calendar year's worth of accounting periods, in a compensation scenario.

A

Abend

Abnormal End (to a process).

ABM (Activity-Based Management)

See PeopleSoft Activity-Based Management.

ABPS (Activity-Based Planning and Simulation)

See Activity-Based Planning and Simulation.

Absence

An absence occurs when an employee is not at work (absent) during a normally scheduled work period. Absences may be scheduled or non-scheduled, compensated or uncompensated, excused or unexcused. An absence may occur for a variety of reasons like illness, family emergency, civic obligations (e.g. Military duty or jury duty), or vacation.

Absence Entitlement

Element which defines the rules for granting paid time off for valid absences, such as sick time, vacation, and maternity leave. An absence entitlement element defines the entitlement amount, frequency, and entitlement period.

Absence Take

Element which defines the conditions that must be met before a payee is entitled to take paid time off.

Accepted Exception

An exception that has been reviewed and validated (see Time Management).

Accommodations

Accommodations are efforts your organization is able to make for employees or applicants with disabilities, such as purchasing special equipment or making structural changes to a work environment.

Account Management

In PeopleSoft Demand Planning, a feature that enables you to divide a centrally held corporate forecast into multiple subsections for easier maintenance and management. These subsections are separate databases that can be distributed to account managers for use and updates, then rejoined with the main database at a later date.

Account

A code for recording and summarizing financial transactions as expenditures, revenues, assets, or liabilities balances. This is a delivered PeopleSoft ChartField, specific use of which is typically defined by the organization during implementation of PeopleSoft General Ledger.

Account Type

A name for one of the different kinds of accounts used in a PeopleSoft General Ledger, such as Asset, Liability, Equity, Revenue, and Expense.

Accounting Class

In PeopleSoft Enterprise Performance Management, an attribute that defines how the particular resource would be treated for generally accepted accounting practices. Inventory denotes whether a Resource will become part of a balance sheet account such as inventory or fixed assets, while Non-inventory denotes that the Resource will be treated as an expense of the period during which it occurs.

Accounting Date

The date that a transaction is recognized as opposed to the date the transaction actually occurred—the **Transaction Date** (although the two dates can be the same). The accounting date determines the period in the general ledger to which the transaction is to be posted. You

can only select an accounting date that falls within an open period in the ledger to which you are posting. The accounting date for an item is normally the invoice date. In PeopleSoft Asset Management, the difference between accounting date and transaction date determines whether prior period depreciation must be calculated, and how much. Accounting Date must be later than or equal to Transaction Date.

Accounting Entry

A set of related debits and credits. An Accounting Entry is made up of multiple ***Accounting Lines***. In most PeopleSoft applications, accounting entries are always balanced (debits = credits). Accounting entries are created to record accruals, payments, payment cancellations, manual closures, project activities in general ledger, and so forth (depending on the application).

Accounting Entry Template

A user-defined table that controls the use of system-generated accounting lines in the posting processes.

Accounting Split

Method indicating how expenses are allocated or divided among one or more sets of accounting ChartFields.

Accredited Education

Education above the high school level completed in a U.S. college, university, or other educational institution that has been credited by one of the accrediting agencies or associations recognized by the Secretary, U.S. Department of Education.

Accrual

Any hours that employees accumulate for use at another time in the form of earned vacation time or sick leave, for example.

Accrual Basis Accounting

Accounting that records the impact of a business event as it occurs, regardless of whether the transaction affected cash.

Accrual Class Codes

Classes or categories of accruals.

Accrual Type

Defines an accrual such as annual leave or sick leave.

Accumulate Demand

In PeopleSoft Demand Planning, a transfer process function that adds demand quantities for an item to any quantities that already exist for the period.

Accumulator

Element which allows you to combine several elements. For example, an accumulator could consist of all voluntary deductions, or all company deductions, enabling you to accumulate amounts. It allows total flexibility for time periods and values accumulated. See also Time Administration.

Accumulator [Global Payroll]

Element which provides a means for storing the cumulative values of defined items as they are processed. As you make payments, take deductions, and perform calculations, you'll use accumulators to track accumulated amounts, or balances. You can accumulate a single value over time or multiple values over time, as your requirements specify. For example, an accumulator could consist of all voluntary deductions, or all company deductions, enabling you to accumulate amounts. It allows total flexibility for time periods and values accumulated.

Action

In PeopleSoft Deduction Management, a task that you perform to obtain information required to resolve a deduction.

Action and Conditions

A process that defines actions and conditions independently of one another and then combines them to create a complete rule (see Rule Creation).

Action Code

In PeopleSoft Engineering, a user-defined code associated with an event/action triggered by the implementation of an engineering change order (ECO). Actions could include analyzing an item's existing quantity on hand, scrapping existing inventory, or modifying current documentation.

In PeopleSoft Product Configurator, a 2-character code that identifies rule types. For example, *FP* is the action code for the Finalize Price rule, and *CN* is the action code for the Condition rule. The rules control the processing path for configured items.

Action List

An online list of customers who meet predefined credit management criteria. The list also includes appropriate procedures for each action and contact information for the customer.

Action Owner

In PeopleSoft Deduction Management, the individual assigned a task to obtain information to resolve a deduction.

Action Reason

The reason an employee's job or employment information is updated. The action reason is entered in two parts: a *personnel action*, such as a promotion, termination, or change from one paygroup to another—and a *reason* for that action. Action Reason is used by PeopleSoft Human Resources, PeopleSoft Benefits Administration, PeopleSoft Stock Administration, and the COBRA Administration feature of the Base Benefits business process.

Active Control

A target control requiring that the user validate the budget against the planning targets before submitting it. If the budget totals are not within the tolerance levels, the system indicates that the status is invalid and the user cannot submit their budget until the budget is modified and the amount is within the tolerance range of the planning target.

Activity

In PeopleSoft Receivables and Deduction Management, an action taken on an item, such as creating an item, unposting an item, or writing off an item.

In PeopleSoft Projects, the unit of work that provides a further breakdown of projects—usually into specific tasks. Resources are assigned directly to activities within a project, not directly to projects.

A self-contained task that is part of one or more business processes. Business process maps display the activities that make up the process. An activity consists of steps representing the pages the user needs to complete and events representing the workflow routings triggered by the user's actions.

In PeopleSoft Enterprise Warehouse, the work of an organization and the aggregation of actions used for Activity-Based Costing.

Activity Attributes

Activity Attributes provide pieces of activity information. For example: capacity and performance, cost drivers, cycle time and performance measures.

Activity-Based Costing (ABC)

A methodology that measures the cost and performance of activities, resources and cost objects, assigns resources to activities and activities to cost objects based on their use and recognizes the causal relationships of cost drivers to activities.

Activity-Based Management (ABM)

See PeopleSoft Activity-Based Management (ABM).

Activity-Based Planning and Simulation (ABPS)

ABPS, a feature of PeopleSoft Activity-Based Management, calculates resource demands, new rates, costs, and activity volumes based on demand forecasts. It converts the new

resource demands into new cost requirements at the General Ledger item level to feed as input for budgeting.

Activity Driver

An Activity Driver indicates the amount of demand there is for a particular activity and it is used to assign cost to cost objects. In some instances, an activity driver may represent the yield of an activity.

Activity Fragmentation

The part of the Employee Profile feature that provides information about the number of employees that is involved in completing a particular activity on a full or part-time basis.

Activity ID

A unique 15-character alphanumeric identifier given to each activity within a project. Activity IDs need only be unique within a single project.

Activity List

In PeopleSoft Pension Administration, a checklist used to monitor pension-related activities.

Activity Type

A user-definable identifier for grouping activities.

Activity Type

Also known as Activity Code. A categorization of work effort. Typically work effort is categorized as productive or non-productive; Repair, Maintenance, Enhancement, or Improvement; or Development or Construction. Activity type is usually required to support cost accounting or financial accounting (recording) functions. It may also be required to support some organizational administration requirements such as organizational productivity goals, or employee performance measurement. In some companies, activity type is inferred from job function, work group affiliation, or organization.

Activity Use

An attribute used to describe the behavior of an Activity as defined within PeopleSoft Enterprise Performance Management. A Primary Activity is an activity that is performed for the purpose of directly generating revenue within the course of business. A Secondary Activity is generally performed in direct support of a Primary Activity such as activities related to human resources or MIS.

Actual Base Hours

This defines the number of hours that an employee is expected to work within a given period under analysis within PeopleSoft Enterprise Performance Management. Hours worked in excess of Actual Base Hours are generally considered overtime, while hours worked less than Actual Base Hours would illustrate that the employee is working part-time.

Actual Contribution Percentage (ACP)

The amount of an employee's after-tax or employer matching contributions made in a Section 401(m) plan on behalf of highly compensated plan participants, divided by the employee's annual compensation, or an amount determined in the same manner with respect to non-highly compensated employees. The Base Benefits business process is set up to perform ACP nondiscrimination tests for Section 401(m) plans. See Nondiscrimination Tests and Highly Compensated Employee.

Actual Date

Calendar date in which a punch occurred (see Time Reporting).

Actual Deferral Percentage (ADP)

The amount of salary reduction contributions made by an employee to a Section 401(k) plan for a year, divided by the employee's total compensation for that year. The Base Benefits business process is set up to perform ADP nondiscrimination tests for Section 401(k) plans. See Nondiscrimination Tests and Highly Compensated Employee.

Actual Demand

In PeopleSoft Demand Planning, an **Array** of demand by historical period imported from an external system. The demand figures are determined by imported values and typically include shipments, orders booked, orders booked by requested ship date, or shipments.

Actual Rates

An Actual Rate is the rate that your business currently uses for its business practice.

Actuarial Assumptions

Any assumptions used to calculate an equivalent benefit for an optional form of payment or an alternative retirement date.

Actuarial Valuation

A comparison of a pension plan's assets and liabilities.

Actuarial Valuation Extract

A PeopleSoft Pension Administration data extract containing data that a plan actuary needs in order to determine the plan's assets and liabilities.

Adjusted

In the Enterprise Planning and Simulation forecasting process, in addition to versions of the statistical forecast, there is an adjusted version of the forecast. Managers create this version by reviewing the forecasts and entering adjustments that cannot be inferred statistically. For example, there may be a promotional campaign next quarter that is expected to boost volume for certain products over several weeks.

Adjusted Demand

In PeopleSoft Demand Planning, an **Array** of demand after adjustments have been made to the actual demand values. The adjusted figures may include both manual and system-generated changes, such as demand filtering and depromotion. The system uses adjusted demand rather than actual demand in the Forecasting Reset process and in the recalculation of model components during period-end processing.

Adjusted Forecast

In PeopleSoft Demand Planning, a **Statistical Forecast** that has been adjusted using management overrides, proration, or summarization.

Adjustment

See **Bill Adjustment** or **Inventory Adjustment**.

Adjustment Voucher

A PeopleSoft Payables voucher that enables you to apply an adjustment to an existing voucher or to relate one voucher to another.

Advice

The Form that employees who choose direct payroll deposit receive in lieu of a check.

Affiliate

A control person of a corporation. Generally, an officer, director, or major shareholder that has the ability to influence the corporate management decisions.

After-tax Deductions

Deductions that reduce net pay. These deductions are subtracted from gross pay after taxes have been taken out. Also called “post-tax” deductions.

Agency

Any Department or independent establishment of the Federal Government, including a government-owned or -controlled corporation, that has the authority to hire employees in the competitive, excepted, and senior executive services.

Aggregated

In Enterprise Planning and Simulation, each period the statistical forecast is calculated automatically by the system. A forecast for each individual product can be computed using history for that product. Then these forecasts can be aggregated (that is, summarized) into forecasts for the product family.

Aggregate Reporting

The ability to report time as a collection or mass. In Time and Labor aggregate time reporting features include the ability to report time in a lump sum, as a pattern, in a range of dates, or for an entire crew.

Aging Data

Updating data from separate sources, and separate dates, to a common date using an annualized factor.

Aging ID

A code representing rules for aging open items.

Alias

Any of several PeopleSoft Pension Administration utilities that look up or calculate employee information.

Allocated

In Enterprise Planning and Simulation, the computed forecast and the summarized forecast are two different versions of the statistical forecast. In addition, the forecast at the product family level can be allocated down to the individual products. Usually this allocation is done in proportion to the calculated product forecasts at that level. This version of the (statistical) forecast is called the allocated or prorated statistical forecast.

Allocated Inventory

The inventory assigned to a specific stock request.

Allocation Manager

Perform allocations using the Allocation Manager. Allocations enable you to distribute revenue, expense, and statistical quantities across business units, departments, and so on. You can allocate budget planning to detail levels so that you may perform detailed budgeting. The type of allocation you select determines the output.

Allocation Manager Rules

In the PeopleSoft Enterprise Warehouse, Allocation Manager rules allow you to specify the basis as well as the target tables for moving, aggregating, or multidimensionalizing your output. Rules use Allocation Manager methods to enrich the PeopleSoft Enterprise Warehouse data. *See* Allocation Manager Methods.

Allocation Manager Methods

There are several methods: Arithmetic Operation, Prorata, and Spread Even. Each method enables you to move and/or enrich output.

Allocations

A process of distributing budget amounts to and from other Budget Centers. Budget amounts are allocated to cover, or offset, the costs in one Budget Center by charging them to another Budget Center. An allocation is also the budget amount that is distributed to or from a Budget Center. A budget amount that is charged to another Budget Center appears as a negative amount. This same budget amount appears as a positive amount in the other Budget Center receiving the allocation. PeopleSoft Budgeting-specific.

Allotment

This is a voluntary deduction from pay. Employees may elect up to two allotments from pay, transmitted to a financial institution to the employee's checking or savings account.

ALM (Asset Liability Management)

See PeopleSoft Asset Liability Management.

Allowances

The amount owed to an employee in addition to base salary and which is not defined as part of gross salary. For example, vacation can be considered an allowance. PeopleSoft Budgeting-specific.

Alternate Account

A feature in PeopleSoft General Ledger that enables you to create a statutory chart of accounts and enter statutory account transactions at the detail transaction level as required for recording and reporting by some national governments.

Alternate BOM

Identifies the multiple ways in which an item can be produced. The primary production BOM is designated as BOM code 1. By using BOM codes, you can associate up to 98 other alternate BOMs with the item.

Alternate Routing

A routing, usually less preferred than the primary routing, but resulting in an identical item. You can specify up to 98 alternate routings for production routing types by entering additional Routing Codes (greater than 1) for the same routing type.

Alternative Minimum Tax (AMT)

AMT is calculated by adjusting the taxpayer's regular taxable income with a number of tax preference items and adjustments. Tax preference items are positive items increasing Alternative Minimum Taxable Income (AMTI) and are excluded from regular taxable income. Tax preference items include gain from the exercise of incentive stock options.

Amount Type

In PeopleSoft Workforce Analytics, the Amount Type specifies whether a benefits compensation amount is a value or expense, to the employee or the employer.

Analysis Base

Defined static, historical data used both to seed and compare against proposed budgets.

Analysis Template

A set of pre-defined reports that you can view and publish online. These templates access data in the Enterprise Warehouse tables, and organize it by function, role and industry. The templates allow you to pivot, sort, rank, drill and chart the data, for your analysis needs.

Analysis Type

A 3-character, user-definable identifier that enables you to label the different types of costs. For example, you might want to track budgeted costs (BUD), committed costs (COM), and actual costs (ACT).

Analytical Applications

See PeopleSoft Analytic Applications.

Analytic Forecasting

Analytic Forecasting is the part of the Planning and Simulation feature that creates forecasts for your business requirements.

Annual Amount

In PeopleSoft Workforce Analytics, Annual Amount is an employee-level compensation amount, totaling the calculations for a full fiscal year's worth of accounting periods, in a compensation scenario.

Annual Declaration Report

The French Annual Declaration report is a payroll report which checks establishment profiles to see whether an establishment has to produce the report, and then calculates the amount of all the social security contributions for this establishment.

Annual Leave

Annual leave is absence from work with pay and must be approved by the employee's supervisor in advance. This type of leave (Plan Type 51) is accrued based on years of service: Full-time Permanent/Full-time Seasonal employees ...0-3 years - 4 hours per biweekly pay period; 3-15 years - 6 hours per biweekly pay period (plus an additional 4 hours in the final pay period of the leave year); and 15+ years - 8 hours per biweekly pay period. Part-time Permanent/Part-time Seasonal employees...0-3 years - 1 hour for every 20 hours worked; 3-15 years - 1 hour for every 13 hours worked; 15+ years - 1 hour for every 10 hours worked.

Generally, there is a leave year ceiling of 240 hours on accrual; amounts accrued in excess of the ceiling and not used prior to leave year-end are forfeited.

Annual Shareholders Meeting

A meeting of corporation's directors, officers, and shareholders held for the purpose of communicating the operating and financial results for the prior year, the prospects for the future and major decisions of management.

Annual Workforce Survey by Nationality and Professional Category (Enquête sur l'activité et les conditions d'emploi de la main d'oeuvre)

In France, companies are required to submit the Annual Workforce Survey by Nationality and Professional Category to the Ministry of Labor. This report provides an analysis of the company's foreign workforce, which includes any employee who does not have French citizenship.

Annualized Tax Method

A payroll tax calculation method that divides the tax on an annualized amount by the number of pay periods in the year to find withholding for a given pay period, based on the number of withholding allowances. Annualized is the most common tax method.

Annuitant Amount

The gross monthly annuity a federally retired employee receives.

Annuitant CSA Number

A unique number assigned by OPM for a retired employee.

Annuitant Indicator

A code used to indicate the status of an annuitant appointed to a position in the Federal civilian service. Text for the codes is as follows:

1. Reemployed annuitant - Civil Service/FERS
2. Retired military officer receiving pay
3. Retired military non-officer (enlisted) receiving pay
4. Retired military officer receiving pay and a reemployed annuitant - Civil Service
5. Retired military non-officer (enlisted) receiving pay and a reemployed annuitant - Civil Service
6. Not applicable (none of the above)

Annuitant Indicator (cont)

- A. Reemployed Annuitant – FERS

- B. Former Annuitant - FERS
- C. Retired Officer/Reemployed Annuitant - FERS
- D. Retired Officer/Former Annuitant - FERS
- E. Retired Enlisted/Reemployed Annuitant - FERS
- F. Retired Enlisted/Former Annuitant - FERS

Annuity

A series of periodic payments made to an individual. Under a pension plan, these payments are generally made monthly.

Anti-Dilutive

Typically, options or shares where the price is greater than the current fair market value of the security.

APE (Activité Principale Exercée) Codes

APE codes classify the type of industry or activity your French company is in, such as software, banking or insurance. The APE codes are a normalized set of codes that are required by law and are used in regulatory reporting.

API

An Application Programming Interface (API) is the technology that a software product supplies so you can control it or communicate with it from another application. PeopleSoft APIs enable the user to perform desired actions upon PeopleSoft data without having to know the internal logic or rules of the program.

Applicant Hire Process

The procedure of hiring an applicant who has been tracked and administered in the Recruitment pages. Once you assign an Employee ID, the system uses recruitment data to populate the fields in the Personal Data pages.

Application agent

An application agent is an online agent that is loaded into memory with a PeopleSoft page. It detects when a business rule has been triggered and determines the appropriate action.

Application Designer

The integrated development environment used to develop PeopleSoft applications.

Application Engine

PeopleTools batch processes consisting of a set of defined SQL statements. Application Engine processes is more efficient than COBOL or SQR, since they operate within the database system, and don't rely on external processing.

Application Journal Template

A set of rules and default values to control the creation of journals from accounting entries.

Application Processor

The Application Processor is the PeopleTools runtime engine that controls processing of the application from the time the user requests a panel group from an application menu through the time that the database is updated and processing of the panel group is complete.

Application Server

The application server is the centerpiece of PeopleSoft's three-tier architecture. It utilizes Tuxedo, BEA Systems' transaction monitor, to manage client transactions and provide the business rules and workflow capabilities of PeopleSoft's enterprise applications.

Application Server Domain

The collection of server processes and associated resource managers defined by a single PSTUXCFG configuration file. Each application server domain is configured to connect to a single database. Multiple application server domains can exist on the same server machine.

Appointing Authority

The basis that authorized the appointing officer to effect personnel actions on an employee.

Appointing Officer

Denotes if the employee has appointment authority based on laws and regulations.

Approve Time

The Time and Labor feature that approves all employee daily time before it can be sent to payroll for processing. You can approve time by group or by individual employee. You can also unapprove previously approved time.

Approving Official

Individual with the delegated authority responsible for signing the action(s) taken on an employee.

Array

An ordered grouping of data by period and year. PeopleSoft Demand Planning uses arrays in forecasting demand.

Array

Element which enables you to extract information based on a column value. One way of thinking of an array is that it is a SQL statement that retrieves data from an existing table.

Array Dimension

Determines which inventory-stocking possibilities are included in a **Cube View**. This standard one-level dimension consists of the key fields that include, for example, order quantity, safety stock, and turn rate.

Arrears Balance

An amount owed to either the employer or employee, usually the result of a deduction not fully taken.

Ask Price

The price at which someone who owns a security offers to sell it; also known as the asked price.

Asset Budgeting

Budget for planned asset acquisitions and the associated depreciation expense that can be associated with a Capital Acquisition Plan (CAP).

Asset Catalog

A list of asset profiles which includes information about that asset type, including Cost, Life, Salvage Value, Depreciation Method, Currency Code, and Asset and Depreciation Account.

Asset Category

A standard group of assets. Typical asset categories include Furniture and Fixtures, Machinery and Equipment, Land, Buildings, Leasehold Improvements, and the like. These generally correspond to General Ledger asset accounts. Assets in one category usually share some depreciation characteristics, such as estimated service life and depreciation limits.

Asset Class

An asset group used for reporting purposes. It can be used in conjunction with Category to refine asset classification.

Asset Liability Management

See PeopleSoft Asset Liability Management.

Asset Life

The number of years an asset will depreciate, after which time it might be kept or sold for its Salvage Value. Also *see* Useful Life.

Asset Profile

A template that contains standard depreciation criteria for an asset type and its corresponding asset books. You can use the information in asset profiles as default values when adding assets.

Assignment of Life Insurance

Effective 10/3/94, Federal employees can assign their Basic, Option A and Option B insurance to another person(s), firm(s), or trust(s); Option C is excluded. The assignment of benefits transfers ownership of the FEGLI coverage to the assignee(s). The insured no longer has control over his/her insurance coverage and can no longer designate beneficiaries.

Assignment is irrevocable. Either all or none of the insurance can be assigned. Assignment does not have to be to the same person or firm. Assignments must be made in percentages of total insurance versus an assignment of Basic Insurance to one person and Option A to another. Additionally, terminally ill employees can assign their insurance to a Viatical Settlement Firm in exchange for cash (approx. 60% - 85% of the face value of the coverage). Life Expectancy is usually 24 months or less for a Viatical Settlement Agreement.

Assignment Type

This defines the behavior of the object, (resource, activity, or cost object) within PeopleSoft Activity-Based Management. If the object is identified as a source then costs may be allocated from that object to another object, which must be identified as a target. If an object ID is identified as a target it may be allocated costs from another object ID but may not allocate costs. An object ID can be both a source and a target, thereby having the functionality of each.

Associated Primary BOM

With multiple outputs, it's possible that a given co-product can be created in more than one way – in other words, an item is a co-product on more than one items' primary BOM. By assigning an associated primary BOM to a co-product, you are telling the system which BOM to use in exploding the co-product to the next level.

AT Section

In France, this stands for Section Accident du Travail, or Work Accident Section. It is information needed to identify the establishment risk code for insurance purposes.

ATP Reserved Order

An order that has been promised against future supply. The user has an obligation to the customer to fulfill the order quantity by a certain date. ATP-reserved orders are also referred to as *promised orders*.

Attendance

A component of time reporting application whose purpose is to apply business rules related to Benefit Entitlement and Administration and Organizational Administration to time reported as worked or not worked, and to satisfy a variety of reporting needs.

Attendance Reporting

A Time and Labor report that indicates an employee's attendance record. It includes sick leave, vacation time, and other leaves taken.

Attribute

An attribute is an element within a dimension. For example, the element "Store" is an attribute of the dimension "Geography" for the retail industry. An attribute is also a column heading on an analysis and reporting template.

Audit Trail

See Drill-Back Calculation.

Auditor

Person designated to review expense sheets and cash advances before payment.

Automatic Revision Incrementing (Auto Rev)

The ability to automatically set up revision control and generate revisions for revision-controlled items at the business unit level. This includes setting up a revision scheme or a predetermined, ordered list of revision names.

Automatic Spouse Benefit

A joint and survivor pension benefit provided without any actuarial reduction to a pension benefit. The automatic benefit is a n% joint and survivor; the employee is still entitled to choose any optional form of payment and any beneficiary for the remainder of the benefit.

Availability Date

The date a lot becomes acceptable for fulfillment in PeopleSoft Inventory or for consumption in PeopleSoft Production Management. (Availability Date = Creation Date + Availability Lead Time)

Average Daily Balancing

A feature in PeopleSoft General Ledger that enables you to target the ChartFields on which you base average balance calculations, summarize amounts for selected ChartField values according to your reporting requirements, and define the periods for these calculations.

Used by the financial analytic applications in Enterprise Performance Management. For a reporting period (usually monthly) this refers to the average daily balance of an account as opposed to the month-end-balance, which is the balance as of the last day of the month.

Average Daily Balance Ledger (ADB_Ledger)

In the PeopleSoft Enterprise Warehouse, the Average Daily Balance Ledger table (PF_ADB_LEDGER_F00) is similar to the functionality of the PF Ledger table (PF_LEDGER_F00), in that it too supports reporting. However, the Average Daily Balance

Ledger is used for average daily balances. It is a table that is used mostly for processes associated with the financial services industry.

Average Inventory

In PeopleSoft Inventory Planning, one half of the average lot size plus the safety stock when demand and lot sizes are expected to be relatively uniform over time. When demand and lot sizes are not uniform, the stock level versus time can be charted to determine the average.

Average Price

The average price derived from either the bid and ask prices (for bid/ask/average) or from the high and low prices (for high/low/average).

Average Static Calc Flag

In PeopleSoft Inventory Planning, a method used with static policies. The average method sets the static policy equal to the weighted-average, time-phased policy over the next argument periods.

Award

A special payment to an employee for certain prescribed kinds of activities or accomplishments.

B

Back Pay Interest

Under certain circumstances, an employee can be eligible to receive additional pay relative to a delayed receipt in salary caused by administrative error in processing a personnel action. The U.S. Office of Personnel Management has established guidelines for Federal agencies on when and how to make these calculations.

Background Process

Any task or process that is grouped with another and runs in the background. Background processes are usually scheduled to run on a regular basis. All background processes are executed through process-specific COBOL programs run outside the Windows environment.

Backlog Reason Code

An identifier indicating the reason an item could not be shipped. Example codes might include out of stock, discontinued, or seasonal.

BAD Forecast Ratio

In PeopleSoft Demand Planning, the maximum acceptable value of the ratio of the and the base component (Standard Deviation/Base Component). When this value is exceeded, the

system automatically resets forecast model parameters. The higher the value, the less likely it is that the system will reset the parameters. In most organizations, a BAD ratio of 1.00 or lower is appropriate for most items.

Balance Segmentation

Balance Segmentation is used in Funds Transfer Pricing to divide balances in deposit accounts between core (stable) and non-core (volatile) segments. Core funds represent the minimum balances that are retained on a long-term basis, building a relatively reliable source of funding to the bank. Non-core funds are temporary in nature due to their volatility caused by customer preferences for liquidity, and cannot be utilized on a long-term basis.

Balance Type

Balance Type is a lookup code used to define the type of instrument balances that will be stored in the PeopleSoft Enterprise Warehouse and processed by the analytic applications. Examples of different Balance are Current Balance, Average Daily Balance, Period Ending Balance, or Commitment Balance.

Balanced Scorecard

See PeopleSoft Balanced Scorecard.

BAM

Business Analysis Model. XXX I think this term is incorrect because we use BAM to refer to the application. If we were referring to the business analysis model, we would say BAM model (that is, Business Analysis Modeler model.)

BAM Model

The BAM database published from the template. The model contains both the data and analytic structure used in the application. The BAM database is physically separate from the Enterprise Warehouse database. Data is sent to the model through migration processes.

BAM Template

A file created using BAM design tools, representing the model prior to its creation as a database. This file has an extension of .MDL. This file is published to a BAM database once the model design process is complete. Each application using BAM will deliver templates which the customer will review and publish to a database in their environment.

Bank Identification Number (BIN)

In PeopleSoft Payables, a part of the bank information that identifies business unit banks.

Base Budget

The initial budget defined by the Budget Coordinator. The base budget is distributed as a starting point for Budget to review and edit. The base budget can be zero-based or incremental.

Base Compensation

In PeopleSoft Workforce Analytics, Cash Compensation that is typically categorized as fixed. It includes base pay and shift differentials as well as associated merit, equity, and step increases.

Base Currency

Base Currency is used to consolidate and report financial results of a multinational company. When a company transacts its business operations in different transaction currencies, those currencies are translated to the base currency for reporting purposes.

Base Currency Equivalent (BCE) Amount

If the monetary amount is in a currency other than the base currency, either the Extract-Transform-Load (ETL) process or the Multi Currency Engine can be used to convert the monetary amount to the Base Currency Equivalent (BCE) Amount.

Base Factor

In PeopleSoft Demand Planning, an element of a smoothing constant simulation set that controls base component smoothing in the Model Reset Simulation process.

Base Metric

Metric found on a fact table. A base metric usually contains an aggregate operator, for example “sum” or “count”.

Base Pay

A pay component included in the job comp (job compensation rate) calculation. It is pay for a regularly assigned workweek. For example, you can set up a regular hourly rate plus a shift rate, a union-negotiated rate for hazardous work, and so on.

Base Pay Structure

A PeopleSoft Workforce Rewards module you use to create or revise pay structures, and to assess the cost and impact of implementing new structures.

Base Time Zone

Customer defined time zone used for converting reported time to a common time zone for ease of applying rules (see Time Administration).

Batch

Batch systems are used when realtime updates are not needed. Batch-oriented data collection applications, developed in-house or by a third-party vendor, produce transactions that are collected in an ASCII text file. The text file is fed to a PeopleSoft SQR program that loads the transactions into the database.

Batch Processes

Any of the background programs in the client/server environment of PeopleSoft applications. Batch processes perform operations—such as pay confirmation, deduction calculation, and so forth—on groups of records, and are usually scheduled to run on a regular basis. You run these processes from the Process Scheduler, and they are executed through process-specific COBOL programs.

Before-Tax Deduction

Deduction that reduces net pay and FWT taxable gross, applied prior to the calculation of federal and state/provincial withholding taxes. Also called “pre-tax” deductions.

Begin Calc Date

The date on which PeopleSoft Asset Management begins to deduct from an asset's life.

Begin Depr Date

The date on which PeopleSoft Asset Management begins to calculate depreciation for an asset. Begin Depr Date is calculated using In-Service Date and Prorate convention.

Benchmark Job

In PeopleSoft Workforce Analytics, this refers to a Job Code for which there is corresponding salary survey data from published, third party sources. Jobs for which there is no corresponding salary survey data are referred to as non-benchmark jobs.

Benefit Commencement Date (BCD)

The date on which a pension payee elects to begin receiving payments.

Benefit Deduction

Any amount taken from an employee's pay check to offset all or part of the cost of the employee's benefits.

Benefit Eligibility

The PeopleSoft Pension Administration function that determines if an employee is eligible for retirement or ancillary benefits. A plan may have several retirement types—normal, early, late, death, and disability—each with its own eligibility criteria.

Benefit Entitlement

Any rules governing the circumstances under which employees are entitled to receive certain benefits. Typically, entitlement to benefits is based on type of employee (for example, full time, part time, occasional), length of employment, and specific rules which apply thereto, i. e., work group affiliation, and compensation base. Other criteria may also apply, such as reasons-for-claiming or job performance.

Benefit Formula

The formula that determines a participant's pension benefit in a defined benefit plan, as well as the PeopleSoft Pension Administration function that calculates the benefit.

Benefit Group

Part of a group of defaults assigned to job codes. Benefit group may include medical, dental, and health benefits dependent on individual company parameters.

Benefit Plan

A specific benefit within a plan type. For example, your company's life plan type might include benefit plans of one times salary, two times salary, and three times salary.

Benefit Plan Type

Any category of benefit, such as health, life, or savings.

Benefit Program

A set of benefits and deductions valid for an employee or group of employees. A single company may have any number of programs. An individual employee may belong to only one program; the deductions and benefits contained in that program are the only valid deductions and benefits for that employee.

Benefit Tables

Any of the tables that contain employee benefits information. These are often relevant to payroll processing.

Benefits Base

The salary used for benefit calculations. The benefits base will be either the employee Annual Rate or Annual Benefits Base Rate.

Benefits Compensation

In PeopleSoft Workforce Analytics, Benefits Compensation is value associated with employment benefits. It can include benefits types for Health and Welfare (Medical, Life Insurance), Retirement (annuities, savings plans, pensions), and Paid Time Off (Vacation Leave, Sick Leave). Benefits compensation is sometimes fixed, and sometimes variable, depending upon the benefit type.

Betriebszählung (Company Statistics Report)

Also called the OFIAMT report. This report provides statistics required by the Swiss Federal Department of Statistics (BFS).

Bias Signal Limit

In PeopleSoft Demand Planning, a number between one and six that indicates how many **Forecast Period** to test for bias. If the bias test is violated, the system records a **Tracking Signals** error in the period up to the number of periods determined by the bias signal limit.

Bias Test

In PeopleSoft Demand Planning, a forecasting test that sets the limit for tripping a **Tracking Signals**. The lower the value, the more likely it is that a tracking signal is set.

Bid Price

The price a prospective buyer is prepared to pay at a particular time for trading a unit of a given security.

BIF file

This is the bulk insert file (input.bif) used with the Verity search engine to specify the documents to be submitted to a collection (search index). It contains a unique key, document size (in bytes), field names and values, and document location in the file system.

Bilan Social Report

See Employee Survey Report.

Bill

In PeopleSoft Billing, any group of bill lines.

Bill Adjustment

The process of making credit or credit and rebill adjustments to an invoiced billing activity.

Bill By Identifier

The Bill By Identifier is used to define how billing activity is grouped when added to a bill through the billing interface or the Populate Billing process.

Bill Header

The record containing information that pertains to the bill as a whole. Each bill has a unique bill header that identifies it within the system.

Bill Inquiry Phone

Bill Inquiry Phone is the number printed on your invoices for your customers to call if they have any questions about their bill.

Bill Line

The basic unit of billing activity representing a billable charge, including the charge identifier, quantity, price, and any other information regarding an individual transaction. Every bill line is related to a bill header that may have one or more bill lines related to it.

Bill Search

A method of finding a bill or bill line when you don't have enough information to call up the bill directly. **Customer Bill Search** enables you to locate a bill by Customer Name. You can also choose other parameters to limit your search. With **Bill Line Search** you first search for a particular bill and then a line on that bill. Parameters for bill line search include Reference, Date, and Amount.

Bill Source

The point where billing activity originates. Bill sources may be external to the system (imported through the billing interface) or entered directly online. Examples of bill sources include order management, project costing, and contract administration.

Bill To Customer

A customer who receives an invoice.

Bill Type

A category of billing activity variety. Examples of Bill Types include standard and custom order activities.

Bill Update

The process that adjusts bills that have either been entered manually or generated within the system.

Billable Indicator

A status flag that identifies an item as eligible for billing to a customer.

Billback Discount (BB)

A per unit discount which typically requires a customer to perform one or more merchandising activities to receive the discount. A BB discount is not deducted from the customer invoice, but once the customer performs the merchandising activity, a sales representative or broker can approve payment for the discount amount. Billback discounts can originate from a National Allowance or Customer Promotion, and are passed to PeopleSoft Order Management for informational purposes only. Billback discounts are recognized as a liability when the product is shipped.

Billing Location

A number identifying a customer address. Each customer may have multiple locations, but must have one *Primary Location* at which you contact them.

Blackout Period

The period of time, determined by the company, which prohibits certain activity in the company stock. Blackout Periods can affect the trading of some key individuals or can be placed on the entire company.

Bonus Tax Method

Annualizes your year-to-date earnings by multiplying them by the number of pay periods in the year. This method is used for Canadian tax processing.

Book

In PeopleSoft Asset Management, a data location storing financial information—like cost, depreciation attributes, and retirement information—on assets.

Borrow/Loan

The temporary reassignment of an employee to other task reporting or compensation requirements to allow the business to meet unexpected, short-term, fluctuations in staffing or work load. Typically, this kind of reassignment is done informally at a local level, where HR isn't involved and a new job record isn't created. Companies may have specific rules about how long an employee may be borrowed/loaned, how and where productive, non-productive, and compensated absence time will be charged, and what business rules to apply to the borrowed employee's time for the purpose of compensation and benefit entitlement and administration. See also Casual work Assignment.

Bracket

Brackets are a way to look up and retrieve database table values. After you've defined a table, the system finds a corresponding row on that table and returns the value of the bracket. The result is then available for use in other items such as formulas.

Branch

A tree node that rolls up to nodes above it in the hierarchy, as defined in the Tree Manager.

Branch Of Military Service

Identifies, if any, military service in which the employee served.

Breadcrumbs

Breadcrumbs show the navigation path to the current web page location. As you drill down through the different levels of the registry, a "breadcumb trail" appears that shows the path you've selected. Each registry level is separated by an angled brace (>), and you can select any level to navigate directly back to that level.

A typical Breadcrumb would look like this:

Home > HR > Administer Workforce > Benefits

Break Funding

Charges assessed for mortgages that are paid off before maturity. In the Funds Transfer Pricing (FTP) application, Break Funding charges are factored into the transfer price for a loan that may be prepaid.

Break in Service

A period of time for which an employee does not meet stated service requirements.

Break Price

The price used to determine which options are eligible for repricing. For example, if the break price is \$36, then all outstanding option with a grant price of \$36 and greater are eligible for repricing.

Break Punch

An in/out punch of when a time reporter takes a break.

Brokers

Individuals or organizations who buy and sell securities. Often they are account executives who work for firms registered with the Stock Exchanges and the SEC. Unlike Transfer Agents, (who are not responsible for sales) Brokers do not maintain records on all your company's certificates. They maintain only sales records and stocks for their clients.

Browse

To reach content by selecting it via category discovery, as with the Browse Content Categorization feature, rather than navigating via a fixed menu path.

BSC (Balanced Scorecard)

See PeopleSoft Balanced Scorecard.

Budget Activity

A type of activity performed using PeopleSoft Budget Planning. Budget activities include Line Item Budgeting, Line Item Mass Adjustments, Budget Allocations, and Position Budgeting. PeopleSoft Budget Planning-specific.

Budget Amount Ledger

Stores budget amounts and is updated by posting budget entries, transfers, and adjustments.

Budget Analyst

A role within PeopleSoft Budgeting. Budget Analysts are typically people within an organization responsible for reviewing and analyzing a prepared budget before submitting it to the Budget Coordinator. PeopleSoft Budgeting-specific.

Budgetary Account Only

An account used by the system only and not by users; this type of account will not accept transactions. You can only budget with this account. Formerly called “system-maintained account.”

Budget Category

A set of related expenses that are accumulated for proposal budgets and reporting to a sponsor. The estimated cost for a set or class of accounts.

Budget Category

Numeric/alpha identification given to each category of positions.

Budget Center

In PeopleSoft Budgets, any entity responsible for producing or reviewing budget data. For example, a Budget Center might be the individual departments responsible for producing budgets.

Budget Center Dimension

In PeopleSoft Budgets, the dimension by which you distribute budget data. If you budget by department, your department dimension will be your Budget Center Dimension. You'll assign Budgets Users to the nodes and detail values on the tree you use to build your Budgets Center Dimension.

Budget Check

In commitment control, the processing of source transactions against control budget ledgers, to see if they pass, fail, or pass with a warning.

Budget Check Override

Selective suspension of Budget Processing. With this feature you can override the controlled budget for a transaction that failed budget checking due to insufficient funds; or override the tolerance limits for a transaction rejected due to exceeded tolerance limits. When you push the Override button, the system flags the transaction to allow the Budget Processor to process successfully regardless of available funding. You can cancel the override any time before the Budget Processor is run by clicking the Cancel Override button.

Budget Control

In commitment control, it ensures that commitments and expenditures don't exceed budgets. It enables you to track transactions against corresponding budgets and abort a document's cycle if the defined budget conditions are not met. For example, you can prevent a purchase order from being dispatched to a vendor if there are insufficient funds in the related budget to support it.

Budget Coordinator

A role within PeopleSoft Budgeting. Budget coordinators are responsible for monitoring the budget process. The Budget Coordinator is typically located within an organization's central budget office and builds the budgeting model. PeopleSoft Budgeting-specific.

