

**Oracle<sup>®</sup> Retail Price Management  
Release Notes  
Release 12.0  
May 2006**

Copyright © 2006, Oracle. All rights reserved.

The Programs (which include both the software and documentation) contain proprietary information; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent, and other intellectual and industrial property laws. Reverse engineering, disassembly, or decompilation of the Programs, except to the extent required to obtain interoperability with other independently created software or as specified by law, is prohibited.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. This document is not warranted to be error-free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose.

If the Programs are delivered to the United States Government or anyone licensing or using the Programs on behalf of the United States Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the Programs, including documentation and technical data, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement, and, to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software—Restricted Rights (June 1987). Oracle Corporation, 500 Oracle Parkway, Redwood City, CA 94065

The Programs are not intended for use in any nuclear, aviation, mass transit, medical, or other inherently dangerous applications. It shall be the licensee's responsibility to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and we disclaim liability for any damages caused by such use of the Programs.

Oracle, JD Edwards, PeopleSoft, and Siebel are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

The Programs may provide links to Web sites and access to content, products, and services from third parties. Oracle is not responsible for the availability of, or any content provided on, third-party Web sites. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

A Release Notes document can include some or all of the following sections, depending upon the release:

- Overview of the release
- Functional, technical, integration, and/or performance enhancements
- Assumptions
- Fixed and/or known issues/defects

Because of their brevity, Release Notes do not include chapters, appendices, or a table of contents.

## Audience

Release Notes are a critical communication link between Oracle Retail and its retailer clients. There are four audiences in general for whom a Release Notes document is written:

- Retail clients who wish to understand the contents of this release.
- Integrators and implementation staff who have the overall responsibility for implementing RPM into their enterprise.
- Business analysts who are looking for high-level functional information about this release.
- System analysts and system operation personnel who are looking for high-level functional and technical content related to this release.

## Related Documents

You can find more information about this product in these resources:

- Oracle Retail Price Management Installation Guide
- Oracle Retail Price Management Operations Guide and Batch Schedule
- Oracle Retail Price Management Online Help
- Oracle Retail Price Management User Guide
- Oracle Retail Price Management Data Model

## Customer Support

- <https://metalink.oracle.com>

When contacting Customer Support, please provide:

- Product version and program/module name.
- Functional and technical description of the problem (include business impact).
- Detailed step-by-step instructions to recreate.
- Exact error message received.
- Screen shots of each step you take.

## Overview

Oracle Retail Price Management (RPM) is a pricing and promotions execution system. RPM's functionality includes the definition, maintenance, and review of price changes, clearances, and promotions. The system's capabilities range from simple item price changes at a single location to complex buy/get promotions across zones.

## Technical Enhancements

### Certification

Oracle Retail software certification is the process of developing in order to conform to certain information technology industry's standards and specifications. This release of RPM includes certification on the following:

- Oracle Database 10g
- Oracle Application Server 10g

### Multi-Byte Support

RPM was modified to support languages whose characters require multiple-byte description fields that expand to allow for a more meaningful text display.

Some characters require more than one byte to represent. Because one byte (8 bits) can only represent 256 unique codes, multi-byte support is required for languages with large numbers of characters. In general, a multi-byte language can use any number of bytes per character, and vary from character to character. One example is Japanese.

### Multi-language Enablement

RPM supports nine languages. The languages supported with this release include the following:

- Brazilian Portuguese
- Chinese (Simplified)
- Chinese (Traditional)
- English
- French
- German
- Japanese
- Korean
- Spanish

## Automated Installation on UNIX Environments

A new installation tool is available to install RPM on UNIX environments. This tool is Java-based and automates the following:

- The deployment of the RPM ear file.
- The installation of the RPM WebStart client files.
- WebHelp setup.
- JMS configuration for the RPM task queue.
- Installation of the RPM batch scripts.

Complete installation instructions are in the RPM 12.0 Installation Guide.

## Functional Enhancements

### New System Option – Allow Buy Get Cycles

Before the system option was added, buy get cycles were considered a conflict check constraint in promotions to ensure that an item was not a member of the buy and get list or on one promotion as a buy item and another (that overlaps) as a get item.

For retailers with sophisticated POS systems, buy bet cycles validation is now managed with a system option that can manage the discounts to allow multiple-item buy and get lists that contain the same item(s).

The validation also allows items to be both a buy item in one promotion and a get item in another where the promotions overlap at a location.

In the following scenarios, the indicator to allow buy/get cycles must be set in a restrictive manner:

- For retailers whose POS may not be able to identify the buy item from the discount item when they exist in both lists.
- When a system may not be able to identify when the buy criteria has been met and may continue to discount every item bought on the get list.

### Rebranding

RPM software and documentation has been rebranded to comply with Oracle industry standards. The rebranding provides visual consistency among the integrated platforms.

## Integration with Other Oracle Retail Products

This version of RPM is compatible with the following Oracle Retail products:

- Oracle Retail Merchandising System (RMS) 12.0 (including Oracle Retail Sales Audit)
- Oracle Retail Allocation 12.0
- Oracle Retail Integration Bus (RIB) 12.0
- Oracle Retail Service Layer (RSL) 12.0
- Oracle Retail Data Warehouse (RDW) 12.0
- Oracle Retail Extract Transform and Load (RETL) 12.0
- Oracle Retail Security Manager (RSM) 12.0

---

**Note:** This version of RPM does not currently support Oracle Retail Store Inventory Management (SIM), an application on the Integrated Store Operations (ISO) platform.
