# Preface

*This preface includes the following sections:*

<i>About This Manual</i> .....	<i>vii</i>
<i>Other User Manuals</i> .....	<i>vii</i>
<i>For the System Administrator</i> .....	<i>viii</i>
<i>Other Documentation</i> .....	<i>viii</i>
<i>Location of HTML and PDF Manuals</i> .....	<i>ix</i>
<i>For Customer Support</i> .....	<i>x</i>

## About This Manual

This manual, the *Demantra Settlement Management User's Guide*, describes how to use Settlement Management. It includes the following information:

- Basic introduction
- How-to information on using worksheets to examine your data, including the forecast
- Keyboard shortcuts
- An extensive glossary

## Other User Manuals

Demantra Spectrum provides the following additional manuals for end users:

- *Collaborator Workbench User's Guide*
- *Promotions Effectiveness User's Guide*
- *Demand Planner Web User's Guide*
- *TPMO User's Guide*
- *Demand Planner User's Guide*
- *Demand Replenisher User's Guide*

## For the System Administrator

Manual	Contents
<i>Demantra Spectrum Administrator's Guide</i>	<ul style="list-style-type: none"> <li>• Overview of administrative tasks</li> <li>• Creating users and groups of users; maintaining security of menu items</li> <li>• Managing workflow instances</li> <li>• Managing the worksheets</li> <li>• Maintaining the database and using the Scheduler to schedule database procedures; wrapping database procedures</li> <li>• Using the desktop BLE user interface and defining safety stock levels</li> <li>• Configuring the menus and links in Collaborator Workbench</li> <li>• Upgrading the Demantra Spectrum license</li> <li>• Troubleshooting appendix</li> </ul>

## Other Documentation

The Demantra Spectrum documentation includes other manuals, mainly for use by people implementing a Demantra Spectrum solution:

Manual	Contents
<i>Demantra Spectrum Release Notes</i>	<ul style="list-style-type: none"> <li>• New and changed features</li> <li>• Defects fixed in this release</li> <li>• Known defects in this release</li> <li>• Late-breaking information, as needed</li> </ul>
<i>Demantra Spectrum Installation Guide</i>	<ul style="list-style-type: none"> <li>• Hardware and software prerequisites</li> <li>• Running the Demantra Spectrum installer</li> <li>• Upgrading from a previous release</li> <li>• Starting the server and logging on</li> <li>• Initiating the Citrix Metaframe Server, if you use this product</li> <li>• Uninstalling Demantra Spectrum</li> <li>• Tips on configuration settings and on Tomcat (used for demos)</li> </ul>
<i>Demantra Spectrum Concepts</i>	<ul style="list-style-type: none"> <li>• Detailed discussion of basic Demantra Spectrum concepts</li> <li>• Separate chapters with further conceptual details on configuring series, levels, worksheets, and so on</li> <li>• Overview of the implementation tools and process</li> <li>• Tips on information needed to hand off the solution to users and administrators</li> </ul>
<i>TPMO Demo Script</i>	Standalone document to get readers acquainted with the TPMO application.
<i>Demantra Spectrum Consultant's Guide</i>	Information on configuring everything apart from the Analytical Engine.
<i>Analytical Engine Guide for Demand Planning</i>	Information on configuring the Analytical Engine, for use with Demand Planner Web, Demand Planner, and Demand Replenisher.

<b>Manual</b>	<b>Contents</b>
<i>Analytical Engine Guide for Promotions Effectiveness</i>	Applies to Promotions Effectiveness. Same general contents as <i>Analytical Engine Guide for Demand Planning</i> .
<i>Demantra Spectrum Reference Guide</i>	Provides reference material on the following: <ul style="list-style-type: none"> <li>• Demantra Spectrum URLs</li> <li>• Parameters</li> <li>• Database procedures</li> <li>• Base data fields</li> <li>• Functions and operators used in server and client expressions</li> <li>• Theoretical forecast models</li> <li>• Workflow step types</li> <li>• Glossary</li> </ul>

## Location of HTML and PDF Manuals

All Demantra Spectrum manuals are available in PDF format, within the directory *Demantra\_root/Documents*. To read a PDF file, use Adobe Acrobat version 4.0 or higher. These files are formatted for double-sided printing and contain color graphics (which can be printed in color or in black and white).

Most of the manuals are also available in HTML format, as follows:

<b>Help Title</b>	<b>Contents</b>
User Help	HTML versions of the following: <ul style="list-style-type: none"> <li>• <i>Demand Planner Web User's Guide</i></li> <li>• <i>Promotions Effectiveness User's Guide</i></li> <li>• <i>Demantra Settlement Management User's Guide</i></li> <li>• <i>Collaborator Workbench User's Guide</i></li> <li>• Member Management and Chaining Management chapters from <i>Demand Planner User's Guide</i></li> <li>• <i>Demantra Spectrum Administrator's Guide</i></li> <li>• Combined glossary and index</li> </ul>
Offline Help	Condensed version of the preceding, covering only the topics that apply to working offline.
Consultant Help	HTML versions of the following: <ul style="list-style-type: none"> <li>• <i>Demantra Spectrum Concepts</i></li> <li>• <i>Demantra Spectrum Installation Guide</i></li> <li>• <i>Demantra Spectrum Consultant's Guide</i></li> <li>• <i>Analytical Engine Guide for Demand Planning</i></li> <li>• <i>Analytical Engine Guide for Promotions Effectiveness</i></li> <li>• <i>Demantra Spectrum Administrator's Guide</i></li> <li>• <i>Demantra Spectrum Reference Guide</i></li> <li>• Combined glossary and index</li> </ul>
Demand Planner Help	HTML version of the <i>Demand Planner User's Guide</i> .
Demand Replenisher Help	HTML version of the <i>Demand Replenisher User's Guide</i> .

Each help file is contained in a subdirectory of *Demantra\_root/Documents*. Each of these directories contains the file **helpset.htm**. To open the help, open that file from an internet browser.

In this release, there is no HTML version of the TPMO documentation.

## For Customer Support

For customer support, call 1-866-Demantra (x501) or send email to **support@demantra.com**.

# 1 Introduction to Settlement Management

*This chapter provides a quick introduction to Settlement Management and the other Web-based Demantra Spectrum products with which it works. It includes the following sections:*

<i>Overview to Settlement Management .....</i>	<i>1</i>
<i>Getting Started with Settlement Management .....</i>	<i>3</i>
<i>Logging Onto Settlement Management .....</i>	<i>7</i>
<i>Typical Tasks in Settlement Management .....</i>	<i>8</i>
<i>Worksheet Usage Modes.....</i>	<i>8</i>
<i>Logging Off Settlement Management .....</i>	<i>8</i>
<i>Ending a Hung Session.....</i>	<i>9</i>
<i>Changing Your Password .....</i>	<i>9</i>
<i>Other Demantra Spectrum Products in Your Solution .....</i>	<i>10</i>

## Overview to Settlement Management

Demantra Settlement Management is a Web-based, configurable tool to help you resolve *settlements* with customers (usually retailers) who have run promotions, sold your products, and now need reconciliation. You view the promotional events that Settlement Management provides as possible matches, and then select one and finalize the match. You can then attach *proof of performance* for the promotion, approve the match, and request a check to be sent to the customer (if appropriate). You can also mark a settlement as a duplicate, split a settlement (typically to match only part of it), or deny a settlement.

Often, a third party (a *broker*) has negotiated the terms. Your Demantra Spectrum system may be set up to enable you to collaborate with the broker, for example, to acquire extra information if needed.

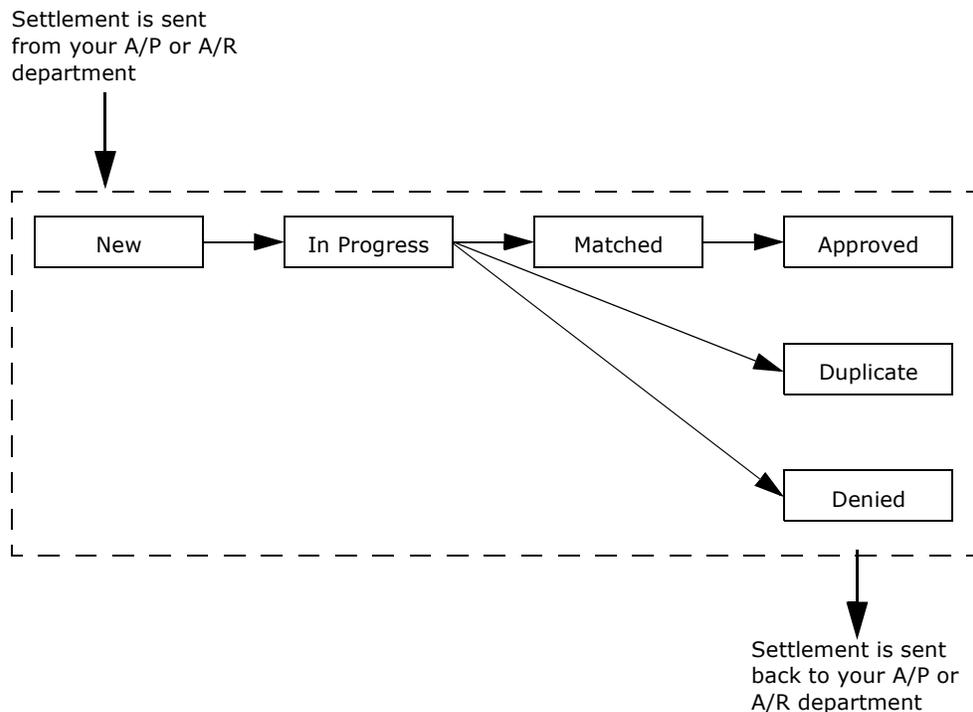

## Types of Settlements

The specific terms you use may be different, but Settlement Management organizes settlements into two groups: trade and non-trade. For trade settlements, Settlement Management recognizes three general types of settlements:

- A *claim* is a request from a customer for payment. In these cases, the customer has run the promotion and is requesting to be reimbursed, based on an agreement between you and the customer. If you approve the claim, you request for your A/P department to send a check to this customer or to the broker, as applicable.
- A *deduction* is a short payment on an invoice. In these cases, the customer has run the promotion and has made a short payment on an invoice. By permitting this short payment, you are reimbursing the customer for running the promotion.
- An *off-invoice* settlement represents the case where the customer was billed a lower amount (that is, “off invoice”) for the products, as compensation for running the promotion.

## Settlement Stages

Within Settlement Management, a settlement can go through the following stages:

In general, claims come into Settlement Management through your accounts payable (A/P) department. Deductions and off-invoice settlements come into Settlement Management through in your accounts receivable (A/R) department. In all cases, the settlement is loaded into Settlement Management automatically.

Then, in most cases, the processing is as follows:

1. When you receive a new settlement, you take ownership of it so that you can process it. At this point, the settlement is In Progress.
2. Then you review the possible promotions to which the settlement may apply. Settlement Management displays suitable possible matches.

3. If you find a matching promotion, you match the settlement and validate the *proof of performance*. Usually, you scan in a document that shows that the promotion was actually run as required, and then you upload that as an attachment to the settlement.
4. If the settlement is a claim, you then issue a check request to your company's A/P department, to send a check to the customer or to the broker as needed.
5. You (or another person) then approve the settlement. In some organizations, the customer service department (CSD) representative has authority to approve a settlement. In others, a manager does that job.

In other cases, you may find that the settlement is a duplicate or you may find another reason to deny it, per your company's policies and practices. When you deny a settlement, your A/P system may enter a chargeback to the customer.

Also, you can also split the settlement and match only part of it, as appropriate.

### **See also**

- “Getting Started with Settlement Management” on page 3
- “Demantra Spectrum URLs” on page 139

## Getting Started with Settlement Management

This section provides a quick tour of Settlement Management and the basic areas of the screen.

### Initial Logon

The first time you log onto Settlement Management, Demantra Spectrum typically downloads and installs software. This operation is quick and occurs only once for each machine you use.

1. Open Microsoft Internet Explorer.
2. Enter the web address supplied by your system administrator. This URL probably has the following format:

**`http://server name/virtual directory/portal/partnerLogin.jsp`**

For example:

**`http://frodo/demantra/portal/partnerLogin.jsp`**

---

**Tip** Your Windows **Start** menu may also include a shortcut to this URL.

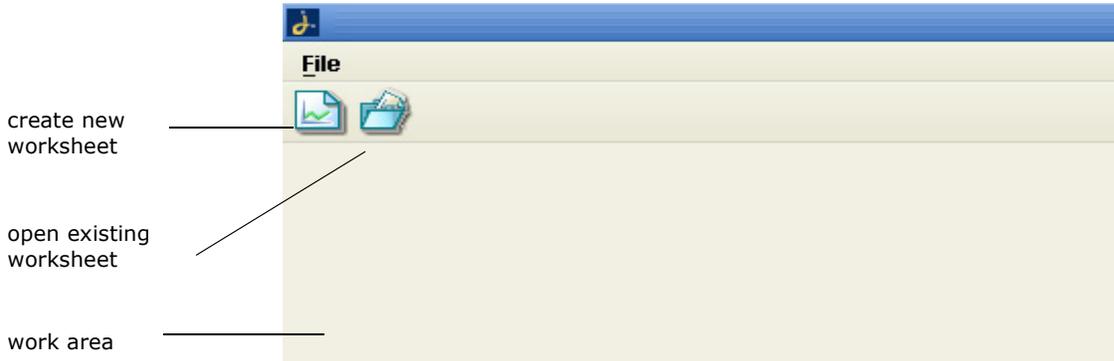

---

3. Type your name and password and click **Login**.  
Demantra Spectrum prompts you to install JRE.
4. When you are prompted to install JRE, do so. Choose the **Typical** installation and accept all the default values, unless otherwise advised by your system administrators.

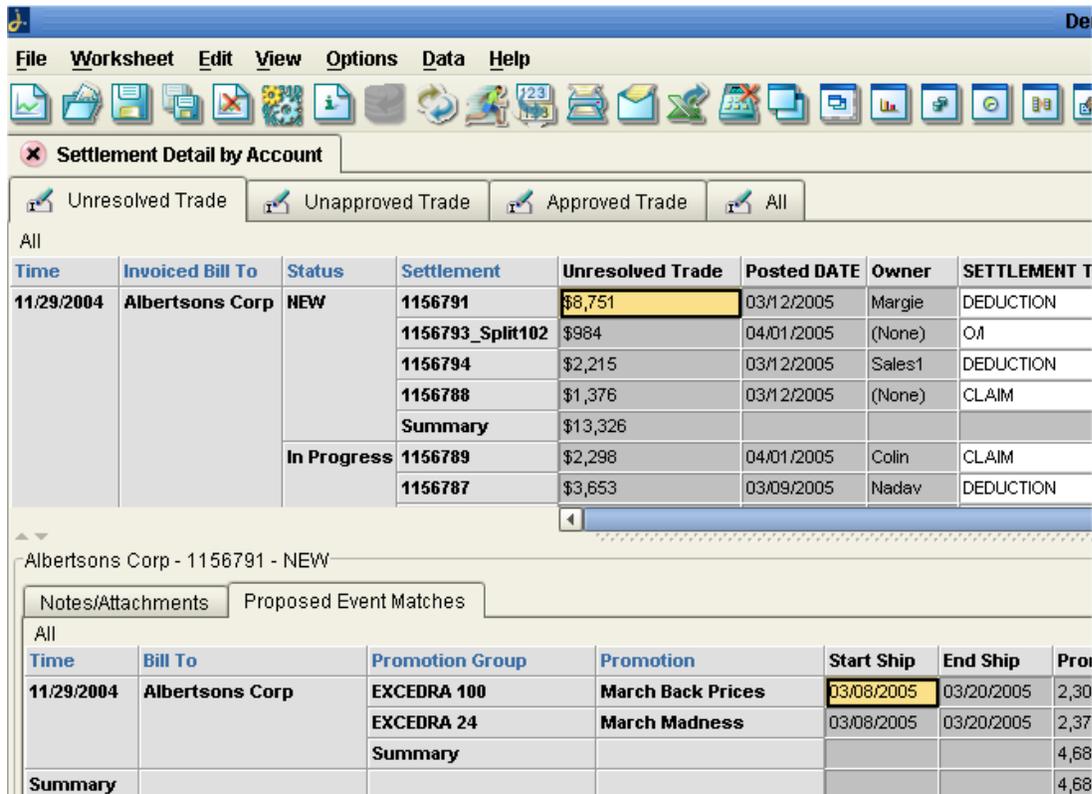

Next, Demantra Spectrum displays a dialog box that asks if you want to trust the signed application distributed by Demantra. The dialog box is slightly different depending on your configuration.

5. Click **Yes** (or **Always**) or **Start**, depending on which dialog box is displayed.

After the initial configuration is completed, Demantra Spectrum displays a new browser window. The page contains a menu bar, a toolbar, and a workspace that is initially empty.

6. Click **File > Open**.
7. Click **Settlement Details By Account** and then click **Open**.

## A Quick Tour of Settlement Management

On the Settlement Management screen, notice the following major areas:

- Standard title bar with options to maximize, minimize, and close the screen.
- Menu bar. The most commonly used menu options let you edit and save data, print data, export data, change the display in minor ways, and so on.
- Tool bar with shortcuts to perform Demantra Spectrum actions.
- The **Settlement Details By Account** worksheet, which displays settlements in different processing stages, and promotions that you can associate them with.

## Settlement Details By Account Worksheet

This worksheet is the main work area. It consists of multiple tabs, and each tab displays settlements in a specific processing stage:

Time	Invoiced Bill To	Status	Settlement	Unresolved Trade	Posted DATE	Owner	S
11/29/2004	Albertsons Corp	NEW	1156791	\$8,751	03/12/2005	Margie	DI
			1156793_Split102	\$984	04/01/2005	(None)	O
			1156794	\$2,215	03/12/2005	Sales1	DI
			1156788	\$1,376	03/12/2005	(None)	CI
			Summary	\$13,326			
		In Progress	1156789	\$2,298	04/01/2005	Colin	CI
			1156787	\$3,653	03/09/2005	Nadav	DI

- The **Unresolved Trade** tab displays settlements that have not been resolved. These settlements are either new or in progress.
- The **Unapproved Trade** tab displays settlements that have been matched but not yet approved.
- The **Approved Trade** tab displays settlements that have been matched and approved.
- The **All** tab displays all settlements, for convenience.

## General Features

Each tab of the **Settlement Details By Account** worksheet contains a table at the top, which shows details for settlements in your account (or in each account to which you have access; only your accounts are shown).

The rest of the worksheet shows details for the settlement you currently have selected in the table. You can select a settlement by clicking or by moving from row to row

with the tab and arrow keys. Note that if you use the keyboard to move through the worksheet table, the subtabs are not automatically refreshed, for performance reasons.

Albertsons Corp - 1156791 - NEW

Notes/Attachments		Proposed Event Matches			
All					
Time	Bill To	Promotion Group	Promotion	Start Ship	End S
11/29/2004	Albertsons Corp	EXCEDRA 100	March Back Prices	03/08/2005	03/20
		EXCEDRA 24	March Madness	03/08/2005	03/20
		Summary			

- The **Proposed Event Matches** subtab shows promotional events that the system has selected as possible matches for this settlement.
- The **Notes/Attachments** subtab shows notes and files that are attached to the selected settlement.

Not all tabs have the same subtabs.

Also, you can right-click to access additional menus that apply to the specific context.

## Settlement Account Summaries Worksheet

Settlement Management provides another worksheet, that summarizes information to the account level.

### To access the summary worksheet

1. Click **File > Open**.
2. Click **Settlement Account Summaries** and then click **Open**.

This worksheet looks like the following:

Trade Summary BY Account		Non-Trade Summary BY Account		
All				
Time	Invoiced Bill To	Approved Trade	Unresolved Trade	Total Outstanding Trade
09/08/2003	Albertsons Corp	\$1,600	\$3,450	\$8,700
	Summary	\$1,600	\$3,450	\$8,700
Summary		\$1,600	\$3,450	\$8,700

This worksheet contains two tabs: one for trade spending and one for non-trade events (such as losses during shipping). Each row summarizes settlement activity for each account, by time bucket. The **Notes/Attachments** subtab shows any notes or attachments for the selected account.

## Logging Onto Settlement Management

If you have already performed the one-time setup (see “Initial Logon” on page 3), then log on as follows.

### **To log onto Settlement Management**

1. Open Microsoft Internet Explorer.
2. Enter the web address supplied by your system administrator. This URL probably has the following format:

**`http://server name/virtual directory/portal/partnerLogin.jsp`**

For example:

**`http://frodo/demantra/portal/partnerLogin.jsp`**

---

**Tip** Your Windows **Start** menu may also include an option for starting Settlement Management, which you can use instead.

---

3. Type your name and password and click **Login**.
4. Click **File > Open**.
5. Click **Settlement Details By Account** and then click **Open**.

## Typical Tasks in Settlement Management

The way that you use Settlement Management depends on the worksheets created by your Demantra implementors. In general, you can use Settlement Management to do tasks like the following:

<b>Task</b>	<b>For information, see</b>
Open a worksheet	“Viewing Data” on page 11
Edit data	“Editing Data” on page 13 “Copying and Pasting Data” on page 17
View and manage settlements	“Viewing and Resolving Settlements” on page 41
Add notes for yourself or for others	“Viewing Notes” on page 22 “Specifying Note Permissions” on page 26
View changes made by you or other users	“Viewing the Audit Trail” on page 28
Create new worksheets (for advanced users)	“Creating and Redefining Worksheets” on page 85

Depending on your permissions, you might not have access to all the menus and features documented here. If you should have access to a feature, contact your system administrator.

## Worksheet Usage Modes

You can use a worksheet in Settlement Management in three general ways:

- You can use a worksheet in its normal, online mode.
- You can take a worksheet offline, and then edit data and notes without needing access to the Demantra Spectrum server. Later you can bring the worksheet back online. Demantra Spectrum uploads your changes into the database.
- You can work remotely using a pure HTML user interface, provided that you have access to the Demantra Spectrum server. This mode allows you to view and edit data when it is not possible or desirable to download the Demantra Spectrum applet and Java (as in “Getting Started with Settlement Management” on page 3).

---

**Note** To work remotely, you must have a license for Demantra Anywhere.

---

You can do most of the same activities in any of these modes. For details on the differences, see Chapter 6, “Working Offline” on page 69 and Chapter 10, “Using Worksheets Remotely” on page 133.

## Logging Off Settlement Management

### **To exit Settlement Management**

- Close the browser window.

Any other open browsers are not affected.

## Ending a Hung Session

**(Added in 7.0)** If your session hangs due to network or other problems, you will not be able to log in again until the session times out. Alternatively, Demantra Spectrum provides a tool that you can use to end that session.

If your permission level is lower than **System Manager**, your own session is the only session you can see.

### To end a hung session

1. Browse to the following case-sensitive URL:  
**`http://server name/virtual directory/portal/userManagement.jsp`**

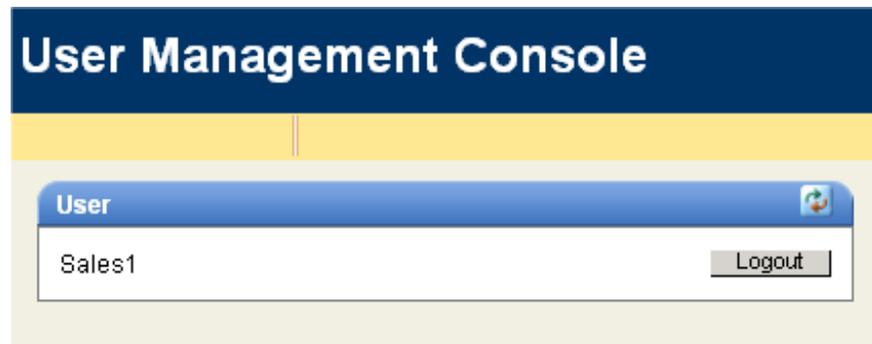

For example:

**`http://frodo/demantra/portal/userManagement.jsp`**

A login page appears.

2. Type your username and password and then click **Log on**.

Demantra Spectrum displays the following screen:

3. Click **Logout** in the row corresponding to your user ID.

## Changing Your Password

**(Added in 7.0)** You can log into the Business Modeler and change your own password. If your permission level is lower than **System Manager**, your password is the only information you can access.

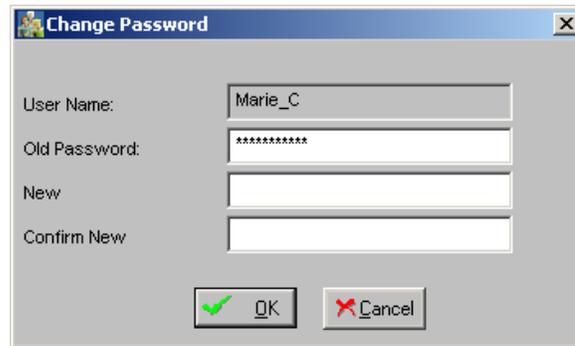

### To change your password

1. Log into the Business Modeler. If you do not have access to this tool, contact your Demantra Spectrum system administrator.

2. Click **Security > Change Password**. Or click the Change Password button.

The Business Modeler displays the **Change Password** screen:

3. Type your current password in the **Old Password** field.
4. Type your new password in the **New** and **Confirm New** fields.
5. Click **OK**.

## Other Demantra Spectrum Products in Your Solution

Your Demantra Spectrum solution may include the following additional, separately licensed Web-based products:

Product	Description
Collaborator Workbench	<ul style="list-style-type: none"> <li>• Displays summarized data, of your choice</li> <li>• Provides tools to help you collaborate with others</li> <li>• Serves as a launch spot for Settlement Management, Promotions Effectiveness, or Demand Planner Web.</li> </ul> <p>See “Collaborating with Others” on page 123.</p>
Demantra Anywhere	A thin Web client version of Collaborator Workbench. You can use Demantra Anywhere to perform most, but not all, of the same tasks as Collaborator Workbench
Promotions Effectiveness	<p>Displays promotions and shows their effects on sales, both in the past and in the forecast.</p> <p>See “Working with Promotions” on page 55 or see the <i>Promotions Effectiveness User’s Guide</i>.</p>
Promotion Optimization	Provides additional options on the right-click menu that enable you to optimize promotions based on input criteria. See the <i>Promotions Effectiveness User’s Guide</i> and the <i>Demantra Spectrum Consultant’s Guide</i> .
Demand Planner Web	Demantra Spectrum’s demand planning solution.

# 2 Working with Data

*This chapter describes the basics of working with Demantra Spectrum data: how to edit data, add notes and attachments, print, exchange data with outside tools, and so on. It includes the following sections:*

<i>Viewing Data</i> .....	11
<i>Editing Data</i> .....	13
<i>Saving and Viewing Changes</i> .....	15
<i>Sorting Worksheet Data</i> .....	16
<i>Copying and Pasting Data</i> .....	17
<i>Copying and Pasting to and from Microsoft Excel</i> .....	17
<i>Exporting Data to Microsoft Excel</i> .....	18
<i>Linking Data into Third-Party Reporting Tools (via DOL)</i> .....	19
<i>Printing</i> .....	22
<i>Viewing Notes</i> .....	22
<i>Editing Notes</i> .....	24
<i>Viewing and Managing Attachments to Notes</i> .....	25
<i>Specifying Note Permissions</i> .....	26
<i>Refreshing the Local Worksheet Cache</i> .....	27
<i>Viewing the Audit Trail</i> .....	28

## Viewing Data

### **To view your data**

1. Click **File > Open**. Or click the Open button.
2. Click a worksheet in the list and then click **Open**.

Depending on how Demantra Spectrum was configured, it may or may not automatically run the worksheet that you open.

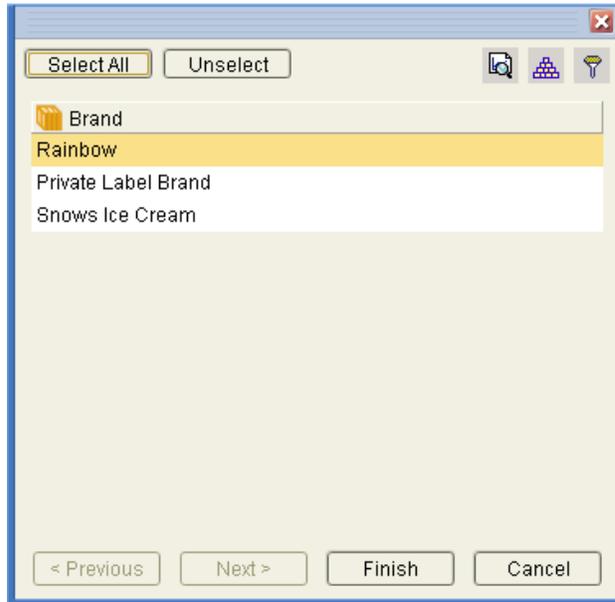

3. If the worksheet does not show data immediately, click **Data > Rerun**. Or click the Run button.

### **To prefilter a worksheet**

Depending on how the worksheet was configured, when you open the worksheet, Demantra Spectrum may prompt you to choose how to filter it.

In this case, after you click the worksheet and click **Open**, one or more selection pages are displayed when the worksheet, as follows:

1. On each selection page, select one or more choices or click **Select All** to select the whole list.
2. Click **Next** or click **Finish**.

### ***To load all data***

When you first run a worksheet, Demantra Spectrum does not load all the data. Instead, it loads data for the first item-location combination in the worksheet. When you switch to another combination, Demantra Spectrum loads data for that combination. Demantra Spectrum does this so that you can see some data without having to wait for all the combinations to be loaded. *In some cases*, you may want to load all the combinations immediately; do this only if you are sure it will not slow your system down.

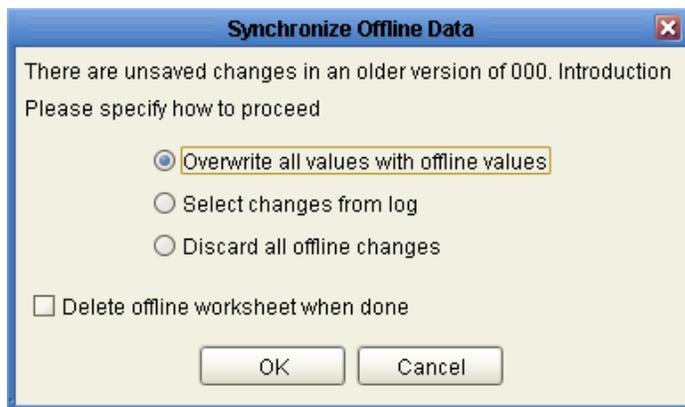

To load all the data, click the green arrow in the toolbar.

If the toolbar does not display this arrow, that means all the data has already been loaded.

***If worksheet was previously offline***

**(Added in 7.0)** If you previously took this worksheet offline and made changes to the data, you will see the following dialog box as soon as you open the worksheet:

For information on these options, see “Reloading Offline Data” on page 76.

## Editing Data

You can usually edit data in a worksheet, although not all series are editable. Note that within a given worksheet, if some of the tabs or windows show data at a higher aggregation level, the data is not editable in those tabs or windows.

---

**Note** In Demantra Spectrum, do not use the following special characters:

- Single quote ( ' )
- Double quote ( " )
- Ampersand ( & )

If you use these characters, unexpected results may occur.