Budget Detail

A level of itemization that when combined makes up a major budget category.

Budgeted Rates

In PeopleSoft Activity-Based Management, the rate your organization uses based on the budget.

Budget Error Exception

A transaction that fails budget checking, causing an Error or Warning to be issued. See **Error Exception** and **Warning Exception**.

Budgeting Functions

PeopleSoft Budgeting's six main action categories, including: system administration, budgeting setup, budgeting preparation, budgeting analysis, data integration and my profile. Your user role determines how many of these functions display and are available.

Budgeting Model

The framework for an organization's budget development process. Business unit defines a Budgeting Model. The Budget Coordinator typically defines the model and includes the time period of a budget cycle, time period for phases within a budget cycle, the sources of data that will be available to budget users, the methods that will apply to line-item budgets, and other budget options and control parameters. PeopleSoft Budgeting-specific.

Budgeting Type

Associated with the budget ledger type set definition, a budget type is an indication of whether the organization uses a standard budget ledger, project budget ledger, or controlled budget ledger for budgeting.

Budget Justification

Written explanation further defining the what and why of a budget category.

Budget Period

The period in which you define plans to meet your organizations training requirements.

The interval of time (such as 12 months or 4 quarters) into which a period is divided for budgetary, and reporting purposes. The ChartField allows maximum flexibility to define operational accounting time periods without restriction to only one calendar.

Budget Phase

In PeopleSoft Budgets, a span of time during which a budget or portion of a budget is to be completed. You'll filter dimensions, assign alternate Budgets Users, enable Position and Asset budgeting, and specify Budgets User notification options at the Phase level.

Budget Plan

In PeopleSoft Workforce Rewards, when working with a Compensation Planning BAM model. A budget plan is a rollup of like compensation rules. For example, for base pay rules budget plans are a rollup of values for like Action Reasons. For variable pay rules budget plans are a rollup of the values for like Variable Compensation Plan IDs.

Budget Preparer

A role within PeopleSoft Budgeting. Budget preparers are typically people within an organization responsible for developing the detailed budget for a Budget Center and submitting it to a Budget Reviewer or Analyst for review and approval. PeopleSoft Budgeting-specific.

Budget Reviewer

A role within PeopleSoft Budgeting. Budget reviewers are typically people within an organization responsible for reviewing and approving a prepared budget submitted by a Budget Preparer. PeopleSoft Budgeting-specific.

Budget Seeding

Represents a new budget or forecast, such as historical data that is manipulated to develop a more current representation for a proposed budget. Uses detail data as the budget seed or basis to create the base budget that represent the level of detail in which budget numbers are prepared.

Budget Translation Trees

Trees translate (summarize) source transactions into the appropriate levels for processing against control budgets. This is because you usually budget above the level of your source transaction ChartFields on a tree.

Budget Type

Indicates whether a budget is for expenditures or revenues.

Budget Warning

See **Warning Exception**.

Budgets User

In PeopleSoft Budgets, any user who needs to gain access to the Budgets. You'll designate Budgets Users on the Budgets Users page through the Coordinate Budgets window. You'll also assign these users to the tree representing your Budget Center Dimension.

Budget View

A user-defined view where selected dimensions, columns and rows of data determine the layout of line-item budgets affecting the view or entry of data.

Budget Year

The institutionally defined, consecutive, 12-month period to which a financial transaction or summary applies.

Build Option

A detailed PeopleSoft Planning model that specifies a method of building an assembly item. This model specifies the routing, resources, and materials that are necessary to produce the item.

Built-in function

Prior to PeopleTools 8.0, there were only built-in functions, like FetchValue, ScrollSelect, etc. A built-in function, in your code, is on a line by itself, and doesn't (generally) have any dependencies. You don't have to instantiate anything before you can use a built-in.

Business Interlink Definition

A definition encapsulating an external Transaction or Query and providing a set of generically typed input/outputs that can be assigned to PeopleCode variable or Record Fields at runtime. A Business Interlink Definition is added to the Application Designer's objects at the same level as Fields, Records, Panels, etc.

Business Interlink Design-Time Plug-in

An XML file that, when coded for an external system, encapsulate that external system and provide a catalog of Transactions, Classes and Criteria specific and meaningful to that external system.

Business Interlink Framework

The framework for integrating any external system with PeopleTools application objects. It is composed of the following components:

1) An External System, 2) Generic definitions for a Transaction/Query command interfaces, 4) Business Interlink Definitions, 4) Business Interlink Plug-in.

Business Interlink Object

An instantiation based on a Business Interlink Definition. Actual data can be added to the inputs of the Business Interlink Objects once the appropriate bindings are provided. The Business Interlink Object can be executed to perform the external service. Once a Business Interlink Object is executed, the user of that object can retrieve the outputs of the external service. The Business Interlink Objects use buffers to receive input and send output. When a Business Interlink Object is executed, the transaction/query/class associated to the Business Interlink Object will be executed once per each row of the input buffers corresponding to the

input Records. If there is only one row, after appropriate substitution by the driver, it is executed only once.

Business Interlink Runtime Plug-in

A set of C++, Visual Basic, or other high-level language methods that, when coded for an external system, encapsulate that external system and provide the execution methods to match the Business Interlink Design-Time Plug-in. (The catalog of Transactions, Classes and Criteria provided by the Design-Time Plug-in can also be provided by the Runtime Plug-in.)

Business Objects

A way of identifying those mass changes that have been designed to be referenced by a flexible formula and provide them with a shorter name to simplify the creation of flexible formulas.

Business Planning

The type of planning that focuses on elimination activities that are not needed by changing the drivers.

Business Rules

Rules that can process information differently depending on the values of data in the PeopleSoft Enterprise Warehouse.

Business Unit

A corporation or a subset of a corporation that is independent with regard to one or more operational or accounting functions. PeopleSoft General Ledger business units typically comprise individual entities for accounting purposes.

Business units in PeopleSoft Projects represent operational structures but not necessarily independent financial units.

PeopleSoft Payables business units are either *Vouching* (have payables accrued to them) or *Charge to* (have voucher expense distributions charged to them), and pass journals to general ledger units.

PeopleSoft Purchasing business units share vendor, purchase order, and receiving information with PeopleSoft Payables units in the same SetID.

A PeopleSoft Inventory business unit is a storage facility that maintains its own replenishment and costing methods, as well as its own definitions and guidelines.

The Manufacturing business unit must be identical to the Inventory business unit in order to link the manufacturing and inventory processes.

The Order Management business unit controls certain order processing parameters (tax and freight calculation methods, base currency, credit card hold options, and so on) for its associated PeopleSoft eStore and Mobile Order Management merchant variants.

Business Unit Audit List

One or more business units specifically targeted for expense report and cash advance audits.

Buying Agreement

You can structure flexible and easy-to-use buying agreements for customers or groups of customers. You can set up maximum amounts and specify the minimum dollar value per order placed against it. You can automatically generate sales orders or create sales orders online from buying agreements. Rebate and penalty calculations can be implemented for buying agreements.

C***Cafeteria-Style Benefits***

Any programs offering several benefit plans from which participants make elections. Cafeteria-style benefits may or may not include flexible credits.

Calculation

In PeopleSoft Pension Administration, the determination of a participant's pension benefit.

Calculation Rule

Criteria for calculating benefits, including as-of dates for age, service, premium, and coverage calculations; rounding rules; and minimum and maximum coverage amounts. Any number of program and plan combinations can use a single set of calculation rules.

Calculation Rule [Global Payroll]

Any rule you develop using combinations of elements to command the system to perform a type of calculation.

Calendar

In PeopleSoft Manufacturing, a list defining the days your enterprise is available and the hours of operation for each day. The system first looks to see whether you are using a work center specific calendar. If none is defined, it looks at the production calendar. If no production calendar is defined, planning and scheduling functions base start and due dates on a five-day workweek.

In PeopleSoft Demand Planning and Inventory Planning, a list defining the start and end dates for each time-phased period. It also contains daily weights for distributing raw data into different period buckets.

In PeopleSoft General Ledger, your accounting calendar defines the time periods to which you post transactions for different ledger group and business unit combinations. You can have multiple calendars, so you can keep a calendar for actuals, another for budget and forecast activity, and still others for special reporting or transitional needs.

Calendar Group ID

Allows you to group together multiple Calendars that you want to run together at the same time. It also controls the order in which the Calendars are processed. You can only group calendars together that are for the same country (based on pay entity country).

Calendar Scope

A time period type (Day-Factored, Month-Factored, or Week-Factored) for use in building your time period calendar.

Canada Academic Teaching Surveys

Statistics Canada requires that all Canadian universities (all degree granting institutions) produce full-time and part-time *Canada Academic Teaching Surveys*. These reports are a legislative requirement. PeopleSoft HRMS 8 provides you with the functionality to code HRMS information using Statistics Canada codes and create both the full-time and part-time Academic Teaching Surveys.

Canadian Industrial Sector

The Canadian industrial classification code with which employees are associated for Canadian employment equity reporting purposes.

Canadian National Occupational Classification (NOC) Codes

NOC codes are occupational classification codes for Canadian companies provided by the government.

Canadian Standard Occupational Classification (SOC) Codes

SOC codes are occupational classification codes for Canadian companies provided by the government.

Cancellation

In the context of an employee stock plan, a transaction (usually triggered by a specific event, such as a termination of employment) in which outstanding securities are declared void and inactive and returned to the pool of securities reserved for issuance under the plan or retired.

Candidate Keys

In PeopleSoft Demand Planning, elements of data that can be used to construct the **Forecast Item** key field at different levels of the forecast.

Capacity Rate

A rate you assign to a capacity cost object. This enables you to track and report on excess capacity.

Capacity Fence

A time fence that indicates that date and time after which PeopleSoft Enterprise Planning or Production Planning solvers ignore capacity violations. The solvers do not use this date in processing capacity violations.

Capacity Multipliers

A multiple used in PeopleSoft Enterprise Planning and Production Planning to determine the available capacity on a resource. Since a capacity multiplier is effective-dated, you can use it to vary the resource's available capacity over time.

Capital Acquisition Plan (CAP)

A method of projecting and tracking capital expenditures for a project. Budgeted assets and actual expenditures can be associated with a CAP Plan so the owner can track planned against actual costs.

Capital Gain

The difference between an asset's purchase price and selling price, when the difference is positive. Capital gains can be either short-term (where the capital asset was held for 12 months or less) or long-term (where the capital asset was held for 12 months or more).

Capital Gains Tax

A tax on profits from appreciation in owned real property, recognized at the time the property is sold; real property includes owned company shares.

Capitalization

The total types and amount of the outstanding securities that have been issued by a corporation. Generally includes both equity and debt securities.

Capital Markets Instrument

In the financial services industry, Capital Market Instruments are assorted financial instruments issued by organizations to raise capital for funding operations. Participants are made up of interested parties that choose to supply or acquire the capital funding through such vehicles. Derivatives, debt instruments, equities and foreign exchange instruments that are traded in highly liquid markets represent the instruments. In the PeopleSoft financial analytic applications, Capital Market securities refer to instruments that are bought/sold by the institution for its own investment account. The capital markets set the product prices and interest rates.

CAP Sequence Number

The number that distinguishes a small project belonging to a CAP plan. Budgeted assets can be associated with an overall CAP Plan and a CAP Sequence, if that level of detailed tracking is desired.

Carry-Forward

Residual contributions that remain in a stock purchase participant's account after the purchase of shares that are used toward future purchases.

Carrying Cost

In PeopleSoft Inventory Planning, a value that shows the cost associated with holding a dollar of inventory for one year. The value is presented as a percentage.

Case Officer

In Germany employees in your company are designated as Case Officers, and have responsibilities for handling health and safety incidents.

Cash Balance Accounts

The PeopleSoft Pension Administration function that tracks the activity in an employee's hypothetical account under a cash balance plan.

Cash Balance Plan

A defined benefit plan designed to look like a defined contributory plan. The plan periodically credits a percentage of pay to each employee's hypothetical account.

Cash Compensation

In PeopleSoft Workforce Analytics, Cash Compensation is a component of direct compensation. Cash Compensation consists of direct cash payments made to an employee for base compensation and short-term variable compensation.

Cash Exercise

At the time of exercise, the optionee is required to pay in cash the total option price plus any withholding taxes due to the company.

Cash Flow Generator

This is a support module for the PeopleSoft financial services analytic applications. It generates actual and projected cash flows for financial instruments by using output from the other support modules, such as loan prepayment rates, deposit runoff rates, product pricing indices, discount rates, and product definitions (such as start and end dates, balance amount, interest rate, term, payment dates, repricing and compounding frequency, and accrual basis) to generate the cash flows. The Financial Performance Measures module accesses the cash flow results to calculate the required financial measures.

Casual Preparer

An additional user role at the lowest level of budget preparation for a budget center. This user performs the same activities as the Budget Preparer role when access is granted. The system does not, however, enable the Casual Preparer role to define their own private views for line-item budgeting.

Casual Work Assignment

The temporary assignment of an employee to a work position or location to meet the needs of the business. Typically, there is no Human Resource activity to support the work assignment (that is, a new Job record is NOT created). Often compensation rules that accrue to the temporary assignment override the compensation rules that apply to the employee's normal work assignment. See also Borrow/Loan.

Catalog

The list of transactions, classes, and queries used to interface to the external system. Integration users are presented with this list when they pick the type of Business Interlink Plug-in they are going to use. There are four types of catalogs: transaction, class, operator, and configuration parameter.

Catalog

A way of organizing your training courses into classifications for increased flexibility. Catalogs consist of categories and subcategories.

Category

Categories are the primary level of a two-tier structure of training courses. Categories can consist of subcategories that provide further course definition.

CBM

See PeopleSoft Customer Behavior Modeling.

Census Metropolitan Area (CMA) Code

In Canada this code is prescribed by the government and refers to the area of an urbanized core with a population of at least 100,000.

Central Personnel Data File (CPDF)

Two types of reporting made by agencies to the OPM include the Dynamic and Status files (quarterly and monthly, respectively) covering a range of employee personnel/payroll data.

Certain and Continuous Payment Option

A form of pension payment where the benefit is paid out for the lifetime of the participant with a specified number of payments guaranteed so that a beneficiary will receive payments until the end of the guarantee period if the employee dies before the guaranteed payments are complete. For example, under a ten-year certain and continuous payment option, a retiree who lives less than ten years receives payments until death, then the retiree's beneficiary continues to receive payments for the remainder of the ten year period. A retiree who lives longer than ten years continues receiving payments after the ten year period until death. Also known as a "Term Certain and Continuous" payment option.

Certain Only Payment Option

A form of pension payment where the benefit is paid out entirely over a specified period of time—usually five, ten, or fifteen years—with no ongoing payments after the specified period. If the retiree dies before payment period is over, the remaining payments are made to a beneficiary. Also known as a "Term Certain" payment option.

Change To Lower Grade

- For positions under the General Schedule or under the same wage grade schedule, a change-to-lower grade changes the employee to a lower grade; and
- When both the old and new positions are under the same type ungraded wage schedule, or in different pay-method categories, a change-to-lower grade changes the employee to a position with a lower rate of basic pay.

ChartField

A field storing a chart of accounts, resources, and so on, depending on the PeopleSoft application. ChartField values represent individual account numbers, department codes, and so forth.

ChartField Balancing

PeopleSoft enables you to set up ChartFields and indicate that you want specific ChartFields to match (balance) on the debit and the credit side of a transaction. When you work with Controlled Budgets, the Fund and Budget Period are already set up in the system to balance (match). For example, suppose you want to balance by Class and Program. You indicate that these on a panel that these ChartFields are required, along with Fund and Budget Period which should already be selected. When you enter a transaction, you must enter the same Class, Program, Fund, and Budget Period ChartFields on both sides of the accounting entry. but you can modify any ChartFields, other than these four, on the user-defined line. The system always requires that total debits equal credits.

ChartField Combination Edit

Also called *Combo Edit*. The process of editing journal lines for valid ChartField combinations based on user-defined rules.

ChartKey

One or more fields that uniquely identify each row in a table. Some tables contain only one field as the key, while others require a combination.

ChartViews

Charts of data in the model, presented through the Worksheet which retains the ability to drag dimensions on the chart as desired.

Check In/ Check Out

The process of retrieving planning activities from the BAM database (check out) and posting changes and results back into the database (check in).

Child

A node or detail on a tree linked to another, higher-level node (referred to as the parent). Child nodes—projects, customers, and so on—can be rolled up into the parent. A node can be a child and a parent at the same time depending on its location within the tree.

Child

A node or detail of a tree linked to another, higher-level node referred to as the parent. Child nodes can be rolled up into their parent. A node can be a child and a parent at the same time depending on its location within the tree.

Chunking

Chunking is a PeopleSoft Enterprise Warehouse mechanism that makes voluminous processing easier through the use of multiple small parallel processes. By enabling chunking, multiple jobs are spawned from one Jobstream. These jobs run in parallel (behind the scenes) to process data efficiently.

Citizenship Code

Numeric indicator as to whether the employee is a U.S. citizen or a foreign national serving in the U.S. The codes are:

- citizen
- other

Civil Service Retirement System (CSRS)

A retirement plan available to employees of the federal government. CSRS covers all employees appointed to a position in the federal government before January 1, 1984. Coverage includes a basic annuity plan with employee contributions and the Medicare Hospital Insurance component (1.45%) of the Social Security tax.

Class catalog

Lists classes used to interface to an external system. A class contains data members of basic types and/or objects that are typed after another class. A Class can also contain lists of basic types or objects.

Class ChartField

A ChartField value that identifies a unique appropriation budget key when you combine it with a Fund, DeptID, and Program Code as well as a Budget Period. Formerly called “sub-classification.”

Clock Hour Reporting

Method of reporting time by recording actual times in and out (start and stop) (see Time Reporting).

Clone

To create a unique copy of an object. When used in PeopleCode, clone will always mean to make a unique copy. Copy, on the other hand, may or may not mean making a unique copy. Copy may mean making a new reference to an object, so if the underlying object is changed, both the copy and the original change.

Cloning

The process that enables you to copy run controls to create employee schedules from existing Run Control ID's that have already been executed and saved.

Close Date

The date in which time entry is no longer allowed for a given pay period. Defined as an offset number of days to the pay period end date.

Close Price

The price of the final trade for a security at the end of the trading day.

Closure Calendar

A calendar that establishes closure dates for shipping, receiving, and materials management operations for a specific **Business Unit**. Typically, application processes account for these closure dates when determining Lead Time and dates for anticipated fulfillment processing dates (scheduled shipment dates, scheduled arrival dates, and lot retest dates, for example).

CMA (Census Metropolitan Area) Code

In PeopleSoft Workforce Analytics, the CMA code is prescribed by Statistics Canada, and refers to the main labor market area of an urbanized core with a population of at least 100,000.

COBRA (Consolidated Omnibus Budget Reconciliation Act)

In PeopleSoft Workforce Analytics, this refers to legislation that requires employers to offer continued health care coverage to employees, and their dependents, who lose benefits coverage under certain defined conditions such as voluntary termination, divorce, becoming an overage dependent, or retirement. Any individual, whether employee or dependent, that is covered under a health plan at the time of a qualifying event, has the option to elect COBRA coverage.

Codepage

One character set.

Collection

To make a set of documents available for searching in Verity, you must first create one or more collections. A collection is set of directories and files that allow search application users to use the Verity search engine to quickly find and display source documents matching various search criteria. A collection is a set of statistics and pointers to the source documents, stored in a proprietary format on a file server. Since a collection can only store information for a single locale, PeopleSoft maintains a set of collocations (one per language code) for each search index object.

Combined Federal Campaign (CFC)

A vehicle used by federal employees to contribute to a charity or charities of their choice.

Commercial-Off-The-Shelf (COTS)

Equipment or software that is currently sold commercially to at least one customer.

Commission Tax Method

A payroll tax calculation method that adds year-to-date earnings to earnings for this pay period and finds the annualized gross by multiplying by the number of pay periods in the year; the gross is then divided by the number of tax periods specified on the paysheet. This method is used for Canadian processing only.

Commitment Control

Commitment control includes budget control and commitment accounting functionality.

Common Shares Issued and Outstanding

Represents the residual ownership interests in the corporation. This is the composite number of shares available and tradable on the open market.

Community Background

In the United Kingdom Community Background refers to the religious category, such as Catholic or Protestant, of employees, job applicants or appointees. See the Northern Ireland Report for more information.

Compa-Ratio

In PeopleSoft Workforce Analytics, Compa-Ratio is most commonly defined as the relationship between current pay and the midpoint calculated as: $(\text{Incumbent Pay}/\text{Midpoint}) * 100$. Usually expressed in whole numbers, or in percentage form by dropping the multiplication operation. Much less common is the use of a compa-ratio calculation as: $\text{range midpoint}/\text{market rate}$.

Compensation Frequency

In PeopleSoft Workforce Analytics, this is the frequency at which a job is paid. This is the value you use for reporting or quoting pay. Examples include Annually, Monthly and Weekly.

Compensation Planning

In PeopleSoft Workforce Analytics, this is the process through which employee compensation plans are defined, and compensation budgets are allocated throughout an organization. Major components of compensation planning include designing pay structures, setting individual pay levels, and budgeting and forecasting compensation spending.

Compensation Rate

In PeopleSoft Workforce Analytics, this is the compensation rate for a job. This is the rate the company uses for quoting and reporting pay.

Comp time (compensatory time)

A PeopleSoft Time and Labor-managed employee benefit where time off is granted in exchange for time worked based on customer-defined criteria; is associated with an expiration and is used as reported time (see Attendance).

Compensation

The process by which a worker is remunerated for services rendered to, or work performed on behalf of a business entity.

Compensation Package

All of the base and non-base components on a job row.

Compensation Rules

Business methodology or logical process that is applied to reported time in order to determine payable time (see Time Administration).

Competency

In PeopleSoft Workforce Analytics, Competency is a knowledge, ability, skill, accomplishment, or National Vocational Qualification (NVQ).

Competency Inventory

All of the roles, tasks, competencies and accomplishments possessed by the workers in the current workforce. This data is migrated from internal source systems into the data warehouse tables of the PeopleSoft Enterprise Warehouse.

Competency Strategy

The type and number of roles, tasks, competencies and accomplishments essential to accomplishing a business scenario based on your strategic business goals.

Competitive Appointment

An appointment to a position in the competitive service following open competitive examination or under direct-hire authority. The competitive examination, that is open to all applicants, may consist of a written test, an evaluation of an applicant's education and experience, and/or an evaluation of other attributes necessary for successful performance in the position to be filled.

Competitive Service

All positions as defined by 5 USC 2102 in the executive branch of the Federal Government are in the competitive service unless they are specifically excluded from it. Positions in the legislative and judicial branches are outside of the competitive service unless they are specifically included.

Compress

The act of placing a Planning task as early as possible in the schedule without violating any constraints.

Compressed Split

In PeopleSoft Demand Planning, an optional function that allows a split database to be compressed so it can be transferred to an account manager's computer.

Concurrent Offerings

Multiple stock purchase offerings that are active and outstanding at the same time. The end date is measured from the employee's grant date.

Concurrent Processing

The situation in which you run multiple batch processes at a time. In PeopleSoft Benefits Administration, for example, simultaneous open enrollment and event maintenance qualifies as concurrent processing.

Configuration Code

A unique 50-character identification code that accurately tracks and costs inventory with the PeopleSoft Product Configurator. It corresponds to a lot number for a non-configured item.

Configuration Costing

The overall process of reviewing and evaluating anticipated cost data for a configured item.

Configuration parameter catalog

Used to configure an external system with PeopleSoft. For example, it might set up configuration and communication parameters for an external server.

Consolidate Assets

In PeopleSoft Asset Management, the process of consolidating multiple load lines, usually coming from a separate application, into one asset.

Consolidate Depreciation

In PeopleSoft Asset Management, the process of summing all open Add and Adj transactions by transaction type, **Transaction Date**, and accounting date for all composite members reporting to one composite asset.

Consolidated Bill

A grouping of bills gathered together for invoice presentation. The bills belonging to a consolidated bill are invoiced and printed together, with a page summarizing the bills as a group.

Consolidations

The PeopleSoft Pension Administration functions that accumulate hours, earnings, and pension contributions based on payroll data.

Consolidations-Elimination Set

A related group of intercompany accounts that is processed during consolidations. Once eliminated, this group of accounts should normally net to zero.

Constraint

A limit to a schedule, that, when violated, must be repaired to produce a valid schedule. User-configurable Planning constraints include Missed Request Dates, Missed Promise Dates, BI Shortages, RM Shortages, Capacity Overloads, Missed Inventory Targets, Changeovers, and Excess Inventory. See also **Temporal Constraint**.

Constraints

In the PeopleSoft Enterprise Warehouse, a constraint can consist of one or more filters and is used to define complex business logic. Constraints are based on DataMaps.

Consumption Pattern

In PeopleSoft Activity-Based Management, an attribute used to describe how an activity interacts with the cost objects to which it has been assigned. A unit type activity can expect to be performed on a regular basis so that each time a product is produced. A batch type activity may only be performed periodically for a given range of transactions. For example, each time a machine is setup to produce another product type. Sustaining type activities generally occur to support the overall operation of a company unrelated to products produced or customers served.

Content Management

Content Management is often used as an umbrella term describing all functions relating to the creation, aggregation, classification, distribution, and consumption of content. More specifically, content management means to manage the content creation process via version check ins and check outs, culminating with an approved version achieved through workflow to the appropriate reviewers.

Content Registry

See Portal Registry.

Content Reference

Content references are pointers to some kind of content registered in the portal registry. These are typically either URLs or iScripts. Content references fall into three broad categories: target content, templates, and template pagelets.

Context Manager

The context manager provides the infrastructure to dynamically relate and display template pagelets with menu items that have a Dynamic Content template applied. Using the context manager, you can relate various types of content, such as links to email contacts and related articles, all on one page, for any business content.

Contextual reference

PeopleCode refers to a row or buffer field determined by the current context; that is, the context in which the PeopleCode program is currently executing.

Contingent Beneficiary

In PeopleSoft Pension Administration, any non-spouse pension beneficiary, including a child, other relative, or a trust. Spousal consent is required in order for an employee to name a contingent beneficiary.

Contracting Officer (CO)

Individual who has the authority and the official responsibility to produce a sound acquisition document.

Contracting Officer's Technical Representative (COTR)

Individual responsible for monitoring a contract and its associated tasks and deliverables.

Contractor

Any individual or non-employee reporting time that will not be paid through the payroll system.

Contribution

Represents money a stock purchase participant elects to contribute to the plan. Contributions are deducted from the participant's paycheck and used to purchase stock pursuant to the offering and purchase period they are enrolled.

Contributory Plan

A Pension plan to which employees contribute. Contributions are typically a percentage of pay deducted from the employees' paychecks.

Control Budget

Commitment control enables you to establish budgets that provide extensive, active budgetary controls over transactions, rather than just passively recording transactions.

Control ChartField

A control ChartField is a key ChartField that you designate to be the control field. Designating a ChartField as the control allows you to set attributes for a specific value of the ChartField that are different from the attributes specified for the budget type in general. For example, if the tolerance for a Projects budget type is set to 10% in general, you can override this value, making it higher or lower for specific projects.

Control Group

A mechanism to relate vouchers together for the purpose of controlling voucher input into PeopleSoft Payables. Generally used for assigning vouchers to data entry personnel and for reviewing input.

A set of parameters that determines the major forecast process options. The Control Group code is assigned to a group of **Forecast Item** and controls the forecast development and tracking for each item in the group.

Control groups are used by the Analytic Forecast Component to govern particular properties of the forecast rule, such as what accuracy to expect and what statistical method to apply. Forecast elements are assigned to exactly one control group. They manage differences among forecasts within a set.

Control Hierarchy

The relationship between business units, origins, vendors, and control groups in PeopleSoft Payables that defines which processing data will be automatically entered on each voucher.

Control Number

A sequential identifying number used to identify an exercise.

Control Plan

In PeopleSoft Quality, a plan that brings together application, measurement, and control and response criteria for a specific product and process.

Conversion data profile

A conversion data profile takes the values from a particular PeopleSoft database table (such as the table holding bank transaction codes) and specifies how that value appears in PeopleSoft Business Documents.

Conversion data profile

A conversion data profile takes the values from a particular PeopleSoft database table (such as the table holding bank transaction codes) and specifies how that value appears in PeopleSoft Business Documents.

Conversion Loader

A sample SQR delivered with PeopleSoft Asset Management that transfers data from multiple fixed-length ASCII files into sample, relational conversion tables.

Core Functionality

Core functionality is the set of information in PeopleSoft HRMS that is common to your entire global workforce tracking needs—and is always displayed on the primary page.

Core hours

The hours a workday, workweek or pay period in which a time reporter must be present for work in a flexible work schedule (see Scheduling).

Corporate Account

In PeopleSoft applications, this is equivalent to the Account (ACCOUNT) ChartField. The term is used to make a distinction between the chart of accounts typically used to record and report financial information for management, stockholders, and the general public, as opposed to a chart of statutory (Alternate) accounts required by a regulatory authority for recording and reporting financial information.

Corporate Reporting

Companies with more than \$10 million in assets whose securities are held by more than 500 owners must file annual and other periodic reports. Publicly held companies are required to file documents with the SEC which include:

- Registration statements for newly-offered securities
- Annual and quarterly filings (Forms 10-K and 10-Q)
- Proxy materials sent to shareholders before an annual meeting
- Annual reports to shareholders
- Documents concerning tender offers (a tender offer is an offer to buy a large number of shares of a corporation, usually at a premium above the current market price)

- Filings related to mergers and acquisitions

Corporate Repurchase

When a corporation elects to repurchase some of its own securities. This reduces the Common Shares Issued and Outstanding. Typically, used to improve the valuation of the company's common securities outstanding as well as the Earnings Per Share (EPS).

Correction to IRR

An IRR type used when corrections need to be made to an original IRR that has already been submitted to the Office of Personnel Management (OPM). Federal employees covered by the CSRS retirement plan require SF-2806-1. Federal employees covered by the FERS retirement plan require SF-3101. A Correction IRR is also used if original retirement deductions were over-reported. See also Individual Retirement Record (IRR).

Cost Accounting

A method where business costs are accumulated and distributed to products, processes, or discrete undertakings on an equitable basis. There are a variety of cost accounting methods, but they all share the same basic functions: classifying costs, recording costs, allocating costs to products or activities, summarizing and reporting costs to management. Cost accounting requirements and financial accounting requirements are not necessarily synonymous.

Cost Assignment

Resources assigned to cost objects or activities.

Cost Basis

Typically, this refers to the original price of an asset used in determining capital gains. However, in the case of death of an optionee, the appraised value of the asset at the time of death is the cost basis.

Cost Center

A Time and Labor Business Unit, in which all related costs attributable to some center within a business (such as an activity, an organization, or a program), are segregated for accounting or reimbursement purposes.

Cost Objects

Cost objects represent cost information about products, customers, and channels. They are the final results of the activities performed by your business, representing the focal point of costing and profitability analysis. Examples are products, customers and channels. They are the final results of the activities performed by your business. Your model's resources and activities are linked to the cost objects. They are often the focal point of profitability analysis.

Cost of Capital

An attribute used to describe the behavior of a particular cost object. A primary cost object is typically the main focus of the activity-based management analysis. This may be a product, customer or channel that you wish to calculate cost for. A support cost object may be used in a similar manner but may be further allocated to other support cost objects or primary cost objects.

Cost Of Living Allowance (COLA), Non-Foreign

A cost-of-living allowance payable to an employee at a location in a non-foreign area where living costs are substantially higher than those in the Washington, DC area.

Cost Profile

A combination of a receipt cost method, a cost flow, and a deplete cost method. A profile is associated with a cost book and determines how items in that book are valued, as well as how the material movement of the item is valued for the book.

Cost Profile Group

A grouping of items for the purpose of costing transactions and valuing inventory for a given book. Assigning an item to a cost profile group determines the books used by the item when accounting for that item.

Cost Roll-up

A process for calculating item costs. Cost roll-up provides a summation of all of the costs associated with the bill of material structure and the routing used in producing the item.

Cost Row

A cost transaction and amount for a set of ChartFields.

Cost Template

A collection of cost components that you can apply to a group of purchased items.

Cost Type

A user-defined method of categorizing item costs in Manufacturing for simulations and what-if analysis. Examples of cost types include current costs (which reflect the item's current bill of material or routing), proposed costs (which could be used in preparation for the next standard cost period), or activity-based costs (which include costs for items that consume a given activity).

Cost Version Type

A combination of cost types and cost versions used in cost rollups. Valid values include production (rolls up only manufacturing data and uses only the primary BOM and routing, each with a code of 1), engineering (can roll up with either manufacturing or engineering data,

with any combination of BOM/routing codes), or simulation (only rolls up with manufacturing data, but can use any combination of BOM/routing codes).

Count Grade

A user-defined evaluation of a counting event.

Count Point

A predefined step on a routing or operation list where you can gather operation completion information. You define the appropriate points on the routing, record completions at these count points, and the system automatically backflushes the prior operations. This is only used on production IDs.

Counts

Count elements allow you to count the number of days or hours from a specific period of time. Counts are used primarily during proration calculations, but can potentially be utilized in other situations as well.

Court-Ordered Benefits Coverage

As prescribed in Title 5, United States Code and Title 5, Code of Federal Regulations, court orders that stipulate that an employee must continue or begin the coverage features for all employee benefits must be enforced. Federal employees are mandated by court orders to continue covering or begin covering their former spouses and/or children under their federal employee benefit programs (health, life, and thrift savings).

Court-Ordered Garnishments

As prescribed in Title 5, United States Code and Title 5, Code of Federal Regulations, court orders enforcing child support, alimony, or collection of commercial indebtedness are served on the appropriate entity within the Federal agency and implemented as offsets against the employee's salary.

Coverage

An employee's chosen benefit plan and coverage level; that is, what sort of benefit is provided as well as the value.

CPAM (Caisse Primaire d'Assurance Maladie)

In France, CPAMs are the local social security offices that manage health coverage for French workers. CPAMs are regulated and established by the French government. If you're managing a French workforce you'll need to identify and track the CPAM offices that impact your enterprise.

CRAM (Caisse Régionale d'Assurance Maladie)

In France, CRAM is the regional social security body which oversees the running of CPAMs. CRAM offices work with companies to both prevent and compensate workers for industrial injury.

Crawlers

Batch software programs that aggregate, categorize, and register content from multiple disparate sources. Crawlers search across multiple data sources (database, file system, web server, and so on), scan each item using an algorithm to determine how to categorize it (key columns, word combinations, META tags, and so on), and then register each item in a content management system or search collection.

Create Date

The date that you extracted a deduction or offset to PeopleSoft Deduction Management or created a split deduction.

Create Missing Items

In PeopleSoft Demand Planning and Inventory Planning, a feature that enables automatic system generation of master records that don't exist in the system.

Created Time

Time collecting device time or elapsed time generated by the system based on the time reporter's schedule (see Time Administration)

Creating Time

The preliminary generation of time segments as close as possible to their likely values when you officially report time—so that the information on the time records is as fresh and current as possible. The system shows you time that has already been created, rather than you having to create it “on the fly” when you come in to report. The process fills in reporting day gaps as defined by work schedules.

Credit Analyst

A required field used in PeopleSoft Receivables, Billing, Order Management, and Deduction Management when working with items. Each item must be assigned to a credit analyst. If no credit analyst is assigned to an item, the credit analyst assigned to the customer is used as the default.

Credit Risk Spreads

In the financial services industry, the additional charge to a risk-free interest rate, based on a riskier credit rating.

Credits

See Flexible Credits.

CREF

Acronym for Content Reference.

Crew Reporting

A Time and Labor process that enables you to report the earnings which consist of one or several time reporting codes and associated quantities of hours, amounts, or units, and task information for one date under report for a user-defined crew. The system transforms the information into instances of daily time for each crew member for the entered date.

Critical Success Factors (CSFs)

In PeopleSoft Balanced Scorecard, things that an organization must do well or excel at to achieve its goals. One or more key factors or objectives that must be accomplished for a particular strategic thrust. Key Performance Indicators are attached to CSFs.

CRM Warehouse

See Warehouses.

Cross Border Walker

This term is used in Europe for an employee who lives near a border in one country and works in another country. Such employees are subject to different tax and social security rules.

Cross-Plan Validation

The process by which the PeopleSoft Benefits Administration determines enrollment prerequisites for benefit plans. You can define four types of cross-plan validation prerequisites: prerequisites based on plan types, benefit plans, dependent enrollments, and coverage percentage limits for Life and AD/D plans.

Cross-View Reconciliation

In PeopleSoft Demand Planning, a process that enables the balancing of forecasts between selected levels of related views with the same **Forecast Item** key. The process is used when adjustments have been made to a working view and are then required in a related view.

Cube

See **Multidimensional Database (MDDB)**.

Cube View

In PeopleSoft Demand Planning, defines the user's own view of a forecast. The parent working view and dimensions determine what forecast data is included and how aggregates are formed.

Cumulative Tax Method

A payroll tax calculation method that adds together year-to-date earnings and earnings for the current pay period, then annualizes the result before calculating tax. This method is useful when Payrolls vary greatly in amounts from pay period to pay period, such as in the case of sales commissions.

Currency Calendar

In the financial services industry, business calendars for markets outside the organization's domestic operations that reflect the foreign markets' holiday schedules.

Currency Conversion Engine

A PeopleSoft Enterprise Warehouse Engine that processes financial information in multiple currencies.

Current Period

The earliest pay period for which the close date has not passed (see Time Reporting).

Current Period (Time and Labor)

In Time and Labor, the employee's current pay period which will be determined via the employee's Pay Group affiliation. Although there can be only one definition of Current Period per installation, the user can change it manually.

Current View

A reporting screen in Time and Labor whose effective date is within the date boundaries of an employee's current pay period, and for which pay has not yet been confirmed. A *Future Time Reporting Transaction* is one that has an effective date after the last day of the employee's current pay period. An *Historical Time Reporting Transaction* is one that has an effective date before the first day of the employee's current pay period.

Current Year

A period for event maintenance processing.

Curve Generator

A supporting module (common to financial services industry applications) that enables you to construct curves used to determine appropriate interest rates for given maturities and / or time periods. You can import market data from outside sources such as Bloomberg, upload the data from a spreadsheet, or manually enter the data. You can then build configured curves from segments or combinations of other curves.

CUSIP Number

A nine digit alphanumeric number associated with issuers' securities. CUSIP (Committee on Uniform Securities Identification Procedures). A uniform numbering system widely used to identify specific securities and their issuers.

Custom Statement

A user-created logical or mathematical expression that determines information about an employee in PeopleSoft Pension Administration. Custom Statements commonly define employee groups and benefit formulas.

Customer Scorecard

See PeopleSoft Customer Scorecard.

Cut Session

Cut sessions are a means of dividing a course session. You use cut sessions where a course session does not run on consecutive days from start to finish, or if there are multiple instructors or locations. Each cut session has its own start/end date, location, and instructor. For example, if you have a course that runs for two days a week for a month, you would divide the course session into four cut sessions, each of which is two days long.

Cycle Procedures

Inventory planning tasks that need to be performed on a regular basis to ensure an up-to-date **Inventory Policy**. The tasks can be performed either at the end of a processing period or within the period, and should always be performed if the forecast or **Control Group** or **Policy Item** parameters change. Tasks include generating a policy and reviewing **Work Queue** messages.

D**DAT file**

A text file (input.dat) used with the Verity search engine that contains all of the information from documents that will be searchable but not returned in the results list.

Data Elements

Data elements, at their most simple level, define a subset of data and the rules by which to group it.

For PeopleSoft Balanced Scorecard, data elements are used as the basis for key performance indicators, and as target values for Key Performance Indicator (KPI) objects.

For Workforce Analytics, data elements are rules that tell the system what measures to retrieve about your workforce groups.

Data Entry Access List

Used to present a concise list of often-performed data entry tasks to a user. You can assign multiple control plans to a single data entry access list.

Data Extract

A report that creates a file used to transmit data to a third party on magnetic media. There is no meaningful printed output for this type of report.

Data Loader

Data Loader is a PeopleSoft Enterprise Warehouse utility that moves data from the Operational Data Store staging area to either the ODS reporting area or the Data Warehouse. The Data Loader utility is made up of several pages that allow you to enter Metadata to define your source and target records and your transformation rules and then perform the load by running an Application Engine.

Data Loader Map

Defines how to extract data from the Operational Data Store (ODS), transform it, and load to a Target Table. The target table can reside in the warehouse or the ODS layer.

