

Oracle® Retail Price Management

Release Notes

Release 14.1.3.2

F36056-01

November 2020

Oracle Retail Price Management (RPM) Release 14.1.3.2 is a patch release for RPM 14.1.3.2.

RPM 14.1.3.2 includes selected defect fixes and enhancements for RPM 14.1.3 code. Oracle Customer Support investigates submitted issues assuming that all released updates have been applied. It is the customer's decision when to apply a new release; however, delays in applying updates can complicate the support process.

About Patch Releases

Oracle Retail patch releases are periodic releases that can include new defect fixes and product enhancements.

Documentation for patch releases includes the following:

- New and updated guides (for example, operations and user guides) that apply to the patch release level.

See the *Oracle Retail Price Management Installation Guide* for Release 14.1.3.2 for instructions about how to apply the defect fixes and enhancements that you have not already installed.

Applying a Patch Release

Before applying the RPM 14.1.3.2 patch release, be sure that:

- RPM 14.1.3 has been installed.

Before applying the release over your files:

- Note whether any modules have been customized. If so, the customizations must be reapplied to the new version of the module, or the fix may need to be applied to the custom version of the code.
- Copy the original files to a different directory before you copy over them, in case you need to refer to them at a later date.

Back up data before running any script, because the scripts provided *do not* preserve data. See defect reports for details.

Check with your database administrator to determine whether your database should be analyzed after a script is run. In many cases, analysis of the database is necessary to take advantage of new or modified indexes intended to improve performance of the application.

Hardware and Software Requirements

See the *Oracle Retail Price Management Installation Guide, Release 14.1.3.2* for information about the following:

- Hardware and software requirements

Technical Enhancements

The following technical enhancements are included in this release:

Database Server Support

Oracle Retail Price Management 14.1.3.2 is supported for use with the following database servers:

- Oracle Database Server 12c (12.1.0.2)
- Oracle Database Server 19c (19.3.0.0.0)

Fusion Middleware Support

Oracle Retail Price Management Release 14.1.3.2 is supported for use with the following Fusion Middleware components:

- Oracle WebLogic Server 12.2.1.4

Browser Support

Oracle Retail Price Management Release 14.1.3.2 is supported for use with the following browser:

- Mozilla Firefox Extended Support Release 60+
- Chrome (Desktop) 73+
- Internet Explorer 11

Noteworthy Defect Fixes

The following defect fixes and enhancements are included in RPM 14.1.3.2. This is not a complete list; see the cross-reference spreadsheet and defect reports for a complete list and full details.

Defect Number	Description
30714192	Future clearances cannot be approved in RPM when a previous clearance reset has been executed in the same day for the same item and location.
28193648	No conflict check error occurs when updating 1st promotion from approved to worksheet with best deal promotion set up.
28300872	Fatal error appears when attempting to view conflict error details.
27656079	PromotionPriceChangePublishBatch is not generating publish data file per location.