---

**To change a data value manually**

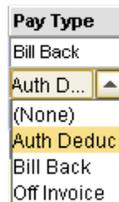

1. Select an editable data cell (white).

The cell appears contained in a box.

2. Edit the value as needed. If the cell contains a date, then you can click the arrow on the right side of the cell and choose a date:

Or if the cell contains a dropdown list, double-click the cell to display the list and then click a list element:

**To update multiple cells**

1. In the table, select a range of cells.
2. Right-click the selection and then select **Edit Cells**.

The **Edit Cells** dialog box appears.

3. In the dialog box, type a new value and then click **OK**.

**To undo**

Do one of the following:

- Click **Edit > Undo**.
- Click **Data > Reset Manual Changes**. This option restores the worksheet data to the state in which you last saved it.

**To redo an action**

- Click **Edit > Redo**.

**See also**

“Copying and Pasting Data” on page 17

“Saving and Viewing Changes” on page 15

## Saving and Viewing Changes

Apart from minor adjustments to the worksheet layout, the changes you make are not saved automatically.

### Saving Changes

You save changes to data separately from changes to the worksheet definition:

- To save changes that you have made to the data in the worksheet, including changes to notes, click **Data > Save Data**. Or click the Save Data button.

- To save changes that you have made to the worksheet definition, click **File > Save Worksheet**. Or click the Save Worksheet button.

- If you own the worksheet, this option saves the basic worksheet definition and its initial layout. For information on changing the worksheet definition, see “Creating and Redefining Worksheets” on page 85.
- If you do not own the worksheet, this option saves only your own layout of the worksheet.

See “Worksheet Definition, Layout, and Local Adjustments” on page 39.

### Controlling the Recalc Option

Usually at least some of the read-only series are computed by means of a local expression. By default, Demantra Spectrum recalculates all local series expressions automatically. In some cases, you may want to switch off this automatic recalculation:

#### ***To switch the Recalc option off***

- Click **Data > Set Data Recalc Off**. Or click the Recalc Off button.

#### ***To force calculation while Recalc is off***

- Click **Data > Calculate**.

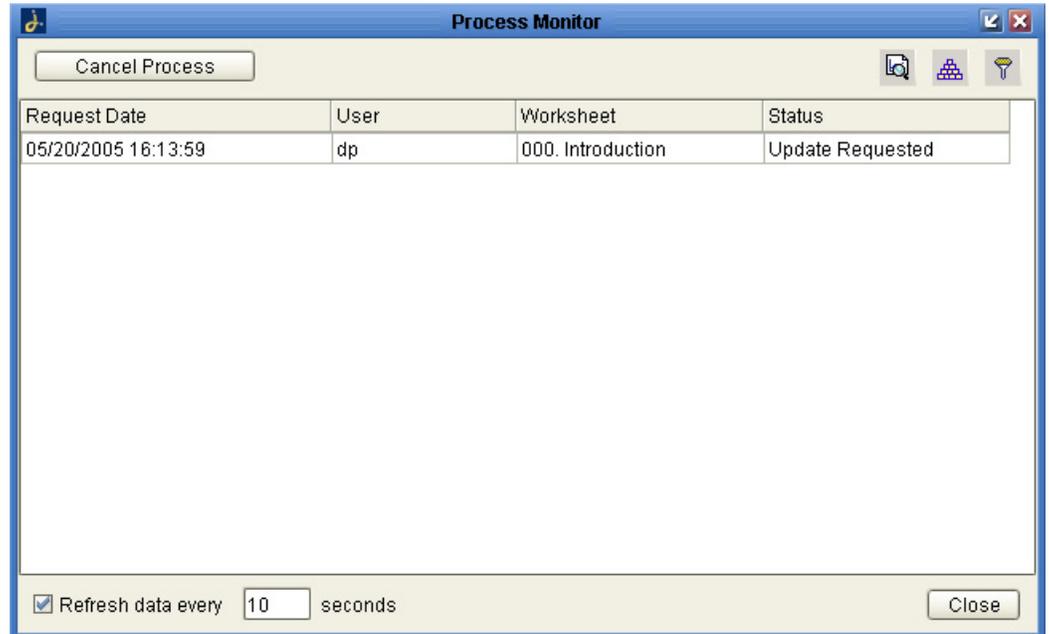

#### ***To switch the Recalc option on***

- Click **Data > Set Data Recalc On**. Or click the Recalc On button.

## Viewing Pending Changes to Data

### To see pending data changes

1. Click **Data > Update** to save your data changes.
2. Click **Data > Process Monitor**. Demantra Spectrum displays a screen that shows all data saves that are waiting to be processed:

If you are working at a relatively high level, this takes longer to run.

## Sorting Worksheet Data

By default, the worksheet table is sorted in ascending order, according to the current contents of the x-axis, which is usually time. You can sort the worksheet table in either ascending or descending order, according to any series that is displayed in the table.

### To sort the worksheet table

- Double-click the header of the column by which you want to sort the worksheet. Demantra Spectrum then sorts the entire worksheet table, putting entries in this column in descending order. A downward arrow is added to the column header, to indicate that the table is sorted by this column.

Time	Fixed Plan Lift	Last Year Sales
03/01/2004		475,954
02/02/2004	10,000	372,066
04/05/2004		147,741

To resort in ascending order, double-click the column header again. Demantra Spectrum resorts the table and changes the direction of the arrow.

**To restore the default sorting order of the worksheet table**

- Click **View > Reset Table Sort**.

## Copying and Pasting Data

You can copy and paste data within the worksheet table.

---

**Note** From a worksheet, you can also paste data to different Windows products.

---

**To copy data**

1. Within a worksheet, do one of the following:
  - In the table, select a cell whose value you want to copy.
  - To copy values from more than one cell, click the first cell, and then drag the mouse to select all cells you want to include.
2. Right-click and then select **Copy**. Or click **Edit > Copy**.

**To paste data**

1. Do one of the following:
  - In the table, select the cell into which you want to paste the data.
  - To paste values into more than one cell, select the upper left data cell of the block of cells into which you want to paste.
2. Right-click and then select **Paste**. Or click **Edit > Paste**.

**See also**

“Saving and Viewing Changes” on page 15

## Copying and Pasting to and from Microsoft Excel

You can copy and paste data from a worksheet to Excel and vice versa.

**To copy and paste data to Excel**

1. Within a worksheet, copy data as described in “Copying and Pasting Data” on page 17.
2. Start Microsoft Excel, open a worksheet, and select a cell or block of cells.
3. Right-click and then select **Paste**.

### ***To copy and paste data from Excel***

1. Start Microsoft Excel and open a worksheet.
2. Select one or more cells.
3. Right-click and then select **Copy**.
4. In Demantra Spectrum, select the cell or cells into which you want to paste the data.
5. Right-click and then select **Paste**. Or click **Edit > Paste**.

### **See also**

“Exporting Data to Microsoft Excel” on page 18

“Linking Data into Third-Party Reporting Tools (via DOL)” on page 19

## **Exporting Data to Microsoft Excel**

You can export worksheet data to Excel. Your computer’s regional settings can affect the results; see the note.

### ***To export data to Excel***

1. Within a worksheet, click **File > Export**. Or click the **Export to Microsoft Excel** button.

An export dialog box appears.

2. Select **Current Combination** to export data currently displayed, or **Entire Worksheet** to export all data from the worksheet.

3. Click **OK**.

A **Save** page appears.

4. Define the location where the worksheet data will be saved and enter a name for the file.

5. Click **Save**.

### **Note**

When receiving data from an external source, Microsoft Excel uses the **Regional Options** in the Windows Control Panel to determine whether a given cell should be formatted as **Currency** or **General** (as is or text). This means that if you export Demantra Spectrum data that is formatted with a currency symbol, and if the Windows Control Panel uses a different currency symbol, those cells will appear in Excel as text values.

If you export to Excel and you receive text values where you wanted currency values, do the following:

1. Open the **Windows Control Panel**.
2. Double-click **Regional and Language Options**.
3. On the **Regional Options** tab, make sure that the **Currency** setting uses the same currency symbol as Demantra Spectrum.
4. Export again from Demantra Spectrum.

Later versions of Excel provide an option for converting problematic cells that it recognizes.

**See also**

“Copying and Pasting to and from Microsoft Excel” on page 17

“Linking Data into Third-Party Reporting Tools (via DOL)” on page 19

## Linking Data into Third-Party Reporting Tools (via DOL)

When you work within a third-party reporting tool, you can import a Demantra Spectrum worksheet via Demantra’s Dynamic Open Link (DOL) technology. This technology lets you use any reporting tool that can connect to the Demantra Spectrum database (which is either Oracle or SQL Server).

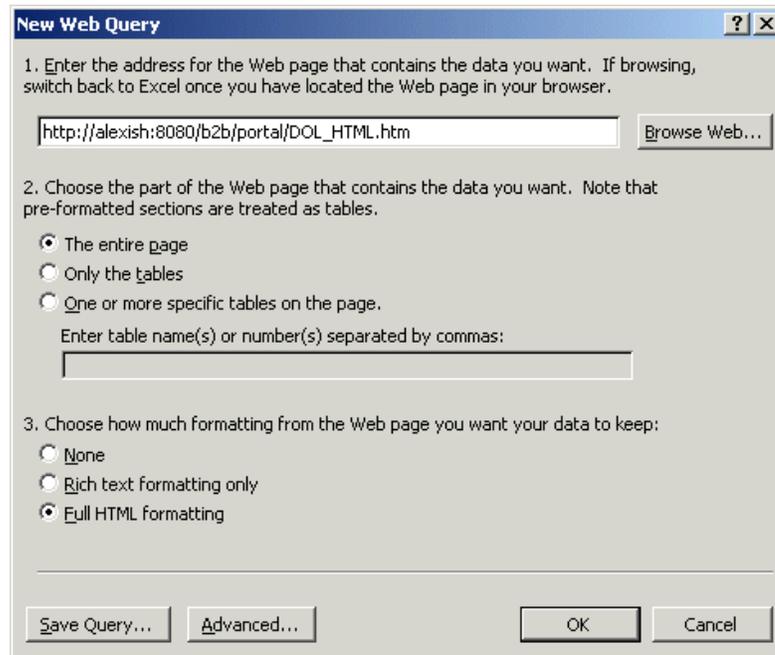

Demantra Spectrum provides a web page ([http://server name/virtual directory/portal/DOL\\_HTML.htm](http://server name/virtual directory/portal/DOL_HTML.htm)) to which you can link from your reporting tool, such as Microsoft Excel). Then to access the latest Demantra Spectrum data, you can use the refresh functionality within that reporting tool.

The following steps describe how to link Demantra Spectrum data into Excel, as an example.

**To create a worksheet report in Excel**

1. In Microsoft Excel, open the **Data** menu.
2. Click **Get External Data** and select **New Web Query**.

The **New Web Query** screen appears.

3. Click **Browse Web...**, which displays a browser.
4. In the address bar, type the following URL and then click **Go**:  
**http://server name/virtual directory/portal/DOL\_HTML.htm**

For example:

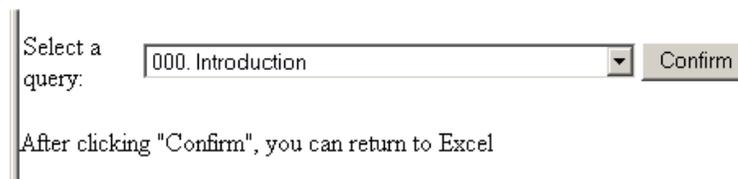

**http://frodo/demantra/portal/DOL\_HTML.htm**

A login page appears.

5. Type your Demantra Spectrum user name and password and click **Login**.

The browser now displays the following list of worksheets:

6. Select a worksheet from the dropdown list and click **Confirm**.  
The worksheet opens in your browser in non-editable HTML format.
7. Optionally close the browser window.
8. Return to Excel, which is still displaying the same dialog box as before.
9. For step 2, select **The entire page**.
10. For step 3, select **Full HTML formatting**.

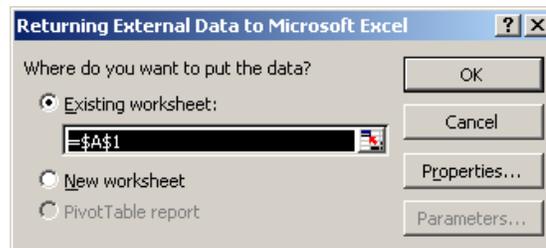

---

**Tip** To save the query for repeat use, click **Save Query...**

---

11. Click **OK**.

Excel asks where to put the data.

12. Make your choice and click **OK**.

The Demantra Spectrum worksheet opens in Excel.

**See also**

- “Copying and Pasting to and from Microsoft Excel” on page 17
- “Exporting Data to Microsoft Excel” on page 18

## Printing

### To print the displayed data

1. Click **File > Print**. Or click the Print button on the toolbar.

The **Print Settings** dialog box appears.

2. Select the required options.

**Content selection** Specify whether to print the currently selected item-location combination, all combinations in the worksheet, or the screen.

**Layout** Choose portrait or landscape orientation.

**Paper** Choose a paper size.

**Font** Choose a font size.

**Object selection** If this worksheet includes a Gantt chart (which requires a license for Promotions Effectiveness), this option lets you specify whether to include the Gantt chart in the printout.

3. If this worksheet includes a Gantt chart, optionally click the **Gantt Settings** tab. On this tab, specify which promotion attributes to include in the print-out.
4. Click **OK**.
5. Demantra Spectrum displays the normal system print dialog box, where you choose the printer to use, the number of copies to make, and so on.
6. Make selections as you would normally do.
7. Click **OK**.

## Viewing Notes

You can add notes to record comments and reminders. You attach the note to combination and date or dates. The worksheet table displays indicator symbols on those dates, generally in only some of the columns (depending on how your system is configured). The following shows an example of the indicator:

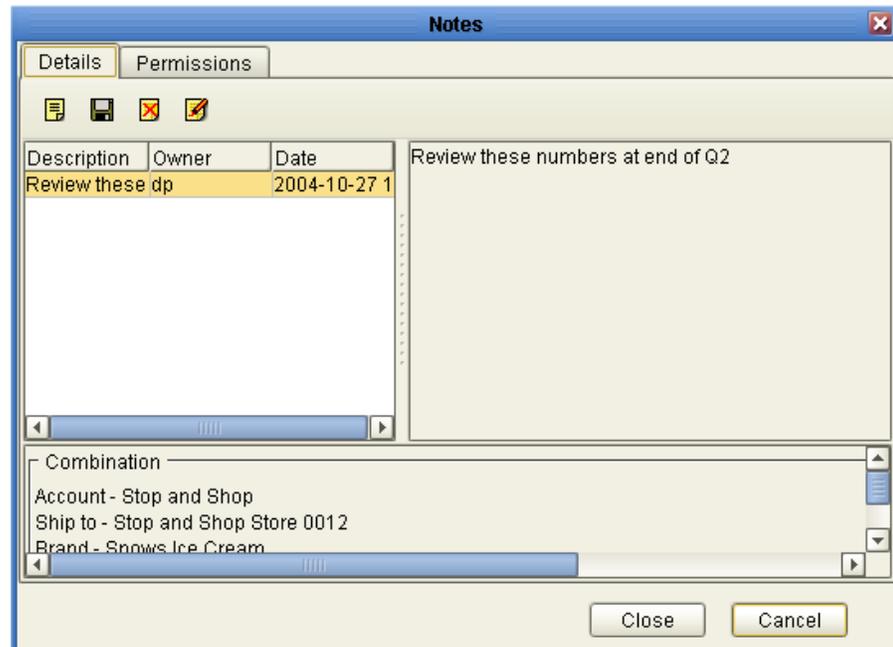

471,400	
158,100	
603,000	
161,500	
259,800	

The graph displays an indicator as well:

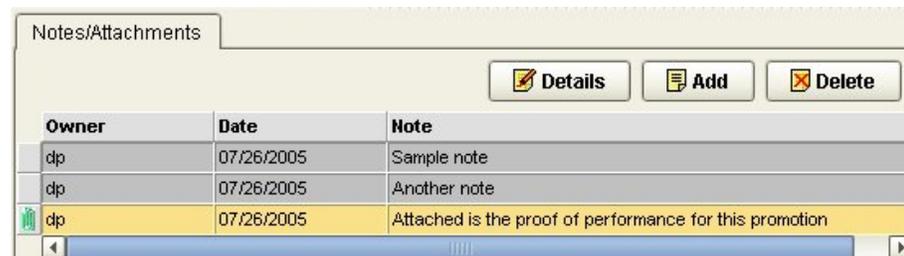

You can see notes in two different areas:

- In the **Notes** dialog box.

- In the **Notes/Attachments** subtab, if this is included in your worksheet. This subtab also displays any associated attachments.

### **To open the Notes page**

Do one of the following:

- In the table, right-click a cell and select **Notes...** The note will be associated with only this row.
- In the table, select one or more rows, right-click and then select **Notes....** The note will be associated with each of the selected rows.
- In the table, double-click the left (non-scrolling) column. (Depending on how Demantra Spectrum is configured, this action may not bring up the **Notes** page.)
- In the graph, hold the mouse button over a point, right-click and then select **Notes...**

### **To display the Notes/Attachments subtab**

See “Specifying the Worksheet Elements in a View” on page 117.

### **See also**

“Editing Notes” on page 24

“Viewing and Managing Attachments to Notes” on page 25

“Specifying Note Permissions” on page 26

## **Editing Notes**

First display the **Notes** page or the **Notes/Attachments** subtab; see “Viewing Notes” on page 22. In the upper part of the worksheet, click the element to which you want to attach this note.

### **To add a note**

1. If the **Note** box is gray (uneditable), click the Add button.
2. Type a note in the **Note** box.
3. If you are working in the **Notes/Attachments** subtab, you can optionally upload an attachment (see “Viewing and Managing Attachments to Notes” on page 25).

4. Click the Save button.

### **To edit a note**

1. Select a note and click the Edit button.
2. Type a note in the **Note** box.
3. If you are working in the **Notes/Attachments** subtab, you can optionally upload an attachment (see “Viewing and Managing Attachments to Notes” on page 25).

4. Click the Save button.

### **To delete a note**

1. Select a note and click the Delete button.  
The **Confirm Delete** message box appears.
2. Select one of the following:
  - **Partial Deletion** (deletes the note only from the current member and date)
  - **Total Deletion** (deletes the note from all members and dates)
3. Click **OK**.
4. Click **Save**.

**See also**

“Viewing Notes” on page 22

“Specifying Note Permissions” on page 26

## Viewing and Managing Attachments to Notes

You can attach files to the notes, and Demantra Spectrum uploads those files into the database (in compressed form). To view and manage attachments, you work in the **Notes/Attachments** subtab of your worksheet.

**To add an attachment to a note**

1. Click the note.
2. Click **Details**.

Demantra Spectrum displays the **Note Details** screen:

3. Click **Add**.
4. Find the file that you want to attach and then click **Open**.

Demantra Spectrum uploads a compressed version of the file into the database.

5. Click **OK**.

**To remove an attachment from a note**

1. Click the note.
2. Click **Details**.

Demantra Spectrum displays the **Note Details** screen:

3. Click the row that lists the attachment and then click **Remove**.
4. Click **OK**.

**To download an attachment**

1. Click the note.
2. Click **Details**.  
Demantira Spectrum displays the **Note Details** screen:
3. Click the row that lists the attachment and then click **Download**.
4. Specify the directory and filename for the downloaded file and then click **Save**.
5. Click **OK**.

**See also**

“Viewing Notes” on page 22

“Specifying the Worksheet Elements in a View” on page 117

## Specifying Note Permissions

In general, notes (and their optional attachments) can be viewed by other users. You can specify permissions for the notes, to determine who can read the note and what type of access they are permitted. You can specify permissions for groups or for specific users.

**To specify permissions for a note and its attachments**

1. On the **Details** tab, select the note.
2. Click the **Permissions** tab.
3. Select the **User Permissions** or **Group Permissions** tab.
4. For each user or group that should have non-default settings for this note, move that user or group from the left list to the right list (**Selected Users** or **Selected Groups**). Use any of the techniques in “Working with Lists” on page 96.

---

**Note** Read-only is the default setting for non-selected users or groups.

---

5. Remove any unwanted users or groups from the right list.
6. Then for each user or group in the right list, do the following:
  - a. Click the user or group.
  - b. Select a setting from the **Permission** dropdown list at the bottom of the page. The following options are available:

<b>Read and Write</b>	Enables the user or group to read the notes list, edit notes, and add notes.
-----------------------	--

<b>Read Only</b>	Enables the user or group to read the notes list.
<b>Not Visible</b>	Makes the note list not visible to this user or group.
<b>Full Control</b>	Enables the user or group to read the notes list, edit notes, add notes, and delete notes.

7. Click **Save**.
8. Click **Close**.

***Group and user permission priorities***

- User permissions take precedence over permissions of any groups the user belongs to.
- If a user belongs to more than one group, the highest level of permissions from the associated groups will be granted.

***See also***

“Viewing Notes” on page 22

## Refreshing the Local Worksheet Cache

Depending on the definition of a worksheet, Demantra Spectrum may store a local copy of the worksheet data on your machine, for faster performance. Also depending on the worksheet definition, the cache may be refreshed automatically or may require periodic refreshing by you.

***To refresh your local worksheet cache***

- Click **Data > Refresh worksheet data cache**.

***See also***

“Visual Elements of Worksheet Views” on page 91

“Saving and Viewing Changes” on page 15

“Configuring the Worksheet Basics” on page 98

“Opening an Item or Location in Another Worksheet” on page 82

## Viewing the Audit Trail

Demantra Spectrum automatically records changes in an audit trail. The audit trail includes all changes due to user edits within worksheets, updates created by the Business Logic Engine, copy/paste actions, and changes caused by import.

**Note** You can see only changes that were made by you or other users who are in the same collaboration groups as you.

Demantra Spectrum provides two ways to view the audit trail:

- You can view the changes that have occurred to the item-location combination that is currently displayed in the worksheet.
- You can create and then execute a profile that specifies a wider set of data: multiple combinations, a wider span of time, and so on.

In either case, the audit trail looks like this:

Audit Date	User Name	Update Mode	Unit Name	Index Name	Series List	Status
11/17/03 14:41:09	dp	Manual	Cases		Final Plan; Fixed F	Successful
11/17/03 14:35:21	dp	Manual	units		Final Plan	Successful
11/17/03 14:34:45	dp	BLE	units		Final Plan	Successful
11/17/03 14:34:45	dp	BLE	units		Final Plan	Successful
11/17/03 14:34:45	dp	BLE	units		Final Plan	Successful
11/17/03 14:34:44	dp	BLE	units		Final Plan	Successful

Series Name	Series Value	Original Value	From Date	To Date
Final Plan	14,424,930	14,424,930	05/05/03 00:00:00	06/01/03 00:00:00
Final Plan	20,200,134	20,200,134	06/02/03 00:00:00	07/06/03 00:00:00
Final Plan	18,274,362	18,274,362	07/07/03 00:00:00	08/03/03 00:00:00
Final Plan	16,963,526	16,963,526	08/04/03 00:00:00	08/31/03 00:00:00
Final Plan	23,479,568	23,479,568	09/01/03 00:00:00	10/05/03 00:00:00
Final Plan	20,024,052	20,024,052	10/06/03 00:00:00	11/02/03 00:00:00
Final Plan	22,519,804	22,517,804	11/03/03 00:00:00	11/30/03 00:00:00
Fixed Plan Lift	2,000		11/03/03 00:00:00	11/30/03 00:00:00
Final Plan	19,892,716	19,892,716	12/01/03 00:00:00	01/04/04 00:00:00

The top part of the page lists the changes. When you select a row in this table, the bottom part of the page lists details corresponding to that row.

- The **Series Values** tab displays details on the series that were changed.
- The **Aggregate Level Population** tab displays the specific aggregation levels to which this change applies. The change could have occurred at a different aggregation level.
- The **Filtered Population** tab displays the filtering that was used at the time of this change.

## Viewing the Audit Trail for a Specific Combination

### *To view the audit trail for a combination*

1. In a given worksheet, select a combination.
2. Click **Data > Audit Trail**.

If any changes have occurred to this combination, the **Audit Trail** screen appears, displaying a table with one row for each recorded change. The following information is displayed:

<b>Audit Date</b>	Date when change was made.
<b>User Name</b>	User who made the change
<b>Update Mode</b>	Indicates the type of change: Manual, BLE (Business Logic Engine) or Integration
<b>Unit Name</b>	Unit of measure that was used at the time of the change
<b>Index Name</b>	Index that was used at the time of the change
<b>Series List</b>	Series affected by the change
<b>Status</b>	In Progress, Fail, or Success

3. To see specific details on this change, click a change in this table and then click the **Series Values** tab.

This tab displays the following information:

<b>Series Name</b>	Name of the series that was changed.
<b>Series Value</b>	New value used in this series.
<b>Original Value</b>	Original value in this series.
<b>From Date</b>	First date in the series when the change occurs.
<b>To Date</b>	Last date in the series when the change occurs.

4. To see the specific aggregation levels to which this change applies, click the **Aggregate Level Population** tab. The change could have occurred at a different aggregation level.
5. To see the filtering that was used at the time of this change, click the **Filtered Population** tab.

## Viewing the Audit Trail for Other Data

An audit trail profile enables you to select a specific portion of the audit trail so that you can view changes that affect more than one combination.

### **To create or modify an audit trail profile**

1. Click **File > Audit Trail**.
2. Then:
  - To create a new profile, click **New**.
  - To modify a profile, click an audit trail profile name and click **Modify**.

The wizard displays a properties screen.
3. In the **Name** and **Description** fields, type a name and optional description.
4. If you want to share this audit trail profile with others, click **Public**.
5. Click **Next**.

The wizard prompts you for information about the changes you want to see.
6. For **Source Type**, click the check box for each type of change you want to see. Here, BLE represents the Business Logic Engine.
7. For each user whose changes you want to see, move the name from **Available Users** to **Selected Users**.
8. Click **Next**.

The wizard prompts you for the range of time you are interested in.
9. For **Time Filter**, select **Relative** or **Fixed**, depending on whether you want to define a window of time relative to today.
10. For **From Date** and **To Date**, specify a range of dates.
11. Click **Next**.

The wizard prompts you to specify the aggregation levels you are interested in.
12. For each aggregation level that you are interested in, move that level from **Available Filter Levels** to **Selected Filter Levels**.
13. Click **Next**.

The wizard prompts you to specify the series you are interested in.
14. For each series that you are interested in, move that series from **Available Series** to **Selected Series**.
15. Click **OK**.
16. Click **Close** to exit the wizard.

***To use an audit trail profile***

1. Click **File > Audit Trail**.
2. Click an audit trail profile.
3. Click **Execute**.

Demantra Spectrum displays the specified part of the audit trail. See “Viewing the Audit Trail for a Specific Combination” on page 29.

***To delete an audit trail profile***

1. Click **File > Audit Trail**.
2. Click an audit trail profile.
3. Click **Delete**.
4. Click **Yes**.

# 3 Managing the Screen

*This chapter describes how to manage the Demantra Spectrum screen in general. It includes the following sections:*

<i>Managing Multiple Worksheets .....</i>	<i>33</i>
<i>Managing Worksheet Views .....</i>	<i>35</i>
<i>Managing View Elements .....</i>	<i>36</i>
<i>Managing Empty Rows .....</i>	<i>37</i>
<i>Worksheet, Layout, and Data.....</i>	<i>38</i>
<i>Worksheet Definition, Layout, and Local Adjustments.....</i>	<i>39</i>

*See Also*

*“Creating and Redefining Worksheets” on page 85*

## Managing Multiple Worksheets

Within Demantra Spectrum, you can open multiple worksheets and display them in tab mode or window mode. In window mode, you can resize, position, minimize, maximize, and tile each window as in other software.

### **To specify how to display worksheets**

Do one of the following:

- Select **Options > Tabs View/Windows View**.
- Click the Tabs/Windows toggle button.

display worksheets as windows

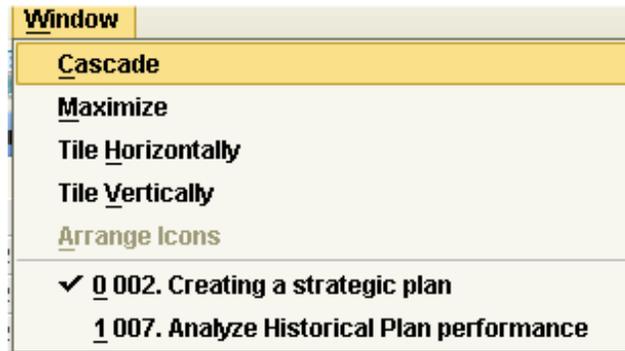

display worksheets as tabs

A worksheet contains views, and these views can be displayed as windows or tabs within the worksheet itself. The **Tabs/Windows** setting discussed here has no effect on the views.

**To view a worksheet that has already been opened**

- In windows view, select the worksheet from the **Windows** menu.

- In tabs view, click the tab corresponding to the worksheet.

**To close a worksheet**

Do one of the following:

- In windows view, click close (X) in the top right corner of the worksheet window.
- In tabs view, click the close symbol (X) on the tab.

**See also**

“Managing Worksheet Views” on page 35

“Managing View Elements” on page 36

“Adding and Managing Worksheet Views” on page 115

## Managing Worksheet Views

A worksheet can include multiple *views*, which are displayed as tabs or as windows within the worksheet window itself.

Each view can have a different set of series and a different layout. Within any given worksheet, you can display the views as tabs or as child windows that you can resize and reposition.

Depending on the worksheet definition, the views may or may not be synchronized with each other. If they are synchronized, when you edit in one view, that change automatically appears in the other views.

---

**Note** In a given worksheet, if some of the views show data at a higher aggregation level, the data is not editable in those views.

---

### *To manage worksheet views*

Within any given worksheet, you can display the worksheet views as tabs or as child windows that you can resize and reposition.

- To create, modify, or delete worksheet views, see “Adding and Managing Worksheet Views” on page 115.
- To change how views are shown within the current worksheet, click **Options > Tabs Multiview** or **Options > MDI Multiview**, whichever option is displayed. Or click the corresponding toggle button on the toolbar.

display views as child windows

display views as tabs

- If you are currently displaying views as tabs, you can view one tab at a time. Click the tab of the view you want to view.
- When you are displaying views as subwindows, you can resize, reposition, maximize, and minimize each of these subwindows. Also, the **Options** menu provides options for tiling and cascading the subwindows.

### **See also**

“Managing Multiple Worksheets” on page 33

“Managing View Elements” on page 36

## Managing View Elements

### ***To hide or redisplay elements of a worksheet view***

You can hide elements of a worksheet. To do so, use the **Options** menu. For example, to hide the graph, click **View > Show/Hide Graph**.

---

**Note** This menu includes an option to hide the time axis. You typically use this option only if the worksheet also contains time levels. In such a case, it is desirable to hide the time axis, because it is redundant and takes up space on the screen.

---

Each of these menu items acts as a toggle. To redisplay what you have hidden, click the same menu item again.

### ***To resize an area in a worksheet view***

- Drag a divider to the required position.

### ***To expand or contract an area in a worksheet view***

- There are two snap buttons in the upper left of each worksheet area, one with an up arrow and one with a down arrow. Click the snap button pointing in the required direction.

