

## RELEASE NOTES

# 360STORE UNLEASHED POINT-OF-SALE 7.2.0 LA

This document provides important information about the 360Store Unleashed Point-of-Sale 7.2.0 LA release. These notes are the most current information for the product and take precedence over all other documentation. Please review this information completely before installing or using this product.

For additional information about this product, see the following documents:

- *Unleashed Point-of-Sale User Guide*
- *Unleashed Point-of-Sale Administrator Guide*

## New Features

---

There are no new features for this release.

## Supported Environments

---

360Commerce applications are open and can run on many configurations comprised of various hardware and software components. For each given release, configurations are selected that represent typical retail configurations to serve as test environments. While 360Commerce applications will work in other configurations and use other hardware and software, these are the configurations that have been tested thoroughly.

**Note:** Although only one platform was tested for this release, 360Commerce supports other platforms. See the *Unleashed Point-of-Sale Administrator Guide* for details. Platforms not listed in the *Unleashed Point-of-Sale Administrator Guide* can be certified by the 360Commerce professional services department.

## Defects Fixed from Previous Release

---

No defects were fixed for this release.

## Known Defects

---

The following table lists features and descriptions of known issues in the current release.

Defect ID	Feature	Description
103	Device Status	Storeserverconduit is turned off while the user is logged onto the device. If the user selects to close the device from the Main Options screen, an unexpected exception occurs.
3985	Discount	If a discount amount is entered that is greater than the sale price, an error message is not displayed until after the tender is selected.
4062	Credit Tender	If the tender amount has a 7 in the ones column, the Credit Referral screen is displayed.

4063	Credit Tender	If the tender amount has a 6 in the ones column, the Credit Referral screen is displayed.
4082	Enter Price	If a user enters an item that doesn't have a price, the system will prompt for a price. No matter what price is entered, the system continues to prompt for a price.
4083	Item Inquiry	If a user inquires about the price of an item that has no price, the item is added to the transaction.
4099	Device Status	If a user is not logged onto a device, the user can still close the device.
8255	Expiry Date	The application hangs when an invalid expiry date is entered manually.
10603	Transaction Tracker	Signatures captured are not accessible using the Transaction Tracker.
10624	Serialized Item	Bar code scan hangs the browser on the Pocket PC.
10631	Sale	Duplicate transaction numbers can occur in the database.