Data Manager

A PeopleSoft Enterprise Warehouse engine that distributes revenue, expense, analytical application engine results, statistical quantities and other measures across business units, departments, products, customers and channels—any field or logical group in the chart of accounts. You can define a number of types and options within this engine. It is also used as a means of posting to the Performance Ledger.

Data Manager Rules

In the PeopleSoft Enterprise Warehouse, Data Manager rules use Constraints to specify the source as well as the target tables for moving, aggregating, or multidimensionalizing your engine output. Rules use Data Manager methods to enrich the PeopleSoft Enterprise Warehouse data.

See Data Manager Methods.

Data Manager Methods

There are several methods: Copy, GL Mapper, Prorata, Spread Even, and Tree Aggregation. Each method enables you to move and/or enrich engine output.

Data Mart

A Data Mart is a data structure that uses a central fact table and related dimension tables to generate a “relational cube” or directly generate an Insight report.

Data Mart Builder

The Data Mart Builder is a multiple Application Engine (AE) process, that is, a framework of procedural programs, that creates a Data Mart.

DataMaps

Information that builds upon the data captured in the TableMap records. DataMaps enable you to define a logical view of the physical PeopleSoft Enterprise Warehouse tables. DataMaps bring together information from many different tables and fields and define it all as one entity or table.

Data Row

Contains the entries for each field in a table. To identify each data row uniquely, the system uses a key consisting of one or more fields in the table.

DataSet

DataSets are used as input for various engines and processes, for instance, the Analytic Forecasting component, the Data Manager, user defined functions, drivers in Activity-Based Management, and data elements in the Key Performance Indicator Manager. DataSets provide a user defined set of information to the engines. DataSets use Constraints to restrict used columns and restrict returned rows. Each DataSet is created by a process specific setup. However, the underlying logic is the same, enabling you to more easily understand the functional aspects of the process.

Data Warehouse

A large database containing data summarized from one or more transactional systems, optimized to support the analysis needs of the enterprise. An ideal data warehouse contains all the data necessary to make business decisions. Users analyze the data in the warehouse using Online Analytical Processing (OLAP) tools and ad hoc query/reporting tools. An increasing number of organizations have "virtual" data warehouses, where the data warehouse is not one physical database, but rather a collection of specialized (and distributed) data marts.

See also PeopleSoft Enterprise Warehouse.

Data Warehouse Tables

Data Warehouse tables act as the portal for getting data into the PeopleSoft Enterprise Warehouse from PeopleSoft, OLTP applications or other "outside" sources. These tables are used:

- As targets for loading operational data.
- For error detection and handling
- For data validation.
- For aggregation.

Database Alias

The PeopleSoft Pension Administration utility that looks up employee data.

Dataset

A file containing data to be analyzed by the Quality Server program. The dataset is similar in content to a spreadsheet.

In PeopleSoft Planning, a file that stores schedule information such as tasks, resources, calendars, and so on.

Date

See **Accounting Date Transaction Date** or **Effective Date**.

Date

If you want to either include a date in a calculation, or determine a new date by taking a starting date and either adding or subtracting a period of time to come up with another date, you use a date element.

Date Classified

Date the Position Description is approved by Management/Position Management.

Date Eligible To Retire

Date an employee is eligible to optionally retire based on the combination of age and service that meets legal requirements.

Date Under Report

The date (day) in PeopleSoft Time and Labor for which time is being reported. The Date Under Report does not have to equal today's date.

Day Breaker

Customer defined time that is used to determine when one day becomes the next. It's used to determine the "logical" date of a punch. (See Understanding Workgroups.)

Days Supply

In PeopleSoft Inventory Planning, a method that can be used with several types of **Inventory Policy**. Using this method, a specific number of days of supply for an item should be used to calculate the item's inventory policy.

Deal Type

PeopleSoft Treasury has categorized deals into several basic deal types from which you can choose when defining an instrument.

Death Coverage

The PeopleSoft Pension Administration function that determines the factor used to reduce an employee's benefit when the plan charges for PRSA coverage.

Decompressed Split

In PeopleSoft Demand Planning, a function for returning a compressed split database to its original form. See also Compressed Split.

Deduction

Any amount taken from an employee's pay check each pay period. Deductions may include health or medical benefits, union dues, and so on. See also Benefit Deduction and General Deduction.

Deduction Date

The as of date for the deduction item in PeopleSoft Receivables.

Deduction Item

An individual item that you created in receivables and is an open receivable on the customers account due to a deduction that they took in a payment for a receivable item.

Deduction Reason

Code that describes the type of deduction. When assigned to a write-off resolution, it determines what accounting entries to create.

Deduction Specialist

The individual responsible for tracking and resolving deductions in PeopleSoft Deduction Management.

Deduction Subset

A group of deductions selected from a company's standard set of deductions. Deduction subsets minimize data entry time in special processing situations such as bonus check runs.

Default Mode (DM) model

In the financial services industry, an approach used by financial institutions to predict a decline in portfolio value. Only two outcomes are considered – default or non-default. If the debt does not default, there is no change in the value. If the debt does default, then the loss is calculated as the difference between what was contractually owed and the value of any collateral recovered.

Defection Analysis

In PeopleSoft Workforce Analytics, the identification of employees who are likely to leave the organization based on predefined assessment criteria.

Deferred Compensation

Compensation payments that are payable to an individual in the future such as pension plan payments, annuities, stock awards and profit sharing. Note: Profit sharing can be considered

direct pay if paid out in cash on a periodic basis or deferred pay if cumulative with the intention of payment in the long-term future.

Deferred Vesting

The adjustment made to the original option's vesting schedule that pushes the vesting into the future.

Defined Benefit Plan (DB Plan)

A retirement income plan (usually called a pension plan) where the employee's benefit is definitely determinable based on a plan-specified benefit formula.

Definition or Function Definition

The parameters for any of PeopleSoft Pension Administration's nineteen core functions. A definition has to be explicitly associated with an employee Group Definition before it can be applied.

Delete Non-Matching Items

In PeopleSoft Inventory Planning, an option used in the Generation process to delete Inventory Planning items that don't have corresponding items in Demand Planning. The item deletion occurs when the system generates the policy.

Delta

When retroactive processing occurs for a given payee, the system recalculates each element generated for the payee. The system compares the recalculated results to the original results. The difference between these results is typically referred to as the retro "delta." A retro delta can represent either an underpayment or an overpayment that results in an adjustment to the payee's earnings.

Demand

Collection of training requests. This could be an employee demand, a departmental one or a company-wide demand.

Demand Filter Width

In PeopleSoft Demand Planning, specifies the confidence interval within which demand is considered to be reasonable. Actual demand that is outside the confidence interval is automatically filtered and replaced by the value at the edge of the interval. The value is expressed as a percentage.

Demand Filtering

In PeopleSoft Demand Planning, provides a way to detect and highlight unusual demands and forecast errors. If the demand falls outside of a band that is considered reasonable, the system automatically adjusts it to the level of the boundary and logs a message to the **Work Queue**.

Demand Number

The configured product sub-component sequence number.

Demand Planning

In PeopleSoft Activity-Based Management, this type of planning focuses on studying the impact of cost objects and activity volumes.

Demand Priority

The placing of importance on independent demand. The Planning engine uses the demand priority value to determine the order in which you fulfill the demand. You can set a demand priority from 1 to 998 with 1 being the most important level. The priority value of 999 is reserved for the system.

Demand Priority Rules

In PeopleSoft Inventory, a set of rules that will sort demand so the most important demand will have the first opportunity to reserve available inventory. If demand priority rules have been defined, the Material Reservations process (INPLDMND) sequences orders by priority rank, processing those with the lowest rank value first.

Deplete Cost Method

Determines how you cost a depletions transaction within a book. The deplete cost methods available include Actual, Non-Cost, Perpetual Weighted Average, Periodic Weighted Average, and Value at Current Standard.

Depreciate When in Service

A switch that indicates whether PeopleSoft Asset Management should allocate depreciation as of the date an asset was placed in service. This is valid only in the year the asset was acquired.

Depreciation - Declining Balance

Budgeting calculates this as: $\text{Cost} - \text{Accumulated Depreciation} \div \text{Life} \div \text{number of periods per year}$. It results in a higher depreciation expense in the early years of an asset, which decreases as you near the end of its useful life.

Depreciation - Double Declining Balance

Budgeting calculates this as: $\text{Cost} - \text{Accumulated Depreciation} \times 2 \div \text{Life} \div \text{number of periods per year}$. It results in a higher depreciation expense in the early years of an asset, which decreases as you near the end of its useful life.

Depreciation Methods

The various methods of spreading the acquisition cost across the life of an asset rather than expense the full value of an asset at the time you acquire it. The value of the asset consequently decreases (or depreciates) through time. The four depreciation formulas

delivered with PeopleSoft Budgeting include: declining balance, double declining balance, straight line, and sum of the years.

Depreciation - Straight Line

A method of depreciating asset value in equal amounts across the life of the asset. Per-Period Straight-Line depreciation is calculated as the cost of an item minus the salvage value divided by the number of periods to depreciate.

Depreciation - Sum of the Years

A depreciation method equal to the value of the remaining years of life divided by the sum of the years remaining is multiplied by the Net Book Value. This figure is then multiplied by the percent of years to depreciate. This results in a higher depreciation expense in the early years of an asset, which decreases as you near the end of its useful life.

Depromote

In PeopleSoft Demand Planning, the process of making an adjustment to actual demand data that removes the effect of a promotion during a defined period. As a promoted period moves into history, the system creates an adjusted demand entry that is equal to the **Prorated Forecast**.

DeptID

A ChartField that defines departments or administrative offices that have operational, fiscal and/or budgetary responsibility for specific sets of activities.

Derived Metric

The result of a calculation on a report of base metrics.

Detail

A temporary assignment to a different position for a specified period when the employee is expected to return to his/her regular duties at the end of the assignment. This employee is considered for pay and strength count purposes to be permanently occupying his/her regular position. Unless the agency chooses to use an SF50, a detail is documented with an SF52.

DFI ID (Depository Financial Institution ID)

A PeopleSoft Payables bank identifier, consisting of Transit Number, Swift ID, or CHIPS ID.

Dimension

A single element of a business model, such as product, department, or location. Cube Manager uses the term Conforming Dimension.

In terms of data analysis, dimensions can be thought of as criteria, such as time, product, and location, used to pinpoint a particular piece of data. For example, in the retail industry a set of dimensions could be geography, product, time, customer, and vendor. The geography

dimension would include company, chain, region, district, and finally store attributes. A dimension is also a column heading on an analysis and reporting template which you can drill through or roll up to the multiple levels.

In PeopleSoft Budgeting, a view option that assists in summarizing the rows of data in line-item budgeting.

A single element of a budgeting model, such as account, product, project, department, or operating unit. In PeopleSoft Budgeting, these dimensions typically represent the ChartFields used by your organization during your budgeting process.

Dimension Table

In the PeopleSoft Enterprise Warehouse, Dimension Tables store additional attributes or data about Facts. Some example dimensions include Customer, Channel, Geography and Product.

Direct Compensation

In PeopleSoft Workforce Analytics, Direct Compensation is payment made to workers in exchange for their contributions to the organization. Direct Compensation is typically categorized as including Cash Compensation and Long-term Variable Compensation.

Cash payments made to workers in exchange for their contributions to the organization. Direct pay is typically categorized as fixed pay (for example, base pay, shift differentials) and variable pay (for example, profit sharing, incentive, bonus). Note: Profit sharing can be considered direct pay if paid out in cash on a periodic basis or deferred pay if cumulative with the intention of payment in the long-term future.

Direct Calculation

Calculate actual and directly assigned dollars.

Direct Cost

In PeopleSoft Workforce Analytics, a direct cost of an activity or a cost object. An example is the salary cost of employees working on a project.

Director

An affiliate of the company who holds a seat on the Board of Directors for the corporation. A Director, generally, is not an employee of the corporation.

Disability and Discrimination Act of 1995

In the United Kingdom this act makes it unlawful to discriminate against individuals on the basis of their disability in relation to recruitment, promotion, training, benefits, terms and conditions of employment, and dismissal.

Disability Rate Code

The desired percentage of disabled persons that should be employed by French employers, as mandated by the French government.

Disbursement View

In PeopleSoft Demand Planning, a **Forecast View** that allows the forecast from a working view to be reported on using an alternate key. Disbursement views are built directly from the working views and inherit many working view attributes, including time period and associated user data definitions, from the parent working view.

Discounted Stock Option

Rights to a stock option at a price less than 100 percent of fair market value at the time of grant.

Discretionary Plan

In PeopleSoft Workforce Analytics, this is a plan for distributing compensation awards that provide managers the ultimate discretion over a pool of money which is either funded based on company, group, or employee performance, or it's budgeted. The discretionary award determination is sometimes guided by a pre-determined percent of the participant's salary, expressed as an opportunity. This figure can then be modified based upon management's perception of actual value created by the group or employee.

Disqualifying Disposition (DD)

When an optionee sells or otherwise disposes of the shares of stock acquired through the exercise of an incentive stock option or through an employee stock purchase plan before the holding period for preferential tax treatment has lapsed.

In the case of Incentive Stock Options, the holding period is one year of the date of exercise and two years of the date of grant. At the time of disposition, the individual recognizes compensation income equal to the difference, if any, between the option price and the fair market value of the corporation's stock on the date of exercise. If the sale price is less than the fair market value of the stock on the date of exercise, the compensation income is limited to the total sales price less the total option price, less any fees.

In the case of purchases through an employee stock purchase plan, the holding period is one year from the purchase date and two years from the enrollment date. Compensation income in a disqualifying disposition is equal to the difference between the total fair market value on the purchase date and the total purchase price.

Distribution

Provide a repository of time and associated estimated and actual allocated labor costs to other systems

The process of assigning values to ChartFields. A distribution is a string of ChartField values assigned to items, payments, and budget amounts.

Distribution Network

A distribution network is a prioritized list of Inventory business units (IBUs). When a customer orders a product, the system uses this network to determine which warehouse the stock ships from.

Distribution Profile

A definition of ChartField distributions assigned for compensation costs. A distribution profile can be used to set up defaults for how the system should distribute costs associated with a position's salary, benefits, and earnings. PeopleSoft Budgeting-specific.

Distribution Rule

You use distribution rules to determine the order in which the system searches for matches against the distribution sets matrix when sales orders are entered.

Distribution Set

Distribution Sets assign account distribution information to combinations of defining elements used on sales orders.

Distribution Type

An identifier that defines one of the different transactions that move an item into or out of an inventory business unit. Distribution types are used to create debit and credit transactions to the general ledger via the Journal Generator.

Dividend

Distribution of earnings back to shareholders, prorated by the class of security and paid typically in the form of money or stock. The amount of a dividend is decided by the Board of Directors and is usually paid quarterly.

Domestic Relations Order (DRO)

A preliminary version of a court order (usually stemming from a divorce settlement) ordering a division of a participant's pension benefits. The order is not in effect until it is determined to be "qualified" by virtue of meeting certain requirement. At that point it becomes a Qualified Domestic Relations Order, or QDRO.

Double Byte Characters

If you're working with Japanese or other Asian employees, you can enter the employee's name using double-byte characters. The standard double byte character set name format in PeopleSoft applications is: [last name] space [first name].

Draft Worksheet

A work space used in PeopleSoft Receivables to track a draft through its processing life cycle.

Drill-Back Calculation

Assigns indirect dollars and Drill-Back calculations. Also, this picks-up all costs in the Calculations Detail (CALC_DETAIL_F00) that was assigned during direct calculations.

Drill Down

The ability to go down to the next level of detail in a set of data. For instance, if you're looking at an expense figure for a division, you can drill down to the expenses for each department in the division.

Drill Down

The ability to go down to the next level of detail in a set of data. For instance, if you're looking at an expense figure for a division, you can drill down to the expenses for each department in the division.

Driver Lookup Table

Tables associated with a driver that enable different rates and amounts unique to a budget center.

Drivers

In PeopleSoft Activity Based Management, drivers are a means of assigning dollar amounts from resources, activities, and cost objects to other resources, activities, and cost objects throughout the model in PeopleSoft Activity-Based Management. Drivers can also be assigned across business units. There are different types of driver categories (transactional, duration, and intensity), and different ways of specifying how those dollar amounts are calculated (amount, percentage, spread even, and direct), as well as different ways that dollar amounts are assigned (depending on assignment type and object type).

In PeopleSoft Business Planning, a driver can be defined as a set of values that are used as an input to another process. In this context, a driver should be interpreted as a projection of external factors and other indicators. The user can define a relationship between the driver and a financial result. The driver values and the defined relationship then combine to produce a projection of the financial result. For example, a projection of the number of square feet used (driver) and the price per square foot paid in rent (driver) can combine to produce a projection of rent expense (financial result).

DRO

See Domestic Relations Order.

DSS (Decision Support System)

A DSS is a workstation-based analysis and reporting system, typically aimed at analysts and line managers. OLAP tools provide a powerful DSS.

Duration

In PeopleSoft Pension Administration, the utility that calculates the length of time between two dates.

Duration [Global Payroll]

An element type that calculates a period of time between two dates. For example, if you want to determine a payee's age, you can calculate the duration between his birth date and the calendar period end date.

Dynamic Content template

A Dynamic Content template is a template that has been designed to work with the Context Manager to display the Template Pagelets assigned to a business transaction set up in portal registry as a content reference.

Dynamic Group

A group in Time and Labor that enables you to establish criteria or attributes for a group of employees. All employees who fit this criteria at processing time belong to the group.

Dynamic Tree

A tree that takes its detail values—*Dynamic Details*—directly from a table in the database, rather than from a range of values entered by the user.

Dynamic Views

In PeopleSoft Demand Planning, a **Forecast View** that allows interaction with the forecast data using an alternate key structure. By using dynamic views, you streamline the working view and can complete the working-view design without having to anticipate all conceivable adjustments.

E***Earliest Change Date***

Determines both the range of dates and the amount of data that will be processed for each time reporter (see Batch Processing)

Early Punch

A punch that is more than the predefined number of hours/minutes before a scheduled punch where a time reporter is warned

Early Retirement Date (ERD)

A retirement date earlier than a plan-specified "normal" retirement date. Employees usually must meet age and/or service requirements to be eligible for early retirement, and early retirement benefits are often reduced to compensate for the longer duration of payments.

Early Retirement Factor

The reduction made to an employee's benefit if the employee elects for early retirement.

Early Warning

In commitment control, warning of possible future budget exceptions. You can specify that you are to receive a warning when commitments and expenditures reach a predetermined percentage of budget. For example, you can instruct the system to let you know when commitments and expenditures reach 50%, 80%, or some other percent of a budget.

Early/Late Adjustments

The PeopleSoft Pension Administration function that calculates early retirement factors or late retirement factors.

Earning Group

Part of a group of defaults assigned to job codes. Earnings group may include non-salaried items such as holidays and bonus pay dependent on individual company parameters.

Earnings

The amount owed to an employee based on salary, hours worked, or other calculation routines, plus other types of compensation and holiday, vacation, and bonus pay.

Earnings [Global Payroll]

An element type that defines the different types of compensation that are added to a person's pay. Examples include salary, commission, bonuses, and retirement pay.

Earnings Accrual Class

Categorizes a set of accruable earnings.

Earnings Code

Codes that represent the various types of earnings such as regular, overtime or leave.

Earnings Per Share (EPS)

The portion of a company's profit allocated to each outstanding share of common stock. Net income (reported or estimated) for a period of time is divided by the total number of shares outstanding during that period.

Earnings Type

An abbreviated and encrypted set of business instructions containing compensation instructions. Earnings Type may also contain Benefit Entitlement and Administration instructions, taxation instructions, Financial Accounting instructions, Organizational Administration instructions, work group and labor affiliation instructions, and other instructions.

Economic Loss

In Funds Transfer Pricing, this refers to the break fund economic loss, calculated by applying the theoretical value of the interest rate differential (IRD) against a cash flow stream, based on the amount of the prepayment or cancelled draw-down.

Economic Value Added

In the financial services industry, Economic Value Added is a financial metric that factors into the measurement of an activity's profitability the cost of economic capital assigned to that activity.

EDGAR (Electronic Data Gathering, Analysis, and Retrieval)

An electronic system implemented by the SEC that enables companies to file documents in conjunction with disclosure requirements mandated by the SEC.

Edit Table

A table on the database that has its own record definition, such as the Department table. As fields are entered into a PeopleSoft application, they can be validated against an edit table to ensure data integrity throughout the system.

EEO Company Code

In the United States companies are assigned this federal code for EEO and VETS100 reporting.

Effective Date

A method of dating information in your system. You can predate information to add historical data to your system, or postdate information in order to enter it before it actually goes into effect.

Effective Date

A method of dating information in your system. You can predate information to add historical data to your system, or postdate information in order to enter it before it actually goes into effect. The Effective Date usually defaults to your system's current date.

Effective Periods

In PeopleSoft Demand Planning, the number of periods of historical demand used in the Model Reset process. The value can be used to exclude older, possibly unrepresentative historical demand data from model **Optimization**.

Effective Sequence

A system-generated number assigned to distinguish between two job entries with the same effective date.

Effective Tax Rate

The ratio of income tax paid over gross income, showing the percentage of income actually paid in taxes.

Effectivity Date

The date on which a component can be added or substituted in production, typically specified on an item's bill of material.

EIS (Executive Information System)

An EIS is a workstation-based analysis and reporting system for executives. An EIS provides a higher-level view of the data than a DSS, and typically requires less knowledge about the underlying transactional systems. OLAP tools provide a powerful EIS.

Elapsed Schedule

A method of scheduling a time reporter's time that is based on TRC and duration. This method can be used for scheduling of elapsed time reporters (see Scheduling.)

Elapsed Time

Reporting non-clock time in increments of hours or partial hours (see Managing Time / Understanding Time Reporting).

Elapsed Time Service

A method of calculating a period of service that uses only the start and end dates of the period to determine the amount of service. Hours worked or other measures of the actual work performed during the period are not taken into account.

Electronic Certification System (ECS)

An automated Payment Voucher authorized by the Certifying Officer for use within the Treasury Department, Financial Management Service's financial system. PeopleSoft provides a method to record and generate data files for on- and off-cycle processed payments.

Element

In PeopleSoft Global Payroll, an element refers to both primary elements and supporting elements. Primary elements are comprised of earnings, deductions, absence entitlements, and absence take elements. Supporting elements are element components that are combined to create primary elements.

In PeopleSoft Enterprise Performance Management, elements are used to create a Profile. An Element can be one or more columns of data in an Enterprise Warehouse table, associated with a single dimension (for example, Customer, Product, Department, or Channel). An Element can also be KPI, Population, subscription data from a third party, preexisting Profiles, and data mining scores.

Element Group

Element Group identifies a group of elements to provide eligibility. You can then use this as a notational shortcut—instead of having to list each element, you can use the element group name. Element Group's expedite the process of manipulating earnings and deductions.

Element Name

Name assigned by the user for data fields, rules, formulas, and tables. For example, the names you give to new rules, elements, or objects.

Element Segment

When an element changes mid-period, requiring the affected element (and perhaps a subset of other elements) to be calculated multiple times on either side of the date on which the change takes place, element segmentation is used. Unlike period segmentation, the system segments only the elements you select, and creates separate result columns only for the specified elements. In element segmentation, there is only one gross-to-net result set.

Eligibility Group

Eligibility groups define the possible earnings, deduction, absence entitlement, and absence take elements that a payee might be eligible to receive. This enables you to group payees so as to assign eligibility for certain pay elements.

Eligibility Rule

PeopleSoft Benefits Administration uses eligibility rules during Benefits Administration processing to determine which benefit programs and options an employee is eligible for. Eligibility rules are closely associated with event rules: they determine what options an employee can *have*, while event rules determine which of those options an employee will actually be able to *choose*.

Elimination Set

See **Consolidations-Elimination Set**.

Email Template

Pre-defined parameters that establish automatic email generation during budget submittal, rejection, publishing, and/or targeting.

Employee

An individual employed by an organization and administered as an employee in the PeopleSoft Human Resources system.

Employee Accounts

The PeopleSoft Pension Administration function that tracks employee contributions to a pension plan.

Employee ID

A unique identification code for an individual associated with your organization.

Employee Paid Benefit

The portion of a pension benefit funded by the employee's own contributions to the pension plan. Also, the PeopleSoft Pension Administration function that determines this amount.

Employee Profile

This PeopleSoft Activity-Based Management feature enables time and labor information to be part of an analysis.

Employee Stock Purchase Plan

A type of statutory stock option plan through which employers grant options to their employees in order to provide them with additional forms of compensation.

Employee Survey

In PeopleSoft Workforce Analytics, a method for capturing information about the activities performed by a given employee as well as the amount of time they spend performing each activity to perform activity-based management.

Employee Survey Report

The Employee Survey Report is an annual regulatory report that the French government requires from employers with more than 200 employees. In French it is called "Le Bilan Social". The report is communicated to both labor unions and the government. It provides a snapshot view of the company over the past 3 years for about 200 indicators.

Employee Training Cost

Amount budgeted to pay for students' salaries while on training courses.

Employer Identification Number (EIN)

In the United States a company is typically defined as a business enterprise that has a unique federal Employer Identification Number (EIN) for payroll tax reporting purposes.

Employer's Liability Insurance Associations (Berufsgenossenschaften)

Social Insurance in Germany is maintained and administered by private organizations that act as employer's liability insurance associations. Employers pay out premiums to these associations, who administer and pay out funds to workers who are injured on the job.

Employment Cost Index (ECI) Adjustment

Annual increase to wages established/permitted by statute.

Employment Equity Computerized Reporting System (EECRS)

Canadian companies are required to report to the Federal Government on employment equity. PeopleSoft Human Resources contains the Canadian Employment Equity report (PER101CN), which creates a data interface file to the federal government's Employment Equity Computerized Reporting System (EECRS).

Employment Record Number (EMPL RCD#)

A field in PeopleSoft Human Resources Management Systems and PeopleSoft Workforce Analytics that indicates an employee has multiple job records in the system. A numeric value (0, 1, 2) is assigned to each job as a way to uniquely identify that job record.

Encumbrance

A claim against funds. It is a projection of future expenses based on the situation, as we know it today. Encumbering funds is not the same as spending them or even guaranteeing that you will spend them. It just means that if the situation as it exists today does not change, you will spend all of those funds by the end of the fiscal year.

Enterprise

In PeopleSoft Time and Labor, all of the business units of the installation site.

Enterprise Performance Management (EPM)

See PeopleSoft Enterprise Performance Management

Enterprise Portal

The PeopleSoft Enterprise Portal is a separate product offering purchased independently of any other PeopleSoft applications. It can be used with or without any PeopleSoft application. It can be used as a standalone corporate portal that does not access PeopleSoft data at all.

Enterprise Resource Planning (ERP)

The encompassing term for all the transaction-oriented database applications an organization deploys across its business enterprise. The term includes financial, manufacturing and supply chain, human resources, and payroll applications, among others.

Enterprise Warehouse (EW)

See PeopleSoft Enterprise Warehouse

Entry Authority

Authorization granted by employees to specific user IDs for entering expense data on their behalf.

Entry Currency

The currency used to enter budget data.

Entry Event

An automated process that generates multiple debits and credits resulting from single transactions, to produce standard supplemental accounting entries.

Entry Event Code

Designation of an Entry Event; an identifier or label.

Entry Event Generator

A mechanism that generates standard, supplemental accounting entries based on Entry Event codes.

Entry Event Process

An accounting transaction. Entry Event processes combine to form Entry Events. For example, requisition posting is a Purchasing process, and cash clearing is a Payables process. Each process can involve one or several Entry Event Steps.

Entry Event Step

Part of an accounting transaction. For example, the BUDG process includes these steps, among others: prepare allotment budgets, prepare organization budgets, and prepare revenue estimates. Entry Event steps combine to form Entry Event processes.

Entry On Duty Date (EOD)

Date that indicates when an employee started to work at his/her current agency.

EPM (Enterprise Performance Management)

See PeopleSoft Enterprise Performance Management

Equal Employment Opportunity Commission (EEOC)

In the United States the EEOC requires that most companies file one or more reports from a series named EEO-1 through EEO-9. These reports include counts by federal employment categories of male and female employees in certain ethnic groups.

Equitization

A process that enables parent companies to calculate the net income of subsidiaries on a monthly basis and adjust that amount to increase the investment amount and equity income amount before performing consolidations. For organizations with complicated parent/subsidiary business unit relationships, this automated process reduces the process time and reduces the possibility for errors.

Equity Increase

In PeopleSoft Workforce Analytics, Equity Increases are base pay increases granted to bring an employee's pay up to some internally specified standard for your organization.

Equivalent Standard Deviation

In PeopleSoft Demand Planning, a **Standard Deviation** developed during the Model Reset process that enables you to compare standard deviations from different models. The deviation is calculated by multiplying the **Model Equivalency Factors** defined on the **Control Group** by the standard deviation.

ERISA (Employee Retirement Income Security Act of 1974)

The U.S. Federal legislation enacted to prevent abuses of employee pension rights by employers.

Error Exception

A transaction that is stopped because the budget limits would be exceeded if it continued. For the transaction to proceed, action must be taken, such as canceling or reducing the transaction amount, increasing the budget amount, overriding the budget limits, or transferring available funds from another budget.

Error Ratio

The ratio of the statistical Standard Deviation to the base component that gives an indication of the accuracy of the forecast. The ratio is presented in the PeopleSoft Demand Planning Audit and Accuracy Review and is calculated during the **Forecast Calculation Process**.

Estimated Gross

Estimated labor cost associated with reported time (see Managing Time, Understanding time Reporting Codes).

Ethnic Code

The Federal Office of Management and Budget (OMB) racial and ethnic census categories used for classifying individuals in U.S. Government reports.

ETL (Extract-Transform-Load)

See Extract-Transform-Load.

ETL maps

ETL maps provide rules for importing your source data to the data warehouse tables.

Evaluated Receipts Settlement (ERS)

A PeopleSoft Payables feature that matches receipts against purchase orders and generates vouchers without requiring an invoice.

Evaluations Periods

In PeopleSoft Demand Planning, indicates the number of future periods to use for the calculation of forecast errors. For example, if the number of evaluation periods is two, then

the forecast error in April 2001 (after posting demand for April) would be determined by comparing the actual demand for April and the April forecast generated in February 2001. Evaluation periods are set separately for each view.

Event

Events are predefined points either in the Application Processor flow or in the program flow. As each point is encountered, the event fires on each component, triggering any PeopleCode program associated with that component and that event. Examples of events are FieldChange, SavePreChange, OnRouteSubscription, and so on.

Event

Occurrence or happening.

Event Class

An event or type of event that results in a change of benefits eligibility for an employee or dependent. Event classes are prominently used in COBRA and Benefits Administration processing.

Event Maintenance

The process that enables you to manage ongoing enrollments during a plan year. Changes involving maintenance include new hires and re-hires, terminations, family status changes, and changes to benefits eligibility.

Event Rule

Used by PeopleSoft Benefits Administration to determine how events are processed by the system. Event rules look at the benefit plan options an employee is eligible for and determine which options the employee can actually *choose*. Event rules are closely associated with eligibility rules but it is important to note that they are not the same. Event rules *should not* be used to determine eligibility.

Event Trigger

You use triggers to tell the system that when a change takes place to certain data (an event), it should perform an action automatically. When the event occurs, the system writes a line to a trigger table. Then when it's time for the action, the system reads the data from the trigger table and performs the appropriate action.

EW (Enterprise Warehouse)

See PeopleSoft Enterprise Warehouse.

See also PeopleSoft Enterprise Performance Management (EPM).

Expected Losses

In the financial services industry, the amount the institution predicts it will lose in portfolio value. Loan loss reserves are set aside to cover the expected losses.

Excepted Service

As defined by 5 USC 2103, the Excepted Service consists of those civil service positions that are not in the competitive service or Senior Executive Service.

Exception

User or system delivered, defined conditions applied to scheduled, reported or payable time that require audit or review (see Time Management)

Exception Rules

A rule (s) that is applied to scheduled, reported time, and payable time in order to determine conditions which require audit or review (see Time Administration).

Exception Severity

The degree of importance associated with an exception. For example, in exception which is a result of an employee clocking in late may have a Medium severity, while an exception which is a result of an employee not clocking in has a High severity (see Time Management).

Exception Time Reporting

A method of time reporting where only differences to the schedule are provided (see Time Reporting).

Excess Plan

A pension plan where the benefit formula provides an increased benefit for Final Average Earnings above a specified integration level. This compensates for the fact that Social Security benefits are based only on earnings up to a specified maximum.

Exchange Rate Variance

In PeopleSoft Cost Management, the change in currency exchange rate between the time the item is received into inventory and vouchered in Payables.

In PeopleSoft Payables, a matching feature that compares the exchange rate on the purchase order and the invoice and then copies any variance to PeopleSoft Inventory tables for analysis and accounting purposes.

Exclusive Pricing

Supersedes all pricing structures in effect for customers and products, except **Buying Agreement**, and enables you to drive pricing with a promotional structure. Exclusive pricing can be set up for a specific time frame and associated with particular orders.

Executive Schedule (EX)

Compensation and pay plan used by the Executive Branch of the federal government. Statutory pay limits are derived from several of the pay levels within this plan and imposed on the General Schedule and other existing pay plans throughout the Federal government.

Exercisable

The option shares that are available to the optionee to exercise.

Exercise

The transaction in which an individual purchases or “exercises” the right to purchase the option shares. The IRS refers to the purchase of company stock in an employee stock purchase plan as an exercise.

Exercise Date

The date on which an individual purchases underlying shares from and option grant or transacts a simultaneous purchase and sale of underlying option shares through a cashless exercise and collects option profit in cash or shares.

Exercise Price

The price per share required to exercise a stock option.

Exercise Proceeds

Cash, stock or other recognition received by a company as a result of option exercises, including cash or stock paid by individuals to exercise options and cash company tax savings from deducting non-statutory option profits at exercise.

Expense Location

Geographic area defined to enable the recording, tracking, and reporting of expense activity.

Expense Location Amount

Authorized spending defined for an expense type in a particular expense location and currency.

Expense Location Group

Collection of expense locations based on a common classification such as state, country, or continent.

Expense Type

Means of itemizing various kinds of business expenses. Examples are hotel, dinner, or ground transportation.

Expense Type Edit

User-defined requirement that mandates input of additional data—such as an airline ticket number or number of nights in a hotel—when an expense type is selected in an expense report.

Expense Type Group

Expense types that are classified together for reporting and tracking.

Expiration

The process by which the outstanding shares of an option cease to be exercisable, generally at the end of the option term. The length of the option term and the date of expiration are established in the Grant Agreement.

Expiration Date

The last day of an option term in which the option is canceled and no longer exercisable.

Expiration Grace Period

When you enter a stock action allows the exercise of the already vested shares as of the action date, the system will calculate the date these shares expire based on the grace period defined on the Stock Action Rules page for that stock action. The system will automatically cancel vested shares not exercised at the end of the expiration grace period.

Expressions

Expressions enable you to create pseudo-columns made up of mathematical calculations based on actual fields on a table. Since expressions are resolved at run-time, duplicate information is not stored on the database.

External Data

Data from external sources. For instance, in PeopleSoft Workforce Analytics, external data may include third party salary surveys and benchmark metric surveys.

External Scheme

In the United Kingdom an External Scheme is a vocational training, education and job placement program involving an employee, an employer and the government.

External System

Any system that is not directly compiled with the PeopleTools servers.

Extra Time

Any hours worked outside of an employee's normal (scheduled/shift) hours or days. Extra time may be scheduled in advance of when it is worked, and may be subject to special compensation rules. It may be treated differently than standard time for purposes of Benefit Entitlement and Administration.

Extract-Transform-Load (ETL)

The extraction and transport of data from one server to another remote server. In PeopleSoft budgeting ETL specifically refers to the process by which financial and human resource data is extracted from PeopleSoft Financials and HRMS and transferred to the PeopleSoft Enterprise Warehouse which PeopleSoft Budgeting uses to access and record data transactions. Within PeopleSoft Enterprise Warehouse, data migration typically refers to information moved from outside sources into the Operational Data Store tables.

Extrinsic Rewards

Tangible rewards that can be given to the individual. Typically categorized as financial and non-financial rewards. Financial rewards would include direct compensation, indirect compensation and deferred compensation. Non-financial rewards are provided to the individually and viewed as a benefit by the individual based on the culture of the organization such as the size or location of one's office.

In PeopleSoft Workforce Analytics, tangible rewards given to an individual. Typically categorized as financial and non-financial rewards. Financial rewards would include direct compensation, indirect compensation and deferred compensation. Non-financial rewards are provided to the individually and viewed as a benefit by the individual based on the culture of the organization such as the size or location of one's office.

F***Fact***

Facts are numeric data values from fields from a source database as well as an analytic application. A fact can be anything you want to measure your business by, for example, revenue, actual, budget data, or sales numbers. A fact is stored on a fact table.

Fact Table

A fact table is where facts are stored in the PeopleSoft Enterprise Warehouse.

Fair Labor Standards Act (FLSA)

A federal regulation governing several time and labor issues. *FLSA Overtime* requires that all nonexempt employees be paid at a rate of time-and-one-half for all hours over 40 physically worked during a workweek. This requirement may be superseded by state or local laws when the lesser law is to the greater benefit of the employee, or by union contract. An *FLSA Workweek* is a permanently established, regular workweek for a group of employees.

Fair Market Value (FMV)

The price of a company stock based on the current market value as determined by supply and demand, or a valuation method. The stock market sets the fair market value for a public company. For a private company the fair market value is more subjective, but typically determined by financial factors or set by an outside valuation company.

Fair Market Value Tracking Methods

Methods used to track and report trading activity on various exchanges (i.e. NYSE, AMEX, NASDAQ, etc...).

Family Medical Leave Act (FMLA)

A federal regulation that protects health benefits and job restoration for employees who must take a leave from work to care for themselves or family members. FMLA regulations contain provisions regarding employer coverage, employee eligibility and entitlement, notice and certification, continuation of health benefits, and job restoration. PeopleSoft Benefits applications offer FMLA Plans that help employers and employees determine FMLA eligibility and schedule and track FMLA leave requests.

Federal Employee Group Life Insurance Program (FEGLI)

Generally, if the employee has Federal retirement coverage or is on a temporary appointment exceeding one year, he/she is eligible to participate in the FEGLI program. Once eligible, he/she is covered automatically for Basic Life Insurance and premiums will be deducted from gross salary unless coverage is waived within the first period of eligibility. The program offers Basic Insurance coverage and three types of optional coverage: Option A (Standard), Option B (Additional), and Option C (Family).

Federal Employee Pay Comparability Act (FEPCA)

This law provides a structure and methodology to determine and authorize locality-based pay adjustments to Federal employees in order to elevate their basic pay to be commensurate with private sector employees working in the same occupations in the same geographic localities. It also includes a feature to authorize agencies to make advance salary payments to attract candidates for open positions which have consistently been hard-to-fill in certain geographic areas.

Federal Employees' Compensation Act (FECA)

This law provides compensation and medical benefits to civilian employees of the United States for disability due to personal injury or disease sustained while in the performance of duty. A feature of this law provides for the continuation of pay (COP) without charge to leave for up to 45 calendar days due to disability and/or medical treatment following a traumatic injury. Employees file claims with the U.S. Department of Labor, Office of Worker's Compensation, which adjudicates the claims and compensates the employing agencies for the employee's pay and benefits during the claim period.

Federal Employees Health Benefits (FEHB)

Generally, the employee is entitled to coverage by the FEHB program if appointed to a position with Federal retirement coverage or has been on the rolls on a temporary appointment for more than one year. The Federal employer shares the cost of the premium (about 75%); actual premiums depend on the plan selected. If under a temporary appointment, the employee pays both the employer and employee shares. If the position is part-time, the employee pays the employee share and a portion of the employer's share.

Federal Employees Retirement System (FERS)

A retirement plan available to employees of the federal government. FERS covers all employees appointed to a position in the federal government after January 1, 1987. Coverage includes Social Security, a basic annuity plan, and a TSP.

Federal Employer Identification Number (EIN)

Used to identify the tax accounts of businesses. Businesses, which have employees or operate business as a partnership or corporation, must obtain an EIN.

Federal Insurance Compensation Act (FICA)

Employee and employer contributions to Social Security.

Federal Reserve Transit Number

A unique identifier for U.S.-based banks, allowing banks to transfer funds within the Federal Reserve system.

Feeder Line

A type of production line replenishment used in PeopleSoft Flow Production. If you are using feeder line replenishment, smaller production lines create subassemblies that feed directly to your production line.

FEGLI Living Benefits Act

Beginning 7/25/95, a Federal employee who is terminally ill may elect to receive a lump-sum payment equal to the full amount of basic life insurance only, or a limited portion designated in multiples of \$1000. An election to receive this benefit is irrevocable; the individual is considered terminally ill if his /her life expectancy is 9 months or less.