### ***To resize a data column***

- Click the vertical divider between two column headers, and drag it horizontally to the required position.

“Managing Multiple Worksheets” on page 33

“Managing Worksheet Views” on page 35

“Adding and Managing Worksheet Views” on page 115

# Managing Empty Rows

## To hide or display empty rows in the worksheet table

- Click **View > Hide Empty Rows**. This option is a toggle. If you click it again, you redisplay the empty rows.

**Note** This option does not affect any graphs in the worksheet.

## Examples

In some cases, some of the rows of a worksheet table might not contain data, for example:

Cookies - Low Fat			
Account	Time	Revenue \$	Market Plan \$
BJ	03/10/2003	\$1,243,435	\$1,257,652
	06/09/2003	\$1,488,018	\$1,771,360
	09/08/2003	\$740,175	\$901,146
	12/08/2003	\$1,031,035	\$7,247,500
	03/08/2004	\$816,591	\$850,507
	Summary	\$5,319,254	\$12,028,165
Rainbow Company	03/10/2003		\$658,800
	06/09/2003		
	09/08/2003		
	12/08/2003		
	03/08/2004		
	Summary		\$658,800
Summary		\$5,319,254	\$12,686,965

Empty Rows Shown      Row: 9, Col: 5

Note that the status bar at the bottom of worksheet indicates that empty rows are currently being displayed.

When you hide empty rows, the result is as follows:

Cookies - Low Fat			
Account	Time	Revenue \$	Market Plan \$
BJ	03/10/2003	\$1,243,435	\$1,257,652
	06/09/2003	\$1,488,018	\$1,771,360
	09/08/2003	\$740,175	\$901,146
	12/08/2003	\$1,031,035	\$7,247,500
	03/08/2004	\$816,591	\$850,507
	Summary	\$5,319,254	\$12,028,165
Rainbow Company	03/10/2003		\$658,800
	Summary		\$658,800
Summary		\$5,319,254	\$12,686,965

Empty Rows Hidden      Row: 7, Col: 5

## Worksheet, Layout, and Data

As you work within Demantra Spectrum, it is important to remember that worksheets exist independently from the data that they display. For example, the definition of a worksheet specifies which series to display and how to aggregate those series for that worksheet. But the worksheet definition does not specify the values that the series contain.

Accordingly, the worksheets and their layouts are saved separately from changes to the data.

- To save changes that you have made to the data in the worksheet, including changes to notes, click **Data > Save Data**. Or click the Save Data button.

- To save changes that you have made to the worksheet definition or to the local layout, click **File > Save Worksheet**. Or click the Save Worksheet button.
  - If you own the worksheet, this option saves the basic worksheet definition and its initial layout. This affects any users of this worksheet who have not yet saved their own layout for it.
  - If you do not own the worksheet, this option saves only your own layout of the worksheet. This has no effect on any other users.

### **See also**

“Worksheet Definition, Layout, and Local Adjustments” on page 39

“Saving and Viewing Changes” on page 15

# Worksheet Definition, Layout, and Local Adjustments

As you work with a Demantra Spectrum worksheet, you often sort columns, hide or display features, and make various other changes. It is useful to understand how these settings are saved.

---

## Base Demantra Spectrum configuration

These settings affect all users and all worksheets.

- Display format for each series
- Initial display width of series and levels
- Colors and graph style for each series
- Other display colors (generally dependent on a condition)

---

## Worksheet definition

These settings are saved via the **File > Save Worksheet** menu option. Only the worksheet owner can make these changes.

- Initial number of views within the worksheet and their initial names
- Initial elements (Members Browser, table, graph, and so on) in worksheet view
- View synchronization setting
- Aggregation levels used in worksheet and *initial* level layout; advanced selection options
- Series used in worksheet and *initial* series layout
- Time aggregation; time span; time formatting
- Filtering and exception filtering
- Unit of measure used in worksheet; overall scale used in worksheet, if any; index or exchange rate, if any

---

## Layout changes

These settings are saved separately for each user if the user clicks **File > Save Worksheet**. Any user can save these changes, not just the worksheet owner.

- Additional views in the worksheet
- New names of worksheet views
- *Level layout*: order of levels; placement on axes in each view; whether level is hidden in each view
- *Series layout*: order of series; where each series is displayed (table, graph, both)
- Hide/show time axis

---

## Local adjustments

These settings are saved automatically separately for each worksheet and each user.

- Use of windows or tabs for views within a worksheet
- Size and position of the Members Browser, table, graph, and so on in each view
- Sorting in the worksheet table
- Graph type; legend; grid lines
- Hide/show empty rows setting
- Activity synchronization setting (Options menu)

---

## Not saved

- Changes to column widths in the worksheet table
- Initial view focus; focus in each worksheet view
- Expansion state in the Members Browser and Activity Browser
- Focus and scroll in all areas
- Zoom setting in Gantt

---

The autorun option (Options menu) is saved separately for each user, but applies to all worksheets that the user sees.

# 4 Viewing and Resolving Settlements

*This chapter describes how to display and resolve settlements. It includes the following sections:*

<i>Viewing Unresolved Settlements</i> .....	41
<i>Assigning an Owner to a Settlement</i> .....	42
<i>Matching a Settlement to a Promotional Event</i> .....	43
<i>Attaching Documentation to the Settlement</i> .....	44
<i>Partially Matching a Settlement (Splitting a Settlement)</i> .....	45
<i>Approving a Settlement</i> .....	49
<i>Requesting a Check</i> .....	47
<i>Sending a Settlement to Another Person</i> .....	50
<i>Unlinking a Settlement</i> .....	51
<i>Denying a Settlement</i> .....	53

## Viewing Unresolved Settlements

1. Open Microsoft Internet Explorer.
2. Enter the web address supplied by your system administrator. This URL probably has the following format:

**`http://server name/virtual directory/portal/partnerLogin.jsp`**

For example:

**`http://frodo/demantra/portal/partnerLogin.jsp`**

3. Type your name and password and click **Login**.
4. Click **File > Open**.
5. Click **Settlement Details By Account** and then click **Open**.
6. Click the **Unresolved Trade** tab, where you will do most of the work of resolving settlements.

### **Next steps**

“Assigning an Owner to a Settlement” on page 42

## Assigning an Owner to a Settlement

### *When to do this*

Before you can work on a settlement, you should take ownership of it, so that other users do not interfere with your work.

### *To assign an owner*

1. Right-click a settlement and then choose **Methods > Ownership**.

Settlement Management displays a screen like the following:

The screenshot shows a dialog box titled "Ownership : 1156788". It contains three dropdown menus: "Account" (set to "Albertsons Corp"), "Settlement Owner" (empty), and "Status" (set to "NEW"). At the bottom, there is a checked "Save parameters" checkbox and "Cancel" and "OK" buttons.

2. For **Settlement Owner**, click your user ID from the dropdown list.
3. For **Status**, click **In Progress** from the dropdown list.
4. Click **OK**.

### *Next steps*

The next step is to match this settlement to a promotional event (“Matching a Settlement to a Promotional Event” on page 43) or to split this settlement (“Partially Matching a Settlement (Splitting a Settlement)” on page 45). In some cases, you might need to deny the settlement (“Denying a Settlement” on page 53).

## Matching a Settlement to a Promotional Event

### **When to do this**

Each settlement corresponds to at least one promotional event. You should match a settlement to the event or events in order to reconcile your company's accounting books. When you do so, the settlement amount is subtracted from the budget for that promotion.

### **To match a settlement to an event**

1. Click the **Unresolved Trade** tab.
2. Take ownership of the settlement, as in "Assigning an Owner to a Settlement" on page 42. The settlement is now highlighted and the subtabs show information that is relevant to this settlement.
3. Click the **Proposed Event Matches** subtab to see possible events that could be matched to this settlement. If this is an off-invoice settlement, there will probably be only a relatively small number of events.

---

**Note** If you use the keyboard to move through the worksheet table, the subtabs are not automatically refreshed, for performance reasons.

---

4. To match the selected settlement to an event, right-click the event and then choose **Methods > Link**.

Settlement Management displays a screen like the following:

**Link : March Back Prices**

**Settlement Information**

**Customer:**                      **Amount:**                      **Settlement #:** 63

---

**Activity**

**Name:**                      March Back Prices                      **Start Date:**                      03/14/2005

**Start Ship:**                      03/08/2005                      **End Date:**                      03/14/2005

---

**Linking**

Link Settlement to Event

Mark as Duplicate

Split Settlement. Partial match

**Amount to Link:**                       **Open Amount:**

Request Check...                      **Reason Code:**

5. Make sure that the option **Link Settlement to Event** is selected.
6. Click **OK**.

Demantra Spectrum automatically changes the status of the settlement to **Unapproved**. It also reduces the budget for the selected promotion, using the amount of the settlement.

***Next steps***

At this point, you typically attach proof of performance or other documentation to the settlement; see “Attaching Documentation to the Settlement” on page 44. Then the settlement can be approved; see “Approving a Settlement” on page 49.

## Attaching Documentation to the Settlement

***When to do this***

Policies vary from company to company, but it is generally necessary for the customer to provide documentation that proves that the event was run as specified. This documentation may come to you as paper or as computer files. If you receive paper documents, scan them so that you can load them into the system.

---

**Note** You can attach any kind of file. A PDF file is typical.

---

***To attach documentation to a settlement***

1. Click the settlement so that it is selected.
2.  In the **Notes/Attachments** subtab, click the **Add** button.
3. Type a note in the **Note** box.
4. Click **Details**.

Demantra Spectrum displays the **Note Details** screen:

5. Click **Add**.
6. Find the file that you want to attach and then click **Open**.

Demantra Spectrum uploads a compressed version of the file into the database.

7. Click **OK**.

### **Next steps**

If you have attached all the documents needed by your organization, the settlement can now be approved; see “Approving a Settlement” on page 49.

## **Partially Matching a Settlement (Splitting a Settlement)**

### **When to do this**

Sometimes it is necessary to split a settlement and match *part* of it to an event. You might do this in the following cases, for example:

- If the customer deducted on more units than permitted by contract
- If the promotion was not run as required by contract
- If the settlement is associated with multiple events

**To partially match a settlement to an event**

1. Click the **Unresolved Trade** tab.
2. Take ownership of the settlement, as in “Assigning an Owner to a Settlement” on page 42. The settlement is now highlighted and the subtabs show information that is relevant to this settlement.
3. Click the **Proposed Event Matches** subtab to see possible events that could be matched to this settlement.
4. To see the details for a given event, click that event and view the details in the right side of the **Proposed Event Matches** subtab.
5. To partially match the selected settlement to an event, right-click the event and then choose **Methods > Link**.

Settlement Management displays a screen like the following:

**Link : March Back Prices**

**Settlement Information**

**Customer:**                      **Amount:**                      **Settlement #:** 63

---

**Activity**

**Name:**                      March Back Prices                      **Start Date:**                      03/14/2005

**Start Ship:**                      03/08/2005                      **End Date:**                      03/14/2005

---

**Linking**

Link Settlement to Event

Mark as Duplicate

Split Settlement: Partial match

**Amount to Link:**                       **Open Amount:**

Request Check...                      **Reason Code:**

6. Click the option **Split Settlement: Partial Match**.
7. For **Amount to Link**, enter the monetary amount that should be matched to the selected event.
 

The **Open Amount** field is updated automatically, showing the remaining, unmatched amount of the settlement.
8. For **Reason Code**, click the reason that best explains why you are performing a partial match.
9. If this settlement is a claim, you can request a check to be sent to the customer. To do so, click **Request Check**.
10. Click **OK**.

11. If you clicked **Request Check**, see “Requesting a Check” on page 47.

Demantra Spectrum automatically creates a new settlement that contains the remaining, unmatched amount.

### ***Next steps***

For the settlement that you just matched, you should approve that settlement; see “Approving a Settlement” on page 49.

For the new settlement, you typically do one of the following:

- “Matching a Settlement to a Promotional Event” on page 43
- “Denying a Settlement” on page 53

## **Requesting a Check**

### ***When to do this***

If a customer has submitted a claim and if that claim can be matched to a suitable event, then you should send a check to the customer (or possibly to the broker, as appropriate for the account). This check compensates the customer for running the promotional event.

### ***To request a check for a claim***

1. On the **Link** screen, click **Request Check**. This check box is enabled only for claims, not for other kinds of promotions.
2. Click **OK**.

Settlement Management displays a screen like the following:

The **Existing Requests** area lists check requests that have already been issued for this promotional event, if any. You use the **New Check Request** area to enter details for a new check request.

3. For **Amount**, enter the monetary amount of the check request.
4. For **Check Requested For**, select the item that describes what this check is meant to reimburse.
5. For **Note**, enter an optional note.
6. For **Customer Reference**, enter optional, additional information to specify where to direct the check.

The **Customer Info** area shows the details about where the request should be sent. By default, the request is sent to the customer, to the address shown in this area.

7. To send the check request to the broker instead, click **Mail to Broker**. Then for **Attn**, specify the person to include on the Attention line of the address.

### **Next steps**

For the settlement that you just matched, you should approve that settlement; see “Approving a Settlement” on page 49.

## Approving a Settlement

### **When to do this**

If a settlement has been properly matched to an event, and if the required proof of performance (or other documentation) has been provided, you should approve the settlement to indicate that it does not need further work.

### **To approve a settlement**

1. Right-click the settlement and click **Methods > Approve**.

Settlement Management displays a screen like the following:

2. For **Status**, click **Approved** from the dropdown list.
3. Click **OK**.

### **Next steps**

There are no further steps to take for this settlement.

## Sending a Settlement to Another Person

### *When to do this*

If you are not sure how to handle a particular settlement, and want to consult with another person, you can send the settlement to that person, if that person is also a user of Settlement Management.

### *To send a settlement to another person*

1. Right-click the settlement and click **Open**.

Settlement Management opens a new worksheet that is filtered only to this particular settlement. This allows the other person to focus on the settlement of interest.

2. Click **File > Send as Task** or click the Send as Task button.

The **Send Task to User** dialog box appears.

3. Click **To.....** and select the users and/or groups to receive the task.
4. In the **Message** field, type a short text message explaining what you want the recipient to do with this settlement.

This will be the task message that the recipient sees. The worksheet that you are sending will be added automatically as a link from the **Message** text.

5. In the **Description** field, type a short description.

This description will be displayed below the task message in the recipient's **My Tasks** module.

6. To link the task subject line to a Web page, enter the full path to the file in **URL** field.

---

**Note** You must enter the full URL, including server name and directory hierarchy. The **http://** part will be added automatically if omitted.

---

7. Optionally, to attach a file to the task, enter the path to the file in the **File Attachment** field or use the **Browse** button to find it.
8. Optionally, to ensure that this task is completed by a specific time, click **Escalate** and then provide the following information:
 

<b>Due Date</b>	Date and time by which this task must be completed
<b>Alert Time</b>	Date and time at which an alert will be displayed
<b>To</b>	Additional email addresses
9. To send an email notification to the recipient of the task, select the **Send to email list** check box. (Depending on how your system has been configured, this option may not be available.)
10. Click either **Send Worksheet** or **Send Selected Combination** to specify whether to filter the worksheet. If you click **Send Selected Combination**, the worksheet is filtered to the combination that you are currently viewing. Otherwise, the entire worksheet is sent.
11. Click **Send Task**.

## Unlinking a Settlement

### ***When to do this***

If a settlement has been matched to the wrong promotion, for any reason, you should unlink it, so that you can rematch it to the correct promotion.

### ***To unlink a settlement that has already been matched***

1. Click the **Unapproved Trade** tab.
2. Take ownership of the settlement, as in “Assigning an Owner to a Settlement” on page 42. The settlement is now highlighted and the subtabs show information that is relevant to this settlement.
3. Right-click the settlement and click **Methods > Unlink**.

Settlement Management displays a screen like the following:

4. Click **OK**.

### ***Next steps***

The next step is to match this settlement to a different promotional event (“Matching a Settlement to a Promotional Event” on page 43) or to split this settlement (“Partially Matching a Settlement (Splitting a Settlement)” on page 45). In some cases, you might need to deny the settlement (“Denying a Settlement” on page 53).

## Denying a Settlement

### *When to do this*

Sometimes it is necessary to deny a settlement, typically if the promotion was not run as required by contract.

### *To deny a settlement*

1. Click the **Unresolved Trade** tab.
2. Take ownership of the settlement, as in “Assigning an Owner to a Settlement” on page 42. The settlement is now highlighted and the subtabs show information that is relevant to this settlement.

1. Right-click a settlement and then choose **Methods > Deny**.

Settlement Management displays a screen like the following:

The screenshot shows a dialog box titled "Deny: 1156786\_Split42". It has a light beige background and a blue border. The fields are as follows:

Account	Albertsons Corp
Settlement Amount	1,000
GL Code	MDF
Status	Unapproved

At the bottom of the dialog, there is a checkbox labeled "Save parameters" which is checked. To the right of the checkbox are two buttons: "Cancel" and "OK".

2. For **GL Code**, select the entry that best describes the reason to deny this claim. This reason is used in your company’s general ledger system.
3. For **Status**, click **Denied** from the dropdown list.
4. Click **OK**.

### *Next steps*

There are no further steps to take.

# 5 Working with Promotions

*This chapter describes how to view, modify, create, delete promotions, and so on. It includes the following sections:*

<i>About Promotions</i> .....	55
<i>Displaying the Activity Details Subtab</i> .....	57
<i>Viewing Promotion Attributes</i> .....	58
<i>Creating a Promotion</i> .....	60
<i>Modifying a Promotion</i> .....	62
<i>Working with the Gantt Chart</i> .....	63
<i>Sorting Promotions</i> .....	64
<i>Copying and Pasting a Promotion</i> .....	65
<i>Deleting a Promotion</i> .....	65
<i>Maintaining the Promotion Hierarchy</i> .....	66
<i>Opening a Promotion in Another Worksheet</i> .....	67
<i>Using Other Right-Click Menu Options</i> .....	68

## About Promotions

A promotion is an occurrence that starts at a specific date, has a certain duration, and has a certain time-varying effect on sales. It is associated with one or more item-location combinations, which can be either high-level or low-level. Multiple promotions can be associated with a combination during the same time bucket.

As with sales data, promotion data can be imported. Typically, your implementors imported past promotions as a step in configuring your system. Depending on how your system is configured, Promotions Effectiveness may continue to import new promotions or you might create promotions within the Promotions Effectiveness user interface. Promotions Effectiveness can display promotions in worksheets, where you can create, edit, and remove promotions.

## Where to Work with Promotions

You can perform operations on promotions such as creating new promotions, editing existing promotions, and so on. You can perform most of these actions in different areas of a worksheet:

- In the **Activity Details** subtab, which displays the promotions within a collapsible Gantt chart. See “Displaying the Activity Details Subtab” on page 57.
- In the Members Browser, if promotions are currently displayed there.
- In the worksheet table, if promotions are currently displayed there.

In your worksheet, notice where the promotions are displayed, right-click a promotion in any of those areas, and use the options on the right-click menu, as described in this chapter.

## Promotion Hierarchies

Promotions can be organized within a hierarchy. The promotions themselves are at the lowest levels, and higher levels in this hierarchy provide organizational structure. The default Demantra Spectrum demo organizes promotions within a hierarchy of *scenarios* and *plans*. Within a worksheet, the Activity Browser displays the promotion hierarchy, as in the following example:

## Attributes

A promotion has attributes, as configured for your implementation. It is important to specify appropriate values for the attributes, because the Analytical Engine considers them when it creates the forecast.

Depending on how your implementation was configured, these attributes may be available as series (and therefore displayed in the worksheet table); consult your implementors. In any case, you can see the attributes by right-clicking on a promotion and selecting **View**. Demantra Spectrum then displays a window with the attributes.

## Promotion Status

Each promotion has a status, which controls the following:

- Whether the promotion is used in forecasting.
- Whether users can edit the promotion.
- How Settlement Management uses the promotion.

The default promotion statuses are as follows:

Status	Meaning		
	In forecasting	In Promotions Effectiveness	In Settlement Management
Unplanned	The Analytical Engine does not consider this promotion.	Users can edit the promotion.	Settlement Management considers this promotion to be uncommitted.
Planned		The user who committed this promotion can edit it.	Settlement Management considers this promotion to be committed.
Committed			
Running		Nobody can edit the promotion	The promotion is currently running.
Unmatched			The promotion has ended but has not yet been matched to an invoice.
Matched			The promotion has ended and has been matched to an invoice.

## Displaying the Activity Details Subtab

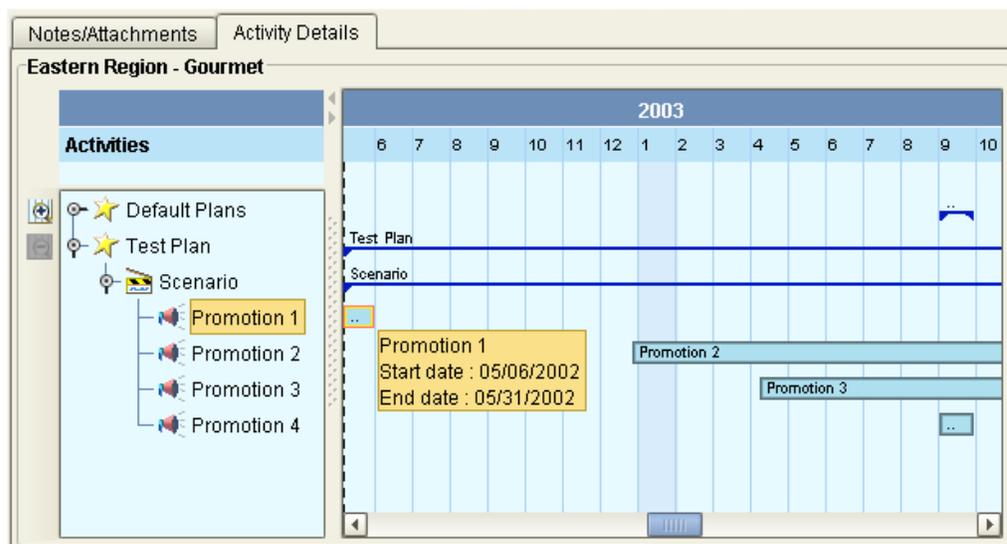

The **Activity Details** subtab displays promotions within a collapsible Gantt chart.

- Notes**
- To display this worksheet element, you must have a license for Promotions Effectiveness.
  - Depending on your options, this subtab may or may be synchronized with the rest of the worksheet.

### To display the Activity Details subtab

- Click **View > Show Activity Details**.

Demantra Spectrum displays the **Activity Details** subtab:

This subtab includes two main areas:

- The Activity Browser displays an expandable tree view of the promotions associated with the currently selected item-location combination. The hierarchy displayed depends on how your system was configured.
- The Gantt chart displays the promotions associated with the currently selected item-location combination. You can scroll backwards and forwards in time to see the start and end dates of each promotion.

### ***To update the Activity Details subtab***

Depending on your current options, the **Activity Details** subtab does not necessarily display data for the currently selected combination. To update the **Activity Details** subtab, right-click in the table and then select **Synchronize Activity**.

### ***To control whether the subtabs are synchronized with the rest of the worksheet***

Do one of the following:

- Click one of the following toggle buttons in the toolbar.

Automatically synchronize the subtabs with the rest of worksheet

Synchronize on demand

- Select **Options > Synchronize On Demand** or **Synchronize Automatically**.

---

**Tip** The worksheet runs faster if synchronization is off. On the other hand, if you are creating or modifying promotions, you might find it less confusing to keep synchronization switched on so that you can immediately see your changes.

---

### ***See also***

“Working with the Gantt Chart” on page 63

## **Viewing Promotion Attributes**

### ***To view promotion attributes***

1. In your worksheet, find an area that is currently displaying promotions; see “Where to Work with Promotions” on page 55.
2. Right-click the promotion and then select **View**.

Demantra Spectrum displays the promotion properties. Depending on your implementation, this screen may look like the following.

The screenshot shows a dialog box titled "View Promotion : Promotion 1 (Input)". It contains the following fields and values:

- Population:** A list box containing "Ship to:BJ Store # 0003, BJ Store # 0004, BJ Store # 0005, BJ Store # 0006", "Product Family:Gourmet, Slim", and "Brand:Snows Ice Cream". A "View" button is located to the right of this list.
- Dates:** Start: 05/06/2002, End: 05/31/2002.
- Name:** Promotion 1
- Promotion Status:** Unplanned
- Promotion Type:** TPR
- Rebate per Case:** 0
- Scenario:** Scenario
- cost:** 0

At the bottom right of the dialog are "Cancel" and "Ok" buttons.

---

**Note** Depending on how your implementation was configured, these attributes may be available as series (and therefore displayed in the worksheet table).

---

**See also**

- “About Promotions” on page 55
- “Creating a Promotion” on page 60
- “Working with the Gantt Chart” on page 63
- “Displaying the Activity Details Subtab” on page 57

## Creating a Promotion

### To create a promotion

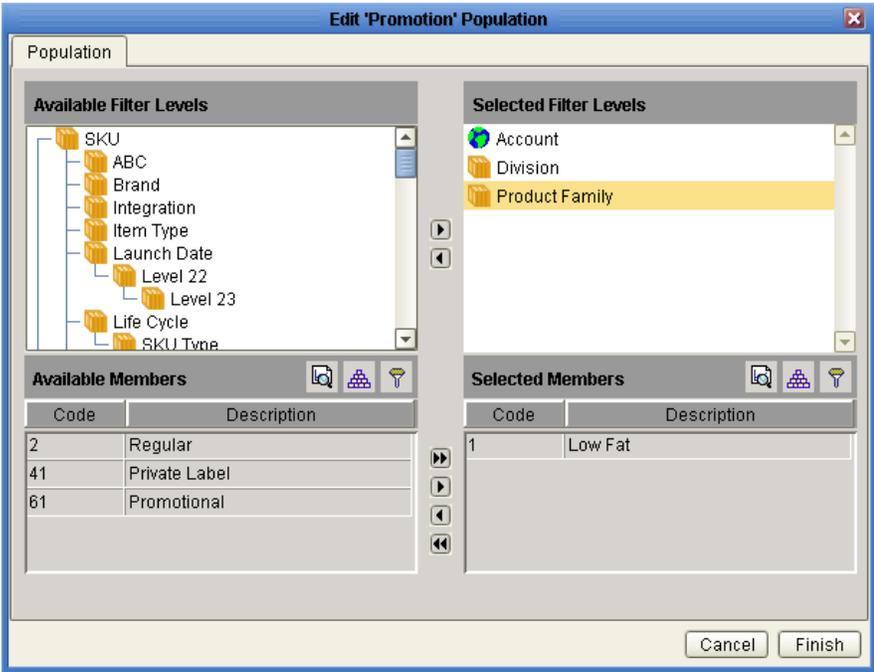

1. In your worksheet, find an area that is currently displaying promotions; see “Where to Work with Promotions” on page 55.
1. Right-click an existing promotion and then select **New Promotion**.

Demantra Spectrum displays a screen where you can create a new promotion. Depending on your implementation, this screen may look like the following.

The screenshot shows a dialog box titled "New Promotion - Input". At the top, under "Population", it displays "Division: Cookies" and "Product Family: Low Fat". Below this is an "Edit" button. The "Dates:" section includes "Start: 03/10/2003" and "End: 03/06/2006". Further down, "End Date" is set to "07/08/2004". The "Name" field is empty. "Promotion Status" is set to "Planned", "Promotion Type" is "TPR", and "Rebate per Case" is "0.0". The "Scenarios" field is empty. "Start Date" is "07/08/2004", "Status" is "Committed", and "cost" is "0.0". At the bottom right, there are "Cancel" and "Create" buttons.

2. For **Name**, specify a unique name.
3. The **Population** area shows the currently selected combinations with which the new promotion will be associated. The defaults are taken from the current selection in the worksheet. To change this selection:
  - a. Click **Edit** below the **Population** area.

The following dialog box is displayed:

- b. Find the aggregation level at which you want to apply the promotion data and move it from the **Available Filter Levels** list into the **Selected Filter Levels** list, using any of the techniques in “Working with Lists” on page 96.
  - c. In the **Available Members** list, find a member that you want to include in the promotion and move it into the **Selected Members** list, using any of the techniques in “Working with Lists” on page 96.
  - d. Continue with all aggregation levels to which the promotion should apply.
  - e. Click **Finish**.
4. For **Dates**, specify the starting and ending date of the promotion.
  5. The rest of the fields prompt you for values of attributes associated with this promotion; the fields shown in red are required. The specific attributes you see depend upon your configuration, but they may include the following:
    - For **Scenario**, choose the upper promotion level to which this promotion belongs. (In this example, promotions belong within scenarios.)
    - For **Promotion Type**, choose a type of promotion that affects demand as closely as possible to the promotion you are creating.
    - For **Promotion Status**, choose either unplanned or planned. See “Promotion Status” on page 56.

**Note** It is important to specify appropriate values for the attributes, because the Analytical Engine considers them when it creates the forecast.

6. Click **Create**. The new promotion is saved.

7. If you do not see your changes, click **Options > Synchronize Activity** and then rerun the worksheet.

**Note**

Other users can see this promotion, if they can see all item-location combinations with which the promotion is associated.

**See also**

- “About Promotions” on page 55
- “Deleting a Promotion” on page 65
- “Maintaining the Promotion Hierarchy” on page 66

## Modifying a Promotion

**To modify a promotion**

1. In your worksheet, find an area that is currently displaying promotions; see “Where to Work with Promotions” on page 55.
2. Right-click a promotion and click **Edit**.
3. Make changes as needed; see “Creating a Promotion” on page 60 for details.
4. Click **Finish**. The changes are saved.
5. If you do not see your changes, right-click in the table and then select **Synchronize Activity**.

**Notes**

You can also modify promotion dates within the Gantt chart. To do so, in the Gantt chart, drag the starting point or end point of the bar to the required date.

If you change the length of time for a promotion, Demantra Spectrum automatically adjusts the data associated with that promotion, according to the configuration of that series. There are different options. For some series, Promotions Effectiveness preserves the net volume, summed over the promotion. If the promotion becomes longer, for example, the data values become smaller. In contrast, for other series, Demantra Spectrum preserves the approximate level of the data. The behavior you see has been configured for your needs and should make sense to you.

**See also**

- “Promotion Status” on page 56

## Working with the Gantt Chart

### To scroll the Gantt chart

- Click the left or right arrow buttons that are displayed next to the Activity Browser.

### To zoom the Gantt chart

- Click either of the magnifying glass buttons that are displayed next to the Activity Browser.

- Right-click in the Gantt chart, click **Zoom**, and then click a zoom option.

For example, if you click **Two Years**, then the Gantt chart is resized so that two years can be viewed within the current display. If you click **Fit Query to View**, the Gantt chart is resized to display the entire span of time specified in the worksheet definition.

### To sort the Gantt chart

See “Sorting Promotions” on page 64.

### To change the promotion dates

In the Gantt chart, drag the starting point or end point of the bar to the required date.

