

# Oracle® Retail Merchandising System

Release Notes

Release 15.0.1

E76035-01

June 2016

---

Oracle Retail Merchandising System (RMS) Release 15.0.1 is a patch release for RMS 15.0. RMS 15.0.1 includes selected defect fixes and enhancements for RMS 15.0 code.

Oracle Customer Support investigates submitted issues assuming that all released updates have been applied. It is the customer's decision when to apply a new release; however, delays in applying updates can complicate the support process.

This document contains the following topics:

- [Overview](#)
- [About Patch Releases](#)
- [Hardware and Software Requirements](#)
- [Applying the Patch Release](#)
- [Running Scripts](#)
- [Functional Enhancement](#)
- [Defect Fixes and Documentation](#)
- [Noteworthy Defect Fixes](#)
- [Related Documentation](#)
- [Documentation Accessibility](#)

## Overview

Oracle Retail Merchandising System (RMS) executes core merchandising activities, including merchandise management, inventory replenishment, purchasing, vendor management, and financial tracking.

## About Patch Releases

Oracle Retail patch releases are periodic releases that can include the following:

- New defect fixes
- Product enhancements
- Technical upgrades

Documentation for patch releases includes the following:

- New and updated guides (for example, operations and user guides) that apply to the patch release level. See [Related Documentation](#) for a list of the documents published for RMS 15.0.1.
- Defect reports for new fixes and enhancements for the patch release.

---

---

**Note:** Customers must apply the entire patch release to update their installation to the currently supported level.

---

---

See the *Oracle Retail Merchandising System Installation Guide* for Release 15.0.1 for instructions about how to apply the defect fixes and enhancements that you have not already applied.

## Hardware and Software Requirements

See the *Oracle Retail Merchandising Installation Guide* for additional information about the following:

- Hardware and software requirements
- Oracle Retail application software compatibility

## Applying the Patch Release

Before applying the RMS 15.0.1 patch release, be sure that:

- RMS 15.0 has been installed.

Before applying the new files over your code:

- Note whether any modules have been customized. If so, the customizations must be reapplied to the new version of the module, or the fix may need to be applied to the custom version of the code.
- Copy the original files to a different directory before you copy over them, in case you need to refer to them at a later date.

## Running Scripts

Back up data before running any script, because the scripts provided *do not* preserve data. See defect reports for details.

Check with your database administrator to determine whether your database should be analyzed after a script is run. In many cases, an analysis of the database is necessary to take advantage of new or modified indexes intended to improve performance of the application.

## Functional Enhancement

The following functional enhancement is included in this release:

Defect	Description
20172469	<p>Unable to create a customer order (CO) fulfillment request for a virtual warehouse:</p> <p>Retailers could be asked to fulfill e-commerce customer orders from both the digital and retail virtual warehouses. Oracle's standard integration/processing of fulfillment orders use the source virtual warehouse based on the virtual store representing the Web site and the physical warehouse. For some retailers, this will always be the digital virtual warehouse. This conflicts with the business requirement, where stock from the retail virtual warehouse should be used if there is an insufficient inventory in the digital virtual warehouse.</p> <p>With this enhancement, RMS supports both types of warehouses: the physical or the virtual warehouse. A CO fulfillment request for a virtual warehouse other than the e-Commerce virtual warehouse is created.</p>

## Defect Fixes and Documentation

A defect fix is a modification to the base Oracle Retail code (for example, a bug fix, a performance enhancement, or a functional enhancement). Each defect fix that is included in this patch has a corresponding defect report titled *<defect-number>.PDF* (for example, 1234567.PDF) that is posted to My Oracle Support at the following location: Oracle Retail Defect Document Listings (MOS ID:2021275.1).

In the same folder, the file named **DEFECT MODULE XREF RMS 15.0.1.XLS** lists every defect number and the modules and scripts that are included in the patch. Review each defect report carefully before implementing the defect fixes. Note that scripts do not preserve data. Make sure that all data is backed up before you run any script.

## Noteworthy Defect Fixes

The following noteworthy defects are fixed in this release:

Defect	Description
22933490	Applying an item location takes over forty minutes because of a new DE_TABLE_IL_AIUDR trigger.
21914889	Invoice Quantity value differs from that being received for an ERS supplier.
23006500	XITEMUDAMOD fails in the Oracle Retail Integration Bus (RIB) when a record already exists in the SVC_UDA_ITEM_LOV table.
22980714	The EDIDLINV batch generates an EDI file with a tax rate of zero when expecting a null value.
21862778	Below trans-level items are not recorded in the POS_MODS table.
22873413	OLD_UNIT_RETAIL and NEW_UNIT_RETAIL columns are incorrectly booked in complex promotions.
22863619	One day deals are removed from the Not Received purchase orders.
21870979	XITEM does not update the ITEM_MASTER.ORIGINAL_RETAIL field.
22747455	Future cost is incorrectly updated when there is more than one exclusive off-invoice.
22709944	Allocation ranging non-sellable packs to store.

Defect	Description
22546066	Late sales posted incorrectly for a clearance item that is active.
21942269	Sales upload fails with an "Unable to get a stable set of rows" error for an ITEM_LOC.
22068825	You cannot restrict the ship function in the <b>Options</b> menu in the FM_RTV form. While applying the patch, be sure to run the populate_sec_form_action.sql installer script in the Maintenance mode (that is, pass input as 'M').

## Related Documentation

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

**Licensing Note:** This media pack includes a Restricted Use license for Oracle Retail Predictive Application Server (RPAS) - Enterprise Engine to support Oracle® Retail Analytic Parameter Calculator for Regular Price Optimization only.

**Value-Added Reseller (VAR) Language**

**Oracle Retail VAR Applications**

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

(i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.

(ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.

(iii) the software component known as **Access Via™** licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.

(iv) the software component known as **Adobe Flex™** licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.