FICA (Federal Insurance Contributions Act)

FICA consists of both a Social Security (retirement) payroll tax and a Medicare (hospital insurance) tax. The tax is levied on employers, employees, and certain self-employed individuals.

Fictitious Calculations

Fictitious calculation rules perform temporary calculations. A fictitious calculation is a sub-calculation run during a normal calculation to determine a net that would have been computed if certain parameters were used. This result is then used for further processing in the normal calculation. A fictitious calculation is always started from inside a normal calculation, run for one payee, and run for a specified set of periods.

FIFO (First In First Out)

Method used by companies to record Disqualifying Disposition Income. If a company uses this method they record the optionees disposition of shares by attributing the shares to the earliest exercise, purchase or release dates for which shares remain available for sale.

Fill-In Employment

Employment held by persons during the time period after leaving their regular occupation in anticipation of, but before entering, military service.

Filter

A filter creates a subset of information. Filters are used in templates to limit your information from a pick list of attribute values.

Final Average Earnings (FAE)

The PeopleSoft Pension Administration function that averages earnings from a specified period of an employee's career. The result is used as a component of the pension benefit formula.

Final Forecast

The final forecast is the prorated version of the adjusted forecast, summarized to all levels of the product hierarchy. This is the best-guess version of the forecast that is used to make all decisions dependent on the forecast.

Final Table Merge Engine

Final Table Merge Engine is used by the PeopleSoft Enterprise Warehouse; it moves enriched data from one table into another. When you run a job in a jobstream, the immediate results are stored in temporary tables. At the end of the jobstream, the Merge Engine runs and merges the output temporary tables into the final tables, where processing can continue.

Financial Accounting

The accounting for a business entity's assets, liabilities, revenues, and expenses to determine its net worth and to produce financial statements. Within Generally Accepted Accounting Principles, a business has some latitude as to when and how to record its financial transactions, as long as it continues to meet its legal and regulatory requirements. A business' financial accounting requirements are not necessarily the same as its cost accounting requirements. The one should not be mistaken for the other (i.e. the extent to which a company's financial accounting system meets its cost accounting needs depends on how it has chosen to describe its chart of accounts and the level at which it has chosen to record financial transactions.

Financial Instrument

In the financial services industry, a specific product or service sold by a financial institution to its customers. In terms of the reporting hierarchy, a product falls under a ledger account, while an instrument falls under a product. A product may be treated like a generic description or category, while an instrument is a specific instance of a category.

Financial Performance Measures (FPM)

For the financial services industry, the Financial Performance Measures program performs calculations on financial instruments based on the rules defined in the Financial Calculation

Rules module, and using input from the Cash Flow Generator, Stratification engine, Product Pricing, and Curve Generator. Its calculations include: measures of duration, option-adjusted spread and option-adjusted cost for PeopleSoft Funds Transfer Pricing, and Monte Carlo simulation for PeopleSoft Asset Liability Management.

Financial Product

In the financial services industry, a product or service sold by a financial institution to its customers. In terms of the reporting hierarchy, a product falls under a ledger account, while an instrument falls under a product. A product may be treated like a generic description or category, while an instrument is a specific instance of a category.

Financial Services Instrument

In the financial services industry, products created by financial institutions and sold to retail customers. Product prices and interest rates are set by the financial institutions and take into account its customers' behavioral models.

Financial Statement Simulation

A facility within Planning & Simulation which establishes rules for simulating future period, or pro-forma, financial statements. The user defines corporate financial policies, such as corporate tax rates, dividend distribution frequency, and force balancing rules, which are then applied to cash flows for a given future accounting period. The Financial Statement Simulator engine drives costs and revenues to accounts on PF_LEDGER_F00 via a scenario.

Financials Warehouse

See Warehouses.

First Year Amount

See 1st Year Amount.

Fixed Basis

The basis option enables you to create the data for the Basis online, as part of the rule. Fixed Basis is used with the Allocation Manager only. It is available with all methods except when Period-Based Allocation is being used. The Fixed Basis is a predetermined table that can be populated online.

Fixed Offering

The offering type is fixed when the end date of each offering is the same for all employees regardless of the employee's grant dates.

Fixed Percentage

A fixed percentage value. The source pool amount will be split based on this percentage to get the target amount. Used with the Allocation Manager.

Fixed Period Requirements

In PeopleSoft Enterprise Planning and Production Planning, a lot-sizing technique that sets the order quantity to the demand for a given length of time.

Fixed Plan

A stock purchase offering period where the ending offering date will be the same as the purchase date. Eligible employees will always purchase stock on the specific purchase dates and by the purchase rules you define.

Fixed Quantity

An **Inventory Policy** method that defines a fixed amount of an item to be ordered to meet replenishment needs. This method can be selected as an inventory policy for order quantity, safety stock, **Reorder Point**, and minimum and maximum parameters.

Fixed Source

The fixed source option enables you to create the data for the Source online, as part of the rule. Fixed Source is used with the Allocation Manager only. It is available with all methods except when Period-Based Allocation is being used. The Fixed Source is a predetermined table that can be populated online.

Flexible Credit

Any credit associated with a given benefits program, plan, or type of coverage. Credits based on an entire program can be applied toward the benefit costs however the employee chooses.

Flexible Hours

Hours during the workday, workweek or pay period during which a time reporter covered by a flexible work schedule may choose to vary his times of arrival and departure from the worksite (see Scheduling)

Flexible Spending Account (FSA)

An account to which an employee and (optionally) an employer pledge an annual amount for a plan year. The employee then submits claims for authorized expenses.

Flexible TimeSpan

A user-defined period into which costs can be collected. Flexible TimeSpans can be as long or as short as you like—covering multiple years or a single day. The main purpose of Flexible TimeSpans is to assist you in analyzing costs.

Flexible Work Schedule

A method of scheduling a time reporter's time that is based on a range of flex hours of start and stop times and core work hours. This method can be used for scheduling clock and elapsed time reporters (see Scheduling)

FLSA Status

A PeopleSoft Human Resources term that is used to indicate whether a job is exempt or nonexempt according to the Fair Labor Standards Act. All employees associated with a particular job will receive that job's FLSA Status. FLSA Status is an eligibility determination factor for PeopleSoft Benefits Administration.

Forecast Attribution

A FSI (financial services industry) transformation process through which forecasted product originations are pooled and run through the cash flow engine for future periods.

Forecast Calculation Process

In PeopleSoft Demand Planning, the process by which a **Statistical Forecast** is generated for each item at each level of the view. When a **Forecast Item** is set to recalculate, the system tries several forecast calculation methods and picks the one with the least amount of error. This process also makes adjustments for promotions and filters for abnormal demand.

Forecast Definition

Forecast definitions are a set of forecasting rules that generally govern multiple forecasts distinguished by key properties such as products, customers, channels, and so forth.

Forecast Element

Each forecast within a single definition is called a Forecast Element.

Forecast Fulfillment

In PeopleSoft Demand Planning, a process used to manage forecasted demand over a period of time. The process makes it possible to divide the total forecast demand into portions so that certain portions can be met, even if the total forecast cannot be met entirely.

Forecast Item

In PeopleSoft Demand Planning, a logical item used as the basis to forecast demand. The components of a forecast item key are defined for each level in a forecast view.

Forecast Period

A period in time as defined by the calendar for which data is processed through the PeopleSoft Demand Planning model.

Forecast Start Period/Year

Determines the most recent period for which demand data is available for a forecast view. This period can also be described as the last actual demand period to have had an impact on the forecast.

Forecast View

See **View**.

Foreign Education

Education acquired outside of any state of the U.S., the District of Columbia, the Commonwealth of Puerto Rico, a Trust Territory of the Pacific Islands, or any territory or possession of the U.S.

Form 10-K

A form used for annual reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for which no other form is prescribed.

Form 10-Q

A form used for quarterly reports under Section 13 or 15(d) of the Securities Exchange Act of 1934, filed pursuant to Rules 13a-13 or Rule 15d-13. This report, which public companies are required to file quarterly with the SEC, provides unaudited financial information and other selected material.

Form 5500 Participant Count Extract

A PeopleSoft Pension Administration data extract containing data that a plan administrator needs in order to complete IRS Form 5500, used to report on the number of plan participants.

Form S-8

A form used to register securities offered by a reporting company under its employee benefits plans, including stock option plans. Also called the Registration Statement under the Securities Act of 1933.

Form W-2

A form used by employers to provide workers with a statement of wages, tips and other compensation from the previous year. This form, distributed employees by January 31 of each year, reflects state and federal taxes, social security, Medicare wages, and tips withheld.

Formula

Element which enables you to define your own formulas for use—gives further flexibility to define complex organizational needs.

Formula Plan

This compensation distribution plan type is based on a pay out rule, as the pay out rule is defined. The pay out rule can be based on a flat amount, a percentage, or a data element. Whereas a Target Plan distributes pay out based on a comparison of a performance measure against a target, in a Formula Plan the pay out is based just on the pay out rule.

French Professional Elections

French companies employing a certain number of employees must hold elections for selecting personnel representatives (Délégués du personnel), and members of the Work Council (Comité d'Enterprise).

Frozen Rate

A rate that is applied to allocate resources to activities in place of the actual, budgeted and capacity rates calculated by the Activity-Based Management (ABM) Engine.

FTE (Full Time Equivalency)

FTE is the percent of full time the employee should normally work in this job. Full time is defined by the Standard Hours specified in either the Salary Plan Table or the Default Standard Hours specified in the Installation Table.

FTP (Funds Transfer Pricing) Adjustments

Adjustments made to the PeopleSoft Funds Transfer Pricing (FTP) base rate, for such factors as geographic premiums, liquidity premiums, embedded options, or incentive programs.

FTP (Funds Transfer Pricing) Base Rate

In PeopleSoft Funds Transfer Pricing (FTP), this refers to the basic charge or credit that is applied to a ledger account, a product, or an off-balance sheet position.

FTP (Funds Transfer Pricing)

See PeopleSoft Funds Transfer Pricing.

Full-Time Equivalent

See FTE.

Function

A category of pension calculation. PeopleSoft Pension Administration divides a pension calculation into nineteen “core functions” such as Service, Final Average Earnings, and Benefit Formula.

Function Result

The calculation rules for any of PeopleSoft Pension Administration’s nineteen core functions. These rules match Definitions—the specific parameters for the function—to the Groups of employees that use that particular definition. Function Result also refers to the value produced by the rules.

Fund ID

In the financial services industry, Fund ID is a lookup code used to track investment funds associated with a financial instrument or account. Provided primarily by the financial analytic applications to track investment funds for insurance policies.

Funds Transfer Pricing (FTP)

See PeopleSoft Funds Transfer Pricing.

Fungible

This term describes a resource used for multiple activities.

Future Period

Any pay period which is not current and whose close date hasn't passed (see Time Reporting).

Future Periods

The number of periods of future forecasts maintained by the PeopleSoft Demand Planning system.

G**Gang Reporting**

See Crew Reporting.

General Deduction

Any non-benefit deduction. Examples include charitable deductions, union dues, parking, garnishments, and bonds. General Deductions are calculated from the General Deduction Table; Benefit Deductions draw on one of the benefits tables.

General Ledger Distribution

The process and guidelines by which accounting information is transferred from your PeopleSoft Receivables or Deduction Management system to a general ledger system.

General Schedule (GS)

Compensation and pay plan used by the Executive Branch of the federal government.

Generation Control

Generation control elements allow you to indicate to the system whether to process an element based upon criteria you define. There are six parameters that control this function and comprise the definition of the generation control element—HR Status, HR Action/Reason, Segment Status, Frequency, Formula, and Run Types.

Generic Conversion Factor

A conversion factor that applies universally between two units of measure. The factor is used in the conversions between levels of PeopleSoft Demand Planning **Forecast Items** and Inventory Planning **Policy Item**.

Generic Process Type

This term applies to Process Scheduler. Process types are identified by a generic process type. For example, the generic process type "SQR" includes all SQR process types, such as "SQR Process," "SQR Report," and so on.

Geo RSZ Code

This code is for Belgian employers to track the geographical location for RSZ codes.

Geographic Location Code

In Canada this code is prescribed by the government and refers to the location a business is in.

Giveaway Adjustment Type

In PeopleSoft Order Management, the price break tables are set up to indicate what product the user receives as a free premium based on defined quantities or prices. The giveaway item does not have to be the same product that the customer is purchasing. For instance, you may set up a price break that indicates that a purchase of 100 widgets entitles the customer to one or more free T-shirts. The system automatically adds an order line for the free item. Giveaways cannot be applied to the total order.

Goals Matrix

In PeopleSoft Workforce Analytics, a matrix used to create calculation rules for group or employee performance goals. You can combine and standardize multiple performance goals into a single, weighted, goal score, against which actual performance is compared. A Goals Matrix can be used to in conjunction with a pay out distribution plan called a Target Plan.

Grace Period

A period that is a number of hours or minutes before or after a scheduled punch where a time reporter's punch is accepted. For Stock Administration, the period of time an optionee has to exercise an option after termination and before the option expires.

Grade

A range of pay in a graduated scale that includes positions of different occupational groups. The work performed should be equivalent as to the level of difficulty and responsibility and the level of qualification requirements of the work. The levels are established and designated within a specific pay plan by law or regulation.

Graduate Education

Successfully completed education in a graduate program for which a bachelor's or higher degree is normally required for admission. To be creditable, such education must show evidence of progress through a set curriculum, i.e., it is part of a program leading to a master's or higher degree, and not education consisting of undergraduate and/or continuing education courses that do not lead to an advanced degree.

Grandfathered Benefit

A benefit that an employee was entitled to prior to a change in the plan and that defines the employee's new minimum level of benefits. The change might be caused by a plan merger, new legislation, or a plan amendment.

Grant

A contractual right giving an individual the option to purchase a specified number of shares of stock through an Equity Compensation Plan. Also known as an option.

Grant Agreement

The legal document issued by a company defining the number of shares granted, grant price, vesting schedule and other terms and conditions of the stock option or stock award.

Grant Date

The date the individual begins participating in a stock purchase offering. The date on which an option or other award is granted. The date the company enters into the grant agreement. The underlying stock's fair market value on this date generally derives the option price.

Grant Price

The price per share at which the stock option was granted. This is the price per share the individual must pay when exercising the option.

Gross Salary

The sum of an employee's salary and earnings defined as part of gross salary. The gross salary is used to calculate budget amounts for benefit plans defined as a percentage of an employee's salary.

Gross-up

The process used to calculate taxes and resultant gross pay from a check for an exact net amount.

Group

Any set of records associated under a single name or variable in order to run various calculations in PeopleSoft Business Processes. In Time and Labor, for example, employees are placed in groups for time reporting purposes, while in Administer Variable Compensation, groups identify which employees are eligible for what forms of compensation. In PeopleSoft

Pension Administration, you'll use Custom Statements to define criteria for grouping employees, then by associating calculation rules (Definitions) with specific Groups, you can vary rules for different classes of employees.

Group Asset

A financial asset with no cost information. It is used to depreciate the sum of the costs of its associated group member assets.

Group Asset Depreciation

The depreciation of a group asset calculated using an average service life set by a local regulatory agency and a calculated group depreciation rate.

Group Coverage (Or Generic) Qualification Standards

Standards prescribed for groups of occupational series that have a common pattern of education, experience, and/or other requirements.

Group Member Asset

A financial asset with cost information. Cost information for all group members of a group asset is summed up to the group asset level, where depreciation is calculated.

Group Security

The ability to grant or deny access to groups. You can set up group security by Group ID or by user ID.

Group Security [Time and Labor]

The ability to grant access to employee time, by providing security through Time and Labor's groups functionality. For example, you might want your employees to only access their own records, or allow your supervisors who handle all of the time input for have access to specific groups. You can restrict the user from accessing everyone, or allow the user to be able to access only their own records, or only a specific group. This feature also provides the ability for employees to report their own time.

H

Handicap Code

A code that identifies a type of physical or mental impairment that substantially limits one or more of an employee's major life activities.

Headcount

The number of people represented by a given Employee Survey record in the PeopleSoft Enterprise Performance Management product line.

Health and Safety Executive (HSE)

Health and Safety reporting for your UK operations is sent to the local office of the HSE per the requirements of the RIDDOR (Reporting of Injuries, Diseases, and Dangerous Occurrences Regulations).

Health Benefits Code

An alpha/numeric code that identifies each Health Benefit plan.

Health Benefits Effective Date

Date the health benefit plan goes into effect or the effective date of cancellation.

Hierarchy

Hierarchy refers to the relationship between the levels in a dimension.

Highly Compensated Employee (HCE)

An IRS employee category applied to employees who are considered “highly compensated” according to a federally set standard. This distinction is used for the purposes of nondiscrimination tests, to determine that Section 401 and Section 129 plans do not discriminate in favor of highly compensated employees.

HIPAA

The Health Insurance Portability and Accountability Act of 1996. PeopleSoft Benefits applications enable you to comply with this act, which requires that employers provide Certificates of Group Health Plan Coverage to employees who have their health coverage terminated. This certificate lists group health coverage an employee had for the twelve month period prior to the date coverage ended as a result of termination of coverage. The HIPAA certificate will be used by subsequent health coverage carriers to evaluate pre-existing condition clauses, if applicable.

Historical Periods

In PeopleSoft Demand Planning, a component that indicates the maximum number of periods of historical demand maintained for a **Forecast Item** within a **Forecast View**. Historical periods must be a minimum of two years in order to support the development of seasonal models based on an item’s demand history.

Historical Rules

An element used to set up rules that retrieve data from prior periods. Historical rules can be used in formulas and fictitious calculations.

Historical Usage Calculation Method

In PeopleSoft Inventory Planning, a method that defines the set safety stock or minimum inventory level. The usage is based on the review of historical demand over the number of effective periods. The historical demand quantity is determined by one of four methods;

maximum possible usage, Lead Time, estimated daily or period use, and static values calculations.

Hold Grade/Step

Grade/step the employee was in prior to receiving a temporary promotion.

Hold Last Equivalent Increase (LEI)

Date held by an employee for this event prior to receiving a temporary promotion. Necessary in order to establish the WGI due date if returning to original grade/step.

Hold Position Description

The new position description number that is the result of a reclassification action prior to the NOA being processed.

Hold Purchase

A flag that tells the system to keep this participant in the purchase process. The hold flag is maintained at the contribution page.

Hold Within Grade Increase (WGI) Due Date

WGI due date prior to an employee receiving a temporary promotion.

Holding Period

Typically refers to the holding period required for ISO's and Qualified Section 423 Purchase Plans, to receive preferential tax treatment on a disposition of shares. See Disqualifying Disposition.

Homepage

A personalized page that presents relevant content to the user in a web top paradigm. The layout and content of the homepage can be configured by the user to efficiently present the most critical information required to effectively complete their tasks.

Homepage Pagelet

A Homepage Pagelet is a pagelet that can appear on a user's homepage.

Hours Counting Service

A service calculation that uses actual or generated hours to determine the service credited to a pension plan participant.

Hours Equivalence Service

A service calculation that uses hours to determine service, but that uses a set number of hours per day, week, or other period worked rather than counting actual hours.

HR Action/Reason Category

A group of related job actions—for example, hire and rehire—treated similarly for pension purposes in PeopleSoft Pension Administration.

HRMS Warehouse

See Warehouses.

I***Ignore Plan***

Complex event processing feature of PeopleSoft Benefits Administration that enables the user to designate plan types linked to a particular Event Rules/Event Classification combination as being unaffected by Benefits Administration processing.

Imputed Income

Theoretical income that a company pays on behalf of an employee but the individual does not actually receive. This “theoretical income” must be added to the employee’s gross wages. In general, imputed income refers to the value of excess Group Term Life or Dependent Life coverage.

In Punch

Indicates start of a shift.

In the Money Option

When the fair market value of the stock is greater than the grant price of an option.

INAIL code

In Italy, the INAIL code is used to classify jobs according to the level of risk associated with the job and the related risk insurance required by the employer. INAIL codes are defined by the employer.

Incentive Pay Plans

In PeopleSoft Workforce Analytics, pay plans that are formula-driven based on the expected results defined at the beginning of a performance cycle. Incentive plans are designed for the individual worker, or for group levels such as teams, business units, divisions, or company-wide. Incentive plans are used for a variety of reasons; including cost control, alignment of employee and shareholder interests, and increased focus on specific performance indicators.

Incentive Plans

Pay plans that are formula-driven based on the expected results defined at the beginning of a performance cycle. Incentive plans can be designed for the individual worker or at group levels such as teams, business units, divisions or company wide.

Incentive Stock Option (ISO)

For an option to be considered an Incentive Stock Option, it must have the following characteristics:

- The option must be granted pursuant to a plan which includes the aggregate number of shares which may be issued under options and the employees (or class of employees) eligible to receive options, and which is approved by the stockholders of the granting corporation within 12 months before or after the date such plan is adopted;
- The option must be granted within 10 years from the date such plan is adopted, or the date such plan is approved by stockholders, whichever is earlier;
- The option is not exercisable after the expiration of 10 years from the date such option is granted;
- The option price is not less than the fair market value of the stock at the time such option is granted;
- The option is not transferable by such individual otherwise than by will or the laws of descent and distribution, and is exercisable, during his lifetime, only by him, and;
- The optionee, at the time the option is granted, does not own stock possessing more than 10% of the total combined voting power of all classes of stock of the employer corporation or of its parent or subsidiary corporation.

Incomplete Punch

A punch that cannot be processed (i.e. missing employee ID, invalid date or time).

Incremental Budgeting

A budgeting option during budget development that uses prior year actual or budget values as a basis and then applies a percentage that increments the base. PeopleSoft Budgeting-specific.

Incumbent

An employee currently assigned to a position.

Indirect Compensation

Typically involves non-cash types of compensation awarded to the individual in exchange for their contribution to the organization. Common types of indirect pay include health and welfare benefits (for example, medical, dental, vision, long-term disability, short-term disability, unemployment insurance), payment for time not worked (for example, holiday,

vacation, sick), and employee services and perquisites (for example, club memberships, parking, holiday gifts).

Indirect Cost

A cost that is assigned by management to an activity or a cost object. An example is the cost of office space assigned to an activity.

Individual Occupational Requirements

Requirements, e.g., experience or education, for particular occupational series of positions within a series and are used in conjunction with a group coverage (generic) standard.

Individual Retirement Record (IRR)

Used by the Office of Personnel Management (OPM) as the basic record for determining the retirement benefits payable to separated federal employees and their survivors. Employees covered by the CSRS retirement plan require SF-2806. Employees covered by the FERS retirement plan require SF-3100. In addition, the SF-2806-1 and SF-3101 are used for corrections to the IRR. See also Correction to IRR.

Inherit Control Group Policies

In PeopleSoft Inventory Planning, a feature that controls whether the policy for an item is set explicitly or defaults from the associated **Policy Control Group**. A series of check boxes enable you to define which policies to inherit.

Initial COBRA Events

The event which makes an individual eligible for COBRA coverage. Typical initial COBRA events include loss of benefits eligibility due to termination, reduction in hours, retirement, and military leave, as well as divorce, death of employee, and Medicare entitlement. See COBRA and Secondary COBRA Events.

INSEE (National Institute for Statistical and Economical Studies) Codes

INSEE is an official statistics and economics organization in France. INSEE codes for your French company's organizations are used in regulatory reporting.

INSEE PCS (Classification par Catégorie Socio-Professionnelle) Code

Each PeopleSoft Human Resources French Jobcode is linked to a four-digit INSEE PCS, or social/professional classification code.

In-Service Date

In PeopleSoft Asset Management, the date upon which an asset is placed in service. In-service date is used in conjunction with an asset's prorate convention to determine Begin Depr Date.

Inservice Placement

Includes a noncompetitive action in which a position is filled with a current or former competitive service employee through promotion, reassignment, change to lower grade, transfer, reinstatement, reemployment, or restorations. Inservice placement also includes noncompetitive conversion of appointees whose Federal excepted positions are brought into the competitive service under Title 5 CFR 316.702, and Department of Defense/Nonappropriated Fund (DOD/NAF) and Coast Guard NAF employees whose positions are brought into the competitive service.

Insider

An officer, director or principal shareholder of a publicly owned company and members of his or her immediate family. This category may also include other employees of the company and people who obtain nonpublic information about the company.

Insider Trading

When a person trades a security while in possession of material non-public information in violation of a duty to withhold the information or refrain from trading. The securities law broadly prohibits fraudulent activities of any kind in connection with the offer, purchase, or sale of securities.

Instance

A row of data on the Positive Input table. Instances of positive input can be entered manually, or can be system generated. They can also be received from other applications, such as PeopleSoft Time and Labor.

Integration Level

The salary level in a defined benefit excess plan at which a higher benefit rate becomes applicable. For example, the following formula uses a \$10,000 integration level: 1% of Final Average Earnings up to \$10,000 plus 1.75% of Final Average Earnings over \$10,000.

Integration Template

A high-level template that defines the integration between PeopleSoft Projects and your other financial applications. Each integration template you create defines a specific set of business units from your other financial applications. Each project is then assigned an integration template containing this preset integration information. You can use Integration Templates to set up joint ventures, and new transactions added to that project will reflect the business units defined in the integration template.

Intensity

The cost for each unit of the activity driver.

Interest

Some companies pay interest on the monies that are being withheld from employees' paychecks. The interest plus the employees' stock purchase contributions are used to purchase stock at the end of the purchase period.

Interest Rate Modeling

An FSI feature that allows you to model interactively interest rate scenarios for Asset Liability Management, and to run rate scenarios and analysis in real time.

Interest Rate Sensitivity Model

In the financial services industry, this support module describes in granular terms how a group of customers holding a specific type of instrument with a particular interest rate will respond to changes in interest rates in the market.

Interface Loader

An SQR delivered with PeopleSoft Asset Management that is used to transfer load lines into the PeopleSoft Asset Management loader tables.

Internal Data

Data from PeopleSoft ERP systems, or other legacy ERP systems used by your organization.

Interpolation

To calculate a value of a function, or series, between two known values.

Interunit Account

The account for each business unit to which other business units in the same corporation refer when they need to distribute amounts across business units. These accounts are used to keep the individual ledgers in balance when a single transaction affects multiple business units.

Inter-Unit Drivers

Drivers that provide a means of establishing relationships between the cost objects of one organization with the supporting activities of the organizations that share business units and models.

Interunit Transaction

A transaction that involves moving amounts from an account in one PeopleSoft General Ledger business unit to an account in another General Ledger business unit.

InterUnit Transfer

A transfer that occurs between different business units.

IntraUnit Transfer

A transfer that occurs within one business unit.

Intrinsic Rewards

A reward that is generated by the worker internally such as job satisfaction, as opposed to Extrinsic Rewards which are tangible rewards.

Inventory Adjustment

A process that enables you to change the quantity of an item in the inventory system to match the actual physical quantity found in the **Storage Location**.

Inventory Business Unit

Usually a warehouse. You establish a separate inventory business unit (IBU) for any one of the following reasons: 1) You want on hand visibility to a specific location of your business that manages inventory. 2) You want to define replenishment rules for a specific location of your business that manages inventory. 3) You maintain standard and average costs in a specific location of your business that manages inventory.

Inventory Cost Element

A cost that can be associated with inventory items and inventory transactions. Examples include freight, overhead, and transportation. Each cost element has a unique cost code.

Inventory Item

A tangible commodity that is stored in an Inventory business unit (Ship From warehouse).

Inventory Location

See **Storage Location**.

Inventory Policy

In PeopleSoft Inventory Planning, a set of rules that controls how inventory policy values are calculated for items. Inventory policy is defined at the **Policy Control Group** and stockkeeping-unit levels. The elements that make up inventory policy are order quantity, safety stock, **Reorder Point**, and minimum and maximum policies.

Inventory Transaction

An event that moves inventory into, within, or out of the inventory business unit. Examples include material transfers, inventory adjustments, and standard issues.

Inventory Transaction Group

An identifier that categorizes transactions by type for costing purposes. For example, you can group all types of interunit transfers together.

Invoice Format Identifier

An identifier for the formatting options that determine the sorting and summarization levels of invoice information.

IRC 423 (Internal Revenue Code 423)

The section of the IRC that defines a Qualified Employee Stock Purchase Plan.

IRR Fiscal Data Accumulation

This report accumulates all retirement deductions for employees, as well as any LWOP and any basic pay that was received when an employee was not covered by the CSRS or FERS retirement plans.

IRR Remarks

Special remarks that are documented on an employee's IRR. IRR Remarks can be set up ahead of time and can be system-entered text or employee-specific.

IRR Status

IRRs can be in pending or final status. Those in pending status can be updated and corrected. A final status indicates that the IRR has been processed and can't be updated or corrected except through a Correction IRR or a Supplemental IRR.

IRR Worksheet

A preliminary IRR form that enables an agency to print a pending IRR for a separated employee, review it and make corrections, if necessary. Agencies can also use the IRR Worksheet to view a current IRR for an active employee.

ISO IRS \$100K Limit

The limit the IRS places on the exercisable value of Incentive Stock Options (ISOs) of \$100K per calendar year based upon the fair market value at the time of grant (Section 422 of the Internal Revenue code).

ISO to NQ Grace Period

The period of time after which an Incentive Stock Option is treated as a Non-Qualified Stock Option for tax purposes upon the termination of employment according to Internal Revenue Code Sections 421 and 422. Depending on the termination reason the option is treated:

- If the termination reason is for any reason other than death or disability, and an exercise occurs more than three months from the termination date, the system withholds taxes as if the option is a non-qualified stock option.
- If the termination reason is disability, the system withholds taxes if an exercise occurs more than twelve months from the termination date.
- If the termination reason is death, the system always treats the option as an ISO.

Issuer

A legal entity that has the power to issue and distribute a security.

Item

See **Inventory Item Planning Item** or **Receivables Item**.

Item Rounding Rules

A set of rules determining how fractional values are rounded so that calculations result in whole numbers. Rounding rules are used in conjunction with **Quantity Precision Rules**.

Item Simulation

In PeopleSoft Demand Planning, a process that enables you to interact with the forecast in a manageable manner and perform "what-if" analysis by comparing the effects of different forecast models.

Item-Specific Conversion Factor

A conversion between the same two units of measure when the measurements have a different value for an item. For example, a conversion between packaging unit and stocking unit.

Iterative Processing

Refers to a concept on only re-calculating those payees who have had changes and need to be recalculated (if you choose to run your payroll multiple times before actually finalizing it). This concept saves you a lot of time as you only have to recalculate those payees who have had a data change or who you indicate you would like to be recalculated.

J***Java Server Handlers (JSH)***

The JSH manages network connectivity, making service requests from the Jolt Repository, and translating Tuxedo buffer data into the Jolt buffer.

Java Station Listeners (JSL)

The JSL handles the work of the client connection, tracking client messages, and session handoff.

Job Code

An ID for a job as defined on the Job Code table.

Job Code Components

The pay components assigned to a job code by associating rate codes with job codes on the Default Compensation page or the Non-Base Compensation page of the Job Code table.

Job Code Cost

Evaluation of salaries for specific job codes.

Job Compensation Rate

The compensation rate of the corresponding job row.

Job Events

Actions relevant to an employee's employment—such as a hire, transfer, or termination—that can affect benefit program or plan eligibility. Used by PeopleSoft Benefits Administration. See Event Class.

Job Order Cost Accounting

A cost accounting method that attempts to develop a discrete cost for each job performed or product produced. Only the material, labor, and overhead required to complete the job are attributed to the job cost.

Joint and Survivor Payment Option

A form of pension payment in which benefits are paid for the life of the participant and a beneficiary. Should the beneficiary outlive the participant, the benefit continues (often in a reduced amount) for the life of the beneficiary.

Joint Staffing Report

In the United Kingdom governmental agencies are required submit the Joint Staffing Report. Although it is mainly designed for government sector organizations, commercial organizations may also use this SQR to provide a summary of their staffing by department, job code, gender and full/part time employment status.

Jolt

A BEA/Tuxedo companion product that runs on an application server domain and is used to listen for Web Client Java requests and transfer them to Tuxedo.

Journal Code

The second highest level of three categories for defining a financial transaction (or document), necessary when using document sequencing. Examples of journal code are domestic sales and export sales. This category is preceded by journal type and followed by document type.

Journal Generator Template

A table containing defaults to be used in journal generation. PeopleSoft Asset Management and Billing require one journal generator template for each transaction type.

Journal Line

A record storing a double-sided, balanced entry for a given journal. A single journal usually includes multiple lines. The sum of the monetary amounts for the journal lines in one journal totals zero (debits = credits).

Journal Template

A list of the characteristics of the general ledger journal entries that will be created from your PeopleSoft Receivables system.

Journal Type

The highest level of three categories for defining a financial transaction (or document), necessary when using document sequencing. Examples of journal types are sales journal and purchase journal. This category is followed by journal code, then document type within the journal code.

Journal Voucher

A PeopleSoft Payables voucher that enables you to make accounting entry modifications while keeping your PeopleSoft General Ledger and Payables systems in sync. Like the adjustment voucher, the journal voucher is linked to an existing voucher.

K***Kanban ID***

A unique identifier used to track Kanban cards and replenishment requests when using PeopleSoft Flow Production.

Keep Ledgers in Sync

An option in PeopleSoft General Ledger that defines how a transaction should be posted—to all ledgers in a ledger group as opposed to only a single specified ledger.

Key

One or more fields that uniquely identify each row in a table. Some tables contain only one field as the key, while others require a combination.

Key Performance Indicator (KPI)

KPI is used by the PeopleSoft Performance Management analytical applications. KPIs are high-level measurements of how well an organization is doing in achieving critical success

factors. A KPI defines the data value or calculation from the Data Warehouse tables upon which an assessment is determined.

KPI (Key Performance Indicator)

See Key Performance Indicator.

Knowledge, Skills, And Abilities (KSA)

Also known as Competencies, these are attributes required to perform a job and are generally demonstrated through qualifying experience, education, or training. *Knowledge* is a body of information applied directly to the performance of a function. *Skill* is an observable competence to perform a learned psychomotor act. *Ability* is competence to perform an observable behavior or a behavior that results in an observable product.

L

Labor Costs

Actual expenditures associated with *salary* portion of time reporter expense.

Labor Dilution

A process that occurs after the Labor Distribution process in PeopleSoft Time and Labor. The labor dilution process takes the costs that the payroll system has calculated for payable time, determines an average or rate per hour, and applies the average amount evenly across all reported hours for the day.

Labor Distribution

The process of distributing payroll expense to the corresponding payable time entries generated in PeopleSoft Time and Labor.

Labor Distribution Amount

An actual labor cost associated with reported time.

Last Equivalent Increase (LEI)

Reflects the effective date of the last step received in grade or the last promotion, whichever is most current (does not include QSI). Used as the basis to establish an employee's WGI due date.

Law Enforcement Officers (LEOs)

Positions within the Federal government involving law enforcement. Under FEPCA, many of these positions are entitled to additional special pays.

Lead-Time Estimated Usage

An inventory planning method for calculating historical usage of an item. The historical demand is prorated on a daily basis and then multiplied by the number of days lead time for each effective historical period. The maximum period value is then used as the safety stock or minimum stock level. This method should be used for items that have a steady demand pattern throughout each period.

Lead-Time Period Usage

An inventory planning method for calculating historical usage of an item. The purchase lead time is rounded up to a specified number of periods. The historical demand is calculated as the maximum usage during these periods and the safety stock or minimum-stock level is set to this value.

Leave

Time entitled to an employee as a benefit, such as, Sick, Vacation, STD, and LTD. This process is managed by HRMS (see Time Reporting).

Leave Accrual Processing

Processing of leave accruals is used to maintain employee leave balances. All leave benefit plans accrue leave by length of service or number of hours worked. Leave accrual processing is used to determine the employee's leave accrual award and resulting leave balance.

Leave Accruals

Hours that employees earn to use at another time, such as annual leave and sick leave.

Leave Plan

A method for earning and managing leave time.

Leave Without Pay (LWOP) Total (Cumulative)

An employee's cumulative number of hours of leave without pay (LWOP).

Ledger Group

In PeopleSoft General Ledger, a group of ledgers consisting of one primary ledger and secondary ledgers.

Ledger Mapping

Ledger mapping is a process that enables you to relate expense data from your general ledger accounts to resource objects. Multiple ledger line items can be mapped to one or more resource IDs. You can also use ledger mapping to map dollar amounts (referred to as rates) to business units. You can map the amounts in two different ways: an actual amount that represents actual costs of the accounting period, or a budgeted amount that can be used to calculate the capacity rates as well as budgeted model results. In the PeopleSoft Enterprise

Warehouse (EW), Ledger Mapping enables you to map general ledger accounts to the EW Ledger table.

Ledger Template

A table containing records and fields common to all ledgers that ensures that all ledgers specified in a ledger group share the same physical layout.

Ledger Type

The unique combination of a single ledger, scenario, and fiscal year. Multiple ledger types make up a ledger type set.

Ledger Type Set

A collection of ledger types, the members of which will represent the members of your ledger type dimension.

Legend ID

A way of recording information that is displayed upon the Issuance Instruction Report. Can be used to record a notice that should appear on the back of a stock certificate indicating that the shares represented are "Restricted Securities." Can also be used to indicate how shares should be processed, as in the case of Swaps, Trades, Repurchases and SAR Exercises.

Level

A section of a tree that organizes groups of nodes.

Defines a set of **Forecast Item** with a common key structure. Each level is related in a hierarchical definition with other levels in the view. A level definition contains descriptive and control data that relates to the operation of the forecast at each level within the view.

Level

The section of a tree that organizes groups of nodes.

Level Income Payment Option

An annuity form of pension payment in which payments are increased in early years (prior to eligibility for Social Security benefits) and decreased in later years when Social Security benefits are also received. The goal is to provide a relatively constant total retirement income both before and after Social Security eligibility.

Life Profile

In PeopleSoft Demand Planning, a feature that enables you to establish product forecasts based on predefined patterns in an item's life cycle.

Lifecycle (of Reported Time)

A representation of time through the various stages of Time and Labor; includes processing of current, future, and previous period time from scheduling and time capture through Time Administration and distribution.

LIFO (Last In First Out)

Method used by companies to record Disqualifying Disposition Income. If a company uses this method they record the optionees disposition of shares by attributing the shares to the most recent exercise, purchase or release dates for which shares remain available for sale.

Line-Item Budgets

The budget amounts associated with ChartField distributions that make up an organization's budget. Line-item budgets include personnel costs as well as operating and maintenance costs. They also include revenue estimates. PeopleSoft Budgeting-specific.

Line Schedule Editor (LSE)

PeopleSoft Production Planning utility or tool that displays production tasks for multiple products on multiple resources across multiple periods of time.

Literal Mapping

In PeopleSoft Demand Planning, a mapping option for formatting data that is common to all records being imported. This enables you to set an available field value for all the loaded rows.

Load

The feature that initiates a process to automatically load information into a PeopleSoft application—for example, populating the PeopleSoft Benefits database with plan-level election information.

Load Activation

Load Activation enables you to specify exactly which part of your Data Mart to build, including security. You set up load activation on the Load Activation page.

Loader Table

Any table in PeopleSoft Asset Management used to store load lines before they are loaded into the system as open transactions. The loader tables comprise INTFC_FIN, INTFC_PHY_A, and INTFC_PHY_B.

Loan Exercise

A form of cash exercise, typically requiring a loan agreement and a promissory note.

Local Code

In PeopleSoft Demand Planning, a type of validation used for a user-defined field code. If a user-defined field is marked to require local table validation, **User-Field Code** are used to determine the list of valid values for the field.

Local Functionality

Local functionality is the set of information in PeopleSoft HRMS that is available for a specific country. You can access this information when you click on the appropriate country flag push button in the global window, or when you access it by a local country menu.

Location Accounting

An accounting method that captures and records material movement within the warehouse, providing accounting visibility based on where the inventory resides. You can designate certain **Storage Area** as raw material, WIP, or finished goods by assigning the corresponding account ChartField (account, department, product, and project ID) to the storage area. All inventory locations in a storage area use the storage area account.

Location Code

Locations enable you to indicate the different types of addresses a company has—for example, one to receive bills, another for shipping, a third for postal deliveries, and a separate street address. Each of these addresses has a different location number. Every customer role must have a primary location, which will be used throughout the system on all panels that display a customer address. The primary location—indicated by a *1*—is the address you use most often when contacting the customer, and may be different from the customer's main address.

Location Summary

A Picking Plan option that sorts the picking plan according to the highest-level sort options defined and prints the order lines and the total item quantity to pick from each **Storage Location**. Because the layout of the printed report reflects the actual positions of stock to be picked, personnel can follow a serpentine path through the warehouse, fulfilling all orders on the picking plan without revisiting locations.