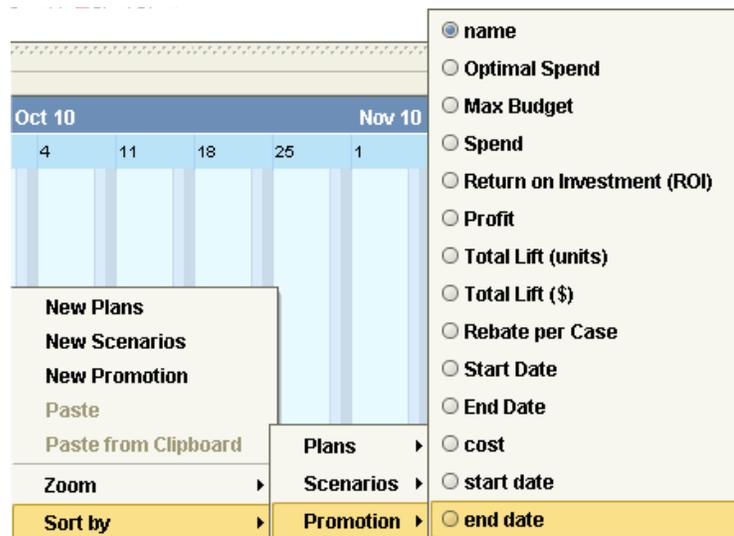

## Sorting Promotions

You can sort the promotions as listed within the **Activity Details** subtab. These two areas are kept in synch with each other, and when you sort promotions in one area, Demantra Spectrum automatically sorts them in the other area as well.

### To sort promotions

1. In the Activity Browser or the Gantt chart, right-click and select **Sort by**.

Demantra Spectrum shows a set of sort options for each promotion level in your implementation. For each level, you can sort the promotions by any attribute of the level. These attributes include the name of the promotion and its parent levels, as well as the promotion start and end dates. The following shows an example.

2. Click the option corresponding to the attribute you want to use for sorting.

Demantra Spectrum sorts the promotions in ascending order by this attribute. It retains the existing promotion hierarchy; that is, it sorts each promotion relative to other promotions that belong to the same parent.

---

## Copying and Pasting a Promotion

You can copy and paste promotions. When you do so, Demantra Spectrum copies the attributes and the series data associated with the promotion.

---

**Note** If the pasted promotion does not span the same length of time as the original, the associated series data is adjusted according to the rules given in “Modifying a Promotion” on page 62.

---

### *To copy and paste a promotion*

1. In your worksheet, find an area that is currently displaying promotions; see “Where to Work with Promotions” on page 55.
2. Right-click a promotion and click **Copy**.
3. Right-click and then select **Paste**.  
Demantra Spectrum displays a dialog box that asks for details about the copy.
4. Specify one of the following:
  - To shift the dates of the newly copied promotion, specify a number in the **Shift By** field. The copy will be shifted later in time by the specified amount, but will last for the same length of time. You can use any integer, including negative number or zero.
  - To specify a different start and end date, specify values in the **From** and **To** fields.
  - To make the new promotion span the entire length of time used in the worksheet, select **Worksheet Derive**.
5. Click **OK**.
6. When prompted for a new promotion name, type the name and click **OK**.

### **See also**

“Modifying a Promotion” on page 62

“Creating a Promotion” on page 60

“Maintaining the Promotion Hierarchy” on page 66

## Deleting a Promotion

### *To delete a promotion*

1. In your worksheet, find an area that is currently displaying promotions; see “Where to Work with Promotions” on page 55. Note that you cannot delete promotions from within the worksheet table.
2. Right-click a promotion and click **Delete**.
3. Demantra Spectrum prompts you to confirm the action. Click **Yes** or **No**.

**See also**

- “Maintaining the Promotion Hierarchy” on page 66
- “Creating a Promotion” on page 60

## Maintaining the Promotion Hierarchy

Promotions typically belong in a hierarchy for management purposes. The specific hierarchy that is available to you depends upon your implementation.

### *To create a member in the promotion hierarchy*

1. In your worksheet, find an area that is currently displaying promotions; see “Where to Work with Promotions” on page 55.
2. Right-click. Demantra Spectrum displays a menu that looks something like this:

The specific choices depend upon your implementation, but in general, you have options for creating members at each level in your promotion hierarchy.

In this example (from the standard Demantra Spectrum demo), the highest level corresponds to plans, the middle level corresponds to scenarios, and the bottom level corresponds to the actual promotions.

3. From this menu, click the option that corresponds to the level at which you want to create a new member. For example, to create a new scenario, click **New Scenarios**.

Demantra Spectrum displays a dialog box where you specify properties of the new member.

4. For **Name**, specify a unique name.
5. Click **Finish**.
6. Click **Data > Update** to save your changes.
7. Click **Data > Rerun** to display the changes.

### *To copy and paste a member in the promotion hierarchy*

1. In the Activity Browser, right-click a member and click **Copy**.
2. Right-click and then select **Paste**.

Demantra Spectrum displays a dialog box that asks for details about the copy.

3. Specify one of the following:
  - To shift the dates of the newly copied member, specify a number in the **Shift By** field. The copy will be shifted later in time by the specified amount, but will last for the same length of time. You can use any integer, including negative number or zero.
  - To specify a different start and end date, specify values in the **From** and **To** fields.
  - To make the new member span the entire length of time used in the worksheet, select **Worksheet Derive**.
4. Click **OK**.

Demantra Spectrum makes a copy of the member and all nodes below it.

#### ***To delete a member in the promotion hierarchy***

1. Right-click the member and select **Delete**.
2. Demantra Spectrum prompts you to confirm the action. Click **Yes** or **No**.

#### ***See also***

“Creating a Promotion” on page 60

“Deleting a Promotion” on page 65

“About Promotions” on page 55

## **Opening a Promotion in Another Worksheet**

Depending on how your system has been configured, you may be able to open a worksheet that is filtered to show only data relevant to the promotion from which you started.

#### ***To open a promotion in another worksheet***

1. In your worksheet, find an area that is currently displaying promotions; see “Where to Work with Promotions” on page 55.
2. Then do one of the following:
  - Right-click the promotion and then select **Open**. In this case, you are using the default worksheet associated with promotions.
  - Right-click the promotion and then select **Open With** and then select a worksheet.

The worksheet appears in a new window or tab, depending on how you are currently viewing the worksheets.

## Using Other Right-Click Menu Options

Depending on your implementation, the right-click menu may include a **Methods** submenu that includes additional options created by your implementors. When you click one of these options, Demantra Spectrum displays a dialog box like the following:

The screenshot shows a dialog box titled "Example Method : Rainbow Spc Biscuits (Input)". It contains the following fields and controls:

Life Cycle	Catalog
Integration	Y
<b>Name</b>	Rainbow Spc Biscuits
Unit Cost	2
<b>Launch Date</b>	29-Aug-00

At the bottom of the dialog, there is a checked checkbox labeled "Save parameters", and two buttons labeled "Cancel" and "OK".

Click the **Save parameters** check box if you want to save the attribute changes to the database when the method is run.

For information on any such menu items, please contact your implementors or your designated Demantra Spectrum system administrator.

# 6 Working Offline

*(Added in 7.0) This chapter describes how to take a worksheet offline, edit the data, and bring the worksheet back online. This chapter includes the following sections:*

<i>About Working Offline .....</i>	<i>69</i>
<i>Setting Up Your Offline Environment .....</i>	<i>71</i>
<i>Saving Data for Offline Use .....</i>	<i>73</i>
<i>Accessing an Offline Worksheet.....</i>	<i>75</i>
<i>Reloading Offline Data.....</i>	<i>76</i>

## About Working Offline

**(Added in 7.0)** Normally, when you use a worksheet, Demantra Spectrum connects directly to the database and retrieves or saves data in response to your actions. Other users also retrieve and save data, and the database always contains the latest changes made by any user. In order to do this, the worksheets use an active connection to the Demantra Spectrum server.

However, it is useful to be able to work offline, that is, without a connection to the Demantra Spectrum server. When you are online, you save a worksheet (or part of it) for offline use. Then while you have no connection to the Demantra Spectrum data, you can use that worksheet and edit data in it. Later you bring the worksheet back online. When you do so, Demantra Spectrum saves the data back to the Demantra Spectrum database, just the same way it saves data from any other worksheet.

In offline mode, you have access to most worksheet features. The following table summarizes what is available.

<b>General Area</b>	<b>Availability in Offline Mode</b>
Worksheet access	Available options: <ul style="list-style-type: none"><li>• Opening and closing any worksheet that you have saved offline on this computer.</li><li>• Exporting</li><li>• Printing</li></ul> Options that are not available: <ul style="list-style-type: none"><li>• Opening worksheets that you have not saved offline on this computer.</li></ul>
Editing	Available options: almost all the same as when working online (copy, paste, edit cell, and so on) No option to reset manual changes (to reset manual changes, take the worksheet offline again and discard previous changes)

<b>General Area</b>	<b>Availability in Offline Mode</b>
Right-click menus	Not available
Screen management	Available options: same as when working online (hide/show worksheet elements, use of tabs or windows, and so on)
Worksheet design	Available options: <ul style="list-style-type: none"><li>• Viewing current worksheet design (<b>Data &gt; Info</b>)</li></ul> Options that are not available: <ul style="list-style-type: none"><li>• Changing worksheet design or layout</li><li>• Creating new worksheets</li><li>• Saving worksheet with new name</li></ul>
Audit trail	Available only for data within this worksheet
Analytics	Not available (cannot tune forecast nodes, run simulations, or see forecast details)
Caching	Not applicable.

“Setting Up Your Offline Environment” on page 71

## Setting Up Your Offline Environment

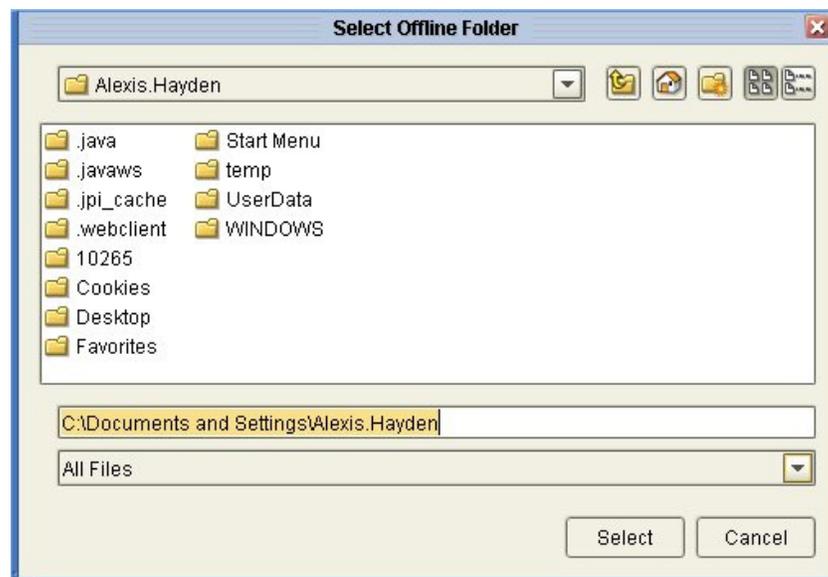

(Added in 7.0) The first time you save a worksheet offline, Demantra Spectrum sets up your offline environment, so that you can work while you do not have access to the Demantra Spectrum server. This is a one-time setup, per user, per machine.

**Note** When you perform these steps, you must have network access to the Demantra Spectrum server, which must be running.

### To set up your offline environment

1. Within a normal Demantra Spectrum worksheet, click **File > Export for Offline Use**.

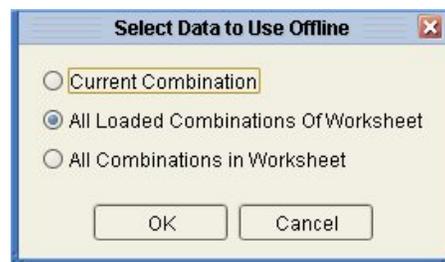

Demantra Spectrum displays the following screen:

Here you specify the directory where Demantra Spectrum will store your offline information. By default, this is **c:/Documents and Settings/username**, but you can choose a different location. The offline directory itself is always named **Demantra**.

2. Specify the offline directory location and click **OK**.

Demantra Spectrum then displays the following screen:

Here you specify which data to take offline. You might want to work with only a single combination, for example.

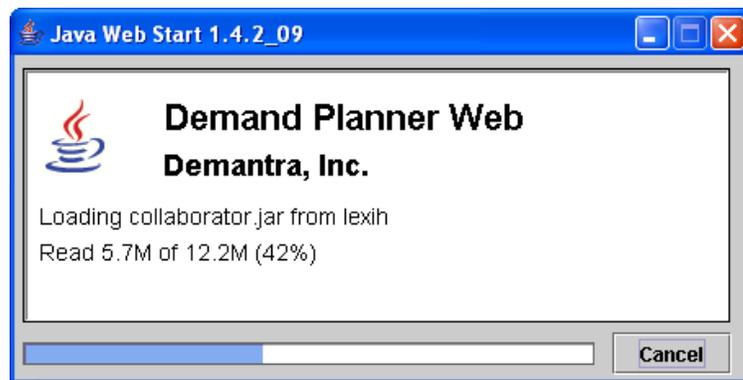

3. Choose one of the options and click **OK**.
4. Log off Demantra Spectrum.
5. Enter the web address supplied by your system administrator for offline access. This URL probably has the following format:

**`http://server name/virtual directory/portal/launchDPWeb.jnlp`**

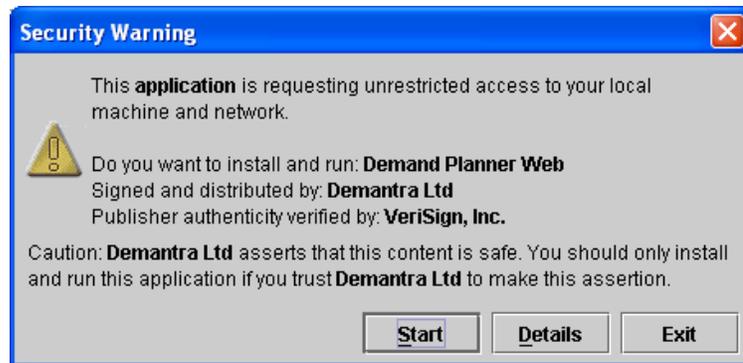

For example:

**`http://frodo/demantra/portal/launchDPWeb.jnlp`**

Depending on what is already installed on this computer, Demantra Spectrum then briefly displays a screen titled **Java Web Start**, which shows its progress in scanning and downloading the required JAR file.

After that, Demantra Spectrum displays a dialog box that asks if you want to trust the signed application distributed by Demantra:

---

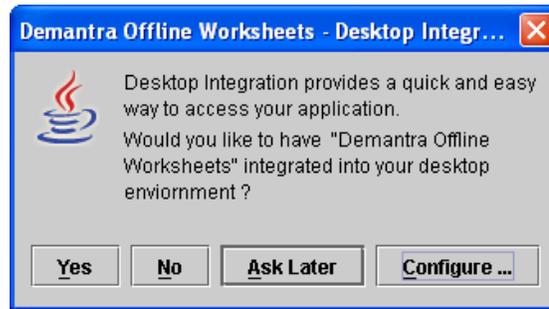

**Note** If Demantra Spectrum does not display this screen, that means that you have already downloaded the applet to this machine. You do not need to download it again.

Depending your system configuration, the screen might be slightly different, with the following options instead: **Yes**, **Always**, and **No**.

---

6. Click **Start** or **Yes** (or **Always**), depending on which dialog box is displayed.

Next, Demantra Spectrum displays the following prompt:

7. Click **Yes**.

Demantra Spectrum creates a shortcut labeled **Demantra Offline Worksheets**, which you use to access your offline worksheets in the future. This shortcut is on your desktop and on your **Start** menu.

---

**Note** For details on this shortcut, see the “Troubleshooting User Problems” appendix in the *Demantra Spectrum Administrator’s Guide*.

---

You are now configured to use worksheets offline.

#### **See also**

“Saving Data for Offline Use” on page 73

“Accessing an Offline Worksheet” on page 75

## Saving Data for Offline Use

**(Added in 7.0)** You can save data from a worksheet (or part of it) in an offline format. Then you can work with the data offline and later upload it to Demantra Spectrum.

---

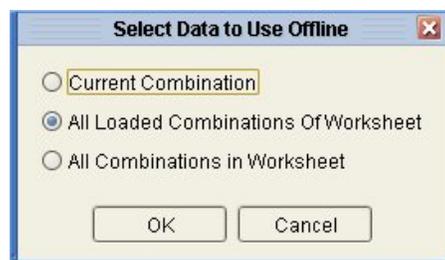

**Note** If you have not already taken a worksheet offline on this machine, see “Setting Up Your Offline Environment” on page 71.

---

#### **To take worksheet data offline**

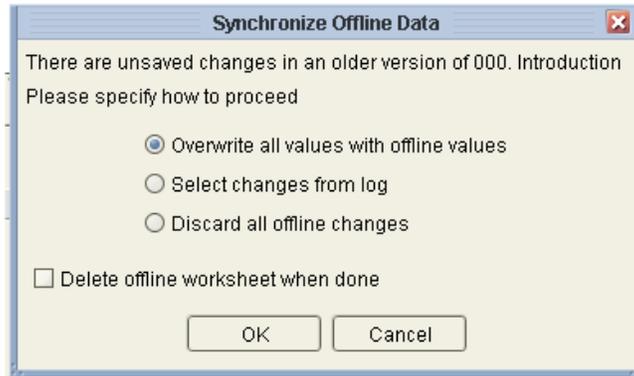

1. Within a normal Demantra Spectrum worksheet, click **File > Export for Offline Use**.

Demantra Spectrum then displays the following screen:

Here you specify which data to take offline. You might want to work with only a single combination, for example.

2. Choose one of the options and click **OK**.
3. If you already took this worksheet offline on this machine, Demantra Spectrum displays the following screen, which asks how to handle the data changes you already made while offline:

4. Click one of the following options:

<b>Overwrite all values with offline values</b>	Treat the data in the offline worksheet as the latest data and save it all to the database.
<b>Select changes from log</b>	View the audit trail for the data in this worksheet and select the changes to keep.
<b>Discard all offline changes</b>	Discard all changes made in the offline worksheet.

5. If you clicked **Select changes from log**, Demantra Spectrum displays a screen that shows all the changes to this data.
6. Click **OK**.

**See also**

“Reloading Offline Data” on page 76

## Accessing an Offline Worksheet

**(Added in 7.0)** You can save data from a worksheet (or part of it) in an offline format. Then you can work with the data offline and later upload it to Demantra Spectrum.

**Note** If you have not already taken a worksheet offline on this machine, see “Setting Up Your Offline Environment” on page 71.

### To access an offline worksheet

1. Click the **Demantra Offline Worksheets** shortcut, which is on your desktop, and on your **Start** menu.

**Note** For details on this shortcut, see the “Troubleshooting User Problems” appendix in the *Demantra Spectrum Administrator’s Guide*.

Demantra Spectrum then displays a login dialog box:

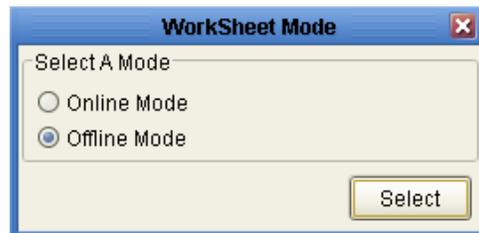

2. Enter your user name and password and click **OK**.
3. Click **File > Open**.
4. Click the worksheet that you took offline earlier. Note that it is shown with the offline icon.

**Note** If you are currently have network access to the Demantra Spectrum server, this list shows all worksheets. If you are offline, it lists only the offline worksheets.

If you currently have network access to the Demantra Spectrum server, Demantra Spectrum can open the worksheet in either of two modes, as follows:

**Online Mode** Click this option if you want access to the latest data in the database, irrespective of your offline changes.

**Offline Mode** Click this option if you want access to the data you saved offline earlier, with any changes you made to it.

**See also**

“About Working Offline” on page 69

“Reloading Offline Data” on page 76

## Reloading Offline Data

**(Added in 7.0)** If you worked with data offline, you can reload it into Demantra Spectrum. When you bring a worksheet back online, Demantra Spectrum saves the data back to the database, just the same way it saves data from any other worksheet.

---

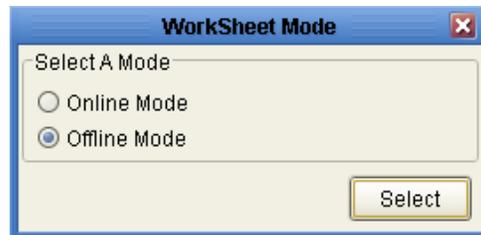

**Note** When you reload offline data, Demantra Spectrum uses information that it has recorded in an audit trail. When it does so, it *moves* that audit trail information into the database. This means that the local record of changes is no longer available. In practice, this means that you should delete an offline worksheet as soon as you reload all the desired data, and then take the worksheet offline again if needed.

---

### **To reload offline data**

1. In order to reload offline data, you must have network access to the Demantra Spectrum server.
2. Open the offline worksheet as follows:
  - a. First either click the **Demantra Offline Worksheets** shortcut or log into Demantra Spectrum as usual.
  - b. Click **File > Open**.
  - c. Click the worksheet and click **Open**.

If you currently have network access to the Demantra Spectrum server, Demantra Spectrum gives you a choice as follows:

- d. Click **Offline Mode** and click **Select**. (You can “push” your changes from offline, but you cannot “pull” them from online.)
3. Click **Data > Synch Offline Data**.

Demantra Spectrum displays the following screen:

4. Click one of the following options:

**Overwrite all values with offline values** Treat the data in the offline worksheet as the latest data and save it all to the database.

**Select changes from log** View the audit trail for the data in this worksheet and select the changes to keep.

**Discard all offline changes** Discard all changes made in the offline worksheet.

5. Click **Delete offline worksheet when done**. You can take the worksheet offline again later if needed.
6. Click **OK**.
7. If you clicked **Select changes from log**, Demantra Spectrum then displays the a screen like the following:

Accept Change	Audit Date	Series Name	Series Value	Original Value	From Date	To Date
<input type="checkbox"/>	08/30/2005 11:06:51	Revenue \$	2.37440064E8	1.82646208E8	12/08/2003 00:00:00	03/07/0104 00:00:00
<input type="checkbox"/>	08/30/2005 11:06:51	Price \$	13.0	10.0	12/08/2003 00:00:00	03/07/0104 00:00:00
<input type="checkbox"/>	08/30/2005 11:06:51	Revenue \$	1.37632272E8	9.8308768E7	03/08/2004 00:00:00	06/06/0104 00:00:00
<input type="checkbox"/>	08/30/2005 11:06:51	Price \$	14.0	10.0	03/08/2004 00:00:00	06/06/0104 00:00:00
<input type="checkbox"/>	08/30/2005 11:06:51	Revenue \$	1.87447664E8	1.87447664E8	06/09/2003 00:00:00	09/07/0103 00:00:00
<input type="checkbox"/>	08/30/2005 11:06:51	Revenue \$	7.83004E7	7.83004E7	03/10/2003 00:00:00	06/08/0103 00:00:00
<input type="checkbox"/>	08/30/2005 11:06:51	Price \$	12.0	10.0	09/08/2003 00:00:00	12/07/0103 00:00:00
<input type="checkbox"/>	08/30/2005 11:06:51	Revenue \$	2.7684768E8	2.307064E8	09/08/2003 00:00:00	12/07/0103 00:00:00

- a. Click the **Accept Change** check box for each change you want to keep.
- b. Click the **Accept Changes** button on the right.

The selected changes are saved immediately.

**Note** You can use similar steps to delete other changes, if you want.

c. Click **Close**.

“Saving Data for Offline Use” on page 73

# 7 Managing Items and Locations

*You can use options on the right-click menu to manage items and locations.*

<i>About Managing Items and Locations.....</i>	<i>79</i>
<i>Viewing the Attributes of an Item or Location.....</i>	<i>80</i>
<i>Creating an Item or Location .....</i>	<i>81</i>
<i>Modifying an Item or Location.....</i>	<i>81</i>
<i>Deleting an Item or Location.....</i>	<i>82</i>
<i>Opening an Item or Location in Another Worksheet.....</i>	<i>82</i>
<i>Using Other Right-Click Menu Options .....</i>	<i>83</i>

*See Also:*

*“Introduction to Levels” on page 86*

## About Managing Items and Locations

Depending on your authorization, you have access to options on the right-click menu that enable you to do the following:

- To view the attributes of an item, location, or other objects (known generically as *members*)
- To create, edit, and delete items, locations, or other objects
- To perform additional operations on members, as defined within your implementation

Permissions are set separately for each level and potentially for each user.

## Where to Work with Items and Locations

The right-click menu is available in different areas of a worksheet:

- In the Members Browser
- In the worksheet table, if promotions are currently displayed there

## Interaction with Corporate Systems

If you change or add items or locations, you should be aware of how Demantra Spectrum interacts with your corporate systems. Demantra Spectrum periodically imports data about sales, items, and locations from your other systems. Each time data is imported into your system, the changes you have made to the levels are overwritten, depending on the kind of change.

- You should edit or delete existing members only if you are expecting the same change to occur in the imported data, and you need to see the change right away within Demantra Spectrum for some reason.
- If you add members, they will be kept when data is imported.

## Viewing the Attributes of an Item or Location

### *To view the attributes of an item or location*

1. In your worksheet, find an area that is currently displaying the type of object you want to work with; see “Where to Work with Items and Locations” on page 79.
2. Right-click an object and click **View** (for example, View Ship to).

Demantra Spectrum displays a dialog box like the following:

Attribute	Value	Required
Account	Stop and Shop	Yes
Customer Group	Grocery	Yes
Customer Type	Customer	Yes
Location Type ID	Sales Area	Yes
Macro Area	1	Yes
Name	Stop and Shop Store 0012	Yes
Network Level	0	No
Region	East Coast Region	Yes
Sales Area SWH Nwlev	3	Yes
Size lo	Sq Ft	Yes
Source Plant Default	NA	No
Source WH Default	SSDC1	No
Store Manager	NA	Yes

The attributes shown in red are required. These include the **Name** attribute and all immediate parents of this member. Depending on your implementation, not all attributes are editable.

---

## Creating an Item or Location

In the current release, you can create a member, but you cannot display it in your worksheet.

### ***To create an item or location***

1. In your worksheet, find an area that is currently displaying the type of object you want to work with; see “Where to Work with Items and Locations” on page 79.
1. Right-click an object and then select **New** (for example, New SKU).  
Demetra Spectrum displays a window where you specify the name of the new member, as well as its parent levels and other attributes.
2. For **Name**, specify a unique name.
3. The rest of the fields prompt you for values of attributes associated with this level; the fields shown in red are required. The specific attributes you see depend upon your configuration.
4. Click **Create**.
5. Click **Data > Update** to save your changes.

---

**Note** You cannot see the new member in the Members Browser, because the Members Browser displays only item-location combinations that exist and that have sales.

---

## Modifying an Item or Location

You can modify a member by changing its name, the parent members to which it belongs, and any visible attributes.

### ***To modify an item or location***

1. In your worksheet, find an area that is currently displaying the type of object you want to work with; see “Where to Work with Items and Locations” on page 79.
2. Right-click an object and then select **Edit** (for example, Edit SKU). Then make changes as needed; see “Creating an Item or Location” on page 81 for details.
3. Click **Finish**.
4. Click **Data > Update** to save your changes.
5. Click **Data > Rerun** to display the changes.

### **See also**

“About Managing Items and Locations” on page 79

## Deleting an Item or Location

### *To delete an item or location*

1. In your worksheet, find an area that is currently displaying the type of object you want to work with; see “Where to Work with Items and Locations” on page 79. Note that you cannot delete objects from within the worksheet table.
2. Right-click an object and click **Delete** (for example, Delete SKU).
3. Demantra Spectrum prompts you to confirm the action. Click **Yes** or **No**.

### **See also**

“About Managing Items and Locations” on page 79

## Opening an Item or Location in Another Worksheet

Depending on how your system has been configured, you may be able to open a worksheet that is filtered to show only data relevant to the member from which you started.

The specific options are usually different for each aggregation level in your system.

### *To open an item or location in another worksheet*

1. In your worksheet, find an area that is currently displaying the type of object you want to work with; see “Where to Work with Items and Locations” on page 79.
2. Then do one of the following:
  - Right-click the item or location and then select **Open**. In this case, you are using the default worksheet associated with this item or location.
  - Right-click the member and then select **Open With** and then select a worksheet.

The worksheet appears in a new window or tab, depending on how you are currently viewing the worksheets.

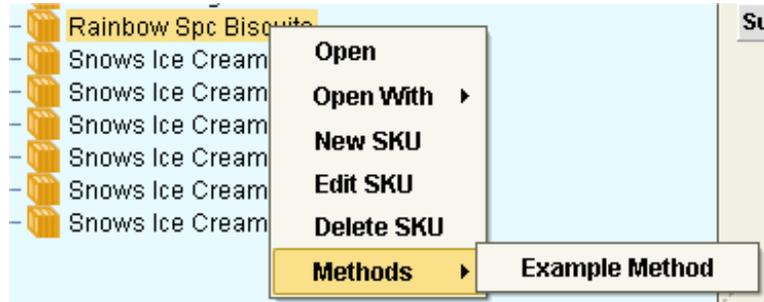

---

**Note** Depending on how this worksheet is defined, it is filtered in one of two ways:

- Filtered by member, that is, filtered to show the item or location from which it was launched, aggregating across all combinations
  - Filtered by combination, that is filtered to show the specific combination from which it was launched
-

## Using Other Right-Click Menu Options

Depending on your implementation, the right-click menu may include a **Methods** submenu that includes additional options created by your implementors:

When you click one of these options, Demantra Spectrum displays a dialog box like the following:

 A screenshot of a dialog box titled 'Example Method : Rainbow Spc Biscuits (Input)'. The dialog box contains several input fields:
 

- 'Life Cycle' with a dropdown menu showing 'Catalog'.
- 'Integration' with a dropdown menu showing 'Y'.
- 'Name' with a text input field containing 'Rainbow Spc Biscuits'.
- 'Unit Cost' with a text input field containing '2'.
- 'Launch Date' with a date picker showing '29-Aug-00'.

 At the bottom of the dialog box, there is a checked checkbox labeled 'Save parameters', and two buttons labeled 'Cancel' and 'OK'.

Click the **Save parameters** check box if you want to save the attribute changes to the database when the method is run.

For information on any such menu items, please contact your implementors or your designated Demantra Spectrum system administrator.

# 8 Creating and Redefining Worksheets

*This chapter describes how to create and redefine worksheets. The first sections introduce the concepts, and the later sections provide instructions. This chapter includes the following sections:*

<i>Introduction to Worksheets and Views</i> .....	86
<i>Introduction to Levels</i> .....	86
<i>Introduction to Series</i> .....	89
<i>Visual Elements of Worksheet Views</i> .....	91
<i>Levels and Layout Variations</i> .....	94
<i>Introduction to the Worksheet Editor</i> .....	96
<i>Creating or Editing a Worksheet</i> .....	97
<i>Configuring the Worksheet Basics</i> .....	98
<i>Selecting Series on a Worksheet</i> .....	101
<i>Specifying the Time Resolution and Time Span</i> .....	103
<i>Specifying Aggregation Levels</i> .....	105
<i>Using the Advanced Selection Options</i> .....	106
<i>Changing the Overall Scale or Unit of Measure</i> .....	108
<i>Filtering the Worksheet</i> .....	109
<i>Applying Exception Filters</i> .....	111
<i>Defining the View Layout</i> .....	113

## Introduction to Worksheets and Views

Within Demantra Spectrum, you work almost entirely within *worksheets*. A worksheet is a customized working environment designed especially for your use. Here you can view and edit data. When you save changes back to the database, they become available to other users and to downstream operations.

