

Oracle® Retail Price Management
Release Notes
Release 12.0.2.1

February 2007

Copyright © 2007, Oracle. All rights reserved.

Primary Author: Randy Kapelke

The Programs (which include both the software and documentation) contain proprietary information; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent, and other intellectual and industrial property laws. Reverse engineering, disassembly, or decompilation of the Programs, except to the extent required to obtain interoperability with other independently created software or as specified by law, is prohibited.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. This document is not warranted to be error-free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose.

If the Programs are delivered to the United States Government or anyone licensing or using the Programs on behalf of the United States Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the Programs, including documentation and technical data, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement, and, to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software – Restricted Rights (June 1987). Oracle Corporation, 500 Oracle Parkway, Redwood City, CA 94065

The Programs are not intended for use in any nuclear, aviation, mass transit, medical, or other inherently dangerous applications. It shall be the licensee's responsibility to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and we disclaim liability for any damages caused by such use of the Programs.

Oracle, JD Edwards, PeopleSoft, and Siebel are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

The Programs may provide links to Web sites and access to content, products, and services from third parties. Oracle is not responsible for the availability of, or any content provided on, third-party Web sites. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

Preface

A Release Notes document can include some or all of the following sections, depending upon the release:

- Overview of the release
- Functional, technical, integration, and/or performance enhancements
- Assumptions
- Fixed and/or known issues/defects

Because of their brevity, Release Notes do not include chapters, appendices, or a table of contents.

Audience

Release Notes are a critical communication link between Oracle Retail and its retailer clients. There are four audiences in general for whom a Release Notes document is written:

- Retail clients who wish to understand the contents of this release.
- Integrators and implementation staff who have the overall responsibility for implementing Oracle Retail Price Management (RPM) into their enterprise.
- Business analysts who are looking for high-level functional information about this release.
- System analysts and system operation personnel who are looking for high-level functional and technical content related to this release.

Customer Support

- <https://metalink.oracle.com>

When contacting Customer Support, please provide:

- Product version and program/module name.
- Functional and technical description of the problem (include business impact).
- Detailed step-by-step instructions to recreate.
- Exact error message received.
- Screen shots of each step you take.

Release Notes

Overview

This document contains information on issues that have been addressed and resolved in Oracle Retail Price Management (RPM) since the previous release. Because of the tightly coupled nature of RPM release code, there is a chance that a fix may depend upon one or more previous fixes. Oracle Retail is making this bundled hot fix patch available because some retailers do not want to wait for the quarterly patch to apply and test individual defect fixes. Because this release falls outside of the regular patchset cycle, code fixes may be released, but separate documentation and translation files may be delayed. This Release Notes document describes noteworthy modifications.

Fixed Issues

The issues below were characterized as known issues in the last release. They have been addressed and fixed:

- When the user attempts to edit a promotion that was created and approved with the start date that is the same as the vdate, the End Date field should be enabled. However, it is not enabled.
- The store on hand (OH) inventory amount is not populating the maintain clearance apply block when maintaining an approved clearance.
- When attempting to submit a worksheet that was generated by a clearance strategy, users can get an error if there was a mix of “take” and “don’t take”.
- There are system options for the filtering of price changes and clearances that are not being used.
- Price Change search results might return and then error for “singlerow query returns more than one row by program unit”.
- When attempting to approve a promotion with a conflict, the user might see an error such as “temp table already in use”.

Known Issue

The issue below was characterized as a known issue in the last release, and it remains in that status.

- If multiple users attempt to update the status of a pricing event at the same (virtually) time, the users are not prompted with a message. The update from the user who submits the task first will process just fine, but the other users will not be prompted with a message that their update will not take place. This only occurs during asynchronous processing.