Lock for Confirm

A flag on the Pay Line record that enables users to access the database 7 days a week, 24 hours a day, without affecting or interrupting payroll processing. Issues a warning message "A payroll is currently in process for this employee. This data will not be processed until the next payroll."

Log file

One way that you can monitor the build process is to review the log files that the build process automatically generates. Keep in mind that the log file is entirely separate from the script file; do not confuse the two. How much information that the log file contains is up to you. You can set up your logging so that all status (both good and bad) appears in the log, or you can specify that just the errors or warnings appear in the log. This section describes the options you can specify in regards to the Build log file.

Long-Term Variable Compensation

In PeopleSoft Workforce Analytics, a component of direct compensation that consists of long-term payments to an employee in the form of stock programs, and deferred compensation.

Lookup Codes

In the financial services industry, these are user-defined codes that enable the system to define and categorize incoming Instrument table information. They also provide a means for you to report on specific data, such as treasury position, balance type, and ledger account.

Lump Sum

A tax method that determines withholding based on the Canadian Lump-Sum tax table.

Lump Sum Payment Option

A form of pension payment in which some or all of a participant's benefit is paid as a single sum.

Lump Sum Reporting

A Time and Labor process that enables you to report time in a lump sum of hours or units for a single Time Reporting Code, and quantities of time. The system uses a batch process to gather the information you enter, perform edits, and update the daily time tables. The system uses the default assignments you establish for workgroups, taskgroups, shifts and so on.

M***Maintenance Worksheet***

A work space for creating write-offs, matches, or adjustments to clean up posted items.

Manage Base Pay Structure

See Base Pay Structure

Manage Compensation Planning

A PeopleSoft Workforce Rewards module that facilitates modeling and analysis of compensation costs across organization units, specific job classifications, or groups. You can focus on the impact of changes to workforce size, or on changes to fixed and variable compensation elements, and determine their effects on current and future payroll costs.

Manage Market Compensation

A PeopleSoft Workforce Rewards module you use to match your company's jobs to similar jobs found in published market compensation surveys. You then calculate a target market rate based on a weighted average from multiple surveys. This market rate is then used to assess your company's gap to market and to perform cost impact analysis.

Manage Retention Planning

A PeopleSoft Workforce Rewards module that enables organizations to analyze the factors that lead to employee turnover, and how retention of key employees affects business performance and goals.

Manual Checks

Any checks calculated and prepared outside of the PeopleSoft Payroll system that you must enter into the system manually.

Manual Events

Events that are inserted by the user manually through the BAS Activity table. Events are actions that occur, which potentially change employee benefit coverage eligibility—see Event Class for more information. Used by PeopleSoft Benefits Administration.

Map File

A file that defines the relationship between fields in a third-party system and PeopleSoft Demand Planning tables.

Mapper Type

This defines whether you are mapping actual or budgeted general ledger line items to resource ID within PeopleSoft Enterprise Performance Management.

Marginal Tax Rate

The tax rate that applies to the next dollar of income generated.

Market Compensation

A compensation review process in which you match your company's jobs to similar jobs found in published market compensation surveys, for the purpose of establishing new target market rates. Also referred to as Market Based Pricing or Market Analysis.

Market Capitalization

The value of a corporation as determined by the fair market value of its issued and outstanding common stock. It is calculated by multiplying the number of outstanding shares by the current fair market value of a share. Analysts look at market capitalization in relation to book, or accounting, value for an indication of how investor's value a company's future prospects.

Market Rate

Compensation rates, usually for regular base compensation or total cash compensation, found in published salary surveys. You use the Market Compensation module in PeopleSoft Workforce Rewards to age and weight this data, to create market rates you can compare against your organization's current pay rates.

Mark-to-Market (MTM) Model

In the financial services industry, the reevaluation of a portfolio's position at current market levels.

Market Variance

A comparison of the difference between an individual's, or group's, actual compensation, and available market compensation data for a comparable population in industry. Market compensation data is usually tied to job codes, and comparisons are usually made between similar jobs. Although the variance to market can be evaluated for any of the compensation components in the Compensation tree hierarchy (such as Total, Direct, or Base), market compensation data is most typically available for, and used in evaluating Base Pay (Base Salary). The main point of reviewing the market variance is to evaluate how well your workforce is paid in comparison to both prevailing compensation in industry, and your own organization's compensation strategy.

Mass Adjustment

A process of applying an amount or percentage change to one or many line item budgets at once. PeopleSoft Budgeting-specific.

Mass Change

A user-configurable entity that defines the movement of data between the tables that store your business information. Mass Changes enable you to define the criteria by which you move or replace data in your tables. Based on the configuration of your system, Mass Change dynamically builds data access and gives you complete control over your system processing.

Mass Change Template

The foundation for defining mass changes. Mass change templates enable you to control which fields will be available for the operator to specify when defining a mass change, and whether those fields will be used as selection criteria or defaults.

Mass Change Type

The building blocks used in defining mass change templates. Mass change types specify which records the resulting mass change will select From the database, alter, and subsequently write back To the database. They also set up system field defaults that run behind the scenes to ensure that this mass change is processed correctly.

Mass Validate Metadata Utility

A PeopleSoft Enterprise Warehouse utility that enables you to validate, but not compile, Metadata objects. Mass Validate certifies all "as of dates" created for Filters, Constraints and DataSets for the specified run date. This utility helps ensure that your Metadata is valid at run time and increases your chance of a successful engine run.

Match

A process in PeopleSoft Workforce Planning, by which the system compares the roles, competencies, and accomplishments in the current competency inventory, with the requirements of a given competency strategy.

Matched Punches

A period between two consecutive punches during which some activity happens measured intervals.

Match-Funding

In the financial services industry, Match Funding refers to funding an asset with a like (term to maturity) liability. This helps an organization apply the appropriate funds transfer price. Although the actual asset might be funded with shorter-term liabilities, it does provide a better measure of financial performance for that asset, such as Risk Adjusted Return on Capital.

Material News

Company news that could be expected to affect the value of a company's securities or influence investors' decisions. Material news includes information regarding corporate events of an unusual and non-recurring nature, news of tender offers, unusually good or bad earnings reports, and a stock split or stock dividend.

Material Release

A PeopleSoft Manufacturing process that—after material has been picked—decrements on hand inventory balances for the inventory storage areas and increments inventory to the WIP locations defined by the routing or production area. The process also changes the production ID's or production schedule's status from Released to In Process.

Maximum Compensation Hours

The greatest number of hours to be paid for a specified TRC (see Time Reporting).

Maximum Lead-Time Usage

In PeopleSoft Inventory Planning, a policy control value that sets the safety stock level to the maximum quantity required during the lead time. This method is normally used when the demand for an item is low or intermittent but sufficient stock must always be available.

Maximum Method Policy

In PeopleSoft Inventory Planning, a policy that controls the way in which the system determines a reasonable high limit for the maximum inventory level of an item. The system provides warning messages when the inventory level exceeds the maximum level.

Maximum Taxable Wage Base

An annual earnings threshold used for Social Security purposes. Pension plans sometimes provide different levels of pension benefits for earnings above and below the Maximum Taxable Wage Base.

Measure

A measure represents the amounts brought into a cube—the numerical data.

In data warehousing, a Measure is a field type used interchangeably with fact. Measures are types of amounts. Any numeric field you want to apply a Data Manager rule against should be a measure.

Measure ID

In the Define Market Compensation module of PeopleSoft Workforce Rewards, a Measure ID is the identification code for a measure. For market compensation surveys, the Measure ID describes the percentile for each type of pay, as well as the regression statistic type. In PeopleSoft Workforce Analytics, for Benchmark Surveys, the Measure ID describes the type of benchmark.

Measure Value

In PeopleSoft Workforce Rewards, Measure Value is the calculated market rate value from market compensation surveys for a given percentile of a market rate, and for a given scenario and job code. This is the annual rate you compare against the compensation paid for similar jobs in your company. The Measure value can also be the regression statistic value used for Regressing Market rates. In PeopleSoft Workforce Analytics, for Benchmark Surveys, the Measure Value is the delivered Benchmark Ratio.

Member

A member is the OLAP equivalent of a node or detail value on a PeopleSoft tree. A member is a single item within a dimension, such as a single product name, department ID, or part number. Member names must be unique, even across dimensions. Cube Manager uses the term Dimension Field Mapping to identify members, dimension parents, and label mappings.

Menu Item

Menu Items are portal registry content references, and are set up in the portal through Portal Administration, Structure and Content.

Menu Pagelet

The Menu Pagelet is a both a Homepage and Template Pagelet which displays all the Menu Items and other items (for example, categorized content and managed content) available to the user through the portal.

Merit Matrix

In PeopleSoft Workforce Analytics, a matrix used to define the amount rules for base compensation increases for your workers. A Merit Matrix provides the salary increase parameters for each review rating in a rating scale. The salary increase parameters are expressed in terms of a percentage. The percentage increase amounts are usually structured to express the company's pay strategy relative to employee performance, and the employee's degree of range penetration in their salary range.

Merit Matrix Increase

In PeopleSoft Workforce Analytics, an increase to an employee's base pay awarded based upon a Merit Matrix.

Message definition

The object definition specified in Application Designer which contains message information for PeopleSoft's Application Messaging system.

Metadata

Information about data. Metadata is the information a database or application stores to describe your business data. At its simplest, metadata defines the structure of a data field—its data type and size, for example. Metadata can also describe more complex data relationships, such as the rollup structure for a chart of accounts. Reporting and analysis tools should be able to use this metadata to let users access data just as they would from within the application, without having to understand how it is stored.

For Enterprise Performance Management, metadata is used to describe the data stored in the PeopleSoft Enterprise Warehouse. There are different types of metadata, for example, TableMaps, DataMaps, and constraints. You typically define these when you set up the warehouse; however, Metadata (particularly constraints and DataMaps) is used to develop business rules that manage aspects of the dimensional models. Metadata enables technical users to define relationships between warehouse tables and enables business users to easily identify the data that interests them without having to know the database structure.

Meta-SQL

Meta-SQL: Meta-SQL constructs expand into a platform-specific SQL substrings. They are used in functions that pass SQL strings, such as in SQL objects, the SQLExec function, Application Engine programs, and so on.

Metastring

Metastrings are special expressions included in SQL string literals. The metastrings, prefixed with a percent (%) symbol, are included directly in the string literals. They expand at run time into an appropriate substring for the current database platform.

Method

A method can only be executed from an object, using dot notation. You have to instantiate the object first, before you can use the method.

For Enterprise Relationship Management, a method is the algorithm or formula that defines how the budget amount for a line-item budget is calculated or how it is derived if a calculation is not necessary. Types of methods include amount per FTE, itemization, annual percent growth rate based on a historical figure, and number of units multiplied by cost per unit. PeopleSoft Budget Planning-specific.

Method Amount

The amount for a line item budget resulting from the application of a method. It represents the budget amount after the method is applied to a line-item budget but before any adjustments or allocations are applied. PeopleSoft Budgeting-specific.

Method Base

The defined value to which a method is applied, if applicable. Not all methods require a base. PeopleSoft Budgeting-specific.

Method Driver

The factor used in a method's algorithm. For the method, amount per FTE, FTE is considered the driver. PeopleSoft Budgeting-specific.

Method Parameter

A defined and derived value within a method, which drives an expense or revenue calculation. For the method, Amount per FTE, the number of FTEs is considered the driver parameter. PeopleSoft Budgeting-specific.

Metric

A metric is a calculation of facts. A metric is usually a number, but can be anything you want to measure.

Metric Object Security

Metric Object Security determines whether an individual can see a metric object in a Data Mart.

Midpoint (Pay Range Midpoint)

In PeopleSoft Workforce Analytics, the middle value in a pay range, halfway between the minimum and the maximum, calculated as $(\text{Minimum} + \text{Maximum})/2$.

Midpoint Progression

In PeopleSoft Workforce Analytics, the percentage difference from one grade midpoint to the next higher-grade midpoint, calculated as $(\text{Midpoint2} - \text{Midpoint1})/\text{Midpoint1}$.

Minimum Benefit

See Grandfathered Benefit.

Minimum Compensation Hours

The lowest number of hours to be paid for a specified TRC (see Time Reporting).

Minimum Method Policy

In PeopleSoft Inventory Planning, a policy that controls the way in which the system determines a reasonable low limit for the minimum inventory level of an item. The system provides warning messages when the inventory level drops below the minimum level.

Missed Punch

A punch that is not entered at the scheduled time (see Time Reporting).

mkvdk

Verity's command-line tool used to index a collection, insert new documents, perform simple maintenance tasks like purge and delete a collection, and control indexing behavior/performance.

MLS

Multilingual support.

Modal transfer

Modal transfers allow you to transfer an operator from one component to another component (the modal component) modally; that is, requiring the operator to OK or Cancel the modal component before returning to the originating component.

Modal transfers give you some control over the order in which the operator fills in pages. They are useful for finite tasks related to the main transaction. They are particularly useful in cases where data in the originating component can be derived from data entered by the operator into the modal component.

Model Equivalency Factors

In PeopleSoft Demand Planning, factors that adjust model errors to allow a fair comparison. During the Model Reset process, the errors associated with each of the models are multiplied by their associated factors. The factored errors are then compared to select the model with minimum errors.

Models

In the PeopleSoft Enterprise Warehouse, Models enable replication of an organization's business processes for analysis of cost flow through customers, departments, and channels.

Model Recalculation

In PeopleSoft Business Planning, users may checkout slices of the entire model for their appropriate role. This requires the entire model to be periodically recalculated to incorporate the users changes for dependencies in other areas of the model.

Morphing

Morphing is a technique of automatically transforming the look and feel of an interface based on the needs of an active object. The Application Designer toolbar and menus dynamically transform based upon the type of object definition that is active.

Mortality Table

A table showing rates of death by age. Mortality tables are part of a pension plan's actuarial assumptions.

Moving Average

In PeopleSoft Demand Planning, a model that averages a selected number of the most recent demand periods and creates a forecast of demand for the next and subsequent periods.

Multibook

A functionality supporting the requirement of a company to carry one set of books in their local currency (functional currency) and another set of books in the currency of their parent company (reporting currency). In PeopleSoft General Ledger, multibook functionality is multiple ledgers having multiple-base currencies defined for a business unit, and the option to post a single transaction to all base currencies (all ledgers) or to only one of those base currencies (ledgers). Also commonly known as dual-book.

Processes in PeopleSoft applications that can create both application entries and general ledgers denominated in more than one currency.

Multicurrency

The ability to process transactions in a currency other than the business unit's base currency.

Multidimensional Analysis

A type of analysis that enables you to look at data from many different dimensions, or attributes. You identify the dimensions of the data, then combine the dimensions in various ways. For example, you might identify five dimensions of your sales data: sales, region, channel, product line, and time. Once you've identified the dimensions, you can "slice and dice" the data based on combinations of these dimensions, such as sales in the Western region for the last quarter.

Multidimensional Database (MDDB)

A database that stores data for multidimensional analysis in a proprietary multidimensional format. Users access MDDBs exclusively for reporting and analysis, never transaction processing, so they are optimized for retrieval speed.

For Enterprise Performance Management, a Multidimensional Database stores data for multidimensional analysis in a proprietary multidimensional format. These databases are used exclusively for reporting and analysis, and never transaction processing, so they are optimized for retrieval speed.

Multiple Jobs

Multiple jobs allow you to hire an employee into more than one concurrent job and have them processed through Payroll, Benefits, and Pension. In order to enable this feature, the Multiple Jobs check box must be selected in the PeopleTools Options page.

Multiple-table dynamic tree

The user drills down through a hierarchy of parent and child records.

Multivariate Forecasting Techniques

In Enterprise Planning and Simulation, this is a forecasting method that uses both the recorded history for the target value and the history and forecasts for other variables (causal factors) to infer, not only a forecast for the target value, but also a functional relationship between the causal factors and the target value.

N**National Association of Securities Dealers, Inc. (NASD)**

Self-regulatory organization of the securities industry responsible for the regulation of The NASDAQ Stock Market and the over-the-counter markets. The NASD operates under the authority granted it by the 1938 Maloney Act Amendment to the Securities Exchange Act of 1934.

National ID Number

Different countries track some form of National ID for payroll, identification or benefits purposes. For example, German workers are assigned a Social Insurance Number, UK workers have a National Insurance Code, and US laborers have a Social Security Number. Each of these different types of National IDs has unique formatting requirements associated with them as well.

Nature Of Action (NOA) Code

Indicates the type of personnel action being processed.

Nature Of Action Description

Describes the NOA code.

Nature Of Action Effective Date

The date the personnel action is effective.

Navigation

Navigation is provided through hierarchies that allow the user to move through portal content visually, using drilldowns.

Negative Amortization

Occurs when a loan payment does not cover the interest due on the loan payment, resulting in an increase of the principal amount.

Net-To-Zero Adjustment

A prior period adjustment where no compensation affecting fields on the pre-existing (original) record are changed by the adjustment.

New Hire Report

In the United States the Personal Responsibility and Work Opportunity Act of 1996 (the so-called Deadbeat Dads law) requires employers to report new hires to specified agencies within a pre-determined number of days from the hire date.

Next Level Item

In PeopleSoft Demand Planning, the **Forecast Item** at the next level that contains the current item as a child. This is the key of the group item at the next level up and is always within the same view.

Next Year

PeopleSoft Benefits term referring to the next open enrollment processing year.

NIC (Numéro Interne de Classement) Code

In France NIC numbers identify the entities inside the same enterprise, and represent an Internal Filing Number.

No Control

A target control that allows the user to submit a budget even if it is not within the planning target and the tolerance levels. The system tracks the budget against the defined planning targets but does not generate any warnings or validations. Users can still compare their planning targets against their budget amounts on the Planning Targets page in Line Item Budgeting.

Node

An individual item on a tree. Nodes summarize detail values or other nodes, and may or may not roll up into other nodes or levels.

Node

A node is a name that you can use to refer to some source of HTML content. In more practical terms, a node is a URI string that defines the database and server to be used when the portal servlet attempts to retrieve content, proxy addresses, and assemble pages.

Non-Base Pay

A pay component not included in the job comp rate calculation. It is used by payroll only in the paysheet calculation. For example, non-base pay can be set up for additional work, holiday pay, bonuses, and so on.

Non-Benchmark Jobs

See Benchmark Jobs.

Noncompetitive Action

An appointment or placement in a position in the competitive service that is not made by selection from an open competitive examination, and that is usually based on current or prior Federal service. A noncompetitive action includes:

- All of the types of actions described under inservice placement, above
- Appointments of non-Federal employees whose public or private enterprise positions brought into the competitive service under Title 5 CFR 316.701; and
- Appointments and conversions to career and career-conditional employment made under special authorities covered in 5 CFR 315, Subpart F.

Nondiscrimination Tests (NDT Tests)

Tests used to help employers ensure that their organization's 401(k), 401(m), and Section 129 dependent care reimbursement plans do not discriminate in favor of highly compensated employees. See Highly Compensated Employees.

Non-Employee

Those workforce resources hired to perform a specific job and/or hired for a specific period of time. Although non-employee time will be entered into Time and Labor for the purposes of managing their Task time, non-employee earnings will not be updated to Payroll and they will not be paid through the Payroll system.

Non-HR Employee [Time and Labor]

An individual employed by the corporation who is administered outside of the PeopleSoft Human Resources system.

Non-Job Event

Actions which result in changes to an employee's personal or demographic information that also affect benefit program and plan eligibility—such as an a state or postal code change, a family status change like a divorce, or a birthdate change. Used by PeopleSoft Benefits Administration. See Event Class.

Non-Productive Time

Any employee scheduled work time spent on tasks (or non-tasks) other than those which the employee was hired to perform. This could include time spent in training, time spent in meetings, travel time, and time spent reporting time.

Non-Qualified Dependent

Dependents such as domestic partners, their children, and other people who do not meet the definition of qualified dependents as presented in IRS Section 152. PeopleSoft Benefits applications enable the creation of benefit programs that offer health and life coverage to non-qualified dependents.

Nonqualified Plan

A plan that doesn't conform to ERISA rules. Employers cannot take a tax deduction for contributions to a nonqualified plan; instead, plan benefits are generally paid directly from the employer's assets.

Nonqualified Stock Option (NQ)

Any option that does not satisfy the conditions of a statutory stock option under the Internal Revenue Code and therefore does not qualify for preferential tax treatment. Generally, companies can design nonqualified options in almost any way they like. Features are:

- The grant price may be less than fair market value (with some exceptions under state law).
- Grants are not limited to employee of the company or subsidiary.
- No taxable income is recognized at the time of grant.
- Options can be granted to anyone (Employees, Consultants and Board of Directors).
- Difference between the fair market value on the date of exercise and the grant price is treated as compensation income.
- In the U.S., withholding tax obligation arises at the time of exercise.
- Company receives a tax deduction equal to the compensation income recognized.

Nontaxable Benefits

Any employer contributions that are not subject to Federal Withholding Tax, such as an employer's portion of a 401(k) plan.

Normal Form of Payment

The payment form associated with the amount calculated by the benefit formula. Pension Administration uses it as a basis for converting to optional forms of payment.

Normal Hours

The hours an employee is normally expected to be at work for any given workweek.

Normal Line Of Promotion (Career Ladder)

The pattern of upward movement from one grade to another for a position or group of positions in an organization.

Normal Retirement Date (NRD)

The date on which an employee is eligible to retire and begin receiving pension benefits. Eligibility for normal retirement is typically based on age only.

Normalized database

A normalized table adheres to certain standards designed to improve the productivity of the database user. Normalization makes the database much more flexible, allowing data to be combined in many different ways.

The standards for a normalized database are called forms, such as first normal form, second normal form, and so on.

Normalized Loss

In the financial services industry, Normalized Loss is the expected loss on a loan and is netted out of the profit and loss statement for management accounting or profitability measurement purposes. Similar to the bank's loan loss reserve, it enables the institution to analyze and account for expected losses on a more detailed level, by financial product.

Northern Ireland Report

In the United Kingdom the Fair Employment (Northern Ireland) Act of 1989 requires private sector employers with more than 10 employees to submit the Northern Ireland report to the Fair Employment Commission annually. The report indicates the religious composition (referred to as Community Background—Catholic, Protestant, Other) of the workforce, job applicants and appointees.

Not To Exceed (NTE) Date

Types are as follows:

- Appointment NTE Date: Indicates the length of time a person may serve in a position.
- Classification Temporary NTE Date: Established temporary date that is used for a temporary classification of a unique position.
- Hospitalization coverage.
- LWOP NTE Date: NTE date is the last day the employee is in leave without pay status. The employee is scheduled to return to duty the next workday.
- Position NTE Date: Indicates the length of time a position is available for use.

- Promotion NTE Date: Specific NTE Date: Specific time for an increase in grade on a temporary basis.
- Suspension NTE Date: Specific time an employee is to be on suspension. No salary is paid for the period.

O

Object-Based Modeling

Object-Based modeling technology enables you to create parent and child models. In the PeopleSoft Enterprise Warehouse, you set up such models using the Scenario Manager.

Occupant Of Position/Vice

Indicates new position or former occupant of a position.

Occupational Series Code

Designates a grouping of positions similar in work and qualification requirements. They are designated by a title and four digit number (e.g., the Accounting Series, GS-0510).

Off Date

A specific date that is defined as an off day (see Scheduling).

Off Day

A 24-hour period rounded by daybreaker with no associated shifts (see Scheduling).

Off Day Type

A classification of off days (i.e. holiday, plant shutdown) (see Scheduling).

Off-Cycle Processing

The process of calculating and creating a paycheck for one or more employees aside from the normally-scheduled (*on-cycle*) payroll run for their pay group. You typically use off-cycle payroll processing for employees who are being terminated, new hires who weren't entered into the system in time for the last on-cycle payroll run, and employees who received an incorrect paycheck during a normal on-cycle payroll.

Offer Period

This is the period of time in which an employee's ESPP share price is determined.

Officer

An insider who sits on the Board of Directors and who is also an employee of the corporation. Examples include CEO, CIO, CTO, CFO, COO, Corporate Secretary, and Treasurer.

Official Forwarding Address

An employee's mailing address following separation.

Official Languages Act (OLA)

Canadian federal institutions are required to report on the official languages used in their departments, in accordance with the Official Languages Act (OLA).

Official Personnel Folder (OPF)

The repository of a Federal employee's official documents related to Personnel history.

Official Personnel Folder (OPF) Address

Indicates the address where the Official Personnel Folder is maintained.

Off-Invoice Discount (OI)

A per unit discount deducted from the customer invoice and given by a manufacturer for promotional activities. Off-invoice discounts can originate from a National Allowance or Customer Promotion, and are passed to PeopleSoft Order Management so the discounts are applied correctly during order entry.

Offset Plan

A pension plan where the benefit formula includes an offset of a portion of the participant's Social Security benefits.

OLTP (Online Transaction Processing)

OLTP refers to the applications that perform the business transactions that keep your company running, such as processing invoices or enrolling employees in benefits programs.

Ontario Employment Equity Commission (OEEC)

The OEEC requires employers in Ontario to complete workforce surveys.

Open Enrollment

The scheduled annual re-enrollment of plan participants into appropriate benefit programs and, within those programs, benefit options.

Open Price

The price at which a security starts a trading day.

Open Season

A time period during which Federal employees are open to re-enroll in a specific benefit plan and option. Open Seasons can be scheduled at varying times throughout the year and multiple Open Seasons can occur concurrently with each other. For FEHB processing, it is generally the time period from mid-November through mid-December. For Thrift Savings Plan (TSP) processing, these are semi-annual and are generally held from May 15 - July 31 and November 15 - January 31. Open seasons for FEGLI are infrequent and special notification from the OPM would be issued to all Federal employees should they occur.

Open Transaction

A transaction that has not yet been processed in PeopleSoft Asset Management.

Operation

In PeopleSoft Manufacturing, a job or task performed in a specified amount of time, done in one work center, and using one or more resources.

Operational Data Store (ODS)

A staging area in PeopleSoft Enterprise Warehouse for source application data and pre-processed data for tables optimized for reporting.

OPF Code

Indicates where the OPF is maintained.

OPM

Office of Personnel Management.

Option

A contractual right that gives the individual the option to purchase a specified number of shares of stock through an Equity Compensation Plan. Also known as a grant. Regulatory agencies also refer to an option as the right to purchase stock in an employee stock purchase plan. These options are considered granted on the offering begin date.

Option Adjusted Cost (OAC)

In the financial services industry, the difference in the average expected return between an instrument without embedded options that are otherwise identical to the fully loaded instrument and the instrument fully loaded with embedded options.

Option Adjusted Spread (OAS)

In the financial services industry, the average return expected for an instrument, over the short-term risk-free rate, for all projected interest rate paths generated using Monte Carlo simulation.

Option Types

Types of stock options. PeopleSoft Stock Administration supports the following stock option types. Incentive Stock Options (ISO), Nonqualified Stock Options (NQ), Tandem Incentive Stock Options/Stock Appreciation Right (ISO/SAR), Tandem Nonqualified Stock Option/Stock Appreciation Right (NQ/SAR), Restricted Stock Award (RSA).

Optional Forms of Payment

Any alternative forms of payment available to a participant retiring under a pension plan. These can include: annuity options paid over the participant's (and possibly a beneficiary's) lifetime; certain term options paid over a specified number of years; and lump sum options paid out in a single payment.

Options Outstanding

The total number of option shares held by optionees. It is the number of Grants less the number of Exercises, Cancellations, and Expirations.

Order Quantity Policy

In PeopleSoft Inventory Planning, a policy that determines how replenishment order quantities are calculated for an item. For example, you can use a static number, provide upper and lower limits, or use an economic order quantity calculated by the system.

Ordinary Income Tax

An individual's tax on earnings from wages, tips, and all other sources except capital gains. Includes option profits upon exercise of non-statutory options.

Origin ID

A code that identifies the location of a payment deposit in PeopleSoft Billing. Origin ID also distinguishes the method of the payment's entry: online, external, or lock box interface. Billing origin ID identifies the remit to origin for billing. This function is mainly used for specifying where the customer should send payment.

Original Option

A stock option that is eligible for repricing. This option has a grant price greater than the current FMV.

OSHA 200 Occupational Injury and Illness Recordkeeping Log

In the United States this record-keeping logbook meets reporting requirements for reporting occupational injuries and illnesses to the Occupational Safety and Health Administration (OSHA). It lists the case numbers and details of each injury and illness that occurred during a calendar year.

Out Punch

Indicates the end of a shift.

Out-of-the-Money

A term used to describe an employee stock option when the current market price is below the option grant price. When an option is out-of-the-money, it costs more to exercise than the underlying stock is worth. Such options are also described as being "underwater."

Output Result Tables

Refer to the database tables that are populated with information at the end of each pay calculation.

Output VAT

VAT collected on sales or outputs.

Outside Scope of VAT

A transaction determined as not subject to VAT. No VAT code is associated with this type of transaction. The transaction is still logged in the VAT transaction table, but no tax is applied.

Outside The Register Appointment

An appointment in the competitive service made under an agency's applicant supply system because either there is not a sufficient number of eligibles on the appropriate register or no competitor inventory exists. Agencies are also authorized to make temporary limited appointments outside the register at grades GS-12 and below.

Outstanding Option

A stock option that still has unexercised (vested or unvested) uncanceled or unexpired shares. Options with a "pending" status are not included. Only options with a status of 'active' or 'suspended' are considered outstanding.

Overlapping Promotions

Multiple customer promotions related to the same customer, and the same product, at the same time.

Override Rate

Cost per hour or unit reported with time used to replace the time reporter's default rate. (see Time Reporting)

Override text

Text not derived from field descriptions.

P

Package level

The top level of organization is the package level. The package is the entire transaction set file, addressed to your company much as a mail package would be.

Page

A page defined in Application Designer as part of a PeopleSoft Internet Architecture application.

Page Assembly

Page assembly is one of the functions of the portal servlet. Page assembly involves intercepting the user's content request, retrieving the content, and properly formatting it using a pre-defined portal template. To complete the page assembly process, the portal servlet merges content from any HTML documents that it retrieves along with the defined template HTML. The assembled page is then sent back to the user's web browser as a single HTML document.

Page buffer

Consists of rows of buffer fields that hold data for the various records associated with page controls, including the primary records, related display records, derived/work records, and translate table records.

Pagelet

Each "block of content" on the homepage is called a pagelet. These pagelets display summary information within a small rectangular area on the page. The objective of the pagelet is to provide the user with a snapshot of their most relevant PeopleSoft and non-PeopleSoft content.

Paired Punches

Two punches for the same employee in chronological order that exists for the purpose of determining the duration between the punches.

Par Value

The nominal or face value of a security. It establishes a price floor below which shares may not be issued. With common stock, the company issuing the stock sets par value. Par value has no relation to fair market value. Some companies issue no par value stock.

Parallel Processing

In the PeopleSoft Enterprise Warehouse, parallel processing is a system function that "locks in" the information you use for processing. This enables the system to run identical or similar processes at the same time without impacting your results. Running concurrent processes greatly reduces the amount of time it takes to run within the system.

Parent Budget

In commitment control, you can build a hierarchy between different budgets, such as summary and detail budgets. Specifying a relationship of parent and child between a summary and a detail budget for purposes of budget inquiries enables you to retrieve information about either budget through the other.

Parent/Child Models

Object based modeling technology enables you to create parent and child models. In the PeopleSoft Enterprise Warehouse, you set up such models using the Scenario Manager.

Parent node

A tree node linked to lower-level nodes or details that roll up into it. A node can be a parent and a child at the same time, depending on its location within the tree.

Parent Task

A higher-level Planning task in a schedule's hierarchy that drills down into subtasks. Its start time is the start time of its earliest subtask, and its end time is the end time of its latest subtask. Planning tasks are distinct from Manufacturing tasks.

Partial Pay

The pay processed whenever a job record has an effective date in the middle of a pay period. Typically, this happens whenever you hire, terminate, transfer, or change the rate of pay for an employee mid-period.

Participants

Individuals who elect to participate in the stock purchase plan.

Participation

The PeopleSoft Pension Administration function that determines whether an eligible employee has met the plan's rules for joining the plan. Generally, these rules are based on age and service criteria.

Participation ID

In the financial services industry, this is a lookup code used by the financial analytic applications to identify the participants (syndicators) involved in, or responsible for, a financial instrument or group of instruments.

Passive Control

A target control allowing the user to submit a budget even if it is not within the planning target and tolerance rules. The system responds by sending an email to the user of the next budget center level indicating that the budget exceeded planning target tolerance levels.

Passive Events

Events that are initiated by a change that has taken place over time, rather than by a direct data entry action. Events are actions that potentially change benefit coverage eligibility. Examples of passive events include an employee's reaching the age of retirement. See Event Class for more information.

Pattern Reporting

A Time and Labor process that enables you to report a start and stop date, a pattern of one or several time reporting codes, associated hours, amounts, or units and task information once for an employee. The system transforms the information into instances of daily time for each scheduled employee work day based on the employee's schedule.

Pay

Types of "pay" are as follows:

- **Basic Pay:** generally, the total amount of pay received during any one calendar year at the rate fixed by law or administrative action for the position held by the employee or judicial official prior to any deductions and not including any special payments or premium pay.
- **Gross Pay:** total compensation earned by an employee, annuitant, or survivor of a judicial official prior to any deductions. Includes basic pay plus locality pay; availability pay (if any) for LEOs; special payments (if any); an annuity (if any); plus awards (if any).
- **Premium Pay:** pay provided to an employee as a regular addition to basic pay (e.g., administratively uncontrollable overtime (AUO), availability pay, overtime, night differential, holiday pay, etc.).

Pay Basis

A code indicating the principal condition in terms of time, procedures or criteria, that serves as a basis for computing an employee's pay.

Pay Calculation

Formula that calculates an employee's gross to net.

Pay Calendar

Payroll processing cycle for a given pay group.

Pay Components.

Rows in the compensation record. They build the compensation packages in the compensation record.

Pay Confirmation

Process in which the system updates all to-date totals on the database for earnings, deductions, and taxes for pay groups assigned to a given Pay Run ID.

Pay Entity

A pay entity is the organization responsible for making payments to payees. You can also use a pay entity to define the type of currency to be used when processing calculations. The pay entity is a legal definition of an organization from a payroll perspective. In many cases, an organization and a pay entity are the same. However, PeopleSoft Global Payroll does not define a relationship between an organization and a pay entity.

Pay Frequency

Defines how often employees in a pay group are paid—weekly, biweekly, monthly, and so on.

Pay Group

A set of employees grouped together for payroll processing. It's a way of “bundling” payees for more efficient processing. A pay group is made of payees that the system processes at the same time during a pay run.

Pay Period

The established time segments for which employees in a pay group are paid. Pay Periods are defined by their beginning and ending dates.

Pay Plan

A code that denotes the pay schedule under which an employee is paid , e.g., JS, UG, UJ, etc.

Pay Slip

Either an actual check or an advice notice of a direct deposit. You build these to match your organization's needs. A pay slip is the details of a payment you've made.

Pay Structure

In PeopleSoft Workforce Analytics, Pay Structure consists of a series of pay ranges or grades, each with a minimum and maximum. You develop pay structures to support and reinforce your company's pay strategy (for example, to target the market 50th percentile).

Payable Date

The date that a corporate distribution, such as a dividend, is payable to the record holders of a corporation's securities.

Payable Time

Time that is ready to be collected by the payroll system (see Time Reporting).

PayCycle

A set of rules that define to PeopleSoft Payables the criteria by which it should select scheduled payments for payment creation.

Payee

Any payroll recipient. A payee can be an employee or a non-employee of an organization.

Payee Process Stat Record

A record created for each payee during the payroll process. The system creates one Process Stat record per payee for each calendar.

Payee Section

Type of section that can be added to a process list. A payee section defines a set of elements that is to be resolved for a particular payee.

Payline

Record containing standard payroll information for an employee, such as the amount of regular pay, number of regular hours, additional pay (if any), and tax information and job data.

Payment Interface

An Application Engine process that loads payment information from the Banks Statement tables and the Staging tables to the Application tables and performs various checking and default operations.

Payment Predictor

PeopleSoft Receivables' automatic cash application feature that pairs open items with unapplied payments based on predefined algorithms.

Payment Schedule

A schedule of payment dates for leased assets.

Payment Selection

A process by which PeopleSoft Payables selects scheduled payments that are eligible to be paid in a pay cycle.

Payment Worksheet

The workspace in which open items are paired with unapplied payments.

Payroll Certifying Officer

The individual with the delegated authority for approving all items relating to payroll for those employees under his/her authority.

Payroll Process Tables.

Records holding data necessary to process a payroll, such as employee, company, and tax information.

Paysheets

Repository for the raw data necessary to calculate pay for employees, including earnings, hours, deductions, taxes, and accounting data.

PBGC Rates and PBGC Grading

The interest rates published monthly by the Pension Benefit Guaranty Corporation. There is an "immediate" rate that applies once benefits commence as well as a series of "graded" rates—calculated based on the immediate rate—that are used during the time between benefit determination and a deferred benefit commencement.

Pegged Chain

A method the PeopleSoft Enterprise Planning and Production Planning solvers use to determine feasible plans. The method ties tasks together in order to explicitly record which supplies are being used to satisfy which demands. Through this process, the Planning engine first determines which independent demand has the highest priority. Then, it determines the lateness preference ranking for dependent demand tasks.

Pending Exception

Any known exception to an employee's scheduled workday. Pending Exceptions are future dated (future is defined to be for a date under report beyond the last date of the employee's current pay period).

Pending Item

Information in PeopleSoft Receivables that has been entered in or created by the system, but hasn't yet been posted. During the Receivable Update process, the system uses the pending items to update customer balances—either by creating new items or by adding item activity lines to existing items.

Pending Time

Time that has been reported or is assumed to have been reported (based on employee work schedule and calendar date) that has not been used by the business entity. Pending Time may be for past, current, and future pay periods. It is the label for those time transactions that are waiting to be used by the business (for example, approved and unapproved time not yet updated to Paysheets).

Pension Status

An employee's standing with regard to a particular pension plan. For example, employees can be active participants, terminated deferred vested, or in pay status.

PeopleCode

PeopleSoft's proprietary language; it is executed by the PeopleSoft Application Processor. PeopleCode generates results based upon specific actions, based upon existing data or the actions of a user. Business Interlink Objects are executed by calling the execute() method from PeopleCode. This makes external services available to all PeopleSoft applications wherever PeopleCode can be executed.

PeopleCode Event

An action that an end-user takes upon an object, usually a Record Field, that is referenced within a PeopleSoft page.

PeopleSoft Activity-Based Management (ABM)

A PeopleSoft Analytic Application that aligns organizational costs with operational activities, enabling a coordinated approach to expense and PeopleSoft Activity-Based Management. PeopleSoft Activity-Based Management identifies and assigns operational activities to products, customers, or services.

PeopleSoft Analytic Applications

These are applications within Enterprise Performance Management (EPM) that help you enrich the data in the PeopleSoft Enterprise Warehouse and perform forward looking simulations and scenarios. These applications include: PeopleSoft Activity-Based Management (ABM), PeopleSoft Asset Liability Management (ALM), PeopleSoft Balanced Scorecard (BSC), PeopleSoft Funds Transfer Pricing (FTP), PeopleSoft Risk Weighted Capital (RWC), and PeopleSoft Workforce Rewards. PeopleSoft Funds Transfer Pricing and PeopleSoft Risk Weighted Capital are applications that target the financial services industry (FSI).

PeopleSoft Asset Liability Management (ALM)

PeopleSoft Asset Liability Management provides financial service institutions with the analytical tools to define, measure, monitor and manage interest rate risk, liquidity risk, options risk, and to some extent exchange rate risk. The primary audience for PeopleSoft Asset Liability Management is the financial institution's Asset/Liability Committee (ALCO).

PeopleSoft Balanced Scorecard (BSC)

PeopleSoft Balanced Scorecard converts an organization's vision and strategy into a comprehensive set of performance and action measures that provide the basis for a strategic management system.

PeopleSoft Budgeting

A budgeting application that is a combination of Education and Government (E&G) Budget Planning and Budgets (commercial). This application resides on the EPM database, primarily using the ODS layer of the PeopleSoft Enterprise Warehouse for its data.

PeopleSoft Business Analysis Modeler (BAM)

A multi-dimensional modeling tool used to support several analytic applications.

PeopleSoft Business Planning

A planning application that enables financial executives to model various alternatives and set corporate financial targets to achieve their strategic goals. PeopleSoft Business Planning integrates with PeopleSoft Analytic Forecasting, PeopleSoft Activity Based Management, PeopleSoft Workforce Analytics, and PeopleSoft Budgeting applications.