A worksheet consists of one or more views, usually displayed as tabs within the worksheet. Each view retrieves a set of data that is aggregated in a specific way and that may also be filtered. The following shows an example:

Views in this worksheet

Members Browser

- BJ
- CVS
  - Rainbow LF Butter Cookies
  - Rainbow LF Chocolate Chip
  - Rainbow LF Cinnamon
  - Rainbow LF Shortbread
  - Rainbow LF Strawberry Wafer
  - Rainbow Reg Butter Cookies
  - Rainbow Reg Cinnamon
- McKessen
- Rainbow Company
- Rainhe

CVS - Rainbow LF Chocolate Chip

Time	Demand	Price \$	Revenue \$	Market Plan \$
02/04/2002	5,200,260	\$10.00	\$52,002,600	\$18,706,544
05/06/2002	7,141,040	\$10.00	\$71,410,400	\$18,706,544
08/05/2002	7,048,755	\$10.00	\$70,346,568	\$18,706,544
11/04/2002	5,480,635	\$10.00	\$54,696,736	\$18,706,544
02/03/2003	1,446,445	\$10.00	\$14,435,520	\$33,639,292
05/05/2003		\$10.00	\$64,375,400	\$54,665,184
08/04/2003		\$10.00	\$59,963,980	\$54,713,460
11/03/2003		\$10.00	\$44,675,264	\$43,533,688
02/02/2004		\$10.00	\$45,677,608	\$43,481,220

Use this tree to select data at some aggregation level

The view aggregates series data to the specified level

Here, views are shown as tabs within the worksheet. You can also display views as child windows of the worksheet.

## Introduction to Levels

The first interesting feature of any worksheet view is the aggregation level or levels that it uses. For example, you might want to view data at the account level, as follows:

Accounts Accounts and SKUs

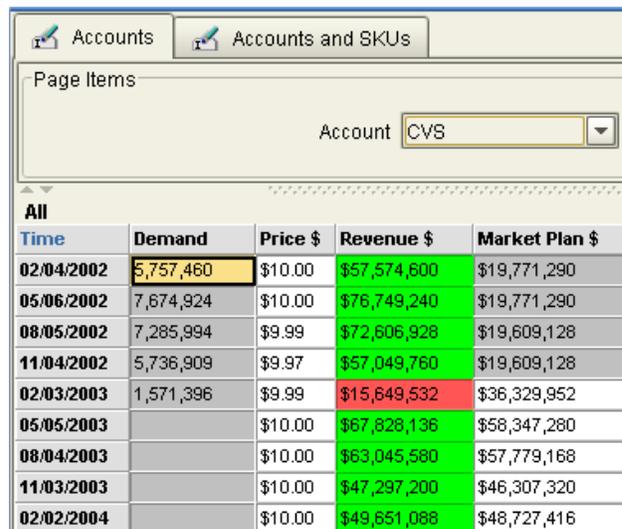

Members Browser

- BJ
- CVS
- McKessen
- Rainbow Company
- Ralphs
- Stop and Shop
- WalMart

CVS

Time	Demand	Price \$	Revenue \$	Market Plan \$
02/04/2002	5,757,460	\$10.00	\$57,574,600	\$19,771,290
05/06/2002	7,674,924	\$10.00	\$76,749,240	\$19,771,290
08/05/2002	7,285,994	\$9.99	\$72,606,928	\$19,609,128
11/04/2002	5,736,909	\$9.97	\$57,049,760	\$19,609,128
02/03/2003	1,571,396	\$9.99	\$15,649,532	\$36,329,952
05/05/2003		\$10.00	\$67,828,136	\$58,347,280
08/04/2003		\$10.00	\$63,045,580	\$57,779,168
11/03/2003		\$10.00	\$47,297,200	\$46,307,320
02/02/2004		\$10.00	\$49,651,088	\$48,727,416

The worksheet might include a dropdown list instead of this tree control. For example:

Time	Demand	Price \$	Revenue \$	Market Plan \$
02/04/2002	5,757,460	\$10.00	\$57,574,600	\$19,771,290
05/06/2002	7,674,924	\$10.00	\$76,749,240	\$19,771,290
08/05/2002	7,285,994	\$9.99	\$72,606,928	\$19,609,128
11/04/2002	5,736,909	\$9.97	\$57,049,760	\$19,609,128
02/03/2003	1,571,396	\$9.99	\$15,649,532	\$36,329,952
05/05/2003		\$10.00	\$67,828,136	\$58,347,280
08/04/2003		\$10.00	\$63,045,580	\$57,779,168
11/03/2003		\$10.00	\$47,297,200	\$46,307,320
02/02/2004		\$10.00	\$49,651,088	\$48,727,416

In either case, you can view data for any account. For example, for the quarter that started on February 3, 2003, the Demand for the CVS account was 1, 571, 396 units, and the unit price was \$9.99. You can edit any data that is shown in white, such as the price and market plan.

In generic terminology, the word *member* refers to a unit within a level. For example, CVS is a *member* of the account level.

## Level Types

Levels can group and aggregate data in many different ways, and Demantra Spectrum uses icons to indicate the type of level:

-  *Item levels* group and aggregate data according to characteristics of the items you sell.
-  *Location levels* group and aggregate data according to characteristics of the locations where you sell. For example, location levels could describe geography or types of stores.
-  *Combination (or matrix) levels* group and aggregate data according to characteristics of the item-location combinations. These are less common than item and location levels.
-  *Time levels* group and aggregate data by sales date. Normally you use a time level in place of the time axis.
-  *Promotion levels* group and aggregate data by sales promotions. Depending on how your system is implemented, you may have a hierarchy of promotional levels (to organize the promotions), and the higher levels might use different icons.

Unlike other kinds of levels, promotion levels can be displayed within a Gantt chart, if you have a license for Promotions Effectiveness.

*Settlement levels*, which are used only by Settlement Management. If you use a settlement level in a worksheet, you cannot use levels from any other hierarchy in that worksheet.

*Check request levels*, which are used only by Settlement Management.

In Demantra Spectrum, the levels are completely configurable and are easily extended. The levels that you see should make sense to you. Your Demantra Spectrum implementors defined levels as required for your organization, and an authorized user can add more.

## Level Attributes

A level can have attributes. For example, a Ship To member might have the following attributes:

Attribute	Value
Account	Stop and Shop
Customer Group	Grocery
Customer Type	Customer
Location Type ID	Sales Area
Macro Area	1
Name	Stop and Shop Store 0012
Network Level	0
Region	East Coast Region
Sales Area SWH Nwlev	3
Size lo	Sq Ft
Source Plant Default	NA
Source WH Default	SSDC1
Store Manager	NA

Apart from the **Name** attribute, the attributes shown in red are all parents of this member. They are shown in red because they are required.

The other attributes (such as Unit Cost) do not represent levels in the system but contain information used for reporting and other purposes.

# Introduction to Series

Each worksheet shows series data associated with the combination that you have currently selected in the worksheet. These series were created by your implementors, for your organization’s needs. A worksheet displays the series data in a table, or in a graph, or both. The following shows an example of a worksheet table:

Private Label LF Butter - BJ Store # 0006							
Time	Demand	Final Plan	Pseudo	Simulation	Sales Forecast	Sales Fcst Bias	Stat Frcst (Y/N)
04/08/2002	1,258,700				1,240,202	-18,498	Do Forecast
07/08/2002	1,232,800				1,161,719	-71,081	Do Forecast
10/07/2002	1,326,200				1,057,580	-268,620	Do Forecast
01/06/2003	488,500				903,675	415,175	Do Forecast
04/07/2003		1,193,227			1,193,227		Do Forecast
07/07/2003		1,123,295			1,123,295		Do Forecast
10/06/2003		1,040,942			1,040,942		Do Forecast
01/05/2004		820,737			820,737		Do Forecast
04/05/2004		280,121			280,121		Do Forecast
Summary	4,306,200	4,458,322			8,821,497	14,244	

The example here shows series at the lowest level, but you can view data for any given series at any aggregation level.

As you can see from this example, there are many possible variations of series:

- Some series are editable (see **Stat Frcst**), some are editable only for specific dates (see **Pseudo**), and some are not editable at all. Generally, editable series are used as input to other series.
- Some series are shown in different colors, depending on the data values. For example, **Sales Fcst Bias** is displayed in red for any values less than zero.
- Some series are calculated from other series.
- Some are generated by the Analytical Engine, if that is relevant in your Demantra Spectrum solution.
- Most series have time-varying values for each combination, but there are other kinds of series as well (discussed below). For example, the series **Stat Frcst** specifies whether a combination should be used in forecasting or not. As you can see, this series has the same value for all time buckets for a given combination.
- Most series have numeric values, but some have string or date values. For some series, you choose a value from a dropdown list.

## Kinds of Series

Demantra Spectrum supports the following kinds of series:

- *Sales series* contain time-dependent set of data for item-location combinations. That is, each data point in the series corresponds to a given item-location combination at a given point in time. This type of series is the most common type by far.
- *Combination series* (also called matrix series) store time-independent data for each item-location combination. That is, each data point in the series corresponds to a given item-location combination. You use combination series to store and maintain information about item-location combinations, mainly flags for the Analytical Engine to use.
- *Promotion series* store time-dependent data associated with each promotion, at each item-location combination.
- *Level series* store data associated with a specific level. Each data point in the series corresponds to a given member of that level.

## Series and Summary Rows

Each series has been configured to be summarized in a specific way, which you can see in the summary row of the worksheet table. The table has at least one summary row; depending on the layout, it may also include subtotal rows. The following shows an example:

Product Family	Account	Time	Price \$	Revenue \$	Discount	Approved
Gourmet	Stop and Shop	03/10/2003	\$10.00	\$6,963,948	9.00%	<input type="checkbox"/>
		09/08/2003	\$10.00	\$3,190,742	0.00%	<input type="checkbox"/>
		03/08/2004	\$10.00	\$3,141,407	0.00%	<input type="checkbox"/>
		Summary	\$10.00	\$13,296,097	3.00%	3
	Summary		\$10.00	\$13,296,097	3.00%	1
Regular	Stop and Shop	09/08/2003	\$10.00	\$52,827,440	0.00%	<input type="checkbox"/>
		03/10/2003	\$9.14	\$47,052,748	9.00%	<input type="checkbox"/>
		03/08/2004	\$10.00	\$13,265,270	0.00%	<input type="checkbox"/>
		Summary	\$9.71	\$113,145,464	3.00%	3
	McKessen	03/10/2003	\$10.00	\$769,117	0.00%	<input checked="" type="checkbox"/>
		09/08/2003	\$10.00	\$1,168,671	0.00%	<input type="checkbox"/>
		03/08/2004	\$10.00	\$308,523	0.00%	<input type="checkbox"/>
		Summary	\$10.00	\$2,246,312	0.00%	3
	Summary		\$9.86	\$115,391,776	1.50%	2
Slim	Stop and Shop	03/10/2003	\$10.00	\$22,640,676	9.00%	<input type="checkbox"/>
		09/08/2003	\$10.00	\$21,201,430	0.00%	<input type="checkbox"/>
		03/08/2004	\$10.00	\$7,785,908	0.00%	<input type="checkbox"/>
		Summary	\$10.00	\$51,628,012	3.00%	3
	Summary		\$10.00	\$51,628,012	3.00%	1
Summary			\$9.93	\$180,315,888	2.25%	4

As you can see, Demantra Spectrum provides different summarizing options. In this example:

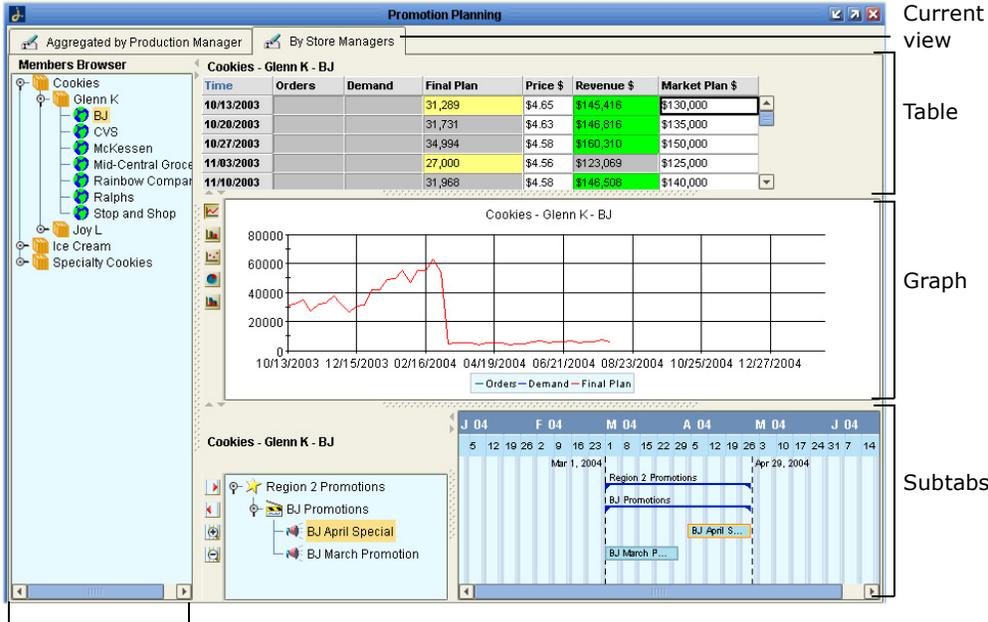

- Price and Discount are summarized by averaging.

- Revenue is summarized by adding all the values.
- The Approved series is summarized by counting the number of approvals.

More complex options are also available. A given series can be summarized in different ways within a single worksheet table. Consult your implementors for details on how your series are summarized.

# Visual Elements of Worksheet Views

In general, a worksheet view can contain the following common visual elements:

Members Browser or dropdown lists

## Axes of the View

Each worksheet view has an x-axis and a y-axis.

- In the graph, the x-axis is shown horizontally and the y-axis is shown vertically.
- In the table, the x-axis is displayed vertically and the y-axis is displayed horizontally. (This way, the x-axis displays the same data in the table and in the graph.)

## Members Browser or Combination-Selection Lists

As noted earlier, a worksheet view usually includes either a Members Browser or a set of dropdown menus, which you use to choose the data to display in the rest of the worksheet:

In each case, the selected combination is “Low fat products at the BJ account.”

In addition to providing a way to select the data to display, the Members Browser enables you to create, edit, and delete the level members. See “Managing Items and Locations” on page 79. Depending on your implementation, you may also be able to perform additional operations on the members; see “Using Other Right-Click Menu Options” on page 83.

In some cases, the worksheet does not include either of these controls. This means one of following is true:

- The worksheet table is in crosstab format, which displays data for multiple items or multiple locations. See “Levels and Layout Variations” on page 94.
- The data in the worksheet is completely aggregated. It may be filtered, however, so it is not necessarily aggregated across all items and locations.

## Worksheet Table

A worksheet table shows series data for the item-location combination that you have currently selected in the view. Depending on how the layout is configured, this may appear as an ordinary table or it may appear as a crosstab; see “Levels and Layout Variations” on page 94.

By default, each row in the table corresponds to a point in time, and each column displays the data for a series. As noted earlier, the table also has a summary row. If the worksheet is in crosstab layout, the table also includes subtotal rows.

The table can show the same series as the graph or a completely different set of series, but usually some of the same series are displayed in both places. To specify where each series is displayed, see “Defining the View Layout” on page 113.

You can edit data in the white cells. The gray cells are computed and not editable. For details on editing data, see “Editing Data” on page 13.

For a given combination and date, the table may display symbols that indicate that a promotion or a note is associated with that combination and date. These indicator symbols are generally displayed for only some of the series, depending on how Demantra Spectrum has been configured. See “Viewing Notes” on page 22.

## Graph

A worksheet graph displays data for the current selection. By default, the horizontal axis shows time, and the vertical axis shows one or more series.

---

**Note** In order to include the graph, you must have a license for either Demand Planner Web or Promotions Effectiveness.

---

## Subtabs

A worksheet view can contain multiple subtabs.

- The **Notes/Attachments** subtab displays notes and attachments related to the selected combination. See “Viewing Notes” on page 22.
- The **Activity Details** subtab displays promotions and the promotion hierarchy. On the left, the Activity Browser displays an expandable tree view of the promotions associated with the currently selected combination. On the right, the Gantt chart displays the promotions associated with the currently selected combination. You can scroll backwards and forwards in time to see the start and end dates of each promotion, and you can zoom in and out in time.

This subtab is available only if you have a license to Promotions Effectiveness.

Here you can create, edit, and delete promotions and higher levels in the promotion hierarchy. See “Working with Promotions” on page 55.

- A worksheet can include a subtab that contains a related worksheet. When you select a combination in the worksheet table, the related worksheet shows data associated with that combination. This related worksheet potentially includes different series than the rest of the worksheet and may also be filtered further.

### **See also**

“Defining the View Layout” on page 113

## Levels and Layout Variations

A worksheet can include multiple different levels or no levels at all (for a completely aggregated view).

When a level is included in a worksheet, that means you can see data associated with each member of that level.

### Multiple Levels in a Worksheet View

A worksheet view can include multiple levels, for example:

Time	Demand	Price \$	Revenue \$	Market Plan \$
02/04/2002	5,200,260	\$10.00	\$52,002,600	\$18,706,544
05/06/2002	7,141,040	\$10.00	\$71,410,400	\$18,706,544
08/05/2002	7,048,755	\$10.00	\$70,346,568	\$18,706,544
11/04/2002	5,480,635	\$10.00	\$54,696,736	\$18,706,544
02/03/2003	1,446,445	\$10.00	\$14,435,520	\$33,639,292
05/05/2003		\$10.00	\$64,375,400	\$54,665,184
08/04/2003		\$10.00	\$59,963,980	\$54,713,460
11/03/2003		\$10.00	\$44,675,264	\$43,533,688
02/02/2004		\$10.00	\$45,677,608	\$43,481,220

The appearance is slightly different if the worksheet includes dropdown lists instead of the Members Browser. For example:

Time	Demand	Price \$	Revenue \$	Market Plan \$
02/04/2002	5,200,260	\$10.00	\$52,002,600	\$18,706,544
05/06/2002	7,141,040	\$10.00	\$71,410,400	\$18,706,544
08/05/2002	7,048,755	\$10.00	\$70,346,568	\$18,706,544
11/04/2002	5,480,635	\$10.00	\$54,696,736	\$18,706,544
02/03/2003	1,446,445	\$10.00	\$14,435,520	\$33,639,292
05/05/2003		\$10.00	\$64,375,400	\$54,665,184
08/04/2003		\$10.00	\$59,963,980	\$54,713,460
11/03/2003		\$10.00	\$44,675,264	\$43,533,688
02/02/2004		\$10.00	\$45,677,608	\$43,481,220

When a view includes multiple levels, you have a more detailed view of the data. In the earlier example, data was aggregated across all SKUs for a given account. Here, in contrast, you see data aggregated separately for each SKU.

## Level Members Displayed in Crosstab Format

It is also possible to lay out a worksheet so that the members of a level are all displayed at the same time. This format is called a *crosstab* layout, and the table (also known as a *pivot table*) provides a cross tabulation of all the members.

The following figure shows a worksheet table in crosstab layout, with a row for each SKU member within each time bucket:

Time	SKU	Demand	Price \$	Revenue \$	Market Plan \$
02/04/2002	Rainbow LF Butter Cookies	155,250	\$10.00	\$1,552,500	\$231,660
	Rainbow LF Chocolate Chip	5,200,260	\$10.00	\$52,002,600	\$18,706,544
	Rainbow LF Shortbread	67,000	\$10.00	\$670,000	\$243,243
	Rainbow LF Strawberry Wafer	265,000	\$10.00	\$2,650,000	\$162,162
	Rainbow Reg Butter Cookies	69,950	\$10.00	\$699,500	\$427,680
	Summary	5,757,460	\$7.14	\$57,574,600	\$19,771,290
05/06/2002	Rainbow LF Butter Cookies	133,934	\$10.00	\$1,339,340	\$231,660
	Rainbow LF Chocolate Chip	7,141,040	\$10.00	\$71,410,400	\$18,706,544
	Rainbow LF Shortbread	46,717	\$10.00	\$467,170	\$243,243
	Rainbow LF Strawberry Wafer	330,000	\$10.00	\$3,300,000	\$162,162
	Rainbow Reg Butter Cookies	23,233	\$10.00	\$232,330	\$427,680
	Summary	7,674,924	\$7.14	\$76,749,240	\$19,771,290

Notice that the Members Browser does not include the SKU level, because all SKUs are displayed at the same time.

For another example, the worksheet could instead display the SKU members across the top of the table rather than down the side, as in the following example:

Time	Rainbow LF Butter Cookies				Rainbow LF Chocolate Chip			
	Demand	Price \$	Revenue \$	Market Plan \$	Demand	Price \$	Revenue \$	Market Plan \$
02/04/2002	155,250	\$10.00	\$1,552,500	\$231,660	5,200,260	\$10.00	\$52,002,600	\$18,706,544
05/06/2002	133,934	\$10.00	\$1,339,340	\$231,660	7,141,040	\$10.00	\$71,410,400	\$18,706,544
08/05/2002	169,484	\$10.00	\$1,679,586	\$231,660	7,048,755	\$10.00	\$70,346,568	\$18,706,544
11/04/2002	156,500	\$10.00	\$1,549,350	\$231,660	5,480,635	\$10.00	\$54,696,736	\$18,706,544
02/03/2003	75,400	\$10.00	\$746,460	\$1,310,872	1,446,445	\$10.00	\$14,435,520	\$33,633,600
05/05/2003		\$10.00	\$1,718,029	\$1,900,434		\$10.00	\$64,375,400	\$54,696,736
08/04/2003		\$10.00	\$1,470,648	\$1,689,744		\$10.00	\$59,963,980	\$54,696,736
11/03/2003		\$10.00	\$1,173,626	\$1,515,606		\$10.00	\$44,675,264	\$43,483,200
02/02/2004		\$10.00	\$2,030,132	\$2,281,640		\$10.00	\$45,677,608	\$43,483,200
Summary	690,568	\$9.00	\$13,259,671	\$9,624,935	26,317,136	\$9.00	\$477,584,064	\$304,833,600

Other variations are possible. See “Defining the View Layout” on page 113.

## Introduction to the Worksheet Editor

### To create a new worksheet

- Click **File > New**. Or click the New button.

### To edit an existing worksheet

1. Click **File > Open**. Or click the Open button.
2. Click a worksheet and click **Open**.

The worksheet editor has a set of buttons on the left, which you use to open different pages with different purposes:

Button	Purpose	For details, see...
Display	Specify basic information about the worksheet; specify how to display the content of this worksheet in Collaborator Workbench.	“Configuring the Worksheet Basics” on page 98
Series	Select series to include.	“Selecting Series on a Worksheet” on page 101
Time	Specify time resolution of worksheet and span of time to consider.	“Specifying the Time Resolution and Time Span” on page 103
Aggregation Levels	Optionally specify aggregation levels to include.	“Specifying Aggregation Levels” on page 105
Filters	Optionally filter the data in the worksheet.	“Filtering the Worksheet” on page 109
Exceptions	Optionally apply exception filters to further filter the worksheet.	“Applying Exception Filters” on page 111
Layout Designer	Define the layout of the worksheet and its views, including the layout of the worksheet tables, the location of each included series, and the graph format.	“Defining the View Layout” on page 113

Here you have the following options:

- To move to another page, either click a button on the left side of the page or click **Previous** or **Next**.
- To exit the worksheet editor and keep your changes, click **OK**.
- To exit the worksheet editor and discard all changes, click **Cancel**.

## Working with Lists

As you create or edit worksheets, you will often use pages that present two lists of elements, where you specify your selections. To do so, you move elements from the left list to the right list. The left list always presents the available elements (such as the available series) and the right list always shows your selections.

You can move elements from one list to the other in many equivalent ways, summarized here:

- To move all elements from one list to the other, click one of the double arrow buttons, as appropriate.
- To move a single element from one list to the other, click the element and then click one of the single arrow buttons, as appropriate. Or double-click the element.
- To move several adjacent elements, click the first element, press **Shift** and click the last element. Then click one of the single arrow buttons, as appropriate.
- To move several elements that are not adjacent, press **Ctrl** and click each element you want. Then click one of the single arrow buttons, as appropriate.

## Creating or Editing a Worksheet

### *To create a new worksheet*

- Click **File > New**. Or click the New button.

### *To edit an existing worksheet*

1. Click **File > Open**. Or click the Open button.
2. Click a worksheet and click **Open**.
3. Click the **Worksheet** menu and select one of the menu items. Or click one of the worksheet buttons on the toolbar.
4. Save your changes to the worksheet definition:

- To save the new definition, click the Save button. Or click **File > Save**

---

**Note** In contrast, the **Data > Update** option saves the data and notes in the worksheet, not the worksheet definition.

---

- To save the worksheet with a new name, click the **Save As** button.
5. Rerun the worksheet to see your changes (unless you have changed only the layout, which is refreshed automatically). To do so, click **Data > Rerun**. Or click the Run button.

## Configuring the Worksheet Basics

### To configure basic information for a worksheet

1. Click **Worksheet > Display**. Or click the Display button.

The system displays a page where you specify the following basic worksheet information:

The screenshot shows a configuration form with the following elements:

- Name:** A text input field containing "000. Introduction".
- Description:** A large empty text area.
- Access:** Radio buttons for "Private" (unselected) and "Public" (selected).
- Enable extra filters:** An unchecked checkbox.
- Cache Worksheet Data:** An unchecked checkbox.
- Refresh Type:** A dropdown menu set to "Manual".
- Open With Context:** A dropdown menu set to "Selected Member".
- Content Definition:** A section containing:
  - Content:** An unchecked checkbox.
  - Display Format:** A dropdown menu set to "Line Graph".
  - Top/Bottom Filter:** A dropdown menu set to "Top" and a text input field containing "10".
  - Location:** A dropdown menu set to "Wide Pane".

<b>Name</b>	The title to use in the <b>My Worksheets</b> module and in the worksheet window title.
<b>Description</b>	Provides optional information to display in <b>My Worksheets</b> . This is especially useful in public worksheets for explaining the purpose of the worksheet to other users.
<b>Access</b>	Select <b>Private</b> or <b>Public</b> . Private is for your use only. Public worksheets are available to all users in the group.

**Enable Extra Filters** This option adds an extra, user-controlled filter to the worksheet. If you select the **Enable Extra Filters** check box, that means that when you open the worksheet, you can prefilter the data before seeing the worksheet results; this is especially useful for users who use Demantra Anywhere.

Normally when you specify aggregation levels to include in the worksheet (as described in “Specifying Aggregation Levels” on page 105), all members of those levels are available in the worksheet.

If you select the **Enable Extra Filters** check box, that means that when you run the worksheet, Demantra Spectrum first prompts you to select the members to display for each level. For an example, see “Viewing Data” on page 11.

This option has no effect on content panes.

**Cache Worksheet Data** Specifies whether Demantra Spectrum should cache the data for this worksheet, for each user who works with it. If you cache a worksheet, it will run more quickly in general, but the cache will need to be refreshed periodically. Choose one of the following refresh options:

- **Manual**—users will have to manually refresh the cache. See “To refresh your local worksheet cache” on page 27.
- **Automatic**—Demantra Spectrum will automatically refresh the cache, as specified by your implementors.

In either case, Demantra Spectrum automatically detects when a cache is out of date and behaves appropriately. Demantra Spectrum also automatically refreshes the cache when you make certain structural changes to the worksheet.

**Open With Context** Specifies how this worksheet should be filtered when a user opens it via the **Open** or **Open With** menu options (on the right-click menu; see “Opening an Item or Location in Another Worksheet” on page 82).

Choose one of the following options:

- **Selected Member** (this will filter the worksheet to the object from which it was launched, aggregating across all combinations associated with that object)
- **Selected Combination** (this will filter the worksheet to the combination from which it was launched)

2. To display the content of this worksheet in Collaborator Workbench, check **Content** and then complete the following fields:

**Display Format** Specifies the display format to use. Not all display formats may be possible, depending on the number of levels and series you include.

Currently, Collaborator Workbench chooses the color to use for each series, when displaying series in the graph-type content panes.

**Location** Select **Wide Pane** or **Narrow Pane** to determine where the content pane will be displayed in Collaborator Workbench.

**Top/Bottom Filter** (Only for bar chart content panes.) Specifies how to filter the members or combinations for display in the bar chart (to save space, not all members are shown).

- Use the dropdown menu to specify whether the filter should apply to the top-ranked or to bottom-ranked members.
- In the input field, specify the number of members to be included.
- For **Criteria Series**, select the series that Demantra Spectrum should use to rank the members. (This does not control the order in which they are displayed in the chart.)

**Note:** If multiple items have identical values, all of them are displayed, and they collectively count as 1 towards the total. For example, suppose top values were 200, 150, 150, 100, and 50. If you specified Top/Bottom filter as three, you would see a total of four items: both the 150 items, in addition to the 200 and 100 items.

This option does not affect the worksheet.

3. To specify how the worksheet table should appear, see “Defining the View Layout” on page 113.

## Selecting Series on a Worksheet

Every worksheet must include at least one series.

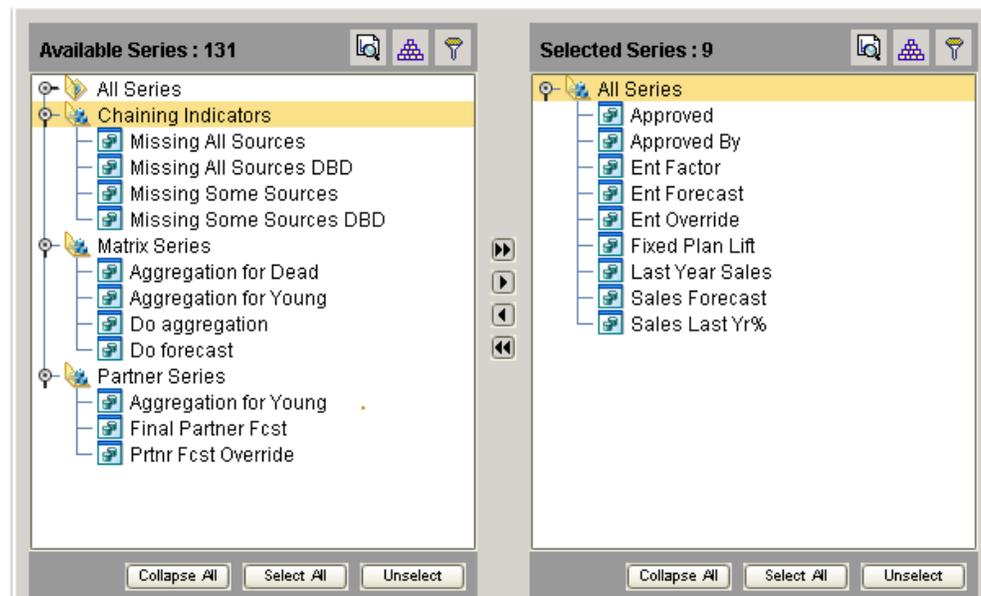

**Note** If you use a settlement level in a worksheet, all series in the worksheet must refer to tables used by the settlement hierarchy.

