

Oracle® Content Publisher

Release Notes

10g Release 3 (10.1.3.3.2)

October 2007

These release notes describe new features and enhancements as well as any specific installation and implementation considerations for Oracle Content Publisher version 10g Release 3 (10.1.3.3.2).

1 What's New

This version of Content Publisher includes the following new features and enhancements:

Compared to Earlier 10gR3 Releases

- This version of Content Publisher offers a localized user interface. The following languages are supported: English, German, French, Spanish, Portuguese (Brazil), Italian, Dutch, Chinese (both traditional and simplified), Japanese, and Korean. Please note that the software help is in English, regardless of the Content Publisher user interface language.

Compared to Version 7.6

- This version of Content Publisher fully supports Content Server 10gR3.

2 Resolved Issues

This version of Content Publisher resolves a number of issues that were discovered in earlier releases, including:

- Content Publisher could not publish directory items if the query contained a single quote (') in the title metadata field (dDocTitle). This has been corrected.
- When creating a linked template, the template was not saved in the project file. This has been corrected.
- After upgrading from Content Publisher 6.2 to 10gR3, attempting to load a project resulted in the following error message: "The Project can't be read. Please make sure that you selected a Stellent Project." This has been corrected.

3 Installation Considerations

The following special considerations should be taken into account when installing this version of Content Publisher:

Missing gdiplus.dll Library

If you installed the Content Publisher software on a Windows 2000 computer and you start Site Builder for the first time, you may get an error message about a missing file called gdiplus.dll. This is a redistributable file from Microsoft that can be downloaded from the Microsoft website at <http://www.microsoft.com/downloads/details.aspx?FamilyID=6a63ab9c-df12-4d41-933c-be590feaa05a>. Copy the gdiplus.dll file to C:\WinNT\System32\ and Site Builder will start normally.

4 Implementation Considerations

The following implementation considerations should be taken into account when using this version of Content Publisher:

User Interface Language

You choose the available user interface language(s) for Content Publisher when installing the software. The initial user interface language is English. You can change the interface language by opening the **View** menu, and then selecting **Application Options**. In the dialog, open the **General** tab and then select your desired interface language in the Language menu.

Software Help System in English

The software help system of Content Publisher is always in English, regardless of the user interface language.

FileStoreProvider Component

This release of Content Publisher does not work in conjunction with Content Server's FileStoreProvider component.

Site Server on Windows 2003 Server With Service Pack 1

If you are running Windows 2003 Server and install Service Pack 1, Site Server will not work properly because of changes to the default DCOM permission.

To resolve this, configure DCOM to run with Site Server. For more information, see *Configuring DCOM on Windows 2003 Server SP1 for Use With Site Server* in the Content Publisher Installation Guide.

Connecting to Site Server on Windows XP SP2

If you are running Windows XP SP2, you may encounter a problem connecting Site Scheduler to Site Server when Site Server is running on a dedicated server machine. An error message may be displayed to indicate that the connection has failed.

To resolve this, change the access permissions on the machine on which Site Scheduler is running, and change the launch permissions on the machine on which Site Server is running. For more information, see *Troubleshooting the Connection Between Site Scheduler and Server on Windows XP SP2* in the Content Publisher Installation Guide.

5 Documentation

The following documentation is available for Content Publisher 10gR3:

- **Content Publisher Installation Guide:** This document provides complete installation instructions. It should be read carefully to ensure that Content Publisher is installed properly, as well as configured to work with Content Server.
- **Content Publisher Getting Started Guide:** This document provides a conceptual overview of Content Publisher and explains how its three applications (Site Builder, Site Scheduler and Site Server) can be used together to create web publications.
- **Seven Easy Lessons:** This document provides a brief introduction into the basic functionality of Site Builder.
- **Content Publisher Tutorial:** This document provides more detail on how the various features of Site Builder can be used to structure web publications, format web pages, create navigation links, etc.
- **Content Publisher User Guide:** This document provides extensive information about using Content Publisher (creating projects and templates, publishing sites, etc.).

6 Documentation Errata

- In Seven Easy Lessons, step 2 on page 2-6 shows a View button with an icon of the Netscape Navigator browser. This should be Internet Explorer. Also, contrary to what the document says, this icon does not change to reflect your default web browser.

7 Documentation Accessibility

Our goal is to make Oracle products, services, and supporting documentation accessible, with good usability, to the disabled community. To that end, our documentation includes features that make information available to users of assistive technology. This documentation is available in HTML format, and contains markup to facilitate access by the disabled community. Accessibility standards will continue to evolve over time, and Oracle is actively engaged with other market-leading technology vendors to address technical obstacles so that our documentation can be accessible to all of our customers. For more information, visit the Oracle Accessibility Program Web site at

<http://www.oracle.com/accessibility/>

Accessibility of Code Examples in Documentation

Screen readers may not always correctly read the code examples in this document. The conventions for writing code require that closing braces should appear on an otherwise empty line; however, some screen readers may not always read a line of text that consists solely of a bracket or brace.

Accessibility of Links to External Web Sites in Documentation

This documentation may contain links to Web sites of other companies or organizations that Oracle does not own or control. Oracle neither evaluates nor makes any representations regarding the accessibility of these Web sites.

TTY Access to Oracle Support Services

Oracle provides dedicated Text Telephone (TTY) access to Oracle Support Services within the United States of America 24 hours a day, seven days a week. For TTY support, call 800.446.2398.

The Programs (which include both the software and documentation) contain proprietary information; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent, and other intellectual and industrial property laws. Reverse engineering, disassembly, or decompilation of the Programs, except to the extent required to obtain interoperability with other independently created software or as specified by law, is prohibited.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. This document is not warranted to be error-free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose.

If the Programs are delivered to the United States Government or anyone licensing or using the Programs on behalf of the United States Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the Programs, including documentation and technical data, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement, and, to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software--Restricted Rights (June 1987). Oracle USA, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

The Programs are not intended for use in any nuclear, aviation, mass transit, medical, or other inherently dangerous applications. It shall be the licensee's responsibility to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and we disclaim liability for any damages caused by such use of the Programs.

Oracle, JD Edwards, PeopleSoft, and Siebel are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

The Programs may provide links to Web sites and access to content, products, and services from third parties. Oracle is not responsible for the availability of, or any content provided on, third-party Web sites. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.