PeopleSoft Customer Behavior Modeling

A PeopleSoft application that enables you to: a) create a customer profile by extracting customer data from the Enterprise Warehouse; b) create segments and samples from the profile to efficiently target marketing campaigns and further analyze customer behavior; c) append to it additional data from external sources such as demographic, credit or psychographic information; d) use a data mining tool to create a predictive model; e) score the customers in your profile using the predictive model. You can then publish the results to another transactional application.

PeopleSoft Customer Scorecard

A product that provides a pre-defined set of customer-oriented key performance indicators (KPIs), to help you build a scorecard specific to your organization. This scorecard facilitates the measurement and communication of customer satisfaction, customer activity, and objectives across your organization.

See also PeopleSoft Balanced Scorecard

PeopleSoft Enterprise Performance Management (EPM)

Enterprise Performance Management is a comprehensive, integrated analytic business solution designed to increase the value of organizations by enabling people to make better decisions. The PeopleSoft Enterprise Performance Management product line consists of the PeopleSoft Enterprise Warehouse and optional analytic applications and Data Mart products.

PeopleSoft Enterprise Warehouse (EW)

PeopleSoft's data warehousing solution. The PeopleSoft Enterprise Warehouse provides the tools necessary to query, analyze, and present information to provide the optimal environment for business intelligence. It is the central repository for data that will be used with the analytic applications in the Enterprise Performance Management product line, and can also serve as a standalone data warehouse. The PeopleSoft Enterprise Warehouse consists of dimension, fact, reference, and error tables, reporting and ETL tools (Informatica PowerMart), as well as the Operational Data Store (ODS). The tables in the PeopleSoft Enterprise Warehouse are maintained separately from your transaction-based systems to allow for comprehensive analysis of data originating from any Online Transaction Processing (OLTP) or legacy system.

PeopleSoft Funds Transfer Pricing (FTP)

A PeopleSoft Analytic Application that enables an institution to accurately measure and tune profitability. PeopleSoft Funds Transfer Pricing is an interest rate that represents the value of an asset or liability to the institution. PeopleSoft Funds Transfer Pricing is based on market rates, adjusted for risk and cost variables, specific to the institution. By assigning PeopleSoft Funds Transfer Pricing to each item on the balance sheet, the institution can remove the effects of interest rate volatility from business units, so that profitability measurements are based on factors within their control, that is, credit quality, pricing and product strategy.

PeopleSoft Operations Data Stores (PODS)

See Data Warehouse Tables

PeopleSoft Marketing Insight

A tool that helps you analyze your marketing campaigns and activities. It helps you determine the effectiveness of marketing events based on factors such as number of leads generated, profiles of respondents, campaign return on investment, and campaign forecasted costs to complete.

PeopleSoft Risk Weighted Capital (RWC)

A PeopleSoft Analytic Application that enables the financial services industry to accurately measure capital that has accounted for risk. RWC allocates capital to various levels within a financial institution according to risk, providing the opportunity to measure performance based on how well each business unit, product, customer, or transaction generates income given its perceived level of risk as quantified by the allocation of capital.

PeopleSoft Sales Activity Insight

A tool that helps you analyze key components of the sales process, such as pipeline status, discount analysis, and sales process.

PeopleSoft Support Insight

A tool that helps you determine the effectiveness of your customer service organization. It helps you answer questions such as: Are we effectively handling customer issues? Has contact center performance changed from last year to this year? Which product quality issues are most prevalent?

PeopleSoft Workforce Analytics (WFA)

PeopleSoft's complete workforce analysis solution, which includes the PeopleSoft Workforce Rewards analytical application and the PeopleSoft Workforce Analysis Insight. The complete solution set includes the PeopleSoft Enterprise Warehouse and PeopleSoft Balanced Scorecard products. It helps to manage strategic employee compensation, goals, and competencies, as well as retention.

PeopleSoft Workforce Rewards

PeopleSoft Workforce Rewards is an analytical application you use to align your workforce compensation and retention initiatives with the strategic objectives of your organization. Modules include Market Compensation, Base Pay Structure, Compensation Planning, Workforce Simulation, and Retention Management. You integrate data from multiple internal and external sources, enrich it using rules you define based on any data in your PeopleSoft Enterprise Warehouse, and simulate multiple scenarios of future workforce compensation and retention activity. You then analyze and evaluate your scenarios, and make actionable decisions you can communicate back to your PeopleSoft ERP systems for execution.

PeopleSoft Portal

The portal bundled with every PeopleSoft 8 application. It provides a simple navigation system, based on existing menu definitions that have been imported into the portal registry. Navigation to content outside of PeopleSoft applications is not provided.

Percent Cycles Without a Shortage

In PeopleSoft Inventory Planning, a method used with safety stock policies. The value is derived from the percentage of replenishment cycles that will complete without a stockout.

Percent Demand Fill

In PeopleSoft Inventory Planning, a method that can be used with safety stock policies. This method defines the percentage of the total quantity ordered that must be filled without a backorder.

Performance Appraisal Code

Indicates the level of performance of an employee.

Performance Appraisal Due Date

Date established based on the WGI or LEI for the yearly appraisal of an employee.

Period Closing Offset

In Time and Labor, the closing date beyond which this pay period is not considered current any longer, if the period's closing date is different from its end date. You can enter a positive or negative number of days.

Period Method

In PeopleSoft Inventory Planning, a method used to determine how a single static policy value is to be calculated from time-phased results with static policies.

Period of Interest

The maximum period of time containing the data needed to run all the rules in a rule program (see Batch Processing)

Period Segmentation

When an element (like compensation rate) changes mid-period, requiring all other elements in the process list to be calculated multiple times on either side of the date on which the change took place, period segmentation is used. The system calculates each element more than once, using the components that were effective during the different time slices. The system keeps the results of these calculations separate with the object of creating two gross-to-net result sets.

Periodic Processing

In PeopleSoft Pension Administration, any of several batch processes that a plan administrator must run on a regular basis—for example, consolidation of payroll data.

Personal Register (Registre Unique du Personnel)

In France, companies are required to be able to produce, at any given time, a Personal Register. For a given establishment, this report lists current employees and employees who left up to 5 years ago.

Personnel Action

Personnel actions are changes to employee data or status resulting from such activities as promotions, transfers, terminations, salary increases, and leaves of absence.

Personnel Representatives (Délégués du personnel)

In France it is mandatory for companies with more than 11 employees to elect personnel representatives who will represent all of the employees before management.

Perspective

In PeopleSoft Balanced Scorecard, a category for organizing critical success factors and key performance indicators. Usually there are four: financial, customer, internal process, learning and growth.

PF Ledger

The PF Ledger (PF_LEDGER_F00) is an important fact table within the PeopleSoft Enterprise Warehouse. The primary function of the PF Ledger table is to support PeopleSoft Enterprise Performance Management reporting. The data that gets posted to the PF Ledger must be accurate and clean.

PF Business Unit

PF Business Units differ from other PeopleSoft Business Units in that they represent functional or strategic areas of an organization, rather than separate legal entities.

Phase Type

A label for the different phases you want to define for a project. Costs can then be calculated by project phases. Examples include planning, startup, construction, and cleanup.

Physical Accounting

The PeopleSoft Inventory feature that updates tables based on count result input, regardless of how the count was created or the data collected.

Physical Inventory Process

In PeopleSoft Asset Management, the process by which you extract asset data from the Asset Management database to load into your bar code scanning device. You then scan the assets and load the data gathered during the actual physical inventory into Asset Management, enabling you to generate physical inventory results for review. You perform matching and generate transactions to reconcile the data in Asset Management with the results of your physical inventory.

PIA

PeopleSoft Internet Architecture. This is the fundamental architecture on which PeopleSoft 8 applications are constructed, consisting of an RDBMS, an application server, a web server, and a browser.

Piece Work

Method of compensating time reporters based on units completed rather than hours worked

PIN

Technical term for an element. In PeopleSoft Global Payroll, PIN is often referred to in the online object names and within the batch code. PIN stands for Pay Item Name.

Plan Administrator

The person selected by the employer to perform the administration of a plan under PeopleSoft Pension Administration.

Plan Eligibility

The PeopleSoft Pension Administration function that uses job data to determine whether an employee may participate in a pension plan. An employee can be eligible based on job data but not be participating because of an unmet service or age requirement.

Plan Type

A unique ranges of codes used during payroll calculation to determine deduction processing rules. See also Benefit Plan Type.

Plan Year

The annual period that a pension plan uses to measure service, earnings, and benefits. Generally, the pension plan year will match the fiscal year of the plan sponsor.

Planning Item

A non-inventory item designated as being used for planning purposes only. It can represent a family or group of inventory items. It can have a planning bill of material or planning routing, and can exist as a component on a planning bill of material. A planning item cannot be specified on a production or engineering BOM or routing, nor used as a component in production. Quantity on hand will never be maintained.

Planning Level

The level on a dimension's tree used for planning. Typically, a customer will choose not to plan at the lowest level of available detail, such as the individual product level. Instead, the individual products are mapped to their corresponding product group and the planning is done at the product group level.

Planning Targets

The amount the budget must equal, such as a budget spending limit or cap for expenses where users can not exceed the amount. Planning Targets are presented at a summary level. This term is interchangeable with Spending Limits.

Planning Target Tolerance

The percentage and/or amount a user can be over or under the planned budget target.

Planning Target Control

Values set at the user role level, including no control, active control, and passive control. For more information see no control, active control, and passive control.

PODS (PeopleSoft Operations Data Stores)

See Data Warehouse Tables

POI. Personnel Office Identifier.

Also known as Submitting Office Number (SON). These are codes assigned by the OPM to the office(s) delegated authority within an agency to process personnel actions on Federal employees.

Pointers

A pointer is an "address" of a driver quantity, or value, within the Enterprise Performance Management product line. Pointers are used as a means of defining where driver quantities exist in tables that reside in the PeopleSoft Enterprise Warehouse. Pointers enable you to extract values from any location in the warehouse and then use these values as driver quantities. There are three different kinds of pointers: explicit, implicit, and multidimensional.

Policy Control Group

In PeopleSoft Inventory Planning, a feature for setting up order quantity, safety stock, reorder quantity, and maximum and minimum policies. The **Control Group** is assigned to a set of

Planning Item. The policies of the associated planning items can be set explicitly or defaulted from the policies on the policy control group.

Policy Generation

In PeopleSoft Inventory Planning, a set of run options used to control the functions and behavior of the Policy Generation program.

Policy Item

An item record which is related to a location and for which **Inventory Policy** is held. A policy set, **Planning Item ID**, and Location ID uniquely identify a policy item. The combination of an item and a location is called a stockkeeping unit.

Policy Set

Defines a set of the items for which **Inventory Policy** is to be calculated. Each policy set is assigned a unique ID and includes information that defines, for example, the associated **Forecast View**, time periods, and planning horizon.

Policy Simulation

In PeopleSoft Inventory Planning, a feature that simulates the effects of various stocking scenarios, compares current policy with simulated policy, and determines the best inventory investment strategy.

Population

A Population is defined on top of DataMaps created using Enterprise Warehouse metadata. The Population builder allows you to easily format a SQL statement, using filters, to select rows from one or more tables joined together in a DataMap. You can view the results of a Population directly from the browser.

Pop Up Payment Option

A variation on a joint and survivor payment option under which the benefit payable to the participant is increased if the beneficiary should die prior to the participant.

Portal

A portal is a web site that helps you navigate to other web-based applications and content. Users often consider a portal their “entry point”—the place they typically visit first after launching their web browser.

Portal Registry

The portal registry is a tree-like structure in which content references are organized, classified, and registered. It is a central repository that defines both the structure and content of a portal through a hierarchical, tree-like structure of “folders” useful for organizing and securing content references.

Portal Registry API

The Registry API is provided for accessing each portal registry from PeopleCode, COM, Java, or C programs. Providing the same kind of registry management capability as the online administration pages, it can be used by external systems to update the registry to reflect changes in the content reference URL, taxonomy, and effective dates. The Registry API is fully described in the PeopleCode documentation.

Portal Servlet

A Java servlet that runs on a web server. The portal servlet intercepts user requests for content, retrieves content, and builds a single HTML document to be displayed in the user's browser.

Portal Solutions

Portal Solutions are separate product offerings from PeopleSoft that consist of pre-built, packaged solutions focused at different audiences (customers, suppliers, and employees). Because they are both pre-built, supported application products, Portal Solutions can be deployed swiftly and easily, saving significant resources when compared to other custom-built solutions.

Position

The officially assigned duties and responsibilities that make up the work performed by an employee. Positions are linked to Job Codes, which can be considered the electronic version of the Position Description. There can be a many-to-one relationship between the Position and Job Code.

Position Budgeting

The budget amounts (salary, benefits, and earnings) associated with positions within an organization. Position budgeting can be calculated based on position information loaded from a human resource system. Position budgets are used to generate line-item budgets for personnel costs. PeopleSoft Budgeting-specific.

Position Change

A move by an employee to another position during the employee's continuous service under the same appointment within the same agency.

Position Date Created

Date the position was created for use in the agency.

Position Description (PD)

In accordance with OPM guidelines, an official description, authorized and approved by an agency official, describing duties and responsibilities to be performed. Position classification standards are used to describe the work, classify the work components by occupational series, and factors (e.g. supervisory control, scope, complexity, competencies required) are used to determine the grade level (i.e., salary range) for the position.

Position Description Number

A number assigned to identify various types of Position Descriptions.

Position Description Required

Identifies those positions for which a position description must be maintained.

Position Number

A number that identifies an authorized Position.

Positive Input

Data such as hours worked or a bonus amount entered for elements that change each pay period. Positive input can be entered manually, generated by the system, or received from other applications.

Positive Task Reporting

A method of time reporting in which all required task elements must be provided (see Time Reporting)

Positive Time Reporting

A method of time reporting in which all elements of time must be provided (see Time Reporting)

Post Differential Percent

Additional compensation that may be paid to certain employees who work in Guam or the Northern Mariana Islands.

Post Differential, Non-Foreign

A differential payable to an employee at a location in a non-foreign area if conditions of environment differ substantially from conditions of environment in the contiguous United States and warrant its payment as a recruitment incentive.

Post-56 Military Deposit

The OPM provides guidelines to Federal agencies on how to calculate and process these voluntary employee deductions from pay toward the employee's current retirement fund for those periods of eligible military service.

Post-Tax Deductions

See After-Tax Deductions

Pre-encumbrance

An encumbrance that occurs before an employee/employer relationship exists. You encumber funds for an employee you have on staff; you pre-encumber funds for an employee that you anticipate hiring. For example, you would pre-encumber funds for a new position that has just been approved but not filled.

Premium

Any additional compensation for extra hours worked, often expressed in terms of factor-above-normal-per-hour pay, such as time and a half (where one-half is premium pay), double time or triple time. Also, any additional pay provided to a time reporter based on compensation rules (see Time Administration in your *PeopleSoft Time and Labor PeopleBook*).

Prenote

A prenotification or waiting period requested by banks before processing payroll direct deposits.

Pre-Retirement Survivor Annuity (PRSA)

A benefit paid to a beneficiary if a pension plan participant dies before commencing benefits. Qualified plans must offer a pre-retirement survivor annuity, although the employee can be required to pay for the coverage with a reduction in the benefit.

Pre-Tax Deductions

See Before-Tax Deductions

Previous Day's Close

The previous trading day's last reported trade.

Price Break

Defined in PeopleSoft Order Management, and linked with price sets, a price break defines the actual adjustments that are made to the list price. They are valid only within a time frame you establish.

Price Rule

Used in conjunction with price sets, rules are essentially a decision tree that establishes the search order the system uses in reviewing sets for a match on the variables they reference for price adjustments.

Price Set

Linked with price breaks, a price set specifies the parameters for your price adjustment. It establishes selection criteria, determines whether the break is based on quantity or price, and defines how the adjustment is applied.

Price Source

A service provider or publication that reports the trading activity for a stock traded on stock exchanges. Examples include Wall Street Journal and Bloomberg.

Primary event code

Primary event codes, also called purpose codes, specify the status of the transaction: whether it's a new transaction, a cancellation, a duplicate, a status request, and so on. Every transaction has a primary event code assigned to it.

Primary Insurance Amount (PIA)

The benefit amount calculated under the Social Security benefit formula.

Primary scroll record

Primary scroll records are the principal SQL table or view associated with a page scroll level. A primary scroll record uniquely identifies a scroll level in the context of its page: each scroll level can have only one primary scroll record; and the same primary scroll record cannot occur on more than one scroll at the same level of the page.

Prior Period

In Time and Labor, any payroll period before the current one.

Prior Period Adjustment

A change or correction to previously reported time or task information, or an insertion of time or task information. Often requires the original report to be offset (reversed) and the correct information to be recorded. (see Time Reporting)

Private

A tracking method used by a privately held company to track their daily prices. The Board of Directors typically establishes a price for a period of time. Stock of a privately held company is not traded on an exchange.

Private Views

User-defined views available only to the user who created them. For more information, *see* Budget Views.

Process

See Batch Processes.

Process Definition

Process Definitions are created in the Process Scheduler Manager pages to define each specific run request. A Process Definition is comprised of a variety of variables including

panels associated with a request, Process Groups, output parameters, run locations, and many more.

Process Group

Used to associate specific Process Definitions with a Class Profile in Security Administrator. This allows administrators to restrict an operator's ability to initiate requests.

Process Instance

A unique number that identifies each process request. This value is automatically incremented and assigned to each requested process when the process is submitted to run.

Process Job

Multiple Process Definitions can be logically linked into a job request to process each request serially or in parallel, and optionally initiate subsequent processes based on the return code from each prior request.

Process List

The set of instructions the system uses during a payroll process to determine which elements to resolve. A process list is comprised of sections that identify the sets of elements to be resolved. You build process lists and attach them to calendars.

Process List Manager

The program used during batch processing that reads the Process List and calls the PIN Manager to resolve elements on the list.

Process Request

A single "run request," such as an SQR, a COBOL program, or a Crystal report that you run through Process Scheduler.

Process Run Control

A PeopleTools variable used to retain Process Scheduler-defined values needed at runtime for all requests referencing a run control ID. This is not to be confused with application run controls, which may be defined with the same run control ID, but only contain information specific to a given application process request.

Process Scheduler

A PeopleTool that performs tasks behind the scenes of your application. It can run several kinds of processes, such as COBOL, SQR, and Application Engine programs. You can schedule processes to run on a regular schedule or at your request. Processes can run on your workstation or on a server.

Process Scheduler Server Agent

The server-based program (PTPUPRCS) that manages the selection, validation, and initiation of all queued requests for each defined server within your batch environment (Process Scheduler).

Process Type

A global process definition under which related process definitions are grouped. This allows for easy maintenance of Process Definitions that share common parameters.

Processing group

In order to partition application processing between the client and the application server, it is necessary to define units that, as a whole, run in one location or the other. We call these units processing groups.

Processing groups can encompass one or more PeopleCode events. Some processing groups can run either on the client or on the application server, such as Component Build and Component Save.

Product

A commodity primarily defined in PeopleSoft Order Management. It may be: 1) The Order Management view of an inventory item that has attributes the same as or different from those of its inventory counterpart. 2) A commodity that is not a stocked inventory item such as a product kit or a service. 3) A tangible commodity that is drop shipped from another vendor and is never stocked in inventory.

Product Alternate

Alternative products that can replace the product ordered when it's out of stock or a problem with a particular product temporarily prevents shipment.

Product Catalog

A configurable list of available products that may be of interest to a specific customer. You can create two types of catalogs—inclusive catalogs that contain all the products you want made available to a customer and exclusive catalogs that contain the products you want to withhold from your customer. By attaching product catalogs to a Sold To customer, you define the products they can buy.

Product Definitions

This support module describes how other support modules process the instruments that belong to a particular product. For example, different products have different cash flow characteristics and may be stratified differently, or may react differently to changes in interest rates. This module enables you to specify each of these actions for each instrument.

Product Kit

A commodity that consists of a fixed set of components that are sold together. It appears as a single line on an order, but is represented by multiple lines on shipping documents. Product kits may comprise inventory items, non-stockable products, or a combination of both.

Product Kit Component

A commodity that is part of a product kit. It may be an inventory item or a non-stockable product such as a service.

Product Pricing Model

In the financial services industry, this defines models that describe indices upon which future rates are paid or charged for an individual product.

Product Tree

A user-defined graphical representation of a company's product structure. A product tree defines how products are promoted and determines what users have authority to promote those products.

Production Option

Effective-dated combinations of BOM codes and routing codes. You can create multiple effective-dated BOM code/routing code combinations (or production options) for an item. These combinations can be extracted to PeopleSoft Production Planning. They enable the specification of multiple production variations for an item and provide control of seasonal variations by effective date.

Production Option Cost

A cost based on a specific BOM/routing combination (also known as a production option). The Production Option Cost utility rolls up production options costs based on specific BOM/routing combinations, enabling you to cost individual production options and later to have the DataLink pass this cost to the Planning engine. If this utility isn't run, the Planning engine will use the standard item cost based solely on the primary BOM and routing instead.

Productive Time

Employee scheduled time spent performing any task for which a position was created; work performed on behalf of a business entity that is required for that entity to fulfill its business purpose. Employees doing the work they or someone else was hired to do.

Productive Unit

In Italy employers organize employees into productive units based on agreements between the unions and the employer.

Profile

A data set that you aggregate from the Enterprise Warehouse, according to the filters you specify, the Key Performance Indicators you select, and the 3rd party demographic data you include.

Profile Factor

In PeopleSoft Demand Planning, the weight index assigned to each **Forecast Period** to take into account seasonal fluctuations in demand. The factor or index typically measures the percentage of difference between the base demand and the expected actual demand in the period.

Profiles

Group of employees defined according to a list of job codes and departments. You can use these profiles to ascertain training demands within your organization based on set criteria.

Profit Manager

The Profit Manager is a set of integrated tools that enable true profitability reporting. Profit Manager features are tightly integrated with the PeopleSoft Analytic Applications and provide you with ways to ensure data integrity, edit data, and post data to the Performance Ledger table.

Project

In PeopleSoft Time and Labor, a specific endeavor undertaken to achieve a specific goal. Typically, projects are approved and undertaken with level of cost, schedule, and performance already agreed upon. A project is composed of a set of tasks, each of which requires staffing, provisioning, and/or scheduling. Project progress is often measured in terms of task completion.

Projected Run Date

In PeopleSoft Demand Planning, a calculation made that projects a life volume for a period based on a calculated run rate or performance ratio.

Projection.

An estimated pension benefit calculated as of a future date or any estimated data used as the basis for such a calculation.

Promotion

- For positions under the same type job classification system and pay schedule, a promotion changes the employee to a higher grade level or makes permanent a Promotion NTE;
- When the old and new positions are under different job classification systems and pay schedules, a promotion changes the employee to a position with a higher rate of basic pay or makes permanent a Promotion NTE.

Promotion Pattern

In PeopleSoft Demand Planning, an **Event** function that enables you to apply weights to promotions across a range of **Forecast Period**.

Prompting Profile

A task profile usually used by account managers as a way of creating task profiles for employees who report task time differently by customer. For example, you might have an account manager who has fifty customers; when the account manager comes in each day to report time, the system will display all the customers, and indicate which customers it will use as a default if she doesn't manually report time.

Prorated

In Enterprise Planning and Simulation, prorated is when the computed forecast and the summarized forecast are two different versions of the statistical forecast. In addition, the forecast at the product family level can be allocated down to the individual products. Usually this allocation is done in proportion to the calculated product forecasts at that level. This version of the (statistical) forecast is called the allocated or prorated statistical forecast.

Pro-Rate Purchase

A purchase in which the number of shares to be purchased is prorated according to a specified factor. This may occur when the total number of shares to be purchased is greater than the number of shares allocated to the stock plan from the treasury.

Prorated Forecast

In PeopleSoft Demand Planning, a forecast developed by factoring the group forecast down one level at a time to make the sum of the item forecast equal to the aggregate forecast. The prorated forecast tends to be more accurate than the **Statistical Forecast**.

Proration Rule

Element that defines how you want to prorate an item. You use proration rules in numerous places—for instance you could prorate an earning, deduction, or many of the elements that make up an earning or deduction.

Proration Threshold Ratios

In PeopleSoft Demand Planning, the upper and lower ratios used as thresholds for **Reasonableness** checks when a forecast is developed using proration.

Provider

An entity, such as an insurance company, that provides one or more of the benefits your company offers. For example, Metropolitan Life Insurance Company is a provider to companies that use a Metropolitan life plan.

Proxy Person

A highly compensated executive. Corporations must include information regarding the most highly compensated executive officers in their proxy reporting.

Proxy Statement

The document that must accompany a solicitation of proxy appointment under SEC regulations. The purpose of a proxy statement is to provide shareholders with the appropriate information to make an intelligent decision.

PSADMIN

A PeopleSoft utility providing a menu interface to create, configure and administer application server domains and the Process Scheduler Server Agent (Batch Server).

PSAPPSRV

PSAPPSRV is the main server process running within a domain. PSSAPPSRV performs the functional requests, such as building and loading components. It also manages the memory and disk-caching for PeopleTools objects on the application server. Each PSAPPSRV process maintains its own memory and disk cache.

It provides authentication services for incoming users. For instance, it checks the PeopleSoft OPRID against the directory server or PSOPRDEFN table.

PSQCKSRV

Essentially, PSQCKSRV is a copy of the PSAPPSRV. It performs quick, read-only SQL requests. It is an optional Server Process designed to improve performance by handling items in the PSAPPSRV transaction request queue.

PSQRYSRV

Like the PSQCKSRV server process, PSQRYSRV is designed to alleviate the workload of PSAPPSRV. PSQRYSRV is designed to specifically handle all user-generated queries submitted by PeopleSoft Query (PSQED.EXE). This server process is designed to improve overall application server performance whether or not you have PSQCKSRV configured. It is specifically, and exclusively designed to process PeopleSoft Query transactions, which can be very SQL intensive.

PSSAMSRV

It processes conversational SQL transactions primarily for Application Designer.

Public Views

Coordinator-defined views, available to anyone using the application. For more information, *see* Budget Views.

Publish/Subscribe

Publish/Subscribe type messaging is performed with PeopleTools Application Messaging technology. You can send data from one PeopleSoft system to another in an asynchronous mode—meaning the two systems don't have to be sending and receiving at the same time. This is possible because the message transfer is accomplished through a Web server with an "http: gateway."

Publishing

This refers to the ability to aggregate, post, and expire content on a portal web site.

Punch

Precise instances of date and time recorded for a user and measured in seconds, minutes, hours, day, month and year and time zone (see Time Reporting)

Punch Duration

Length of time between two punches in increments of hours or partial hours (see Time Reporting)

Punch Matching

Area of the application which converts paired punches to punch duration by processing rounding rules and assigning the tasks to the appropriate logical day based on rules established by the user

Punch Restriction

The facility to constrain a time reporter's ability to create a punch that deviates from the schedule (see Time Reporting)

Punch Type

A user defined classification of punches, i.e. In, Out, Start, Stop (see Time Reporting)

Purchase

The issuance or purchase of shares through a stock purchase program. The purchase is made using current contributions from a participant and any carry-forward remaining for the participant from previous purchases.

Purchase Price

The discounted price paid for the shares at the end of a purchase period.

Purchase Price Variance

A PeopleSoft Payables matching feature that compares purchase order and inventory prices for any variance in the prices.

Purge Rules

The rules that define criteria to clear data you no longer need from previous open enrollment processing cycles in PeopleSoft Benefits Administration.

Pyramiding

A computer calculation enabling an individual owner of one share of stock to use the stock-swap technique to exercise a stock option of any size without using cash. Not many corporations permit pyramiding.

Q***QDRO***

See Qualified Domestic Relations Order.

QDRO Alternate Payee

A former spouse who is entitled to a portion of a participant's pension benefits as a result of a court order.

QJSA (Qualified Joint and Survivor Annuity)

A post-retirement death benefit for a spouse. Plans subject to this requirement must provide an annuity for the life of the participant with a survivor annuity for the life of the participant's spouse.

QMCSO (Qualified Medical Child Support Order)

A QMCSO is a court order that requires a group health care plan to provide benefits to the child of a participant as part of a child support arrangement on the behalf of that participant. Base Benefits enables the tracking of QMCSOs for dependents.

Qualified Domestic Relations Order (QDRO)

A court order ordering a division of a participant's pension benefits. This is normally the result of a divorce and gives a portion of the pension benefits to the former spouse.

Qualified Plan

A pension plan for which the employer can take tax deductions for contributions to the plan. Investment income of the plan trust fund is not taxable to the employer. Tax law places restrictions on the plan rules.

Qualifying Dispositions

A transaction whereby a participant sells shares acquired through a stock purchase plan two years after the grant date and one year after the purchase date.

Quality Function

A level of configuration that enables you to define the fields and attendant information that provides a base level for inspection plan and integration. Quality functions enable you to map process-specific field information into PeopleSoft Quality for identification, tracking, and analysis.

Quality Ranking Factors

Knowledge, skills, and abilities that could be expected to enhance significantly performance in a position, but are not essential for satisfactory performance. Applicants who possess such KSAs may be ranked above those who do not, but no one may be rated ineligible solely for failure to possess such KSAs.

Quality Server

A PeopleTools-based analysis and graphing program.

Quality Step Increase (QSI)

A step increase awarded to an employee for sustained high quality performance.

Quantity Allocation Method

In PeopleSoft Inventory, the method used to determine how available quantity will be allocated to prioritized demand lines when using the online reservations page.

Quantity Precision Rules

A set of rules specifying whether item quantities for a given unit of measure are expressed as whole numbers or as decimals. Quantity precision is set at the inventory setID and item-UOM levels.

Query

A set of data members that are selected from a Class catalog (provided by the Business Interlink Plug-in) as well as a generic form of Criteria. The criteria are composed of <left-hand-side> <Relational Operator> <right-hand-side> statements that can be concatenated using a set of logical operators. All operators and class catalogs are dynamically provided through the Business Interlink Plug-in.

R**Race And National Origin Code**

A code that identifies the employee's basic racial and national origin category.

Range of Dates Reporting

A Time and Labor process that enables you to report a start and stop date, a time reporting code and task information for a single employee. The system transforms the information into instances of daily time based on the employee's schedule or default work schedule, replacing the scheduled time with the entered Time Reporting code and the number of scheduled hours on a day-to-day basis.

Range Penetration

In PeopleSoft Workforce Analytics, Range Penetration is the degree to which an employee's actual pay has progressed through their salary grade, and is expressed as a percentage. The calculation is:

Range penetration = (Employee Base Pay – Range Minimum)/(Range Maximum – Range Minimum).

Range Width

In PeopleSoft Workforce Analytics, the difference between the maximum and the minimum values of the pay range calculated using the following formula (and expressed as a percentage):

(Maximum – Minimum)/Minimum.

Rapid Time Entry

The process that enables you to enter daily time for single employees without the system editing your field entries. The system populates temporary tables, which are used by a batch process that reads, edits and moves the data into the appropriate time and labor tables. You cannot prompt for valid values in any of the fields, and the online system does not edit any of the data you enter against other tables.

Rate Code

Alphanumeric reference to the cost per hour or unit of time reported to a specific TRC.

Rate Code [Global Payroll]

IDs for pay components. Rate codes define rates of pay and are set up in the Comp Rate Code table. Rate codes are then used to represent pay components in pages and when you configure compensation packages in the compensation record.

Rate Code Group

A rate code group is a number of pay components (represented by rate codes) bundled into a subset of a compensation package. The rate code group is used to calculate percentage-based components that do not apply the percentage to all pay components in the compensation package. Rate code groups are constructed on the Rate Code Groups page.

Rate Code Type

Defines how the monetary value of the rate code is calculated. The compensation rate code type is defined on the Comp Rate Code table. Valid values are Flat Amount, Hourly Rate + Flat Amount, Hourly Rate, Percent, and Points.

Rate Combinations

The combination of rate types and conversion rates with account types that is linked to your budgeting model. Typical rate types are current, commercial, floating, average, and historical. Effective dates define different rates for different budget periods. There are several conversion rates for any pair of currencies including not only the current rate, but others rates such as average, historical, asking, and so on. These different types of rates are appropriate for different types of accounts.

Rates

The arrays of values used to calculate the cost of a plan to an employee. Rates can be age-graded, service-related, or general, depending upon the benefit plan type. Any number of benefit program and benefit plan combinations can use each set of rates.

In Enterprise Performance Management, a rate is determined by the user and specifies the dollar amounts to be calculated for each model. This is a financial services industry term.

Rating Model

The scale used by your company to measure competency proficiency. The default rating model is the PSCM (PeopleSoft Competency Management) Rating Model that PeopleSoft delivers with your PeopleSoft Human Resources System.

Raw Punches

See Actual Punch; typically this is distinguished from a rounded punch (see Time Reporting)

Reason Code

A code describing employee time such as comments for sick time or travel time.

Reassignment

Change of an employee from one position to another without promotion or change to lower grade.

Reconciliation

Within PeopleSoft Enterprise Performance Management, reconciliation differs slightly when it is performed within the PeopleSoft Enterprise Warehouse and when it is performed within the PeopleSoft Analytic Applications.

In PeopleSoft Funds Transfer Pricing (FTP) and PeopleSoft Risk Weighted Capital (RWC), reconciliation identifies differences between Performance Ledger balances and the instrument or position balances, which are risk weighted according to the basis rules you have assigned.

The first step in reconciling basis rule balances is to reconcile the individual balances for accounts, instruments, and positions. Reconciling the total balances is the second step. This means that you reconcile the difference between Account/Instrument balances, and the difference between Account/Position balances.

In the PeopleSoft Enterprise Warehouse, reconciliation is a period-end process that posts journal entries to the Performance Ledger for the discrepancies found when you reconciled the individual balances. Typically, you'll run the PF Reconciliation engine after a period to compare "to and from amounts" between tables such as REVENUE_F00 and PF_LEDGER, or the GL_LEDGER and the PF-LEDGER.

Record Date

The date a stockholder must officially own shares in order to vote at the meeting or to derive an adjustment resulting from a stock split or a stock dividend. The Board of Directors sets the Record Date.

Record Definition

A logical grouping of data elements.

Record field

Once a field is inserted into a record definition it becomes known as a Record Field within the record.

Record Group

A set of logically and functionally related control tables and views. Record groups exist for two basic reasons:

- To save you time—with Record Groups, TableSet sharing can be accomplished quickly and easily, eliminating an enormous amount of redundant data entry
- To act as a safety net—Record Groups ensure that that TableSet sharing is applied consistently across all related tables and views in your system.

Record Input VAT Flag

Within PeopleSoft Purchasing, Payables, and General Ledger, this flag indicates that you are recording input VAT on the transaction. This flag, in conjunction with the Record Output VAT Flag, is used to determine the accounting entries created for a transaction and to determine how a transaction is reported on the VAT return. For all cases within Purchasing and Payables where VAT information is being tracked on a transaction, this flag is always set to Yes. This flag is not used in Order Management, Billing, or Receivables, where it is assumed that you are always recording only output VAT, or in Employee Expenses, where it is assumed that you are always recording only input VAT.

Record Output VAT Flag

For certain transactions within PeopleSoft Purchasing, Payables, and General Ledger, it may be necessary to record both input VAT and output VAT on the same transaction. Generally, this would be a situation where the purchaser was required to self-assess VAT. Within these situations, this flag indicates that you are recording output VAT on the transaction. This flag, in conjunction with the Record Input VAT Flag, is used to determine the accounting entries created for a transaction and to determine how a transaction is reported on the VAT return. This flag is not used in Order Management, Billing, or Receivables, where it is assumed that you are always recording only output VAT, or in Employee Expenses, where it is assumed that you are always recording only input VAT.

Record Owner

The "Stockholder of Record" of the stock. This may be different from the "Beneficial Owner" of the stock.

Record Suites

Record suites are temporary tables that enable the system to track how many processes are running. These temporary tables leave the fact tables accessible for processing other jobs simultaneously without impacting your processing.

Reduction In Force (RIF)

Method used to reduce the number of government workers in an agency.

Reemployed Annuitant

An employee who has retired from Federal employment and is receiving an annuity. His/her salary is reduced by the amount of the annuity.

Reference Transaction

In People Soft commitment control, a reference transaction is a source transaction that is referenced by a higher-level (and usually later) source transaction, in order to automatically reverse all or part of the referenced transaction's budget-checked amount. This avoids duplicate postings during the sequential entry of the transaction at different commitment levels. For example, the amount of an encumbrance transaction (such as a purchase order) will, when checked and recorded against a budget, cause the system to concurrently reference and relieve all or part of the amount of a corresponding pre-encumbrance transaction, such as a purchase requisition.

Referential Integrity

Issues that occur when an update to an instance of one object invalidates one or more instances in a related object. In other words, when you make a change to one area of the application, referential integrity makes sure the changes do not adversely affect another area of the application.

Refresh Time

The process that retrieves the appropriate current version of objects related to employee time (such as task profiles or work schedules) and associates them with that time.

Region Codes

Regions may or may not be physical entities, they may simply be another way to geographically categorize an area. When a region does represent a physical entity, the region code has the same characteristics as a business, that is, an address and a language spoken.

Register of Separations and Transfers (ROST)

The ROST is a regulatory compliance document used by federal agencies to summarize the information in an employee's Individual Retirement Record (IRR). The ROST is a one-page cover sheet that accompanies a batch of IRRs being submitted to the Office of Personnel Management (OPM) at the time of an employee's separation from a federal agency. Employees covered by the CSRS retirement plan require SF-2807. Employees covered by the FERS retirement plan require SF-3103.

Registration

The name or names that appear on the stock certificate to indicate who owns the stock.

Registration Statement

The document that must be filed to permit registration of an issue of securities under the Securities Act of 1933. A major component of the registration statement is the prospectus that is to be supplied to prospective purchasers of securities.

Regression Analysis

A statistical technique that determines the relationship between two or more variables. Regression predicts the value of one variable (the dependent variable) based on one or more independent variables.

Regular Base Compensation

In PeopleSoft Workforce Analytics, the annualized, quoted, compensation rate for a job. Consists of fixed compensation, does not include variable compensation.

Regular Time

An employee's normal (scheduled/shift) work hours.

Regular Time

In PeopleSoft Workforce Analytics, an employee's normal (scheduled/shift) work hours.

Regulation T

Federal Reserve Board regulations governing the extension of credit by brokers or dealers, including their participation in same-day sale transactions and sell to cover exercise.

Regulatory Region

The Regulatory Region functionality in PeopleSoft HRMS is designed for use in performing regulatory and regional edits. You'll use Regulatory Region to drive PeopleCode edits, perform set processing, and control what codes and values the operator sees. A Regulatory Region can be any country (or province or state) where there are specific laws and regulations addressed by functionality in PeopleSoft HRMS.

In Enterprise Performance Management, a Regulatory Region is a region with a common regulatory framework; such as a country (CAN for Canada), or a smaller state or provincial entity (CANBC for British Columbia).

Related Content

Content links displayed in related content template pagelets. Related content pagelets are sensitive to the context of the menu item with which they appear. Context is setup with the context manager.

Related Education

Education above the high school level that has equipped the applicant with the KSAs to perform successfully the duties of the position being filled. Education may relate to the duties of a specific position or to the occupation, but must be appropriate for the position being filled.

Release

An industry standard term associated with the lifting of a company's Repurchase Option from a portion or all shares from a Restricted Stock Award (RSA). RSA's are subject to release schedules, similar to vesting schedules.

Relevant Constraint

A constraint PeopleSoft Planning considers when it calculates a score and when it optimizes the schedule. See also **Scorecard**.

Reloads

Some stock option plans provide for the grant of a "reload" stock option in connection with stock option exercises, typically by means of stock swaps. A reload option feature provides that upon a stock exercise, the employee will receive an automatic grant of a new stock option at the then-current fair market for the shares that they exercised or for the shares that they used to swap.

Remark Codes

Codes that cause the printing of pre-set text passages on a notice of action form. Some passages are general purpose and others are specific to the personnel action being processed.

Remit From Customer

A customer who is responsible for payments billed to other customers. During cash application, it's useful to look at open items for the Remit From group.

Remittance Worksheet

A work space in PeopleSoft Receivables used to select drafts for remittance to the bank.

Reorder Point Policy

In PeopleSoft Inventory Planning, a policy that determines when a replenishment order is launched for an item. The policy has several methods that include days supply, lead time demand, and **Fixed Quantity**.

Replacement Option

The “new” “replacement” stock option that will replace the original stock option. This option will have a grant price lower than the original stock option.

Replenishment Request

In PeopleSoft Flow Production, an online request for material made when the material is needed. You can generate replenishment requests manually or automatically using backflushing. You can communicate that request using pull lists, pull tickets, or Workflow notifications.