### To specify the series on a worksheet

1. Click **Worksheet > Series**. Or click the Series button.

The system displays the **Available Series** and **Selected Series** lists. Each list is a collapsible list of series groups and the series in them.

2. Move all series that you want into the **Selected Series** list. To do so, either double-click each series or drag and drop it. You can also move an entire series group from one list to the other in the same way.
3. Remove any series from the **Selected Series** list that you do not want to include on the worksheet.

**Note** You cannot remove a series from a worksheet if that worksheet uses it as the Criteria Series for bar chart content. See Step 2 on page 100.

4. To change the order in which the series are displayed, see “Defining the View Layout” on page 113.

### See also

“Introduction to Series” on page 89

## Managing the Series Lists

You may have a very large number of series, and it can be useful to sort and filter these lists so that you can readily find what you need. The system also provides a search mechanism.

---

**Note** This section applies only to the series page of the worksheet editor (**Worksheet > Series**). To sort the series as displayed in the worksheet, see Step 4 on page 113.

---

### *To sort a list of series*

1. Click the Sort button.

The **Sort** dialog box is displayed.

2. Drag the list name from the **Available Columns** to the **Sort Columns**. Or double-click the list name in the **Available Columns** list.
3. Click **OK**.

### *To filter a list of series*

1. Click the Filter button.

The Filter page appears.

2. Click **Add**.
3. Click the arrow to the right of the operator box and select an operator from the dropdown list.
4. In the number box, enter the value by which to filter the list.
5. (Optional) You can filter further by using the **AND** relationship.
6. Click **OK**.

### *To find a series*

1. Click the Find button.

The **Find** dialog box appears.

2. In the **Find where** box, select the name of the list to search.
3. In the **Find what** box, type name of the series.
4. Select **Up**, **Down** or **All** to determine the direction of the search.
5. (Optional) Select one or more of the check boxes:
  - **Whole Word:** Search for the exact match of a word.
  - **Match Case:** Search for the exact match of a word (case sensitive).
6. Click **Find Next** to begin (or continue) searching.

## Specifying the Time Resolution and Time Span

Each worksheet selects data for a specified span of time and optionally aggregates it in time. You use the **Time** dialog box to specify the time resolution of the worksheet results and to decide the span of time to which the worksheet applies.

### To specify time criteria

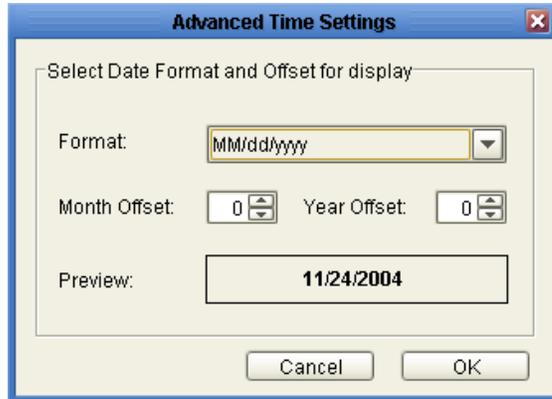

1. Click **Worksheet > Time**. Or click the Time button.
2. In the **Time Scale** box, specify the time resolution of the worksheet results. The data in the worksheet is aggregated to this time resolution. That is, this option specifies the period of time that each data point in the line graph represents.
3. In the **Time Filter** box, specify the time period to which the worksheet applies:
  - **Fixed** if you always want the worksheet to show a specific time range, regardless of the current date.
  - **Relative to Today** if you always want the worksheet to show a time range relative to today.
  - **Relative to Last Sales Date** if you always want the worksheet to show a time range relative to the last sales date in the loaded data.
4. In the **From Date** and **To Date** boxes, enter values depending on the time filter you have chosen, as follows:

Time Filter	Box	Action
Relative	<b>From Date/ To Date</b>	Specify periods in both <b>From</b> and <b>To</b> with the current (computer) date as the reference point.  For example: If the Time Scale is <i>Month</i> , and you want to see results starting from six months before today, enter -6 in <b>From Date</b> .

<b>Time Filter</b>	<b>Box</b>	<b>Action</b>
<b>Fixed</b>	<b>From Date</b>	Enter a specific date as a starting point of the worksheet results. To enter a date, click the calendar button and select a date.
	<b>To Date</b>	Specify the number of periods you want to include, starting from the From date.

5. To control how dates are displayed in the worksheet, click the **Advanced** button, which brings up the following dialog box:

- a. In the **Format** dropdown list, select a display format.
- b. To offset the displayed dates, optionally specify values for **Month Offset** or **Year Offset**.

For example, to add one month to each displayed date, specify **1** for **Month Offset**.

The **Preview** field shows what the first time bucket in the worksheet would look like with this format and offset.

- c. Click **OK**.

**Note**

If you change the time scale, the worksheet might not show exactly the same aggregate numbers, because the cutoff points for the worksheet would not necessarily be the same. For example, suppose your worksheet is weekly and displays 48 weeks of data. Then supposed you change the worksheet to display quarterly data. A quarter is 13 weeks, and the original span (48 weeks) is not an integer multiple of 13. So the worksheet selects a different amount of data and shows different overall results.

## Specifying Aggregation Levels

A worksheet usually includes aggregation levels. When you use the worksheet, you can examine data for the item-location combinations associated with those levels.

Based on the levels included in a worksheet, Demantra Spectrum automatically determines which item-location combinations the worksheet should include. Depending on which combination you select, the worksheet displays series data associated with that combination. For example, if you select one location level (city) and one item level (SKU), the worksheet will contain series data associated with each city-SKU combination. On the other hand, if you select one location level (city) and you do not specify an item level, the worksheet aggregates data for all items. That is, the worksheet will contain series data associated with each city, aggregated for all products.

- 
- Notes**
- If you do not specify any aggregation levels in a worksheet, the data is completely aggregated across all items and locations.
  - If you use a settlement level in a worksheet, you cannot use levels from any other hierarchy in that worksheet.
- 

### To specify the aggregation levels in a worksheet

1. Click **Worksheet > Aggregation Levels**. Or click the Levels button.  
The system displays the **Available Levels** and **Selected Levels** lists.
2. Move all aggregation levels that you want into the **Selected Levels** list, using any of the techniques in “Working with Lists” on page 96.
3. Remove any unwanted levels from the **Selected Levels** list.

The selected levels will now be used on all views of this worksheet, unless you configure the views otherwise; see “To specify which levels to use in a worksheet view” on page 114.

The *layout* of the worksheet view controls the order in which the levels are used; see “Defining the View Layout” on page 113.

### See also

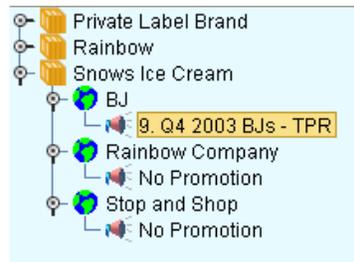

- “Using the Advanced Selection Options” on page 106
- “Introduction to Levels” on page 86
- “Changing the Overall Scale or Unit of Measure” on page 108

## Using the Advanced Selection Options

By default, if a worksheet includes a promotion level, the worksheet includes all the following types of combinations:

- Combinations that have both sales data and promotions
- Combinations that have sales data, but no promotions
- Combinations that have promotions, but no sales data

The worksheet displays placeholders for combinations that do not have promotions. For example:

If you move the promotion level to the worksheet axis (see “Defining the View Layout” on page 113), the table will display a similar placeholder.

You can exclude some of these combinations. For example, you might want the worksheet to include only the combinations that have both sales and promotions, as follows:

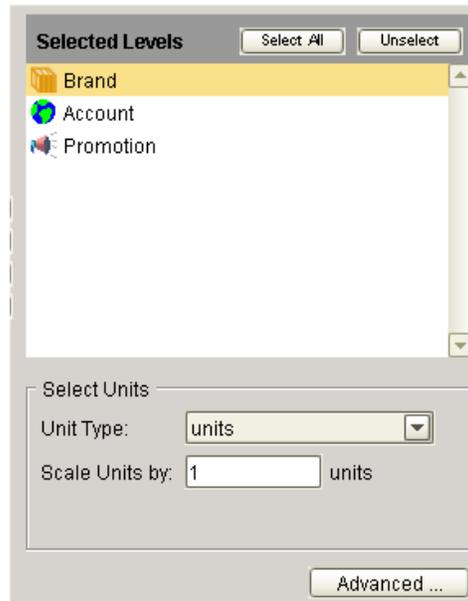

### **To exclude combinations with partial data**

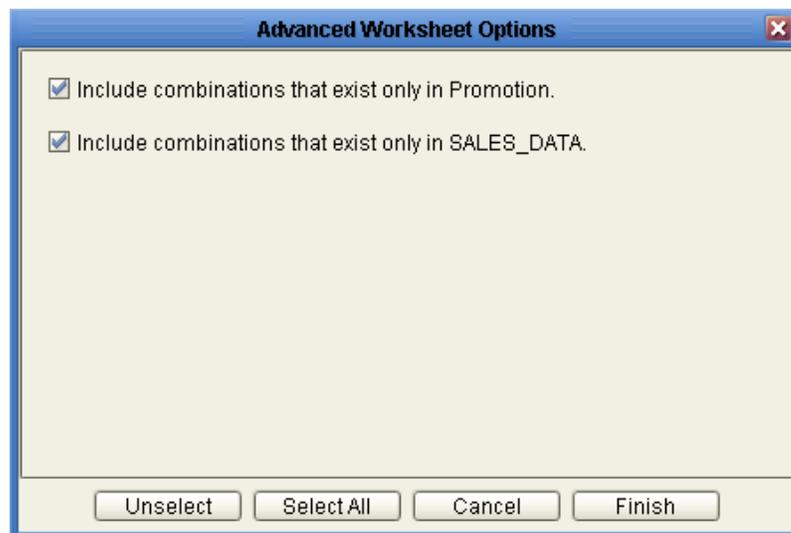

1. Click **Worksheet > Aggregation Levels**. Or click the Levels button.
2. Make sure that the worksheet includes at least two levels, one of which should be a promotional level.

When you do so, the screen displays an **Advanced** button in the lower right.

3. Click **Advanced**. Demantra displays a dialog box with additional options.

**Include combinations that exist only in Promotion**

This option selects combinations that have associated promotions, even if they do not have sales data.

**Include combinations that exist only in SALES\_DATA**

This option selects combinations that have sales data, even if they do not have any associated promotions.

4. To exclude the combinations you do not want to see, click the check boxes as needed.

**See also**

“Specifying Aggregation Levels” on page 105

## Changing the Overall Scale or Unit of Measure

In addition to levels, series, and filtering, a worksheet has the following characteristics:

- A single unit of measure. Typically, most series refer to this unit of measure, but there are exceptions such as percentage values. You can switch the unit of measure, and the displayed values are changed accordingly. The units in your system depend upon your implementation but probably include unit count and dollars.

For monetary units, you can also switch to a different index (such as the Consumer Price Index or CPI) or exchange rate, and the worksheet automatically multiplies all values accordingly.

- An overall scale, which defaults to 1. If the displayed values are all large, it can be useful to rescale the worksheet, for example, to display in amounts of 1000 or 1000000.

You can change either or both of these. When you make this change, the displayed values for most or all of the series in the worksheet are changed.

---

**Note** This change affects only the series that are scaled. Not all series are scaled. For example, a series defined as a percentage is probably not scaled.

---

### To change the overall scaling factor

1. Click **Worksheet > Aggregation Levels**. Or click the Levels button.

The Levels page includes a section where you specify the overall scale of the worksheet, as well as its units of measure.

The screenshot shows a dialog box titled "Select Units". It contains two main fields: "Unit Type:" with a dropdown menu currently showing "Revenue\_ \$" and "Scale Units by:" with a text input field containing "1000000" and a dropdown menu showing "Revenue\_ \$".

2. In the **Scale Units by** box, specify the factor by which all numbers in the worksheet are to be divided (for display purposes).

For example, if you specify a factor of 1000, the displayed data will be divided by 1000. So the number 96,000 will be displayed as 96. The vertical axis of the graph is updated to show the factor in parentheses. For example, if the vertical axis was formerly labeled “units”, it will be updated to say “units (1000)” instead.

**To change the unit of measure**

1. Click **Worksheet > Aggregation Levels**. Or click the Levels button on the toolbar.
2. In the **Unit Type** box, select the unit of measure to display in the worksheet results.

For example, our items are bottles, and suppose that a case that contains six bottles. If you display the worksheet with cases instead, the system will display the number of bottles divided by six.

3. If the **Index** box is displayed, choose an index from the dropdown list.

The **Index** menu lists all the time-dependent indexes and exchange rates that are associated with this unit. Each index or exchange rate is a time-varying factor that the worksheet can use. When you select an index, the worksheet will automatically multiply all monetary series by the factor for each date. For example, if you choose Consumer Price Index (CPI) as the index, the system will calculate all monetary quantities with relation to the CPI.

---

**Note** These indexes and exchange rates are generally imported from other systems. The set available to you depends upon your implementation.

---

**See also**

“Specifying Aggregation Levels” on page 105

## Filtering the Worksheet

Filters control the combinations that you are able to see. Filtering can have multiple sources:

- A given worksheet may be filtered. For example, worksheet X might show only Brand X, which means that the worksheet would show only combinations related to Brand X.
- Your user ID may be filtered. For example, if you are an account manager, your user ID might give you access only to your accounts. At any level, you would not be able to see combinations associated with other accounts.
- The data that you share with other users (called the *component*) might also be filtered. Components divide the data for different sets of users.

Demantra Spectrum automatically combines all the filters. In the preceding example, if the component is not filtered, if you use worksheet X, you can see only data for Brand X at your accounts.

In contrast to an exception filter (“Applying Exception Filters” on page 111), this type of filter is static and behaves the same no matter how the data changes.

### To apply a filter to a worksheet

1. Click **Worksheet > Filters**. Or click the Filters button.

The system displays the **Available Filter Levels** and **Selected Filter Levels** lists.

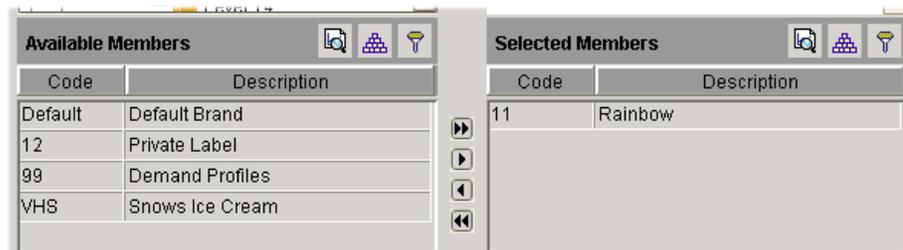

2. Find the aggregation level at which you want to filter data and move it from the **Available Filter Levels** list into the **Selected Filter Levels** list, using any of the techniques in “Working with Lists” on page 96.

**Note** This level does not have to be the same as any of the aggregation levels you display in the worksheet. In fact, typically you filter using a different level than you use to display.

3. In the **Available Members** list, find a member that you want to include in the worksheet and move it into the **Selected Members** list, using any of the techniques in “Working with Lists” on page 96.

At this stage, the worksheet includes *only* data for this member. (Before you applied a filter at this level, the worksheet could theoretically include any member of this level.)

4. Continue to move members from the **Available Members** list into the **Selected Members** list, until the latter list includes all the members you want.

### To filter data further

Once you have applied a filter as described above, the worksheet contains only those combinations that are associated with the members you specified. You can further filter the data in exactly the same way. Also see “Applying Exception Filters” on page 111.

## Managing the List of Members

Depending on how your system has been configured, it might contain a very large number of members. If so, you might want to sort or filter the list or search it. For information, see “Managing the Series Lists” on page 102.

## Applying Exception Filters

If you attach an exception filter to a worksheet, Demantra Spectrum checks the values of the worksheet data and displays only the combinations that meet the exception criteria. In contrast to an explicit filter (“Filtering the Worksheet” on page 109), this type of filter is dynamic and can behave differently as the data changes.

Specifically, you define an exception condition that consists of a series, a comparison operator, and a value, for example:

The screenshot shows a dialog box titled "Exceptions Filter". It contains a single row with a dropdown menu set to "Sales Plan", a comparison operator dropdown set to ">=", and a text input field containing "150000.0".

When you open the worksheet, Demantra Spectrum checks each combination in the worksheet. For each combination, if the condition is met for *any* time in the worksheet date range, Demantra Spectrum displays that combination. For example, the worksheet shows combinations that have Sales Plan values greater than or equal to 150000, within the time range included in the worksheet.

---

**Note** Exception filters do not cause filtering in time. If a combination meets the exception criteria, Demantra Spectrum displays data for that combination for all time buckets within the time range of the worksheet.

---

If the condition is not met at any time for any of the worksheet combinations, Demantra Spectrum shows the worksheet as empty. That is, if all values in the Sales series are less than 15000 for all combinations, the worksheet comes up empty.

---

**Note** If the worksheet includes a promotion level or a promotion series, the behavior is slightly different. In this case, the Members Browser or dropdown list does initially show all combinations. When you click a combination to display it, the worksheet *then* checks for exceptions.

---

You can apply multiple exceptions to a worksheet. When you apply multiple exceptions, you can relate them to each other via logical AND or logical OR relationships. For example:

The screenshot shows a dialog box titled "Exceptions Filter" with two rows of conditions. The first row has a dropdown menu set to "Base Frst", a comparison operator dropdown set to ">=", and a text input field containing "150000.0". The second row has a dropdown menu set to "Discount", a comparison operator dropdown set to "<=", and a text input field containing "15.0". The word "AND" is displayed between the two rows.

### To apply an exception filter

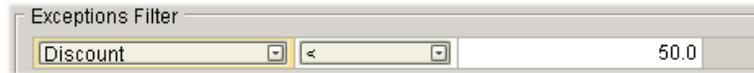

1. Click **Worksheet > Exceptions**. Or click the Exceptions button.  
The Exceptions Filter page appears.
2. Click **Add**.

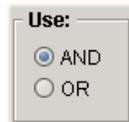

3. In the first box in the new row, select a series from the dropdown list.

**Note** Typically only some series are available for exceptions. If you do not see a series you need, contact your Demantra Spectrum administrator or your implementors.

4. In the second box, select an operator from the dropdown list.
5. In the third box, type or choose a value.

- For a numeric series, type a number.
  - For a dropdown series, choose one of the allowed values of this series.
  - For a string-type series, type any string. You can use the percent character (%) as a wildcard.
  - For a date-type series, type a date or use the calendar control to choose a date.
6. (Optional) You can apply additional exceptions. Select the **AND** or the **OR** radio button to specify the relationship between the exceptions.

**To delete an exception filter**

- Click the exception and then click **Delete**.

**See also**

“Filtering the Worksheet” on page 109

“Introduction to Series” on page 89

## Defining the View Layout

### To define the layout of a current view

1. Click **Worksheet > Layout Designer**. Or click the Layout Designer button.

The system displays a page where you specify the layout. This page displays the following areas:

Default

Page:

Series

Time

All Series  
Inventory & Replenishment

Table And Graph  
Table And Graph

Graph type Line Chart

Advanced...

this tab represents one view of the worksheet (the Default view, in this example)

this area represents the Members Browser or the dropdown lists

this area represents the X-axis and its contents

this area represents the Y-axis and its contents

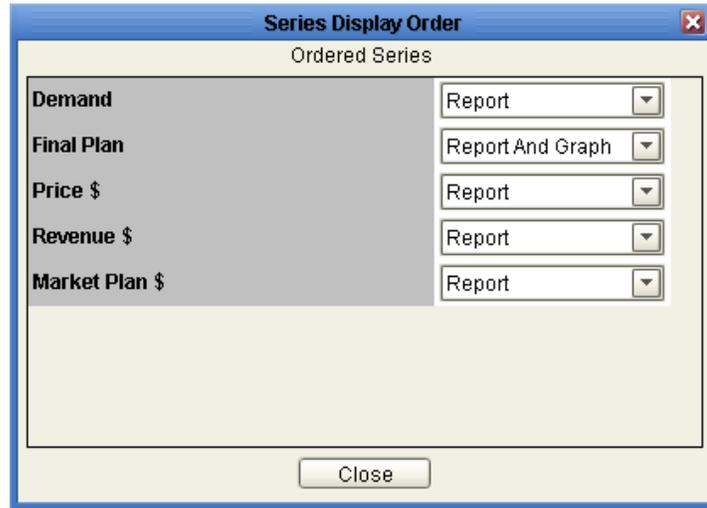

In addition, this screen displays the following icons:

- An icon for each aggregation level that you have included in the worksheet. By default, these levels are included in the Members Browser or selector lists.
  - An icon that represents the time axis. By default, time is shown on the x-axis.
  - An icon that represents the series data. Series are shown on the y-axis.
2. To change the worksheet layout, drag the level or time axis icons to the appropriate areas. You cannot move the series icon.
  3. To specify the type of graph to use, select a graph type from the **Graph Type** dropdown list.
  4. To specify how to display series in this view:

- a. Click the Sort button.

The Layout Designer displays a page that shows the order in which this view currently displays the series.

- b. To hide a series in this view, click the **None** option in the dropdown list to the right of the series name.
  - c. Otherwise, to specify where to display the data for a series, select one of the following options: **Table**, **Graph**, **Table and Graph**.
  - d. To move a series up or down in this list, click the series name and drag it up or down.
  - e. When you are done, click **Close**.
5. Click **Save**.
  6. Rerun the worksheet to see your changes. To do so, click **Data > Rerun**.

**To specify a crosstab layout**

1. Drag one or more level icons from the **Page Item** area to x-axis or y-axis areas.

**To specify which levels to use in a worksheet view**

By default, all levels you include in a worksheet are used on all views of the worksheet. Within a multi-view worksheet, you often hide some of the levels in some views, so that each view is aggregated differently.

1. Right-click within the **Page** area of the Layout Designer.

The system displays a menu like the following:

2. Click **Hide level** and then click the name of the level to hide.

When you hide a level, the worksheet automatically aggregates data across members of that level.

---

**Note** Do not use this option to hide the time axis.

---

### ***To revert to the default layout of a worksheet view***

1. Click **Worksheet > Layout Designer**. Or click the Layout Designer button.
2. Click the tab corresponding to the worksheet view you want to reset.

3. Click the Reset button.

In the default layout, all selected levels are visible and are on the X axis. Also, all series are displayed in the graph and/or table according to their default definitions.

### ***See also***

“Visual Elements of Worksheet Views” on page 91

“Levels and Layout Variations” on page 94

“Specifying the Worksheet Elements in a View” on page 117

“Displaying a Worksheet as a Subtab in a View” on page 118

“Filtering a Worksheet View” on page 119

## **Adding and Managing Worksheet Views**

A worksheet can include multiple views, each of which can have a different set of series and a different layout.

### ***To add a worksheet view***

1. Within the Layout Designer, click the Add Worksheet View button.
2. In the popup dialog box, type the name of the new view.
3. Click **OK**.

**To control synchronization between the views**

The views of a worksheet may or may not be synchronized with each other. If they are synchronized, when you edit in one view, that change automatically appears in the other views. Because this can affect performance, sometimes it is best to switch off this synchronization.

Within the Layout Designer, click one of the following buttons, whichever is currently displayed:

Do not force synchronization between views

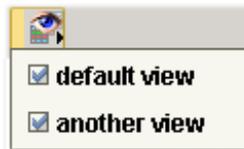

Synchronize data between views

**To rename a worksheet view**

1. Within the Layout Designer, click the Rename Worksheet View button.
2. In the popup dialog box, type the new name of the view.
3. Click **OK**.

**To enable or disable a worksheet view**

1. Within the Layout Designer, click the Hide/Display button.
2. The Layout Designer displays a popup list of all the views associated with this worksheet. A check mark is displayed next to each view that can currently be displayed.

3. For the view interest, click the check box next to the name of the view.
4. Click elsewhere on the screen to close the list of views.

**To delete a worksheet view**

Within the Layout Designer, do one of the following:

- Click the tab that corresponds to the worksheet view. Then click the Delete Worksheet View button.

- Click the Delete All Worksheet View button. Then, at the prompt, click **Yes**.

**See also**

“Defining the View Layout” on page 113

“Specifying the Worksheet Elements in a View” on page 117

“Displaying a Worksheet as a Subtab in a View” on page 118

“Filtering a Worksheet View” on page 119

## Specifying the Worksheet Elements in a View

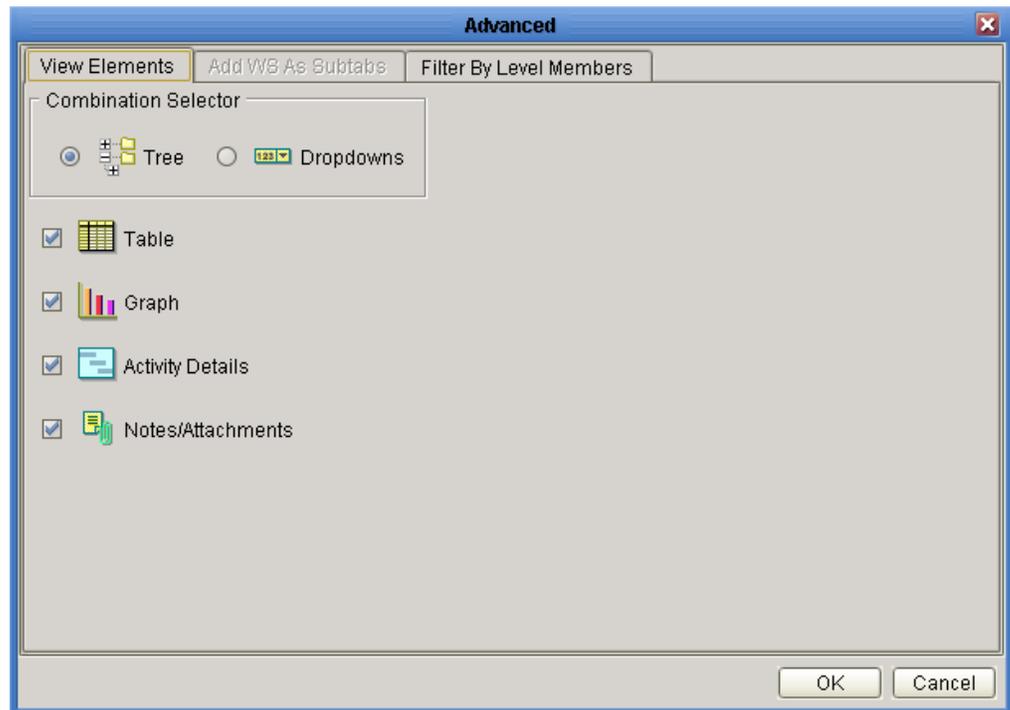

For each worksheet view, you can specify which of the basic worksheet elements are included: the table, the graph, and so on.

### To specify the elements to include in a worksheet view

1. Click **Worksheet > Layout Designer**. Or click the Layout Designer button.
2. Click the tab corresponding to the worksheet view you want to modify.
3. Click **Advanced...** in the lower right.

Demantra Spectrum displays the following screen:

Depending on your personal license and on the system configuration, you may not have all these elements.

- 
- Notes**
- In order to include the graph, you must have a license for either Demand Planner Web or Promotions Effectiveness.
  - The **Activity Details** option displays the **Activity Details** subtab; this option is available only if you have a license to Promotions Effectiveness.
  - The **Notes/Attachments** option displays the Notes/Attachments subtab; this option is available only if you have a license to Settlement Management. Even if this subtab is not displayed, users can still see notes in other ways; see “Viewing Notes” on page 22.
- 

4. For **Combination Selector**, click either **Tree** (to display a Members Browser) or **Dropdowns** (to display dropdown menus instead).

5. Click the check box next to each element you want to include in this view of the worksheet.
6. Click **OK**.

## Displaying a Worksheet as a Subtab in a View

You can display one or more associated worksheets as a subtab within a view. When you select a member in the view, the subtab worksheet is filtered to show just that member. You typically use a subtab worksheet to drill into further detail.

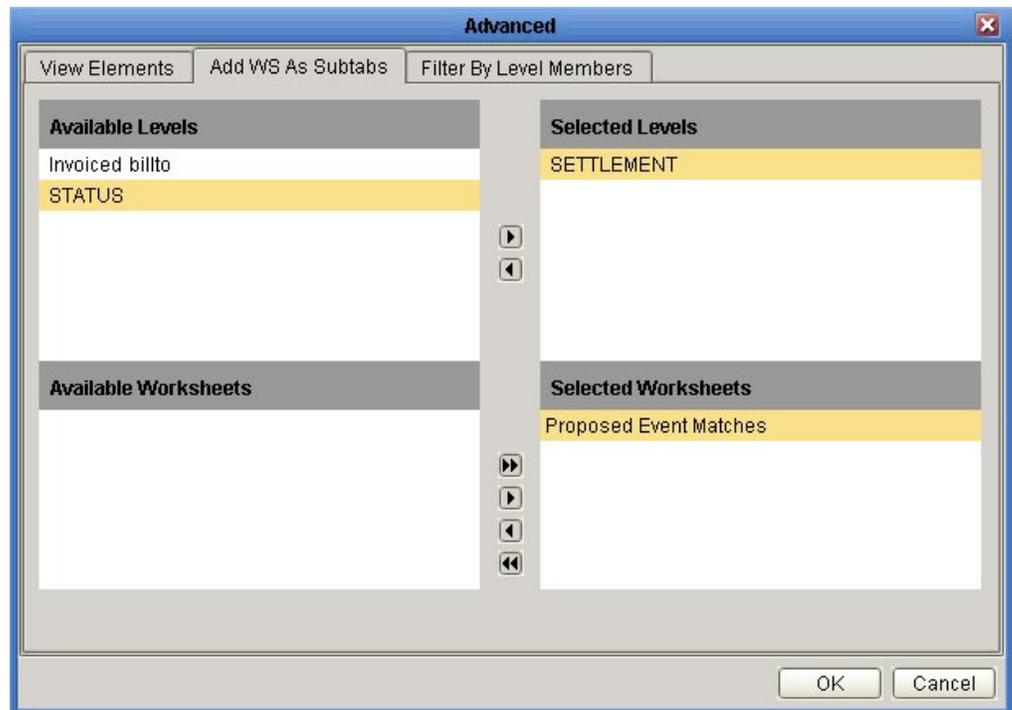

**Note** If you use the keyboard to move through the worksheet table, the subtabs are not automatically refreshed, for performance reasons.

### *To display a worksheet as a subtab within a view*

1. Click **Worksheet > Layout Designer**. Or click the Layout Designer button.
2. Click the tab corresponding to the worksheet view to which you want to add the subtab.
3. Click **Advanced...** in the lower right.  
Demetra Spectrum displays the **Advanced** screen.
4. Click the **Add WS As Subtabs** tab.

Demetra Spectrum displays a screen like the following:

Depending on the level that you select, the bottom part of the screen shows different worksheets that you can add as a subtab to this worksheet view.

5. For **Selected Levels**, select the level that is associated with the worksheet you want. In general, a worksheet is associated with the levels where it makes sense to use it; this is controlled by your system configuration. You can choose any of the levels that are used in this worksheet.
6. For **Selected Worksheets**, select the worksheets that you want to display as subtabs within this worksheet view.
7. Click **OK**.

