

RELEASE NOTES

SITE STUDIO PUBLISHING UTILITY

April 2, 2007

Version 10g Release 3 (10.1.3.3.0)

Welcome to Site Studio Publishing Utility 10gR3. Please read these notes carefully to ensure the successful installation and use of the product.

This document covers the following topics:

- ❖ [Important Installation Requirements](#) (page 1)
- ❖ [New Features and Changes](#) (page 1)
- ❖ [Resolved Issues](#) (page 2)
- ❖ [Known Issues](#) (page 2)
- ❖ [Documentation](#) (page 2)

IMPORTANT INSTALLATION REQUIREMENTS

Java Environment

This release may require an update to your Java environment. The J2SE 1.4 SDK is now required. The latest patch release is recommended.

Important: JRE 1.3 is no longer supported.

NEW FEATURES AND CHANGES

SSPU 10gR3 has no new features compared to version 7.5.x. It has the following new features compared to version 7.2:

- ❖ **Database compaction**—This allows the server to shrink the tables in the database that are used to track package updates (removes older redundant information from the database).
- ❖ **Database driver upgrade** for Oracle (versions 9i and 10g are supported).
- ❖ **Subscription Client** can now be run as a service.

RESOLVED ISSUES

The following issues have been resolved in this release (compared to version 7.5.1):

- ❖ URLs using the ‘?’ escape character are now handled correctly.
- ❖ Link to Native documents are now handled correctly.
- ❖ SsLink or SsNodeLINK links, which redirect to a different site in the same server, are now handled correctly.

KNOWN ISSUES

Syndicator Reports Error in Parsing Malformed Package ID (p51021316)

Description: The following error is included in the logs: “ERROR: delivery.ice: A confirmation was received for a different database. Confirmation will be ignored.” This only occurs the first time the server has been run with a new database.

Solution: A restart of the server is required to synchronize the database IDs. If the server is not restarted, the delivery confirmations may not be processed correctly.

DOCUMENTATION

The following documentation is available for SSPU:

- ❖ **SSPU_Installation_Guide.pdf:**
The *Site Studio Publishing Utility Installation Guide* contains information to assist administrators responsible for the installation of SSPU.
- ❖ **SSPU_Administration_Guide.pdf:**
The *Site Studio Publishing Utility Administration Guide* contains information to assist administrators responsible for the configuration and operation of SSPU.

Both guides are included in the SSPU distribution package.