Reported Time

Clock time or elapsed time provided to the system by the user (see Time Reporting)

Reporting Person

An insider that is regularly considered by the SEC to have material information and policy-making authority for the corporation. These individuals are subject to the reporting requirements promulgated by Section 16 of the Securities Exchange Act of 1934. Reporting Persons typically include Directors, Officers, and shareholders with 10% holding interest in the equity of the registrant's securities.

Repricing

An agreement between the corporation and the optionee that allows the optionee to cancel an outstanding high-priced, usually "Out-of-the-Money" stock options for lower-priced options.

Repricing Election

Eligible optionees can choose (elect) to accept the corporation's repricing offer or choose to decline the offer.

Repurchase

The reacquisition of shares of stock from an individual by a corporation. This usually occurs when an individual fails to meet the vesting requirements on a RSA or option that is exercised before it vested. The corporation might pay the original cost of the shares to the individual or the fair market value of the shares at the time of repurchase.

Repurchase Option

An irrevocable, exclusive option to repurchase up to the number of shares that constitute Unreleased Shares at the original purchase price per share. The Company shall exercise said option. The repurchase of outstanding shares is regulated under the laws of all states (except Massachusetts). Under some laws, as under the Model Business Corporation Act, the repurchase is prohibited unless the corporation remains solvent, in both the equitable and bankruptcy senses of insolvency and after taking any liquidation preferences of other outstanding stock into account.

Repurchase Right

A company's contractual right to buy back from an employee any stock resulting from the exercise of the option. The buy back can be at fair market value, book value, or the original purchase price.

Reset

In PeopleSoft Demand Planning, a function of the **Forecast Calculation Process** that determines which forecast model will produce the best forecast, meaning the model with the lowest ratio of error.

Resolution

An activity that closes or partially closes a deduction, such as matching it to a deduction authorization, writing it off, or sending it back to PeopleSoft Receivables.

Resolution Entry Type

Code that identifies how to process activities for items in PeopleSoft Deduction Management and how to create accounting entries.

Resolution Method

A set of rules that defines how to automatically match or write-off deductions in PeopleSoft Deduction Management.

Resolution Worksheet

The workspace in which deduction items are paired with offset items and resolved or written off in PeopleSoft Deduction Management.

Resources

Resources are the economic elements that are required to perform the activities associated with your business. Resources are consumed in the performance of these activities, and thus denote operating costs. In PeopleSoft Activity-Based Management, resources are typically regarded as the groupings of one or more general ledger accounts. In a service business, resources might include salaries, office rentals, and costs of capital such as information systems, depreciation, real estate taxes, and other associated costs.

Resource Driver

In Activity-Based Management, a Resource Driver defines the quantity of resources used by an activity.

Resource Planning

In PeopleSoft Activity-Based Management, Resource Planning focuses on resources allocations that create expected results like driver rates and cost object costs.

Resource Supplied

An attribute that enables you define a resource as committed or flexible. A committed resource is one that will not likely change in the short term. A flexible resource is more likely to change within the short term.

Resource Transaction

An individual cost line within PeopleSoft Projects. It is through resource transactions that individual costs and types of costs are tracked. Each resource transaction contains a cost and a quantity and as many identifiers of that cost as necessary. Resource transactions are created when you receive information from other systems, run allocations with project resources as the target, or perform internal transactions such as billing, project closure, or adjustments.

Resource Type

The resource transaction field in PeopleSoft Projects that identifies the resource associated with a given cost. Resource types may be very general or very specific depending on your needs; they are used in conjunction with resource categories, resource subcategories, and resource groups.

Resource Use

Resource Use defines the behavior of a resource within PeopleSoft Enterprise Performance Management. An intermediate resource is a grouping of general ledger line items that may be allocated to another intermediate resource or to a primary resource.

Restricted Punch

A punch which is not accepted because it occurs outside of the predefined number of hours and minutes before or after a scheduled (Understanding Time Collecting Device)

Restricted Securities

Securities issued privately by the company, without the benefit of a registration statement. Restricted securities are subject to a holding period before they can be sold under Rule 144.

Restricted Stock Awards (RSA)

An award of shares of stock to an individual, typically granted at the par value or for no consideration. The shares are awarded on the basis of some future performance goal, either the passage of time (vesting) or the attainment of a specific goal. When the goal is achieved, the vesting occurs. The individual, typically, has all other shareholder rights over these shares such as, voting and dividend rights. The shares are issued in the name of the individual at the time of the award and are held in escrow until vesting occurs. If an employee terminates prior to the vesting of the shares then the company normally repurchases the unvested shares.

Retained Grade Effective Date

Date employee became eligible or began receiving a retained grade and pay.

Retained Grade Expiration Date

Expiration date of an employee's retained grade and pay.

Retest Date

In PeopleSoft Inventory, the date a lot should be inspected to determine whether it is still acceptable for fulfillment or consumption. (Retest Date = Creation Date + Retest Lead Time)

Retirement

Types of retirement are:

- Mandatory Retirement.
- Disability Retirement.
- Voluntary Retirement.
- Special Option Retirement.
- ILIA (In Lieu of Involuntary Action) Retirement.

Retirement Coverage Code

A code used to denote an employee's retirement coverage. The major ones include the following:

- Civil Service (CSRS)
- Federal Employees Retirement System (FERS) and FICA
- Foreign Service (FS)
- CSRS Offset
- CSRS - Special (for LEOs)
- FERS and FICA - Special (for LEOs)
- Social Security System
- None

Retroactive Benefits/Deductions

Deductions taken or benefits granted due to a recalculation of previous benefits and deductions. Late or modified union contracts, late paperwork, and delays in benefit enrollment processing may all result in a need for benefit/deduction recalculation.

Return Type Code

A designator on returned material authorizations (RMAs) that indicates what actions the return initiates. This may include replacement of the product or the creation of a credit memo in PeopleSoft Billing.

Reverse Split

A reduction in the number of outstanding shares of a corporation's stock, with a corresponding increase in the stock's value.

Reversionary Annuity

A form of pension payment where the retiree foregoes all benefit during his or her lifetime so that the entire benefit is paid as an annuity to a beneficiary after the retiree's death. If the beneficiary predeceases the retiree, the benefit is forfeited.

RIDDOR (Reporting of Injuries, Diseases, and Dangerous Occurrences Regulations)

Health and safety regulations in the United Kingdom requiring employers to report certain types of health and safety incidents to the Health and Safety Executive (HSE).

Rider

A special court-ordered or regulatory provision that may be applied to an enrollment to expand or limit any dependent or beneficiary coverage.

Risk Function

In Risk Weighted Capital, this is a user-defined formula that the system uses to derive risk weights.

Risk RuleSet

Used to assign a number of rules to a basis, for processing by the PeopleSoft Risk Weighted Capital Application. Used to group together a number of rules that frequently apply to the same type of balance.

Risk Type

In Risk Weighted Capital, this defines the types of risk associated with your business or activity. For example catastrophic, credit, legal, operational, regulatory, foreign exchange, market, interest rate.

Risk Weight

In Risk Weighted Capital, the risk weight is assigned by risk type, and is used to calculate capital allocation or normalized loss for the account or activity.

Risk Weighted Capital (RWC)

See PeopleSoft Risk Weighted Capital

RIZIV Code

This code is for Belgian employers to track the Federal Institute for Illness and Disability Insurance category.

ROE (Record of Employment) Reason Codes

ROE codes are defined by the Canadian government for employers to record employment actions such as Return to School or Pregnancy Leave.

ROLAP (Relational Online Analytical Processing)

ROLAP refers to the analytical processing and analysis of a relational Data Mart cube. ROLAP, is a form of OLAP that leverages the power and flexibility of relational databases.

Role

A role consists of a designated set of tasks, competencies and accomplishments required for a job code or a position.

Role user

A PeopleSoft Workflow user. A person's Role User ID serves much the same purpose as their Operator ID does in other parts of the system. It allows the system to uniquely identify the user and to determine what data the user has access to.

PeopleSoft Workflow uses Role User IDs rather than Operator IDs because it needs different kinds of user information than the rest of the system does. Specifically, it needs to know how to route work items to the user---an email address, for example---and what role the user plays in the workflow. Plus, you can include role users in your workflow who aren't PeopleSoft application users and who don't have Operator IDs.

Roles

Roles describe how people fit into the workflow. A role is a class of users who perform the same type of work, such as clerks or managers. Your business rules typically specify what user role needs to do an activity.

Roll Forward

In commitment control, rolling budget balances forward from the budget ledger you are closing (the source budget ledger) into the new (target) budget ledger.

In PeopleSoft Enterprise Planning and Production Planning, a utility that moves tasks from the past to a valid point in the future using time periods rather than fixed dates.

Roll Up

The act of totaling sums based on information tree hierarchies. You can roll up data for any group of details that you have defined as dependent with the Tree Manager.

Rolling Plan

An ESPP offering period where the purchase date is measured from the offer start date. If at the purchase date, the current stock price is lower than the last stock purchase price, you may elect to reset your employees to the new lower purchase price. The offering period is now based of the new purchase date.

Rollup

In PeopleSoft Demand Planning, the process of adding up the demand and forecast **Array** from one level to the next from child to parent. Information such as caption, description, and unit of measure can also be rolled up. The process is also referred to as summarization.

Rounded Punch

A punch that has a company's rounding requirements applied to it (see Time Administration)

Rounding Rule

Defines a rounding rule. You use rounding rules in numerous places—for instance you could round an earning, deduction, or many of the elements that make up an earning or deduction.

Routing (Manufacturing and Engineering)

A set of information detailing the method to manufacture a particular item. It consists of sequentially numbered operations that reference the task to be performed, the work center in

which the task is to be performed, the resources to be used, and the time required to complete the task. Engineering Routings differ from Manufacturing Routings in that they are not visible within Production Planning or Production Management and are isolated from Manufacturing.

Routing Option

In PeopleSoft Planning, a valid method for replenishing supply for an item. There are two types of routing options: build options and purchase options. An item may have more than one routing option.

Routing Transit Number (RTN)

A number that identifies the financial institution to which an electronic payment should be sent for deposit.

Routings

Routings connect the activities in the workflow. They are the system's means of moving information from one place to another, from one step to the next. Routings specify where the information goes and what form it takes—email message, electronic form, or worklist entry.

RSZ (Rijksdienst Sociale Zekerheid) Category Codes

These government defined Social Insurance category codes are used to maintain social security records for your Belgian employees. RSZ Categories are associated with a Contract Type, Statute and Substitute for Claeys Formula calculations.

Rule

Representation of a company's compensation, task allocation, or exception requirements (see Creating Rule)

Rule 10b-5

A SEC rule that prohibits trading by insiders on material non-public information. This is also the rule under which a company may be sued for false or misleading disclosure.

Rule 144

A SEC rule that applies to public re-sales of restricted securities as well as all sales by affiliates. The requirements include (1) current public information about the issuer, (2) a one-year holding period for "Restricted Securities," (3) unsolicited brokers' transactions, (4) an amount limitation. the greater of 1% of the outstanding stock or the average weekly trading volume may be sold during any three-month period, and (5) a Form 144 filing.

Rule Actions

Functions that can be used in the creation and application of a rule (see Time Administration)

Rule Elements

Customer defined pieces of information which are passed to Time Administration in order to apply and evaluate rules (see Time Administration)

Rule Period

A Time & Labor period used in the evaluation and application of a rule (see Time Administration).

Rule Program

Specifies the set of rules the Time Administration process will execute and the order in which it will execute the rules.

Rule Results

Net effect of the application of a rule; for instance, the creation of time, initiation of workflow, modification of reported tasks (see Time Administration)

Rule Templates

Templates used to quickly create a variety of rules for the Time Administration program to execute when processing reported and/or scheduled time. Some examples are. compensation rules for overtime and holidays, notification rules for irregular attendance, and rules for just about any other time-reporting situation that requires special processing.

Rules

Rules are your company's business practices captured in software. Rules determine what activities are required to process your business data.

Rule Set

Rule Sets enable you to apply basis rules to your PeopleSoft Analytic Application in the sequence that you prefer. This is particularly helpful if there are multiple basis rules for the same account node, product node, or position source code. Rule Sets can control the execution sequence of your rule combinations, filter combinations, or both. The first occurrence on the node will be applied and any other occurrence will be ignored. Rule Sets are also used with the Data Manager, and with the Currency Conversion engine.

Rules/Time Administration

A physical implementation or execution of a company's compensation, exception and task rules (see Time Administration)

Run Control

A run control is a type of online page that is used to begin a process, such as the batch processing of a payroll run. Run control pages generally start some type of program that manipulates data in some way.

Run Control ID

A unique ID to associate each operator with their own run control table entries. Process Scheduler.

Run ID

Code that uniquely identifies a Run Control for batch processes.

RWC (Risk Weighted Capital)

See PeopleSoft Risk Weighted Capital

S**Safety Stock Policy**

In PeopleSoft Inventory Planning, a policy that determines how safety stock quantities are calculated for an item. The policy has several methods that include days supply and percentage of demand fill.

Salary

Rate of compensation received by an employee.

Salary Group

Part of a group of defaults assigned to job codes. A salary group may include items such as steps and grades dependent on individual company parameters.

Salary Plan

A plan of salary defaults, grades, and step components

Salary Step Components

Pay components assigned to a salary step by entering the corresponding rate codes on the Salary Step Components page.

Salvage Value

An estimate of the amount of money one might receive upon selling an asset once that asset reaches its useful life. Salvage value is used in several depreciation calculations, including Straight Line.

Same-Day Sale

An exercise and sale occurring on the same day. The exercise of the option and sale of the underlying shares take place simultaneously. The broker uses the proceeds of the sale to pay

the company the exercise price and any tax withholding and the optionee the net cash (less any brokerage commission/fees).

Scale

On a Goals Matrix (In PeopleSoft Workforce Analytics), a scale that defines the lowest, middle, and highest levels of performance needed to achieve associated minimum, midpoint, and maximum levels of compensation pay out. These are referred to as the Threshold, Target, and Stretch levels, respectively. The scale can be used to standardize multiple performance goals to a common scale of measurement.

Scenario

A scenario is a particular outcome you are analyzing when you run in Scenario Manager. Scenarios enable you to study various changes in organization models you created. For each parent and child model you want to study, you create a scenario ID that you use with all run controls.

There are two types of scenarios defined in the Scenario Manager: Historical and Forecast. In the case of an Historical Scenario all future looking fields will be display only and the Scenario Manager component serves as a wrapper to run any analytic engines. In the case of a Forecast Scenario, the Scenario Manager refers to all the business rules, forecasts, and economic assumptions that make up the scenario.

In PeopleSoft Budgeting a scenario is a ChartField used in PeopleSoft Budgeting to identify different budget iterations that use different assumptions.

Schedule

Specific task, date, and time to be worked by a Time Reporter (see Scheduling)

Schedule 13D or 13G

Disclosure forms required to be filed with the SEC and the company by a shareholder (or shareholders) that own(s) more than 5% of a public company. Schedule 13G is a short-form version of the 13D and may generally (but not always) be used only by institutional investors.

Schedule Group

A category of employees or employee groups associated for purposes of time scheduling.

Schedule Number

A number identifying the salary table form that an employee's pay is computed. Also has a second meaning related to the Payment Voucher processing for the ECS.

Schedule Reconciliation

In PeopleSoft Payables, the process of reconciling scheduled payments by Payment Schedule ID. Schedule Reconciliation helps U.S. federal agencies meet their requirement to schedule or group together payment orders for submission to the Treasury Disbursing Office.

Schedule Template

An ordered pattern of workday(s) and/or off day(s) used in scheduling (see Scheduling)

Schedule Type

In PeopleSoft Payables, an indicator of the nature of items purchased with a Payment Schedule.

Scheduled Punch.

A time reporter's expected punch (see Scheduling)

Scheduling

A function of PeopleSoft Time and Labor and PeopleSoft Global Payroll that enables you to create work schedules and assign them to employees.

SearchIndex

A set of objects that give the programmer the ability to create, delete, insert, and update a search index and the items within it. Search index items contain a set of statistics about the document that has been indexed (keywords, number of occurrences, proximity to other words, and so on) as well as a key that can be used to point to the document (a URL, database key, or file path).

SearchQuery

A set of objects that allow the programmer to pass a query string and operators to the search engine and receive a set of matching results with keys to the source documents from the search index in return.

Seasonal Index

In PeopleSoft Demand Planning, measures the amount by which a forecasting period is influenced by seasonal effects. The index typically measures the percentage of difference between the base demand in the period and the expected actual demand in the period. An index of 100 indicates an average period in a seasonal cycle.

Seasonal Profile

In PeopleSoft Demand Planning, identifies the weight index assigned to a forecast time period to take in account seasonal fluctuations in the demand.

Seasonality Group

In PeopleSoft Demand Planning, a group of **Forecast Items** with a repetitive pattern of demand from year to year where some periods are higher than others. Typically a group of items is designated as a contributor to the seasonality group. Contributors are chosen because they are representative of the group, are stable, and have at least two years of demand history. The seasonality group profile is more stable than individual profiles of the contributors because the Aggregation process smoothes out random errors.

In Enterprise Planning and Simulation, a Seasonality group is a group of items with similar seasonal patterns. To determine if a forecast element is seasonal or nonseasonal, by averaging their history values over a year and determining where they were above and below average. Seasonality groups capture means seasonal behavior among related products.

Secondary COBRA Events

COBRA qualifying events that extend the amount of time a participant is eligible for COBRA coverage. For an event to qualify as a secondary COBRA event, it must fulfill the following qualifications: The participant must already be enrolled in COBRA coverage as a result of an initial COBRA event, the initial COBRA event must be one that is associated with a change to the employee's job status (such as a reduction in hours, termination, or retirement), and the secondary event must be one of the COBRA event classifications that involves loss of coverage for the dependent (such as divorce, marriage of dependent, or death of employee). See COBRA and Initial COBRA Events.

Secondary event code

Secondary event codes, also called transaction codes, specify the type of transaction in detail. For example, a transaction's secondary event code could say that the transaction is a catalog order, a rush order, or a request for a sample. Not all transaction types include secondary event codes.

Section

A set of logically related elements that are to be resolved during the payroll process. You define your payroll process by creating sections and adding them to process lists. You can create four different types of sections: standard, generate positive input, sub-process, and payee.

Section 16(a)

Provision of the Securities Exchange Act of 1934 that requires company insiders to file changes in beneficial ownership of the company's equity securities and periodic reports disclosing their holdings.

Section 16(b)

Provision of the Securities Exchange Act of 1934 that requires that any profit realized by a company insider from the purchase and sale, or sale and purchase, of the company's equity securities within a period of less than six months must be returned to the company. It is also known as the "short-swing profit" rule.

Section 423

The Internal Revenue Code section that regulates Employee Stock Purchase Plans.

Section 83(b) Election

A tax filing within 30 days of grant that allows employees granted restricted stock to pay taxes on the exercise date, rather than the date when restrictions lapse. If an employee files the

election, taxes are based on the fair market value on the exercise date, with any future appreciation taxed as a capital gain. If the employee does not file an election, taxes are based on the fair market value on the date the restrictions lapse, which will be higher assuming the stock has appreciated in value.

Securities Act of 1933

Often referred to as the "truth in securities" law, the act requires that investors receive financial and other significant information concerning securities being offered for public sale; and prohibits deceit, misrepresentations, and other fraud in the sale of securities.

Securities Exchange Act of 1934

The Congressional act that created the Securities and Exchange Commission. The Act empowers the SEC with broad authority over all aspects of the securities industry. This includes the power to register, regulate, and oversee brokerage firms, transfer agents, and clearing agencies as well as the nation's securities self regulatory organizations (SROs). The various stock exchanges, such as the New York Stock Exchange, and American Stock Exchange are SROs. The National Association of Securities Dealers, which operates the NASDAQ system, is also an SRO. The Act also identifies and prohibits certain types of conduct in the markets and provides the Commission with disciplinary powers over regulated entities and persons associated with them. The Act also empowers the SEC to require periodic reporting of information by companies with publicly traded securities.

Security Clearance

Security Clearances (Classified, Secret, Top Secret) are granted to employees by government agencies and are usually associated with jobs that bring employees into contact with classified government projects or sensitive technologies.

Security Event

In commitment control, events that trigger security authorization checking, such as budget entries, transfers, and adjustments; exception overrides and notifications; and inquiries.

Segmentation

You can "segment" components of pay based on such events as changes in compensation, employee status, or job changes during a pay period. For example, if an individual changes jobs in the middle of a pay period and your organization has a practice of separating components earned in the first job from those earned in the second job, you can set up your system to trigger segmentation of earnings results on the pay slip when there is a change to the job change action/reason field.

Selective Factors

Knowledge, skills, abilities or special qualifications that are in addition to the minimum requirements in a qualification standard, but are determined to be essential to perform the duties and responsibilities of a particular position. Applicants who do not meet a selective factor are ineligible for further consideration.

Selective Merge

In PeopleSoft Enterprise Warehouse the selective merge allows for an additional WHERE clause when you delete a merge.

Self-Service Application

Another name for PeopleSoft's HRMS and ERP applications accessed using a browser.

Sell to Cover Exercise

When an optionee sells a portion of the option shares to cover the exercise cost and any applicable taxes.

Seniority Pay

A premium paid for seniority or for the length of time an employee works for an organization.

Seniority Pay Components

Pay components whose rate codes are assigned to the seniority rate code class SENPAY (provided by PeopleSoft) on the Comp Rate Code page, allowing you to access the seniority pay functionality.

Seniority Rate Codes

A premium paid for seniority or for the length of time an employee works for an organization.

Separate Debit and Credit

A feature in PeopleSoft General Ledger that captures and reports in greater detail the accounting information that resides in balance sheet accounts. It shows the gross debit/credit balances in addition to the net balance for each account stored in the ledger. This feature also supports reversing—debit and reversing—credit journal entries for error correction.

Server Process

A server process is executable code that receives incoming client requests on the application server. The server process carries out a client request by making calls to a service that executes SQL against the database.

Service

A service performs a particular task of an application. Examples of services are MgrGetObject, SQLAccess, RemoteCall, and so on. When a client workstation sends a request to the application server, it sends a service name and a set of parameters, such as "MgrGetObject + parameters". The application server associates the service request with the appropriate server process to complete the transaction.

Service

The PeopleSoft Pension Administration function that determines how much service credit an employee has accrued.

Service Buy Back

The process by which an employee repays a pension plan in order to restore service credit that was forfeited when the employee withdrawal previous contributions. Typically, employees withdraw contributions upon termination and initiate service buy back processing upon rehire.

Service Purchase

The process by which an employee gets additional pension service credit for periods not normally considered eligible. The employee "purchases" this service by paying into the plan.

Service Schedule

A table showing how much service an employee earns based on the number of hours the employee worked during the year or month.

SetID

The label that identifies a TableSet.

Sex Code

Used to indicate gender.

Shape

For a transaction, the set of inputs and outputs for that transaction. For a class, the data members of that class.

Share

A share of a company's stock. Stock options give you the option to purchase a certain number of shares of company stock.

Share Price

The price per share of a company's stock. See, also, "stock price."

Shareholder

Owner of one or more shares of stock in a corporation. Also known as a stockholder or investor.

Shares Available to Issue

The total number of shares authorized, less shares granted, plus cancellations that revert to the Plan pool.

Shares Cancelled

This is usually triggered by a specific event, such as termination of employment in which the unvested shares as of the date of termination are no longer available for future vesting and exercise. These shares are therefore canceled from the option and can be returned to the plan, retired to treasury or allocated back to a group.

Shares Exercisable

The number of shares that are vested and available for exercise.

Shares Exercised

The number of shares purchased upon exercise of a stock option.

Shares Expired

Option shares that no longer are exercisable at the end of the option term. The length of the option term is defined in option agreement. This date is usually the earlier of the exercise period for vested shares after termination of employment or the full length of the option term.

Shares Outstanding

The number of company shares currently held by shareholders, as tracked by the transfer agent

Shift [Time and Labor]

The block of hours that an employee works in a day, such as nine to five, four to eleven, or ten to six. In PeopleSoft Time and Labor, Shift is used as a template of clock hours for scheduling an employee or group of employees to be at work or available to work (on call). Shifts may be constant, rotating, repeating, and/or split; any given shift may or may not have an associated Shift Differential or Bonus. A shift is always associated with a Work Schedule, and consists of clock hour Start and Stop times (two to allow for split shifts), meal periods (two) and relief periods (two).

In PeopleSoft Workforce Analytics, the block of hours that an employee works in a day such as nine to five, four to eleven, or ten to six.

Shift Bonus

A fixed amount (either a flat dollar figure or stated in terms of an employee's rate) paid for working a particular Shift.

Shift Code

A numerical shift identifier that is unique within a SetID.

Shift Differential

Additional compensation paid an employee for time worked during certain shifts. Typically, shift differential is administered as a flat amount per shift, hour worked, and/or as a percentage of the amount paid per shift hour or shift worked.

In PeopleSoft Workforce Analytics, a premium paid for work over regular pay, for which employees on certain shifts may be eligible, such as double-time for late night shifts. Shift differentials are usually stated as an additional rate or factor.

Shift Elements

Individual components of a shift such as TRC start and stop time, duration (see Scheduling)

Shift Name

Customer defined nomenclature for a shift (see Scheduling)

Shift Type

A customer-defined classification associated with a shift. The shift type can be used in the evaluation of rules or exceptions (i.e. On Call) (see Scheduling)

Shift Type [Time and Labor]

Time and Labor defined classification of shifts. Valid shift categories include Flex, General and Elapsed. Shift categories are used in the creation of time reporter schedules (see Scheduling)

Shipping Priority Code

Shipping Priority Codes act as tie breakers during order reservation in PeopleSoft Inventory when different orders are scheduled for the same delivery date and time. When the reservation process in Inventory encounters a situation where there are more orders than available stock, the system reserves the order with the highest priority. If schedules are encountered with the same priority, orders are then considered by order date.

Short Sale

The sale of a security that is not owned or is not delivered at the time of the trade, necessitating its purchase or delivery some time in the future to "cover" the sale. A short sale is usually made with the expectation that the stock value will decline, so that the short seller can eventually cover at a price lower than the original sale, thus realizing a profit. At the time of the short sale, the broker borrows stock to deliver on the settlement date. A short sale can be "naked," in which case the seller does not deliver the shares being sold short and must provide the broker with collateral. Or the short sale can be "against the box," in which case the seller delivers the shares being sold short for the broker to hold "in the box" until the seller chooses to close out the short position.

Short-Swing Transaction

A purchase and sale, or sale and purchase, of the issuer's equity securities by an insider within a period of less than six months. See "Section 16(b)" above.

Short-term Variable Compensation

In PeopleSoft Workforce Analytics, this is cash compensation paid to a worker that is not fixed; includes bonuses and commissions.

Sibling

A tree node at the same level as another node, where both roll up into the same parent. A node can be a sibling, parent, and child all at the same time, depending on its location in the tree.

Sibling

A tree node at the same level as another node, where both roll up into the same parent. A node can be a sibling, parent, and child all at the same time, depending on its location in the tree.

Sick Leave

Sick leave is accrued by full-time permanent/seasonal employees at the rate of 4 hours every biweekly pay period; for part-time permanent/seasonal employees, it is accrued at one hour for every 20 hours worked.

Simulated Workforce

In the PeopleSoft Workforce Rewards product, Manage Compensation module, the calculated Simulated Workforce = Existing Employees + New Simulated Employees + Reduced-Employees.

Single Life Annuity

A benefit payable during the lifetime of the participant, with no payments made after the death of the participant. Also referred to as a “life only annuity” or a “straight life annuity.”

Single Signon

This refers to the process by which a user can, after being authenticated by one PeopleSoft application server, access a second PeopleSoft application server without entering a user ID or password.

SIREN Code (Système Informatique pour le Répertoire des Entreprises)

This stands for the Electronic List of Enterprises. The SIREN code is assigned to a company when it registers as a business with the French government, and identifies the purpose of the establishment for regulatory reporting purposes in France.

SIRET (Système Informatique pour le Répertoire des Établissements)

This stands for Electronic List of Entities. In France the SIRET is an identifying number given to a French business by the INSEE, an official statistics and economics organization in France. The SIRET number is a combination of the SIREN and NIC numbers. This number

is used by the tax and social security authorities to identify a business enterprise and its entities.

Slice

The span of time into which an element is segmented as a result of element segmentation. Unlike a segment (or period), a slice does not represent a separate gross-to-net process since it affects only a limited set of elements within a period or segment. Like segments, slices have their own begin and end dates.

Slice Dimension

A model dimension used to restrict user access to the system. For example, a product manager's access to the system can be restricted to only the products he or she is responsible for by defining "Products" as a slice dimension, and assigning this person the members of the "Products" dimension he or she can access.

Slice and Dice

Another term for multidimensional analysis. When your data has three (or more) dimensions, you can think of it as being arranged in a cube (or hypercube), with each side representing a dimension. When you analyze the data, you "slice" off part of the cube or "dice" it to get to an individual cell.

Slotting

In PeopleSoft Workforce Rewards, a process by which the system establishes the target market compensation rates to use for compensating workers in non-benchmark jobs.

Social Security Number

Nine numeric digits assigned to an individual by the Social Security Administration. Also known as a Taxpayer Identification Number (TIN).

Source

The Source table stores valid journal entry and posting sources. These can include job titles (such as CFO), user IDs (such as CLERK123), PeopleSoft General Ledger processes (such as Consolidations), or other applications (such as PeopleSoft Payables).

Source Transaction

In commitment control, any transaction generated in a PeopleSoft or third-party application that is integrated with commitment control, and which can be checked against commitment control budgets. For example, a pre-encumbrance, encumbrance, expenditure, recognized revenue or collected revenue transaction.

Sparsity/Density

A multi-dimensional concept of whether data exists at intersections of dimensions. If a cube has many dimensions, but little or no data in some of those dimensions, the cube is considered

sparse. Sparse cubes take up unnecessary disk space and reduce calculation performance. The goal is to create dense cubes and only use dimension intersections where data actually exists.

Special Accumulator

A device that accumulates earnings from different sources for a specific purpose. 401(k), pension and retirement plans use special accumulators. A 401(k) plan might use a special accumulator to calculate a deduction using regular, vacation, and overtime earnings. Special accumulators can add to or subtract from a pool of earnings.

Special Payments

A payment that occurs once or under special circumstances (e.g., back pay interest, lump sum leave, bond refund, longevity bonus, compensatory time reimbursement, death payment, severance pay, separation bonus, etc.).

Special Rates

Higher salary rates for specific grade levels and occupational groups determined by OPM for employees working in specific geographic areas. Each area is assigned a separate Schedule Number.

Specialist

A member of a stock exchange who maintains a fair and orderly market in one or more securities. A specialist or specialist unit performs two main functions. executing limit orders on behalf of other exchange members for a portion of the floor broker's commission, and buying or selling for the specialist's own account to counteract temporary imbalances in supply and demand, preventing wide swings in stock prices.

Specialized Experience

Experience that has equipped the applicant with the particular knowledge, skills, and abilities to perform successfully the duties of the position and is typically in or related to the work of the position to be filled.

SpeedChart

A user-defined shorthand key designating several ChartKeys to be used for voucher entry. Percentages can optionally be related to each ChartKey in a speedchart definition.

SpeedType

A code representing a combination of ChartField values. SpeedTypes simplify the entry of ChartFields commonly used together.

Spending Limits

See Planning Targets.

Split and Join

In PeopleSoft Demand Planning, the process of subdividing a forecast so that multiple users can make changes to their portions of the forecast. After changes are complete, the portions are joined back into a single forecast.

Split Deduction

Deduction that you create by splitting an existing deduction into two deduction items. The new deduction retains the original item ID with an added suffix number.

Split Shift

Periods of productive time split up by period of non-working time; example. a time reporter comes to work as a busboy for the lunch shift from 12-2 p.m. and then returns to work from 6-8 for the dinner shift (see Scheduling)

Spokesmen Committee (Sprecherausschusse)

In Germany the Spokesmen Committee represents the interest of the management in your company before the ownership. The Spokesmen's Committee is consultative in nature, although they play a co-determination role on individual employment contracts, hiring, and dismissals. They also play a role in monitoring employment fairness, equity, and non-discrimination in terms of nationality, race, religion, sex, and age.

Spouse Demonstration J&S

In the PeopleSoft Pension Administration system, an informational-only form of pension payment that tells what the spouse's total benefit would have been if the retiree had chosen the spouse as the beneficiary rather than a nonspouse beneficiary. You cannot pay pension benefits based on this form because it is informational only.

Spouse Eligibility Alias

In PeopleSoft Pension Administration, a Custom Statement that defines any criteria that must be met before the plan will provide an Automatic Spouse Benefit. For example, the plan may require that the employee and spouse be married a full year before they are eligible for an automatic spouse benefit.

Spouse Eligibility Statement

See Spouse Eligibility Alias.

Spread

Depending on the context, either (1) the difference between the bid and asked prices for an over-the-counter stock, or (2) the difference between an option's exercise price and the market price at the time of exercise (i.e., the profit component of the exercise).

SQL Objects

Used to create rules that are more complicated than templates or actions and conditions allow—select statements, insert statements, table joins, and sub-queries

ST (Strategic Trust)

See Strategic Thrust

Standard Form (SF)

A standardized form for interagency use by the Federal government. The SF prefix is the most common but not exclusive one in usage.

Startup Data

In PeopleSoft Pension Administration, accrued Service, Cash Balance Account, or Employee Account data loaded into the system in the form of an opening balance and “as of” date. The alternative would be to load the entire accrual history.

State Record

The State Record is a PeopleSoft record, keyed by process instance, that must be created and maintained for each Application Engine program. The State Record defines the fields that an Application Engine program uses to pass values from one SQL statement to another.

Static Group

An employee group in Time and Labor that enables you to control its creation and maintenance. The group remains the same at all times until you change it.

Static Policy Controls

Determines how a static (versus time-phased) **Inventory Policy** is to be calculated. Static controls use period and average methods and their arguments.

Statistical Code

The unit of measure used for tracking and monitoring statistical data. For example, using a statistical code of WS may represent the number of Workstations.

Statistical Forecast

In PeopleSoft Demand Planning, a forecast developed at each level of the forecast pyramid and that considers the item’s history in isolation.

Status Checking

In PeopleSoft Projects, a control feature that can be applied to transactions coming into Projects from cost feeder systems. If the incoming transaction does not conform to predetermined status and analysis conditions, an online warning will display or the transaction will be rejected.

Status Position Code

A code that identifies the various conditions of a position, e.g., frozen, classified, etc.

Statutory Account

Account required by a regulatory authority for recording and reporting financial results. In PeopleSoft, this is equivalent to the Alternate Account (ALTACCT) ChartField.

Step

A secondary level or subcategory within the primary pay level (depending upon pay plan, different employees may have a different number of steps within their primary pay level).

Step Progression

In PeopleSoft Workforce Analytics, a pay increase granted to an employee or group whose salary plan includes steps within grades. Each step increase is a step up the pay range for the employee.

Stock

In corporate finance, the form in which an owner's interest is represented, distributed in units known as shares.

Stock Administrator

An individual who administers and manages the corporation's benefits and/or equity compensation plans. This individual serves as the contact for transfer agent and broker inquiries. Stock Administrators manage Stock Option Plans, Employee Stock Purchase Plans, Restricted Stock Award Plans, and Stock Bonus Plans.

Stock Appreciation Rights (SAR)

A contractual right to receive, either in cash or employer stock, the appreciation in the value of the employer's stock over a certain period of time. A SAR can be used alone or in tandem with Incentive Stock Options (ISO/SAR) or Nonqualified Stock Options (NQ/SAR). PeopleSoft Stock Administration supports only tandem SAR's.

Stock Awards

Stock allocations that are processed in the Manage Variable Compensation business process. Stock Administration creates stock grants from finalized stock awards.

Stock Exchange

An organized marketplace in which bonds, stocks, and common stock equivalents are traded by members of the exchange, acting as agents (brokers) and as principals (dealers or traders). Such exchanges have a physical location where brokers and dealers meet to execute orders to buy and sell securities. Each exchange sets its own requirements for membership.

Stock Option

A contractual right granted by the company, generally under a stock option plan, to purchase a specified number of shares of the company's stock at a specified price (the exercise price) for a specified period of time (generally five or ten years). Assuming that the exercise price is the same as the fair market value on the grant date, the option will become more valuable if the fair market value goes up, because the option effectively gives the optionee the right to buy stock in the future at a discount.

Stock Price

The price per share of a company's stock. See, also, "share price."

Stock Purchase Participant

An individual who participates in the corporation's Stock Purchase Plan.

Stock Purchase Plan

A type of broad-based stock plan that permits participants to use payroll deductions accumulated over a period of time to acquire stock from the company.

Stock Split

A change in the capitalization of an issuer that increases or decreases the number of securities outstanding, and adjusts the value of the securities accordingly, without a corresponding change in the assets or capital of the issuer. For example, if an employee has options to purchase 25 shares at \$10 per share and the company has a 2-for-1 stock split, the employee thereafter has the option to purchase 50 shares at \$5 per share.

Stock Swaps

A payment method that can be used to cover the cost of the exercise price and taxes depending on whether it is allowed by the plan. When an employee elects to exercise a stock option by means of a stock swap, they surrender already-owned shares of stock to pay the total required option exercise price and/or taxes for the option being purchased. The surrendered shares are usually valued at the fair market value of the company's stock on the date of exercise.

Stock Trading Symbol

The three or four letter symbol used to identify a company's stock on the stock exchange where it trades. Also known as a "ticker symbol".

Stock Withholding

A cashless method of satisfying the withholding taxes due upon the exercise of a stock option by authorizing the company to withhold from the shares being exercised a number of shares equal to the taxes.

Stockholder of Record

Person or entity, often a broker or the Depository Trust Company, named on the issuer's or transfer agent's stock record books as the owner of shares held in "street name." The stockholder of record acts in part as a way of safekeeping stock certificates that might otherwise be lost by the beneficial owner, and also in order to keep the identity of the beneficial owner confidential from the company.

Stock-In Probability

A replenishment option for defining transfer parameters for PeopleSoft Demand Planning or Inventory Planning upload files. The option is the percentage of time you want to have the item on hand for the **Business Unit** and is used to calculate safety stock.

Stop Time

Out punch

Strategic Initiatives

In PeopleSoft Balanced Scorecard, actions the organization must take to implement strategy. May be temporary or short-term in nature.

Strategic Thrust (ST)

In PeopleSoft Balanced Scorecard, four to five statements or paragraphs that summarize the core components of an organization's strategy. Strategic thrusts describe the key areas across which a scorecard is balanced. They are themes or goals your organization is striving to achieve; more specific descriptions of what you must do to achieve that goal are defined by critical success factors. Key performance indicators may be attached to strategic thrusts as long as there aren't critical success factors below them, but typically strategic thrusts aren't directly associated with key performance indicators.

Strategy Tree

In PeopleSoft Balanced Scorecard, the hierarchical relationships of the objectives your organization is striving to achieve. Used as the foundation for a scorecard, and typically balanced across four major categories: Financial, Customer, Learning and Growth, and Internal Processes. These are made up of Vision, Strategic Thrusts, and Critical Success Factors.

Stratification Engine

A support module that structures the volume of financial accounts and balances at a large financial institution to a manageable scale for processing by the PeopleSoft Funds Transfer Pricing (FTP) and PeopleSoft Risk Weighted Capital (RWC) applications. It categorizes data by a range of values and summarizes data based on rules you define for FTP and RWC.

Stratification Wizard

Stratification Wizard is a tool you can use to quickly create new stratification rules or update the existing rules. Stratification Wizard prompts you for each of the possible source and

destination fields, grouping operations, and summarization actions to be performed. Stratification Wizard enables you to stratify your data according to tiers, discrete values, periodic increments, and numeric increments. It also enables you to leave the data aggregated.

Streams

An optional feature that enables you to reduce processing time by processing groups of payees simultaneously.

Street Name

See "Stockholder of Record".

Stretch

In a Goals Matrix performance scale (In PeopleSoft Workforce Analytics), this is the level of performance for which an employee achieves maximum pay out. Performance above this level receives no greater pay out.

Strike Price

The price per share which must be paid in order to exercise the stock option. The strike price is typically the fair market value of the stock on the grant date. Also known as the "exercise" or "grant" price.

String constant

String constants are delimited in PeopleCode by using either single (') or double (") quote marks.

Strip Funding

One of several methodologies used by PeopleSoft Funds Transfer Pricing (FTP) to derive maturity when calculating FTP rates based on matched maturity funding. This approach matches the projected cash for the instrument in each time period, with a specific cost of funds rate for that cash flow. The FTP rate for the instrument is then calculated by weighting the cost of funds rate for the cash flow in each time period by the term of the cash flow.