## Filtering a Worksheet View

For each worksheet view, you can filter the view to show a subset of the data in the worksheet.

### To filter a worksheet view

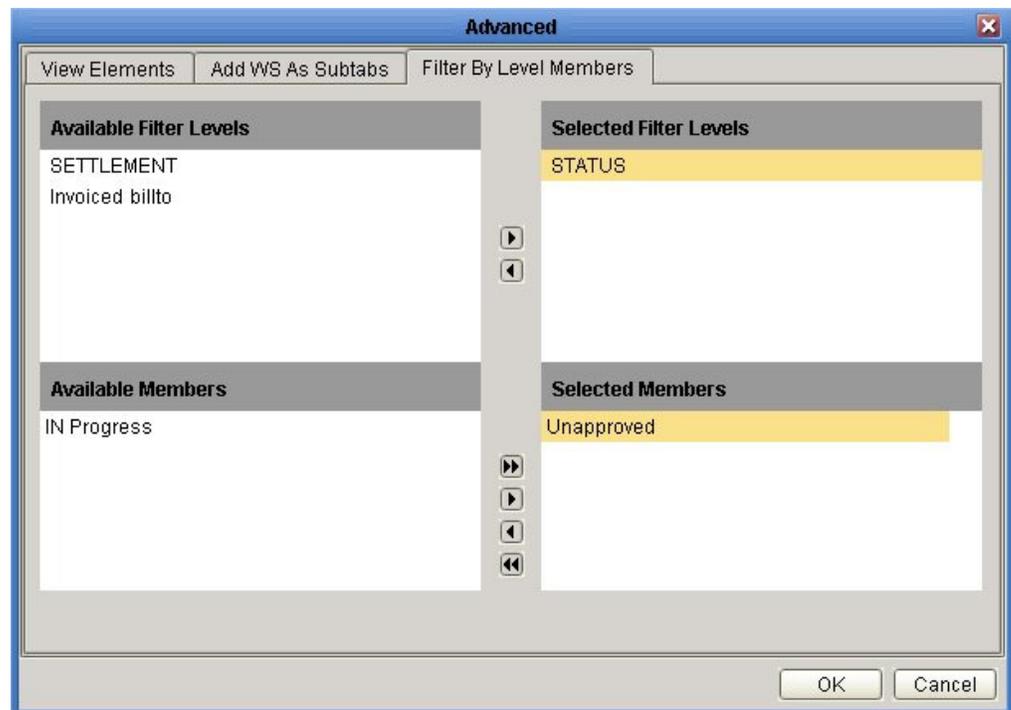

1. Click **Worksheet > Layout Designer**. Or click the Layout Designer button.
2. Click the tab corresponding to the worksheet view you want to filter.
3. Click **Advanced...** in the lower right.

Demantra Spectrum displays the **Advanced** screen.

4. Click the **Filter By Level Members** tab.

Demantra Spectrum displays a screen like the following:

5. For **Selected Filter Levels**, select the level by which you want to filter this worksheet view. You can choose any of the levels that are used in this worksheet.

6. For **Selected Members**, select the level members whose data should be displayed in this worksheet view.
7. Click **OK**.

## Sharing Worksheets

In general, any worksheet is one of the following:

- Private—available only to you
- Public—available to other users as well. (If you are using the separately licensed Collaborator Workbench, this means the worksheet is available to other users within the collaborative group.)

In either case, the original creator of a worksheet owns it and only that person can change it.

When you do share worksheets, however, you should consider data security. Demantra Spectrum automatically prevents any user from seeing data for which he or she does not have permissions. If you build a worksheet with data that other users do not have permissions to view, then those users will see an empty worksheet. Similarly, if a user has partial permissions for the data, then the worksheet will open with only those results that are permitted.

### **See also**

“Configuring the Worksheet Basics” on page 98

## Deleting Worksheets

You can delete a worksheet if you are its owner.

### **To delete a worksheet**

1. Open the worksheet.
2. Click **File > Delete**. Or click the Delete button.

Demantra Spectrum prompts you to confirm the deletion.

3. Click **Yes** or **No**.

## General Tips on Worksheet Design

- For performance reasons, don't select too much data to view, unless there is no other choice.
- If you receive a message saying “out of memory,” try the following techniques to reduce the amount of memory that your worksheet selects:
  - Remove series if possible
  - Reduce the span of time

- Apply filters

Also see the *Demantra Spectrum Administrator's Guide*.

- If you do need to select a large amount of data, use the levels to your advantage. Specifically, use the levels in the Members Browser or selector lists rather than moving them to a worksheet axis. If levels are in the Members Browser or selector lists, each combination in the worksheet is relatively smaller and will load more quickly.
- If you do not plan on working with the Activity Browser, you can switch off the Auto Sync option on the toolbar, and you can also hide the Activity Browser and Gantt chart.
- Remember that you can filter the worksheet by any level, including levels that are not shown in the worksheet. For example, you might want to see data at the region level, but exclude any data that does not apply to the Acme territory. To do this, you would filter the worksheet to include only the Acme member of the Territory level, but you would select data at the Region level.
- A multi-view worksheet is useful in following cases:
  - If you need to edit data at one aggregation level and see easily how that affects higher aggregation levels.
  - If you need to display a large number of series without having to scroll to see each one.

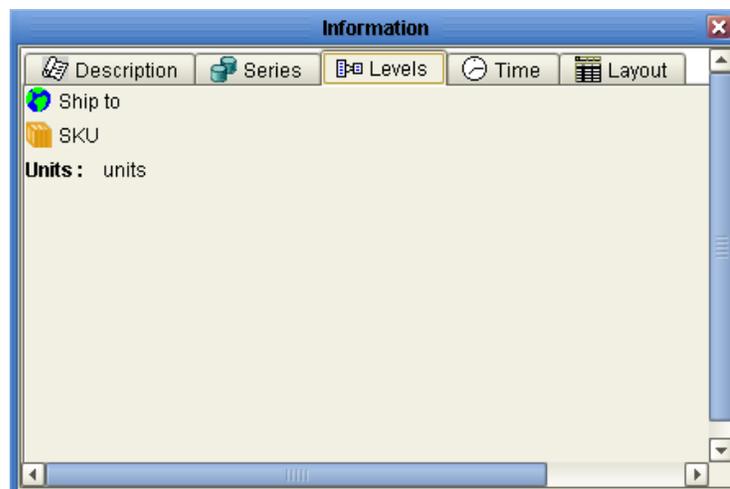

## Viewing the Definition of a Worksheet

### *To view the definition of a worksheet*

1. Open the worksheet.
2. Click **Data > Info**. Or click the Info button.

Demantra Spectrum displays a dialog box that summarizes the definition of a worksheet, for example:

# 9 Collaborating with Others

*This chapter provides a quick introduction to Collaborator Workbench. It includes the following sections:*

<i>Collaboration Tools in Demantra Spectrum.....</i>	<i>123</i>
<i>Logging into Collaborator Workbench.....</i>	<i>124</i>
<i>Opening a Worksheet from Collaborator Workbench.....</i>	<i>126</i>
<i>Managing Tasks in Collaborator Workbench.....</i>	<i>127</i>
<i>Sending a Task from an Open Worksheet.....</i>	<i>130</i>
<i>Viewing Other Users.....</i>	<i>131</i>

---

**Note** Collaborator Workbench requires another license in addition to Demand Planner Web, Promotions Effectiveness, or Settlement Management.

---

## Collaboration Tools in Demantra Spectrum

If you have a license to Collaborator Workbench, you can collaborate with others in two general ways:

- You can log into Collaborator Workbench, see other users in your collaboration groups, see tasks assigned to you, send tasks to others, and launch worksheets.
- You can send tasks to other users from within a worksheet (that is, from within Demand Planner Web, Promotions Effectiveness, or Settlement Management)

When you launch a worksheet from within Collaborator Workbench, you automatically launch Demand Planner Web, Promotions Effectiveness, or Settlement Management, whichever product you are licensed to use. Similarly, when you log off Collaborator Workbench, you are automatically logged off from Demand Planner Web, Promotions Effectiveness, or Settlement Management.

This chapter documents the key features related to collaboration. For further details on working with Collaborator Workbench, see the *Collaborator Workbench User's Guide*.

## Logging into Collaborator Workbench

### *To log into Collaborator Workbench*

Your Windows Start menu may include a link to Collaborator Workbench. If so, use that. If not:

1. Open Microsoft Internet Explorer.
2. Enter the URL supplied by your system administrator. This URL probably has the following format:

**`http://server name/virtual directory/portal/loginpage.jsp`**

For example:

**`http://frodo/demantra/portal/loginpage.jsp`**

3. In the **Log On** dialog box, enter your user name and password.
4. Click **Login**.
5. If you have not logged into any of the Demantra Spectrum Web products before on this machine, then Demantra Spectrum installs a small applet on the machine.

---

**Note** The exception is Demantra Anywhere, which does not use this applet.

---

6. Optionally click **Yes** if you want the system to always trust content from this source.

After you install the applet, Collaborator Workbench comes up, displaying your personal page.

Depending on how Collaborator Workbench is configured, it can include some or all of the elements shown in the following figure. You can configure all these elements for your own needs. For example, only a single content pane is shown here, but you can add as many as you need.

Worksheets you often use

Summary data (content) for a worksheet

The screenshot displays the Collaborator Workbench interface with the following components:

- Header:** National Foods logo, "COLLABORATOR WORKBENCH" title, and "POWERED BY DEMANTRA" branding.
- Navigation:** "Welcome dp", "Home > My Collaborator Workbench", date "08/11/04", and links for "Help", "About", and "Logout".
- Contents:** "Planning Applications" and "Tools and Applications" dropdown menus, along with "Personalize", "Search", and "Support" links.
- My Worksheets:** A table listing various worksheets with their descriptions and "Send" buttons.
 

Name	Description	Send as Task
<a href="#">000. Introduction</a>	First introduction to Demand Planner Web	Send
<a href="#">006. Clustering Report update</a>		Send
<a href="#">007. Analyze Historical Plan performance</a>	Analyze Historical Plan Accuracy	Send
<a href="#">012. Budget Exception Analysis</a>	Exception based Query to Analyse the Middle out plan based on Consensus plan	Send
<a href="#">008. Middle out Enterprise Plan</a>	Checking Enterprise Plan against Enterprise Goals and Budget	Send
<a href="#">015. Coupon Program</a>	Coupon event being schedule for the East Coast Region	Send
<a href="#">Clustering Report</a>		Send
- My Tasks:** A table showing tasks assigned to the user.
 

Done?	Message	Select value	Source	Assign date	Due date
<input type="checkbox"/>	<a href="#">Your department is near budget</a>	None	Exception Handler	Wed Aug 11 17:49:36 2004	None
<input type="checkbox"/>	<a href="#">Please review year-end results</a>	None	Management	Wed Aug 11 18:18:20 2004	None
<input type="checkbox"/>	<a href="#">Select next stage</a>	Select Option	dp	Wed Aug 11 18:18:24 2004	None
- Summary data (c. 12 Months Revenue by Region):** A pie chart showing revenue distribution by region.
 

Region	Percentage
East Coast Region	41.83%
West Coast Region	32.85%
Mid-Central Region	15.88%
Mid-West Region	10.04%
- Who's Online:** A list of users with their status (online/offline).
  - online: Marie\_C, guy\_yehiar
  - offline: ERP, Maya

Tasks currently assigned to you

Status of other users

## Opening a Worksheet from Collaborator Workbench

In Collaborator Workbench, **My Worksheets** lists some or all of the worksheets to which you have access, specifically, the following worksheets:

- Private and public worksheets that you own.
- Public worksheets where you and the owner are in the same collaborative group.

Name	Description	Send as Task
<a href="#">000. Introduction</a>	First introduction to	<b>Send</b>
<a href="#">006. Clustering Report update</a>		<b>Send</b>
<a href="#">007. Analyze Historical Plan performance</a>	Analyze Historical Plan Accuracy	<b>Send</b>
<a href="#">012. Budget Exception Analysis</a>	Exception based Query to Analyse the Middle out plan based on Consensus plan	<b>Send</b>
<a href="#">008. Middle out Enterprise Plan</a>	Checking Enterprise Plan against Enterprise Goals and Budget	<b>Send</b>
<a href="#">000c. Introduction - Multi-view Worksheets</a>		<b>Send</b>

**Last Refresh:** 10/26/04 03:08:10 PM

### To display My Worksheets

If Collaborator Workbench does not currently display **My Worksheets**, do the following:

1. Click the **Personalize** link in the upper right of Collaborator Workbench.
2. Click the check box next to **My Worksheets** and then click **Next**.
3. Click **Next** again and then click **Finish**.

### To open a worksheet

1. Click a worksheet within **My Worksheets**. Or click the Open button on the upper right of a content pane.
2. Depending on how the worksheet was configured, you may now be prompted to filter the data. In this case, one or more selection pages are displayed when the worksheet is opened.
  - a. On each selection page, select one or more choices or click **Select All** to select the whole list.
  - b. Click **Next** or click **Finish**.

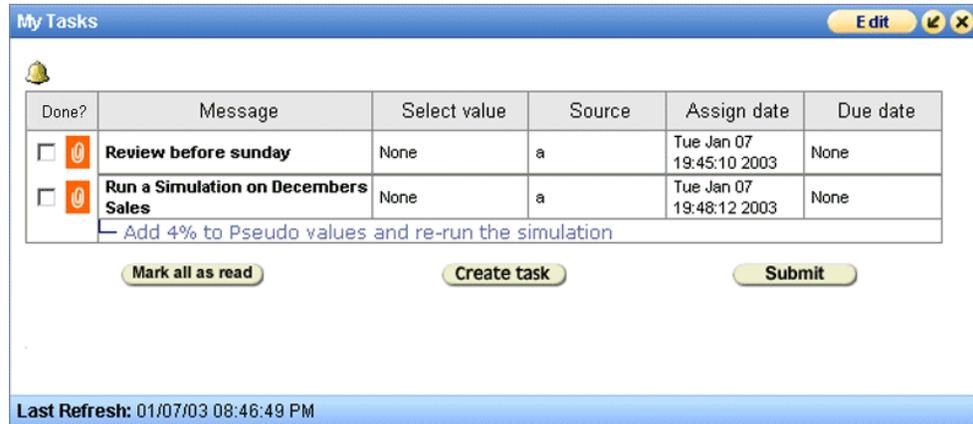

Demantra Spectrum now launches Demand Planner Web, Promotions Effectiveness, or Settlement Management, whichever product you are authorized to use.

### See also

“Working with Data” on page 11

## Managing Tasks in Collaborator Workbench

In Collaborator Workbench, tasks enable you to send work items to other users, to share information and to interact with the automated demand chain processes. Tasks appear in the **My Tasks** module.

A task usually corresponds to a worksheet that you send to another user or receive from another user. The task also can include a short message, links to Web sites, and attached files.

**Note** When you receive a task, you might also receive an email notification in your email system, if the sender has selected this as an option.

The Workflow Engine also sends tasks, generally to alert you of exceptions, provide forecasts, or communicate messages and information during appropriate circumstances.

## Viewing Tasks Assigned to You

### *To display My Tasks*

If Collaborator Workbench does not currently display **My Tasks**, do the following:

1. Click **Personalize**.
2. Click the check box next to **My Tasks** and then click **Next**.
3. Click **Next** again and then click **Finish**.

### *To view all assigned tasks*

The **My Tasks** module does not necessarily display all your tasks. To check for additional tasks:

- Click the **More** link in the bottom right corner of **My Tasks**.

**My Tasks** fills the wide pane and shows all current tasks.

### **To refresh My Tasks**

- Click **Save & Refresh** in the **My Tasks** module.

Any changes made in **My Tasks** are communicated to the Collaborator Workbench engine.

The date and time of your last **My Tasks** refresh is shown in the lower right corner of the **My Tasks** display.

## **Addressing a Task**

In general, you address a task in two stages:

1. Examining the associated worksheet and editing or approving data as appropriate. How you do this depends upon your organizational needs.
2. Marking the task as done so that the Workflow Engine can continue with the workflow.

---

**Note** When you receive a task, the Workflow Engine waits until the task status has been changed to **Done** before continuing with the workflow instance. It is therefore very important that you mark tasks as done after you have attended to the task requirements.

---

### **To mark a task as done**

Before you mark a task as done, make sure that you have reviewed all the relevant information and that you have addressed any concerns or issues. Then do the following:

1. First:
  - For a regular task, click the check box to the left of the task.
  - For a selection task, select the appropriate response from the dropdown list in the **Select value** column. The check box next to the task is automatically checked.
2. Click the **Save & Refresh** link at the bottom of the task list.

The task is removed from **My Tasks** and the updated task list is shown.

---

**Caution** If you go to another page or log off without clicking **Save & Refresh**, then your changes will be lost.

---

**To cancel the done status**

If you have not yet refreshed the **My Tasks** list, you can cancel your change:

- For a regular task, clear the check box next to the task whose status you want to change from done incomplete.
- For a selection task, use the dropdown box to select a response from the list.

**To mark all tasks as read**

- Click **Mark Tasks as Read**.

The bold emphasis is removed from the text in the list. This does not occur automatically when a task is marked as Done.

## Sending a Task from Collaborator Workbench

Depending on how your Collaborator Workbench has been configured, you may be able to send tasks to other users.

**To create and send a task**

1. Start by doing one of the following:
  - Within **My Worksheets**, click **Send on** the worksheet that you want to send.
  - Within **My Tasks**, click **Create Task**.

The **Send Task to User** dialog box appears.

The screenshot shows a dialog box titled "Send task to user - Microsoft Internet Explorer". It contains the following elements:

- To...:** A dropdown menu showing "Abby\_Rose;Jeff\_Wilson;"
- Message:** A text input field containing "Please review this worksheet"
- Description:** A text input field containing "Check the Q3 numbers"
- WorkSheet:** A dropdown menu showing "000. Introduction"
- File attachment:** A text input field with a "Browse..." button
- Escalate:** A dropdown menu with a downward arrow
- Send to email list:** A checked checkbox
- Buttons:** "Cancel" and "Send Task" at the bottom right.
- Legend:** A red asterisk and the text "- Mandatory fields" at the bottom left.

2. Click **To.....** and select the users and/or groups to receive the task.
3. In the **Message** field, type a short text message.

This will be the task message that the recipient sees. The worksheet that you are sending will be added automatically as a link from the **Message** text.

4. In the **Description** field, type a short description.

This description will be displayed below the task message in the recipient's **My Tasks** module.

5. To link the task subject line to a Web page, enter the full path to the file in **URL** field.

---

**Note** You must enter the full URL, including server name and directory hierarchy. The **http://** part will be added automatically if omitted.

---

6. Optionally, to attach a file to the task, enter the path to the file in the **File Attachment** field or use the **Browse** button to find it.

7. Optionally, to ensure that this task is completed by a specific time, click **Escalate** and then provide the following information:

**Due Date**      Date and time by which this task must be completed

**Alert Time**    Date and time at which an alert will be displayed

**To**              Additional email addresses

8. To send an email notification to the recipient of the task, select the **Send to email list** check box. (Depending on how your system has been configured, this option may not be available.)
9. Click **Send Task**.

When the recipient next logs in (or refreshes **My Tasks**), he or she will see the new task.

## Sending a Task from an Open Worksheet

In addition to sending tasks from Collaborator Workbench, you can send a task directly from an open worksheet; that is, you can send a task from within Demand Planner Web, Promotions Effectiveness, or Settlement Management, whichever product you are currently using.

When you send a task from within an open worksheet, you can filter the task to focus on a specific combination.

### ***To send a task from an open worksheet***

1. Open a worksheet.
2. Optionally navigate to a combination that you want to focus on.
3. Click **File > Send as Task** or click the Send as Task button.

The **Send Task to User** dialog box appears.

4. Complete the fields as described in “Sending a Task from Collaborator Workbench” on page 129.
5. Click either **Send Worksheet** or **Send Selected Combination** to specify whether to filter the worksheet. If you click **Send Selected Combination**, the worksheet is filtered to the combination that you are currently viewing. Otherwise, the entire worksheet is sent.
6. Click **Send Task**.

## Viewing Other Users

In Collaborator Workbench, the **Who's Online** module shows the status of other users who belong to the same collaborative groups as you.

### **To send an email to a contact**

- Double-click the name of the contact that you want to send an email to.  
The email application opens with a new message to the contact.

**Note** If you do not have an email application installed, then you will receive an error message when you try to send a message to another user.

# 10 Using Worksheets Remotely

*By using Demantra Anywhere, you can access worksheets remotely and perform many of the same tasks described earlier in this manual. This chapter includes the following sections:*

<i>Introduction to Demantra Anywhere .....</i>	<i>133</i>
<i>Logging Onto Demantra Anywhere.....</i>	<i>134</i>
<i>Opening a Worksheet in Demantra Anywhere.....</i>	<i>135</i>
<i>Using Worksheets in Demantra Anywhere .....</i>	<i>136</i>

- 
- Notes**
- Demantra Anywhere uses a separate license.
  - Demantra Anywhere does not enable you to work offline. That is, you have access to the data only while you are actually logged on. For information on taking a worksheet offline, see “Working Offline” on page 69.
- 

## Introduction to Demantra Anywhere

In contrast to the other Demantra Spectrum products, Demantra Anywhere is a true thin Web client and does not require an applet. You can use it to access Demantra Spectrum functionality from remote machines, including handheld devices.

On the other hand, Demantra Anywhere provides less functionality than the other products. The following table summarizes the features in Demantra Anywhere that relate to worksheets.

<b>Feature</b>	<b>Availability in Demantra Anywhere</b>
Worksheet elements	<ul style="list-style-type: none"><li>• If the worksheet includes subtabs, Demantra Anywhere does not display them.</li><li>• Worksheet includes dropdown lists instead of a Members Browser, no matter how the worksheet is defined.</li><li>• You use dropdown menus to access each view of a multi-view worksheet.</li><li>• The graph is not shown.</li><li>• Worksheet table cannot use crosstab layout (no levels on the axes).</li></ul>
Menu bar	Not available. Instead use the icons in the toolbar.
Right-click menus	Browser menu options only.

<b>Feature</b>	<b>Availability in Demantra Anywhere</b>
Opening and running worksheets	<ul style="list-style-type: none"> <li>• Can open and close worksheets.</li> <li>• Can rerun currently open worksheet.</li> <li>• Cannot view worksheet definition.</li> <li>• Cannot take worksheets offline or bring back online.</li> </ul>
Managing the screen	<ul style="list-style-type: none"> <li>• If you open multiple worksheets, each is opened in a separate browser.</li> <li>• Cannot resize different worksheet areas (for example, the table).</li> <li>• Cannot resize table columns.</li> </ul>
Editing data	<ul style="list-style-type: none"> <li>• Can edit one cell at a time.</li> <li>• Can copy and paste data from cell to cell, one cell at a time.</li> <li>• Can reset manual changes.</li> <li>• Can save data.</li> <li>• Cannot undo.</li> <li>• Cannot change the automatic recalculation setting.</li> </ul>
Printing	Can print the data that is currently displayed.
Exporting data	Not available.
Notes	<ul style="list-style-type: none"> <li>• Can view notes.</li> <li>• Cannot edit or create notes.</li> <li>• Cannot alter note permissions.</li> </ul>
Creating and redefining worksheets	Not available.
Running simulations	Not available.

## Logging Onto Demantra Anywhere

### *To log onto Demantra Anywhere*

1. Open Microsoft Internet Explorer.
2. Enter the URL supplied by your system administrator. This URL probably has the following format instead:

**`http://server name/virtual directory/portal/anywhereLogin.jsp`**

For example:

**`http://frodo/demantra/portal/anywhereLogin.jsp`**

3. In the login dialog box, enter your user name and password.
4. Click **Login**.

The Demantra Anywhere page looks like this:

DEMANTRA ANYWHERE	
Welcome Guest	10/27/04
Name	Description
<a href="#">000. Introduction</a>	First introduction
<a href="#">000.a. Introduction - Report Designer</a>	
<a href="#">001. Store Plan</a>	Store Plan per SKU

The screen lists all public worksheets and all private worksheets that you own.

**See also**

“Introduction to Demantra Anywhere” on page 133

## Opening a Worksheet in Demantra Anywhere

**To open a worksheet**

- Click the name of the worksheet.

**To run or rerun a worksheet**

Depending on how Demantra Spectrum was configured, it may or may not automatically run the worksheet that you open.

- Within the worksheet, click **Data > Rerun**.

## Using Worksheets in Demantra Anywhere

Within Demantra Anywhere, you can access any public worksheet created in Demantra Spectrum, but the worksheets have a simplified appearance, like this:

Time	Final Plan	Ent Override	Demand	Base Frkst
05/06/2002			454,662	436,621
06/03/2002			273,031	267,803
07/01/2002			308,400	302,902
07/29/2002			422,000	371,827
08/26/2002			262,431	300,791
09/23/2002			295,981	295,602
10/21/2002			314,854	328,726
11/18/2002			363,200	330,570
12/16/2002			305,263	302,833
01/13/2003			395,655	348,535
02/10/2003			358,546	338,203
03/10/2003	319,103	—		319,103
04/07/2003	362,602	—		362,602

### To select a worksheet view

- Select the view from the **Available Views** dropdown list.

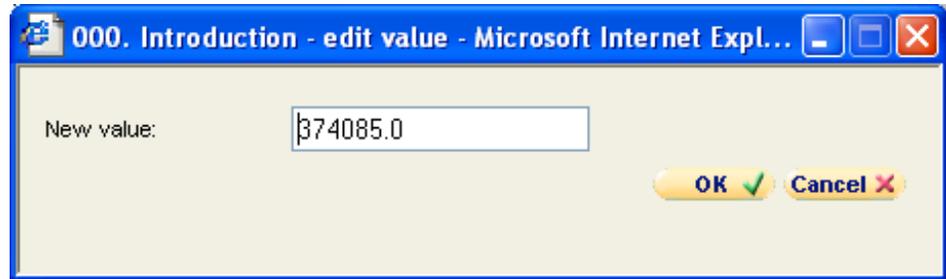

### To select a different combination to display

- Select level members from the level dropdown lists (for example, Brand or Ship to).

**To edit worksheet data**

1. Click an editable cell.

A small editing page appears.

2. Type in the new value and click **OK**.

**To save data**

-  Click the Update Data button.

**To reset manual changes since the last time you saved data**

-  Click the Reset Manual Changes button.

**To rerun the worksheet**

-  Click the Rerun Worksheet button.

**To print the currently displayed data**

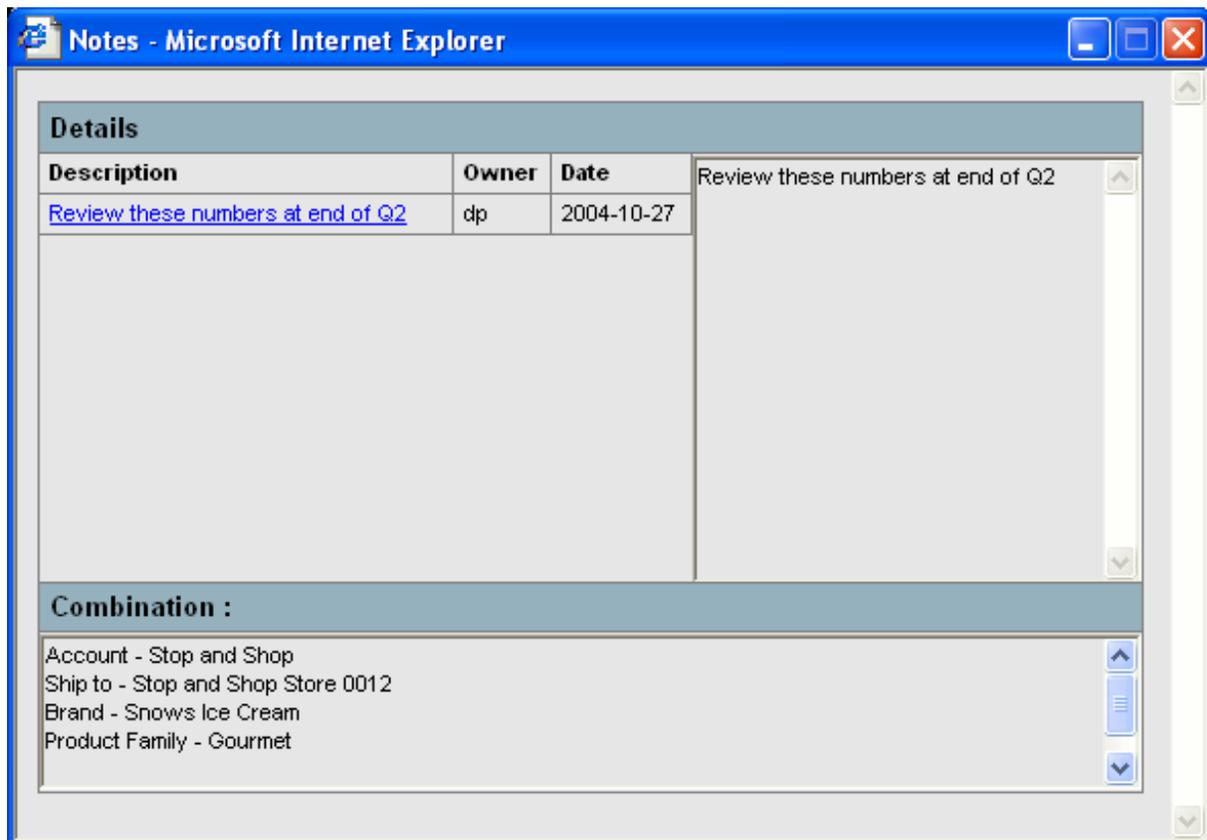

-  Click the Print button.

**To view a note**

1. Click the note icon within the cell.

471,400	
158,100	
603,000	
161,500	
259,800	

The **Note** page appears, displaying a list of all the notes. This list indicates the date of each note, as well as who entered it. The **Combination** field shows the item-location combinations to which the currently selected note belongs.

2. To see the note details, click **Description**.
3. To close the **Note** page, click the X in the upper right corner.

# A URLs and Shortcuts

## Demantra Spectrum URLs

Item	Example URL
Demand Planner Web, Promotions Effectiveness, or Settlement Management (features depend on your license)	<a href="http://frodo/demantra/portal/partnerLogin.jsp">http://frodo/demantra/portal/partnerLogin.jsp</a>
Dynamic Open Link (DOL) for access for third-party reporting tools	<a href="http://frodo/demantra/portal/DOL_HTML.htm">http://frodo/demantra/portal/DOL_HTML.htm</a>
Collaborator Workbench (requires an additional license)	<a href="http://frodo/demantra/portal/loginpage.jsp">http://frodo/demantra/portal/loginpage.jsp</a>
Demantra Anywhere (if you have a license for Collaborator Workbench)	<a href="http://frodo/demantra/portal/remoteloginpage.jsp">http://frodo/demantra/portal/remoteloginpage.jsp</a>
Demantra Anywhere (if you do not have a license for Collaborator Workbench)	<a href="http://frodo/demantra/portal/anywhereLogin.jsp">http://frodo/demantra/portal/anywhereLogin.jsp</a>
Offline access to Demantra Spectrum worksheets ( <b>added in 7.0</b> )	<a href="http://frodo/demantra/portal/launchDPWeb.jnlp">http://frodo/demantra/portal/launchDPWeb.jnlp</a>

### Notes:

- Here **frodo** is an example server name. Substitute the name of the server that is running the Demantra Spectrum Web software.
- Also, **demantra** is an example virtual directory. Substitute the name of the virtual directory that is the root of the Demantra Spectrum Web software.