Structured Content

Any content that is traditionally stored in records or tables within a database, such as addresses, transactions, and profiles. This type of content can be easily described by size, location, effective dates, and context as well as consistent metadata.

Structured Query Report (SQR)

A type of printed or displayed report generated from data extracted from a PeopleSoft SQL-based relational database. PeopleSoft applications provide a variety of standard SQRs that summarize table information and data. You can use these reports as is, customize them, or create your own.

Style File (Verity)

Collection style refers to a set of configuration options that are used to create the indexes associated with a collection. A collection has one collection style and it is defined in a set of style files before creating the collection.

SubCustomer Qualifier

A value that groups customers into a division for which you can generate detailed history, aging, events, and profiles.

Sub-Process Section

A type of section you can add to a process list. Sub-process sections are especially useful for performing iterative processes such as gross ups (calculating the gross amount for a given net amount). You can include conditional logic within a sub-process section.

Subscription

The process of mapping fields, selecting data parameters and submitting the information to an outside vendor.

Summary ChartField

A feature for creating summary ledgers that roll up detail amounts based on specific detail values or on selected tree nodes. When detail values are summarized using tree nodes, summary ChartFields must be used in the summary ledger data record to accommodate the maximum length of a node name (20 characters).

Summary Forecast

In PeopleSoft Demand Planning, a type of forecast that results from adding up the adjusted forecast totals from the next lower level, meaning the sum of the children's forecasts for the parent. The summary forecast at level one (1) is always zero since there is not a logical lower level.

Summary Ledger

An accounting feature used primarily in allocations, inquiries, and PS/nVision reporting to store combined account balances from detail ledgers. They increase the speed and efficiency of reporting by eliminating the need to summarize detail ledger balances each time a report is requested. Instead, detail balances are summarized in a background process according to user-specified criteria and stored on summary ledgers. The summary ledgers are then accessed directly for reporting.

Summary Tree

A tree used to roll up accounts for each type of report in summary ledgers. In effect, summary trees enable you to define "trees on trees." In a summary tree, the detail values are really nodes on a detail tree or another summary tree (known as the *basis* tree). A summary tree structure specifies the details on which the summary trees are to be built.

Super Tree Utility

A PeopleSoft Enterprise Warehouse utility that enables you to combine multiple effective dates of a tree into one. This super tree contains all tree changes for a certain period of time enabling you to analyze effective dated trees more easily.

Supplemental IRR

An IRR type used when a federal employee's retirement deductions were originally under-reported. An agency can create a Supplemental IRR to report the difference in the retirement deduction amount to the Office of Personnel Management (OPM).

Supplemental Tax Method

A payroll tax calculation method that uses a straight percent rather than allowances. The percentage depends on state requirements.

Supply Chain Warehouse

See Warehouses.

Support Costs

Activity costs not directly connected to production.

Support Modules

The support modules are a collection of engines and analysis models that derive values, rates, financial calculations, and prices. PeopleSoft Analytic Applications take this data and use it for further processing. The support modules perform processes that are used in the financial services industry. They are only utilized by two of the PeopleSoft Analytic Applications: Risk Weighted Capital (RWC) and Funds Transfer Pricing (FTP).

Supporting Element Overrides

Provide a mechanism to override various supporting element types, such as brackets, dates, durations, formulas, and variables, at various different levels.

Supporting Elements

Supporting elements are building blocks for other elements. In PeopleSoft Global Payroll, they are used in combination with other elements to create rules. They are not stand-alone. Typical supporting elements are arrays, brackets, rounding rules, and fictitious calculations.

Suspend Exercise

As a condition of a leave of absence, a company may stipulate to restrict the exercise of shares during the leave or for a period of time. Only applicable if the Stock Action is LOA.

Suspend Vesting

As a condition of a leave of absence, a company may stipulate to suspend vesting of shares. Only applicable if the Stock Action is LOA. If a company does not Suspend Vesting then the Vest Deferral Grace Period and Service Rule are not applicable.

Suspended Item

In PeopleSoft Demand Planning, an item suspended by the system. The suspension is due to the lack of demand for the number of periods defined for the item's **Control Group**.

System Element

In PeopleSoft Global Payroll, system elements are delivered and maintained by Peoplesoft. There are two types of system elements: database system elements and system-computed elements. Database system elements contain payee-related data that can be used frequently in a calculation, such as department ID, location, and personal data. System-computed elements are automatically populated by the payroll process.

T***T+3***

The obligation in the brokerage business to settle securities trades by the third day following the trade date. "Settlement" occurs when the seller receives the sales price (less the broker's commission) and the buyer receives the shares.

Table

The underlying format in which data is stored by columns (fields) and rows (records, or instances).

Table Lookup

A utility in PeopleSoft Pension Administration that finds an unknown value based on a known one in your data set. For example, you can look up an interest rate based on a year, or an actuarial factor based on an employee's age.

TableMaps

In the PeopleSoft Enterprise Warehouse, TableMaps define the physical relationships between related tables. TableMaps allow you to define "families" of related tables and the columns that define the key relationships between the tables.

TableSet

A group of rows across control tables identified by the same setID.

TableSet Sharing

Specifying the control table data for each business unit so that redundancy is eliminated.

Tardy

The circumstance when a time reporter reports for work after the scheduled start time

Target

In a Goals Matrix performance scale (In PeopleSoft Workforce Analytics), this is the performance level your organization establishes as the norm for performance and pay out.

Target Cost

A desired target cost (for production, engineering or marketing) is found by subtracting the desired profit margin from a competitive or estimated price.

Target Currency

The value of the entry currency or currencies converted to a single currency for budget viewing and inquiry purposes.

Target End Date

The intended end date for employee schedules in Time and Labor reporting. You establish a target end date, and depending on the work schedule templates, the application determines what the actual end date should be.

Target Grade

Highest obtainable grade for a position.

Target Matrix

In PeopleSoft Workforce Rewards, the Target Matrix defines the level of award to be paid based upon a predetermined level of performance that a defined measure is evaluated against.

Target Page

See Menu Item.

Target Plan

In PeopleSoft Workforce Rewards, a plan for distributing compensation awards, in which the level of the award is linked directly to a predetermined level of performance that a defined measure is evaluated against. For example, a Target Plan for a Sales group might be as follows: "As a group, increase the business unit's net income by 10% and each member of the group will be eligible for an award equal to 5% of base pay."

Target Rate

In PeopleSoft Workforce Rewards, calculated market rates you choose to use as new target pay rates for the jobs in your organization. Think of these target rates as pay guidelines, in support of your company's overall pay strategy.

Tariff

In Germany a Tariff is a contract between the employee's unions and the employers' association, defining labor agreements on issues such as standard working hours, income, and vacation. This contract is valid for all of Germany for the business or industrial sector the company is working in (such as *Banking* or *Metal*).

Tariff Area

In Germany, additional labor agreement terms beyond those in the Tariff, such as salary plans or employee reviews, can also be applied based upon the Tariff Area. The Tariff Area is often split along regional lines (such as *Bavaria* or *Berlin*).

Task

A piece of work assigned to or demanded of a person; a unit of work (see Time Reporting)

Task Entity

Individual component of a task; for example, Project ID, Activity ID, Work order, Department, Company, Business Unit (see Time Reporting).

Task Profile

A way of viewing or establishing where to allocate employee task information for a day and time. The task profile fields that appear on the page are established by the *Task Profile Template*.

Task Profile

Entity that establishes the default values for optional and required task elements. This can be for single or multiple tasks. (i.e. default values based on hours allocation, percentage distribution, equally distributed or by prompt) (see Time Reporting)

Task Rules

A methodology that is applied to scheduled, reported and payable time to allocate or redistribute task assignments (see Time Administration)

Task Transfer

Department transfer

Task Values

The customer defined value for a specific task element i.e. Customer 1, project 1, etc (see Time Reporting)

Taskgroup

Identifies the default time reporting templates, task template, and task profile(s) for time reporters that share the same task reporting requirements.

Taxonomy

Taxonomy is the classification of content in an ordered system that indicates relationships. This typically is represented by hierarchical categorization.

Taxable Benefits

Any employer contributions that are subject to Federal Withholding Tax.

TDS (Transfert de Données Sociales)

In France the TDS is a social security transfer report, submitted on magnetic media to the government.

Technical Scenario

In PeopleSoft Enterprise Warehouse technical scenarios allow you to set up the object type values that the Resolver uses to chunk the record/TableMap you'll resolve. Technical scenarios allow technical users to define chunking criteria that enable chunks to run in parallel. This allows for parallel data processing.

Template

A template is HTML code, associated with a web page. It defines the layout of the page and also where to get HTML for each part of the page. Templates allow you to build a page by combining HTML from a number of sources. For the portal, all templates must be registered in the portal registry and each content reference must be assigned a template.

Template Pagelet

A template pagelet is a pagelet that is sized appropriately for use in a Dynamic Content template left frame and may deliver content that is sensitive to the menu item if set up within the context manager. These pagelets are registered in the portal registry in the Template Pagelets folder.

Temporary Continuation of Coverage (TCC)

The TCC program, as prescribed by the OPM, requires Federal agencies to provide to separating Federal employees the opportunity to temporarily continue their FEHB coverage for up to 18 months (unless involuntarily separated because of gross misconduct), provided the individual pays the full cost of coverage, including both the employee and government

share and a two percent administrative charge. Agencies may elect to provide this service in-house or enter into cross-servicing agreements with another Federal agency.

Tenor

Used by the PeopleSoft Funds Transfer Pricing (FTP) application to refer to the maturity of an instrument. It represents the length of time an instrument is available as either a source or use of funds. The FTP application calculates the transfer price for an instrument, based on the marginal cost of funds of similar liquidity and tenor.

Term Certain and Continuous Payment Option

See Certain and Continuous Payment Option.

Term Certain Payment Option

See Certain Only Payment Option.

Termination

A transaction in which an employee ceases to be an employee of the corporation.

Threshold

In a Goals Matrix performance scale (In PeopleSoft Workforce Analytics), this is the minimum threshold for adequate performance, the designated level of performance below which it is inappropriate to pay incentives.

Threshold Checking

In PeopleSoft Projects, a control feature that can be applied to transactions entered directly into Projects or integrated into Projects via the INTFC_PROJ_RES table. If the transaction exceeds a predefined tolerance, a warning will display or the transaction will be rejected.

Thrift Savings Plan (TSP)

A voluntary retirement savings and investment plan for Federal employees administered by the Federal Thrift Investment Board.

Ticker Symbol

The three or four letter symbol used to identify a company's stock on the stock exchange where it trades. Also known as a "stock trading symbol".

Tiers

In the financial services industry, Tiers are ranges that you set up for stratifying your instrument data (such as amounts, rates, and numbers) into specific groups. You define Tiers within Stratification Engine.

Time Administration

A process which provides four [separate] different online tools for creating, maintaining, and applying an organization's compensation, task, and exception rules to both reported and scheduled time. templates, actions and condition, SQL objects, and user exits

Time and Labor Period

A distinct, configurable period of time used by all the PeopleSoft Time and Labor processes (see Time Reporting)

Time and Labor User

Either a Time Reporter or a Time Manager

Time Capture Device

Third party system or methodology for collecting elapsed or time capture device time, i.e., time capture device, IVR, Fax, etc. (see Time Reporting)

Time Collection

A Time and Labor feature that collects positive and exception time reports, applies appropriate business rules and edits to the reported time to ensure validity and reasonableness, and returns errors and questionable items to the time reporter for correction or scrutiny. Time collection is also responsible for scrutinizing future (previously) posted time information for correctness when those reports are ready for use.

Time Collection Device

A group of time collection device lumped together and named for ease of assignment to employees. In other words. clock group 1 is made up of clock 1, and clock 2. Employee 123 is assigned to clock group 1 and can then punch in at either clock 1 or clock 2. (see Understanding Time Collection Device)

Time Collection Device time

Reporting time by recording actual starts and stop times (see Time Reporting)

Time Dimension

Determines how date-related information is presented in a **Cube View**. This dimension defaults to a two-level hierarchy consisting of the **Inventory Policy** year and a standard period, such as monthly.

Time Fence

In PeopleSoft Planning, a user-defined parameter that specifies the business rules to be used in the generation of the plan. PeopleSoft Planning time-fence types include start of time, end of time, planning close date (demand time fence), purchase order fence, leveling fence, action message cutoff, and planning time fence.

Time Manager

An individual who supervises Time Reporters

Time Period

A period of Time used in Time and Labor rules processing. You can categorize time periods in terms of days, weeks, or months. You establish day, week, or month-type periods for use when you apply rules for compensation, holidays, and so on.

Time Report

A payroll time and/or labor distribution time report for an employee for any date within the employee's current period.

Time Reporter

Any employee or contractor for who time is reported or generated in PeopleSoft Time and Labor.

Time Reporter Information

Values associated with the Time Reporter that are displayed when entering or viewing reported time and facilitate the processes of Time Reporting and Time Management (see Time Reporting)

Time Reporting

Any information required by a business unit that can be attributed to an individual employee (worker/contractor) and can be expressed in hours.

Time Reporting Code

A hybrid of two PeopleSoft objects: the Payroll Earnings Type and the Human Resources Absence Type. The Time Reporting Code represents the level at which a business actually needs to track employee time to support all of its administrative and compensation needs.

Time Reporting Code Type

Categorization of a time reporting code. Valid categories include. units, amounts, hours or a combination of hours and amounts (see Time Reporting)

Time Reporting Group

See Group [Time and Labor].

Time Segment

For Service, Cash Balance Accounts, and Employee Accounts, employees can accrue benefits differently at different times. The period of time during which employees use a particular rule is that rule's time segment.

TimeSpans

Relative periods, such as year-to-date or current period, that can be used in various PeopleSoft General Ledger functions and reports when a "rolling" time frame, rather than a specific date, is required. TimeSpans can also be used with Flexible Formulas in PeopleSoft Projects.

Tolerance

In PeopleSoft Projects, a value that is defined at either the project or activity level as either a percentage of a project's funding or an actual amount.

In commitment control, the percentage over budget that you allow, excluding revenues applied to increase budget limits, before the system creates an exception.

Total Authorized But Unissued

The combined total number of shares from Shares Available to Issue plus Total Options Outstanding.

Total Compensation

In PeopleSoft Workforce Analytics, this is generally the officially recognized compensation provided an employee in the course of their employment with an organization; includes both direct compensation and benefits compensation.

Total Compensation Management

The ability to track and report on all types of cash programs, non-cash programs, benefits and deferred compensation for all current workers, ex-workers and individuals associated with ex-workers who receive compensation due to the employment of the ex-worker.

Total Non-Compensation

In PeopleSoft Workforce Analytics, generally, this is the often unrecognized compensation an employee receives in the course of their employment with an organization; it includes Learning and Development compensation such as training, and Workplace Environment Compensation such as telecommuting privileges or other prerequisites.

Total Options Outstanding

The number of company shares currently held by shareholders as tracked by the transfer agent. Derived by using the number of Prior Outstanding plus Grants, less Exercises and less Cancellations.

Total Rewards

In PeopleSoft Workforce Analytics, this is the total rewards provided to an employee by their employment with an organization; it includes their officially recognized total compensation, and less often recognized total non-compensation.

Tour of Duty

The scheduled days and hours per day of attendance at a duty station for an employee.

Tracking Signals

PeopleSoft Demand Planning, a forecasting tool that detects bias in the forecast and provides an early warning of an unstable forecast. There are six tracking signals associated with each **Forecast Item** that correspond to the six most recent historical periods.

Training Report 2483

The Training Report 2483 is a French regulatory report used to declare vocational training your company has provided to your employees. It is also known as the Declaration 2483 Report. The purpose of the report is to receive tax deductions from the government based upon the amount of money your company has spent on training.

Transaction

A named command with optional named and typed inputs and outputs. The associated external system or the Business Interlink Plug-in understands this command. The types of inputs and outputs are based on a set of generic types.

Transaction catalog

Lists transactions used to interface to the external system.

Transaction Code

In PeopleSoft Projects, an additional field on each resource transaction that is used in conjunction with accounting entry templates. Transaction codes enable you to deal with exceptions to your accounting entry templates without having to create additional transaction types. You can set up separate accounting entry templates for resource transactions containing the transaction codes you create. The accounting entry templates for those resource transactions lines can then use the same transaction types, but specify different accounts.

In PeopleSoft Asset Management, transaction codes identify special asset transactions and are used in conjunction with transaction type to create accounting entries.

Transaction Code

Identifies what action has taken place against the position.

Transaction Costing

See Multidimensional Costing

Transaction Currency

In the financial services industry, the original currency in which a company conducts its business activities. When a company has multinational operations, it may use different

transaction currencies. These are translated to the base currency for consolidation and reporting of financial results.

Transaction Dated

Data aggregated over a date range.

Transaction group

The package can contain one or more transaction groups. Each transaction group is a set of transactions of the same type, with the same trading partners involved.

Transaction Loader

The SQR in PeopleSoft Asset Management that transfers load lines from the Loader tables into the PeopleSoft Asset Management Tables as assets and open transactions.

Transaction Tables

In the PeopleSoft Enterprise Warehouse, these are tables that contain dynamic information and are keyed by business units.

Transaction Type

The building blocks of accounting entry templates in PeopleSoft Asset Management and Projects. For each transaction type you create you define specific transaction lines. The transaction lines are then transferred into accounting entry templates. In the accounting entry templates each transaction line is assigned a specific general ledger account.

Transactional System

A business application for performing the business transactions that keep your company running. Transactional applications, and the databases that support them, are optimized for quick transaction processing. Because they are constantly changing and are not optimized for data retrieval, transactional system databases are not usually the best source of data for analysis.

Transfer Agent

An individual or firm who that keeps a record of your shareholders and the number of shares they own. Transfer Agents also issue new share certificates and cancel old certificates. Unlike Brokers, Transfer Agents are not responsible for selling stocks. Instead they are primarily concerned with maintaining records on all stocks which your company has issued.

Transfer Forecast

In PeopleSoft Inventory Planning, a Generation process option that transfers the forecast from the target view in Demand Planning forecasts. The process only transfers items from Demand Planning that have been set to update the **Inventory Policy**.

Transfer Punch

The start of a work period that specifically denotes a change in task and usually compensation-related characteristics

Transfer Type

An interunit transfer setting PeopleSoft Production Planning and Enterprise Planning use to determine where it will obtain item data for transfer tasks. If the type is a supply or demand transfer task, the Planning engine only processes the transfer item for a single location, reducing the time for plan processing. If the transfer type value is both, the Planning engine processes the transfer item using data from both the To and From units.

Transfer Worksheet

A work space for transferring an open item from one customer to another.

Transferable Stock Options

Options that may be transferred by the optionee, generally only to a family member or to a trust, limited partnership or other entity for the benefit of family members, or to a charity.

Translate Table

A system edit table that stores codes and translate values for the miscellaneous fields on the database that do not warrant individual edit tables of their own.

Translate Table

A system edit table that stores codes and translate values for the miscellaneous fields on the database that do not warrant individual edit tables of their own. In most cases PeopleSoft maintains the Translate Table.

Transport Rate

The Transport is a statutory deduction in France. Each establishment has a rate, and the URSSAF notifies establishments of this rate on a yearly basis. This deduction is used by the region to subsidize transportation, and maintain and build roads.

Transportation Lead Times

The transportation lead time is the in-transit interval from the date and time a shipment leaves your warehouse (**Inventory Business Unit**) to the date and time it arrives at your customer's receiving dock. The transportation lead time is used in calculating the scheduled shipment and scheduled arrival dates on the order when you enter either a requested arrival date or a requested shipment date.

Travel And Relocation Date

Length of time an employee must remain in the Government after the Government has paid to relocate him/her from one official duty station to another or for initial appointment.

TRC Program

A program that runs the level at which an organization actually needs to track employee time to support all of its administrative and compensation needs. TRCs are assigned to TRC Programs, which are ultimately assigned to workgroups. Multiple Workgroups can share these TRC Programs.

Treasury Interface files

These are DOS-based files generated by PeopleSoft in accordance with FMS file layouts for transmission of payment data to one of the FMS' Regional Financial Centers.

Treasury Position Code

In the financial services industry, this is a lookup code used for off-balance sheet treasury position accounts, such as foreign exchange, derivatives, precious metals, or any other account position that is the result of trading room and treasury operations.

Treasury Stock

Shares of a company's stock that have been repurchased or otherwise reacquired by the company and are "held in treasury." Whether the treasury shares count as "issued" or as "outstanding" shares of the company is a matter of state corporate law. Generally, a company may not vote its own shares held in treasury.

Treasury Stock Method

The method of calculating primary and fully diluted earnings per share when common stock equivalents such as unexercised stock options exist. Required under generally accepted accounting principles.

Tree

The graphical hierarchy in PeopleSoft systems that displays the relationship between all accounting units (for example, corporate divisions, projects, reporting groups, account numbers) and determines roll-up hierarchies.

Tree Compare Utility

A PeopleSoft Enterprise Warehouse utility that enables you to compare effective dates for trees. The results page shows nodes that have been added, deleted, or moved from one parent to another. You may also view the detail objects that have changed.

Tree control

Tree Control is a hierarchical search tool that you can embed in a panel. Tree Controls give the user a view of hierarchical data structures and enable them to drill down through the hierarchy to a particular row of data.

Tree Denormalizer

The Tree Denormalizer Application Engine process converts trees into multi-column data format so they can be used by third-party OLAP or ROLAP tools.

Trigger

See Event Trigger.

Trustee Extract

A PeopleSoft Pension Administration data extract containing data that a third party needs in order to produce pension checks.

Turnover Costing

In PeopleSoft Workforce Analytics, this is a calculation of the cost to the organization of employee turnover, in dollars.

Turnover Rate

In PeopleSoft Workforce Analytics, the rate that employee's are leaving the company.

TUXEDO

BEA's middleware product used to manage transaction queues, server process initiation, system administration, time-outs, data encryption, compression, logging and other application server processing.

Type of Appointment

Indicates the specific type of appointment, e.g., part-time permanent, full time temporary, etc.

U***Underlying Security***

The security underlying a stock option that an optionee has the right to buy, or the security underlying a convertible security.

Underwater Option

When the current market price is below the option exercise price. When an option is underwater, it would cost more than the underlying stock is worth to exercise the option. Such options are also described as being "out-of-the-money."

Underwriter

An investment banking firm that actually buys the shares from the company in a public offering and then resells them (at a slightly higher price) to its customers.

Unexpected Losses

In the financial services industry, these occur when the economic capital is exhausted and the insolvency rate is exceeded. Unexpected losses are determined by a targeted insolvency rate (confidence level); for example, a 99.7% confidence level indicates that there is a 0.03% estimated probability that the unexpected losses will exceed economic capital (or shareholder equity).

Union Code

Part of a group of defaults assigned to job codes. Union code may be used by human resources to group similar jobs or bargaining units together, dependent on individual company parameters.

Unit Code

In the financial services industry, Unit Code is used as an alternate means of measuring the relative size of companies participating in external surveys. A typical measure would be the number of employees in a company. The concept of unit is generic enough that the units can be other measures besides number of employees. For example, in the hospital industry the unit could be the number of hospital beds. Or in the hotel industry the unit could be the number of rooms.

Unit of work

Each transaction group includes one or more individual units of work. A unit of work is a single transaction that you want to commit or rollback as a whole.

Unitize Assets

The process of unitizing a single load line, usually originating from a different application, into multiple assets in PeopleSoft Asset Management.

Univariate Forecasting Technique

In Enterprise Planning and Simulation, the Univariate Forecasting Technique is a forecasting method that uses only the recorded history for the value to forecast its future.

Universal Navigation Header

Every PeopleSoft portal includes the universal navigation header, intended to appear at the top of every page as long as the user is signed on to the portal. In addition to providing access to the standard navigation buttons (like Home, Favorites, and signoff) the universal navigation header can also display a welcome message for each user.

Unscheduled Punch

A punch that is made by a time reporter who was not scheduled (see Time Reporting)

Unstructured Content

Any content that is not traditionally stored in records or tables within a database. Examples include: documents, images, video, presentations, and so on.

Unvested Shares

Unvested stock options are options that have not vested and, therefore, are not exercisable.

URI

A URI does not include the query string (the text following a ? on the URL). You can think of it as a subset of the URL that points to the resource, but does not include any parameters being passed to that resource. From the above example, the URI portion of the URL is as follows:

`http://serverx/InternetClient/InternetClientServlet`

URL

In this document, the term URL refers to the entire query string. The following is an example of a URL:

`http://serverx/InternetClient/InternetClientServlet?ICType=Script&ICScriptProgramName=W
EBLIB_BEN_401k.PAGES.FieldFormula.iScript_Home401k`

URSSAF Code

The URSSAF is the body responsible for ensuring payment of Social Security contributions by all French employers.

Useful Life

The amount of time an asset may be depreciated.

V***Valuation***

The way a company represents the value of a non-monetary award such as stock.

Value allocation

A process in PeopleSoft Workforce Planning, by which you assign an overall monetary value to a competency strategy for your organization, and assign a weight or importance to the roles, competencies and accomplishments in the strategy. The system then allocates a breakdown of the value to roles, competencies, and accomplishments in the strategy based on their relative weighting or importance.

Value Object

In the PeopleSoft Enterprise Warehouse, Value Objects are a metadata layer that provides descriptive information about fields and values. Value Objects are used as constants in Data Manager target object definition.

Variable

Temporary storage for use or defined information used in the creation and application of rules (see Time Administration)

Variable [Global Payroll]

An element type that defines and stores values such as a character, date, or number. You can use variables to create generic formulas for situations where you use the same values over and over again in a calculation.

Variable Compensation

In PeopleSoft Workforce Analytics, direct compensation that is not fixed, that is paid out in variable amounts, such as bonuses and commissions.

Variable Plan.

A plan in which either the number of shares and/or the price at which they will be issued is not known on the grant date.

VAT Account Type

A code that identifies the different types of accounting entries that must be created for VAT transactions. These codes are also used to categorize transactions in the VAT transaction table. The account type is used in conjunction with the VAT code and VAT transaction type to determine the VAT ChartFields used for a given VAT accounting entry.

VAT Apportionment

For mixed activity, VAT apportionment is the mechanism that allows you to specify the ratio of taxable activity to exempt activity for individual ChartFields.

VAT Calculation Method

Options are Net or Gross. When calculating VAT at net, the early payment discount is applied to the goods amount before calculating the VAT. The amount of VAT calculated using this method is the amount that is to be paid, regardless of whether the early payment discount is actually taken at time of payment. When calculating VAT at gross, the VAT is initially calculated based on the gross transaction amount. The early payment discount is not taken into account at this point. However, in some countries an adjustment is made to the VAT amount at the time of payment, if the early payment discount is taken.

VAT Calculation Type

Options include Exclusive or Inclusive. If exclusive, the VAT amount is stated separately from the goods amount. If inclusive, the VAT is not stated separately but is included with the goods amount.

VAT Code

The tax code used to define a percentage the system uses to determine the VAT amount. The VAT code is similar to the sales and use tax code, with a few exceptions. The tax authority tied to the VAT code generally consists of a single authority, and the ChartFields for a VAT code don't reside with the tax authority but are determined by the combination of the VAT code, VAT account type, and VAT transaction type.

VAT Declaration Point

When VAT transaction information is declarable for reporting purposes. Options include Invoice or Payment. If you choose invoice, the system will recognize VAT at invoice time; if you choose payment, the system will recognize VAT at the time of payment.

VAT Entity

The level or entity within an organization at which VAT reporting is performed. VAT entities can be registered for VAT in multiple countries, but only one country can be designated as the VAT entity's home country. VAT and Intrastat reporting information and VAT default information are defined for each country in which the VAT entity is registered. You may also specify any VAT exceptions—either exoneration or suspension from paying VAT—for any country in which the entity is registered.

VAT Exempt Supply or Purchase

A transaction where the product or item is non-taxable or exempt from VAT. No VAT code is associated with the transaction. Although no tax is applied to the transaction, the transaction is still logged in the VAT transaction table.

VAT Exonerated

A transaction where the purchaser has been determined as not subject to VAT. For these cases, there may be an exoneration certificate number tied to the purchasing entity (either the customer or the VAT entity) as proof of exoneration. A zero-rated VAT code should be associated with transactions where exoneration applies. The transaction is still logged in the VAT transaction table, but no tax is applied.

VAT Rebate Percent

Within Canada, for Public Service Bodies, the percentage of VAT that is not normally recoverable but which may be refunded in the form of a tax rebate.

VAT Recoverability Percent

The percent of VAT that's recoverable.

VAT Registration Countries

Country codes associated with a VAT registration number for a particular customer or VAT entity.

VAT Transaction Table

Stores detailed transaction information for VAT reporting. It is the primary source of information for all VAT reports. Each application is responsible for writing to this table and also to a cross-reference table used to link entries in the VAT transaction table with entries within each application.

VAT Transaction Type

Used to categorize VAT transactions according to particular VAT accounting and reporting requirements. The VAT code and the VAT transaction type are used in conjunction with the VAT account type to obtain the ChartFields for accounting entries.

VAT Treatment

A description of how the transaction must be treated for VAT purposes. This is used to determine how VAT defaults are applied, what accounting entries are required, and how and if the transaction is reported on the VAT return.

VAT Use ID

A code used to identify the type of activity in which a purchased good or service will be used, and therefore to determine a recoverability percent and a rebate percent (when applicable) that will be applied to a transaction line. Activities are categorized as taxable, exempt, or mixed. Where activity is mixed, you may associate either the ratio of taxable activity to exempt activity directly with the Use ID, or you may indicate that this ratio is determined at the ChartField level.

VdkVgwKey

A key within a Verity BIF file for every document to be indexed. VdkVgwKey values must be unique across all collections that will be searched in any one application.

Verity

The third-party search engine integrated with the PeopleSoft Portal.

Verity Fields

Verity fields are stored in the collection for retrieval and searching, and can be returned on a results list. Fields are defined in the BIF file and stored in the collection for retrieval and searching, and can be returned on a results list. Fields, like date and numeric fields can be used with the comparison operators (<,<=,>,>=).

Verity Thesaurus

The custom thesaurus consists of lists of synonyms defined in a synonym control file and can be used for synonym searching. After defining synonym lists in the control file, you use the `mksyd` utility to create a custom thesaurus (a control file which has the `.syd` extension) that the search engine uses.

Verity Topics

Verity applications can provide end users with predefined search criteria called *topics*. A topic is a named object that represents a concept, or subject area and can be used for synonym searching. It consists of words and phrases grouped together using the Verity query language in a tree-like structure. When provided, topics can be shared by all users.

Verity Zones

Zones are specific regions of a document to which searches can be limited. When the zone filter is used, the Verity engine builds zone information into the collection's full-word index. The index, enhanced with zone information, permits quick and efficient searches over zones. Searching a zone is faster than field searching. Zones are defined in the DAT file. The contents of a zone cannot be returned in the results list of an application.

Version

There can be up to five budget versions for each Budget Center level in a Budgeting Model. Budget versions are used to perform what-if analysis and comparisons of budget amounts before the user selects one version to submit as the Budget Center's budget plan. PeopleSoft Budgeting-specific.

Vest Deferral Grace Period

The specified period of time within which an optionee must return from leave to avoid having the vesting deferred. Only applicable if the Stock Action is LOA. Suspend Vesting must be selected for this rule to be applicable.

Vest Deferral Grace Period Service Rule

If the company provides a vest deferral grace period, they may stipulate that only certain individuals are eligible for the grace period based on service with the company. Only applicable if the Stock Action is LOA. Suspend Vesting must be selected for this rule to be applicable.

Vest Immediately

A stock option plan may provide that upon specific types of terminations, or upon a case by case scenario, all unvested shares held by an individual can be made immediately vested as of a specific date. Some companies' plans provide that under certain circumstances, such as retirement, the vesting of option shares accelerates upon termination of employment. When this occurs, you must modify the vesting schedule before you terminate the individual.

Vested Shares

Option shares that are free of any ownership restriction. Generally, vested exercised shares are fully owned by the optionee, free from restrictions and freely tradable.

Vested Termination

The termination of an employee who has a vested benefit. The benefit is deferred until the participant reaches retirement age. The employee is considered “Terminated Vested,” “Term Vested,” or simply “TV.”

Vesting

The method by which a granted option becomes free of all restrictions and the Optionee has full rights to the shares.

Vesting Schedule (Template)

A convenient way to set up the framework for a vesting schedule that can be uniformly applied to individual options. When you grant stock options, you define a vesting schedule to determine the default-vesting schedule for the option.

Vesting Service

The service used to determine an employee’s vesting percentage. Rules for accruing vesting service may be different from rules for accruing other plan service credits.

VEETS–100 Federal Contractor Report

This report is required of employers in the United States. It lists federal job classifications, and the number of employees and new hires in the last 12 months who are special disabled military veterans or Vietnam era military veterans. It also provides totals for each job classification of both veterans and non-veterans who hold these jobs.

View

PeopleSoft Demand Planning, a multilevel forecast structure. Each view is associated with a unique view ID and includes information that defines the view and structure type. The three types of views are working, disbursement, and dynamic.

For PeopleSoft Budgeting see Budget View.

Virtual Tasks

In Time and Labor, Virtual task data is associated with a taskgroup profile that defines common characteristics for a given Taskgroup and Task Profile ID. A single row of data is linked to multiple Earnings records for multiple employees. By minimizing the physical storage of daily task data we provide enhanced performance without limiting its functionality.

Vision

In PeopleSoft Balanced Scorecard, the overall mission of an organization. Usually the highest level on a strategy tree. Vision is optional; you aren't required to have a vision component on each strategy tree.

See also Strategy Tree

Volume

Total share volume traded in a stock during market hours.

W**WA (Workforce Analytics)**

See PeopleSoft Workforce Analytics

Waiver Of An OPM Qualification Standard

Involves setting aside requirements in a published standard to place an employee in a particular position, usually to avoid some kind of hardship to the employee, such as in cases of RIF or administrative error on part of the agency. Extra training and/or skills development may be needed to help the employee adjust to the new position. Waivers are granted by OPM or an agency, as appropriate, on a case-by-case basis, and do not directly affect other positions in the organization.

Warehouses

A warehouse reporting and analysis solution that supports the specific PeopleSoft business application that warehouse is using. It consists of predefined ETL maps, data warehouse tools, and Data Mart definitions. The warehouses we deliver are: PeopleSoft Financials Warehouse, PeopleSoft HRMS Warehouse, PeopleSoft CRM Warehouse, and PeopleSoft Supply Chain Warehouse.

Warrant

A type of security, usually issued together with a bond or preferred stock, that entitles the holder to buy a proportionate amount of common stock at a specified price, usually higher than the market price at the time of issuance, for a period of years or to perpetuity. A warrant is usually issued as a sweetener, to enhance the marketability of the accompanying fixed income securities. Warrants are freely transferable and are traded on the major exchanges.

WCB

In Canadian provinces the Worker's Compensation Board (WCB) operates as an independent board, and thus would have different requirements in each province. For example, in British Columbia the organization is called the Worker's Compensation Board of British Columbia and in the Province of Quebec, the board is known as Commission de la Santé et de la Sécurité du Travail (CSST).

Web Crawler

See Crawler.

Weighted Average Cost of Funds

The projected principle payments for an instrument are used to derive a series of matched maturity funding rates, which in turn are used to calculate the overall base PeopleSoft Funds Transfer Pricing (FTP) rate. The Weighted Average Cost of Funds (WACF) method calculates a weighted average FTP rate where each of the funding rates is weighted by the principle payment amount and the term to maturity of the payment.

WFA (Workforce Analytics)

See PeopleSoft Workforce Analytics

WGI Due Date

Identifies the date of an employee's next within grade increase. Current policy is that the step increase is implemented on this date automatically unless prevented by the processing of an unsatisfactory performance appraisal.

WGI Non-Creditable Days

Total number of days that cause the WGI due date to be adjusted forward.

Whole Calendar Month

An instruction telling the system to use every day in each month for this time period. The system fills in the last day of the period according to the information you have entered.

Window Period

The ten-day period, from the third to twelfth day after public release of a company's financial statement, when insiders may exercise their stock-appreciation rights without violating Securities and Exchange Commission rules for short-term trading.

Withdrawal

An election not to continue participation in a stock purchase plan.

Withdrawal of Contributions

In a pension plan, the act of returning pension contributions, with interest, to an employee who is terminating. An employee who withdraws contributions typically forfeits all service associated with those contributions. If the employee is later rehired, repayment of contributions and interest typically reinstates the forfeited service.

Withholding

A deduction taken by employers out of taxable income of an individual. Typical withholding taxes include federal income taxes, federal social security, Medicare taxes, and state and local income taxes.

Within Grade Increase (WGI)

A longevity-based increase in salary based on predetermined time in grade requirements and acceptable performance.

Work Council (Comité d'Enterprise)

In France it is mandatory for companies with more than 50 employees to elect a Work Council to represent the employees in negotiations with management.

Work Effort

See Activity Type.

Worker

In PeopleSoft Workforce Analytics, workers are defined as anyone who performs functions for the organization, and receives compensation from the organization's operating expense funds in return. Workers can be direct employees or independent contractors. This includes individuals contracting business directly from the company or through an agency.

Work Group

In PeopleSoft Enterprise Performance Management, the work group is a grouping of employees that share a similar activity profile.

Work Period

A Days On/Days Off template; the smallest unit of time that a business uses to communicate with their employees regarding when to be and/or not to be at work (that is, time working and time not working). The work period can be any number of hours. Until clock hour reporting is implemented, the application does not care about the number of hours. The initial Time and Labor product will apply the work period to a calendar day.

Work Schedule

A template consisting of a sequence of work periods (days) on and off, and the number of scheduled hours per work period. Work Schedules and Work Periods should not be confused with calendar days.

Worksheet

A way of presenting data to the user through a BAM interface that enables users to do in-depth analysis using pivoting tables, charts, notes, and history information.

Work Templates

Work templates describe your employee's work patterns. Work templates could apply to individuals or entire organizations. For instance, 9 AM to 5 PM, Monday through Friday is a fairly standard working week in organizations.

Workday

A 24-hour period rounded by daybreaker with one or more associated shifts (see Scheduling)

Workday Override

A function that allows a Time Manager to override a Time Reporter's schedule for a single workday. For example, Jane's long-term schedule assignment is Monday – Friday, 8.00 to 17.00. Due to an increase in production demand, her manager needs to schedule her to work 7.00 to 18.00 on Thursday, 16 March 2000. Her manager needs to be able to make this change to her schedule in the PeopleSoft Time and Labor system, so when Jane checks her schedule for this week, she'll see the revised schedule.

Worker

Workers can be defined as anyone who performs functions for the organization and receives compensation from the organization's operating expense funds in return. Workers can be direct employees or independent contractors (includes individuals contracting business directly from the company or through an agency).

Workers Compensation

The days an employee is on LWOP due to sustaining an injury or illness while on the job.

Workflow

The background process that creates a list of administrative actions based on your selection criteria and specifies the procedure associated with each action.

Workflow

The background process that creates a list of administrative actions based on your selection criteria and specifies the procedure associated with each action.

Workforce Monthly Report (Déclaration Mensuelle Obligatoire des Mouvements de Main D'oeuvre)

In France, companies that employ 50 or more employees are required to submit the Workforce Monthly Report to the Administrative Division of the Ministry of Work and Social Relations. The report contains workforce information for a given establishment of a company, including the total number of employees and details of employees who have joined or left the establishment during the month.

Workgroup

A user-defined group of employees who share identical compensation rules. A workgroup may be equivalent to all the employees in a business enterprise, all employees in a Paygroup, all employees belonging to the same Union or Union Local, or all employees who work at a specific work location.

Worklist

The automated "to do" list that Workflow creates. From the Worklist you can directly access the panels you need to perform the next action, and then return to the Worklist for another item.

Worklist

The automated "to do" list which Workflow creates. From the worklist you can directly access the pages you need to perform the next action, and then return to the worklist for another item.

Works Councils (Betriebsrat)

In Germany, the works councils for your company are internal committees elected by the employees that represent the interests of salaried and hourly paid employees, other than management. Every work location in your company has its works council (this would be the local works council) and the company as a whole has a central works council.

Work-Study Program

Government or non-government programs supervised work experience related to a student's course of study and are a part of, or a supplement to, education. Federal student-trainee programs are examples of such programs.

X**Y****Yearly Maximum Pensionable Earnings (YMPE)**

Amount set by the government upon which Canadian Pension Plan (CPP) contributions are made.

Z***Zero-Based Budgeting***

A budgeting option that builds a budget from the ground up starting with zero values. This is in contrast to an incremental budget that is based upon using prior year actual or budget values as starting point. PeopleSoft Budgeting-specific.

Zero-Rated VAT

A VAT transaction with a VAT code that has a tax percent of zero. Used to track taxable VAT activity where no actual VAT amount is charged.