## Keyboard Shortcuts

### Editing

<b>Ctrl+c</b>	Copy
<b>Ctrl+v</b>	Paste
<b>Ctrl+x</b>	Cut
<b>Ctrl+z</b>	Undo
<b>Ctrl+y</b>	Redo

## Menu Access

<b>Alt+f</b>	Open File menu
<b>Alt+w</b>	Open the Worksheet menu

<b>Alt+7</b>	Open the layout part of the Worksheet Designer

# B Series Reference

The following table lists the series in Settlement Management, including series that are not shown in the Settlement Management worksheets by default:

<b>Series name</b>	<b>Purpose</b>	<b>Applies to...</b>	<b>Used in worksheets...</b>
Approved Non Trade	Sum of amounts for approved non-trade settlements.	Non-trade settlements	
Approved Trade	Sum of amounts for approved trade settlements.	Trade settlements	<b>Settlement Details By Account, Settlement Account Summaries</b>
Customer CHECK #	Number of the check from the customer. Uses the customer's check numbering system.	Deductions and off-invoice settlements	<b>Settlement Details By Account</b>
Customer CHECK DATE	Date of the check from the customer.	Deductions and off-invoice settlements	<b>Settlement Details By Account</b>
Customer Invoice #	Number of the invoice from the customer. Uses the customer's invoice numbering system.	Claims	<b>Settlement Details By Account</b>
Customer Invoice DATE	Date of the invoice from the customer.	Claims	<b>Settlement Details By Account</b>
G/L Code	General ledger code that best explains why this settlement was denied or split.	All settlements	<b>Settlement Details By Account</b>
Linked Promo ID	ID of the promotion with which this settlement is linked.	All settlements	
Matched Event	Name of the promotion with which this settlement is linked.	All settlements	<b>Settlement Details By Account</b>
Owner	Settlement Management user who has claimed responsibility for this settlement.	All settlements	<b>Settlement Details By Account</b>
Posted DATE	Date on which this settlement entered the system.	All settlements	<b>Settlement Details By Account</b>
Settlement #	Unique identifier of this settlement.	All settlements	
Settlement Account ID	Customer with which this settlement is associated.	All settlements	<b>Settlement Details By Account</b>
SETTLEMENT STATUS	<p>Current status of this settlement, within Settlement Management. One of the following:</p> <ul style="list-style-type: none"> <li>• New</li> <li>• In Progress</li> <li>• Unapproved</li> <li>• Approved</li> <li>• Duplicate</li> <li>• Denied</li> <li>• Write Off</li> </ul> <p>These are not customizable. You can also display the settlement status as a level.</p>	All settlements	<b>Settlement Details By Account</b>

<b>Series name</b>	<b>Purpose</b>	<b>Applies to...</b>	<b>Used in worksheets...</b>
SETTLEMENT TYPE	Settlement type, for use by Settlement Management. One of the following: <ul style="list-style-type: none"> <li>• Claim</li> <li>• Off-invoice</li> <li>• Deduction</li> <li>• Non-Trade</li> <li>• Claim resulting from an original claim split</li> <li>• Deduction resulting from an original deduction split</li> </ul> <p>These are not customizable. You can also display the settlement type as a level.</p>	All settlements	<b>Settlement Details By Account</b>
Supplier CHECK #	Number of the check that reimburses the customer for this claim.	Claims	<b>Settlement Details By Account</b>
Supplier CHECK DATE	Date of the check to the customer.	Claims	<b>Settlement Details By Account</b>
Supplier Invoice #	Number of the invoice to the customer.	Deductions and off-invoice settlements	<b>Settlement Details By Account</b>
Supplier Invoice DATE	Date of the invoice to the customer.	Deductions and off-invoice settlements	<b>Settlement Details By Account</b>
Total Outstanding Non Trade	Sum of amounts for unapproved and unresolved non-trade settlements.	Non-trade settlements	
Total Outstanding Trade	Sum of amounts for unapproved and unresolved trade settlements.	Trade settlements	<b>Settlement Details By Account, Settlement Account Summaries</b>
Unapproved Non Trade	Sum of amounts for unapproved non-trade settlements.	Non-trade settlements	
Unapproved Trade	Sum of amounts for unapproved trade settlements.	Trade settlements	<b>Settlement Details By Account, Settlement Account Summaries</b>
Unresolved Non Trade	Sum of amounts for unresolved non-trade settlements.	Non-trade settlements	
Unresolved Trade	Sum of amounts for unresolved trade settlements.	Trade settlements	<b>Settlement Details By Account, Settlement Account Summaries</b>

# Glossary

## **4-4-5 calendar**

A calendar that consists of financial quarters, in which each quarter consists of a “month” of exactly four weeks, followed by a “month” of exactly four weeks, followed by another “month” of exactly five weeks. In practice, 4-4-5 calendars vary slightly from company to company.

## **active combination**

Item-location combination that is neither dead nor young; see *prediction status*.

## **advanced analytics**

The process of specifying engine models and engine parameters for different *combinations* within the *forecast tree*, rather than using the global settings.

## **aggregation**

The process of adding up or otherwise determining a useful summary of a set of related data. For example, you might add up the sales for all the products in a product group and arrive at an aggregated number for the entire product group. Aggregation does not always mean simple addition; you can aggregate data in other ways.

## **allocation**

The general process of dividing a limited amount included in a data series on a product or location group level, to a product or location item level by using the proportions mix of group/items of a different data series.

To perform allocation, you use Allocation Management (within Demand Planner).

## **A/P department**

Accounts payable department, the department that receives bills and is responsible for paying them.

## **approved trade**

In general, this refers to *settlements* that have been matched to *promotions* and that have approved by a user with sufficient authority. See also *unapproved trade*.

## **A/R department**

Accounts receivable department, the department that sends bills as needed and receives all payments.

**attachment**

A file, typically in JPEG or PDF format, that you include within a *note*, as supplemental information. You generally use attachments to provide *proof of performance*.

**attribute**

A descriptive property associated with the level (and stored internally in the table associated with the level). For example, a Ship To member might have the following attributes:

Attribute	Value
Account	Stop and Shop
Customer Group	Grocery
Customer Type	Customer
Location Type ID	Sales Area
Macro Area	1
Name	Stop and Shop Store 0012
Network Level	0
Region	East Coast Region
Sales Area SWH Nwlev	3
Size Io	Sq Ft
Source Plant Default	NA
Source WH Default	SSDC1
Store Manager	NA

Apart from the **Name** attribute, the attributes shown in red are all parents of this member. They are shown in red because they are required.

You use attributes in several different ways:

- To provide extra information to describe members of the level. You can view and edit this information.
- To provide a further subdivision of the level data. To do this, you add an attribute to a level and select an option to create it as a child level. For example, suppose you create an attribute called ABC. If ABC can have the values A, B, or C, and if you create this attribute as a level, then the ABC level would have three members: A, B, and C. The member A, for example, would consist of all the data that had the A value for this attribute, within the parent level.
- For the purpose of exporting or importing data.
- To describe *promotions*. Promotion attributes are converted into *promotional causal factors*. Applies only to Promotions Effectiveness.

**batch mode**

A mode in which you can run the Analytical Engine. In this mode, the Analytical Engine uses the entire forecast tree. See also *simulation mode*.

**base time buckets**

The *time buckets* in which data is stored in Demantra Spectrum. Each base time bucket contains data corresponding to one *base time unit*. Users can view data aggregated into larger time buckets as well.

**base time unit**

The smallest possible *time unit* in your Demantra Spectrum implementation. The base time unit determines the *time resolution* of your system.

**billback**

Request for credit on invoice, due to a *promotion*.

**broker**

An outside party who negotiates promotional agreements between a manufacturer and the retailers. Applies to Settlement Management.

**cannibalization**

Reduced demand of an existing product caused by a new product introduction or by the increased demand of an existing product due to corporate strategies like promotions. Although cannibalization typically refers to negative effects only, sales interactions like switching of accounts, brands, products, or channel could be either positive or negative. Applies to Promotions Effectiveness.

**causal factor**

Additional information that can explain historical data so that you can improve forecast quality (for example: price, CPI, weather, and so on). Specifically, a causal factor is a time-varying quantity (such as a series) that affects demand. Demantra Spectrum provides the following general kinds of causal factors:

- A local causal factor depends on the time, location, and item being sold. For example, it can be a specific discount in a specific store.
- A global causal factor depends only on the time, for example, a holiday. See *global factor*.
- Promotional causal factors, which apply to different items, locations, and promotions. These causal factors are available only for Promotions Effectiveness.

You configure causal factors in the Business Modeler. Demantra Spectrum uses this information to better understand the sales history and make more accurate predictions.

**chaining**

The general process of associating historical patterns of existing series with other series found in a new product or location, with the goal of predicting for the new product or location. To perform chaining, you use Chaining

Management (within Demand Planner). You copy data from selected sources to the target combinations.

**chargeback**

A request sent to the customer for payment, typically when a *deduction* is denied.

**check request**

A request that a *CSD representative* sends to the company's *A/P department*.

**claim**

A kind of *settlement*, specifically a request from a customer for payment. In these cases, the customer has run the promotion and is requesting to be reimbursed, based on an agreement between you and the retailer. If you approve the claim, you request for your *A/P department* to send a check to this customer or to the broker, as applicable.

**client expression**

Calculates data at a given level, referring to other data at the same level. You use client expressions to calculate numbers that cannot be calculated by aggregation from lowest-level data.

A client expression takes precedence over a *server expression*.

Normally, you use a server expression to retrieve data for the series at the lowest aggregation level. For higher aggregation levels, Demantra Spectrum automatically aggregates the results of the server expression. In cases where that aggregation is not suitable, you use a client expression that explicitly uses the data associated with the higher aggregation level.

**combination**

The combination of an item member (from any hierarchy level) and a location member (from any hierarchy level). Each of the following is a combination:

- Chocolate cookies (at all stores)
- Chocolate cookies at the Fair Haven store
- All cookies at Better Stores, Inc.

The word *combination* can also refer to the data associated with that combination, for example, all sales of chocolate cookies at the Fair Haven store.

**combination level**

A level that contains time-*independent* data for combinations. Sometimes called *matrix level*.

**combination series**

More often called *matrix series*.

**competitive item group (CI)**

A set of items within an *influence range (IR)*. Typically an influence range includes two CIs: “us” and “them.” For example, an influence range could consist of two CIs: one for Acme carbonated beverages (“us”) and one for

Brand X and Brand Y carbonated beverages (“them”). See also *item group*. Applies only to Promotions Effectiveness.

**competitive location group (CL)**

A set of locations within an *influence range (IR)*. Each CL typically corresponds to a single competitive distribution channel. See also *location group*. Applies only to Promotions Effectiveness.

**combination-selection list**

Drop-down list at the top of a worksheet, equivalent to the *Members Browser*. A worksheet may have several of these, and you use them to specify which item-location combination the worksheet should display.

**component**

A subdivision of the Demantra Spectrum data. Each component includes the following items:

- One or more series of data, organized into specific levels.
- Units of measure.
- Optional indexes and exchange rates.
- An owner, who can add additional users.

**content pane, content**

Pane within Collaborator Workbench that displays a graphical view of data associated with a worksheet, to provide you with current, at-a-glance information that meets your needs. You can display content in many formats such as the following:

- Members Browser, which is a collapsible tree hierarchy of data levels
- Tabular format
- Chart formats including line, bar, and pie charts
- Calendar format

**crosstab**

A worksheet that has been configured with levels on the x-axis and/or y-axis.

**CSD representative**

A member of the customer service department. The primary users of Settlement Management are CSD representatives.

**dead combination**

Combination for which sales are not recent enough to be used for prediction. See also *prediction status*.

**deduction**

A kind of *settlement*, specifically a short payment on an invoice. In these cases, the customer has run the promotion and has made a short payment on an invoice. By permitting this short payment, you are reimbursing the customer for running the promotion.

**dimension**

Perspective from which a large volume of complex and interrelated data can be viewed and analyzed. Each dimension organizes data in one or more hierarchies of *levels*, allowing you to view the data in different ways. Your Demantra Spectrum application can have any number of dimensions, which you define in the Business Modeler. See also *level hierarchy*.

**engine profile**

A set of engine parameters with specific values and a profile name. For use only with the Promotions Effectiveness engine.

**exception**

If you attach an exception to a worksheet, Demantra Spectrum checks the values of the worksheet data and displays only the combinations that meet the exception criteria.

Specifically, you define an exception condition that consists of a series, a comparison operator (such as equals or greater than), and a value, for example:

Sales > 150000

When you open the worksheet, Demantra Spectrum checks each combination in the worksheet. For each combination, if the condition is met for *any* time in the worksheet date range, Demantra Spectrum displays that combination. For example, the worksheet shows combinations that have Sales values greater than 150000, within the time range included in the worksheet.

If the condition is not met at any time for any of the worksheet combinations, Demantra Spectrum shows the worksheet as empty. That is, if all values in the Sales series are less than or equal to 15000, the worksheet comes up empty.

You can attach multiple exceptions to a worksheet. When you do so, you can relate them to each other via logical AND or logical OR relationships.

**fictive**

Placeholder. For example, when you first create a member using Member Management, that member is not yet associated with any sales data and is therefore a fictive member.

**filtering**

The process of limiting the scope of data. Demantra Spectrum provides two general types of filters, each of which allows only certain data to be displayed or otherwise used.

The more common filters are combination filters. For this type of filter, you specify the following:

- An aggregation level. You can filter data at any level in any dimension.
- Members of that aggregation level that are allowed through the filter; other members are not included.

The net result is that a filter allows Demantra Spectrum to display only certain item-location combinations.

In a few places, Demantra Spectrum provides a different type of filter, a value-specific filter that allows only data that contains certain values.

**forecast**

Predictions about future sales of items at various locations, as a function of time. The forecast is based upon the demand, which in turn is based upon the historical data. The length of time that the forecast spans is called the *forecast horizon*.

The Analytical Engine creates the forecast, either as the result of the batch forecast, or when a user runs and approves a simulation.

**forecast model**

Mathematical model used to predict forecast. Demantra Spectrum provides about a dozen forecast models that are in common industry use. To create its forecast, the Analytical Engine tests each model, sees how well it fits the historical data, and uses a weighted combination of the results from all the models.

**forecast node**

Node within the forecast tree.

**forecast tree**

A single hierarchy of forecast data, the forecast tree is made up of item-location combinations at different aggregate levels. Each node in this tree represents a time-based series that is subject to forecast. The forecast tree does not need to contain all possible combinations, only those that are relevant to the forecasting process.

**general attribute**

See *attribute*.

**general level**

An aggregation level that stores *time-dependent* data for a *combination*. For example, a promotion is generally associated with one or more items at one or more locations, and is associated with specific dates. Demantra Spectrum stores the data for this promotion as a general level.

**global factor**

A causal factor that depends only on the date of the sale. A global factor affects all items and locations in the system. For example, global oil prices have an impact on the sales of automobiles. The effect is widespread but changes with time. The effect occurs at all locations where the automobile is sold, and for all models being sold.

Another possible global factor is a holiday, if all locations in your solution follow the same holidays.

**group**

Set of users who can work together via Collaborator Workbench. A user can belong to multiple groups.

Membership in a group also controls access to the Workflow Editor; see *Demantra Spectrum Administrator's Guide*.

**historical data**

In general, this is the record of sales of different items at all locations, for months or years in the past. For each sale, you must know the location of the sale, the product code, price, and quantity. You also typically know information about causal factors (such as holidays and promotions) that may have affected the sales volume. Demantra Spectrum also uses information about returns, inventory levels, and orders.

**index**

A financial measure used to normalize prices over time. An example is the Consumer Price Index (CPI).

**influence group (IG)**

A set of item-location combinations in which all items belong to the same *item group* and all locations belong to the same *location group*. Within a given *influence groups*, the influence groups mutually interact. By identifying the influence groups, you determine the coarseness or generalization of causality. Applies only to Promotions Effectiveness.

**influence range (IR)**

Level within the forecast tree that controls how far the Analytical Engine looks for influence when a promotion is run. The influence ranges control how far the Analytical Engine looks for influence when a promotion is run. This determines the breadth of the causality. An influence range consists of multiple *influence groups*. Applies only to Promotions Effectiveness.

**item**

One of the dimensions by which you view data. Other typical dimensions are location and time. Each dimension consists of one or more hierarchies of data, allowing you to view data organized in different ways. For example, if you are forecasting demand for muffins, the item dimension could contain a product group hierarchy and a flavor hierarchy.

**item group**

A set of items within a *competitive item group (CI)*. For example, within the Acme CI, the item group I1 might consist of orange-flavored soft drinks. Another item group, I2, might consist of colas. Applies only to Promotions Effectiveness.

**level**

An aggregation of data. For example, the Color level might consist of the sales data aggregated by the color of the items. Each level consists of members. The Color level would have one member for each color.

Levels allow you to view the data in different ways. Demantra Spectrum supports the following types of levels:

-  *Item levels* organize data in ways that reflect product properties such as product family, color, style, and so on. Each member of an item level represents time-dependent data aggregated according to some attribute of the items being sold.
-  *Location levels* group and aggregate data according to characteristics of the locations where you sell. For example, location levels could describe geography or types of stores.
-  *Combination (or matrix) levels* group and aggregate data according to characteristics of the item-location combinations. These are less common than item and location levels.
-  *Time levels* group and aggregate data by sales date. Normally you use a time level in place of the time axis.
-  *Promotion levels* group and aggregate data by sales promotions. Depending on how your system is implemented, you may have a hierarchy of promotional levels (to organize the promotions), and the higher levels might use different icons.

Unlike other kinds of levels, promotion levels can be displayed within a Gantt chart. Promotion levels are available only with Promotions Effectiveness.

*Settlement levels*, which are used only by Settlement Management. In general, a settlement is an outstanding sum of money that needs to be resolved, related to a promotion. If you use a settlement level in a worksheet, you cannot use levels from any other hierarchy in that worksheet.

*Check request levels*, which are used only by Settlement Management. A check request is an instruction to send a check to a customer or designated third party. Check requests are exported to the accounting systems that actually perform them.

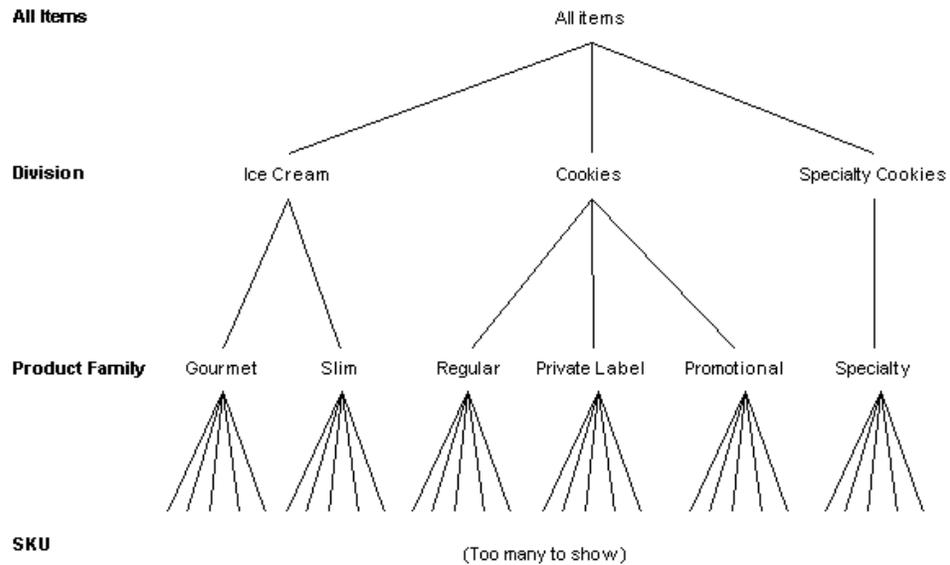

Item and location levels are the most common.

Levels are organized into *hierarchies*, and each level can have *attributes*.

### **level hierarchy**

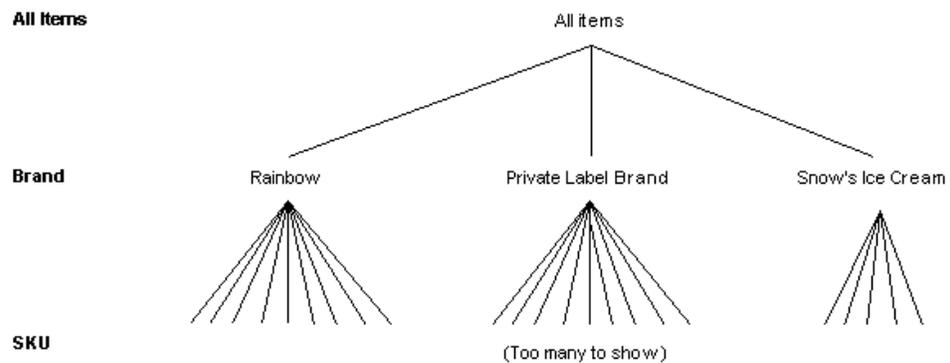

Each level can belong within any number of independent hierarchies, each of which represents a different way of aggregating data. For example, the SKUs

could be organized into product families, which in turn could be organized into divisions as follows, as follows:

In this example, Division, Product Family, and SKU are all levels in Demantra Spectrum.

The SKUs could also be organized into brands as follows:

Note that this hierarchy is independent of the product family hierarchy. That is, there is not necessarily any relationship between brands and product families. Nor is there any relationship between brands and divisions.

Given these relationships, a member can have parents. For example, consider the SKU member Rainbow LF Chocolate Chip. This SKU might have the following parents:

- Regular (parent of this SKU within the product family level)
- Rainbow (parent of this SKU within the brand level)

**level series**

A series that is associated with a specific level. Each data point in the series corresponds to a given member of that level. Data for this series is stored in the table associated with the level.

**live combination**

Item-location combination that is neither dead nor young; see *prediction status*.

**location**

A dimension by which you view data. Other typical dimensions are item and time. Each dimension consists of one or more hierarchies of data. For example, the location dimension could be broken down into country and then into states and towns.

**location group**

A set of locations within a *competitive location group (CL)*. Applies only to Promotions Effectiveness.

**matrix level**

See *combination level*.

**matrix series**

A series that consists of time-independent data for each item-location combination. This data is stored in **mdp\_matrix**.

**member**

An element of a *level*. Each level contains one or more members. For example, at the city level, members may include Paris and London.

Each member corresponds to a set of sales data. Each member has properties that apply to the sales data at that level, such as unit, description, and an identifying code.

There are several types of member

Real	Member that was created by import and that has sales data. Most members are real.
New	Member that was created by import but that does not yet have sales data. When sales data is loaded for this member, it will become real.
User-defined or <i>fictive</i>	Member that you have created via one of the following: <ul style="list-style-type: none"> <li>Members Browser in a Web-based worksheet.</li> <li>Member Management in Demand Planner and Demand Replenisher.</li> </ul>

When this member is loaded via import, it will become new or real, depending on whether it has sales data.

**member management**

The process of creating, editing, and deleting level *members*.

**Members Browser**

A collapsible tree hierarchy of item and location levels. Within a Promotions Effectiveness worksheet, you use the Members Browser to specify which item-location combination the worksheet should display.

**method**

An action that can be performed for a specific member within a worksheet. Methods appear as options within the right-click menu. A method is associated with a specific level and may be available only within a specific worksheet or within all worksheets.

**model**

Mathematical model that the Analytical Engine uses when creating a forecast.

**note**

A comment that you attach to data in a worksheet. A note is generally associated with specific items and locations, on one or more dates. A note can include an *attachment*.

**off-invoice settlement**

A kind of *settlement* that represents the case where the customer was billed a lower amount (that is, “off invoice”) for the products, as compensation for running the promotion.

**outlier**

An atypical observation, generally infrequent; a data point that does not appear to follow the characteristic distribution of the rest of the data. Outliers may reflect genuine properties of the underlying phenomenon (variable), or may be caused by measurement errors or other anomalies that should not be modeled.

Some of the Demantra Spectrum forecast models automatically identify and exclude outliers, and Demantra Spectrum indicates when that occurs. You can manually identify outliers as well.

**POS data**

Point-of-sale data.

**prediction status**

When generating forecasts, the engine considers the prediction status of each item-location combination. Prediction status is one of the following:

Status	Description
Young	Sales for this combination are too new to be used for prediction.
Dead	Sales for this combination are not recent enough to be used for prediction.
Live	Neither young nor dead. Also called <i>active</i> .
Create Zero Forecast	A user has specified this prediction status manually for this item-location combination, and this status means that this combination should have a forecast consisting of zero values.

The Analytical Engine ignores any young or dead combinations.

**program group**

A collection of menu items, typically related to each other in some way. You create program groups so that you can easily control access to all the menu items in the group. Demantra Spectrum provides several predefined program groups, for convenience.

**proof of performance**

Also known as POP. A document that shows that the retailer did run the promotion as required by agreement. POP is usually required before you can approve a settlement. You generally use an *attachment* to provide proof of performance.

**promotion**

A marketing event associated with specific items at specific locations during a specific time. You generally run promotions in order to increase demand.

**promotion series**

A series that consists of data for each promotion at each item-location combination, at each time bucket.

**promotional causal factor**

A set of time-varying data associated with specific items at specific locations during a specific time. Applies only to Promotions Effectiveness.

**proport**

Mechanism that Demantra Spectrum uses for splitting aggregated data across the corresponding lowest-level members. Demantra Spectrum splits data on many occasions, including the following:

- When the Analytical Engine generates a forecast at an aggregated level
- When data is imported at an aggregated level
- When users edit aggregated data
- When users perform chaining at an aggregated level.

**proportions**

Split proportions used by the *proport* mechanism.

**sales series**

A series that consists of time-dependent data for each item-location combination. That is, each data point in the series corresponds to a given item-location combination at a given point in time. This type of series is the most common type by far.

**seasonality**

If historical data has a regular pattern of observations above and below a trend, the data is said to be seasonal. Seasonality is generally observed in data compiled on a less than annual basis (for example, quarterly or monthly).

**series**

Usually, a time-dependent set of data. For example, sales data and the forecast are both series. Although most series are time-dependent, Demantra Spectrum supports other types of special-purpose series: *matrix series* and *level series*.

A series can be defined by a *server expression*, a *client expression*, or both. In general, the definition of a series describes how data for that series should be calculated at any aggregation level.

- Some series are calculated by aggregated data from the lowest level stored in the database. Data can be aggregated in various ways, for example by totalling it, or by taking the maximum or the minimum value. To see data changes in this kind of series, you must rerun the worksheet.
- Some series are calculated at the level of the worksheet, using data currently available at the worksheet level. Data changes are available immediately.

Also, when you edit data for a series, Demantra Spectrum calculates the values for the lowest level and writes that to the database. This means that worksheets run more quickly at lower levels than at higher levels.

**server expression**

The SQL expression that calculates the series data at any level by aggregating the associated lowest-level data. A very common server expression has the following form:

**sum** (*table\_name.update\_column\_name*)

Here *table\_name.update\_column\_name* is the table and column that stores data for this series. The server expression often includes the unit of measure in which results are expressed.

A *client expression* takes precedence over a server expression.

**settlement**

An agreement between a manufacturer and a retailer in which the retailer runs a specified promotion (to boost sales of a specific product or products) and the manufacturer agrees to compensate the retailer for this action. In some cases, this agreement is negotiated by a third party, namely, a broker.

See *claim*, *deduction*, and *off-invoice settlement*.

**simulation**

A ‘what if’ scenario in which a user may manipulate measure data (such as History) and examine the way in which the changes affect related measure data (such as Forecasts).

**simulation mode**

A mode in which you can run the Analytical Engine. In this mode, you perform evaluate a scenario, to see what might happen in a given situation. In contrast to batch mode, you use only a small part of the forecast tree and a comparatively small set of data series.

**splitting**

In general, *splitting* refers to the general process of dividing an aggregated amount into appropriate parts. See *proport*.

**switching effect**

Generic term for the effect that a sale for a given item-location combination can have on sales for another item-location combination. Applies only to Promotions Effectiveness.

**task**

A unit of work shown in the **My Tasks** module. A task generally consists of a request for a specific user or set of users to review a given *worksheet*; the task has a subject line, a description, and a message; it can include a Web link, as well as an attached file. Each task has a status and sometimes a timeout period. After you address the task, you should mark it as done so that the Workflow Engine can continue with the next steps in the workflow.

(The workflow can also send email to a task recipient, via the external email system, but that email has no direct effect on the workflow.)

Depending on how Collaborator Workbench has been configured, users may also be able to create tasks and send them to other users.

**time**

A dimension by which you view data. Other typical dimensions are item and location.

**time bucket**

Depending on context, this phrase refers to any of the following:

- The *base time buckets*.
- A specific period of time corresponding to a time unit (the week of 1/3/05).
- The data associated with that period of time (the data associated with the week of 1/3/05). If you consider a set of series as a spreadsheet, with time as the horizontal axis, then a time bucket is a vertical slice of the data.
- A *time unit* (a week).

**time level**

A level that aggregates data across time. Depending on your system, time levels are configured to enable you to analyze data by the specific month of the year, day of the week, and so on.

**time resolution**

In general, time resolution specifies the amount of visible detail for time-dependent data. Specifically, it refers the time unit by which this data is grouped, for example, by months or weeks. See also *time unit*.

**time unit**

A unit of time in Demantra Spectrum, such as day, week, month, and others, including the months of a *4-4-5 calendar*.

The *base time unit (or minimum time unit)* is the smallest length of time that your data model represents. This can be either a day, a week, or a month, by default; smaller buckets are possible but require custom work. The size of the base time unit determines the *maximum possible time resolution* of your model.

**trend**

The long-term behavior of data, over time.

**unapproved trade**

In general, this refers to *settlements* that have been matched to *promotions* and that have not yet approved. See also *approved trade*.

**unresolved trade**

In general, this refers to *settlements* that are either new or in progress.

**waterfall chart**

A chart or table that displays both the current version and past versions of the same data.

**workflow**

An automated sequence of steps, some automatic and some that require user input. A typical workflow sends tasks to users (to appear in **My Tasks** module) in response to conditions within the demand chain process.

**worksheet**

A set of data retrieved from the Demantra Spectrum database. In a worksheet, you specify information such as following:

- At least one series to retrieve from the database
- The levels of aggregation to view in the worksheet
- Optional filtering to set the scope of the worksheet

A worksheet can be public (shared with other Demantra Spectrum users) or private. Only the owner of a worksheet can edit it.

A worksheet is also known as a *query*.

**x-axis**

The horizontal axis of a worksheet graph and correspondingly, the vertical axis of a worksheet table.

**y-axis**

The vertical axis of a worksheet graph and correspondingly, the horizontal axis of a worksheet table.

**young combination**

Item-location combination for which sales are too new to be used for prediction.  
See also *prediction status*.

**zero history**

Historical data consist of zero sales. You usually create zero history for combinations you create via Member Management, so that there are placeholder records that you can edit.
